FORM 8-K

Current Report

Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934

Date of Report (Date of Earliest Event Reported): August 25, 2008

UGoldRich Mining Company

(Exact Name of Registrant as Specified in its Charter)

Alaska
(State or other jurisdiction of incorporation)

001-06412
(Commission File Number)

91-0742812
(IRS Employer
Identification No.)

3412 S Lincoln Drive, Spokane WA 99203-1650
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: U(509) 624-5831

UN/A

(Former Name or Former Address if Changed Since Last Report)

Check the appropriate box below if the Form 8K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

Written communications pursuant to Rule 425 under the Securities Act (17CFR230.425)

Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17CFR 240.14a-12)

Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

Pre-commencement communication pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

SEC 873 (5-06)

Potential persons who are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB control number.

Item 8.01 Other Events

On August 25, 2008, Goldrich Mining Company (Goldrich or the Company) reported drill results completed at the La Jarra zone of the Marisol bulk-tonnage gold prospect in northern Sonora, Mexico. The diamond-core drill holes are the last two drill holes of a ten-hole program evaluating the grade and continuity of mineralization at the property.

The La Jarra zone is within the concessions controlled by Goldrich, through its Mexico subsidiary Minera LSG, S.A. de C.V. The area is located approximately 1,700 meters (approximately 1 mile) southwest of the Marisol area and includes several small underground workings. La Jarra is situated proximal to a major northeast/southwest-trending structure that separates Jurassic volcanic rocks (on the northwest side) from mineralized calcareous and siliciclastic sediments (on the southeast side). This same structure hosts several small underground workings in the Marisol area.

The table below presents the gold and silver values realized from the La Jarra area drill holes.

DRILL HOLE	FROM meters	TO meters	INTERVAL	Au	Au	Ag	Ag
			meters (feet)	g/ tonne	oz/short ton	g/ tonne	oz/ short ton
			9.9				
MAR-9	21.55	31.45	(32.48)	0.115	0.003	2.47	0.1
			16.65				
	37.65	54.3	(54.6)	0.337	0.010	39.49	1.2
			1.2				
*including:	50.3	51.5	(3.94)	3.720	0.109	524.00	15.3
*	interval includes 12.25% Pb (lead)		3.0				
MAR-10	8.25	11.25	(9.84)	0.228	0.007	2.45	0.1

Eight drill holes completed earlier at the Marisol area tested 330 meters (1,080 feet) of strike length along the Marisol structure. The holes were reported in the Company's June 30, 2008 press release. In that press release, the calculation for gold converted from grams per tonne to ounces per short ton, was in error. The table below sets forth the corrected calculation for gold in ounces per short ton.

DRILL HOLE	FROM meters	TO meters	INTERVAL	Au	Corrected
------------	-------------	-----------	----------	----	-----------

Edgar Filing: GOLDRICH MINING CO - Form 8-K

			meters (feet)	g/ tonne	Au oz/ short ton
			3.0		
MAR-1	25.5	28.5	(9.84)	3.060	0.089
			3.05		
	135.95	139	(10.00)	0.206	0.006
			5.85
