Edgar Filing: URANERZ ENERGY CORP. - Form 8-K

Item 7.01. Regulation FD Disclosure.

On February 27, 2008, the Registrant filed the attached Technical Report on the Arkose Mining Venture Project, Campbell & Johnson Counties, Wyoming, U.S.A. dated February 27, 2008 (the NI 43-101 Technical Report) with securities regulatory authorities in Canada, pursuant to applicable Canadian securities laws and the rules of Toronto Stock Exchange. It is hereby being furnished to the Securities and Exchange Commission (SEC) on Form 8-K to satisfy the Company s public disclosure obligations under Regulation FD of the SEC.

The NI 43-101 Technical Report was prepared in accordance with National Instrument 43-101 of the Canadian Securities Administrators (NI 43-101) by the authors, Mr. Douglass Graves, P.E. of TREC, Inc. and Mr. Don Woody, P.G. of Woody Enterprises, each an independent qualified person as defined by NI 43-101. As a company listed on the Toronto Stock Exchange, the Registrant was required to prepare the NI 43-101 Technical Report in accordance with NI 43-101, pursuant to applicable Canadian securities laws and the rules of the Toronto Stock Exchange.

The NI 43-101 Technical Report is a requirement of NI 43-101 and includes estimations of potential mineral resources for further targeted exploration by the issuer disclosed pursuant to the applicable provisions of NI 43-101, as described herein. U.S. reporting requirements for disclosure of mineral properties are governed by the United States Securities and Exchange Commission and included in the SEC s Securities Act Industry Guide 7 entitled Description of Property by Issuers Engaged or to be Engaged in Significant Mining Operations (Guide 7). NI 43-101 and Guide 7 standards are substantially different. For example, the terms mineral reserve, proven mineral reserve and probable mineral reserve are Canadian mining terms as defined in accordance with NI 43-101. These reserve definitions differ from the reserve definitions in Guide 7. Under Guide 7 standards, a final or bankable feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

The NI 43-101 Technical Report uses the terms mineral resource, potential uranium exploration target, potential mineral resource, potential mineral deposit and potential target mineral resource. U.S. Investors are advised that these terms and concepts are set out in and required to be disclosed by NI 43-101 as information material to the issuer; however, these terms and concepts are not recognized by the SEC or included in Guide 7, and these terms and concepts are normally not permitted to be used in reports and registration statements filed with the SEC. U.S. Investors should be aware that the issuer has no reserves as defined by Guide 7 and are cautioned not to assume that any part or all of potential target mineral resources will ever be confirmed or converted into Guide 7 compliant reserves. Potential target mineral resources are strictly uncertain as to their existence, and strictly uncertain as to their economic and legal feasibility. It cannot be assumed that all or any part of a potential target mineral resource will ever be upgraded to a higher category of certainty. Under Canadian rules, estimates of potential target mineral resources may not form the basis of feasibility or pre-feasibility studies. U.S. Investors are cautioned not to assume that all or any part of a potential target mineral resource exists, or is economically or legally mineable. Disclosure of contained pounds in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute Guide 7 compliant reserves by SEC standards as in-place tonnage and grade without reference to unit measures.

On February 28, 2008, the Registrant also issued the attached press release relating to the NI 43-101 Technical Report.

Item 9.01. Exhibits.

The following Exhibits relating to Item 7.01 are intended to be furnished to, not filed with, the SEC pursuant to Regulation FD.

(99.1) Press Release dated February 28, 2008

Edgar Filing: URANERZ ENERGY CORP. - Form 8-K

(99.2) Technical Report on the Arkose Mining Venture Project, Campbell & Johnson Counties, Wyoming, U.S.A. dated February 27, 2008
