Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class

**Common Stock, par value \$.01 per share**

Name of Each Exchange on Which Registered

**New York Stock Exchange**

Securities registered pursuant to Section 12(g) of the Act:

**None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicated by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by checkmark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Large accelerated filer   
Non-accelerated filer

Accelerated filer   
Smaller reporting company

Indicate by check mark whether registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

The aggregate market value of the registrant's voting common equity held by non-affiliates of the registrant on the last business day of the registrant's most recently completed second fiscal quarter, computed by reference to the last sale price of such stock of \$14.99 per share as of June 30, 2010 on the New York Stock Exchange, was approximately \$387.0 million. The registrant has no non-voting common equity issued and outstanding. The determination of affiliate status for purposes of this paragraph is not necessarily a conclusive determination for any other purpose.

The number of shares outstanding of the registrant's common stock as of March 9, 2011 was 35,951,198, shares.

### DOCUMENTS INCORPORATED BY REFERENCE

Portions of our Proxy Statement for the 2011 Annual Meeting of Stockholders, to be filed with the Securities and Exchange Commission not later than 120 days after December 31, 2010, are incorporated by reference in Part III herein.

---

## PART I

### ITEM 1. BUSINESS

#### OVERVIEW

We are a New York City-based company, incorporated in the Marshall Islands in 2004. We transport iron ore, coal, grain, steel products and other drybulk cargoes along worldwide shipping routes through the ownership and operation of drybulk carrier vessels. Excluding vessels of Baltic Trading Limited ( *Baltic Trading* ), our fleet currently consists of 49 drybulk carriers, including nine Capesize, eight Panamax, 16 Supramax, six Handymax and ten Handysize drybulk carriers, with an aggregate carrying capacity of approximately 3,649,000 dwt. The average age of our current fleet is approximately 6.3 years, as compared to the average age for the world fleet of approximately 15 years for the drybulk shipping segments in which we compete. All of the vessels in our fleet were built in shipyards with reputations for constructing high-quality vessels. After the expected delivery of three Handysize vessels and one Supramax vessel that we have agreed to acquire, we will own a fleet of 53 drybulk vessels, consisting of nine Capesize, eight Panamax, 17 Supramax, six Handymax and 13 Handysize vessels, excluding the vessels of *Baltic Trading*. The majority of the vessels in our fleet are currently on time charter contracts or spot market-related time charters and have an average remaining life of approximately 9.7 months as of December 31, 2010. Five of our vessels currently operate in the Lauritzen Pool. Under a pool arrangement, the vessels operate under a time charter agreement whereby the cost of bunkers and port expenses are borne by the pool and operating costs including crews, maintenance and insurance are typically paid by the owner of the vessel. Since the members of the pool share in the revenue generated by the entire group of vessels in the pool, and the pool operates in the spot market, the revenue earned by these five vessels are subject to the fluctuations of the spot market. Most of our vessels are chartered to well-known charterers, including Lauritzen Bulkcarriers A/S or LB/IVS Pool, in which Lauritzen Bulkcarriers A/S acts as the pool manager (collectively, *Lauritzen Bulkcarriers* ), Cargill International S.A. ( *Cargill* ), Pacific Basin Chartering Ltd. ( *Pacbasin* ), STX Panocean (UK) Co. Ltd. ( *STX* ), COSCO Bulk Carriers Co., Ltd. ( *Cosco* ), and Hyundai Merchant Marine Co. Ltd. ( *HMM* ).

In addition, *Baltic Trading*'s fleet currently consists of two Capesize, four Supramax and three Handysize drybulk carriers with an aggregate carrying capacity of approximately 672,000 dwt.

We intend to continue to grow our fleet through timely and selective acquisitions of vessels in a manner that is accretive to our cash flow. In connection with the acquisitions made during 2007 through 2010 and our growth strategy, we negotiated the 2007 Credit Facility, \$100 Million Term Loan Facility, \$253 Million Term Loan Facility and the 2010 *Baltic Trading* Credit Facility (each as defined herein) that we have used to acquire vessels.

On June 3, 2010, we entered into an agreement to purchase a total of eight Handysize drybulk vessels, including five newbuildings, from companies within the Metrostar Management Corporation group of companies ( *Metrostar* ) for an aggregate purchase price of \$266.0 million. Five of these vessels will be owned by us and three are owned by *Baltic Trading*. Additionally, on June 24, 2010, we entered into a Master Agreement with Bourbon SA ( *Bourbon* ) to purchase 16 drybulk vessels, including two newbuildings, for an aggregate purchase price of \$545.0 million. We will retain 13 of the 16 vessels, including one newbuilding, and the remaining three vessels were immediately resold to Maritime Equity Partners LLC ( *MEP* ), a company controlled by our Chairman, Peter C. Georgiopoulos, at their cost to us. Refer to Note 5 Vessel Acquisitions and Dispositions in our consolidated financial statements for further information. A total of five vessels have been delivered from *Metrostar* and a total of 15 vessels have been delivered from *Bourbon*, three of which were sold to *MEP*. The remaining four vessels are all planned to be delivered between March and November 2011.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

In order to fund the acquisition of these vessels, we entered into two senior secured term loan facilities. On August 12, 2010, we entered into our \$100 Million Term Loan Facility to be utilized to fund or refund to us a portion of the purchase price of the acquisition of five vessels from Metrostar. On August 20, 2010, we entered into our \$253 Million Term Loan Facility to fund a portion of the purchase price of the acquisition of 13 vessels from Bourbon. The Baltic Trading vessels have been funded utilizing the 2010 Baltic Trading Credit Facility for bridge financing.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Our management team and our other employees are responsible for the commercial and strategic management of our fleet. Commercial management includes the negotiation of charters for vessels, managing the mix of various types of charters, such as time charters, voyage charters and spot market-related time charters, and monitoring the performance of our vessels under their charters. Strategic management includes locating, purchasing, financing and selling vessels. We currently contract with three independent technical managers to provide technical management of our fleet at a lower cost than we believe would be possible in-house. Technical management involves the day-to-day management of vessels, including performing routine maintenance, attending to vessel operations and arranging for crews and supplies. Members of our New York City-based management team oversee the activities of our independent technical managers.

From time to time in the current global economic environment, our charterers with long-term time charters may request to renegotiate the terms of our charters with them. As a general matter, we do not agree to make changes to the terms of our charters in response to such requests. The failure of any charterer to meet its obligations under our long-term time charters could have an adverse effect on our results of operations.

We hold an investment in the capital stock of Jinhui Shipping and Transportation Limited ( Jinhui ). Jinhui is a drybulk shipping owner and operator focused on the Supramax segment of drybulk shipping.

Baltic Trading, formerly a wholly-owned subsidiary of the Company, completed its initial public offering, or IPO, on March 15, 2010. As of December 31, 2010, the Company's wholly-owned subsidiary Genco Investments LLC owned 5,699,088 shares of Baltic Trading's Class B Stock, which represents a 25.24% ownership interest in Baltic Trading at December 31, 2010 and 83.51% of the aggregate voting power of Baltic Trading's outstanding shares of voting stock. Baltic Trading is consolidated with the Company as we control a majority of the voting interest in Baltic Trading. Management's discussion and analysis of the Company's results of operations and financial condition in this section includes the results of Baltic Trading.

We entered into a long-term management agreement (the Management Agreement) with Baltic Trading pursuant to which we apply our expertise and experience in the drybulk industry to provide Baltic Trading with commercial, technical, administrative and strategic services. The Management Agreement is for an initial term of approximately 15 years and will automatically renew for additional five-year periods unless terminated in accordance with its terms. Baltic Trading will pay us for the services we provide it as well as reimburse us for our costs and expenses incurred in providing certain of these services. Management fee income we earn from the Management Agreement net of any allocated shared expenses, such as salary, office expenses and other general and administrative fees, will be taxable to us. Upon consolidation with Baltic Trading, any management fee income earned will be eliminated for financial reporting purposes.

We provide technical services for drybulk vessels purchased by MEP under an agency agreement between us and MEP. These services include oversight of crew management, insurance, drydocking, ship operations and financial statement preparation, but do not include chartering services. The services are provided for a fee of \$750 per ship per day plus reimbursement of out-of-pocket costs and will be provided for an initial term of one year. MEP will have the right to cancel provision of services on 60 days' notice with payment of a one-year termination fee or without a fee upon a Company change of control. The Company may terminate provision of the services at any time on 60 days notice. Mr. Georgiopoulos is a minority investor, and affiliates of Oaktree Capital Management, L.P., of which Stephen A. Kaplan is a principal, are majority investors in MEP. This arrangement was approved by an independent committee of our Board of Directors.

### AVAILABLE INFORMATION

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

We file annual, quarterly and current reports, proxy statements, and other documents with the SEC, under the Securities Exchange Act of 1934, or the Exchange Act. The public may read and copy any materials that we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Also, the SEC maintains an Internet website that contains reports, proxy and information statements, and other information regarding issuers, including us, that file electronically with the SEC. The public can obtain any documents that we file with the SEC at [www.sec.gov](http://www.sec.gov).

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

In addition, our company website can be found on the Internet at [www.gencoshipping.com](http://www.gencoshipping.com). The website contains information about us and our operations. Copies of each of our filings with the SEC on Form 10-K, Form 10-Q and Form 8-K, and all amendments to those reports, can be viewed and downloaded free of charge after the reports and amendments are electronically filed with or furnished to the SEC. To view the reports, access [www.gencoshipping.com](http://www.gencoshipping.com), click on Investor, then SEC Filings. No information on our company website is incorporated by reference into this annual report on Form 10-K.

Any of the above documents can also be obtained in print by any shareholder upon request to our Investor Relations Department at the following address:

Corporate Investor Relations

Genco Shipping & Trading Limited

299 Park Avenue, 20th Floor

New York, NY 10171

### **BUSINESS STRATEGY**

Our strategy is to manage and expand our fleet in a manner that maximizes our cash flows from operations. To accomplish this objective, we intend to:

- *Strategically expand the size of our fleet* - We intend to acquire additional modern, high-quality drybulk carriers through timely and selective acquisitions of vessels in a manner that is accretive to our cash flows. We expect to fund acquisitions of additional vessels using cash reserves set aside for this purpose, debt and utilizing equity financing alternatives.
- *Continue to operate a high-quality fleet* - We intend to maintain a modern, high-quality fleet that meets or exceeds stringent industry standards and complies with charterer requirements through our technical managers' rigorous and comprehensive maintenance program. In addition, our technical managers maintain the quality of our vessels by carrying out regular inspections, both while in port and at sea.
- *Pursue an appropriate balance of time and spot charters* - All of our 49 vessels, excluding those of Baltic Trading, are under time charters, spot market-related time charters or pool agreements with an average remaining life of approximately 9.7 months as of December 31, 2010. Charters under fixed rate contracts provide us with relatively stable revenues, and charterers under spot market-related time charters provide us with market revenues, both of which provide the Company with a high fleet utilization. We may in the future pursue other market opportunities for our vessels to capitalize on market conditions, including arranging longer or shorter charter periods and entering into short-term time charters, voyage charters and use of vessel pools.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

- *Maintain low-cost, highly efficient operations* - During the year ended December 31, 2010, we outsourced technical management of our fleet, primarily to Wallem Shipmanagement Limited ( Wallem ), Anglo-Eastern Group ( Anglo ), and V.Ships Limited ( V.Ships ), third-party independent technical managers, at a cost we believe is lower than what we could achieve by performing the function in-house. Our management team actively monitors and controls vessel operating expenses incurred by the independent technical managers by overseeing their activities. Finally, we seek to maintain low-cost, highly efficient operations by capitalizing on the cost savings and economies of scale that result from operating sister ships.
  
- *Capitalize on our management team's reputation* - We will continue to capitalize on our management team's reputation for high standards of performance, reliability and safety, and maintain strong relationships with major international charterers, many of whom consider the reputation of a vessel owner and operator when entering into time charters. We believe that our management team's track record improves our relationships with high quality shipyards and financial institutions, many

of which consider reputation to be an indicator of creditworthiness.

## OUR FLEET

The table below summarizes the characteristics of our vessels, including those of Baltic Trading:

### Genco Shipping & Trading Limited:

Vessel	Class	Dwt	Year Built
Genco Augustus	Capesize	180,151	2007
Genco Claudius	Capesize	169,025	2010(1)
Genco Constantine	Capesize	180,183	2008

Baltic Panther	Supramax	53,351	2009
Baltic Breeze	Handysize	34,386	2010
Baltic Cove	Handysize	34,403	2010
Baltic Wind	Handysize	34,409	2009

### **FLEET MANAGEMENT**

Our management team and other employees are responsible for the commercial and strategic management of our fleet. Commercial management involves negotiating charters for vessels, managing the mix of various types of charters, such as time charters, voyage charters and spot market-related time charters, and monitoring the performance of our vessels under their charters. Strategic management involves locating, purchasing, financing and selling vessels.

We utilize the services of reputable independent technical managers for the technical management of our fleet. We currently contract with Wallem, Anglo and V.Ships, independent technical managers, for our technical management. Technical management involves the day-to-day management of vessels, including performing routine maintenance, attending to vessel operations and arranging for crews and supplies. Members of our New York City-based management team oversee the activities of our independent technical managers. The head of our technical management team has over 30 years of experience in the shipping industry.

Wallem, founded in 1971, Anglo, founded in 1974 and V.Ships, founded in 1984, are among the largest ship management companies in the world. These technical managers are known worldwide for their agency networks, covering all major ports in China, Hong Kong, Japan, Vietnam, Taiwan, Thailand, Malaysia, Indonesia, the

Philippines and Singapore. These technical managers provide services to over 1,000 vessels of all types, including Capesize, Panamax, Supramax, Handymax and Handysize drybulk carriers that meet strict quality standards.

Under our technical management agreements, our technical manager is obligated to:

- provide personnel to supervise the maintenance and general efficiency of our vessels;
- arrange and supervise the maintenance of our vessels to our standards to assure that our vessels comply with applicable national and international regulations and the requirements of our vessels classification societies;
- select and train the crews for our vessels, including assuring that the crews have the correct certificates for the types of vessels on which they serve;
- check the compliance of the crews licenses with the regulations of the vessels flag states and the International Maritime Organization, or IMO;
- arrange the supply of spares and stores for our vessels; and
- report expense transactions to us, and make its procurement and accounting systems available to us.

## OUR CHARTERS

As of March 9, 2011, excluding Baltic Trading, we employed 25 of our 49 drybulk carriers under time charters. A time charter involves the hiring of a vessel from its owner for a period of time pursuant to a contract under which the vessel owner places its ship (including its crew and equipment) at the disposal of the charterer. Under a time charter, the charterer periodically pays a fixed daily charterhire rate to the owner of the vessel and bears all voyage expenses, including the cost of bunkers ( fuel ), port expenses, agents fees and canal dues. Three of our vessels on time charters, the Genco Constantine, Genco Titus and Genco Hadrian, are chartered under time charters which include a profit-sharing element. Under these charter agreements, the Company receives a fixed rate of \$52,750, \$45,000 and \$65,000 per day, respectively, and an additional profit-sharing payment. The profit-sharing between the Company and the respective charterer for each 15-day period is calculated by taking the average over that period of the published Baltic Cape Index of the four time charter routes as reflected in daily reports. If such average is more than the base rate payable under the charter, the excess amount is allocable 50% to the Company and 50% to the charterer. The profit sharing amount due to us is net of a 3.75% commission. Additionally, as of March 9, 2011, we employed 19 of our 49 drybulk carriers under spot market-related time charters which are time charters with rates based on published Baltic Indices. These types of charters are similar to time charters with the exception of having a fixed rate over the term of the time charter agreement. As such, the revenue earned by these 19 vessels is subject to the fluctuations of the spot market. Two of these vessels have spot market-related time charters which

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

are linked with a floor of \$8,500 and a ceiling of \$13,500 daily with a 50% profit sharing arrangement to apply to any amount above the ceiling. The rate is based on 115% of the average of the daily rates of the Baltic Handysize index as reflected in daily reports.

The remaining five of our drybulk carriers are currently in a vessel pool. The Genco Explorer, Genco Pioneer, Genco Progress, Genco Reliance and Genco Sugar are in the Lauritzen Pool. We believe that vessel pools provide cost-effective commercial management activities for a group of similar class vessels. The pool arrangement provides the benefits of a large-scale operation and chartering efficiencies that might not be available to smaller fleets. Under the pool arrangement, the vessels operate under a time charter agreement whereby the cost of bunkers and port expenses are borne by the charterer and operating costs including crews, maintenance and insurance are typically paid by the owner of the vessel. Since the members of the pool share in the revenue generated by the entire group of vessels in the pool, and the pool operates in the spot market, the revenue earned by these five vessels is subject to the fluctuations of the spot market.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Subject to any restrictions in the contract, the charterer determines the type and quantity of cargo to be carried and the ports of loading and discharging. Our vessels operate worldwide within the trading limits imposed by our insurance terms. The technical operation and navigation of the vessel at all times remains the responsibility of the vessel owner, which is generally responsible for the vessel's operating expenses, including the cost of crewing, insuring, repairing and maintaining the vessel, costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses.

Each of our current time charters, spot market-related time charters and vessel pool agreements expire within a range of dates (for example, a minimum of 11 and maximum of 13 months following delivery), with the exact end of the time charter left unspecified to account for the uncertainty of when a vessel will complete its final voyage under the time charter. The charterer may extend the charter period by any time that the vessel is off-hire. If a vessel remains off-hire for more than 30 consecutive days, the time charter may be cancelled at the charterer's option.

In connection with the charter of each of our vessels, we incur commissions generally ranging from 1.25% to 6.25% of the total daily charterhire rate of each charter to third parties, depending on the number of brokers involved with arranging the relevant charter.

We monitor developments in the drybulk shipping industry on a regular basis and strategically adjust the charterhire periods for our vessels according to market conditions as they become available for charter.

During the beginning of 2009, the Genco Cavalier, a 2007-built Supramax vessel, was on charter to Samsun Logix Corporation ( Samsun ), when Samsun filed for the equivalent of bankruptcy protection in South Korea, otherwise referred to as a rehabilitation application. On February 5, 2010, the rehabilitation plan submitted by Samsun was approved by the South Korean courts. As part of the rehabilitation process, our claim of approximately \$17.2 million will be settled in the following manner: 34%, or approximately \$5.9 million, will be paid in cash in annual installments on December 30th of each year from 2010 through 2019 ranging in percentages from eight to 17; the remaining 66%, or approximately \$11.3 million, converted to Samsun shares at a specified value per share. During the year ended December 31, 2010, we have recorded \$0.6 million as other operating income which represents 10% of the cash settlement which was due on December 30, 2010.

During January 2011, the Genco Success, a 1997-built Handymax vessel, was on charter to Korea Line Corporation ( KLC ) when KLC filed for the equivalency of bankruptcy protection in South Korea, otherwise referred to as a rehabilitation application. At December 31, 2010, we have limited exposure as a result of the bankruptcy protection filing by KLC. The vessel was redelivered to us by KLC on January 29, 2011. We estimate that we have a claim of approximately \$1.1 million against KLC related primarily to unpaid revenue earned prior to re-delivery of the vessel. If a rehabilitation plan is approved by the South Korean courts and it is determined that we will receive a cash settlement for our outstanding claim, any amounts due from KLC will be recorded once the collectibility of the receivable has been assessed and the amount has been deemed collectible.

The following table sets forth information about the current employment of the vessels currently in our fleet as of March 9, 2011:

Vessel	Year Built	Charterer	Charter Expiration (1)	Cash Daily Rate (2)	Net Revenue Daily Rate (3)
<b><u>Capesize Vessels</u></b>					
Genco Augustus	2007	Cargill International S.A.	December 2011	100% of BCI(4)	

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Genco Tiberius	2007	Cargill International S.A.	September 2011	31,000	
Genco London	2007	Cargill International S.A.	September 2011	31,000	
Genco Titus	2007	Cargill International S.A.	September 2011	45,000(5)	46,250

Genco Rhone	2011 (25)				
<b><u>Handysize Vessels</u></b>					
Genco Avra	2011 (25)	Cargill International S.A.	34.5-37.5 months after delivery	\$8,500-\$13,500 with 50% profit sharing(23)	(27)
Genco Mare	2011 (25)	Cargill International S.A.	45.5-50.5 months after delivery	115% of BHSI(26)	
Genco Spirit	2011 (25)	Cargill International S.A.	34.5-37.5 months after delivery	\$8,500-\$13,500 with 50% profit sharing(23)	(27)

(1) The charter expiration dates presented represent the earliest dates that our charters may be terminated in the ordinary course. Except for the Genco Titus, Genco Constantine, and Genco Hadrian under the terms of each contract, the charterer is entitled to extend the time charters from two to four months in order to complete the vessel's final voyage plus any time the vessel has been off-hire. The charterer of the Genco Titus and Genco Hadrian has the option to extend the charter for a period of one year. The Genco Constantine has the option to extend the charter for a period of eight months.

(2) Time charter rates presented are the gross daily charterhire rates before third-party commissions generally ranging from 1.25% to 6.25%. In a time charter, the charterer is responsible for voyage expenses such as bunkers, port expenses, agents' fees and canal dues.

(3) For the vessels acquired with a below-market time charter rate, the approximate amount of revenue on a daily basis to be recognized as revenues is displayed in the column named Net Revenue Daily Rate and is net of any third-party commissions. Since these vessels were acquired with existing time charters with below-market rates, Genco allocated the purchase price between the respective vessels and an intangible liability for the value assigned to the below-market charter-hire. This intangible liability is amortized as an increase to voyage revenues over the minimum remaining terms of the applicable charters. The minimum remaining term for the Genco Titus is on September 26, 2011, at which point the respective liabilities were or will be amortized to zero and the vessels began or will begin earning the Cash Daily Rate. For cash flow purposes, Genco will continue to receive the rate presented in the Cash Daily Rate column until the charter expires.

(4) We have reached an agreement with Cargill International S.A. at a rate of \$5,000 a day for the first 30 days of the time charter. For the next 20 days hire payment is based on the Baltic Capesize Index C10 round voyage, or BCI - C10 round voyage as reflected in daily reports. The balance period of the charter is based on 100% of the average of the daily rates of the BCI, as reflected in daily reports. The duration of the time charter is 10.5 to 14.5 months with payment being made in arrears less a 5.00% third party brokerage commission. Genco maintains the option to convert the charter to a fixed rate based on 100% of Capesize FFA values. The time charter commenced on January 29, 2011.

(5) These charters include a 50% index-based profit sharing component above the respective base rates listed in the table. The profit sharing between the charterer and us for each 15-day period is calculated by taking the average over that period of the published Baltic Cape Index of the four time charter routes, as reflected in daily reports. If such average is more than the base rate payable under the charter, the excess amount is allocable 50% to each of the charterer and us. A third-party brokerage commission of 3.75% based on the profit sharing amount due to us is payable out of our share.

(6) The Genco Maximus and Claudius delivered to Swissmarine Services S.A. on December 28, 2010 and February 5, 2011, respectively. The duration of the spot-market related time charter for both vessels is 11 to 13.5 months with a hire payment based on 98.5% of the average of the daily rates of the BCI, as reflected in daily reports except for the first 30 days after initial delivery in which the hire will be based on the BCI - C10 round voyage at 98.5%. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert to a fixed rate based on Capesize FFA values at 98.5%.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

(7) We have reached an agreement with Swissmarine Services S.A. for 10.5 to 13.5 months commencing on or about March 23, 2011 at a rate based on 100% of the Baltic Panamax Index, or BPI, as reflected in daily reports. Hire will be paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert to a fixed rate anytime after January 21, 2011, the date in which the spot-market related time charter was agreed upon, based on Panamax FFA values at 100%.

(8) The vessel completed its previous charter on January 10, 2011 and entered into drydocking for its scheduled maintenance. We have reached an agreement with J. Aron & Company on a spot-market related time charter for 11 to 13.5 months at a rate based on 100% of the BPI, as reflected in daily reports except for the initial 40 days after delivery in which hire is based on 100% of the Baltic Panamax P3A. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert to a fixed rate 10 months after delivery based on Panamax FFA values at 100%. The vessel began its new time charter after completion of its drydocking on January 28, 2011.

(9) We have reached an agreement with Global Maritime Investments Ltd. on a spot-market related time charter for 10.5 to 13.5 months at a rate based on 100% of the BPI, as reflected in daily reports except for the initial 50 days after delivery in which hire is based on 100% of the Baltic Panamax P3A. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert to a fixed rate 10 months after delivery based on Panamax FFA values at 100%. The vessel began its new rate on January 28, 2011.

(10) The rate for the spot market-related time charter is based on 97% of the average of the daily rates of the BPI, as reflected in daily reports. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert the balance of any period after the initial 50 days and up to 9.5 months after delivery to a fixed rate based on Panamax FFA values at 97%.

(11) We have reached an agreement with Swissmarine Services S.A. on a spot-market related time charter for 11 to 13.5 months with the rate to be based off 100% of the average of the daily rates of the BPI, as reflected in daily reports except for the initial 45 days after delivery in which hire is based on 100% of the Baltic Panamax P3A. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert the balance of any period after the initial 45 days at a fixed rate based on Panamax FFA values at 100%. The vessel delivered to its current charter on December 23, 2010.

(12) The rate for the spot market-related time charter is based on 102% of the average of the daily rates of the Baltic Supramax Index, or BSI, as reflected in daily reports. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. The Genco Warrior, Auvergne, Languedoc and Brittany delivered to their current charterers following the completion of their previous charters on December 15, 2010, November 30, 2010, December 10, 2010 and January 14, 2011, respectively. For the Warrior, Auvergne and Languedoc, the first 30 days after redelivery is based on the Baltic Supramax Japan-South Korea/North Pacific or Australian Round Voyage (S2) at 102% while the Brittany is on that route for its initial 35 days. Genco maintains the option to convert the balance of any period after the initial 30 days to a fixed rate based on Supramax FFA values at 102% for the Warrior and 100% for the Auvergne, Languedoc and Brittany.

(13) A novation agreement was signed between Genco and Samsun Logix Corporation at a rate of \$20,000 per day, less a 5% third party brokerage commission, with a minimum expiration of April 2011 and a maximum expiration of May 2011. The charter includes a 50% hire-based profit sharing component on the difference between the rate mentioned above and the rate that the charterer has sub-chartered the vessel at for the remainder of the contract's life. The gross effective rate for the duration of this charter is approximately \$21,250 per day.

(14) We have reached an agreement with San Juan Navigation Corporation at a rate of \$8,600 per day less a 5.00% third party brokerage commission. Payment is to be made in advance. The vessel delivered to its current charterer on January 18, 2011.

(15) We have reached an agreement with Trafigura Beheer BV on a spot-market related time charter based on 100% of the average of the daily rates of the BSI, as reflected in daily reports except for the first 35 days after initial delivery in which hire is based on the BSI Japan-South Korea/North Pacific or Australian Round Voyage (S2) at 100%. The duration of the charter is 10.5 to 13.5 months with payment being made in arrears less a 5.00% third party brokerage commission. Genco maintains the option to convert to a fixed rate based on Supramax FFA values at 100%. The vessel delivered to charterers on January 16, 2011.

(16) We have reached an agreement with Swissmarine Services S.A. on a spot-market related time charter for a minimum 11 months with a maximum expiration date of March 15, 2012 at a rate based on 90% of the average of the daily rates of the BSI, as reflected in daily reports except for the first 30 days after initial delivery in which hire payment is based on the BSI Japan-South Korea/North Pacific or Australian Round Voyage (S2) at 90%. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert the balance period after the initial 30 days at a fixed rate based on Supramax FFA values at 90%. The vessel delivered to Swissmarine Services S.A. on February 1, 2011.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

(17) We have reached an agreement with ED & F MAN Shipping Ltd. on a spot-market related time charter for 11 to 13.5 months at a rate based on 92.5% of the average of the daily rates of the BSI, as reflected in daily reports. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert the balance period at a fixed rate based on Supramax FFA values at 92.5%. The vessel delivered to its new charterer on March 8, 2011.

(18) We have reached an agreement with Klaveness Chartering at a rate of \$12,750 per day for the first 30 days of the charter less a 5.00% third party brokerage commission and \$14,150 for the remainder of the charter less a 5.00% third party brokerage

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

commission. The duration of the charter is 8.5 to 11.5 months. The vessel delivered to Klaveness Chartering on December 25, 2010.

(19) We have reached an agreement with STX Pan Ocean Co. Ltd. at a rate of \$12,000 per day beginning on or about April 3, 2011 for one North Pacific round voyage to Japan. Payment will be made in advance less a 5.00% third party brokerage commission. The vessel is scheduled for drydock on May 9, 2011.

(20) We have reached an agreement with Trafigura Beheer BV at a rate of \$12,500 per day less a 5.00% third party brokerage commission. The duration of the charter is a minimum of 2 months with a maximum expiration date of May 15, 2011 as we expect to drydock the vessel at that time. The charter began on January 5, 2011.

(21) We have reached an agreement to enter these vessels into the LB/IVS Pool whereby Lauritzen Bulkers A/S acts as the pool manager. We can withdraw up to two vessels with three months notice and the remaining three vessels with 12 months notice.

(22) The Genco Charger and Challenger delivered to their current charterer following the completion of their previous charters on January 14, 2011 and January 22, 2011, respectively. The rate for the spot-market related time charters are based on 100% of the average of the daily rates of the Baltic Handysize Index, or BHSI, as reflected in daily reports. For the Challenger, the first 30 days after initial delivery is paid based on the BSHI route 5 at 100% and thereafter is based on 100% of the average of the daily rates of the BHSI. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert the balance of any period at a fixed rate based on Handysize FFA values.

(23) The rate for the spot-market related time charter will be linked with a floor of \$8,500 and a ceiling of \$13,500 daily with a 50% profit sharing arrangement to apply to any amount above the ceiling. The rate will be based on 115% of the average of the daily rates of the Baltic Handysize Index, or BHSI, as reflected in daily reports. Hire will be paid every 15 days in advance net of a 5.00% third party brokerage commission.

(24) These vessels were acquired with existing time charters with below-market rates. As described in footnote 27, intangible liabilities will be amortized as an increase to voyage revenues over the minimum remaining terms of the applicable charters. Specifically, for the Genco Ocean and Genco Bay, the daily amount of amortization associated with them will be approximately \$700 and \$750 per day over the actual cash rate earned, respectively.

(25) Built and delivery dates for vessels being delivered in the future are estimates based on guidance received from the sellers and/or the respective shipyards.

(26) The rate for the spot market-related time charter will be based on 115% of the average of the daily rates of the BHSI, as reflected in daily reports. Hire will be paid every 15 days in advance net of a 5.00% third party brokerage commission.

(27) These vessels were acquired with existing time charters with below-market rates. For the time charters that are below-market, Genco is in the process of allocating the purchase price between the respective vessels and an intangible liability for the value assigned to the below-market charter-hire. This intangible liability will be amortized as an increase to voyage revenues over the minimum remaining terms of the applicable charters, at which point the respective liabilities will be amortized to zero and the vessels will begin earning the Cash Daily Rate. For cash flow purposes, Genco will continue to receive the rate presented in the Cash Daily Rate column until the charter expires.

### CLASSIFICATION AND INSPECTION

All of our vessels have been certified as being in class by the American Bureau of Shipping ( ABS ), Det Norske Veritas ( DNV ), Lloyd's Register of Shipping ( Lloyd's ), Bureau Veritas ( BV ) or Nippon Kaiji Kyokai ( NK ). Each of these classification societies is a member of the International Association of Classification Societies. Every commercial vessel's hull and machinery is evaluated by a classification society authorized by its country of registry. The classification society certifies that the vessel has been built and maintained in accordance with the rules of the classification society and complies with applicable rules and regulations of the vessel's country of registry and the international conventions of which that country is a member. Each vessel is inspected by a surveyor of the classification society in three surveys of varying frequency and thoroughness: every year for the annual survey, every two to three years for the intermediate survey and every four to five years for special surveys. Special surveys always require drydocking. Vessels that are 15 years old or older are required, as part of the intermediate survey

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

process, to be drydocked every 24 to 30 months for inspection of the underwater portions of the vessel and for necessary repairs stemming from the inspection.

In addition to the classification inspections, many of our customers regularly inspect our vessels as a precondition to chartering them for voyages. We believe that our well-maintained, high-quality vessels provide us with a competitive advantage in the current environment of increasing regulation and customer emphasis on quality.

We have implemented the International Safety Management Code, which was promulgated by the International Maritime Organization, or IMO (the United Nations agency for maritime safety and the prevention of marine pollution by ships), to establish pollution prevention requirements applicable to vessels. We obtained documents of compliance for our offices and safety management certificates for all of our vessels, which are required

by the IMO.

## **CREWING AND EMPLOYEES**

Each of our vessels is crewed with 20 to 24 officers and seamen. Our technical managers are responsible for locating and retaining qualified officers for our vessels. The crewing agencies handle each seaman's training, travel and payroll, and ensure that all the seamen on our vessels have the qualifications and licenses required to comply with international regulations and shipping conventions. We typically man our vessels with more crew members than are required by the country of the vessel's flag in order to allow for the performance of routine maintenance duties.

As of March 9, 2011, we employed 33 shore-based personnel and approximately 1,280 seagoing personnel on our vessels, including Baltic Trading.

## **CUSTOMERS**

Our assessment of a charterer's financial condition and reliability is an important factor in negotiating employment for our vessels. We generally charter our vessels to major trading houses (including commodities traders), major producers and government-owned entities rather than to more speculative or undercapitalized entities. Our customers include national, regional and international companies, such as Lauritzen Bulk, Cargill, Pacbasin, STX, Cosco and HMM. For the year ended December 31, 2010, two of our charterers, Pacbasin and Cargill, each accounted for more than 10% of our voyage revenues, or 40.7% in the aggregate.

## **COMPETITION**

Our business fluctuates in line with the main patterns of trade of the major drybulk cargoes and varies according to changes in the supply and demand for these items. We operate in markets that are highly competitive and based primarily on supply and demand. We compete for charters on the basis of price, vessel location and size, age and condition of the vessel, as well as on our reputation as an owner and operator. We compete with other owners of drybulk carriers in the Capesize, Panamax, Supramax, Handymax and Handysize class sectors, some of whom may also charter our vessels as customers. Ownership of drybulk carriers is highly fragmented and is divided among approximately 1,600 independent drybulk carrier owners.

## **PERMITS AND AUTHORIZATIONS**

We are required by various governmental and quasi-governmental agencies to obtain certain permits, licenses, certificates and other authorizations with respect to our vessels. The kinds of permits, licenses, certificates and other authorizations required for each vessel depend upon several factors, including the commodity transported, the waters in which the vessel operates, the nationality of the vessel's crew and the age of the vessel. We believe that we have all material permits, licenses, certificates and other authorizations necessary for the conduct of our operations. However, additional laws and regulations, environmental or otherwise, may be adopted which could limit our ability to do business

or increase the cost of our doing business.

## **INSURANCE**

### *General*

The operation of any drybulk vessel includes risks such as mechanical failure, collision, property loss, cargo loss or damage and business interruption due to political circumstances in foreign countries, piracy, hostilities and labor strikes. In addition, there is always an inherent possibility of marine disaster, including oil spills and other environmental mishaps, and the liabilities arising from owning and operating vessels in international trade. The U.S. Oil Pollution Act of 1990, or OPA, which imposes virtually unlimited liability upon owners, operators and demise charterers of vessels trading in the U.S.-exclusive economic zone for certain oil pollution accidents in the United States, has made liability insurance more expensive for ship owners and operators trading in the U.S. market.

While we maintain hull and machinery insurance, war risks insurance, protection and indemnity cover, and freight, demurrage and defense cover and loss of hire insurance for our fleet in amounts that we believe to be prudent to cover normal risks in our operations, we may not be able to achieve or maintain this level of coverage throughout a vessel's useful life. Furthermore, while we believe that our present insurance coverage is adequate, not all risks can be insured, and there can be no guarantee that any specific claim will be paid, or that we will always be able to obtain adequate insurance coverage at reasonable rates.

*Hull and Machinery, War Risks, Kidnap and Ransom Insurance*

We maintain marine hull and machinery, war risks and kidnap and ransom insurance which cover the risk of actual or constructive total loss, for all of our vessels. Our vessels are each covered up to at least fair market value with deductibles, which depend primarily on the class of the insured vessel and are subject to change. We are covered, subject to limitations in our policy, to have the crew released in the case of kidnapping due to piracy in the Gulf of Aden / Somalia.

*Protection and Indemnity Insurance*

Protection and indemnity insurance is provided by mutual protection and indemnity associations, or P&I Associations, which insure our third-party liabilities in connection with our shipping activities. This includes third-party liability and other related expenses resulting from the injury or death of crew, passengers and other third parties, the loss or damage to cargo, claims arising from collisions with other vessels, damage to other third-party property, pollution arising from oil or other substances and salvage, towing and other related costs, including wreck removal. Protection and indemnity insurance is a form of mutual indemnity insurance, extended by protection and indemnity mutual associations, or clubs. Subject to the capping discussed below, our coverage, except for pollution, is unlimited.

We maintain protection and indemnity insurance coverage for pollution of \$1 billion per vessel per incident. The 13 P&I Associations that comprise the International Group insure approximately 90% of the world's commercial tonnage and have entered into a pooling agreement to reinsure each association's liabilities. We are a member of a P&I Association, which is a member of the International Group. As a result, we are subject to calls payable to the associations based on the group's claim records as well as the claim records of all other members of the individual associations and members of the pool of P&I Associations comprising the International Group.

*Loss of Hire Insurance*

We maintain loss of hire insurance, which covers business interruptions and related losses that result from the loss of use of a vessel. Our loss of hire insurance has a 14-day deductible and provides claim coverage for up to 90 days. Loss of hire insurance for piracy in the Gulf of Aden / Somalia has a 20-day deductible and provides claim coverage for up to 50 days.

**ENVIRONMENTAL AND OTHER REGULATION**

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Government regulation significantly affects the ownership and operation of our vessels. We are subject to international conventions and treaties, national, state and local laws and regulations in force in the countries in which our vessels may operate or are registered relating to safety and health and environmental protection including the storage, handling, emission, transportation and discharge of hazardous and non-hazardous materials, and the remediation of contamination and liability for damage to natural resources. Compliance with such laws, regulations and other requirements entails significant expense, including vessel modifications and implementation of certain operating procedures.

A variety of governmental and private entities subject our vessels to both scheduled and unscheduled inspections. These entities include the local port authorities, (applicable national authorities such as the U.S. Coast Guard and harbor masters), classification societies, flag state administrations (countries of registry) and charterers. Some of these entities require us to obtain permits, licenses, certificates and other authorizations for the operation of our vessels. Our failure to maintain necessary permits, licenses, certificates or authorizations could require us to incur

substantial costs or temporarily suspend the operation of one or more of our vessels.

In recent periods, heightened levels of environmental and operational safety concerns among insurance underwriters, regulators and charterers have led to greater inspection and safety requirements on all vessels and may accelerate the scrapping of older vessels throughout the drybulk shipping industry. Increasing environmental concerns have created a demand for vessels that conform to the stricter environmental standards. We believe that the operation of our vessels is in substantial compliance with applicable environmental laws and regulations and that our vessels have all material permits, licenses, certificates or other authorizations necessary for the conduct of our operations. However, because such laws and regulations are frequently changed and may impose increasingly stricter requirements, we cannot predict the ultimate cost of complying with these requirements, or the impact of these requirements on the resale value or useful lives of our vessels. In addition, a future serious marine incident, such as the 2010 *Deepwater Horizon* oil spill, that results in significant oil pollution or otherwise causes significant adverse environmental impact could result in additional legislation or regulation that could negatively affect our profitability.

#### *International Maritime Organization (IMO)*

The IMO, the United Nations agency for maritime safety and the prevention of pollution by ships, has adopted the International Convention for the Prevention of Marine Pollution, 1973, as modified by the related Protocol of 1978, which has been updated through various amendments, or the MARPOL Convention. The MARPOL Convention establishes environmental standards relating to oil leakage or spilling, garbage management, sewage, air emissions, handling and disposal of noxious liquids and the handling of harmful substances in packaged forms. The IMO adopted regulations that set forth pollution prevention requirements applicable to drybulk carriers. These regulations have been adopted by over 150 nations, including many of the jurisdictions in which our vessels operate.

#### *Air Emissions*

In September 1997, the IMO adopted Annex VI to the MARPOL Convention to address air pollution from ships. Effective May 2005, Annex VI sets limits on sulfur oxide and nitrogen oxide emissions from all commercial vessel exhausts and prohibits deliberate emissions of ozone depleting substances (such as halons and chlorofluorocarbons), emissions of volatile organic compounds from cargo tanks, and the shipboard incineration of specific substances. Annex VI also includes a global cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions. The IMO's Maritime Environment Protection Committee, or MEPC, has adopted amendments to Annex VI regarding emissions of sulfur oxide, nitrogen oxide, particulate matter and ozone-depleting substances, which amendments were ratified by the United States in October 2008 and entered into force on July 1, 2010. The amended Annex VI reduces air pollution from vessels by, among other things, (i) implementing a progressive reduction of sulfur oxide emissions from ships by reducing the global sulfur fuel cap reduced initially to 3.50% (from the current cap of 4.50%), effective from January 1, 2012, then progressively to 0.50%, effective from January 1, 2020, subject to a feasibility review to be completed no later than 2018; and (ii) establishing new tiers of stringent nitrogen oxide emissions standards for new marine engines, depending on their date of installation. The U.S. Environmental Protection Agency, or EPA, promulgated equivalent emissions standards in late 2009.

The MEPC has designated the area extending 200 miles from the territorial sea baseline adjacent to the Atlantic/Gulf and Pacific coasts and the eight main Hawaiian Islands as an emission control area ( ECA ) under the MARPOL Annex VI amendments. The new ECA will enter into force in August 2012, whereupon fuel used by all vessels operating in the ECA cannot exceed 1.0% sulfur, dropping to 0.1% sulfur in 2015. From 2016, nitrogen oxide after-treatment requirements will also apply. If other ECAs are approved by the IMO or other new or more stringent requirements relating to emissions from marine diesel engines or port operations by vessels are adopted by the EPA or the states where we operate, compliance with these regulations could entail significant capital expenditures or otherwise increase the costs of our operations.

*Safety Management System Requirements*

The IMO also adopted the International Convention for the Safety of Life at Sea, or SOLAS and the International Convention on Load Lines, or the LL Convention, which impose a variety of standards that regulate the design and operational features of ships. The IMO periodically revises the SOLAS Convention and LL Convention standards.

Under Chapter IX of SOLAS, the International Safety Management Code for the Safe Operation of Ships and for Pollution Prevention, or ISM Code, our operations are also subject to environmental standards and requirements contained in the ISM Code promulgated by the IMO. The ISM Code requires the party with operational control of a vessel to develop an extensive safety management system that includes, among other things, the adoption of a safety and environmental protection policy setting forth instructions and procedures for operating its vessels safely and describing procedures for responding to emergencies. We rely upon the safety management system that we and our technical manager have developed for compliance with the ISM Code. The failure of a ship owner or bareboat charterer to comply with the ISM Code may subject such party to increased liability, may decrease available insurance coverage for the affected vessels and may result in a denial of access to, or detention in, certain ports.

The ISM Code requires that vessel operators also obtain a safety management certificate for each vessel they operate. This certificate evidences compliance by a vessel's management with code requirements for a safety management system. No vessel can obtain a certificate unless its manager has been awarded a document of compliance, issued by each flag state, under the ISM Code. We believe that we have all material requisite documents of compliance for our offices and safety management certificates for all of our vessels for which such certificates are required by the IMO. We renew these documents of compliance and safety management certificates as required.

*Pollution Control and Liability Requirements*

IMO has negotiated international conventions that impose liability for pollution in international waters and the territorial waters of the nations signatory to such conventions. For example, IMO adopted an International Convention for the Control and Management of Ships' Ballast Water and Sediments, or the BWM Convention, in February 2004. The BWM Convention's implementing regulations call for a phased introduction of mandatory ballast water exchange requirements (beginning in 2009), to be replaced in time with mandatory concentration limits. The BWM Convention will not become effective until 12 months after it has been adopted by 30 states, the combined merchant fleets of which represent not less than 35% of the gross tonnage of the world's merchant shipping. To date, there has not been sufficient adoption of this standard for it to take force. If mid-ocean ballast exchange is made mandatory throughout the United States or at the international level, or if ballast water treatment requirements or options are instituted, the cost of compliance could increase for ocean carriers, and the costs of ballast water treatment may be material.

The IMO adopted the International Convention on Civil Liability for Bunker Oil Pollution Damage, or the Bunker Convention, to impose strict liability on ship owners for pollution damage in jurisdictional waters of ratifying states caused by discharges of bunker fuel. The Bunker Convention, which became effective on November 21, 2008, requires registered owners of ships over 1,000 gross tons to maintain insurance for pollution damage in an amount equal to the limits of liability under the applicable national or international limitation regime (but not exceeding the amount calculated in accordance with the Convention on Limitation of Liability for Maritime Claims of 1976, as amended). With respect to non-ratifying states, liability for spills or releases of oil carried as fuel in ship's bunkers typically is determined by the national or other domestic laws in the jurisdiction where the events or damages occur.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Noncompliance with the ISM Code or other IMO regulations may subject the vessel owner or bareboat charterer to increased liability, lead to decreases in available insurance coverage for affected vessels or result in the denial of access to, or detention in, some ports. The U.S. Coast Guard and European Union authorities have indicated that vessels not in compliance with the ISM Code by the applicable deadlines will be prohibited from trading in U.S. and European Union ports, respectively. As of the date of this report, each of our vessels is ISM Code certified. However, there can be no assurance that such certificates will be maintained in the future.

The IMO continues to review and introduce new regulations. It is impossible to predict what additional regulations, if any, may be passed by the IMO and what effect, if any, such regulations might have on our operations.

*The U.S. Oil Pollution Act of 1990 and Comprehensive Environmental Response, Compensation and Liability Act*

The U.S. Oil Pollution Act of 1990, or OPA, established an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills. OPA affects all owners and operators whose vessels trade in the United States, its territories and possessions or whose vessels operate in U.S. waters, which includes the U.S. territorial sea and its 200 nautical mile exclusive economic zone. The United States has also enacted the Comprehensive Environmental Response, Compensation and Liability Act, or CERCLA, which applies to the discharge of hazardous substances other than oil, whether on land or at sea. Both OPA and CERCLA impact our operations.

Under OPA, vessel owners, operators and bareboat charterers are responsible parties and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and clean-up costs and other damages arising from discharges or threatened discharges of oil from their vessels. OPA defines these other damages broadly to include:

- natural resources damage and related assessment costs;
- real and personal property damage;
- net loss of taxes, royalties, rents, fees and other lost revenues;
- lost profits or impairment of earning capacity due to property or natural resources damage; and
- net cost of public services necessitated by a spill response, such as protection from fire, safety or health hazards, and loss of subsistence use of natural resources.

Effective July 31, 2009, the U.S. Coast Guard adjusted the limits of OPA liability for non-tank vessels to the greater of \$1,000 per gross ton or \$854,400 (subject to possible adjustment for inflation). CERCLA, which applies to owners and operators of vessels, contains a similar liability regime and provides for cleanup, removal and natural resource damages. Liability under CERCLA is limited to the greater of \$300 per gross ton or \$5 million for vessels carrying a hazardous substance as cargo and the greater of \$300 per gross ton or \$0.5 million for any other vessel. These OPA and CERCLA limits of liability do not apply if an incident was directly caused by violation of applicable U.S. federal safety, construction or operating regulations or by a responsible party's gross negligence or willful misconduct, or if the responsible party fails or refuses to report the incident or to cooperate and assist in connection with oil removal activities.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

OPA and the U.S. Coast Guard also require owners and operators of vessels to establish and maintain with the U.S. Coast Guard evidence of financial responsibility sufficient to meet the limit of their potential liability under OPA and CERCLA. Vessel owners and operators may satisfy their financial responsibility obligations by providing a proof of insurance, a surety bond, self-insurance or a guaranty. We plan to comply with the U.S. Coast Guard's financial responsibility regulations by providing a certificate of responsibility evidencing sufficient self-insurance.

In response to the fire and explosion that took place on the *Deepwater Horizon* in the Gulf of Mexico in April 2010, the U.S. Congress is currently considering a number of bills that could potentially modify or eliminate the limits of liability under OPA. Compliance with any new requirements of OPA may substantially impact our cost of operations or require us to incur additional expenses to comply with any new regulatory initiatives or statutes. Additional legislation or regulations applicable to the operation of our vessels that may be implemented in the future could adversely affect our business.

We currently maintain pollution liability coverage insurance in the amount of \$1 billion per incident for each of our vessels. If the damages from a catastrophic spill were to exceed our insurance coverage, it could have a material adverse effect on our business, financial condition, results of operations and cash flows.

*Other Environmental Initiatives*

The U.S. Clean Water Act, or CWA, prohibits the discharge of oil or hazardous substances in U.S. navigable waters unless authorized by a duly-issued permit or exemption, and imposes strict liability in the form of penalties for any unauthorized discharges. The CWA also imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under OPA and CERCLA.

The EPA regulates the discharge of ballast water and other substances in U.S. waters under the CWA. Effective February 6, 2009, EPA regulations require vessels 79 feet in length or longer (other than commercial fishing and recreational vessels) to comply with a Vessel General Permit authorizing ballast water discharges and other discharges incidental to the operation of vessels. The Vessel General Permit imposes technology and water-quality based effluent limits for certain types of discharges and establishes specific inspection, monitoring, recordkeeping and reporting requirements to ensure the effluent limits are met. U.S. Coast Guard regulations adopted under the U.S. National Invasive Species Act, or NISA, also impose mandatory ballast water management practices for all vessels equipped with ballast water tanks entering or operating in U.S. waters, and in 2009 the Coast Guard proposed new ballast water management standards and practices, including limits regarding ballast water releases. Compliance with the EPA and the U.S. Coast Guard regulations could require the installation of equipment on our vessels to treat ballast water before it is discharged or the implementation of other port facility disposal arrangements or procedures at potentially substantial cost, and/or otherwise restrict our vessels from entering U.S. waters.

*European Union Regulations*

In October 2009, the European Union amended a directive to impose criminal sanctions for illicit ship-source discharges of polluting substances, including minor discharges, if committed with intent, recklessly or with serious negligence and the discharges individually or in the aggregate result in deterioration of the quality of water. Criminal liability for pollution may result in substantial penalties or fines and increased civil liability claims.

*Greenhouse Gas Regulation*

In February 2005, the Kyoto Protocol to the United Nations Framework Convention on Climate Change, or UNFCCC, which we refer to as the Kyoto Protocol, entered into force. Pursuant to the Kyoto Protocol, adopting countries are required to implement national programs to reduce emissions of certain gases, generally referred to as greenhouse gases, which are suspected of contributing to global warming. Currently, the emissions of greenhouse gases from international shipping are not subject to the Kyoto Protocol. However, international negotiations are continuing with respect to a successor to the Kyoto Protocol, which sets emission reduction targets through 2012, and restrictions on shipping emissions may be included in any new treaty. In December 2009, more than 27 nations, including the United States and China, signed the Copenhagen Accord, which includes a non-binding commitment to reduce greenhouse gas emissions. In addition, the European Union has expressed its intention to consider an expansion of the existing European Union emissions trading scheme to include emissions of greenhouse gases from marine vessels, if such emissions were not regulated through the IMO or the UNFCCC by December 31, 2010, which did not occur. In the United States, the EPA has issued a final finding that greenhouse gases threaten public health and safety, and has promulgated regulations governing the emission of greenhouse gases from motor vehicles. The EPA may decide in the future to regulate greenhouse gas emissions from ships and has already been petitioned by the California Attorney General and a coalition of environmental groups to regulate greenhouse gas emissions from ocean-going vessels. Other federal and state regulations relating to the control of greenhouse gas emissions may follow, including the climate change initiatives that are being considered in the U.S. Congress. In addition, the IMO is evaluating various mandatory measures to reduce greenhouse gas emissions from international shipping, including market-based instruments. Any passage of climate control legislation or other regulatory initiatives by the EU, U.S., IMO or other countries where we operate that restrict emissions of greenhouse gases could require us to make significant financial expenditures that we cannot predict with certainty at this time.

*Vessel Security Regulations*

Since the terrorist attacks of September 11, 2001, there have been a variety of initiatives intended to enhance vessel security. On November 25, 2002, the U.S. Maritime Transportation Security Act of 2002, or the MTSA, came into effect. To implement certain portions of the MTSA, in July 2003, the U.S. Coast Guard issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States. Similarly, in December 2002, amendments to SOLAS created a new chapter of the convention dealing specifically with maritime security. The new chapter became effective in July 2004 and imposes various detailed security obligations on vessels and port authorities, most of which are contained in the International Ship and Port Facilities Security Code, or the ISPS Code. The ISPS Code is designed to protect ports and international shipping against terrorism. After July 1, 2004, to trade internationally, a vessel must attain an International Ship Security Certificate from a recognized security organization approved by the vessel's flag state. Among the various requirements are:

- on-board installation of automatic identification systems to provide a means for the automatic transmission of safety-related information from among similarly equipped ships and shore stations, including information on a ship's identity, position, course, speed and navigational status;
- on-board installation of ship security alert systems, which do not sound on the vessel but only alert the authorities on shore;
- the development of vessel security plans;
- ship identification number to be permanently marked on a vessel's hull;
- a continuous synopsis record kept onboard showing a vessel's history including the name of the ship and of the state whose flag the ship is entitled to fly, the date on which the ship was registered with that state, the ship's identification number, the port at which the ship is registered and the name of the registered owner(s) and their registered address; and
- compliance with flag state security certification requirements.

The U.S. Coast Guard regulations, intended to align with international maritime security standards, exempt from MTSA vessel security measures non-U.S. vessels that have on board, as of July 1, 2004, a valid International Ship Security Certificate attesting to the vessel's compliance with SOLAS security requirements and the ISPS Code. We have implemented the various security measures addressed by the MTSA, SOLAS and the ISPS Code.

*Inspection by Classification Societies*

Every oceangoing vessel must be classed by a classification society. The classification society certifies that the vessel is in class, signifying that the vessel has been built and maintained in accordance with the rules of the classification society and complies with applicable rules and regulations of the vessel's country of registry and the international conventions of which that country is a member. In addition, where surveys are required by international conventions and corresponding laws and ordinances of a flag state, the classification society will undertake them on application or by official order, acting on behalf of the authorities concerned.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The classification society also undertakes on request other surveys and checks that are required by regulations and requirements of the flag state. These surveys are subject to agreements made in each individual case and/or to the regulations of the country concerned.

For maintenance of the class certification, regular and extraordinary surveys of hull, machinery, including the electrical plant, and any special equipment classes are required to be performed as follows:

- *Annual Surveys:* For seagoing ships, annual surveys are conducted for the hull and the machinery, including the electrical plant, and where applicable for special equipment classed, at intervals of 12 months from the date of commencement of the class period indicated in the certificate.
- *Intermediate Surveys:* Extended annual surveys are referred to as intermediate surveys and typically are conducted two and one-half years after commissioning and each class renewal. Intermediate surveys may be carried out on the occasion of the second or third annual survey.
- *Class Renewal Surveys:* Class renewal surveys, also known as special surveys, are carried out for the ship s

hull, machinery, including the electrical plant, and for any special equipment classed, at the intervals indicated by the character of classification for the hull. At the special survey, the vessel is thoroughly examined, including audio-gauging to determine the thickness of the steel structures. Should the thickness be found to be less than class requirements, the classification society would prescribe steel renewals. The classification society may grant a one-year grace period for completion of the special survey. Substantial amounts of money may have to be spent for steel renewals to pass a special survey if the vessel experiences excessive wear and tear. In lieu of the special survey every four or five years, depending on whether a grace period was granted, a vessel owner has the option of arranging with the classification society for the vessel's hull or machinery to be on a continuous survey cycle, in which every part of the vessel would be surveyed within a five-year cycle. Upon a vessel owner's request, the surveys required for class renewal may be split according to an agreed schedule to extend over the entire period of class. This process is referred to as continuous class renewal.

All areas subject to survey as defined by the classification society are required to be surveyed at least once per class period, unless shorter intervals between surveys are prescribed elsewhere. The period between two subsequent surveys of each area must not exceed five years.

Most vessels are also drydocked every 30 to 36 months for inspection of the underwater parts and for repairs related to inspections. If any defects are found, the classification surveyor will issue a recommendation which must be rectified by the vessel owner within prescribed time limits.

Most insurance underwriters make it a condition for insurance coverage that a vessel be certified as in class by a classification society which is a member of the International Association of Classification Societies. All of our vessels have been certified as being in class by ABS, BV, NK, DNV or Lloyd's. All new and secondhand vessels that we purchase must be certified prior to their delivery under our standard agreements.

## **SEASONALITY**

We operate our vessels in markets that have historically exhibited seasonal variations in demand and, as a result, charter rates. We seek to mitigate the risk of these seasonal variations by entering into long-term time charters for our vessels, where possible. However, this seasonality may result in quarter-to-quarter volatility in our operating results, depending on when we enter into our time charters or if our vessels trade on the spot market. The drybulk sector is typically stronger in the fall and winter months in anticipation of increased consumption of coal and raw materials in the northern hemisphere during the winter months. As a result, our revenues could be weaker during the fiscal quarters ended June 30 and September 30, and conversely, our revenues could be stronger during the quarters ended December 31 and March 31.

## **ITEM 1A. RISK FACTORS**

### **ADDITIONAL FACTORS THAT MAY AFFECT FUTURE RESULTS**

This annual report on Form 10-K contains forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements use words such as anticipate, budget, estimate, expect, project, intend, believe, and other words and terms of similar meaning in connection with a discussion of potential future events, circumstances or future operating or financial performance. These forward-looking statements are based on our management's current expectations and observations. Included among the factors that, in our view, could cause actual results to differ materially from the forward looking statements contained in this

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

annual report on Form 10-K are the following: (i) changes in demand or rates in the drybulk shipping industry; (ii) changes in the supply of or demand for drybulk products, generally or in particular regions; (iii) changes in the supply of drybulk carriers including newbuilding of vessels or lower than anticipated scrapping of older vessels; (iv) changes in rules and regulations applicable to the cargo industry, including, without limitation, legislation adopted by international organizations or by individual countries and actions taken by regulatory authorities; (v) increases in costs and expenses including but not limited to: crew wages, insurance, provisions, lube oil, bunkers, repairs, maintenance and general, administrative and management fee expenses; (vi) the adequacy of our insurance arrangements; (vii) changes in general domestic and international political conditions; (viii)

acts of war, terrorism, or piracy; (ix) changes in the condition of the Company's vessels or applicable maintenance or regulatory standards (which may affect, among other things, our anticipated drydocking or maintenance and repair costs) and unanticipated drydock expenditures; (x) the Company's acquisition or disposition of vessels (xi) the number of off-hire days needed to complete repairs on vessels and the timing and amount of any reimbursement by our insurance carriers for insurance claims including off-hire days; (xii) the fulfillment of the closing conditions under, and the execution of customary additional documentation for, the Company's agreements to acquire a total of four drybulk vessels; (xiii) the completion of definitive documentation with respect to time charters; (xiv) charterers' compliance with the terms of their charters in the current market environment; (xv) those other risks and uncertainties discussed below under the heading "RISKFATORS RELATED TO OUR BUSINESS & OPERATIONS", and (xvi) other factors listed from time to time in our filings with the Securities and Exchange Commission (the "SEC").

The following risk factors and other information included in this report should be carefully considered. If any of the following risks actually occur, our business, financial condition, operating results or cash flows could be materially and adversely affected and the trading price of our common stock could decline.

## **RISK FACTORS RELATED TO OUR BUSINESS AND OPERATIONS**

### **Industry Specific Risk Factors**

*The current global economic downturn may continue to negatively impact our business.*

In the current global economy, operating businesses have been facing tight credit, weak demand for goods and services, deteriorating international liquidity conditions, and depressed markets. Lower demand for drybulk cargoes as well as diminished trade credit available for the delivery of such cargoes have led to decreased demand for drybulk vessels, creating downward pressure on charter rates. Although vessel values have stabilized since the end of 2008, general market volatility has resulted from uncertainty about sovereign debt and fears of countries such as Greece, Portugal and Spain defaulting on their governments' financial obligations. If the current global economic environment persists or worsens, we may be negatively affected in the following ways:

- We may not be able to employ our vessels at charter rates as favorable to us as historical rates or operate our vessels profitably.
- Our earnings could decline, which may cause us to breach one or more of the covenants in our credit facilities, thereby accelerating the repayment of outstanding facility borrowings.
- The market value of our vessels could decrease, which may cause us to recognize losses if any of our vessels are sold or if their values are impaired. A decline in the market value of our vessels could also prevent us from borrowing under our credit facilities or trigger defaults under their covenants. In particular, all of our credit facilities contain collateral maintenance covenants, although we obtained a waiver of this covenant in our 2007 Credit Facility in 2009. Please refer to "The market values of our vessels may decrease, which could adversely affect our operating results, cause us to breach one or more of the covenants in our credit facilities or limit the total amount that we may borrow under our revolving credit facilities" below for further details.

- Our charterers with long-term time charters may request to renegotiate the terms of our charters with them. As a general matter, we do not agree to make changes to the terms of our charters in response to such requests. As a result, our charterers may fail to meet their obligations under our long-term time charters.

- The value of our investment in Jinhui could further decline in future years, and we may recognize additional impairment losses if we were to sell our shares or if the value of our investment is impaired.

The occurrence of any of the foregoing could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*Charterhire rates for drybulk carriers are volatile and are currently at relatively low levels as compared to historical levels and may further decrease in the future, which may adversely affect our earnings.*

The abrupt and dramatic downturn in the drybulk charter market, from which we derive the large majority of our revenues, has severely affected the drybulk shipping industry. The Baltic Dry Index, an index published by The Baltic Dry Index of shipping rates for 20 key drybulk routes, fell 94% from a peak of 11,793 in May 2008 to a low of 663 in December 2008. During 2010, the Baltic Dry Index went from a high on May 26, 2010 of 4,209 and fell to a low of 1,700 on July 15, 2010. In 2011, the index decreased to a low of 1,043 on February 4, 2011 and as of March 8, 2011 was trading at 1,424. Seasonal factors contributing to the most recent downturn in rates include severe floods and other weather related issues in Australia, making it hard for coal and iron ore miners to export cargo to Asia; order timing issues for iron ore cargoes related to the celebration of the Chinese New Year; and increased deliveries of newbuilding Capesize vessels during a time of seasonally reduced demand. There can be no assurance that the drybulk charter market will recover over the next several months, and the market could continue to decline further. These circumstances, which result from the economic dislocation worldwide and the disruption of the credit markets, have had a number of adverse consequences for drybulk shipping, including, among other things:

- an absence of financing for vessels;
- no active second-hand market for the sale of vessels;
- extremely low charter rates, particularly for vessels employed in the spot market;
- widespread loan covenant defaults in the drybulk shipping industry; and
- declaration of bankruptcy by some operators and shipowners as well as charterers.

The occurrence of one or more of these events could adversely affect our business, results of operations, cash flows, financial condition and ability to pay dividends.

Because we generally charter our vessels pursuant to time charters, we are exposed to changes in spot market rates for drybulk carriers at the time of entering into charterhire contracts and such changes may affect our earnings and the value of our drybulk carriers at any given time. In addition, 21 of our 49 vessels currently trade at spot market rates through spot market-related time charters or a vessel pool. We cannot assure you that we will be able to successfully charter our vessels in the future or renew existing charters at rates sufficient to allow us to meet our obligations or to pay dividends to our shareholders. The supply of and demand for shipping capacity strongly influences freight rates. Because the factors affecting the supply and demand for vessels are outside of our control and are unpredictable, the nature, timing, direction and degree of changes in industry conditions are also unpredictable.

Factors that influence demand for vessel capacity include:

- demand for and production of drybulk products;
- global and regional economic and political conditions, including developments in international trade, fluctuations in industrial and agricultural production and armed conflicts;
- the distance drybulk cargo is to be moved by sea;
- environmental and other regulatory developments; and
- changes in seaborne and other transportation patterns.

The factors that influence the supply of vessel capacity include:

- the number of newbuilding deliveries;
- port and canal congestion;
- the scrapping rate of older vessels;
- vessel casualties; and
- the number of vessels that are out of service, i.e., laid-up, drydocked, awaiting repairs or otherwise not available for hire.

In addition to the prevailing and anticipated freight rates, factors that affect the rate of newbuilding, scrapping and laying-up include newbuilding prices, secondhand vessel values in relation to scrap prices, costs of bunkers and other operating costs, costs associated with classification society surveys, normal maintenance and insurance coverage, the efficiency and age profile of the existing fleet in the market and government and industry regulation of maritime transportation practices, particularly environmental protection laws and regulations. These factors influencing the supply of and demand for shipping capacity are outside of our control, and we may not be able to correctly assess the nature, timing and degree of changes in industry conditions.

We anticipate that the future demand for our drybulk carriers will be dependent upon economic growth in the world's economies, including China and India, seasonal and regional changes in demand, changes in the capacity of the global drybulk carrier fleet and the sources and supply of drybulk cargo to be transported by sea. Adverse economic, political, social or other developments, including a change in worldwide fleet capacity, could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*An oversupply of drybulk carrier capacity may lead to reductions in charterhire rates and profitability.*

The market supply of drybulk carriers has been increasing as a result of the delivery of numerous newbuilding orders over the last few years. Currently, we believe there is an oversupply of vessels, as evidenced by some carriers letting their ships sit idle rather than operate them at current rates.

Newbuildings have been delivered in significant numbers since the beginning of 2006. An oversupply of drybulk carrier capacity may result in a reduction of charterhire rates, as evidenced by historically low rates in December 2008. Currently, some of our spot market-related time charterers may at times be unprofitable due the volatility associated with dry cargo freight rates. If market conditions persist, upon the

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

expiration or termination of our vessels' current non-spot charters, we may only be able to re-charter our vessels at reduced or unprofitable rates, or we may not be able to charter these vessels at all. The occurrence of these events could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*The market values of our vessels may decrease, which could adversely affect our operating results, cause us to breach one or more of the covenants in our credit facilities or limit the total amount that we may borrow under our revolving credit facilities.*

If the book value of one of our vessels is impaired due to unfavorable market conditions or a vessel is sold at a price below its book value, we would incur a loss that could adversely affect our financial results. Also, if the market value of our fleet declines, we may not be in compliance with certain provisions of our credit facilities, and we may not be able to refinance our debt or obtain additional financing under our credit facilities or otherwise. In January 2009, we obtained a waiver of the collateral maintenance requirement under our 2007 Credit Facility, subject to certain conditions as mentioned above. This requirement was waived pursuant to an amendment entered into on January 26, 2009 (the "2009 Amendment") effective for the year ended December 31, 2008 and until the Company can represent that it is in compliance with all of its financial covenants and is otherwise able to pay a dividend and purchase or redeem shares of common stock under the terms of the 2007 Credit Facility in effect before the 2009

Amendment. With the exception of the collateral maintenance financial covenant, the Company believes that it is in compliance with its covenants under the 2007 Credit Facility. Without a waiver of the kind provided in the 2009 Amendment, a decrease in the fair market value of our vessels may cause us to breach one or more of the covenants in our 2007 Credit Facility, which could accelerate the repayment of outstanding borrowings under the facility, or may limit the total amount that we may borrow under the facility. We are also subject to collateral maintenance covenants in the \$100 Million Term Loan Facility, \$253 Million Term Loan Facility, and the 2010 Baltic Trading Credit Facility. A decrease in the fair market value of our vessels may cause us to breach one or more of the covenants in the \$100 Million Term Loan Facility, the \$253 Million Term Loan Facility, or the 2010 Baltic Trading Credit Facility, which could accelerate the repayment of outstanding borrowings under our facilities, or may limit the total amount that we may borrow under the 2010 Baltic Trading Credit Facility. We cannot assure you that we will satisfy all our debt covenants in the future or that our lenders will waive any future failure to satisfy these covenants. The occurrence of these events could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*Prolonged declines in charter rates and other market deterioration could cause us to incur impairment charges.*

We evaluate the carrying amounts of our vessels to determine if events have occurred that would require an impairment of their carrying amounts. The recoverable amount of vessels is reviewed based on events and changes in circumstances that would indicate that the carrying amount of the assets might not be recovered. The review for potential impairment indicators and projection of future cash flows related to the vessels is complex and requires us to make various estimates including future freight rates, earnings from the vessels and discount rates. All of these items have been historically volatile.

We evaluate the recoverable amount as the higher of fair value less costs to sell and value in use. If the recoverable amount is less than the carrying amount of the vessel, the vessel is deemed impaired. The carrying values of our vessels may not represent their fair market value in the future because the new market prices of second-hand vessels tend to fluctuate with changes in charter rates and the cost of newbuildings. Any impairment charges incurred as a result of declines in charter rates could have a material adverse effect on our business, results of operations, cash flows and financial condition.

*A further economic slowdown or changes in the economic and political environment in the Asia Pacific region could have a material adverse effect on our business, financial position and results of operations.*

A significant number of the port calls made by our vessels involve the loading or discharging of raw materials and semi-finished products in ports in the Asia Pacific region. As a result, a negative change in economic conditions in any Asia Pacific country, and particularly in China or Japan, could have an adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends. In particular, in recent years, China has been one of the world's fastest growing economies in terms of gross domestic product. We cannot assure you that the Chinese economy will not experience a significant contraction in the future. Although state-owned enterprises still account for a substantial portion of the Chinese industrial output, in general, the Chinese government is reducing the level of direct control that it exercises over the economy through state plans and other measures. There is an increasing level of freedom and autonomy in areas such as allocation of resources, production, pricing and management and a gradual shift in emphasis to a market economy and enterprise reform. Limited price reforms were undertaken with the result that prices for certain commodities are principally determined by market forces. Many of the reforms are unprecedented or experimental and may be subject to revision, change or abolition based upon the outcome of such experiments. If the Chinese government does not continue to pursue a policy of economic reform, the level of imports to and exports from China could be adversely affected by changes to these economic reforms by the Chinese government, as well as by changes in political, economic and social conditions or other relevant policies of the Chinese government, such as changes in laws, regulations or export and import restrictions. Moreover, a significant or protracted slowdown in the economies of the United States, the European Union or various Asian countries may adversely affect economic growth in China and elsewhere. Our business, results of operations, cash flows, financial condition and ability to pay dividends will likely be materially and adversely affected by an economic downturn in any of these countries.

*We are subject to regulation and liability under environmental and operational safety laws that could require significant expenditures and affect our cash flows and net income and could subject us to increased liability under applicable law or regulation.*

Our business and the operation of our vessels are materially affected by government regulation in the form of international conventions and national, state and local laws and regulations in force in the jurisdictions in which the vessels operate, as well as in the countries of their registration. Because such conventions, laws, and regulations are often revised, we cannot predict the ultimate cost of complying with them or their impact on the resale prices or useful lives of our vessels. Additional conventions, laws and regulations may be adopted that could limit our ability to do business or increase the cost of our doing business and that may materially adversely affect our business, results of operations, cash flows, financial condition and ability to pay dividends. We are required by various governmental and quasi-governmental agencies to obtain certain permits, licenses, certificates and financial assurances with respect to our operations.

The operation of our vessels is affected by the requirements set forth in the United Nations International Maritime Organization's International Management Code for the Safe Operation of Ships and Pollution Prevention, or ISM Code. The ISM Code requires shipowners, ship managers and bareboat charterers to develop and maintain an

extensive Safety Management System that includes the adoption of a safety and environmental protection policy setting forth instructions and procedures for safe operation and describing procedures for dealing with emergencies. The failure of a shipowner or bareboat charterer to comply with the ISM Code may subject it to increased liability, may invalidate existing insurance or decrease available insurance coverage for the affected vessels and may result in a denial of access to, or detention in, certain ports.

The IMO adopted the International Convention on Civil Liability for Bunker Oil Pollution Damage, or the Bunker Convention, to impose strict liability on ship owners for pollution damage in jurisdictional waters of ratifying states caused by discharges of bunker fuel. The Bunker Convention, which became effective on November 21, 2008, requires registered owners of ships over 1,000 gross tons to maintain insurance or other financial security for pollution damage in an amount equal to the limits of liability under the applicable national or international limitation regime (but not exceeding the amount calculated in accordance with the Convention on Limitation of Liability for Maritime Claims of 1976, as amended). With respect to non-ratifying states, liability for spills or releases of oil carried as fuel in ship's bunkers typically is determined by the national or other domestic laws in the jurisdiction where the events or damages occur.

The United States Oil Pollution Act of 1990, or OPA, established an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills. OPA affects all owners and operators whose vessels trade in the United States, its territories and possessions or whose vessels operate in U.S. waters. OPA allows for potentially unlimited liability without regard to fault of vessel owners, operators and bareboat charterers for all containment and clean-up costs and other damages arising from discharges or threatened discharges of oil from their vessels, including bunkers, in U.S. waters. OPA also expressly permits individual states to impose their own liability regimes with regard to hazardous materials and oil pollution materials occurring within their boundaries.

In response to the fire and explosion that took place on the *Deepwater Horizon* in the Gulf of Mexico in April 2010, the U.S. Congress is currently considering a number of bills that could potentially modify or eliminate the limits of liability under OPA. Compliance with any new requirements of OPA may substantially impact our cost of operations or require us to incur additional expenses to comply with any new regulatory initiatives or statutes. Additional legislation or regulations applicable to the operation of our vessels that may be implemented in the future could adversely affect our business.

While we do not carry oil as cargo, we do carry bunkers in our drybulk carriers. We currently maintain, for each of our vessels, pollution liability coverage insurance of \$1 billion per incident. Damages from a catastrophic spill exceeding our insurance coverage could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*Increased inspection procedures and tighter import and export controls could increase costs and disrupt our business.*

International shipping is subject to various security and customs inspection and related procedures in countries of origin and destination. Inspection procedures can result in the seizure of the contents of our vessels, delays in the loading, offloading or delivery and the levying of customs duties, fines or other penalties against us.

Since the terrorist attacks of September 11, 2001, there have been a variety of initiatives intended to enhance vessel security. On November 25, 2002, the U.S. Maritime Transportation Security Act of 2002, or the MTSA, came into effect. To implement certain portions of the MTSA, in July 2003, the U.S. Coast Guard issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States. Similarly, in December 2002, amendments to the International Convention for the Safety of Life at Sea, or SOLAS, created a new chapter of the convention dealing specifically with maritime security. The new chapter became effective in July 2004 and imposes various detailed security obligations on vessels and port authorities, most of which are contained in the ISPS

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Code. The ISPS Code is designed to protect ports and international shipping against terrorism. After July 1, 2004, to trade internationally, a vessel must attain an International Ship Security Certificate from a recognized security organization approved by the vessel's flag state.

The United States Coast Guard (USCG) has developed the Electronic Notice of Arrival/Departure (e-NOA/D) application to provide the means of fulfilling the arrival and departure notification requirements of the USCG and

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Customs and Border Protection (CBP) online. Prior to September 11, 2001, ships or their agents notified the Marine Safety Office (MSO)/Captain Of The Port (COTP) zone, within 24 hours of the vessel's arrival via telephone, facsimile (fax), or electronic mail (e-mail). Due to the events of September 11, 2001, the USCG's National Vessel Movement Center (NVMC)/Ship Arrival Notification System (SANS) was set up as part of the U.S. Department of Homeland Security (DHS) initiative. Also, as a result of this initiative, the advanced notice time requirement changed from 24 hours' notice to 96 hours' notice (or 24 hours' notice, depending upon normal transit time). The NOAs and/or NODs continue to be submitted via telephone, fax, or e-mail, but are now to be submitted to the NVMC, where watch personnel entered the information into a central USCG database. Additionally, the National Security Agency has identified certain countries known for high terrorist activities and if a vessel has either called some of these identified countries in its previous ports and/or the members of the crew are from any of these identified countries, more stringent security requirements must be met.

On June 6, 2005, the Advanced Passenger Information System (APIS) Final Rule became effective (19CFR 4.7b and 4.64). Pursuant to these regulations, a commercial carrier arriving into or departing from the United States is required to electronically transmit an APIS manifest to U.S. Customs and Border Protection (CBP) through an approved electronic interchange and programming format. All international commercial carriers transporting passengers and /or crewmembers must obtain an international carrier bond and place it on file with the CBP prior to entry or departure from the United States. The minimum bond amount is \$50,000.

It is possible that changes to inspection procedures could impose additional financial and legal obligations on us. Furthermore, changes to inspection procedures could also impose additional costs and obligations on our customers and may, in certain cases, render the shipment of certain types of cargo uneconomical or impractical. Any such changes or developments may have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*We operate our vessels worldwide and as a result, our vessels are exposed to international risks which could reduce revenue or increase expenses.*

The international shipping industry is an inherently risky business involving global operations. Our vessels will be at risk of damage or loss because of events such as mechanical failure, collision, human error, war, terrorism, piracy, cargo loss and bad weather. All these hazards can result in death or injury to persons, increased costs, loss of revenues, loss or damage to property (including cargo), environmental damage, higher insurance rates, damage to our customer relationships, harm to our reputation as a safe and reliable operator and delay or rerouting. In addition, changing economic, regulatory and political conditions in some countries, including political and military conflicts, have from time to time resulted in attacks on vessels, mining of waterways, piracy, terrorism, labor strikes and boycotts. These sorts of events could interfere with shipping routes and result in market disruptions which could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*Our vessels may suffer damage, and we may face unexpected dry docking costs, which could adversely affect our cash flow and financial condition.*

If our vessels suffer damage, they may need to be repaired at a drydocking facility. The costs of drydock repairs are unpredictable and can be substantial. We may have to pay drydocking costs that our insurance does not cover in full. In addition, space at drydocking facilities is sometimes limited and not all drydocking facilities are conveniently located. We may be unable to find space at a suitable drydocking facility or we may be forced to travel to a drydocking facility that is distant from the relevant vessel's position. The loss of earnings while our vessels are being repaired and repositioned or from being forced to wait for space or to travel to more distant drydocking facilities, as well as the actual cost of repairs, could negatively impact our business, results of operations, cash flows, financial condition and ability to pay dividends.

*The operation of drybulk carriers has certain unique operational risks which could affect our earnings and cash flow.*

The operation of certain ship types, such as drybulk carriers, has certain unique risks. With a drybulk carrier, the cargo itself and its interaction with the vessel can be an operational risk. By their nature, drybulk cargoes are often heavy, dense, easily shifted, and react badly to water exposure. In addition, drybulk carriers are often subjected to battering treatment during unloading operations with grabs, jackhammers (to pry encrusted cargoes out of the hold) and small bulldozers. This treatment may cause damage to the vessel. Vessels damaged due to treatment during unloading procedures may be more susceptible to breach to the sea. Hull breaches in drybulk carriers may lead to the flooding of the vessels' holds. If a drybulk carrier suffers flooding in its forward holds, the bulk cargo may become so dense and waterlogged that its pressure may buckle the vessel's bulkheads, leading to the loss of a vessel. If we are unable to adequately maintain our vessels, we may be unable to prevent these events. Any of these circumstances or events may have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends. In addition, the loss of any of our vessels could harm our reputation as a safe and reliable vessel owner and operator.

*Acts of piracy on ocean-going vessels have continued and could adversely affect our business.*

Acts of piracy have historically affected ocean-going vessels trading in regions of the world such as the South China Sea, the Indian Ocean and in the Gulf of Aden off the coast of Somalia. Since 2008, the frequency of piracy incidents increased significantly, particularly in the Gulf of Aden off the coast of Somalia. If these piracy attacks result in regions in which our vessels are deployed being characterized by insurers as war risk zones, or Joint War Committee (JWC) war and strikes listed areas, premiums payable for such coverage could increase significantly and such insurance coverage may be more difficult to obtain. In addition, crew costs, including costs which may be incurred to the extent we employ onboard security guards, could increase in such circumstances. We may not be adequately insured to cover losses from these incidents, which could have a material adverse effect on us. In addition, detention hijacking as a result of an act of piracy against our vessels, or an increase in cost, or unavailability of insurance for our vessels, could have a material adverse impact on our business, results of operations, cash flows, financial condition and ability to pay dividends.

In response to piracy incidents, particularly in the Gulf of Aden off the coast of Somalia, following consultation with regulatory authorities, we may station guards on some of our vessels in some instances. While our use of guards is intended to deter and prevent the hijacking of our vessels, it may also increase our risk of liability for death or injury to persons or damage to personal property. If we do not have adequate insurance in place to cover such liability, it could adversely impact our business, results of operations, cash flows, and financial condition.

*Terrorist attacks, such as the attacks on the United States on September 11, 2001, and other acts of violence or war may affect the financial markets, our vessels, our operations, or our customers and may therefore have an adverse effect on our business, results of operations and financial condition.*

Terrorist attacks such as the attacks in the United States on September 11, 2001 and the United States' continuing response to these attacks, the attacks in London on July 7, 2005, as well as the threat of future terrorist attacks, continue to cause uncertainty in the world financial markets, including the energy markets. The continuing conflict in Iraq may lead to additional acts of terrorism, armed conflict and civil disturbance around the world, which may contribute to further instability including in the drybulk shipping markets. Terrorist attacks, such as the attack on the M.T. Limburg in Yemen in October 2002, may also negatively affect our trade patterns or other operations and directly impact our vessels or our customers. Future terrorist attacks could result in increased volatility of the financial markets in the United States and globally and could result in an economic recession in the United States or the world. Any of these occurrences, or the perception that drybulk carriers are potential terrorist targets, could have a material adverse impact on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*Compliance with safety and other vessel requirements imposed by classification societies may be costly and could reduce our net cash flows and net income.*

The hull and machinery of every commercial vessel must be certified as being in class by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and the Safety of Life at Sea Convention. Our vessels are currently enrolled with the ABS, NK, BV, DNV, or Lloyd's, each of which is a member of the International Association of Classification Societies.

A vessel must undergo annual surveys, intermediate surveys and special surveys. In lieu of a special survey, a vessel's machinery may be placed on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. Our vessels are on special survey cycles for hull inspection and continuous survey cycles for machinery inspection. Every vessel is also required to be drydocked every two to three years for inspection of its underwater parts.

If any vessel does not maintain its class or fails any annual, intermediate or special survey, the vessel will be unable to trade between ports and will be unemployable and we could be in violation of certain covenants in our credit facilities, which could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*We may be unable to attract and retain qualified, skilled employees or crew necessary to operate our business.*

Our success depends in large part on our ability to attract and retain highly skilled and qualified personnel. In crewing our vessels, we require technically skilled employees with specialized training who can perform physically demanding work. Competition to attract and retain qualified crew members is intense. If we are not able to increase our rates to compensate for any crew cost increases, it could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends. Any inability we experience in the future to hire, train and retain a sufficient number of qualified employees could impair our ability to manage, maintain and grow our business, which could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*Labor interruptions could disrupt our business.*

Our vessels are manned by masters, officers and crews that are employed by third parties. If not resolved in a timely and cost-effective manner, industrial action or other labor unrest could prevent or hinder our operations from being carried out normally and could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*The smuggling of drugs or other contraband onto our vessels may lead to governmental claims against us.*

We expect that our vessels will call in ports in South America and other areas where smugglers attempt to hide drugs and other contraband on vessels, with or without the knowledge of crew members. To the extent our vessels are found with contraband, whether inside or attached to the hull of our vessel and whether with or without the knowledge of any of our crew, we may face governmental or other regulatory

claims which could have an adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*Arrests of our vessels by maritime claimants could cause a significant loss of earnings for the related off-hire period.*

Crew members, suppliers of goods and services to a vessel, shippers of cargo and other parties may be entitled to a maritime lien against a vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lienholder may enforce its lien by arresting or attaching a vessel through foreclosure proceedings. The arrest or attachment of one or more of our vessels could result in a significant loss of earnings for the related off-hire period. In addition, in jurisdictions where the sister ship theory of liability applies, a claimant may arrest the vessel which is subject to the claimant's maritime lien and any associated vessel, which is any vessel owned or controlled by the same owner. In countries with sister ship liability laws, claims might be asserted against us or any of our vessels for liabilities of other vessels that we own.

*Governments could requisition our vessels during a period of war or emergency, resulting in loss of earnings.*

A government of a vessel's registry could requisition for title or seize our vessels. Requisition for title occurs when a government takes control of a vessel and becomes the owner. A government could also requisition our vessels for hire. Requisition for hire occurs when a government takes control of a vessel and effectively becomes the charterer at dictated charter rates. Generally, requisitions occur during a period of war or emergency. Government requisition of one or more of our vessels could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*Increases in fuel prices could adversely affect our profits.*

From time to time, we may operate our vessels on spot charters either directly or by placing them in pools with similar vessels. Spot charter arrangements generally provide that the vessel owner or pool operator bear the cost of fuel in the form of bunkers, which is a significant vessel operating expense. We currently have five vessels operating in vessel pools, and we may arrange for more vessels to do so, depending on market conditions. Also, the cost of fuel may also be a factor in negotiating charter rates in the future. As a result, an increase in the price of fuel beyond our expectations may adversely affect our profitability, cash flows and ability to pay dividends. The price and supply of fuel is unpredictable and fluctuates as a result of events outside our control, including geo-political developments, supply and demand for oil and gas, actions by members of the Organization of the Petroleum Exporting Countries and other oil and gas producers, war and unrest in oil producing countries and regions, regional production patterns and environmental concerns and regulations.

*Our results of operations are subject to seasonal fluctuations, which may adversely affect our financial condition.*

We operate our vessels in markets that have historically exhibited seasonal variations in demand and, as a result, charter rates. This seasonality may result in quarter-to-quarter volatility in our operating results, depending on when we enter into our time charters or if our vessels trade on the spot market. The drybulk sector is typically stronger in the fall and winter months in anticipation of increased consumption of coal and raw materials in the northern hemisphere during the winter months. As a result, our revenues could be weaker during the fiscal quarters ended June 30 and September 30, and conversely, our revenue could be stronger during the quarters ended December 31 and March 31. This seasonality could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

## **Company Specific Risk Factors**

*Our earnings will be adversely affected if we do not successfully employ our vessels.*

As of March 9, 2011, all but five of the vessels in our fleet were engaged under time charter or spot market-related time charter contracts that expire (assuming the option periods in the time charters are not exercised) between April 2011 and June 2013. Five of our vessels currently trade in the spot charter market through participation in pool arrangements. Although time charters provide relatively steady streams of revenues, our vessels committed to time charters may not be available for spot voyages during periods of increasing charterhire rates, when spot voyages might be more profitable. The drybulk market is volatile, and in the past charterhire rates for drybulk carriers have sometimes declined below operating costs of vessels. If our vessels become available for employment in

the spot market or under new time charters during periods when market prices have fallen, we may have to employ our vessels at depressed market prices, which would lead to reduced or volatile earnings. To the extent our vessels trade in the spot charter market, we may experience fluctuations in revenue, cash flow and net income. The spot charter market is highly competitive, and spot market voyage charter rates may fluctuate dramatically based primarily on the worldwide supply of drybulk vessels available in the market and the worldwide demand for the transportation of drybulk cargoes. We can provide no assurance that future charterhire rates will enable us to operate our vessels profitably. In addition, our standard time charter contracts with our customers specify certain performance parameters, which if not met can result in customer claims. Such claims may have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*If we cannot find profitable employment for additional vessels that we acquire, our earnings will be adversely affected.*

We generally acquire vessels free of charter, although we have and may again acquire some vessels with continuing time charters. In addition, where a vessel has been under a voyage charter, it is rare in the shipping industry for the last charterer of the vessel in the seller's hands to continue as the first charterer of the vessel in the buyer's hands. To the extent we operate our vessels in vessel pools, the profitable employment of our vessels depends to some degree on the ability of the pool operators. We provide no assurance that we will be able to arrange immediate or profitable employment for vessels that we acquire. If we cannot do so, it could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*We depend upon a small number of charterers for a large part of our revenues. The loss of one or more of these charterers could adversely affect our financial performance.*

We have derived a significant part of our revenues from a small number of charterers. For the year ended December 31, 2010, 100% of our revenues were derived from 33 charterers, including charterers of Baltic Trading's vessels. Additionally, approximately 40.7% of our revenues were derived from two charterers, Pacbasin and Cargill. If we were to lose any of these charterers, or if any of these charterers significantly reduced its use of our services or was unable to make charter payments to us, it could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*The aging of our fleet and our practice of purchasing and operating previously owned vessels may result in increased operating costs and vessels off-hire, which could adversely affect our earnings.*

The majority of our drybulk carriers were previously owned by third parties. Our current business strategy includes additional growth through the acquisition of previously owned vessels. While we typically inspect previously owned vessels before purchase, this does not provide us with the same knowledge about their condition that we would have had if these vessels had been built for and operated exclusively by us. Accordingly, we may not discover defects or other problems with such vessels before purchase. Any such hidden defects or problems, when detected, may be expensive to repair, and if not detected, may result in accidents or other incidents for which we may become liable to third parties. Also, when purchasing previously owned vessels, we do not receive the benefit of any builder warranties if the vessels we buy are older than one year.

In general, the costs to maintain a vessel in good operating condition increase with the age of the vessel. The average age of the vessels in our current fleet is approximately 6.3 years. Older vessels are typically less fuel-efficient than more recently constructed vessels due to improvements in engine technology and cargo insurance rates increase with the age of a vessel, making older vessels less desirable to

charterers.

Governmental regulations, safety and other equipment standards related to the age of vessels may require expenditures for alterations or the addition of new equipment to some of our vessels and may restrict the type of activities in which these vessels may engage. We cannot assure you that, as our vessels age, market conditions will justify those expenditures or enable us to operate our vessels profitably during the remainder of their useful lives. As a result, regulations and standards could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*An increase in operating costs could adversely affect our cash flow and financial condition.*

Our vessel operating expenses include the costs of crew, provisions, deck and engine stores, lube oil, bunkers, insurance and maintenance and repairs, which depend on a variety of factors, many of which are beyond our control. Some of these costs, primarily relating to insurance and enhanced security measures implemented after September 11, 2001 and as a result of the increase in the frequency of acts of piracy, have been increasing. In addition, to the extent we enter the spot charter market, we need to include the cost of bunkers as part of our voyage expenses. The price of bunker fuel may increase in the future. If our vessels suffer damage, they may need to be repaired at a drydocking facility. The costs of drydock repairs are unpredictable and can be substantial. Increases in any of these costs could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*We depend to a significant degree upon third-party managers to provide the technical management of our fleet. Any failure of these technical managers to perform their obligations to us could adversely affect our business.*

We have contracted the technical management of our fleet, including crewing, maintenance and repair services, to third-party technical management companies. The failure of these technical managers to perform their obligations could materially and adversely affect our business, results of operations, cash flows, financial condition and ability to pay dividends.

*In the highly competitive international drybulk shipping industry, we may not be able to compete for charters with new entrants or established companies with greater resources.*

We employ our vessels in a highly competitive market that is capital intensive and highly fragmented. Competition arises primarily from other vessel owners, some of whom have substantially greater resources than we do. Competition for the transportation of drybulk cargoes can be intense and depends on price, location, size, age, condition and the acceptability of the vessel and its managers to the charterers. Due in part to the highly fragmented market, competitors with greater resources could enter and operate larger fleets through consolidations or acquisitions that may be able to offer better prices and fleets than we are able to offer.

*We are currently prohibited from paying dividends or repurchasing our stock, and it is unlikely this prohibition will be lifted until market conditions improve.*

We agreed to the 2009 Amendment to our 2007 Credit Facility that contained a waiver of the collateral maintenance requirement. As a condition of this waiver, among other things, we agreed to suspend our cash dividends and share repurchases until such time as we can satisfy the collateral maintenance requirement. Until market conditions which have resulted in a decline in the value of drybulk vessels improve, it is unlikely that we will be able to meet that condition to reinstate our cash dividends and share repurchases.

Even if we were able to satisfy the condition in our 2007 Credit Facility to reinstate the payment of cash dividends, we would make dividend payments to our shareholders only if our Board of Directors, acting in its sole discretion, determines that such payments would be in our best interest and in compliance with relevant legal and contractual requirements. The principal business factors that our Board of Directors considers when determining the timing and amount of dividend payments will be our earnings, financial condition and cash requirements at the time. Marshall Islands law generally prohibits the declaration and payment of dividends other than from surplus. Marshall Islands law also

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

prohibits the declaration and payment of dividends while a company is insolvent or would be rendered insolvent by the payment of such a dividend.

We may incur other expenses or liabilities that would reduce or eliminate the cash available for distribution as dividends. We may also enter into new agreements or the Marshall Islands or another jurisdiction may adopt laws or regulations that place additional restrictions on our ability to pay dividends. If we do not pay dividends, the return on your investment would be limited to the price at which you could sell your shares.

*We may not be able to grow or effectively manage our growth, which could cause us to incur additional indebtedness and other liabilities and adversely affect our business.*

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

A principal focus of our business strategy is to grow by expanding our business. Our future growth will depend on a number of factors, some of which we can control and some of which we cannot. These factors include our ability to:

- identify vessels for acquisition;
- consummate acquisitions or establish joint ventures;
- integrate acquired vessels successfully with our existing operations;
- expand our customer base; and
- obtain required financing for our existing and new operations.

Growing any business by acquisition presents numerous risks, including undisclosed liabilities and obligations, difficulty obtaining additional qualified personnel, managing relationships with customers and suppliers and integrating newly acquired operations into existing infrastructures. Future acquisitions could result in the incurrence of additional indebtedness and liabilities that could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends. In addition, competition from other buyers for vessels could reduce our acquisition opportunities or cause us to pay a higher price than we might otherwise pay. We cannot assure you that we will be successful in executing our growth plans or that we will not incur significant expenses and losses in connection with these plans.

*Restrictive covenants in our 2007 Credit Facility, \$253 Million Term Loan Facility, \$100 Million Term Loan Facility and the 2010 Baltic Trading Credit Facility may impose financial and other restrictions on us which could negatively impact our growth and adversely affect our operations.*

Our ability to borrow amounts under our 2007 Credit Facility is subject to the satisfaction of certain customary conditions precedent and compliance with terms and conditions included in the related credit documents. It is a condition precedent to each drawdown under the facility that the aggregate fair market value of the mortgaged vessels must at all times be at least 130% of the aggregate outstanding principal amount under the credit facility plus all letters of credit outstanding (determined on a pro forma basis giving effect to the amount proposed to be drawn down), although this condition is currently subject to a waiver as noted above. To the extent that we are not able to satisfy these requirements, we may not be able to draw down the full amount under our 2007 Credit Facility without obtaining a further waiver or consent from the lenders. In addition, the covenants in our 2007 Credit Facility include the following requirements:

- The leverage covenant requires the maximum average net debt to EBITDA ratio to be no greater than 5.5:1.0;

- cash and cash equivalents must not be less than \$0.5 million per mortgaged vessel;
- the ratio of EBITDA to interest expense, on a rolling last four-quarter basis, must be no less than 2.0:1.0;

and

- after July 20, 2007, consolidated net worth must be no less than \$263.3 million plus 80% of the value of any new equity issuances of the Company from June 30, 2007. Based on the equity offerings completed in October 2007 and May 2008, consolidated net worth must be no less than \$590.8 million.

We cannot assure you that we will be able to comply with these covenants in the future.

Our 2007 Credit Facility imposes operating and financial restrictions on us. These restrictions may limit our ability to:

- incur additional indebtedness on satisfactory terms or at all;
- incur liens on our assets;
- sell our vessels or the capital stock of our subsidiaries;
- make investments;
- engage in mergers or acquisitions;
- pay dividends (following an event of default or our breach of a covenant) in the event we are able to resume dividend payments under the waiver of our collateral maintenance covenant which is currently in effect);
- make capital expenditures;
- compete effectively to the extent our competitors are subject to less onerous financial restrictions; and
- change the management of our vessels or terminate or materially amend the management agreement relating to any of our vessels.

Additionally, the \$253 Million Term Loan Facility requires us to comply with a number of covenants, including financial covenants related to leverage, consolidated net worth, liquidity and interest coverage, dividends, collateral maintenance requirements, and other covenants, most of which are in principle and calculation similar to the covenants described above under the 2007 Credit Facility, except for the minimum cash requirement, which is \$0.75 million per mortgaged vessel under this facility.

Similarly, the \$100 Million Term Loan Facility requires us to comply with a number of covenants, including financial covenants related to leverage, consolidated net worth, interest coverage and dividends, minimum working capital requirements, collateral maintenance requirements and other covenants, most of which are in principle and calculation similar to the covenants described above under the 2007 Credit Facility, except for the minimum cash requirement, which is \$0.75 million per mortgaged vessel under this facility. The \$100 Million Term Loan

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Facility includes usual and customary events of default and remedies for facilities of this nature. Availability of each tranche of the \$100 Million Term Loan Facility is subject to our acquisition of each of the five vessels from Metrostar and other conditions and documentation relating to the collateral securing the \$100 Million Term Loan Facility.

The 2010 Baltic Trading Credit Facility requires Baltic Trading to comply with a number of covenants, including financial covenants related to liquidity, consolidated net worth, and collateral maintenance, restrictions on changes in the Manager of Baltic Trading's initial vessels (or acceptable replacement vessels), limitations on changes to the Management Agreement between Baltic Trading and us, limitations on liens, limitations on additional indebtedness, restrictions on paying dividends, restrictions on transactions with affiliates and other customary covenants.

Therefore, we may need to seek permission from our lenders in order to engage in some corporate actions. Our lenders' interests may be different from ours, and we cannot guarantee that we will be able to obtain our lenders' permission when needed. This may prevent us from taking actions that are in our best interest and from executing our business strategy of growth through acquisitions and may restrict or limit our ability to pay dividends and finance our future operations.

*The issuance of our outstanding convertible notes could affect our business in the future.*

The issuance of our 5.00% Convertible Senior Notes due August 15, 2015 (the 2010 Notes ) could affect us and our business in the following ways:

- The indebtedness associated with the 2010 Notes, together with indebtedness incurred under our 2007 Credit Facility, \$253 Million Term Loan Facility, \$100 Million Term Loan Facility and the 2010 Baltic Trading Credit Facility, is substantial. Our ability to obtain additional financing or pursue new business opportunities may be negatively impacted.
- We may need to refinance the 2010 Notes and our other debt on terms that may be unfavorable to us (if refinancing is available at all) if our cash flow is insufficient to service the 2010 Notes and such other debt.
- We may make cash payments to satisfy our conversion obligations under the 2010 Notes, which could materially adversely affect our liquidity, cash flows, and results of operations.
- In the event of certain mergers or acquisitions of us, the indenture for the 2010 Notes may require us to repurchase the 2010 Notes or the surviving entity to assume our obligations under the 2010 Notes. These requirements may deter or prevent a business combination that may be favorable to our securityholders.

*We currently maintain all of our cash and cash equivalents with four financial institutions, which subjects us to credit risk.*

We currently maintain all of our cash and cash equivalents with four financial institutions. None of our balances are covered by insurance in the event of default by the financial institutions. The occurrence of such a default of any of these institutions could therefore have a material adverse effect on our business, financial condition, results of operations and cash flows.

*If we are unable to fund our capital expenditures, we may not be able to continue to operate some of our vessels, which would have a material adverse effect on our business and our ability to pay dividends.*

In order to fund our capital expenditures, we may be required to incur borrowings or raise capital through the sale of debt or equity securities. Our ability to borrow money and access the capital markets through future offerings may be limited by our financial condition at the time of any such offering as well as by adverse market conditions resulting from, among other things, general economic conditions and contingencies and uncertainties that are beyond our control. Our failure to obtain the funds for necessary future capital expenditures would limit our ability to continue to operate some of our vessels or impair the value of our vessels and could have a material adverse effect on our business, results of operations, financial condition, cash flows and ability to pay dividends. Even if we are successful in obtaining such funds through financings, the terms of such financings could further limit our ability to pay dividends.

*We are a holding company, and we depend on the ability of our subsidiaries to distribute funds to us in order to satisfy our financial obligations or to make dividend payments.*

We are a holding company, and our subsidiaries, which are all wholly owned by us, either directly or indirectly, conduct all of our operations and own all of our operating assets. We have no significant assets other than the equity interests in our wholly owned subsidiaries. As a result, our ability to satisfy our financial obligations and to pay dividends to our shareholders depends on the ability of our subsidiaries to distribute funds to us. In turn, the ability of our subsidiaries to make dividend payments to us will be dependent on them having profits available for distribution and, to the extent that we are unable to obtain dividends from our subsidiaries, this will limit the discretion of our Board of Directors to pay or recommend the payment of dividends.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

*Our ability to obtain additional debt financing may depend on the performance of our then existing charters and the creditworthiness of our charterers, and market conditions.*

The actual or perceived credit quality of our charterers, and any defaults by them, or market conditions affecting the time charter market and the credit markets, may materially affect our ability to obtain the additional capital resources that may be required to purchase additional vessels or may significantly increase our costs of obtaining such capital. Our inability to obtain additional financing at all or at a higher than anticipated cost may have a material adverse affect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*If management is unable to continue to provide reports as to the effectiveness of our internal control over financial reporting or our independent registered public accounting firm is unable to continue to provide us with unqualified attestation reports as to the effectiveness of our internal control over financial reporting, investors could lose confidence in the reliability of our financial statements, which could result in a decrease in the value of our common stock.*

Under Section 404 of the Sarbanes-Oxley Act of 2002, we are required to include in this and each of our future annual reports on Form 10-K a report containing our management's assessment of the effectiveness of our internal control over financial reporting and a related attestation of our independent registered public accounting firm. If, in such future annual reports on Form 10-K, our management cannot provide a report as to the effectiveness of our internal control over financial reporting or our independent registered public accounting firm is unable to provide us with an unqualified attestation report as to the effectiveness of our internal control over financial reporting as required by Section 404, investors could lose confidence in the reliability of our consolidated financial statements, which could result in a decrease in the value of our common stock.

*If we are unable to operate our financial and operations systems effectively or to recruit suitable employees as we expand our fleet, our performance may be adversely affected.*

Our current financial and operating systems may not be adequate as we implement our plan to expand the size of our fleet, and our attempts to improve those systems may be ineffective. In addition, as we expand our fleet, we will have to rely on our outside technical managers to recruit suitable additional seafarers and shore-based administrative and management personnel. We cannot assure you that our outside technical managers will be able to continue to hire suitable employees as we expand our fleet.

*We may be unable to attract and retain key management personnel and other employees in the shipping industry, which may negatively affect the effectiveness of our management and our results of operations.*

Our success depends to a significant extent upon the abilities and efforts of our management team and our ability to hire and retain key members of our management team. The loss of any of these individuals could adversely affect our business prospects and financial condition. Difficulty in hiring and retaining personnel could have a material adverse effect our business, results of operations, cash flows, financial condition and ability to pay dividends. We do not intend to maintain key man life insurance on any of our officers.

*Arrangements relating to our Baltic Trading subsidiary could require significant time and attention from our personnel and may result in conflicts of interest.*

Our subsidiary, Baltic Trading, conducts a shipping business focused on the drybulk industry spot market. Some of our personnel provide services to Baltic Trading, including our Chief Financial Officer. This requires substantial time and attention from these individuals and reduces their availability to serve us. Our Chairman and two of our directors serve on the Baltic Trading board of directors. Our officers and directors who also serve Baltic Trading may encounter situations in which their fiduciary obligations to us and to Baltic Trading are in conflict. The Omnibus Agreement entered into between us and Baltic Trading is intended to reduce these conflicts by granting a right of first refusal to Baltic Trading for certain spot chartering opportunities and to us for other business opportunities. However, these arrangements and/or the resolutions of these conflicts may not always be in our best

interest or that of our shareholders and could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*Our Chairman may pursue business opportunities in our industry.*

Our Chairman, Peter C. Georgiopoulos, is not an employee of our company and is not contractually committed to remain as a director of our company or to refrain from other activities in our industry. Mr. Georgiopoulos actively reviews potential investment opportunities in the shipping industry, including the drybulk sector, from time to time. Mr. Georgiopoulos has informed us that so long as he is a director of our company, prior to making an investment in an entity owning or operating drybulk vessels, he intends to make a disclosure to our board and our independent directors and allow us to pursue the opportunity to the extent we choose to do so and are able. However, in the event we choose not to pursue any such opportunity or are not able to obtain such an opportunity, Mr. Georgiopoulos may proceed, either alone or with others, with such investments. In keeping with these principles, Mr. Georgiopoulos has become a minority investor in MEP, a company he controls which owns 12 drybulk vessels. As a result of such investments, Mr. Georgiopoulos may have independent interests in the ownership and operation of drybulk vessels that may conflict with our interests.

*We may not have adequate insurance to compensate us if we lose our vessels or to compensate third parties.*

There are a number of risks associated with the operation of ocean-going vessels, including mechanical failure, collision, human error, war, terrorism, piracy, property loss, cargo loss or damage and business interruption due to political circumstances in foreign countries, hostilities and labor strikes. Any of these events may result in loss of revenues, increased costs and decreased cash flows. In addition, the operation of any vessel is subject to the inherent possibility of marine disaster, including oil spills and other environmental mishaps, and the liabilities arising from owning and operating vessels in international trade.

We are insured against tort claims and some contractual claims (including claims related to environmental damage and pollution) through memberships in protection and indemnity associations or clubs, or P&I Associations. As a result of such membership, the P&I Associations provide us coverage for such tort and contractual claims. We also carry hull and machinery insurance and war risk insurance for our fleet. We insure our vessels for third-party liability claims subject to and in accordance with the rules of the P&I Associations in which the vessels are entered. We currently maintain insurance against loss of hire, which covers business interruptions that result in the loss of use of a vessel. We can give no assurance that we will be adequately insured against all risks. We may not be able to obtain adequate insurance coverage for our fleet in the future. The insurers may not pay particular claims. Our insurance policies contain deductibles for which we will be responsible and limitations and exclusions which may increase our costs or lower our revenue.

We cannot assure you that we will be able to renew our insurance policies on the same or commercially reasonable terms, or at all, in the future. For example, more stringent environmental regulations have led in the past to increased costs for, and in the future may result in the lack of availability of, protection and indemnity insurance against risks of environmental damage or pollution. Any uninsured or underinsured loss could harm our business, results of operations, cash flows, financial condition and ability to pay dividends. In addition, our insurance may be voidable by the insurers as a result of certain of our actions, such as our ships failing to maintain certification with applicable maritime self-regulatory organizations. Further, we cannot assure you that our insurance policies will cover all losses that we incur, or that disputes over insurance claims will not arise with our insurance carriers. Any claims covered by insurance would be subject to deductibles, and since it is possible that a large number of claims may be brought, the aggregate amount of these deductibles could be material. In addition, our insurance policies are subject to limitations and exclusions, which may increase our costs or lower our revenues, thereby possibly having a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

*We are subject to funding calls by our protection and indemnity associations, and our associations may not have enough resources to cover claims made against them.*

We are indemnified for legal liabilities incurred while operating our vessels through membership in P&I Associations. P&I Associations are mutual insurance associations whose members must contribute to cover losses

sustained by other association members. The objective of a P&I Association is to provide mutual insurance based on the aggregate tonnage of a member's vessels entered into the association. Claims are paid through the aggregate premiums of all members of the association, although members remain subject to calls for additional funds if the aggregate premiums are insufficient to cover claims submitted to the association. Claims submitted to the association may include those incurred by members of the association, as well as claims submitted to the association from other P&I Associations with which our P&I Association has entered into interassociation agreements. We cannot assure you that the P&I Associations to which we belong will remain viable or that we will not become subject to additional funding calls which could adversely affect us.

*We may have to pay U.S. tax on U.S. source income, which would reduce our net income and cash flows.*

If we do not qualify for an exemption pursuant to Section 883 of the U.S. Internal Revenue Code of 1986, as amended, or the Code, which we refer to as Section 883, then we will be subject to U.S. federal income tax on our shipping income that is derived from U.S. sources. If we are subject to such tax, our net income and cash flows would be reduced by the amount of such tax.

We will qualify for exemption under Section 883 if, among other things, our stock is treated as primarily and regularly traded on an established securities market in the United States. Under applicable Treasury regulations, we may not satisfy this publicly traded requirement in any taxable year in which 50% or more of our stock is owned for more than half the days in such year by persons who actually or constructively own 5% or more of our stock, which we sometimes refer to as 5% shareholders.

We believe that, based on the ownership of our stock in 2009, we satisfied the publicly traded requirement for 2009. However, if 5% shareholders were to own more than 50% of our common stock for more than half the days of any future taxable year, we may not be eligible to claim exemption from tax under Section 883 for such taxable year. We can provide no assurance that changes and shifts in the ownership of our stock by 5% shareholders will not preclude us from qualifying for exemption from tax in 2010 or in future years.

If we do not qualify for the Section 883 exemption, our shipping income derived from U.S. sources, or 50% of our gross shipping income attributable to transportation beginning or ending in the United States, would be subject to a 4% tax without allowance for deductions.

Baltic Trading is also incorporated in the Marshall Islands. However, Baltic Trading did not qualify for an exemption under Section 883 upon consummation of its IPO because it did not satisfy the publicly traded requirement as described above. Since Baltic Trading's IPO was completed on March 15, 2010, the Company has indirectly owned shares of Baltic Trading's Class B Stock which has provided the Company with over 50% of the combined voting power of all classes of Baltic Trading's voting stock. As such, Baltic Trading is subject to income tax on its United States source income. During the year ended December 31, 2010, Baltic Trading had United States operations which resulted in United States source income of approximately \$2.5 million.

In addition, our revenues derived from the services we provide to Baltic Trading and MEP result in U.S. source income for which we are subject to U.S. income tax. These revenues totaled approximately \$3.9 million for the year ended December 31, 2010.

*U.S. tax authorities could treat us as a passive foreign investment company, which could have adverse U.S. federal income tax consequences to U.S. shareholders.*

A foreign corporation generally will be treated as a passive foreign investment company, which we sometimes refer to as a PFIC, for U.S. federal income tax purposes if either (1) at least 75% of its gross income for any taxable year consists of passive income or (2) at least 50% of its assets (averaged over the year and generally determined based upon value) produce or are held for the production of passive income. U.S. shareholders of a PFIC are subject to a disadvantageous U.S. federal income tax regime with respect to distributions they receive from the PFIC and gain, if any, they derive from the sale or other disposition of their stock in the PFIC.

For purposes of these tests, passive income generally includes dividends, interest, gains from the sale or

exchange of investment property and rents and royalties other than rents and royalties which are received from unrelated parties in connection with the active conduct of a trade or business, as defined in applicable Treasury regulations. For purposes of these tests, income derived from the performance of services does not constitute passive income. By contrast, rental income would generally constitute passive income unless we were treated under specific rules as deriving our rental income in the active conduct of a trade or business. We do not believe that our existing operations would cause us to be deemed a PFIC with respect to any taxable year. In this regard, we treat the gross income we derive or are deemed to derive from our time and spot chartering activities as services income, rather than rental income. Accordingly, we believe that (1) our income from our time and spot chartering activities does not constitute passive income and (2) the assets that we own and operate in connection with the production of that income do not constitute passive assets.

While there is no direct legal authority under the PFIC rules addressing our method of operation, there is legal authority supporting this position consisting of case law and pronouncements by the United States Internal Revenue Service, which we sometimes refer to as the IRS, concerning the characterization of income derived from time charters and voyage charters as services income for other tax purposes. However, it should be noted that there is also authority which characterizes time charter income as rental income rather than services income for other tax purposes. Accordingly, no assurance can be given that the IRS or a court of law will accept our position, and there is a risk that the IRS or a court of law could determine that we are a PFIC. Moreover, because there are uncertainties in the application of the PFIC rules, because the PFIC test is an annual test, and because, although we intend to manage our business so as to avoid PFIC status to the extent consistent with our other business goals, there could be changes in the nature and extent of our operations in future years, there can be no assurance that we will not become a PFIC in any taxable year.

If we were to be treated as a PFIC for any taxable year (and regardless of whether we remain a PFIC for subsequent taxable years), our U.S. shareholders would face adverse U.S. tax consequences. Under the PFIC rules, unless a shareholder makes certain elections available under the Code (which elections could themselves have adverse consequences for such shareholder), such shareholder would be liable to pay U.S. federal income tax at the highest applicable income tax rates on ordinary income upon the receipt of excess distributions and upon any gain from the disposition of our common stock, plus interest on such amounts, as if such excess distribution or gain had been recognized ratably over the shareholder's holding period of our common stock.

*Because we generate all of our revenues in U.S. dollars but incur a portion of our expenses in other currencies, exchange rate fluctuations could hurt our results of operations.*

We generate all of our revenues in U.S. dollars, but we may incur drydocking costs, special survey fees and other expenses in other currencies. If our expenditures on such costs and fees were significant, and the U.S. dollar were weak against such currencies, our business, results of operations, cash flows, financial condition and ability to pay dividends could be adversely affected.

*Legislative action relating to taxation could materially and adversely affect us.*

Our tax position could be adversely impacted by changes in tax laws, tax treaties or tax regulations or the interpretation or enforcement thereof by any tax authority. For example, legislative proposals have been introduced in the U.S. Congress which, if enacted, could change the circumstances under which we would be treated as a U.S. person for U.S. federal income tax purposes, which could materially and adversely affect our effective tax rate and cash tax position and require us to take action, at potentially significant expense, to seek to preserve our effective tax rate and cash tax position. We cannot predict the outcome of any specific legislative proposals.

## **RISK FACTORS RELATED TO OUR COMMON STOCK**

*Peter Georgiopoulos owns a large portion of our outstanding common stock, which may limit your ability to influence our actions.*

As of December 31, 2010, Peter C. Georgiopoulos, our Chairman, owned approximately 12.50% of our common stock directly or through Fleet Acquisition LLC. As a result of this share ownership and for so long as he owns a significant percentage of our outstanding common stock, Mr. Georgiopoulos will be able to influence the outcome of any shareholder vote, including the election of directors, the adoption or amendment of provisions in our articles of incorporation or by-laws and possible mergers, corporate control contests and other significant corporate transactions. This concentration of ownership may have the effect of delaying, deferring or preventing a change in control, merger, consolidation, takeover or other business combination involving us. This concentration of ownership could also discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us, which could in turn have an adverse effect on the market price of our common stock.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

*Because we are a foreign corporation, you may not have the same rights or protections that a shareholder in a United States corporation may have.*

We are incorporated in the Republic of the Marshall Islands, which does not have a well-developed body of corporate law and may make it more difficult for our shareholders to protect their interests. Our corporate affairs are governed by our amended and restated articles of incorporation and bylaws and the Marshall Islands Business Corporations Act, or BCA. The provisions of the BCA resemble provisions of the corporation laws of a number of states in the United States. The rights and fiduciary responsibilities of directors under the law of the Marshall Islands are not as clearly established as the rights and fiduciary responsibilities of directors under statutes or judicial precedent in existence in certain U.S. jurisdictions and there have been few judicial cases in the Marshall Islands interpreting the BCA. Shareholder rights may differ as well. While the BCA does specifically incorporate the non-statutory law, or judicial case law, of the State of Delaware and other states with substantially similar legislative provisions, our public shareholders may have more difficulty in protecting their interests in the face of actions by the management, directors or controlling shareholders than would shareholders of a corporation incorporated in a U.S. jurisdiction. Therefore, you may have more difficulty in protecting your interests as a shareholder in the face of actions by the management, directors or controlling shareholders than would shareholders of a corporation incorporated in a United States jurisdiction.

*Future sales of our common stock could cause the market price of our common stock to decline.*

The market price of our common stock could decline due to sales of a large number of shares in the market, including sales of shares by our large shareholders, or the perception that these sales could occur. These sales could also make it more difficult or impossible for us to sell equity securities in the future at a time and price that we deem appropriate to raise funds through future offerings of common stock. We have entered into a registration rights agreement with Fleet Acquisition LLC that entitles it to have all the shares of our common stock that it owns registered for sale in the public market under the Securities Act of 1933, as amended (the Securities Act) and, pursuant to the registration rights agreement, registered Fleet Acquisition LLC's shares on a registration statement on Form S-3 in February 2007. We also registered on Form S-8 for an aggregate of 2,000,000 shares issued or issuable under our equity compensation plan.

*We may need to raise additional capital in the future, which may not be available on favorable terms or at all or which may dilute our common stock or adversely affect its market price.*

We may require additional capital to expand our business and increase revenues, add liquidity in response to negative economic conditions, meet unexpected liquidity needs caused by industry volatility or uncertainty and reduce our outstanding indebtedness under our existing facilities. To the extent that our existing capital and borrowing capabilities are insufficient to meet these requirements and cover any losses, we will need to raise additional funds through debt or equity financings, including offerings of our common stock, securities convertible into our common stock, or rights to acquire our common stock or curtail our growth and reduce our assets or restructure arrangements with existing security holders. Any equity or debt financing, or additional borrowings, if available at all, may be on terms that are not favorable to us. Equity financings could result in dilution to our stockholders, as described further below, and the securities issued in future financings may have rights, preferences and privileges that are senior to those of our common stock. If our need for capital arises because of significant losses, the occurrence of these losses may make it more difficult for us to raise the necessary capital. If we cannot raise funds on acceptable terms if and when needed, we may not be able to take advantage of future opportunities, grow our business or respond to competitive pressures or unanticipated requirements.

*Conversion of the 2010 Notes may dilute the ownership interest of existing stockholders.*

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The conversion of some or all of the 2010 Notes may dilute the ownership interests of existing stockholders. Any sales in the public market of any of our common stock issuable upon such conversion could adversely affect prevailing market prices of our common stock. In addition, the anticipated conversion of the 2010 Notes into shares of our common stock or a combination of cash and shares of our common stock could depress the price of our common stock.

*Future issuances of our common stock could dilute our shareholders' interests in our company.*

We may, from time to time, issue additional shares of common stock to support our growth strategy, reduce debt or provide us with capital for other purposes that our Board of Directors believes to be in our best interest. To the extent that an existing shareholder does not purchase additional shares that we may issue, that shareholder's interest in our company will be diluted, which means that its percentage of ownership in our company will be reduced. Following such a reduction, that shareholder's common stock would represent a smaller percentage of the vote in our Board of Directors' elections and other shareholder decisions. In addition, if additional shares are issued, depending on the circumstances, our dividends per share could be reduced.

*Volatility in the market price and trading volume of our common stock could adversely impact the trading price of our common stock.*

The stock market in recent years has experienced significant price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of companies like us. These broad market factors may materially reduce the market price of our common stock, regardless of our operating performance. The market price of our common stock, which has experienced significant price and volume fluctuations in recent months, could continue to fluctuate significantly for many reasons, including in response to the risks described herein or for reasons unrelated to our operations, such as reports by industry analysts, investor perceptions or negative announcements by our competitors or suppliers regarding their own performance, as well as industry conditions and general financial, economic and political instability. A decrease in the market price of our common stock would adversely impact the value of your shares of common stock.

*Provisions of our amended and restated articles of incorporation and by-laws may have anti-takeover effects which could adversely affect the market price of our common stock.*

Several provisions of our amended and restated articles of incorporation and by-laws, which are summarized below, may have anti-takeover effects. These provisions are intended to avoid costly takeover battles, lessen our vulnerability to a hostile change of control and enhance the ability of our Board of Directors to maximize shareholder value in connection with any unsolicited offer to acquire our company. However, these anti-takeover provisions could also discourage, delay or prevent (1) the merger or acquisition of our company by means of a tender offer, a proxy contest or otherwise that a shareholder may consider in its best interest and (2) the removal of incumbent officers and directors.

*Blank Check Preferred Stock.*

Under the terms of our amended and restated articles of incorporation, our Board of Directors has the authority, without any further vote or action by our shareholders, to authorize our issuance of up to 25,000,000 shares of blank check preferred stock. Our Board of Directors may issue shares of preferred stock on terms calculated to discourage, delay or prevent a change of control of our company or the removal of our management.

*Classified Board of Directors.*

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Our amended and restated articles of incorporation provide for the division of our Board of Directors into three classes of directors, with each class as nearly equal in number as possible, serving staggered, three-year terms beginning upon the expiration of the initial term for each class. Approximately one-third of our Board of Directors is elected each year. This classified board provision could discourage a third party from making a tender offer for our shares or attempting to obtain control of us. It could also delay shareholders who do not agree with the policies of our Board of Directors from removing a majority of our Board of Directors for up to two years.

### *Election and Removal of Directors.*

Our amended and restated articles of incorporation prohibit cumulative voting in the election of directors. Our by-laws require parties other than the board of directors to give advance written notice of nominations for the election of directors. Our articles of incorporation also provide that our directors may be removed only for cause and

only upon the affirmative vote of 66<sup>2</sup>/<sub>3</sub>% of the outstanding shares of our capital stock entitled to vote for those directors or by a majority of the members of the board of directors then in office. These provisions may discourage, delay or prevent the removal of incumbent officers and directors.

*Limited Actions by Shareholders.*

Our amended and restated articles of incorporation and our by-laws provide that any action required or permitted to be taken by our shareholders must be effected at an annual or special meeting of shareholders or by the unanimous written consent of our shareholders. Our amended and restated articles of incorporation and our by-laws provide that, subject to certain exceptions, our Chairman, President, or Secretary at the direction of the Board of Directors may call special meetings of our shareholders and the business transacted at the special meeting is limited to the purposes stated in the notice.

*Advance Notice Requirements for Shareholder Proposals and Director Nominations.*

Our by-laws provide that shareholders seeking to nominate candidates for election as directors or to bring business before an annual meeting of shareholders must provide timely notice of their proposal in writing to the corporate secretary. Generally, to be timely, a shareholder's notice must be received at our principal executive offices not less than 150 days nor more than 180 days before the date on which we first mailed our proxy materials for the preceding year's annual meeting. Our by-laws also specify requirements as to the form and content of a shareholder's notice. These provisions may impede a shareholder's ability to bring matters before an annual meeting of shareholders or make nominations for directors at an annual meeting of shareholders.

*It may not be possible for our investors to enforce U.S. judgments against us.*

We are incorporated in the Republic of the Marshall Islands and most of our subsidiaries are also organized in the Marshall Islands. Substantially all of our assets and those of our subsidiaries are located outside the United States. As a result, it may be difficult or impossible for United States shareholders to serve process within the United States upon us or to enforce judgment upon us for civil liabilities in United States courts. In addition, you should not assume that courts in the countries in which we are incorporated or where our assets are located (1) would enforce judgments of United States courts obtained in actions against us based upon the civil liability provisions of applicable United States federal and state securities laws or (2) would enforce, in original actions, liabilities against us based upon these laws.

**ITEM 1B. UNRESOLVED STAFF COMMENTS**

Not applicable.

**ITEM 2. PROPERTIES**

We do not own any real property. In September 2005, we entered into a 15-year lease for office space in New York, New York. The monthly rental is as follows: Free rent from September 1, 2005 to July 31, 2006, \$40,000 per month from August 1, 2006 to August 31, 2010, \$43,000 per month from September 1, 2010 to August 31, 2015, and \$46,000 per month from September 1, 2015 to August 31, 2020. The monthly straight-line rental expense from September 1, 2005 to August 31, 2020 is \$39,000. We have the option to extend the lease for a period of five years from September 1, 2020 to August 31, 2025. The rent for the renewal period will be based on the prevailing market rate for the six months prior to the commencement date of the extension term.

Future minimum rental payments on the above lease for the next five years and thereafter are as follows: \$0.5 million per year for 2011 through 2015 and a total of \$2.6 million for the remaining term of the lease.

For a description of our vessels, see [Our Fleet](#) in Item 1, [Business](#) in this report.

We consider each of our significant properties to be suitable for its intended use.

**ITEM 3. LEGAL PROCEEDINGS**

We have not been involved in any legal proceedings which we believe are likely to have, or have had a significant effect on our business, financial position, results of operations or cash flows, nor are we aware of any proceedings that are pending or threatened which we believe are likely to have a significant effect on our business, financial position, results of operations or liquidity. From time to time, we may be subject to legal proceedings and claims in the ordinary course of business, principally personal injury and property casualty claims. We expect that these claims would be covered by insurance, subject to customary deductibles. Those claims, even if lacking merit, could result in the expenditure of significant financial and managerial resources.

**ITEM 4. RESERVED****PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND PURCHASES OF EQUITY SECURITIES****MARKET INFORMATION, HOLDERS AND DIVIDENDS**

Our common stock is traded on the New York Stock Exchange ( NYSE ) under the symbol GNK. The following table sets forth for the periods indicated the high and low prices for the common stock as reported by the NYSE:

<b>FISCAL YEAR ENDED DECEMBER 31, 2010</b>		<b>HIGH</b>		<b>LOW</b>
1st Quarter	\$	26.49	\$	18.07
2nd Quarter	\$	24.52	\$	14.90
3rd Quarter	\$	17.80	\$	14.20
4th Quarter	\$	18.08	\$	13.88

<b>FISCAL YEAR ENDED DECEMBER 31, 2009</b>		<b>HIGH</b>		<b>LOW</b>
1st Quarter	\$	22.76	\$	9.01
2nd Quarter	\$	29.89	\$	11.75
3rd Quarter	\$	25.98	\$	17.12
4th Quarter	\$	29.20	\$	18.95

As of March 1, 2011, there were approximately 65 holders of record of our common stock.

Until January 26, 2009, our dividend policy was to declare quarterly distributions to shareholders, which commenced in November 2005, by each February, May, August and November substantially equal to our available cash from operations during the previous quarter, less cash

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

expenses for that quarter (principally vessel operating expenses and debt service) and any reserves our Board of Directors determined we should maintain. These reserves covered, among other things, drydocking, repairs, claims, liabilities and other obligations, interest expense and debt amortization, acquisitions of additional assets and working capital. Under the terms of the 2009 Amendment to our 2007 Credit Facility (discussed in the Liquidity and Capital Resources section of Management's Discussion and Analysis of Financial Condition and Results of Operations in this report and in Note 9 Long-Term Debt of our financial statements), we have suspended payment of cash dividends indefinitely beginning the quarter ended December 31, 2008. We will be able to reinstate our cash dividends only when we can represent to the lenders under our 2007 Credit Facility that we are in a position to again satisfy the collateral maintenance covenant of the 2007 Credit Facility. There were no dividends declared during the years ended December 31, 2010 and 2009.

**EQUITY COMPENSATION PLAN INFORMATION**

The following table provides information as of December 31, 2010 regarding the number of shares of our common stock that may be issued under the 2005 Equity Incentive Plan, which is our sole equity compensation plan:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders		\$	682,000
Equity compensation plans not approved by security holders			
<b>Total</b>		<b>\$</b>	<b>682,000</b>

**SHARE REPURCHASE PROGRAM**

Refer to the Share Repurchase Program section of Item 7 for a summary of cumulative share repurchases made pursuant to the Share Repurchase Program.

(U.S. dollars in thousands)

Net cash provided by operating activities	\$	262,680	\$	219,729	\$	267,416	\$	120,862	\$	90,068
Net cash used in investing activities		(870,230)		(306,210)		(514,288)		(984,350)		(82,840)
Net cash provided by financing activities		690,160		149,792		300,332		861,430		19,414
EBITDA (1)	\$	330,711	\$	298,330	\$	208,807	\$	164,183	\$	97,406

(1) EBITDA represents net income attributable to Genco Shipping & Trading Limited plus net interest expense, taxes and depreciation and amortization. EBITDA is included because it is used by management and certain investors as a measure of operating performance. EBITDA is used by analysts in the shipping industry as a common performance measure to compare results across peers. Our management uses EBITDA as a performance measure in our consolidated internal financial statements, and it is presented for review at our board meetings. The Company believes that EBITDA is useful to investors as the shipping industry is capital intensive which often results in significant depreciation and cost of financing. EBITDA presents investors with a measure in addition to net income to evaluate the Company's performance prior to these costs. EBITDA is not an item recognized by U.S. GAAP and should not be considered as an alternative to net income, operating income or any other indicator of a company's operating performance required by U.S. GAAP. EBITDA is not a measure of liquidity or cash flows as shown in our consolidated statement of cash flows. The definition of EBITDA used here may not be comparable to that used by other companies. The following table demonstrates our calculation of EBITDA and provides a reconciliation of EBITDA to net income attributable to Genco Shipping & Trading Limited for each of the periods presented above:

	For the years ended December 31									
	2010	2009	2008	2007	2006					
Net income attributable to Genco Shipping & Trading Limited	\$	141,243	\$	148,624	\$	86,580	\$	106,809	\$	63,522

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**General**

We are a Marshall Islands company that transports iron ore, coal, grain, steel products and other drybulk cargoes along worldwide shipping routes through the ownership and operation of drybulk carrier vessels. As of March 9, 2011, excluding Baltic Trading, our fleet consisted of nine Capesize, eight Panamax, 16 Supramax, six Handymax and ten Handysize drybulk carriers, with an aggregate carrying capacity of approximately 3,649,000 dwt, and the average age of our fleet is currently 6.3 years, as compared to the average age for the world fleet of approximately 15 years for the drybulk shipping segments in which we compete. Most of the vessels in our fleet are on time charters to well known charterers, including Lauritzen Bulkers, Cargill, Pacbasin, STX, Cosco, and HMMC. As of March 9, 2011, 44 of the 49 vessels in our fleet, excluding Baltic Trading, are presently engaged under time charter and spot market-related time charter contracts that expire (assuming the option periods in the time charters are not exercised) between April 2011 and June 2013, and five of our vessels are currently operating in vessel pools. See pages 5-6 for a table indicating the built dates of all vessels currently in our fleet.

In addition, Baltic Trading's fleet currently consists of two Capesize, four Supramax and three Handysize drybulk carriers with an aggregate carrying capacity of approximately 672,000 dwt.

We intend to acquire additional modern, high-quality drybulk carriers through timely and selective acquisitions of vessels in a manner that is accretive to our cash flow. We expect to fund acquisitions of additional vessels using cash reserves set aside for this purpose, additional borrowings and may consider additional debt and equity financing alternatives from time to time.

Our management team and our other employees are responsible for the commercial and strategic management of our fleet. Commercial management includes the negotiation of charters for vessels, managing the mix of various types of charters, such as time charters and voyage charters, and monitoring the performance of our vessels under their charters. Strategic management includes locating, purchasing, financing and selling vessels. We currently contract with three independent technical managers, to provide technical management of our fleet at a lower cost than we believe would be possible in-house. Technical management involves the day-to-day management of vessels, including performing routine maintenance, attending to vessel operations and arranging for crews and supplies. Members of our New York City-based management team oversee the activities of our independent technical managers.

From time to time in the current global economic environment, our charterers with long-term time charters may request to renegotiate the terms of our charters with them. As a general matter, we do not agree to make changes to the terms of our charters in response to such requests. The failure of any charterer to meet its obligations under our long-term time charters could have an adverse effect on our results of operations.

Baltic Trading, formerly a wholly-owned subsidiary of the Company, completed its IPO on March 15, 2010. As of December 31, 2010, the Company's wholly-owned subsidiary Genco Investments LLC owned 5,699,088 shares of Baltic Trading's Class B Stock, which represents a 25.24% ownership interest in Baltic Trading at December 31, 2010 and 83.51% of the aggregate voting power of Baltic Trading's outstanding shares of voting stock. Baltic Trading is consolidated with the Company, as we control a majority of the voting interests in Baltic Trading. Management's discussion and analysis of the Company's results of operations and financial condition in this section includes the results of Baltic Trading.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

We entered into a long-term management agreement with Baltic Trading pursuant to which we apply our expertise and experience in the drybulk industry to provide Baltic Trading with commercial, technical, administrative and strategic services. The Management Agreement is for an initial term of approximately 15 years and will automatically renew for additional five-year periods unless terminated in accordance with its terms. Baltic Trading will pay us for the services we provide it as well as reimburse us for our costs and expenses incurred in providing

certain of these services. Management fee income we earn from the Management Agreement net of any allocated shared expenses, such as salary, office expenses and other general and administrative fees, will be taxable to us. Upon consolidation with Baltic Trading, any management fee income earned will be eliminated for financial reporting purposes.

We provide technical services for drybulk vessels purchased by MEP under an agency agreement between us and MEP. These services include oversight of crew management, insurance, drydocking, ship operations and financial statement preparation, but do not include chartering services. The services are provided for a fee of \$750 per ship per day plus reimbursement of out-of-pocket costs and will be provided for an initial term of one year. MEP will have the right to cancel provision of services on 60 days notice with payment of a one-year termination fee or without fee upon a Company change of control. The Company may terminate provision of the services at any time on 60 days notice. Mr. Georgiopoulos is a minority investor, and affiliates of Oaktree Capital Management, L.P., of which Stephen A. Kaplan is a principal, are majority investors in MEP. This arrangement was approved by an independent committee of our Board of Directors.

During the beginning of 2009, the Genco Cavalier, a 2007-built Supramax vessel, was on charter to Samsun when Samsun filed for a rehabilitation application. On February 5, 2010, the rehabilitation plan submitted by Samsun was approved by the South Korean courts. As part of the rehabilitation process, our claim of approximately \$17.2 million will be settled in the following manner: 34%, or approximately \$5.9 million, will be paid in cash in annual installments on December 30th of each year from 2010 through 2019 ranging in percentages from eight to 17; the remaining 66%, or approximately \$11.3 million, will be converted to Samsun shares at a specified value per share. During the year ended December 31, 2010, we have recorded \$0.6 million as other operating income which represents 10% of cash settlement due on December 30, 2010.

During January 2011, the Genco Success, a 1997-built Handymax vessel, was on charter to KLC when KLC filed for a rehabilitation application. At December 31, 2010, we have limited exposure as a result of the bankruptcy protection filing by KLC. The vessel was redelivered to us by KLC on January 29, 2011. We estimate that we have a claim of approximately \$1.1 million against KLC related primarily to unpaid revenue earned prior to re-delivery of the vessel. If a rehabilitation plan is approved by the South Korean courts and it is determined that we will receive a cash settlement for our outstanding claim, any amounts due from KLC will be recorded once the collectibility of the receivable has been assessed and the amount has been deemed collectible.

#### Year ended December 31, 2010 compared to the year ended December 31, 2009

#### Factors Affecting Our Results of Operations

We believe that the following table reflects important measures for analyzing trends in our results of operations. The table reflects our ownership days, available days, operating days, fleet utilization, TCE rates and daily vessel operating expenses for the years ended December 31, 2010 and 2009 on a consolidated basis, which includes the operations of Baltic Trading.

Fleet average	4,852	4,796	56	1.2%

(1) We define ownership days as the aggregate number of days in a period during which each vessel in our fleet has been owned by us. Ownership days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses that we record during a period.

(2) We define available days as the number of our ownership days less the aggregate number of days that our vessels are off-hire due to scheduled repairs or repairs under guarantee, vessel upgrades or special surveys and the aggregate amount of time that we spend positioning our vessels. Companies in the shipping industry generally use available days to measure the number of days in a period during which vessels should be capable of generating revenues.

(3) We define operating days as the number of our available days in a period less the aggregate number of days that our vessels are off-hire due to unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels actually generate revenues.

(4) We calculate fleet utilization by dividing the number of our operating days during a period by the number of our available days during the period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the number of days that its vessels are off-hire for reasons other than scheduled repairs or repairs under guarantee, vessel upgrades, special surveys or vessel positioning.

(5) We define TCE rates as net voyage revenue (voyage revenues less voyage expenses) divided by the number of our available days during the period, which is consistent with industry standards. TCE rate is a common shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charterhire rates for vessels on voyage charters are generally not expressed in per-day amounts while charterhire rates for vessels on time charters generally are expressed in such amounts.

**For the years ended December 31,**  
**2010**                      **2009**

Voyage revenues (in thousands)	\$	447,438	\$	379,531
Voyage expenses (in thousands)		4,467		5,024
		442,971		374,507
Total available days		16,155.2		11,830.6
Total TCE rate	\$	27,419	\$	31,656

(6) We define daily vessel operating expenses to include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance (excluding drydocking), the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses. Daily vessel operating expenses are calculated by dividing vessel operating expenses by ownership days for the relevant period.

Net cash used in investing activities		(870,230)		(306,210)		(564,020)	184.2%
Net cash provided by financing activities		690,160		149,792		540,368	360.7%
EBITDA (1)	\$	330,711	\$	298,330	\$	32,381	10.9%

(1) EBITDA represents net income attributable to Genco Shipping & Trading plus net interest expense, taxes and depreciation and amortization. Refer to page 44 included in Item 6 where the use of EBITDA is discussed and for a table demonstrating our calculation of EBITDA that provides a reconciliation of EBITDA to net income attributable to Genco Shipping & Trading for each of the periods presented above.

## Results of Operations

### VOYAGE REVENUES-

Our revenues are driven primarily by the number of vessels in our fleet, the number of days during which our vessels operate and the amount of daily charterhire that our vessels earn, that, in turn, are affected by a number of factors, including:

- the duration of our charters;
- our decisions relating to vessel acquisitions and disposals;
- the amount of time that we spend positioning our vessels;

- the amount of time that our vessels spend in drydock undergoing repairs;
- maintenance and upgrade work;
- the age, condition and specifications of our vessels;

- levels of supply and demand in the drybulk shipping industry; and
- other factors affecting spot market charter rates for drybulk carriers.

For 2010, voyage revenues increased \$67.9 million, or 17.9%, as compared to 2009. The increase in revenues was primarily a result of the increase in the size of our fleet and revenues earned by Baltic Trading's vessels of \$32.6 million offset by lower charter rates achieved for some of our vessels.

The average TCE rate of our fleet decreased \$4,237 a day, or 13.4%, during 2010 as compared to 2009. The decrease in TCE rates was primarily due to lower rates achieved in 2010 versus the prior year as well as the operation of 21 smaller class vessels that we acquired throughout 2010, including vessels acquired by Baltic Trading.

During 2010, the Baltic Dry Index (a drybulk index) went from a high on May 26, 2010 of 4,209 and fell to a low of 1,700 on July 15, 2010. At December 31, 2010, the index was 1,773. The index subsequently decreased to a low of 1,043 on February 4, 2011 and as of March 8, 2011 was trading at 1,424. Seasonal factors contributing to the most recent downturn in rates include severe floods and other weather related issues in Australia, making it hard for coal and iron ore miners to export cargo to Asia; order timing issues for iron ore cargoes related to the celebration of the Chinese New Year; and increased deliveries of newbuilding Capesize vessels during a time of seasonally reduced demand.

For 2010 and 2009, we had ownership days of 16,277.6 days and 11,948.9 days, respectively. The increase in ownership days is a result of the delivery of 15 vessels during the year ended December 31, 2010 as well as the ownership days for Baltic Trading's fleet of nine vessels. Our fleet utilization remained consistent during both periods at 99.1% during 2010 as compared to 99.0% during 2009.

Please see pages 8-12 for table that sets forth information about the current employment of the vessels currently in our fleet as of March 9, 2011.

#### SERVICE REVENUES-

Service revenues consist of revenues earned from providing technical services to MEP pursuant to the agency agreement between us and MEP. These services include oversight of crew management, insurance, drydocking, ship operations and financial statement preparation, but do not include chartering services. The services are provided for a fee of \$750 per ship per day. During the years ended December 31, 2010 and 2009, total service revenue was \$1,249 and \$0, respectively.

#### VOYAGE EXPENSES-

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Voyage expenses include port and canal charges, fuel (bunker) expenses and brokerage commissions payable to unaffiliated third parties. Port and canal charges and bunker expenses primarily increase in periods during which vessels are employed on voyage charters because these expenses are for the account of the vessel owner.

For the years ended 2010 and 2009, we did not incur port and canal charges or any significant expenses related to the consumption of bunkers as part of our vessels' overall expenses, because all of our vessels were employed under time charters or pool arrangements that required the charterer to bear all of those expenses.

For 2010 and 2009, voyage expenses were \$4.5 million and \$5.0 million, respectively, and consisted primarily of brokerage commissions paid to third parties.

### VESSEL OPERATING EXPENSES-

Vessel operating expenses increased by \$21.7 million, primarily due to the operation of a larger fleet. This was primarily a result of the operation of 15 vessels which were delivered during 2010. Additionally, the increase was due to the operation of nine Baltic Trading vessels which were delivered during 2010 which accounted for \$8.2

million of vessel operating expenses during 2010. Additionally, the increase was related to higher crew expenses as well as higher repair costs.

Average daily vessel operating expenses for our fleet increased by \$56 per day during 2010 as compared to 2009. The increase in 2010 was due to slightly higher crew costs on certain of our vessels. We believe daily vessel operating expenses are best measured for comparative purposes over a 12-month period in order to take into account all of the expenses that each vessel in our fleet will incur over a full year of operation.

Our vessel operating expenses, which generally represent fixed costs, will increase as a result of the expansion of our fleet. Other factors beyond our control, some of which may affect the shipping industry in general, including, for instance, developments relating to market prices for crewing, lubes, and insurance, may also cause these expenses to increase. Daily budgeted vessel operating expenses for 2011 decreased primarily due to lower anticipated repairs and maintenance charges as a result of a newer overall fleet during 2011.

Based on our management's estimates and budgets provided by our technical manager, we expect our vessels, including those of Baltic Trading, to have average daily vessel operating expenses during 2011 of:

Vessel Type	Average Daily Budgeted Amount
Capesize	\$ 6,000
Panamax	5,500
Supramax	5,000
Handymax	5,400
Handysize	4,600

Based on these average daily budgeted amounts by vessel type, we expect our fleet to have average daily vessel operating expenses of \$5,200 during 2011

#### GENERAL, ADMINISTRATIVE AND MANAGEMENT FEES-

We incur general and administrative expenses, which relate to our onshore non-vessel-related activities. Our general and administrative expenses include our payroll expenses, including those relating to our executive officers, rent, legal, auditing and other professional expenses. Additionally, we incur management fees to third-party technical management companies for the day-to-day management of our vessels, including performing routine maintenance, attending to vessel operations and arranging for crews and supplies.

General, administrative and management fees increased by \$10.5 million, or 56.7%, during 2010 as compared to 2009. This increase was primarily a result of the operation of Baltic Trading, which resulted in \$5.0 million of additional expenses, as well as the addition of personnel as the fleet expanded. Additionally, management fees increased overall due to a combination of an overall larger fleet as well as an increase in management fees on a per vessel basis. During 2011, the management fees per vessel are expected to be the same as during 2010, or approximately \$0.13 million per vessel.

DEPRECIATION AND AMORTIZATION-

We depreciate the cost of our vessels on a straight-line basis over the expected useful life of each vessel. Depreciation is based on the cost of the vessel less its estimated residual value. We estimate the useful life of our vessels to be 25 years. Furthermore, we estimate the residual values of our vessels to be based upon \$175 per lightweight ton, which we believe to be the anticipated scrap value of our vessels.

Depreciation and amortization charges increased by \$27.5 million during 2010 as compared to 2009 due to the operation of a larger fleet, including the 15 vessels delivered during the year ended December 31, 2010 as well as the nine Baltic Trading vessels delivered during the year ended December 31, 2010, which accounted for \$7.3 million of the increase.

OTHER OPERATING INCOME-

For the years ended December 31, 2010 and 2009, other operating income was \$0.8 million and \$0, respectively. The \$0.8 million of other operating income consists primarily of \$0.6 million of income related to the 10% cash settlement due on December 30, 2010 from Samsun pursuant the rehabilitation process agreed to by the South Korean courts. Refer above to page 46 for further information regarding these bankruptcy proceedings. Additionally, other operating income consists of \$0.2 million which represents the payment received from the seller of the Baltic Cougar as a result of the late delivery of the vessel to Baltic Trading.

OTHER (EXPENSE) INCOME-

NET INTEREST EXPENSE-

Net interest expense increased by \$10.4 million during 2010 as compared with 2009. Net interest expense during the year ended December 31, 2010 consisted of interest expense under our 2007 Credit Facility, \$100 Million Term Loan Facility, \$253 Million Term Loan Facility and the 2010 Baltic Trading Credit Facility as well as interest expense related to the 2010 Notes. Additionally, interest income, unused commitment fees associated with the credit facilities noted above as well as the amortization of deferred financing costs related to the credit facilities noted above are included in net interest expense during 2010. The increase in net interest expense for the year ended December 31, 2010 versus the year ended December 31, 2009 was primarily a result of borrowing under the additional credit facilities entered into by the Company during 2010 due to the acquisition of additional vessels during 2010, as well as net interest expense incurred by Baltic Trading, which amounted to \$1.9 million during 2010. Net interest expense during the year ended December 31, 2009 consisted primarily of interest expense under our 2007 Credit Facility as well as unused commitment fees and deferred financing costs related to the 2007 Credit Facility.

INCOME TAX EXPENSE-

For the year ended December 31, 2010, income tax expense was \$1.8 million as compared to \$0 during the year ended December 31, 2009. This income tax expense primarily includes federal, state and local income taxes on net income earned by Genco Management (USA) Limited ( Genco (USA) ), one of our wholly owned subsidiaries. Pursuant to certain agreements, we technically and commercially manage vessels for Baltic Trading as well as provide technical management of vessels for MEP in exchange for specified fees for these services provided. These services are provided by Genco (USA), which has elected to be taxed as a corporation for United States federal income tax purposes. As such, Genco (USA) is subject to United States federal income tax on its worldwide net income, including the net income derived from providing these services. Refer to the Income taxes section of Note 2 Summary of Significant Accounting Policies included in our consolidated financial statements for further information.

NET INCOME ATTRIBUTABLE TO NONCONTROLLING INTEREST-

For the year ended December 31, 2010, net income attributable to noncontrolling interest was \$6.2 million as compared to \$0 during the year ended December 31, 2009. This amount represents the net income attributable to the noncontrolling interest of Baltic Trading, which completed its IPO on March 15, 2010.

**Year ended December 31, 2009 compared to the year ended December 31, 2008**

**Factors Affecting Our Results of Operations**

We believe that the following table reflects important measures for analyzing trends in our results of operations. The table reflects our ownership days, available days, operating days, fleet utilization, TCE rates and daily vessel operating expenses for the years ended December 31, 2009 and 2008.

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Fleet average		4,796		4,400	396 9.0%

(1) We define ownership days as the aggregate number of days in a period during which each vessel in our fleet has been owned by us. Ownership days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses that we record during a period.

(2) We define available days as the number of our ownership days less the aggregate number of days that our vessels are off-hire due to scheduled repairs or repairs under guarantee, vessel upgrades or special surveys and the aggregate amount of time that we spend positioning our vessels. Companies in the shipping industry generally use available days to measure the number of days in a period during which vessels should be capable of generating revenues.

(3) We define operating days as the number of our available days in a period less the aggregate number of days that our vessels are off-hire due to unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels actually generate revenues.

(4) We calculate fleet utilization by dividing the number of our operating days during a period by the number of our available days during the period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the number of days that its vessels are off-hire for reasons other than scheduled repairs or repairs under guarantee, vessel upgrades, special surveys or vessel positioning.

(5) We define TCE rates as net voyage revenue (voyage revenues less voyage expenses) divided by the number of our available days during the period, which is consistent with industry standards. TCE rate is a common shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charterhire rates for vessels on voyage charters are generally not expressed in per-day amounts while charterhire rates for vessels on time charters generally are expressed in such amounts.

	For the years ended December 31,	
	2009	2008
Voyage revenues (in thousands)	\$ 379,531	\$ 405,370
Voyage expenses (in thousands)	5,024	5,116
	374,507	400,254
Total available days	11,830.6	10,581.9
Total TCE rate	\$ 31,656	\$ 37,824

(6) We define daily vessel operating expenses to include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance (excluding drydocking), the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses. Daily vessel

operating expenses are calculated by dividing vessel operating expenses by ownership days for the relevant period.

**Operating Data**

The following discusses our operating income and net income for the years ended December 31, 2009 and 2008.

	<b>For the years ended December 31,</b>		<b>Increase</b>	<b>% Change</b>

(1) EBITDA represents net income attributable to Genco Shipping & Trading plus net interest expense, taxes and depreciation and amortization. Refer to page 44 included in Item 6 where the use of EBITDA is discussed and for a table demonstrating our calculation of EBITDA that provides a reconciliation of EBITDA to net income attributable to Genco Shipping & Trading for each of the periods presented above.

### Results of Operations

#### REVENUES-

For 2009, revenues decreased 6.4% to \$379.5 million versus \$405.4 million for 2008. Revenues in both periods consisted of charter payments for our vessels, including revenue realized from pools. The decrease in revenues during the twelve months ended December 31, 2009 was due to lower charter rates achieved for some of our vessels, reflecting the generally lower rates for charters entered into in current market conditions, offset by additional revenue from the operation of a larger fleet.

The average TCE rate of our fleet decreased to \$31,656 a day for 2009 from \$37,824 a day for 2008. The decrease in TCE rates was primarily due to lower time charter rates achieved in 2009 versus the prior year for six of our Panamax vessels, three of our Supramax vessels, two of our Handymax vessels, as well as six of our Handysize vessels in our current fleet. Additionally, there were lower revenues for two of our Capesize vessels due to profit sharing agreements. This was offset by higher revenues on two of our Panamax vessels and four of our Handymax vessels. Furthermore, the overall decrease in the average TCE rate of our fleet during 2009 was offset by revenue earned due to the operation of three of the Capesize vessels acquired as part of the Metrostar acquisition, the Genco Hadrian, Genco Commodus and Genco Maximus.

Charterhire rates are volatile, as evidenced by seasonally high rates during May 2009, followed by weaker rates for the following six months followed by a peak during December 2009.

For 2009 and 2008, we had ownership days of 11,948.9 days and 10,710.8 days, respectively. Our fleet utilization for 2009 and 2008 was consistent for both periods at approximately 99.0%.

#### VOYAGE EXPENSES-

Voyage expenses include port and canal charges, fuel (bunker) expenses and brokerage commissions payable to unaffiliated third parties. Port and canal charges and bunker expenses primarily increase in periods during which vessels are employed on voyage charters because these expenses are for the account of the vessel owner.

For the years ended 2009 and 2008, we did not incur port and canal charges or any significant expenses related to the consumption of bunkers as part of our vessels' overall expenses, because all of our vessels were employed under time charters or pool arrangements that required the charterer to bear all of those expenses.

For 2009 and 2008, voyage expenses were \$5.0 million and \$5.1 million, respectively, and consisted primarily of brokerage commissions paid to third parties.

#### VESSEL OPERATING EXPENSES-

Vessel operating expenses increased to \$57.3 million from \$47.1 million for 2009 and 2008, respectively. This was primarily due to the operation of a larger fleet, higher insurance expenses and other expenses related to spares as well as the operation of more Capesize vessels during 2009.

For 2009 and 2008, the average daily vessel operating expenses for our fleet were \$4,796 and \$4,400 per day, respectively. The increase in 2009 was due mostly to increased costs for insurance and spare parts, as well as the operation of larger fleet consisting of additional Capesize vessels for 2009 as compared to 2008. We believe daily vessel operating expenses are best measured for comparative purposes over a 12-month period in order to take into account all of the expenses that each vessel in our fleet will incur over a full year of operation.

#### GENERAL, ADMINISTRATIVE AND MANAGEMENT FEES-

For 2009 and 2008, general and administrative expenses were \$15.0 million and \$17.0 million, respectively. The decrease in general and administrative expenses was due to a decrease in costs associated with employee compensation and other administrative costs. We incur management fees to third-party technical management companies for the day-to-day management of our vessels, including performing routine maintenance, attending to vessel operations and arranging for crews and supplies. For 2009 and 2008, management fees were \$3.5 million and \$2.8 million, respectively. The increase was primarily due to the operation of a larger fleet as well as an increase in monthly management fees.

#### DEPRECIATION AND AMORTIZATION-

For years ended December 31, 2009 and 2008, depreciation and amortization charges were \$88.2 million and \$71.4 million, respectively, resulting in an increase of \$16.8 million. The increase primarily was due to the operation of a larger fleet.

#### LOSS ON FORFEITURE OF VESSEL DEPOSITS-

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

For years ended December 31, 2009 and 2008, the loss on forfeiture of vessel deposits was \$0 million and \$53.8 million, respectively. The loss recorded during 2008 was attributable to our cancellation of the acquisition of six vessels during the fourth quarter of 2008. The Company decided to cancel this acquisition in order to strengthen its liquidity and in light of market conditions at that time.

### GAIN ON SALE OF VESSELS-

For years ended December 31, 2009 and 2008, the gain on the sale of vessels was \$0 and \$26.2 million, respectively. The gain in 2008 was attributable to the sale of the Genco Trader.

### OTHER (EXPENSE) INCOME-

### IMPAIRMENT OF INVESTMENT-

For 2009 and 2008, impairment of investment was \$0 and \$103.9 million, respectively. During 2008, the

impairment of investment balance consists of the write-down of the Company's investment in Jinhui to its estimated fair value as the Company deemed the investment to be other-than-temporarily impaired as of December 31, 2008. The impairment loss was reclassified from equity and recorded in the Consolidated Statement of Operations. The Company investment was considered to be other-than-temporarily impaired as of December 31, 2008 due to the severity of the decline in its market value versus our cost basis. During the year ended December 31, 2009, no impairment charges were recorded as the market value exceeded our new cost basis.

#### NET INTEREST EXPENSE-

For 2009 and 2008, net interest expense was \$61.6 million and \$50.8 million, respectively. Net interest expense consisted primarily of interest expense under our 2007 Credit Facility during both periods, as well as interest expense under our 2008 Term Facility during 2008. Due to the 2009 Amendment, the Company recorded a non-cash charge of \$1.9 million associated with capitalized costs related to deferred financing costs on the facility and prior amendments during the fourth quarter of 2008. Additionally, during the fourth quarter of 2008, the Company cancelled the 2008 Term Facility resulting in a charge of \$2.2 million associated with unamortized deferred financing costs. Interest income as well as amortization of deferred financing costs related to our respective credit facilities is included in both periods. The increase in net interest expense for 2009 versus 2008 was mostly a result of higher outstanding debt due to the acquisition of additional vessels during the second quarter through the fourth quarter of 2008 and the third quarter through the fourth quarter of 2009. Additionally, the increase in net interest expense was attributable to the increase in the Applicable Margin as a result of the 2009 Amendment to the 2007 Credit Facility.

#### LIQUIDITY AND CAPITAL RESOURCES

To date, we have financed our capital requirements with cash flow from operations, equity offerings, convertible notes and bank debt. We have used our funds primarily to fund vessel acquisitions, regulatory compliance expenditures, the repayment of bank debt and the associated interest expense and the payment of dividends. We will require capital to fund ongoing operations, acquisitions and debt service. Please refer to the discussion under the subheading "Dividend Policy" below for additional information regarding dividends. We also may consider debt and additional equity financing alternatives from time to time. However, if market conditions become negative, we may be unable to raise additional equity capital or debt financing on acceptable terms or at all.

Currently, our wholly-owned subsidiary Genco Investments LLC owns 5,699,088 shares of Baltic Trading's Class B Stock, which represents a 25.24% ownership interest in Baltic Trading and 83.51% of the aggregate voting power of Baltic Trading's outstanding shares of voting stock. On April 16, 2010, Baltic Trading entered into a \$100 million senior secured revolving credit facility with Nordea Bank Finland plc, acting through its New York branch (the "2010 Baltic Trading Credit Facility"). The 2010 Baltic Trading Facility was subsequently amended effective November 30, 2010 which increased the borrowing capacity from \$100 million to \$150 million. The amended 2010 Baltic Trading Credit Facility matures on November 30, 2016. See Note 9 "Long-Term Debt - 2010 Baltic Trading Credit Facility" in our consolidated financial statements for a full description of this facility as well as description of the amendment entered into effective November 30, 2010. To remain in compliance with a net worth covenant in the 2010 Baltic Trading Credit Facility, Baltic Trading would need to maintain a net worth of \$232.8 million after the payment of any dividends. We do not believe these restrictions have a significant impact on our liquidity.

We have entered into two secured term loan facilities during August 2010 in order to fund future vessel acquisitions. On August 12, 2010, we entered into a \$100 million secured term loan facility to fund or refund to us a portion of the purchase price of the acquisition of five vessels from Metrostar. Additionally, on August 20, 2010, we entered into a \$253 million senior secured term loan facility to fund a portion of the purchase price of the acquisition of 13 vessels from Bourbon. Refer to Note 9 "Long-Term Debt" of our consolidated financial statements for further information regarding these loan facilities.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

On July 21, 2010, in two concurrent public offerings, we sold \$125 million aggregate principal amount of the 2010 Notes and 3,593,750 shares of common stock at a purchase price of \$15.28 per share, which reflected a price to the public of \$16.00 per share less underwriting discounts and commissions of \$0.72 per share. Such amounts reflected the exercise in full of the underwriters' overallotment options.

We anticipate that internally generated cash flow in addition to our loan facilities and offering proceeds will be sufficient to fund the operations of our fleet, including our working capital and capital expenditures requirements, for the next twelve months. Pursuant to the current terms of the 2007 Credit Facility, the existing collateral maintenance financial covenant is waived, which required us to maintain pledged vessels with a value equal to at least 130% of our current borrowings, and accelerated the reductions of the total facility which began on March 31, 2009. Please refer to Note 9 Long-Term Debt of our consolidated financial statements for further details. The collateral maintenance covenant is waived until we can represent that we would be in compliance. Each of the Genco credit facilities also includes a maximum leverage ratio limiting the ratio of our net debt to EBITDA to a maximum of 5.5. We were in compliance with this covenant at December 31, 2010 and would have remained in compliance at that date with a 10% reduction in our EBITDA. However, prolonged weakness in rates or a significant further drop in rates could result in a failure to meet this ratio in future. In this event, we would consider actions such as raising additional equity capital, selling assets or seeking modifications or waivers of our bank arrangements in order to remain in compliance, although we cannot be certain we would be able to accomplish these actions.

### **Dividend Policy**

Historically, our dividend policy, which commenced in November 2005, has been to declare quarterly distributions to shareholders by each February, May, August and November, substantially equal to our available cash from operations during the previous quarter, less cash expenses for that quarter (principally vessel operating expenses and debt service) and any reserves our Board of Directors determines we should maintain. These reserves covered, among other things, drydocking, repairs, claims, liabilities and other obligations, interest expense and debt amortization, acquisitions of additional assets and working capital. In the future, we may incur other expenses or liabilities that would reduce or eliminate the cash available for distribution as dividends. Under the current terms of the 2007 Credit Facility, we are required to suspend the payment of cash dividends until we can represent that we are in a position to satisfy the collateral maintenance covenant. Refer to the 2007 Credit Facility section below for further information regarding the 2009 Amendment. As such, a dividend has not been declared during 2009 and 2010.

As a result of the 2009 Amendment to the 2007 Credit Facility, we have suspended the payment of cash dividends effective for the fourth quarter of 2008, and payment of cash dividends will remain suspended until we can meet the collateral maintenance covenant contained in the 2007 Credit Facility.

The declaration and payment of any dividend is subject to the discretion of our Board of Directors and our compliance with the collateral maintenance covenant, which is currently waived. The timing and amount of dividend payments will depend on our earnings, financial condition, cash requirements and availability, fleet renewal and expansion, restrictions in our loan agreements, the provisions of Marshall Islands law affecting the payment of distributions to shareholders and other factors. Our Board of Directors may review and amend our dividend policy from time to time in light of our plans for future growth and other factors.

We believe that, under current law, our dividend payments from earnings and profits will constitute qualified dividend income and, as such, will generally be subject to a 15% U.S. federal income tax rate with respect to non-corporate U.S. shareholders that meet certain holding period and other requirements (through 2010). Distributions in excess of our earnings and profits will be treated first as a non-taxable return of capital to the extent of a U.S. shareholder's tax basis in its common stock on a dollar-for-dollar basis and, thereafter, as capital gain.

### **Share Repurchase Program**

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

On February 13, 2008, our Board of Directors approved our share repurchase program for up to a total of \$50.0 million of our common stock. Share repurchases will be made from time to time for cash in open market transactions at prevailing market prices or in privately negotiated transactions. The timing and amount of purchases under the program were determined by management based upon market conditions and other factors. Purchases may be made pursuant to a program adopted under Rule 10b5-1 under the Securities Exchange Act. The program does not require us to purchase any specific number or amount of shares and may be suspended or reinstated at any time in our discretion and without notice. Repurchases under the program are subject to restrictions under the 2007 Credit Facility. The 2007 Credit Facility was amended as of February 13, 2008 to permit the share repurchase program and provide that the dollar amount of shares repurchased is counted toward the maximum dollar amount of dividends that

may be paid in any fiscal quarter. Subsequently, on January 26, 2009, we entered into the 2009 Amendment, which amended the 2007 Credit Facility to require us to suspend all share repurchases until we can represent that we are in a position to again satisfy the collateral maintenance covenant. Refer to the 2007 Credit Facility section below for further information regarding the 2009 Amendment. Pursuant to the 2009 Amendment, there were no share repurchases made during the twelve months ended December 31, 2010 and 2009.

Since the inception of the share repurchase program through December 31, 2010, we have repurchased and retired 278,300 shares of our common stock for \$11.5 million (average per share purchase price of \$41.32) using funding from cash generated from operations pursuant to its share repurchase program. An additional 3,130 shares of common stock were repurchased from employees for \$0.04 million during 2008 pursuant to our Equity Incentive Plan rather than the share repurchase program. No share repurchases were made during the years ended December 31, 2010 and 2009, and the maximum dollar amount that may yet be purchased under our share repurchase program is \$38,499,962.

### **Cash Flow**

Net cash provided by operating activities for the twelve months ended December 31, 2010 and 2009 was \$262.7 million and \$219.7 million, respectively. The increase in cash provided by operating activities was primarily due to a similar amount of net income for each period before considering significantly higher depreciation and amortization due to the operation of a larger fleet, as well as the impact of the amortization of time charters acquired.

Net cash used in investing activities for the twelve months ended December 31, 2010 and 2009 was \$870.2 million and \$306.2 million, respectively. The increase was primarily due to cash used for the purchase of Baltic Trading's nine vessels, the delivery of 14 vessels from Bourbon and Metrostar during the third quarter of 2010 and the deposits made for the acquisition of vessels during the second quarter of 2010. For the twelve months ended December 31, 2010, cash used in investing activities primarily related to the purchase of vessels in the amount of \$971.2 million and the deposit on vessels yet to be delivered in the amount of \$13.7 million. This was offset by proceeds of \$106.6 million related to the back-to-back sale of three vessels to MEP. For the twelve months ended December 31, 2009, cash used in investing activities primarily related to the purchase of vessels in the amount of \$287.6 million, and changes in deposits of restricted cash in the amount of \$17.5 million.

Net cash provided by financing activities was \$690.2 million during the twelve months ended December 31, 2010 as compared to \$149.8 million during the twelve months ended December 31, 2009. The \$540.4 million increase in net cash provided by financing activities was primarily due to the proceeds from the issuance of common stock in the amount of \$214.5 million from the initial public offering for Baltic Trading that was completed on March 15, 2010, \$231.5 million of proceeds from the \$253 Million Term Loan Facility related to the Bourbon vessels acquired, \$40.0 million of proceeds from the \$100 Million Term Loan Facility related to the Metrostar vessels acquired, \$125.0 million of proceeds from the issuance of the 2010 Notes and \$55.2 million of proceeds from the issuance of common stock, and \$101.3 million of proceeds from the 2010 Baltic Trading Credit Facility. Cash provided by financing activities was also offset by the \$50.0 million repayment of debt under the 2007 Credit Facility, \$4.7 million repayment of debt under the \$253 Million Term Loan Facility, \$11.2 million for payments of deferred financing costs and the \$5.4 million dividend payment of our subsidiary, Baltic Trading, to its outside shareholders. For the same period last year, cash provided by financing activities consisted of \$166.2 million of proceeds from the 2007 Credit Facility slightly offset by repayments on the 2007 Credit Facility of \$12.5 million and \$3.9 million of deferred financing costs.

### **Credit Facilities**

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Refer to Note 9 Long-Term Debt of our consolidated financial statements for a summary of our outstanding credit facilities and a description of the underlying financial and non-financial covenants.

As of December 31, 2010, we believe we are in compliance with all of the financial covenants under our 2007 Credit Facility, as amended; \$100 Million Term Loan Facility, \$253 Million Term Loan Facility and the 2010

Baltic Trading Credit Facility.

### **Convertible Notes Payable**

Refer to Note 10 Convertible Senior Notes of our consolidated financial statements for a summary of the convertible notes payable.

### **Interest Rate Swap Agreements, Forward Freight Agreements and Currency Swap Agreements**

At December 31, 2010, we have ten interest rate swap agreements with DnB NOR Bank to manage interest costs and the risk associated with changing interest rates. The total notional principal amount of the swaps is \$756.2 million and the swaps have specified rates and durations.

Refer to the table in Note 9 Long-Term Debt of our consolidated financial statements, which summarizes the interest rate swaps in place as of December 31, 2010 and 2009.

We have considered the creditworthiness of both ourselves and the counterparty in determining the fair value of the interest rate derivatives, and such consideration resulted in an immaterial adjustment to the fair value of derivatives on the balance sheet. Valuations prior to any adjustments for credit risk are validated by comparison with counterparty valuations. Amounts are not and should not be identical due to the different modeling assumptions. Any material differences are investigated.

We had entered into a number of short-term forward currency contracts to protect ourselves from the risk associated with the fluctuation in the exchange rate associated with the cost basis of the Jinhui shares as described in Note 6 Investments of our consolidated financial statements. As forward contracts expired, we continued to enter into new forward currency contracts for the cost basis of the investment, excluding commissions. However, hedge accounting is limited to the lower of the cost basis or the market value at time of designation. We elected to discontinue the forward currency contracts as of October 10, 2008 due to the declining underlying market value of Jinhui.

As part of our business strategy, we may enter into arrangements commonly known as forward freight agreements, or FFAs, to hedge and manage market risks relating to the deployment of our existing fleet of vessels. These arrangements may include future contracts, or commitments to perform in the future a shipping service between ship owners, charters and traders. Generally, these arrangements would bind us and each counterparty in the arrangement to buy or sell a specified tonnage freighting commitment forward at an agreed time and price and for a particular route. Although FFAs can be entered into for a variety of purposes, including for hedging, as an option, for trading or for arbitrage, if we decided to enter into FFAs, our objective would be to hedge and manage market risks as part of our commercial management. It is not currently our intention to enter into FFAs to generate a stream of income independent of the revenues we derive from the operation of our fleet of vessels. If we determine to enter into FFAs, we may reduce our exposure to any declines in our results from operations due to weak market conditions or downturns, but may also limit our ability to benefit economically during periods of strong demand in the market. We have not entered into any FFAs as of December 31, 2010.

### **Interest Rates**

The effective interest rate associated with the interest expense for the Company's various debt facilities (2007 Credit Facility, \$100 Million Term Loan Facility, \$253 Million Term Loan Facility and the 2010 Baltic Trading Credit Facility), including the rate differential between the pay fixed receive variable rate on the interest rate swap agreements that were in effect, combined, and the cost associated with unused commitment fees was 4.64% during 2010. The effective interest rate associated with the interest expense for the 2007 Credit Facility, as amended, including the rate differential between the pay fixed receive variable rate on the swaps that were in effect, combined, including the cost associated with unused commitment fees with these facilities for 2009 was 5.12%. The interest rate on the debt, excluding impact of swaps and the unused commitment fees, ranged from 2.25% to 3.60% and from 1.23% to 5.56% for 2010 and 2009, respectively. The effective interest rate associated with the liability component of the 2010 Notes was 9.9%.

## Contractual Obligations

The following table sets forth our contractual obligations and their maturity dates as of December 31, 2010. The table incorporates our agreement with Bourbon to acquire one remaining Supramax vessel for \$32.5 million as well as our agreement with Metrostar to acquire three remaining Handysize vessels for an aggregate remaining purchase price of \$89.8 million. The remaining purchase price of the remaining Supramax vessel also includes the 1% fee payable to the financial advisor that helped facilitate its acquisition and is reflected in the table based on the vessel's estimated delivery date. Additionally, the table incorporates the employment agreement entered into in September 2007 with our Chief Financial Officer, John Wobensmith. The interest and borrowing fees reflect the 2007 Credit Facility, the 2010 Baltic Trading Credit Facility, as amended, the \$100 Million Term Facility, the \$253 Million Term Facility and the 2010 Notes utilizing the coupon rate of 5% which were issued on July 27, 2010 and the interest rate swap agreements as discussed above under Interest Rate Swap Agreements, Forward Freight Agreements and Currency Swap Agreements.

	Total	Within one Year	One to Three Years	Three to Five Years	More than Five Years
(U.S. dollars in thousands)					
Credit Agreements	\$ 1,643,939	\$ 71,841	\$ 345,352	\$ 563,481	\$ 663,265
2010 Notes	125,000			125,000	
Remainder of purchase price of vessels (1)	122,262	122,262			
Interest and borrowing fees	276,054	77,892	110,999	69,095	18,068
Executive employment agreement	337	337			
Office lease	5,169	518	1,036	1,047	2,568
Totals	\$ 2,172,761	\$ 272,850	\$ 457,387	\$ 758,623	\$ 683,901

(1) The timing of this obligation is based on the estimated delivery dates for the anticipated delivery of vessels as provided by the seller of the respective vessels.

Interest expense has been estimated using the fixed hedge rate for the effective period and notional amount of the debt which is effectively hedged and 0.3125% for the portion of the debt that has no designated swap against it, plus the applicable bank margin of 2.00% for the 2007 Credit Facility and 3.00% for the \$100 Million Term Loan Facility, \$253 Million Term Loan Facility and the amended 2010 Baltic Trading Credit Facility. We are obligated to pay certain commitment fees in connection with all of our credit facilities, which have been reflected within interest and borrowing fees.

## Capital Expenditures

We make capital expenditures from time to time in connection with our vessel acquisitions. Excluding Baltic Trading's vessels, our fleet currently consists of nine Capesize drybulk carriers, eight Panamax drybulk carriers, 16 Supramax drybulk carriers, six Handymax drybulk carriers and ten Handysize drybulk carriers. Baltic Trading's fleet currently consists of two Capesize drybulk carriers, four Supramax drybulk carriers and three Handysize drybulk carriers.

In addition to acquisitions that we may undertake in future periods, we will incur additional capital expenditures due to special surveys and drydockings. We estimate our drydocking costs and scheduled off-hire days for our fleet through 2012 to be:

<b>Year</b>	<b>Estimated Drydocking Cost (U.S. dollars in millions)</b>	<b>Estimated Off-hire Days</b>
2011	\$ 7.8	240
2012	\$ 10.4	340

The costs reflected are estimates based on drydocking our vessels in China. We estimate that each drydock will result in 20 days of off-hire. Actual costs will vary based on various factors, including where the drydockings are actually performed. We expect to fund these costs with cash from operations.

During 2010, we incurred a total of \$3.7 million of drydocking costs.

During 2009, we incurred a total of \$4.6 million of drydocking costs.

We estimate that 12 of our vessels will be drydocked during 2011 and an additional 17 vessels in 2012.

#### **Off-Balance Sheet Arrangements**

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

#### **Inflation**

Inflation has only a moderate effect on our expenses given current economic conditions. In the event that significant global inflationary pressures appear, these pressures would increase our operating, voyage, general and administrative, and financing costs.

#### **CRITICAL ACCOUNTING POLICIES**

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of those financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosure of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions and conditions.

Critical accounting policies are those that reflect significant judgments of uncertainties and potentially result in materially different results under different assumptions and conditions. We have described below what we believe are our most critical accounting policies, because they generally involve a comparatively higher degree of judgment in their application. For an additional description of our significant accounting policies, see Note 2 to our consolidated financial statements included in this 10-K.

#### **Time Charters Acquired**

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

When a vessel is acquired with an existing time charter, we allocate the purchase price of the vessel and the time charter based on, among other things, vessel market valuations and the present value (using an interest rate which reflects the risks associated with the acquired charters) of the difference between (i) the contractual amounts to be paid pursuant to the charter terms and (ii) management's estimate of the fair market charter rate, measured over a period equal to the remaining term of the charter. The capitalized above-market (assets) and below-market (liabilities) charters are amortized as a reduction or increase, respectively, to voyage revenues over the remaining term of the charter.

During the year ended December 31, 2010, we acquired two Supramax vessels from Bourbon and two Handysize vessels from Metrostar had existing below market time charters at the time that we agreed to acquire these vessels. We recorded a liability for time charters acquired related to these five vessels in the amount of \$2.1 million based on the present value of the difference between the contractual amounts to be paid and our estimate of the fair market charter rate. In order to calculate the present value, we utilized a discount rate of 12%. If we utilized a discount rate of 9% as compared to 12%, it would result in an increase in the liability balance of approximately \$35,000. If we utilized a discount rate of 15% as compared to 12%, it would result in a decrease in the liability balance of approximately \$33,000.

### Performance Claims

Revenue is based on contracted charterparties, including spot-market related time charters which rates fluctuate based on changes in the spot market. However, there is always the possibility of dispute over terms and payment of hires and freights. In particular, disagreements may arise as to the responsibility of lost time and revenue due to us as a result. Additionally, there are certain performance parameters included in contracted charterparties which if not met, can result in customer claims. Accordingly, we periodically assess the recoverability of amounts outstanding and estimate a provision if there is a possibility of non-recoverability. At each balance sheet date, we provide a provision based on a review of all outstanding charter receivables and we also will accrue for any estimated customer claims primarily a result of time charter performance issues that have not yet been deducted by the charterer. We provide for reserves which offset the due from charterers balance if a disputed amount or performance claim has been deducted by the charterer. If a disputed amount or potential performance claim has not been deducted by the charterer, we record the estimated customer claims as deferred revenue. Providing for these reserves will be offset by a decrease in revenue. Although we believe its provisions to be reasonable at the time they are made, it is possible that an amount under dispute is not ultimately recovered and the estimated provision for doubtful accounts is inadequate.

### Vessels and Depreciation

We record the value of our vessels at their cost (which includes acquisition costs directly attributable to the vessel and expenditures made to prepare the vessel for its initial voyage) less accumulated depreciation. We depreciate our drybulk vessels on a straight-line basis over their estimated useful lives, estimated to be 25 years from the date of initial delivery from the shipyard. Depreciation is based on cost less the estimated residual scrap value. We estimate the residual values of our vessels to be \$175 per lightweight ton. An increase in the useful life of a drybulk vessel or in its residual value would have the effect of decreasing the annual depreciation charge and extending it into later periods. A decrease in the useful life of a drybulk vessel or in its residual value would have the effect of increasing the annual depreciation charge. However, when regulations place limitations over the ability of a vessel to trade on a worldwide basis, we will adjust the vessel's useful life to end at the date such regulations preclude such vessel's further commercial use.

The carrying value each of our vessels does not represent the fair market value of such vessel or the amount we could obtain if we were to sell any of our vessels, which could be more or less. Under U.S. GAAP, we would not record a loss if the fair market value of a vessel (excluding its charter) is below our carrying value unless and until we determine to sell that vessel or the vessel is impaired as discussed below under

Impairment of long-lived assets Excluding the three Bourbon vessels we resold immediately upon delivery to MEP at our cost, we have sold three of our vessels since our inception and realized a profit in each instance.

Pursuant to our bank credit facilities, we regularly submit to the lenders valuations of our vessels on an individual charter free basis in order to evidence our compliance with the collateral maintenance covenants under our bank credit facilities. Such a valuation is not necessarily the same as the amount any vessel may bring upon sale, which may be more or less, and should not be relied upon as such. We were in compliance with the collateral maintenance covenants under our \$100 Million Term Loan Facility and our \$253 Million Term Loan Facility, as well as the 2010 Baltic Trading Credit Facility, at December 31, 2010, and the collateral maintenance covenant under our 2007 Credit Facility was waived at December 31, 2010, as discussed above. In the chart below, we list each of our vessels, the year it was built, the year we acquired it, and its carrying value at December 31, 2010. We have indicated by an asterisk those vessels for which the vessel valuations for covenant compliance purposes under our bank credit facilities as of the most recent compliance testing date were lower than their carrying values at December 31, 2010. For the Genco Ocean and the Genco Bay, the compliance testing date was February 17, 2011, in accordance with the terms of the \$100 Million Term Loan Facility; for all other vessels, the compliance testing date was December 31, 2010, in accordance with the terms of the applicable credit facility. The amount by which the carrying value at December 31, 2010 of vessels marked with an asterisk exceeded the valuation of such vessels for covenant compliance purposes ranged, on an individual vessel basis, from \$0.2 million to \$62.9 million per vessel. However, neither such valuation nor the carrying value in the table below reflects the value of long-term time charters related to some of our vessels, which can be significant.

<b>Vessels</b>	<b>Year Built</b>	<b>Year Acquired</b>	<b>Carrying Value (U.S. Dollars in thousands)</b>

(1) On December 30, 2009, the Company took delivery of the Genco Claudius. However, the vessel has been designated by Lloyd's Register of Shipping as having been built in 2010.

Deferred drydocking costs

Our vessels are required to be drydocked approximately every 30 to 60 months for major repairs and maintenance that cannot be performed while the vessels are operating. We capitalize the costs associated with drydockings as they occur and amortize these costs on a straight-line basis over the period between drydockings. Deferred drydocking costs include actual costs incurred at the drydock yard; cost of travel, lodging and subsistence of our personnel sent to the drydocking site to supervise; and the cost of hiring a third party to oversee the drydocking. We believe that these criteria are consistent with U.S. GAAP guidelines and industry practice and that our policy of capitalization reflects the economics and market values of the vessels. Costs that are not related to drydocking are expensed as incurred. If the vessel is drydocked earlier than originally anticipated, any remaining deferred drydock costs that have not been amortized are expensed at the beginning of the next drydock.

Impairment of long-lived assets

We follow the Accounting Standards Codification ( ASC ) subtopic 360-10, Property, Plant and Equipment ( ASC 360-10 ) which requires impairment losses to be recorded on long-lived assets used in operations when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than their carrying amounts. If indicators of impairment are present, we perform an analysis of the anticipated undiscounted future net cash flows to be derived from the related long-lived assets.

The current economic and market conditions, including the significant disruptions in the global credit markets, are having broad effects on participants in a wide variety of industries. Since mid-August 2008, the charter rates in the dry bulk charter market have declined significantly, and drybulk vessel values have also declined both as a result of a slowdown in the availability of global credit and the significant deterioration in charter rates.

When indicators of impairment are present and our estimate of undiscounted future cash flows for any vessel is lower than the vessel's carrying value, the carrying value is written down, by recording a charge to operations, to the vessel's fair market value if the fair market value is lower than the vessel's carrying value. The Company noted that TCE revenues across its fleet were lower on average in 2010 compared with 2009. This was more of a function of vessels coming off charters that had been fixed in periods of higher TCE rates as opposed to lower market rates. The Company's management views the lower TCE rates in 2010 as part of a longer term economic cycle.

The Company concluded at December 31, 2010 that the future income streams expected to be earned by such vessels over their remaining operating lives on an undiscounted basis would be sufficient to recover their carrying values and that, accordingly, our vessels were not impaired under U.S. GAAP. Our estimated future undiscounted cash flows exceeded each of our vessels' carrying values by a considerable margin (44% - 304% of carrying value). Our vessels remain fully utilized and have a relatively long average remaining useful life of approximately 19.6 years in which to recover sufficient cash flows on an undiscounted basis to recover their carrying values as of December 31, 2010. Management will continue to monitor developments in charter rates in the markets in which it participates with respect to the expectation of future rates over an extended period of time that are utilized in the analyses.

In developing estimates of future undiscounted cash flows, we make assumptions and estimates about the vessels' future performance, with the significant assumptions being related to charter rates, fleet utilization, vessels' operating expenses, vessels' capital expenditures and drydocking requirements, vessels' residual value and the estimated remaining useful life of each vessel. The assumptions used to develop estimates of future undiscounted cash flows are based on historical trends.

The projected net operating cash flows are determined by considering the future charter revenues from existing time charters for the fixed fleet days and an estimated daily time charter equivalent for the unfixed days over the estimated remaining life of the vessel, assumed to be 25 years from the delivery of the vessel from the shipyard, reduced by brokerage commissions, expected outflows for vessels' maintenance and vessel operating expenses (including planned drydocking and special survey expenditures) and capital expenditures adjusted annually for inflation, assuming fleet utilization of 98%. The salvage value used in the impairment test is estimated to be \$175 per light weight ton, consistent with our vessels' depreciation policy discussed above.

Although we believe that the assumptions used to evaluate potential impairment are reasonable and appropriate, such assumptions are highly subjective. There can be no assurance as to how long charter rates and vessel values will remain at their currently low levels or whether they will improve by any significant degree. Charter rates may remain at depressed levels for some time, which could adversely affect our revenue and profitability, and future assessments of vessel impairment.

### Investments

We hold an investment in the capital stock of Jinhui Shipping and Transportation Limited ( Jinhui ). Jinhui is a drybulk shipping owner and operator focused on the Supramax segment of drybulk shipping. This investment is designated as available-for-sale and is reported at fair value, with unrealized gains and losses recorded in shareholders' equity as a component of AOCI. The Company classifies the investment as a current or noncurrent asset based on the Company's intent to hold the investment at each reporting date. Effective August 16, 2007, the Company elected hedge accounting for forward currency contracts in place associated with the cost basis of the Jinhui shares and therefore the unrealized currency gain or loss associated with Jinhui cost basis is reflected in the income statement as a component of other expense to offset the gain or loss associated with these forward currency contracts. On October 10, 2008, the Company elected to discontinue the purchase of forward currency contracts associated with Jinhui by entering into an offsetting trade that closed the previously opened currency contract, thereby eliminating the hedge on Jinhui. The cost of securities when sold is based on the specific identification method. Realized gains and losses on the sale of these securities will be reflected in the consolidated statement of operations in other expense. Additionally, the realized gain or loss on the forward currency contracts is reflected in the Consolidated Statement of Cash Flows as an investing activity and is reflected in the caption Payments on forward currency contracts, net.

Investments are reviewed quarterly to identify possible other-than-temporary impairment in accordance ASC Subtopic 320-10, Investments Debt and Equity Securities ( ASC 320-10 ). When evaluating the investments, we review factors such as the length of time and extent to which fair value has been below the cost basis, the financial condition of the issuer, the underlying net asset value of the issuer's assets and liabilities, and our ability and intent to hold the investment for a period of time which may be sufficient for anticipated recovery in market value. Should the decline in the value of any investment be deemed to be other-than-temporary, the investment basis would be written down to fair market value, and the write-down would be recorded to earnings as a loss. Investments that are not expected to be sold within the next year are classified as noncurrent.

During the fourth quarter of 2008, our investment in Jinhui was deemed to be other-than-temporarily impaired due to the severity of the decline in its market value versus our cost basis. We recorded a \$103.9 million impairment loss during 2008 which was reclassified from the statement of equity and recorded as a loss in the income statement. We will continue to evaluate the investment on a quarterly basis to determine the likelihood of any further significant adverse effects on the fair value and amount of any additional impairment. In the event we determine that the Jinhui investment is subject to any additional other-than-temporary impairment, the amount of the impairment would be reclassified from the statement of equity and recorded as a loss in the income statement for the amount of the impairment.

### Fair value of financial instruments

The estimated fair values of our financial instruments such as amounts due to / due from charterers, accounts payable and long-term debt approximate their individual carrying amounts as of December 31, 2010 and December 31, 2009 due to their short-term maturity or the variable-rate nature of the respective borrowings under the credit facilities.

The fair value of the interest rate swaps is the estimated amount we would receive to terminate these agreements at the reporting date, taking into account current interest rates and the creditworthiness of the counterparty for assets and creditworthiness of us for liabilities. See Note 13 - Fair Value of Financial Instruments in our consolidated financial statements for additional disclosure on the fair values of long term debt, derivative instruments, 2010 Notes and available-for-sale securities.

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

For the interest rate swaps that are not designated as an effective hedge, the change in the value and the rate differential to be paid or received is recognized as other expense and is listed as a component of other (expense) income.

## ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

### Interest rate risk

We are exposed to the impact of interest rate changes. Our objective is to manage the impact of interest rate changes on our earnings and cash flow in relation to our borrowings. We held ten interest rate swap agreements with DnB NOR Bank at December 31, 2010 and 2009 to manage future interest costs and the risk associated with changing interest rates. The total notional principal amount of the swaps is \$756.2 million, and the swaps have specified rates and durations. Refer to the table in Note 11 Interest Rate Swap Agreements of our consolidated financial statements which summarizes the interest rate swaps in place as of December 31, 2010 and 2009.

The swap agreements, with effective dates prior to December 31, 2010 synthetically convert variable rate debt to fixed rate debt at the fixed interest rate of swap plus the Applicable Margin as discussed in the 2007 Credit Facility section of Note 9 Long-Term Debt of our consolidated financial statements.

The total liability associated with the swaps at December 31, 2010 is \$43.3 million and \$44.1 million at December 31, 2009, and are presented as the fair value of derivatives on the balance sheet. The asset associated with the swaps at December 31, 2009 is \$2.1 million. There were no swaps in an asset position at December 31, 2010. As of December 31, 2010 and 2009, the Company has accumulated other comprehensive deficit of (\$43.2) million and (\$41.8) million, respectively, related to the effectively hedged portion of the swaps. Hedge ineffectiveness associated with the interest rate swaps resulted in other income (expense) of \$0.1 million and (\$0.3) million for 2010 and 2009, respectively. At December 31, 2010, (\$27.5) million of AOCI is expected to be reclassified into income over the next 12 months associated with interest rate derivatives.

We are subject to market risks relating to changes in LIBOR rates because we have significant amounts of floating rate debt outstanding. For the year ended December 31, 2010, we paid LIBOR plus 2.00% on the 2007 Credit Facility for the debt in excess of any designated swap s notional amount for such swap s effective period. Prior to January 26, 2009, the margin was only 0.85%. We also paid LIBOR plus 3.00% on the outstanding debt under the \$100 Million Term Loan Facility and \$253 Million Term Loan Facility. Additionally, Baltic Trading paid LIBOR plus 3.25% on outstanding debt under the 2010 Baltic Trading Credit Facility up until November 30, 2010 when the amendment to the 2010 Baltic Trading Credit Facility decreased the applicable margin from 3.25% to 3.00%. A 1% increase in LIBOR would result in an increase of \$6.6 million in interest expense for the year ended December 31, 2010, considering the increase would be only on the unhedged portion of the debt.

### Derivative financial instruments

As of December 31, 2010, we held ten interest rate swap agreements that we entered into with DnB NOR Bank to manage interest costs and the risk associated with changing interest rates. The total notional principal amount of the swaps is \$756.2 million, and the swaps have specified rates and durations. Refer to the table in Note 9 Long-Term Debt of our financial statements which summarized the interest rate swaps in place as of December 31, 2010 and December 31, 2009.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The differential to be paid or received for these swap agreements is recognized as an adjustment to interest expense as incurred. The interest rate differential pertaining to the interest rate swaps for the years ended December 31, 2010 and 2009 was \$30.2 million and \$28.6 million, respectively. The Company is currently utilizing cash flow hedge accounting for the swaps whereby the effective portion of the change in value of the swaps is reflected as a component of AOCI. The ineffective portion is recognized as other (expense) income, which is a component of other (expense) income. If for any period of time we did not designate the swaps for hedge accounting, the change in the value of the swap agreements prior to designation would be recognized as other (expense) income.

Amounts receivable or payable arising at the settlement of hedged interest rate swaps are deferred and amortized as an adjustment to interest expense over the period of interest rate exposure provided the designated liability continues to exist. Amounts receivable or payable arising at the settlement of unhedged interest rate swaps are reflected as other (expense) income and are listed as a component of other (expense) income.

Refer to the Interest rate risk section above for further information regarding the interest rate swap agreements.

In the past, we have entered into a number of short-term forward currency contracts to protect us from the risk associated with the fluctuation in the exchange rate associated with the cost basis of the Jinhui shares as described in Note 6 Investments of our consolidated financial statements. The use of short-term forward currency contracts was discontinued on October 10, 2008 due to the underlying value of Jinhui. For further information on these forward currency contracts, please see page 62 under the heading Interest Rate Swap Agreements, Forward Freight Agreements and Currency Swap Agreements .

### **Currency and exchange rate risk**

The international shipping industry's functional currency is the U.S. Dollar. Virtually all of our revenues and most of our operating costs are in U.S. Dollars. We incur certain operating expenses in currencies other than the U.S. Dollar, and the foreign exchange risk associated with these operating expenses is immaterial.

In the past, we have entered into a number of short-term forward currency contracts to protect us from the risk associated with the fluctuation in the exchange rate associated with the cost basis of the Jinhui shares as described in Note 6 - Investments of our consolidated financial statements. For further information on these forward currency contracts, please see page 62 under the heading Interest Rate Swap Agreements, Forward Freight Agreements and Currency Swap Agreements. The Company utilized hedge accounting on the cost basis of the Jinhui stock through October 10, 2008 when the use of the forward currency contract was discontinued due to the decline in the underlying value of Jinhui. As part of our business strategy, in the future, we may enter into short-term forward currency contracts to protect ourselves from the risk arising from the fluctuation in the exchange rate associated with the cost basis of Jinhui shares.

### Investments

The Company holds investments in Jinhui of \$54.7 million which are classified as available for sale ( AFS ) under Accounting Standards Codification 320-10, Investments Debt and Equity Securities ( ASC 320-10 ). The investment is classified as a current or noncurrent asset based on our intent to hold the investment at each reporting date. The investments that are classified as AFS are subject to risk of changes in market value, which if determined to be impaired (other than temporarily impaired), could result in realized impairment losses. The Company reviews the carrying value of such investments on a quarterly basis to determine if any valuation adjustments are appropriate under ASC 320-10. During 2008, we reviewed the investment in Jinhui for indicators of other-than-temporary impairment. This determination required significant judgment. In making this judgment, we evaluated, among other factors, the duration and extent to which the fair value of the investment is less than its cost; the general market conditions, including factors such as industry and sector performance, and our intent and ability to hold the investment. The Company's investment in Jinhui was deemed to be other-than-temporarily impaired at December 31, 2008 due to the severity of the decline in its market value versus our cost basis. During the quarter ended December 31, 2008, the Company recorded a \$103.9 million impairment loss which was reclassified from AOCI and recorded as a loss in the income statement for the quarter ended December 31, 2008. We will continue to evaluate the investment on a quarterly basis to determine the likelihood of any further significant adverse effects on the fair value and amount of any additional impairment. For the years ended December 31, 2010 and 2009, we have not deemed our investment to be impaired. In the event we determine that the Jinhui investment is subject to any additional impairment, the amount of the impairment would be reclassified from AOCI and recorded as a loss in the Consolidated Statement of Operations for the amount of the impairment.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Genco Shipping & Trading Limited

New York, New York

We have audited the accompanying consolidated balance sheets of Genco Shipping & Trading Limited and subsidiaries (the Company) as of December 31, 2010 and 2009, and the related consolidated statements of operations, equity, comprehensive income and cash flows for each of the three years in the period ended December 31, 2010. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards as established by the Auditing Standards Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Genco Shipping & Trading Limited and subsidiaries at December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2010, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2010, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 9, 2011 expressed an unqualified opinion on the Company's internal control over financial reporting.

**Genco Shipping & Trading Limited**

(U.S. Dollars in Thousands)

Notes to Consolidated Financial Statements for the Years Ended December 31, 2010, 2009 and 2008

**1 - GENERAL INFORMATION**

The accompanying consolidated financial statements include the accounts of Genco Shipping & Trading Limited ( GS&T ), its wholly owned subsidiaries, and its subsidiary, Baltic Trading Limited (collectively, the Company ). The Company is engaged in the ocean transportation of drybulk cargoes worldwide through the ownership and operation of drybulk carrier vessels. GS&T is incorporated under the laws of the Marshall Islands and as of December 31, 2010 is the sole owner of all of the outstanding shares of the following subsidiaries: Genco Ship Management LLC; Genco Investments LLC; Genco Management (USA) Limited; and the ship-owning subsidiaries as set forth below.

At December 31, 2010, 2009 and 2008, GS&T's fleet consisted of 49, 35 and 32 vessels, respectively.

Below is the list of GS&T's wholly owned ship-owning subsidiaries as of December 31, 2010:

Wholly Owned Subsidiaries	Vessels Acquired	Dwt	Date Delivered	Year Built
Genco Reliance Limited	Genco Reliance	29,952	12/6/04	1999

(1) On December 30, 2009, the Company took delivery of the Genco Claudius. However, the vessel has been designated by Lloyd's Register of Shipping as having been built in 2010.

(2) Dates for vessels being delivered in the future are estimates based on guidance received from the sellers and the respective shipyards.

(3) Built dates for vessels delivering in the future are estimates based on guidance received from the sellers and respective shipyards.

During October 2009, Baltic Trading Limited ( "Baltic Trading" ) filed a registration statement on Form S-1 with the SEC. Baltic Trading was incorporated in October 2009 in the Marshall Islands for the purpose of conducting a shipping business focused on the drybulk industry spot market. Baltic Trading was a wholly-owned indirect subsidiary of GS&T until Baltic Trading completed its initial public offering, or IPO, on March 15, 2010. As of December 31, 2010, GS&T's wholly-owned subsidiary Genco Investments LLC owned 5,699,088 shares of Baltic Trading's Class B Stock, which represented a 25.24% ownership interest in Baltic Trading and 83.51% of the aggregate voting power of Baltic Trading's outstanding shares of voting stock. Additionally, pursuant to the subscription agreement between Genco Investments LLC and Baltic Trading, for so long as GS&T directly or indirectly holds at least 10% of the aggregate number of outstanding shares of Baltic Trading's common stock and Class B stock, Genco Investments LLC will be entitled to receive an additional number of shares of Baltic Trading's Class B stock equal to 2% of the number of common shares issued in the future, other than shares issued under Baltic Trading's 2010 Equity Incentive Plan.

Below is the list of Baltic Trading's wholly owned/ship-owning subsidiaries as of December 31, 2010:

Baltic Trading's Wholly Owned Subsidiaries	Vessel	Dwt	Date Delivered	Year Built
Baltic Leopard Limited	Baltic Leopard	53,447	4/8/10	2009
Baltic Panther Limited	Baltic Panther	53,351	4/29/10	2009

Baltic Breeze Limited	Baltic Breeze	34,386	10/12/10	2010

The Company provides technical services for drybulk vessels purchased by Maritime Equity Partners ( MEP ), which is managed by a company owned by Peter C. Georgiopoulos, Chairman of the Board of Directors. These services include oversight of crew management, insurance, drydocking, ship operations and financial statement preparation, but do not include chartering services. The services are provided for a fee of \$750 per ship per day plus reimbursement of out-of-pocket costs and will be provided for an initial term of one year. MEP has the right to cancel provision of services on 60 days notice with payment of a one-year termination fee upon a change in control of the Company. The Company may terminate provision of the services at any time on 60 days notice. Peter C. Georgiopoulos is a minority investor, and affiliates of Oaktree Capital Management, L.P., of which Stephen A. Kaplan, a director of the Company, is a principal, are majority investors in MEP.

On July 27, 2010, the Company closed on an equity offering of 3,593,750 shares of common stock (with

the exercise of the underwriters' over-allotment option) at an offering price of \$16.00 per share. The Company received net proceeds of \$54,882 after deducting underwriters' fees and expenses. This offering was done concurrently with the issuance of \$125,000 aggregate principal amount (with the exercise of the underwriters' over-allotment option) of the 5.00% Convertible Senior Notes due August 15, 2015. Refer to Note 10 Convertible Senior Notes for further information.

On March 10, 2008, Fleet Acquisition LLC distributed 2,512,532 shares of the Company's common stock to OCM Fleet Acquisition LLC, as a member thereof, pursuant to an agreement among Fleet Acquisition LLC's members. In connection with this distribution, Mr. Georgiopoulos became the sole member of the Management Committee of Fleet Acquisition LLC, which currently retains 443,606 shares of the Company's common stock of which Mr. Georgiopoulos may be deemed to be the beneficial owner. As a result of the foregoing transaction in addition to grants of nonvested shares made to Mr. Georgiopoulos, Mr. Georgiopoulos may be deemed to beneficially own 12.50% of the Company's common stock (including shares held through Fleet Acquisition LLC) at December 31, 2010.

## 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### Principles of consolidation

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ( U.S. GAAP ), which include the accounts of Genco Shipping & Trading Limited, its wholly owned subsidiaries and Baltic Trading, a subsidiary in which the Company owns a majority of the voting interests and exercises control. All intercompany accounts and transactions have been eliminated in consolidation.

### Business geographics

The Company's vessels regularly move between countries in international waters, over hundreds of trade routes and, as a result, the disclosure of geographic information is impracticable.

### Vessel acquisitions

When the Company enters into an acquisition transaction, it determines whether the acquisition transaction was the purchase of an asset or a business based on the facts and circumstances of the transaction. As is customary in the shipping industry, the purchase of a vessel is normally treated as a purchase of an asset as the historical operating data for the vessel is not reviewed nor is material to the Company's decision to make such acquisition.

When a vessel is acquired with an existing time charter, the Company allocates the purchase price to the vessel and the time charter based on, among other things, vessel market valuations and the present value (using an interest rate which reflects the risks associated with the acquired charters) of the difference between (i) the contractual amounts to be paid pursuant to the charter terms and (ii) management's estimate of the fair market charter rate, measured over a period equal to the remaining term of the charter. The capitalized above-market (assets) and below-market

(liabilities) charters are amortized as a reduction or increase, respectively, to revenues over the remaining term of the charter.

Segment reporting

The Company has two operating segments, GS&T and Baltic Trading, which are both engaged in the ocean transportation of drybulk cargoes worldwide through the ownership and operation of drybulk carrier vessels. Refer to Note 3 Segment Information for further information.

Revenue and voyage expense recognition

Since the Company's inception, revenues have been generated from time charter agreements, pool agreements and spot market-related time charters. A time charter involves placing a vessel at the charterer's disposal for a set period of time during which the charterer may use the vessel in return for the payment by the charterer of a specified daily hire rate. In time charters, operating costs including crews, maintenance and insurance are typically paid by the owner of the vessel and specified voyage costs such as fuel and port charges are paid by the charterer. There are certain other non-specified voyage expenses such as commissions which are typically borne by the

Company. Spot market-related time charters are the same as other time charter agreements, except the time charter rates are variable and are based on a percentage of the average daily rates as published by The Baltic Dry Index.

The Company records time charter revenues over the term of the charter as service is provided. Revenues are recognized on a straight-line basis as the average revenue over the term of the respective time charter agreement. The Company recognizes voyage expenses when incurred.

Three of the Company's vessels, the Genco Constantine, Genco Titus and Genco Hadrian, are chartered under time charters which include a profit-sharing element. Under these charter agreements, the Company receives a fixed rate of \$52,750, \$45,000 and \$65,000 per day, respectively, and an additional profit-sharing payment. The profit-sharing between the Company and the respective charterer for each 15-day period is calculated by taking the average over that period of the published Baltic Cape Index of the four time charter routes as reflected in daily reports. If such average is more than the base rate payable under the charter, the excess amount is allocable 50% to the Company and 50% to the charterer. The profit sharing amount due to the Company is net of a 3.75% commission. Profit sharing revenue is recorded when the average of the published Baltic Cape Index for the four time charter routes is available for the entire 15-day period, which is when the profit sharing revenue is fixed and determinable.

Two of the Company's vessels, the Genco Ocean and Genco Bay, are chartered under spot market-related time charters which include a profit-sharing element. Under these charter agreements, the rate for the spot market-related time charter is linked with a floor of \$8,500 and a ceiling of \$13,500 daily with a 50% profit sharing arrangement to apply to any amount above the ceiling. The rate is based on 115% of the average of the daily rates of the Baltic Handysize Index as reflected in daily reports.

At December 31, 2010, five of the Company's vessels are in vessel pools. The Genco Explorer, Genco Pioneer, Genco Progress, Genco Reliance and Genco Sugar entered the Lauritzen Pool during August 2009. Vessel pools, such as the Lauritzen Pool, provide cost-effective commercial management activities for a group of similar class vessels. The pool arrangement provides the benefits of a large-scale operation, and chartering efficiencies that might not be available to smaller fleets. Under the pool arrangement, the vessels operate under a time charter agreement whereby the cost of bunkers and port expenses are borne by the pool and operating costs including crews, maintenance and insurance are typically paid by the owner of the vessel. Since the members of the pool share in the revenue generated by the entire group of vessels in the pool, and the pool operates in the spot market, the revenue earned by these vessels is subject to the fluctuations of the spot market. The Company recognizes revenue from these pool arrangements based on its portion of the net distributions reported by the relevant pool.

#### Other operating income

During the years ended December 31, 2010, 2009 and 2008, the Company recorded other operating income of \$791, \$0 and \$0 respectively. Other operating income recorded during the year ended December 31, 2010 consists of \$585 related to the first installment due on December 30, 2010 from Samsun Logix Corporation ( Samsun ) pursuant to the rehabilitation plan which was approved by the South Korean courts. Refer to Note 19 Commitments and Contingencies for further information regarding the bankruptcy settlement with Samsun. Additionally, other operating income consists of \$206 related to a payment received from the seller of the Baltic Cougar as a result of the late delivery of the vessel to Baltic Trading.

#### Due from charterers, net

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Due from charterers, net includes accounts receivable from charters, net of the provision for doubtful accounts. At each balance sheet date, the Company provides for the provision based on a review of all outstanding charter receivables. Included in the standard time charter contracts with the Company's customers are certain performance parameters which if not met, can result in customer claims. As of December 31, 2010 and 2009, the Company had a reserve of \$592 and \$171, respectively, against due from charterers balance and an additional accrual of \$689 and \$959, respectively, in deferred revenue, each of which is primarily associated with estimated customer claims against the Company including vessel performance issues under time charter agreements.

Revenue is based on contracted charterparties. However, there is always the possibility of dispute over terms and payment of hires and freights. In particular, disagreements may arise concerning the responsibility of lost time and revenue. Accordingly, the Company periodically assesses the recoverability of amounts outstanding and estimates a provision if there is a possibility of non-recoverability. The Company believes its provisions to be reasonable based on information available.

F-11

---

Vessel operating expenses

Vessel operating expenses include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance, the cost of spares and consumable stores, and other miscellaneous expenses. Vessel operating expenses are recognized when incurred.

Vessels, net

Vessels, net is stated at cost less accumulated depreciation. Included in vessel costs are acquisition costs directly attributable to the acquisition of a vessel and expenditures made to prepare the vessel for its initial voyage. The Company also capitalizes interest costs for a vessel under construction as a cost which is directly attributable to the acquisition of a vessel. Vessels are depreciated on a straight-line basis over their estimated useful lives, determined to be 25 years from the date of initial delivery from the shipyard. Depreciation expense for vessels for the years ended December 31, 2010, 2009 and 2008 was \$109,839, \$84,326, and \$69,050, respectively.

Depreciation expense is calculated based on cost less the estimated residual scrap value. The costs of significant replacements, renewals and betterments are capitalized and depreciated over the shorter of the vessel's remaining estimated useful life or the estimated life of the renewal or betterment. Undepreciated cost of any asset component being replaced that was acquired after the initial vessel purchase is written off as a component of vessel operating expense. Expenditures for routine maintenance and repairs are expensed as incurred. Scrap value is estimated by the Company by taking the cost of steel times the weight of the ship noted in lightweight tons (lwt). At December 31, 2010 and 2009, the Company estimated the residual value of vessels to be \$175/lwt.

Fixed assets, net

Fixed assets, net are stated at cost less accumulated depreciation and amortization. Depreciation and amortization are based on a straight line basis over the estimated useful life of the specific asset placed in service. The following table is used in determining the typical estimated useful lives:

Description	Useful lives
Leasehold improvements	Lesser of the useful life of the asset or life of the lease
Furniture, fixtures & other equipment	5 years
Vessel equipment	2-15 years
Computer equipment	3 years

Depreciation and amortization expense for fixed assets for the years ended December 31, 2010, 2009 and 2008 was \$501, \$414, and \$418, respectively.

Deferred drydocking costs

The Company's vessels are required to be drydocked approximately every 30 to 60 months for major repairs and maintenance that cannot be performed while the vessels are operating. The Company defers the costs associated with the drydockings as they occur and amortizes these costs on a straight-line basis over the period between drydockings. Costs deferred as part of a vessel's drydocking include actual costs incurred at the drydocking yard; cost of travel, lodging and subsistence of personnel sent to the drydocking site to supervise; and the cost of hiring a third party to oversee the drydocking. If the vessel is drydocked earlier than originally anticipated, any remaining deferred drydock costs that have not been amortized are expensed at the beginning of the next drydock. Amortization expense for drydocking for the years ended December 31, 2010, 2009 and 2008 was \$5,324, \$3,410, and \$1,927, respectively. All other costs incurred during drydocking are expensed as incurred.

Impairment of long-lived assets

The Company follows the Accounting Standards Codification (ASC) Subtopic 360-10, Property, Plant and Equipment (ASC 360-10), which requires impairment losses to be recorded on long-lived assets used in operations when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than their carrying amounts. If indicators of impairment are present, the Company performs an analysis of the anticipated undiscounted future net cash flows of the related long-lived assets. If the carrying value of the related asset exceeds the undiscounted cash flows, the carrying value is reduced to its fair value. Various factors including

anticipated future charter rates, estimated scrap values, future drydocking costs and estimated vessel operating costs are included in this analysis.

For the years ended December 31, 2010, 2009 and 2008, no impairment charges were recorded on the Company's long-lived assets.

#### Deferred financing costs

Deferred financing costs, included in other assets, consist of fees, commissions and legal expenses associated with obtaining loan facilities. These costs are amortized over the life of the related debt and are included in interest expense.

#### Cash and cash equivalents

The Company considers highly liquid investments such as money market funds and certificates of deposit with an original maturity of three months or less to be cash equivalents.

#### Investments

The Company holds an investment in the capital stock of Jinhui Shipping and Transportation Limited ( Jinhui ). Jinhui is a drybulk shipping owner and operator focused on the Supramax segment of drybulk shipping. This investment is designated as Available For Sale ( AFS ) and is reported at fair value, with unrealized gains and losses recorded in shareholders' equity as a component of accumulated other comprehensive income ( AOCI ). The Company classifies the investment as a current or noncurrent asset based on the Company's intent to hold the investment at each reporting date. Effective August 16, 2007, the Company elected hedge accounting for forward currency contracts in place associated with the cost basis of the Jinhui shares, and therefore the unrealized currency gain or loss associated with the cost basis in the Jinhui shares was reflected in the income statement as other expense to offset the gain or loss associated with these forward currency contracts. On October 10, 2008, the Company elected to discontinue the purchase of forward currency contracts associated with Jinhui by entering into an offsetting trade that closed the previously opened currency contract, thereby eliminating the hedge on Jinhui. The cost of securities when sold is based on the specific identification method. Realized gains and losses on the sale of these securities are reflected in the consolidated statement of operations in other expense. Additionally, the realized gain or loss on the forward currency contracts is reflected in the Consolidated Statement of Cash Flows as an investing activity and is reflected in the caption Payments on forward currency contracts, net.

Investments are reviewed quarterly to identify possible other-than-temporary impairment in accordance with ASC Subtopic 320-10, Investments Debt and Equity Securities ( ASC 320-10 ). When evaluating its investments, the Company reviews factors such as the length of time and extent to which fair value has been below the cost basis, the financial condition of the issuer, the underlying net asset value of the issuers assets and liabilities, and the Company's ability and intent to hold the investment for a period of time which may be sufficient for anticipated recovery in market value. Should the decline in the value of any investment be deemed to be other-than-temporary, the investment basis would be written down to fair market value, and the write-down would be recorded to earnings as a loss. Refer to Note 6 Investments.

Income taxes

Pursuant to Section 883 of the U.S. Internal Revenue Code of 1986 as amended (the Code), qualified income derived from the international operations of ships is excluded from gross income and exempt from U.S. federal income tax if a company engaged in the international operation of ships meets certain requirements. Among other things, in order to qualify, the Company must be incorporated in a country which grants an equivalent exemption to U.S. corporations and must satisfy certain qualified ownership requirements.

GS&T is incorporated in the Marshall Islands. Pursuant to the income tax laws of the Marshall Islands, GS&T is not subject to Marshall Islands income tax. The Marshall Islands has been officially recognized by the Internal Revenue Service as a qualified foreign country that currently grants the requisite equivalent exemption from tax. GS&T is not taxable in any other jurisdiction, with the exception of Genco Management (USA) Limited as noted below.

Based on the publicly traded requirement of the Section 883 regulations, GS&T believes that it qualified for

exemption from income tax on income derived from the international operations of ships for 2010, 2009 and 2008. In order to meet the publicly traded requirement, GS&T's stock must be treated as being primarily and regularly traded for more than half the days of any such year. Under the Section 883 regulations, GS&T's qualification for the publicly traded requirement may be jeopardized if shareholders of the Company's common stock that own five percent or more of the Company's stock ( 5% shareholders ) own, in the aggregate, 50% or more of the Company's common stock for more than half the days of the year. Management believes that during 2010, 2009 and 2008, the combined ownership of its 5% shareholders did not equal 50% or more of its common stock for more than half the days of 2010, 2009 and 2008, as applicable.

If GS&T does not qualify for the exemption from tax under Section 883, it would be subject to a 4% tax on the gross shipping income (without the allowance for any deductions) that is treated as derived from sources within the United States or United States source shipping income. For these purposes, shipping income means any income that is derived from the use of vessels, from the hiring or leasing of vessels for use, or from the performance of services directly related to those uses; and United States source shipping income includes 50% of shipping income that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States.

Baltic Trading is also incorporated in the Marshall Islands. However, Baltic Trading did not qualify for an exemption under Section 883 upon consummation of its IPO because it did not satisfy the publicly traded requirement as described above. Since Baltic Trading's IPO was completed on March 15, 2010, the Company has indirectly owned shares of Baltic Trading's Class B Stock which has provided the Company with over 50% of the combined voting power of all classes of Baltic Trading's voting stock. As such, Baltic Trading is subject to income tax on its United States source income. During the year ended December 31, 2010, Baltic Trading had United States operations which resulted in United States source income of \$2,541. Baltic Trading's estimated United States income tax expense for the year ended December 31, 2010 was \$78, of which \$38 was outstanding at December 31, 2010 which has been reflected in accounts payable and accrued expenses.

Pursuant to certain agreements, the Company technically and commercially manages vessels for Baltic Trading, as well as provides technical management of vessels for MEP in exchange for specified fees for these services provided. These services are performed by Genco Management (USA) Limited ( Genco (USA) ), which has elected to be taxed as a corporation for United States federal income tax purposes. As such, Genco (USA) is subject to United States federal income tax on its worldwide net income, including the net income derived from providing these services. Genco (USA) has entered into a cost-sharing agreement with the Company and Genco Ship Management LLC, collectively Manco, pursuant to which Genco (USA) agrees to reimburse Manco for the costs incurred by Genco (USA) for the use of Manco's personnel and services in connection with the provision of the services for both Baltic Trading and MEP's vessels. Total revenue earned for these services during the year ended December 31, 2010 was \$6,739, of which \$5,490 eliminated upon consolidation. After allocation of certain expenses, there was taxable income of \$3,913 associated with these activities for the year ended December 31, 2010. This resulted in estimated tax expense of \$1,762 for the year ended December 31, 2010.

#### Deferred revenue

Deferred revenue primarily relates to cash received from charterers prior to it being earned. These amounts are recognized as income when earned. Additionally, deferred revenue includes estimated customer claims mainly due to time charter performance issues.

#### Comprehensive income

The Company follows ASC Subtopic 220-10, Comprehensive Income ( ASC 220-10 ), which establishes standards for reporting and displaying comprehensive income and its components in financial statements. Comprehensive income is comprised of net income and amounts related to

the Company's interest rate swaps accounted for as hedges, as well as unrealized gains or losses associated with the Company's investments.

Nonvested stock awards

The Company follows ASC Subtopic 718-10, Compensation - Stock Compensation ( ASC 718-10 ) for nonvested stock issued under its equity incentive plan. Stock-based compensation costs from nonvested stock have been classified as a component of additional paid-in capital.

Accounting estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include vessel valuations, the valuation of amounts due from charterers, performance claims, residual value of vessels, useful life of vessels and the fair value of derivative instruments. Actual results could differ from those estimates.

Concentration of credit risk

Financial instruments that potentially subject the Company to concentrations of credit risk are amounts due from charterers, cash and cash equivalents, deposits on vessels and interest rate swap agreements. With respect to amounts due from charterers, the Company attempts to limit its credit risk by performing ongoing credit evaluations and, when deemed necessary, requires letters of credit, guarantees or collateral. The Company earned 100% of revenues from 33 customers in 2010, 23 customers in 2009 and 22 customers in 2008. Management does not believe significant risk exists in connection with the Company's concentrations of credit at December 31, 2010 and 2009.

For the year ended December 31, 2010 there were two customers that individually accounted for more than 10% of voyage revenues, Cargill International S.A. and Pacific Basin Chartering Ltd., which represented 29.26% and 11.43% of voyage revenues, respectively. For the year ended December 31, 2009, there were two customers that individually accounted for more than 10% of voyage revenues, Cargill International S.A. and Pacific Basin Chartering Ltd., which represented 30.77% and 13.61% of voyage revenues, respectively. For the year ended December 31, 2008, there were two customers that individually accounted for more than 10% of voyage revenues, Cargill International S.A. and Pacific Basin Chartering Ltd., which represented 27.79% and 14.64% of voyage revenues, respectively.

At December 31, 2010, the Company maintains all of its cash and cash equivalents with four financial institutions. None of the Company's cash and cash equivalent balances is covered by insurance in the event of default by these financial institutions.

Deposits on vessels are held in escrow accounts maintained by DnB NOR Bank ASA. None of the deposits on vessel balances are covered by insurance in the event of default by this financial institution.

At December 31, 2010, the Company has ten interest rate swap agreements with DnB NOR Bank ASA to manage interest costs and the risk associated with changing interest rates related to the 2007 Credit Facility. None of the interest rate swap agreements are covered by insurance in the event of default by this financial institution.

Fair value of financial instruments

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The estimated fair values of the Company's financial instruments such as amounts due to / due from charterers, accounts payable and long-term debt approximate their individual carrying amounts as of December 31, 2010 and December 31, 2009 due to their short-term maturity or the variable-rate nature of the respective borrowings under the credit facilities.

The fair value of the interest rate swaps is the estimated amount the Company would receive or have to pay in order to terminate these agreements at the reporting date, taking into account current interest rates and the creditworthiness of the counterparty for assets and creditworthiness of the Company for liabilities. See Note 13 - Fair Value of Financial Instruments for additional disclosure on the fair values of long term debt, convertible senior notes, derivative instruments, and AFS securities.

### Derivative financial instruments

### Interest rate risk management

The Company is exposed to the impact of interest rate changes. The Company's objective is to manage the impact of interest rate changes on its earnings and cash flow in relation to borrowings primarily for the purpose of acquiring drybulk vessels. These borrowings are subject to a variable borrowing rate. The Company uses pay-fixed receive-variable interest rate swaps to manage future interest costs and the risk associated with changing interest rate obligations. These swaps are designated as cash flow hedges of future variable rate interest payments and are tested

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

for effectiveness on a quarterly basis. Refer to Note 11 Interest Rate Swap Agreements for further information regarding the interest rate swaps held by the Company.

The differential to be paid or received for the effectively hedged portion of any swap agreement is recognized as an adjustment to interest expense as incurred. Additionally, the changes in value for the portion of the swaps that are effectively hedging future interest payments are reflected as a component of AOCI.

For the interest rate swaps that are not designated as an effective hedge, the change in the value and the rate differential to be paid or received is recognized as other (expense) income and is listed as a component of other (expense) income in the Consolidated Statements of Operations.

### Currency risk management

The Company currently holds an investment in Jinhui shares that are traded on the Oslo Stock Exchange. The Company utilized foreign currency forward contracts to protect its original investment from changing exchange rates through October 10, 2008 when the use of these contracts was discontinued due to the decline in the underlying value of Jinhui. Refer to Note 6 Investments for further information.

### 3 - SEGMENT INFORMATION

The Company determines its operating segments based on the information utilized by the chief operating decision maker to assess performance. Based on this information, the Company has two operating segments, GS&T and Baltic Trading. Both GS&T and Baltic Trading are engaged in the ocean transportation of drybulk cargoes worldwide through the ownership and operation of drybulk carrier vessels. GS&T seeks to deploy its vessels on time charters, spot market-related time charters or in vessel pools trading in the spot market and Baltic Trading seeks to deploy its vessel charters in the spot market, which represents immediate chartering of a vessel, usually for single voyages, or employing vessels on spot market-related time charters. Segment results are evaluated based on net income. The accounting policies applied to the reportable segments are the same as those used in the preparation of the Company's consolidated financial statements. Information about the Company's reportable segments for the years ended December 31, 2010, 2009 and 2008 are as follows:

The following table presents a reconciliation of total revenue from external customers for the Company's two operating segments to total consolidated revenue from external customers for the Company for the years ended December 31, 2010, 2009 and 2008.

	For the years ended December 31,		
	2010	2009	2008
<b><u>Revenue from External Customers</u></b>			
GS&T	\$ 421,618	\$ 379,531	\$ 405,370
Baltic Trading	32,559		
Total operating segments	454,177	379,531	405,370
Eliminating revenue	(5,490)		
Total consolidated revenue from external customers	\$ 448,687	\$ 379,531	\$ 405,370

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The following table presents a reconciliation of total intersegment revenue, which eliminates upon consolidation, for the Company's two operating segments for the years ended December 31, 2010, 2009 and 2008. The intersegment revenue noted in the following table represents revenue earned by GS&T pursuant to the management agreement entered into with Baltic Trading, which includes commercial service fees, technical service fees and sale and purchase fees.

	For the years ended December 31,		
	2010	2009	2008
<b><u>Intersegment revenue</u></b>			
GS&T	\$ 5,490	\$	\$
Baltic Trading			
Total operating segments	5,490		
Eliminating revenue	(5,490)		
Total consolidated intersegment revenue	\$	\$	\$

The following table presents a reconciliation of total depreciation and amortization expense for the

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Company's two operating segments to total consolidated depreciation and amortization expense for the years ended December 31, 2010, 2009 and 2008. The eliminating depreciation and amortization expense noted in the following table consists of the elimination of intercompany transactions resulting from the depreciation expense associated with the 1% purchase fee due to GS&T from Baltic Trading pursuant to the Management Agreement. The 1% purchase fee is capitalized as part of vessel assets by Baltic Trading and is depreciated over the remaining life of the vessel, therefore the associated depreciation expense is eliminated upon consolidation.

	For the years ended December 31,		
	2010	2009	2008
<b><u>Depreciation and amortization</u></b>			
GS&T	\$ 108,381	\$ 88,150	\$ 71,395
Baltic Trading	7,359		
Total operating segments	115,740	88,150	71,395
Eliminating depreciation and amortization	(77)		
Total consolidated depreciation and amortization	\$ 115,663	\$ 88,150	\$ 71,395

The following table presents a reconciliation of total interest expense for the Company's two operating segments to total consolidated interest expense for the years ended December 31, 2010, 2009 and 2008. There is no eliminating interest expense as the interest incurred by each operating segment is related to each operating segment's own debt facilities.

	For the years ended December 31,		
	2010	2009	2008
<b><u>Interest expense</u></b>			
GS&T	\$ 70,495	\$ 61,796	\$ 52,589
Baltic Trading	2,155		
Total operating segments	72,650	61,796	52,589
Eliminating interest expense			
Total consolidated interest expense	\$ 72,650	\$ 61,796	\$ 52,589

The following table presents a reconciliation of total net income for the Company's two operating segments to total consolidated net income for the years ended December 31, 2010, 2009 and 2008. The eliminating net income noted in the following table consists of the elimination of intercompany transactions resulting from revenue earned by GS&T and expenses incurred by Baltic Trading pursuant to the management agreement between the two companies as well as dividends received by GS&T from Baltic Trading for its Class B shares of Baltic Trading.

	For the years ended December 31,		
	2010	2009	2008
<b><u>Net income</u></b>			
GS&T	\$ 144,679	\$ 148,624	\$ 86,580
Baltic Trading	8,322		
Total operating segments	153,001	148,624	86,580
Eliminating net income	(5,592)		
Total consolidated net income	\$ 147,409	\$ 148,624	\$ 86,580

The following table presents a reconciliation of total assets for the Company's two operating segments to total consolidated net assets as of December 31, 2010 and December 31, 2009. The eliminating assets noted in the following table consists of the elimination of intercompany transactions resulting from the capitalization of fees paid to GS&T by Baltic Trading as vessel assets as well as the outstanding receivable balance due to GS&T from Baltic Trading as of December 31, 2010.

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

	December 31, 2010	December 31, 2009
<b>Total assets</b>		
GS&T	\$ 2,792,056	\$ 2,336,802
Baltic Trading	396,154	
Total operating segments	3,188,210	2,336,802
Eliminating assets	(5,502)	
Total consolidated assets	\$ 3,182,708	\$ 2,336,802

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The following table presents a reconciliation of total expenditures for vessel purchases, including vessel deposits, for the Company's two operating segments to total consolidated expenditures for vessel purchases, including vessel deposits, for the years ended December 31, 2010, 2009 and 2008. The eliminating expenditures for vessels noted in the following table consists primarily of the elimination of the 1% purchase fees due to GS&T from Baltic Trading pursuant to the Management Agreement which were paid by Baltic Trading to GS&T as of December 31, 2010.

	For the years ended December 31,		
	2010	2009	2008
<b><u>Expenditures for vessels</u></b>			
GS&T	\$ 597,908	\$ 287,637	\$ 513,834
Baltic Trading	389,758		
Total operating segments	987,666	287,637	513,834
Eliminating expenditures for vessels	(2,761)		
Total consolidated expenditures for vessels	\$ 984,905	\$ 287,637	\$ 513,834

#### 4 - CASH FLOW INFORMATION

As of December 31, 2010, the Company had ten interest rate swaps, which are described and discussed in Note 11 Interest Rate Swap Agreements. The fair value of all ten of the swaps is in a liability position of \$43,297, \$4,417 of which is a current liability, as of December 31, 2010. At December 31, 2009, eight swaps were in a liability position of \$44,139 and two swaps were in an asset position of \$2,108.

For the year ended December 31, 2010, the Company had non-cash investing activities not included in the Consolidated Statement of Cash Flows for items included in accounts payable and accrued expenses consisting of \$3,979 for the purchase of vessels, \$38 associated with deposits on vessels and \$60 for the purchase of other fixed assets. Additionally, for the year ended December 31, 2010, the Company had non-cash financing activities not included in the Consolidated Statement of Cash Flows for items included in accounts payable and accrued expenses consisting of \$204 associated with deferred financing fees, \$51 associated with issuance costs related to the concurrent stock offering and issuance of Convertible Senior Notes completed on July 27, 2010 and \$1 associated with dividend payments due to Peter Georgiopoulos, Chairman of the Board of Directors. Also, for the year ended December 31, 2010, the Company had non-cash investing activities not included in the Consolidated Statement of Cash Flows for items included in prepaid expenses and other current assets as of December 31, 2010 consisting of \$22 interest receivable associated with deposits on vessels.

For the year ended December 31, 2009, the Company had non-cash investing activities not included in the Consolidated Statement of Cash Flows for items included in accounts payable and accrued expenses consisting of \$630 for the purchase of vessels and \$87 for the purchase of other fixed assets. Additionally, for the year ended December 31, 2009, the Company had non-cash financing activities not included in the Consolidated Statement of Cash Flows for items included in accounts payable and accrued expenses consisting of \$483 associated with deferred registration costs for Baltic Trading.

For the year ended December 31, 2009, the Company made a non-cash reclassification of \$90,555 from deposits on vessels to vessels due to the completion of the purchases of the Genco Commodus, Genco Maximus and Genco Claudius. For the year ended December 31, 2008, the Company made a non-cash reclassification of \$60,128 from deposits on vessels to vessels due to the completion of the purchases of the Genco Champion, Genco Constantine and Genco Hadrian. No such reclassifications were made during the year ended December 31, 2010.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

For the year ended December 31, 2008, the Company had non-cash investing activities not included in the Consolidated Statement of Cash Flows for items included in accounts payable and accrued expenses consisting of \$473 for the purchase of vessels and \$337 associated with deposits on vessels. Additionally, for the year ended December 31, 2008, the Company had items in prepaid expenses and other current assets consisting of \$3,524 which had reduced the deposits on vessels.

F-18

---

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

During the years ended December 31, 2010, 2009 and 2008, cash paid for interest, net of amounts capitalized, was \$64,281, \$58,188, and \$47,885 respectively.

During the years ended December 31, 2010, 2009 and 2008, cash paid for estimated income taxes was \$1,995, \$0, and \$0 respectively.

On March 5, 2010 and December 21, 2010, the Board of Directors approved grants of 75,000 and 200,000 shares, respectively, of nonvested common stock to Peter Georgiopoulos, Chairman of the Board. The fair value of such nonvested stock was \$1,718 and \$2,930, respectively. Additionally, on May 13, 2010, the Company made grants of nonvested common stock under the Genco Shipping & Trading Limited 2005 Equity Incentive Plan in the amount of 15,000 shares to directors of the Company. The fair value of such nonvested stock was \$331. Lastly, on December 21, 2010, the Company granted nonvested stock to certain employees. The fair value of such nonvested stock was \$3,291.

On July 24, 2009, the Company made grants of nonvested common stock under the Genco Shipping and Trading Limited 2005 Equity Incentive Plan in the amount of 15,000 shares to directors of the Company. The fair value of such nonvested stock was \$374. On December 27, 2009, the Company granted nonvested stock to certain employees. The fair value of such nonvested stock was \$2,648.

On January 10, 2008 and December 24, 2008 the Board of Directors approved grants of 100,000 and 75,000 shares, respectively, of nonvested common stock to Peter Georgiopoulos, Chairman of the Board. The fair value of such nonvested stock was \$4,191 and \$905, respectively. Additionally, on February 13, 2008 and July 24, 2008 the Company made grants of nonvested common stock under the Genco Shipping & Trading Limited 2005 Equity Incentive Plan in the amount of 12,500 and 15,000 shares, respectively, to directors of the Company. The fair value of such nonvested stock was \$689 and \$938, respectively. Lastly, on December 24, 2008 the Company granted nonvested stock to certain employees. The fair value of such nonvested stock was \$1,448.

On March 10, 2010, 358,000 and 108,000 shares of Baltic Trading's nonvested common stock were granted to Peter Georgiopoulos, Chairman of the Board, and John Wobensmith, Baltic Trading's President and Chief Financial Officer, respectively, which were approved by the Board of Directors on such date. The fair value of such nonvested stock was \$6,524 based on the IPO price of \$14.00 per share. Both of these grants of nonvested common stock will vest ratably in four annual installments commencing on the first anniversary of the closing of the Company's IPO, March 15, 2010. Additionally, on March 15, 2010, the Company made grants of nonvested common stock in the amount of 12,500 shares to directors of the Company. The fair value of such nonvested stock was \$175 based on the IPO price of \$14.00 per share. These grants will vest the earlier of the first anniversary of the grant date or the date of the next annual shareholders' meeting, which is expected to be held in May 2011. Lastly, on December 24, 2010, 80,000 and 25,000 shares of nonvested common stock were granted to Peter Georgiopoulos and John Wobensmith, respectively, which were approved by the Board of Directors on such date. The fair value of such nonvested stock was \$1,118. Both of these grants of nonvested common stock will vest ratably on each of the four anniversaries of November 15, 2011. All of the aforementioned grants of nonvested common stock were made under the Baltic Trading Limited 2010 Equity Incentive Plan.

### 5 - VESSEL ACQUISITIONS AND DISPOSITIONS

On June 24, 2010, GS&T executed a Master Agreement with Bourbon SA ( Bourbon ) under which GS&T is to purchase 16 drybulk vessels, including two newbuildings, for an aggregate price of \$545,000. Total vessel deposits of \$54,500 were made during the second quarter of 2010. There is only one remaining vessel to purchase which is subject to the completion of customary additional documentation and closing conditions. Additionally, upon the delivery of each vessel, GS&T records a commission due to its financial advisor equivalent to 1% of the purchase price of the vessel and which is included as a component of the vessel asset. GS&T intends to retain 13 of the 16 vessels, 12 of which were delivered to GS&T in the third quarter of 2010, with the remaining vessel scheduled to be delivered in the first quarter of 2011. Refer to

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Note 1 General Information for a listing of the vessel delivery dates. GS&T has elected not to retain three of the 16 vessels, including one newbuilding. Therefore, upon delivery of these vessels during the year ended December 31, 2010, GS&T immediately resold them upon delivery based on GS&T's aggregate purchase price of approximately \$106,555 to MEP, a related party, including the 1% commission fee noted above. GS&T entered into definitive agreements with MEP for this purpose. One of the vessels was sold to MEP during the third quarter of 2010 for \$36,562 and two of the vessels were sold to MEP during the fourth quarter of 2010

F-19

---

for a total of \$69,993, each of which included the 1% commission fee noted above. GS&T has financed the acquisition of these vessels, excluding the MEP vessels, using bank debt for approximately 60% of the purchase price, cash on hand, and proceeds from its concurrent offerings of common stock and 5.00% Convertible Senior Notes due August 15, 2015, which were completed on July 27, 2010. Refer to Note 10 Convertible Senior Notes for further details.

On June 3, 2010, GS&T entered into an agreement to purchase five Handysize drybulk vessels, including four newbuildings, from companies within the Metrostar Management Corporation group of companies ( Metrostar ) for an aggregate purchase price of \$166,250. Total vessel deposits of \$16,625 were made during the second quarter of 2010. The remaining purchases are subject to the completion of customary documentation and closing conditions. Two of the vessels were delivered during the third quarter of 2010. The Genco Ocean, a newbuilding Handysize vessel, was delivered on July 26, 2010 and the Genco Bay, a 2010 built Handysize vessel, was delivered on August 24, 2010. The remaining three vessels are expected to be delivered to the Company between May and November 2011. Four of the five vessels are secured on long term time charters, each of which includes a minimum and maximum base rate as well as profit-sharing components, with Cargill International S.A. The remaining vessel is secured on a spot market-related time charter with Cargill International S.A. at a rate based on 115% of the average of the daily rates of the Baltic Handysize Index ( BHSI ), an index published by The Baltic Dry Index. GS&T plans to finance the acquisition of the remaining vessels using operating cash as well as the \$100,000 secured term loan facility which was entered into on August 12, 2010 and proceeds from its recent concurrent offerings of common stock and convertible notes. Refer to Note 10 Convertible Senior Notes.

On June 3, 2010, Baltic Trading entered into an agreement to purchase three Handysize drybulk vessels, including one newbuilding, from Metrostar for an aggregate purchase price of \$99,750. Total vessel deposits of \$9,975 were made during the second quarter of 2010. Two of the vessels were delivered during August 2010. The Baltic Wind, a 2009 built Handysize vessel, was delivered on August 4, 2010 and the Baltic Cove, a 2010 built Handysize vessel, was delivered on August 23, 2010. The remaining vessel, the Baltic Breeze, a newbuilding, was delivered during the fourth quarter of 2010 on October 12, 2010. All three vessels are secured on spot market-related time charters with Cargill International S.A. at a rate based on 115% of the average of the daily rates of the BHSI.

On February 19, 2010, Baltic Trading entered into agreements with subsidiaries of an unaffiliated third-party seller to purchase four 2009 built Supramax drybulk vessels for an aggregate price of \$140,000. Total vessel deposits of \$14,000 were made during the first quarter of 2010 and the remaining payment of \$126,000 was made upon delivery of the vessels during the second quarter of 2010. These four vessels, the Baltic Leopard, Baltic Panther, Baltic Cougar, and Baltic Jaguar, were delivered during the second quarter of 2010.

On February 22, 2010, Baltic Trading also entered into agreements with subsidiaries of another unaffiliated third-party seller to purchase two Capesize drybulk vessels for an aggregate price of \$144,200. The Baltic Wolf was delivered on October 14, 2010 and the Baltic Bear was delivered on May 14, 2010. Total vessel deposits of \$21,540 were made during the first quarter of 2010 and the remaining payment for the Baltic Bear of \$65,700 and the Baltic Wolf of \$56,960 were made upon delivery of the vessels during the second quarter and fourth quarter of 2010, respectively.

During 2009, the Company completed the acquisition of the Genco Commodus, Genco Maximus and Genco Claudius, respectively. In July 2007, the Company entered into an agreement to acquire nine Capesize vessels from Metrostar for a net purchase price of \$1,111,000, consisting of the value of the vessels and the liability for the below market time charter contracts acquired. The Company completed the acquisition of these vessels during 2009.

On June 16, 2008 the Company agreed to acquire six drybulk newbuildings from Lambert Navigation Ltd., Northville Navigation Ltd., Providence Navigation Ltd., and Primebulk Navigation Ltd., for an aggregate purchase price of \$530,000. On November 3, 2008, the Company agreed to cancel the acquisition of these six drybulk newbuildings. As part of the agreement, the selling group retained the deposits totaling

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

\$53,000 plus the interest earned on such deposits for the six vessels, comprised of three Capesize and three Handysize vessels. This transaction resulted in a charge in the fourth quarter of 2008 to the Company's income statement of \$53,765 related to the forfeiture of these deposits. This amount included \$53,213, which was recorded in Deposits on vessels and included net capitalized interest, approximately \$546 of interest income receivable which was recorded as part of Prepaid expenses and other current assets, and \$6 of other expenses. Additionally, on May 9, 2008, the Company agreed to acquire three 2007 built vessels, consisting of two Panamax vessels and one Supramax vessel, from Bocimar International N.V. and Delphis N.V. for an aggregate purchase price of approximately \$257,000 which were all acquired during 2008.

F-20

---

On February 26, 2008, the Company completed the sale of the Genco Trader. The Company realized a net gain of approximately \$26,227 and had net proceeds of \$43,084 from the sale of the vessel in the first quarter of 2008. The Company had previously reached an agreement, on October 2, 2007, to sell the Genco Trader, a 1990-built Panamax vessel, to SW Shipping Co., Ltd. for \$44,000 less a 2% brokerage commission payable to a third party.

On January 2, 2008, the Company completed the acquisition of the Genco Champion, the last vessel acquired from affiliates of Evalend Shipping Co. S.A. On August 10 and August 13, 2007, the Company had agreed to acquire six drybulk vessels (three Supramax and three Handysize) from affiliates of Evalend Shipping Co. S.A. for a net purchase price of \$336,000, consisting of the value of the vessels and the liability for the below market time charter contract acquired. The Company completed the acquisition of all six of the vessels, the Genco Champion, Genco Predator, Genco Warrior, Genco Hunter, Genco Charger, and Genco Challenger, during 2008.

On October 2, 2007, the Company reached an agreement to sell the Genco Trader, a 1990-built Panamax vessel, to SW Shipping Co., Ltd for \$44,000 less a 2% brokerage commission payable to a third party. The Company recorded a net gain of \$26,227 from the sale of the vessel in the first quarter of 2008.

Refer to Note 1 General Information for a listing of the vessels for which GS&T and Baltic Trading have entered into agreements to purchase as noted herein.

Two of the Supramax vessels acquired from Bourbon and two of the Handysize vessels acquired from Metrostar during the third quarter of 2010 by GS&T had existing below market time charters at the time of the acquisitions. During the year ended December 31, 2010, GS&T recorded a liability for time charters acquired of \$2,146 which is being amortized as an increase to voyage revenues during the remaining term of each respective time charter. There were no vessels acquired during the year ended December 31, 2009 that had existing time charters. Below market time charters, including those acquired during previous years, were amortized as an increase in revenue in the amount of \$4,560, \$18,975 and \$22,447 for the years ended December 31, 2010, 2009 and 2008, respectively. The remaining unamortized fair market value of time charter acquired at December 31, 2010 and December 31, 2009 is \$2,197 and \$4,611, respectively. This balance will be amortized into revenue over a weighted average period of 1.57 years and will be amortized as follows: \$1,519 for 2011, \$544 for 2012 and \$134 for 2013. The 2008 amortization amount includes the accelerated amortization of the unamortized fair market value of the time charter acquired related to the Genco Cavalier as a result of the charterer of the vessel going bankrupt.

Capitalized interest expense associated with newbuilding contracts for the years ended December 31, 2010, 2009 and 2008 was \$446, \$1,473 and \$5,778, respectively.

## 6 INVESTMENTS

The Company holds an investment in the capital stock of Jinhui. Jinhui is a drybulk shipping owner and operator focused on the Supramax segment of drybulk shipping. This investment is designated as AFS and is reported at fair value, with unrealized gains and losses recorded in shareholders' equity as a component of AOCI. At December 31, 2010 and December 31, 2009, the Company held 16,335,100 shares of Jinhui capital stock which is recorded at its fair value of \$54,714 and \$72,181, respectively, based on the closing price on December 30, 2010 and December 30, 2009.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

During the fourth quarter of 2008, the Company reviewed the investment in Jinhui for indicators of other-than-temporary impairment in accordance with ASC 320-10. Based on this review, the Company deemed the investment in Jinhui to be other-than-temporarily impaired as of December 31, 2008 due to the severity of the decline in its market value versus its cost basis. As a result, during the fourth quarter of 2008, the Company recorded a \$103,892 impairment charge. As a result of the other-than-temporary impairment, the new cost basis of this investment is approximately \$1.03 per share, the value of the investment at December 31, 2008. The Company reviews the investment in Jinhui for impairment on a quarterly basis. There were no impairment charges recognized during the years ended December 31, 2010 and 2009.

The unrealized gain for the Jinhui capital stock remains a component of AOCI since this investment is designated as an AFS security.

Refer to Note 12 Accumulated Other Comprehensive (Loss) Income for a breakdown of the components of AOCI.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

During 2008 the gain (loss) associated with the use of short-term forward currency contracts held during the year which were accounted for as fair value hedges is included as a component of other (expense) income and is offset by a reclassification from AOCI for the hedged portion of the currency gain (loss) on investment.

### 7 - EARNINGS PER SHARE

The computation of basic earnings per share is based on the weighted average number of common shares outstanding during the year. The computation of diluted earnings per share assumes the vesting of nonvested stock awards (refer to Note 21 Nonvested Stock Awards), for which the assumed proceeds upon vesting are deemed to be the amount of compensation cost attributable to future services and are not yet recognized using the treasury stock method, to the extent dilutive. Of the 809,087 nonvested shares outstanding at December 31, 2010 (refer to Note 21 Nonvested Stock Awards), 562,150 shares are anti-dilutive. The Company's diluted earnings per share will also reflect the assumed conversion under the Company's convertible debt if the impact is dilutive under the if-converted method. The impact of the convertible debt is excluded from the computation of diluted earnings per share when interest expense per common share obtainable upon conversion is greater than basic earnings per share.

The components of the denominator for the calculation of basic earnings per share and diluted earnings per share are as follows:

	2010	Years Ended December 31, 2009	2008
<b>Common shares outstanding, basic:</b>			
Weighted average common shares outstanding, basic	32,987,449	31,295,212	30,290,016
<b>Common shares outstanding, diluted:</b>			
Weighted average common shares outstanding, basic	32,987,449	31,295,212	30,290,016
Dilutive effect of convertible notes	2,760,693		
Dilutive effect of restricted stock awards	143,231	149,851	162,834
Weighted average common shares outstanding, diluted	35,891,373	31,445,063	30,452,850

The following table sets forth a reconciliation of the net income attributable to GS&T and the net income attributable to GS&T for diluted earnings per share under the if-converted method:

	2010	Years Ended December 31, 2009	2008
Net income attributable to GS&T	\$ 141,243	\$ 148,624	\$ 86,580
Interest expense related to convertible notes	4,657		
Net income attributable to GS&T for the computation of diluted earnings per share	\$ 145,900	\$ 148,624	\$ 86,580

## 8 - RELATED PARTY TRANSACTIONS

The following are related party transactions not disclosed elsewhere in these consolidated financial statements:

The Company makes available employees performing internal audit services to General Maritime Corporation ( GMC ), where the Company's Chairman, Peter C. Georgiopoulos, also serves as Chairman of the Board. For the years ended December 31, 2010, 2009 and 2008, the Company invoiced \$200, \$162 and \$175, respectively, to GMC which includes time associated with such internal audit services. During 2009, the amount invoiced of \$162 included \$4 of office expenses. Additionally, during the years ended December 31, 2010, 2009 and 2008, the Company incurred travel and other related expenditures totaling \$336, \$139 and \$337, respectively, reimbursable to GMC or its service provider. For the year ended December 31, 2010, 2009 and 2008 approximately \$0, \$0 and \$9 of these travel expenditures were paid from the gross proceeds received from the May 2008 equity offering and as such were included in the determination of net proceeds. At December 31, 2010, the amount due to GMC from the Company was \$74. At December 31, 2009, the amount due to the Company from GMC was \$41.

During the years ended December 31, 2010, 2009 and 2008, the Company incurred legal services (primarily in connection with vessel acquisitions) aggregating \$390, \$80, and \$99, respectively, from Constantine Georgiopoulos, the father of Peter C. Georgiopoulos, Chairman of the Board. At December 31, 2010 and 2009, \$234 and \$3, respectively, was outstanding to Constantine Georgiopoulos.

During the year ended December 31, 2010, the Company utilized the services of North Star Maritime, Inc. ( NSM ) which is owned and operated by one of GS&T's directors, Rear Admiral Robert C. North, USCG (ret.). NSM, a marine industry consulting firm, specializes in international and domestic maritime safety, security and environmental protection issues. NSM billed \$12 for services rendered during the year ended December 31, 2010. There were no services rendered from NSM during 2009 and 2008. There are no amounts due to NSM at December 31, 2010 and 2009.

During 2009 and 2010, GS&T and Baltic Trading, respectively, entered into agreements with Aegean Marine Petroleum Network, Inc. ( Aegean ) to purchase lubricating oils for certain vessels in their fleets. Peter C. Georgiopoulos, Chairman of the Board of the Company, is Chairman of the Board of Aegean. During the years ended December 31, 2010 and 2009, Aegean supplied lubricating oils to the Company's vessels aggregating \$1,457 and \$230, respectively. At December 31, 2010 and 2009, \$302 and \$226 remained outstanding, respectively. There were no purchases of lubricating oils made from Aegean during 2008.

During the year ended December 31, 2010, the Company invoiced MEP for technical services provided and expenses paid on MEP's behalf aggregating \$108,982. This amount also included the purchase of three Bourbon vessels on MEP's behalf (Refer to Note 5 Vessel Acquisitions and Dispositions). MEP is managed by a company owned by Peter C. Georgiopoulos, Chairman of the Board. At December 31, 2010 and 2009, \$57 and \$0, respectively, was due to the Company from MEP. Total service revenue earned by the Company for technical services provided to MEP for the year ended December 31, 2010 was \$1,249.

## 9 - LONG-TERM DEBT

Long-term debt consists of the following:

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

	December 31, 2010		December 31, 2009
2007 Credit Facility	\$ 1,277,000	\$	1,327,000
\$100 Million Term Loan Facility	38,880		
\$253 Million Term Loan Facility	226,809		
2010 Baltic Trading Credit Facility	101,250		
Less: Current portion	(71,841)		(50,000)
Long-term debt	\$ 1,572,098	\$	1,277,000

2007 Credit Facility

On July 20, 2007, the Company entered into a credit facility with DnB Nor Bank ASA (the 2007 Credit Facility ) for the purpose of acquiring nine Capesize vessels and refinancing the Company's existing 2005 Credit

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Facility and Short-Term Line. DnB Nor Bank ASA is also Mandated Lead Arranger, Bookrunner, and Administrative Agent. The Company has used borrowings under the 2007 Credit Facility to repay amounts outstanding under the 2005 Credit Facility and the Short-Term Line, and these two facilities have accordingly been terminated. As of December 31, 2010 and 2009, \$1,277,000 and \$1,327,000 was outstanding under the 2007 Credit Facility. The maximum amount that may be borrowed under the 2007 Credit Facility at December 31, 2010 is \$1,277,000. As of December 31, 2010, the Company has utilized its maximum borrowing capacity under the 2007 Credit Facility.

On January 26, 2009, the Company entered into an amendment to the 2007 Credit Facility (the 2009 Amendment ) which implemented the following modifications to the terms of the 2007 Credit Facility:

- Compliance with the existing collateral maintenance financial covenant was waived effective for the year ended December 31, 2008 and until the Company can represent that it is in compliance with all of its financial covenants and is otherwise able to pay a dividend and purchase or redeem shares of common stock under the terms of the Credit Facility in effect before the 2009 Amendment. With the exception of the collateral maintenance financial covenant, the Company believes that it is in compliance with its financial covenants under the 2007 Credit Facility. The Company's cash dividends and share repurchases were suspended until the Company can represent that it is in a position to again satisfy the collateral maintenance covenant.
- The total amount of the 2007 Credit Facility is subject to quarterly reductions of \$12,500 beginning March 31, 2009 through March 31, 2012 and quarterly reductions of \$48,195 beginning July 20, 2012 and thereafter until the maturity date. A final payment of \$250,600 will be due on the maturity date.
- The Applicable Margin to be added to the London Interbank Offered Rate to calculate the rate at which the Company's borrowings bear interest is 2.00% per annum (the Applicable Margin ).
- The commitment commission payable to each lender is 0.70% per annum of the daily average unutilized commitment of such lender.

Amounts borrowed and repaid under the 2007 Credit Facility may be reborrowed if available under the 2007 Credit Facility. The 2007 Credit Facility has a maturity date of July 20, 2017.

Loans made under the 2007 Credit Facility may be and have been used for the following:

- up to 100% of the en bloc purchase price of \$1,111,000 for nine modern drybulk Capesize vessels, which the Company has agreed to purchase from Metrostar;
- repayment of amounts previously outstanding under the Company's 2005 Credit Facility, or \$206,233;

- the repayment of amounts previously outstanding under the Company's Short-Term Line, or \$77,000;
- possible acquisitions of additional drybulk carriers between 25,000 and 180,000 dwt that are up to ten years of age at the time of delivery and not more than 18 years of age at the time of maturity of the credit facility;
- up to \$50,000 of working capital; and
- the issuance of up to \$50,000 of standby letters of credit. At December 31, 2010 and 2009, there were no letters of credit issued under the 2007 Credit Facility.

All amounts owing under the 2007 Credit Facility are secured by the following:

- cross-collateralized first priority mortgages on 35 of the Company's existing vessels and any new vessels financed with the 2007 Credit Facility;

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

- an assignment of any and all earnings of the mortgaged vessels;
- an assignment of all insurances on the mortgaged vessels;
- a first priority perfected security interest in all of the shares of Jinhui owned by the Company;
- an assignment of the shipbuilding contracts and an assignment of the shipbuilder's refund guarantees meeting the Administrative Agent's criteria for any additional newbuildings financed under the 2007 Credit Facility; and
- a first priority pledge of the Company's ownership interests in each subsidiary guarantor.

The Company has completed a pledge of its ownership interests in the subsidiary guarantors that own the nine Capesize vessels acquired. The other collateral described above was pledged, as required, within 30 days of the effective date of the 2007 Credit Facility.

The Company's borrowings under the 2007 Credit Facility bear interest at the London Interbank Offered Rate ( LIBOR ) for an interest period elected by the Company of one, three, or six months, or longer if available, plus the Applicable Margin which was 0.85% per annum. Effective January 26, 2009, due to the 2009 Amendment, the Applicable Margin increased to 2.00%. In addition to other fees payable by the Company in connection with the 2007 Credit Facility, the Company paid a commitment fee at a rate of 0.20% per annum of the daily average unutilized commitment of each lender under the facility until September 30, 2007, and 0.25% thereafter. Effective January 26, 2009, due to the 2009 Amendment, the rate increased to 0.70% per annum of the daily average unutilized commitment of such lender.

The 2007 Credit Facility includes the following financial covenants which apply to the Company and its subsidiaries on a consolidated basis and are measured at the end of each fiscal quarter beginning with June 30, 2007:

- The leverage covenant requires the maximum average net debt to EBITDA ratio to be no greater than 5.5:1.0.
- Cash and cash equivalents must not be less than \$500 per mortgaged vessel.
- The ratio of EBITDA to interest expense, on a rolling last four-quarter basis, must be no less than 2.0:1.0.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

- After July 20, 2007, consolidated net worth, as defined in the 2007 Credit Facility, must be no less than \$263,300 plus 80% of the value of the any new equity issuances of the Company from June 30, 2007. Based on the equity offerings completed in October 2007 and May 2008, consolidated net worth must be no less than \$590,750.

- The aggregate fair market value of the mortgaged vessels must at all times be at least 130% of the aggregate outstanding principal amount under the credit facility plus all letters of credit outstanding; the Company has a 30 day remedy period to post additional collateral or reduce the amount of the revolving loans and/or letters of credit outstanding. This covenant was waived effective for the year ended December 31, 2008 and indefinitely until the Company can represent that it is in compliance with all of its financial covenants as per the 2009 Amendment as described above.

As of December 31, 2010, the Company believes it is in compliance with all of the financial covenants under its 2007 Credit Facility, as amended, with the exception of the collateral maintenance financial covenant, which has been waived as discussed above.

On June 18, 2008, the Company entered into an amendment to the 2007 Credit Facility allowing the Company to prepay vessel deposits to give the Company flexibility in refinancing potential vessel acquisitions.

Due to refinancing of the 2007 Credit Facility as a result of entering into the 2009 Amendment, the Company incurred a non-cash write-off of unamortized deferred financing costs in the amount of \$1,921 associated with capitalized costs related to prior amendments and this charge was reflected in interest expense in the fourth quarter of

2008.

The following table sets forth the repayment of the outstanding debt of \$1,277,000 at December 31, 2010 under the 2007 Credit Facility, as amended:

Period Ending December 31,	Total
2011	\$ 50,000
2012	108,890
2013	192,780
2014	192,780
2015	192,780
Thereafter	539,770
Total debt	\$ 1,277,000

#### \$100 Million Term Loan Facility

On August 12, 2010, the Company entered into a \$100,000 secured term loan facility ( \$100 Million Term Loan Facility ). Crédit Agricole Corporate and Investment Bank, which is also acting as Agent and Security Trustee; and Crédit Industriel et Commercial; and Skandinaviska Enskilda Banken AB (publ) are the lenders under the facility. The Company has used or intends to use the \$100 Million Term Loan Facility to fund or refund to the Company a portion of the purchase price of the acquisition of five vessels from Metrostar (Refer to Note 5 Vessel Acquisitions and Dispositions). Under the terms of the facility, the \$100 Million Term Loan Facility will be drawn down in five equal tranches of \$20,000 each, with one tranche per vessel. The \$100 Million Term Loan Facility has a final maturity date of seven years from the date of the first drawdown, or August 17, 2017, and borrowings under the facility bear interest at LIBOR for an interest period of one, three or six months (as elected by the Company), plus 3.00% per annum. A commitment fee of 1.35% is payable on the undrawn committed amount of the \$100 Million Term Loan Facility, which began accruing on August 12, 2010. Borrowings are to be repaid quarterly, with the outstanding principal amortized on a 13-year profile, with any outstanding amount under the \$100 Million Term Loan Facility to be paid in full on the final maturity date. Repaid amounts are no longer available and cannot be reborrowed. Borrowings under the \$100 Million Term Loan Facility are secured by liens on the five Metrostar vessels purchased by GS&T and other related assets. Certain of the Company's wholly-owned ship-owning subsidiaries, each of which own or will own one of the five Metrostar vessels, will act as guarantors under the \$100 Million Term Loan Facility.

As of December 31, 2010, two drawdowns of \$20,000 each had been made for the deliveries of the Genco Ocean and Genco Bay. These drawdowns were made on August 17, 2010 and August 23, 2010, respectively. During the year ended December 31, 2010, total required repayments of \$1,120 were made. As of December 31, 2010, total availability under the \$100 Million Term Loan Facility was \$60,000.

The \$100 Million Term Loan Facility requires the Company to comply with a number of covenants, including financial covenants related to leverage, consolidated net worth, interest coverage and dividends; minimum working capital requirements; collateral maintenance requirements; and other covenants, most of which are in principle and calculation similar to the Company's covenants under the existing 2007 Credit Facility, except for the minimum cash requirement, which is \$750 per mortgaged vessel under this facility. The \$100 Million Term Loan Facility includes usual and customary events of default and remedies for facilities of this nature. Availability of each tranche of the \$100 Million Term Loan Facility is subject to the acquisition of each of the five vessels from Metrostar and other conditions and documentation relating to the collateral securing the credit facility.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The Company believes it is in compliance with all of the financial covenants under the \$100 Million Term Loan Facility as of December 31, 2010.

The following table sets forth the repayment of the outstanding debt of \$38,880 at December 31, 2010 under the \$100 Million Term Loan Facility:

F-26

---

Period Ending December 31,	Total
2011	\$ 3,077
2012	3,077
2013	3,077
2014	3,077
2015	3,077
Thereafter	23,495
Total debt	\$ 38,880

#### \$253 Million Term Loan Facility

On August 20, 2010, the Company entered into a \$253,000 senior secured term loan facility ( \$253 Million Term Loan Facility ). BNP Paribas; Crédit Agricole Corporate and Investment Bank; DVB Bank SE; Deutsche Bank AG Filiale Deutschlandgeschäft, who is also acting as Security Agent and Bookrunner; and Skandinaviska Enskilda Banken AB (publ) are Lenders and Mandated Lead Arrangers under the facility. Deutsche Bank Luxembourg S.A. is acting as Agent under the facility, and Deutsche Bank AG and all of the Lenders other than Deutsche Bank AG Filiale Deutschlandgeschäft are acting as Swap Providers under the facility. The Company has used or intends to use the \$253 Million Term Loan Facility to fund a portion of the purchase price of the acquisition of 13 vessels from affiliates of Bourbon. Under the terms of the facility, the \$253 Million Term Loan Facility will be drawn down in 13 tranches in amounts based on the particular vessel being acquired, with one tranche per vessel. The \$253 Million Term Loan Facility has a maturity date of August 14, 2015 and borrowings under the \$253 Million Term Loan Facility bear interest, as elected by the Company, at LIBOR for an interest period of three or six months, plus 3.00% per annum. A commitment fee of 1.25% is payable on the undrawn committed amount of the \$253 Million Term Loan Facility, which began accruing on August 20, 2010. Borrowings are to be repaid quarterly with outstanding principal amortized on a per vessel basis and any outstanding amount under the \$253 Million Term Loan Facility to be paid in full on the maturity date. Repaid amounts are no longer available and cannot be reborrowed. Borrowings under the \$253 Million Term Loan Facility are secured by liens on the Bourbon vessels and other related assets. Certain of the Company's wholly-owned ship-owning subsidiaries, each of which owns or will own one of the Bourbon vessels, will act as guarantors under the credit facility.

As of December 31, 2010, total drawdowns of \$231,500 have been made under the \$253 Million Term Loan Facility to fund or refund to the Company a portion of the purchase price of the 12 Bourbon vessels delivered during the third quarter of 2010. Refer to Note 5 Vessel Acquisitions and Dispositions for a listing of the vessels delivered. Total required debt repayments of \$4,691 were made during the year ended December 31, 2010. As of December 31, 2010, total availability under the \$253 Million Term Loan Facility was \$21,500.

The \$253 Million Term Loan Facility requires the Company to comply with a number of covenants, including financial covenants related to leverage, consolidated net worth, liquidity and interest coverage; dividends; collateral maintenance requirements; and other covenants, most of which are in principle and calculation similar to our covenants under the existing 2007 Credit Facility, except for the minimum cash requirement, which is \$750 per mortgaged vessel under this facility. As of December 31, 2010, the Company had deposited \$9,000 that has been reflected as restricted cash at December 31, 2010. Restricted cash will be released only if the underlying collateral is sold or disposed of. The \$253 Million Term Loan Facility includes usual and customary events of default and remedies for facilities of this nature. Availability of each tranche of the \$253 Million Term Loan Facility will be subject to the delivery of each vessel from Bourbon and other conditions and documentation relating to the collateral securing the \$253 Million Term Loan Facility.

The Company believes it is in compliance with all of the financial covenants under the \$253 Million Term Loan Facility as of December 31, 2010.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The following table sets forth the repayment of the outstanding debt of \$226,809 at December 31, 2010 under the \$253 Million Term Loan Facility:

<b>Period Ending December 31,</b>		<b>Total</b>
2011	\$	18,764
2012		18,764
2013		18,764
2014		18,764
2015		151,753
Total debt	\$	226,809

F-27

---

2008 Term Facility

On September 4, 2008, the Company executed a Credit Agreement and other definitive documentation for its \$320 million credit facility (the 2008 Term Facility ). The 2008 Term Facility was underwritten by Nordea Bank Finland Plc, New York Branch, who served as Administrative Agent, Bookrunner, and Collateral Agent; Bayerische Hypo- und Vereinsbank AG, who served as Bookrunner; DnB NOR Bank ASA; Sumitomo Mitsui Banking Corporation, acting through its Brussels Branch; and Deutsche Schiffsbank Akteingesellschaft. DnB NOR Bank ASA underwrote the Company's existing 2007 Credit Facility and served under that facility as Administrative Agent and Collateral Agent.

Under the 2008 Term Facility, subject to the conditions set forth in the Credit Agreement, the Company was able to borrow an amount up to \$320 million. Amounts borrowed and repaid under the 2008 Term Facility could not be reborrowed. The 2008 Term Facility had a maturity date on the earlier of the fifth anniversary of the initial borrowing date under the facility or December 31, 2013.

Loans made under the 2008 Term Facility were able to be used to fund or refund to the Company the acquisition costs of six drybulk newbuildings, consisting of three Capesize and three Handysize vessels, which the Company agreed on June 16, 2008 to acquire from Lambert Navigation Ltd., Northville Navigation Ltd., Providence Navigation Ltd., and Prime Bulk Navigation Ltd.

The terms of the 2008 Term Facility provide that it was to be cancelled upon a cancellation of the acquisition contracts for the six vessels described above. As such, the 2008 Term Facility was cancelled effective November 4, 2008 upon the cancellation of the acquisition of six drybulk newbuildings from Lambert Navigation Ltd., Northville Navigation Ltd., Providence Navigation Ltd., and Primebulk Navigation Ltd., for an aggregate purchase price of \$530,000. Cancellation of the facility resulted in a charge in the fourth quarter of 2008 to interest expense of \$2,191 associated with unamortized deferred financing costs.

2010 Baltic Trading Credit Facility

On April 16, 2010, Baltic Trading entered into a \$100,000 senior secured revolving credit facility with Nordea Bank Finland plc, acting through its New York branch. (the 2010 Baltic Trading Credit Facility ) An amendment to the 2010 Baltic Trading Credit Facility was entered into by Baltic Trading effective November 30, 2010. This amendment increased the commitment amount of the 2010 Baltic Trading Credit Facility from \$100,000 to \$150,000 and amounts borrowed will bear interest at LIBOR plus a margin of 3.00% as compared to 3.25% under the original facility. The term of the 2010 Baltic Trading Credit Facility was extended to six years from the previous 3.5 years and will now mature on November 30, 2016 as compared to April 16, 2014 previously. A commitment fee of 1.25% per annum is payable on the unused daily portion of the 2010 Baltic Trading Credit Facility, which began accruing on March 18, 2010 under the terms of the commitment letter entered into on February 25, 2010. In connection with the commitment letter entered on February 25, 2010, Baltic Trading paid an upfront fee of \$313. Additionally, upon executing the original 2010 Baltic Trading Credit Facility, Baltic Trading paid the remaining upfront fee of \$938, for total fees of \$1,250. In connection with the amendment to the 2010 Credit Facility effective November 30, 2010, Baltic Trading paid an upfront fee of \$1,350. Of the total facility amount of \$150,000, \$25,000 is available for working capital purposes. As of December 31, 2010, total available working capital borrowings were \$23,500 as \$1,500 was drawn down during the year ended December 31, 2010 for working capital purposes. As of December 31, 2010, \$48,750 remained available under the 2010 Credit Facility as total drawdowns of \$101,250 were made to fund the purchase of the Baltic Wind, Baltic Cove and Baltic Breeze. Refer to Note 5 Vessel Acquisitions and Dispositions for further information regarding these vessel deposits and acquisitions.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Baltic Trading intends to use the 2010 Baltic Trading Credit Facility primarily for bridge financing for future vessel acquisitions. Pursuant to the amended 2010 Baltic Trading Credit Facility, the total commitment of \$150,000 will be reduced in 11 consecutive semi-annual reductions of \$5,000 commencing on the six month anniversary of the effective date, or May 31, 2011. On the maturity date, November 30, 2016, the total commitment will reduce to zero and all borrowing must be repaid in full by Baltic Trading.

Borrowings under the 2010 Baltic Trading Credit Facility are secured by liens on Baltic Trading's initial vessels and other related assets. Borrowings under the facility are subject to the delivery of security documents with respect to Baltic Trading's initial vessels. Baltic Trading's subsidiaries owning the initial vessels act as guarantors under the 2010 Baltic Trading Credit Facility.

All amounts owing under the 2010 Baltic Trading Credit Facility are also secured by the following:

- cross-collateralized first priority mortgages of each of Baltic Trading's initial vessels;
- an assignment of any and all earnings of Baltic Trading's initial vessels; and
- an assignment of all insurance on the mortgaged vessels.

The 2010 Baltic Trading Credit Facility requires Baltic Trading to comply with a number of covenants, including financial covenants related to liquidity, consolidated net worth, and collateral maintenance; delivery of quarterly and annual financial statements and annual projections; maintaining adequate insurances; compliance with laws (including environmental); compliance with ERISA; maintenance of flag and class of Baltic Trading's initial vessels; restrictions on consolidations, mergers or sales of assets; restrictions on changes in the Manager of Baltic Trading's initial vessels (or acceptable replacement vessels); limitations on changes to the Management Agreement between Baltic Trading and GS&T; limitations on liens; limitations on additional indebtedness; restrictions on paying dividends; restrictions on transactions with affiliates; and other customary covenants.

The amended 2010 Baltic Trading Credit Facility includes the following financial covenants which apply to Baltic Trading and its subsidiaries on a consolidated basis and are measured at the end of each fiscal quarter:

- Cash and cash equivalents plus the undrawn amount available for working capital under the facility must not be less than \$5,000 during the first year following the amendment, or until November 30, 2011. Beginning December 1, 2010, cash and cash equivalents plus the undrawn amount available for working capital under the facility must not be less than \$750 per vessel for all vessels in Baltic Trading's fleet.
- Consolidated net worth must not be less than (i) \$232,796 plus (ii) 50% of the value of any subsequent primary equity offerings of Baltic Trading.
- The aggregate fair market value of the mortgaged vessels must at all times be at least 140% of the aggregate outstanding principal amount under the 2010 Baltic Trading Credit Facility.

Under the 2010 Baltic Trading Credit Facility, Baltic Trading is not permitted to make loans to GS&T or Genco Investments LLC if an event of default existed at the time of the loan or could be reasonably expected to result there from. In addition, Baltic Trading would not be permitted under the facility to declare or pay dividends to its shareholders (including Genco Investments LLC) if an event of default existed at the time of payment or would be caused thereby. As of December 31, 2010, to remain in compliance with a net worth covenant in the facility, Baltic Trading needs to maintain a net worth of \$232,796 after the payment of any dividends.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The Company believes it is in compliance with all of the financial covenants under the 2010 Baltic Trading Credit Facility as of December 31, 2010.

The following table sets forth the repayment of the outstanding debt of \$101,250 at December 31, 2010 under the 2010 Baltic Trading Credit Facility:

<b>Period Ending December 31,</b>	<b>Total</b>
2011	\$
2012	
2013	
2014	
2015	1,250
Thereafter	100,000
Total debt	\$ 101,250

Interest rates

The following table sets forth the effective interest rate associated with the interest expense for the Company's debt facilities noted above, including the rate differential between the pay fixed receive variable rate on the interest rate swap agreements that were in effect (refer to Note 11 Interest Rate Swap Agreements), combined, and the cost associated with unused commitment fees. Additionally, it includes the range of interest rates on the debt, excluding the impact of swaps and unused commitment fees:

	Year ended December 31,		
	2010	2009	2008
Effective interest rate	4.64%	5.12%	5.24%
Range of interest rates (excluding impact of swaps and unused commitment fees)	2.25% to 3.60%	1.23% to 5.56%	1.35% to 6.10%

Letter of credit

In conjunction with the Company entering into a long-term office space lease (See Note 19 - Commitments and Contingencies), the Company was required to provide a letter of credit to the landlord in lieu of a security deposit. As of September 21, 2005, the Company obtained an annually renewable unsecured letter of credit with DnB NOR Bank. The letter of credit outstanding as of December 31, 2010 and 2009 was \$300 and \$333, respectively, at a fee of 1% per annum. The letter of credit is cancelable on each renewal date provided the landlord is given 150 days minimum notice.

10 CONVERTIBLE SENIOR NOTES

The Company issued \$125,000 of 5.0% Convertible Senior Notes on July 27, 2010 (the 2010 Notes). The 2010 Notes mature on August 15, 2015 and are convertible into shares of the Company's common stock at a conversion rate of approximately 51.0204 shares of common stock per (in whole dollars) \$1,000 principal amount of the 2010 Notes (equivalent to an initial conversion price of \$19.60 per share, representing a 22.5% conversion premium over the concurrent offering price of \$16.00 per share of the Company's common stock on July 21, 2010), subject to adjustment, based on the occurrence of certain events, including, but not limited to, (i) the issuance of certain dividends on our common stock, (ii) the issuance of certain rights, options or warrants, (iii) the effectuation of share splits or combinations, (iv) certain distributions of property and (v) certain issuer tender or exchange offers as described in the Indenture, with the amount due on conversion payable in shares, cash, or a combination thereof at the Company's discretion. The total underlying shares of the 2010 Notes are 6,377,551 shares of common stock. Since the Company can settle a conversion of the 2010 Notes with shares, cash, or a combination thereof at its discretion, the Company allocated the convertible debt proceeds between the liability component and the embedded conversion option (i.e., the equity component). The liability component of the debt instrument is being accreted to par value using the effective interest method over the remaining life of the debt. This accretion is reported as a component of interest expense. The equity component is not subsequently revalued as long as it continues to qualify for equity treatment.

Upon issuance, the Company estimated the fair value of the liability component of the 2010 Notes, assuming a 10% non-convertible borrowing rate, to be \$100,625 and the fair value of the conversion option to be \$24,375. This amount was recorded as a debt discount and as an increase to additional paid-in capital as of the issuance date and the Company proportionately allocated approximately \$918 of issuance costs against this equity component. The issuance costs allocated to the liability component of \$3,637 along with the debt discount is being amortized to interest

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

expense over the approximate 5 year period to the maturity of the 2010 Notes on August 15, 2015 resulting in additional interest expense in future periods. The issuance cost allocated to the liability component has been recorded as deferred financing costs; refer to Note 15 Other Assets, net.

The 2010 Notes were issued pursuant to an indenture, dated as of July 27, 2010 (the Base Indenture ), by and between the Company and The Bank of New York Mellon, as trustee (the Trustee ), supplemented by the First Supplemental Indenture dated as of June 27, 2010, by and between the Company and the Trustee (the Supplemental Indenture, and together with the Base Indenture, the Indenture ). The 2010 Notes are represented by a global security, executed by the Company, in the form attached to the Supplemental Indenture.

Interest is payable semi-annually in arrears on February 15 and August 15 of each year, beginning on February 15, 2011. The 2010 Notes will mature on August 15, 2015, subject to earlier repurchase or conversion upon

the occurrence of certain events. Holders may convert their 2010 Notes before February 15, 2015, only in certain circumstances determined by (i) the market price of the Company's common stock, (ii) the trading price of the 2010 Notes, or (iii) the occurrence of specified corporate events. The 2010 Notes are subject to repurchase by the Company at the option of the holders following a fundamental change, as defined in the Indenture, including, but not limited to, (i) certain ownership changes, (ii) certain recapitalizations, mergers and dispositions, (iii) approval of any plan or proposal for the liquidation, or dissolution of the Company, and (iv) the Company's common stock ceasing to be listed on any of the New York Stock Exchange or the Nasdaq Global Select Market, any of their respective successors or any other U.S. national securities exchange, at a price equal to 100% of the principal amount of the 2010 Notes plus accrued and unpaid interest up to the fundamental change repurchase date. After February 15, 2015, holders may convert their 2010 Notes at any time thereafter until the second scheduled trading day preceding maturity.

The Indenture includes customary agreements and covenants by the Company, including with respect to events of default.

The following tables provide additional information about the Company's 2010 Notes.

	<b>December 31, 2010</b>	
Carrying amount of the equity component (additional paid-in capital)	\$	24,375
Principal amount of the 2010 Notes		125,000
Unamortized discount of the liability component		22,691
Net carrying amount of the liability component		102,309

	<b>For the year ended December 31, 2010</b>	
Effective interest rate on liability component		9.9%
Cash interest expense recognized	\$	2,662
Non-cash interest expense recognized		1,684
Non-cash deferred financing costs recognized as interest expense		311

The remaining period over which the unamortized discount will be recognized is 4.6 years. As of December 31, 2010, the if-converted value of the 2010 Notes does not exceed their principal amount.

The 2010 Notes have been classified as a noncurrent liability on the consolidated balance sheet as of December 31, 2010 because the Company can settle the principal amount of the 2010 Notes with shares, cash, or a combination thereof at its discretion.

#### 11 - INTEREST RATE SWAP AGREEMENTS

The Company has ten interest rate swap agreements with DnB NOR Bank ASA to manage interest costs and the risk associated with changing interest rates related to the Company's 2007 Credit Facility, which were outstanding at December 31, 2010 and 2009. The total notional principal amount of the swaps at December 31, 2010 and 2009 is \$756,233 and the swaps have specified rates and durations.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The following table summarizes the interest rate swaps designated as cash flow hedges that are in place as of December 31, 2010 and 2009:

Interest Rate Swap Detail				December 31, 2010 Notional Amount Outstanding	December 31, 2009 Notional Amount Outstanding
Trade Date	Fixed Rate	Start Date of Swap	End date of Swap		
9/6/05	4.485%	9/14/05	7/29/15	\$ 106,233	\$ 106,233
3/29/06	5.25%	1/2/07	1/1/14	50,000	50,000
3/24/06	5.075%	1/2/08	1/2/13	50,000	50,000

2/11/09	2.45%	2/23/09	2/23/14	50,000	50,000
				\$ 756,233	\$ 756,233

F-31

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The differential to be paid or received for these swap agreements are recognized as an adjustment to interest expense as incurred. The Company is currently utilizing cash flow hedge accounting for these swaps whereby the effective portion of the change in value of the swaps is reflected as a component of AOCI. The ineffective portion is recognized as other expense, which is a component of other (expense) income.

The interest expense pertaining to the interest rate swaps for the years ended December 31, 2010, 2009 and 2008 was \$30,204, \$28,585 and 9,470, respectively.

The swap agreements, with effective dates prior to December 31, 2010, synthetically convert variable rate debt to fixed rate debt at the fixed interest rate of the swap plus the Applicable Margin, as defined in the 2007 Credit Facility section above in Note 9 Long-Term Debt.

The following table summarizes the derivative asset and liability balances at December 31, 2010 and 2009:

	Balance Sheet Location	Asset Derivatives		Liability Derivatives		
		December 31, 2010	Fair Value December 31, 2009	December 31, 2010	Fair Value December 31, 2009	December 31, 2009
<b>Derivatives designated as hedging instruments</b>						
Interest rate contracts	Fair value of derivative instruments (Current Assets)	\$	\$	Fair value of derivative instruments (Current Liabilities)	\$ 4,417	\$
Interest rate contracts	Fair value of derivative instruments (Noncurrent Assets)		2,108	Fair value of derivative instruments (Noncurrent Liabilities)	38,880	44,139
<b>Total derivatives designated as hedging instruments</b>		\$	\$ 2,108	\$ 43,297	\$	44,139
<b>Total Derivatives</b>		\$	\$ 2,108	\$ 43,297	\$	44,139

The following tables present the impact of derivative instruments and their location within the Consolidated Statement of Operations:

**The Effect of Derivative Instruments on the Consolidated Statement of Operations**

**For the Year Ended December 31, 2010**

Derivatives in Cash Flow Hedging	Amount of Gain (Loss)	Location of Gain (Loss)	Amount of Gain (Loss)	Location of Gain (Loss)	Amount of Gain (Loss)

**The Effect of Derivative Instruments on the Consolidated Statement of Operations****For the Year Ended December 31, 2009**

<b>Derivatives in Cash Flow Hedging Relationships</b>	<b>Amount of Gain (Loss) Recognized in AOCI on Derivative (Effective Portion) 2009</b>	<b>Location of Gain (Loss) Reclassified from AOCI into income (Effective Portion)</b>	<b>Amount of Gain (Loss) Reclassified from AOCI into income (Effective Portion) 2009</b>	<b>Location of Gain (Loss) Recognized in Income on Derivative (Ineffective Portion)</b>	<b>Amount of Gain (Loss) Recognized in Income on Derivative (Ineffective Portion) 2009</b>
Interest rate contracts	\$ (4,390)	Interest Expense	\$ (28,585)	Other Income (Expense)	\$ (288)

Hedge ineffectiveness associated with the interest rate swaps resulted in other (expense) income of \$98 for the year ended December 31, 2008.

At December 31, 2010, (\$27,516) of AOCI is expected to be reclassified into interest expense over the next 12 months associated with interest rate swaps.

The Company is required to provide collateral in the form of vessel assets to support the interest rate swap agreements, excluding vessel assets of Baltic Trading. At December 31, 2010, the Company's 35 vessels mortgaged under the 2007 Credit Facility served as collateral in the aggregate amount of \$100,000.

**12 ACCUMULATED OTHER COMPREHENSIVE (LOSS) INCOME**

The components of AOCI included in the accompanying consolidated balance sheets consist of net unrealized gain (loss) on cash flow hedges, and net unrealized gain (loss) from investments in Jinhui stock as of December 31, 2010 and 2009.

	<b>AOCI</b>	<b>Net Unrealized Gain (loss) on Cash Flow Hedges</b>	<b>Unrealized Gain (Loss) on Investments</b>

AOCI December 31, 2009	13,589	(41,819)	55,408
Change in unrealized gain on investments	(17,466)		(17,466)
Unrealized loss on cash flow hedges	(1,333)	(1,333)	
AOCI December 31, 2010	\$ (5,210)	\$ (43,152)	\$ 37,942

**13 - FAIR VALUE OF FINANCIAL INSTRUMENTS**

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The carrying values of the Company's financial instruments at December 31, 2010 and 2009 are noted below. All carrying values estimate the instrument's fair values with the exception of the 2010 Notes. The carrying value of the 2010 Notes does not include the conversion option and includes the accretion of interest since the inception of the 2010 Notes.

	<b>December 31, 2010</b>	<b>December 31, 2009</b>
Cash and cash equivalents	\$ 270,877	\$ 188,267
Restricted cash	9,000	17,500
Investments	54,714	72,181
Floating rate debt	1,643,939	1,327,000
2010 Notes	102,309	
Derivative instruments asset position		2,108
Derivative instruments liability position	43,297	44,139

F-33

---

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

The fair value of the investments is based on quoted market rates. The fair value of the floating rate debt under the 2007 Credit Facility, \$100 Million Term Loan Facility, \$253 Million Term Loan Facility and the 2010 Baltic Trading Credit Facility are estimated based on current rates offered to the Company for similar debt of the same remaining maturities. Additionally, the Company considers its creditworthiness in determining the fair value of the floating rate debt under the credit facilities. The carrying value approximates the fair market value for these floating rate loans. The fair value of the convertible senior notes payable represents the market value of the 2010 Notes at December 31, 2010 without bifurcating the value of the conversion option. The fair value of the interest rate swaps is the estimated amount the Company would receive to terminate the swap agreements at the reporting date, taking into account current interest rates and the creditworthiness of both the swap counterparty and the Company.

The Accounting Standards Codification subtopic 820-10, Fair Value Measurements & Disclosures (ASC 820-10), applies to all assets and liabilities that are being measured and reported on a fair value basis. This guidance enables the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. The guidance requires that assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

The following table summarizes the valuation of the Company's investments and financial instruments by the above pricing levels as of the valuation dates listed:

		<b>December 31, 2010</b>		
		<b>Total</b>	<b>Quoted market prices in active markets (Level 1)</b>	<b>Significant Other Observable Inputs (Level 2)</b>
Cash equivalents		\$	\$	\$
Investments		54,714	54,714	
2010 Notes		129,531		129,531
Derivative instruments liability position		43,297		43,297

		<b>December 31, 2009</b>		
		<b>Total</b>	<b>Quoted market prices in active markets (Level 1)</b>	<b>Significant Other Observable Inputs (Level 2)</b>
Cash equivalents		\$	\$	\$
Investments		75,057	75,057	
Derivative instruments asset position		72,181	72,181	
Derivative instruments liability position		2,108		2,108
Derivative instruments liability position		44,139		44,139

The Company had an investment of \$0 and \$75,057 in the JPMorgan US Dollar Liquidity Fund Institutional at December 31, 2010 and December 31, 2009, respectively. The JPMorgan US Dollar Liquidity Fund Institutional is a money market fund which invests its assets in high quality transferable short term USD-denominated fixed and floating rate debt securities and has a portfolio with a weighted average investment maturity not to exceed 60 days. The value of this fund is publicly available and is considered a Level 1 item. The Company holds an investment in the capital stock of Jinhui, which is classified as a long-term investment. The stock of Jinhui is publicly traded on the Oslo Stock Exchange and is considered a Level 1 item. The 2010 Notes are publicly traded in the over-the-counter market, however, they are not considered to be actively traded. As such, the 2010 Note has been classified as a Level 2 Item. The Company's interest rate derivative instruments are pay-fixed, receive-variable interest rate swaps based on LIBOR. The Company has elected to use the income approach to value the derivatives, using observable Level 2 market expectations at measurement date and standard valuation techniques to convert future amounts to a single present amount assuming that participants are motivated, but not compelled to transact. Level 2 inputs for the valuations are limited to quoted prices for similar assets or liabilities in active markets (specifically futures contracts on LIBOR for the first four years) and inputs other than quoted prices that are observable for the asset or liability (specifically LIBOR cash and swap rates and credit risk at commonly quoted intervals). Mid-market pricing is used as a practical expedient for fair value measurements. Refer to Note 11 Interest Rate Swap Agreements for further information regarding the Company's interest rate swap agreements. ASC 820-10 states that the fair value measurement of an asset or liability must reflect the nonperformance risk of the entity and the counterparty. Therefore, the impact of the counterparty's creditworthiness when in an asset position and the Company's creditworthiness when in a liability position have also been factored into the fair value measurement of the derivative instruments in an asset or liability position and did not have a material impact on the fair value of these derivative instruments. As of December 31, 2010, both the counterparty and the Company are expected to continue to perform under the contractual terms of the instruments.

#### 14 - PREPAID EXPENSES AND OTHER CURRENT ASSETS

Prepaid expenses and other current assets consist of the following:

	<b>December 31, 2010</b>	<b>December 31, 2009</b>
Lubricant inventory and other stores	\$ 7,445	\$ 3,971
Prepaid items	4,693	3,086
Insurance Receivable	1,257	1,408
Other	615	1,719
<b>Total</b>	<b>\$ 14,010</b>	<b>\$ 10,184</b>

#### 15 OTHER ASSETS, NET

Other assets consist of the following:

(i) Deferred financing costs, which include fees, commissions and legal expenses associated with securing loan facilities and other debt offerings. These costs are amortized over the life of the related debt and are included in interest expense. As of December 31, 2010, the Company has deferred financing fees associated with the 2007 Credit Facility, the \$100 Million Term Loan Facility, the \$253 Million Term Loan Facility, the debt portion of the 2010 Notes and the 2010 Baltic Trading Credit Facility. (Refer to Note 9 Long-Term Debt and Note 10 Convertible Senior Notes) As of December 31, 2009, there were deferred financing fees associated only with the 2007 Credit Facility as the other loan facilities and debt offerings occurred during the year ended December 31, 2010.

Total net deferred financing costs consist of the following as of December 31, 2010 and 2009:

	December 31, 2010	December 31, 2009
2007 Credit Facility	\$ 10,074	\$ 10,079
\$100 Million Term Loan Facility	1,318	
\$253 Million Term Loan Facility	3,529	
2010 Notes	3,637	
2010 Baltic Trading Credit Facility	2,940	
Total deferred financing costs	21,498	10,079
Less: accumulated amortization	4,561	2,585
Total	\$ 16,937	\$ 7,494

During the fourth quarter of 2008, the cancellation of the 2008 Term Facility resulted in a write-off of the unamortized deferred financing costs of \$2,191 to interest expense. Additionally, during the fourth quarter of 2008, the refinancing of the 2007 Credit Facility due to the 2009 Amendment resulted in a write-off of a portion of the unamortized deferred financing costs of \$1,921 to interest expense. There were no write-offs of deferred financing fees during the years ended December 31, 2010 and 2009.

(ii) Deferred registration costs, which includes costs associated with preparing Baltic Trading for a public offering. These costs, which existed as of December 31, 2009, were offset against proceeds received from the initial public offering, which was completed on March 15, 2010. The Company has deferred registration costs of \$0 and \$834 at December 31, 2010 and 2009, respectively.

#### 16 - FIXED ASSETS

Fixed assets consist of the following:

	December 31, 2010	December 31, 2009
Fixed assets:		
Vessel equipment	\$ 2,386	\$ 2,118
Leasehold improvements	1,146	1,146
Furniture and fixtures	347	347
Computer equipment	472	401
Total cost	4,351	4,012
Less: accumulated depreciation and amortization	2,041	1,554
Total	\$ 2,310	\$ 2,458

#### 17 ACCOUNTS PAYABLE AND ACCRUED EXPENSES

Accounts payable and accrued expenses consist of the following:

December 31, 2010	December 31, 2009
----------------------	----------------------

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Accounts payable	\$	6,454	\$	3,171
Accrued general and administrative expenses		14,166		8,409
Accrued vessel operating expenses		11,170		7,029
Total	\$	31,790	\$	18,609

F-36

---

18 - REVENUE FROM TIME CHARTERS

Total voyage revenue earned on time charters, including revenue earned in vessel pools and spot market-related time charters, for the years ended December 31, 2010, 2009 and 2008 was \$447,438, \$379,531, and \$405,370 respectively. Included in revenue for the year ended December 31, 2009 is \$442 received from loss of hire insurance associated with unscheduled off-hire associated with the Genco Hunter. Included in revenues for the year ended December 31, 2008 is \$176 and \$1,248 received from loss of hire insurance associated with unscheduled off-hire associated with the Genco Trader and Genco Hunter, respectively. Additionally, included in revenues for the years ended December 31, 2010, 2009 and 2008 was \$574, \$2,600 and \$22,829 of profit sharing revenue. At December 31, 2010, future minimum time charter revenue, based on vessels committed to noncancelable time charter contracts as of January 25, 2011 is expected to be \$173,332 during 2011, \$49,881 during 2012 and \$1,674 during 2013, assuming off-hire due to any scheduled drydocking and that no additional off-hire time is incurred. For most drydockings, the Company assumes 20 days of offhire. Additionally, future minimum revenue excludes revenue earned for the five vessels currently in pool arrangements, namely the Genco Explorer, Genco Pioneer, Genco Progress, Genco Reliance and Genco Sugar, as pool rates cannot be estimated. Additionally, future minimum revenue excludes revenue to be earned for the Company's vessels that are or will be on spot market-related time charters, as spot rates cannot be estimated, namely the nine Baltic Trading vessels as well as Genco Augustus, Genco Auvergne, Genco Brittany, Genco Challenger, Genco Charger, Genco Knight, Genco Languedoc, Genco Leader, Genco Maximus, Genco Picardy, Genco Success, Genco Surprise, Genco Thunder, Genco Vigour, and Genco Warrior.

19 - COMMITMENTS AND CONTINGENCIES

In September 2005, the Company entered into a 15-year lease for office space in New York, New York. The monthly rental is as follows: Free rent from September 1, 2005 to July 31, 2006, \$40 per month from August 1, 2006 to August 31, 2010, \$43 per month from September 1, 2010 to August 31, 2015, and \$46 per month from September 1, 2015 to August 31, 2020. The monthly straight-line rental expense from September 1, 2005 to August 31, 2020 is \$39. As a result of the straight-line rent calculation generated by the free rent period and the tenant work credit, the Company has a deferred rent credit at December 31, 2010 and 2009 of \$657 and \$687, respectively. The Company has the option to extend the lease for a period of five years from September 1, 2020 to August 31, 2025. The rent for the renewal period will be based on the prevailing market rate for the six months prior to the commencement date of the extension term. Rent expense was \$467 for each of the years ended December 31, 2010, 2009 and 2008.

Future minimum rental payments on the above lease for the next five years and thereafter are as follows: \$518 for 2011 through 2014, \$529 for 2015 and a total of \$2,568 for the remaining term of the lease.

During the beginning of 2009, the Genco Cavalier, a 2007-built Supramax vessel, was on charter to Samsun when Samsun filed for the equivalent of bankruptcy protection in South Korea, otherwise referred to as a rehabilitation application. On February 5, 2010, the rehabilitation plan submitted by Samsun was approved by the South Korean courts. As part of the rehabilitation process, the Company's claim of \$17,212 will be settled in the following manner; 34%, or \$5,852, will be paid in cash in annual installments on December 30th of each year from 2010 through 2019 ranging in percentages from eight to 17; the remaining 66%, or \$11,360, was converted to Samsun shares at a specified value per share. On December 30, 2010, a total payment was due from Samsun in the amount of \$585 which represents ten percent of the total \$5,852 approved cash settlement. This amount has been recorded as other operating income.

20 - SAVINGS PLAN

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

In August 2005, the Company established a 401(k) plan which is available to full-time employees who meet the plan's eligibility requirements. This 401(k) plan is a defined contribution plan, which permits employees to make contributions up to maximum percentage and dollar limits allowable by IRS Code Sections 401(k), 402(g), 404 and 415 with the Company matching up to the first six percent of each employee's salary on a dollar-for-dollar basis. The matching contribution vests immediately. For the years ended December 31, 2010, 2009 and 2008, the Company's matching contributions to this plan were \$242, \$177 and \$166, respectively.

### 21- NONVESTED STOCK AWARDS

On July 12, 2005, the Company's Board of Directors approved the Genco Shipping and Trading Limited 2005 Equity Incentive Plan (the "GS&T Plan"). Under this plan, the Company's Board of Directors, the compensation committee, or another designated committee of the Board of Directors may grant a variety of stock-based incentive

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

awards to employees, directors and consultants who the compensation committee (or other committee or the Board of Directors) believes are key to the Company's success. Awards may consist of incentive stock options, nonqualified stock options, stock appreciation rights, dividend equivalent rights, nonvested stock, unrestricted stock and performance shares. The aggregate number of shares of common stock available for award under the GS&T Plan is 2,000,000 shares.

Grants of nonvested common stock to executives and employees vest ratably on each of the four anniversaries of the determined vesting date. Grants of nonvested common stock to directors vest the earlier of the first anniversary of the grant date or the date of the next annual shareholders' meeting, which are typically held during May. Grants of nonvested common stock to the Company's Chairman, Peter C. Georgiopoulos, that are not granted as part of grants made to all directors, excluding the grant made on December 21, 2010, vest ratably on each of the ten anniversaries of the vesting date.

The table below summarizes the Company's nonvested stock awards for the three years ended December 31, 2010 under the GS&T Plan:

	2010		Year Ended December 31, 2009		2008	
	Number of Shares	Weighted Average Grant Date Price	Number of Shares	Weighted Average Grant Date Price	Number of Shares	Weighted Average Grant Date Price
Outstanding at January 1	437,000	\$ 25.86	449,066	\$ 27.96	231,881	\$ 34.32
Granted	514,650	16.07	133,250	22.68	322,500	25.34
Vested	(142,563)	27.16	(145,316)	29.42	(105,316)	33.93
Forfeited						
Outstanding at December 31	809,087	\$ 19.40	437,000	\$ 25.86	449,066	\$ 27.96

The total fair value of shares that vested under the GS&T Plan during the years ended December 31, 2010, 2009 and 2008 was \$2,414, \$3,467 and \$3,614, respectively.

For the years ended December 31, 2010, 2009 and 2008, the Company recognized nonvested stock amortization expense for the GS&T Plan, which is included in general, administrative and management fees, as follows:

	Year Ended December 31,		
	2010	2009	2008
General, administrative and management fees	\$ 4,327	\$ 4,220	\$ 5,953

The fair value of nonvested stock at the grant date is equal to the closing stock price on that date. The Company is amortizing these grants over the applicable vesting periods, net of anticipated forfeitures. As of December 31, 2010, unrecognized compensation cost of \$11,252 related to nonvested stock will be recognized over a weighted average period of 4.44 years.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

On March 3, 2010, Baltic Trading's Board of Directors approved the Baltic Trading Limited 2010 Equity Incentive Plan (the "Baltic Trading Plan"). Under the Baltic Trading Plan, Baltic Trading Board of Directors, the compensation committee, or another designated committee of the Board of Directors may grant a variety of stock-based incentive awards to officers, directors, and executive, managerial, administrative and professional employees of and consultants to Baltic Trading or the Company whom the compensation committee (or other committee of the Board of Directors) believes are key to Baltic Trading's success. Awards may consist of restricted stock, restricted stock units, stock options, stock appreciation rights and other stock or cash-based awards. The aggregate number of shares of common stock available for award under the Baltic Trading Plan is 2,000,000 common shares.

Grants of restricted stock to Peter Georgiopoulos, Chairman of the Board of Baltic Trading, and John

Wobensmith, President and Chief Financial Officer of Baltic Trading, made in connection with Baltic Trading's IPO vest ratably on each of the first four anniversaries of March 15, 2010. Grants of restricted common stock to Baltic Trading's directors made following Baltic Trading's IPO (which exclude the foregoing grant to Mr. Georgiopoulos) vest the earlier of the first anniversary of the grant date or the date of Baltic Trading's next annual shareholders' meeting, which is expected to be held in May 2011. Grants of restricted stock made to executives and the Chairman of the Board not in connection with the Company's IPO vest ratably on each of the first four anniversaries of the determined vesting date.

The following table presents a summary of Baltic Trading's nonvested stock awards for the year ended December 31, 2010 under the Baltic Trading Plan:

	Number of Baltic Trading Common Shares		Weighted Average Grant Date Price
Outstanding at January 1, 2010		\$	
Granted	583,500		13.40
Vested			
Forfeited			
Outstanding at December 31, 2010	583,500	\$	13.40

No shares under the Baltic Trading Plan vested during the year ended December 31, 2010.

For the year ended December 31, 2010, the Company recognized nonvested stock amortization expense for the Baltic Trading Plan, which is included in general, administrative and management fees, in the amount of \$2,892.

The Company is amortizing Baltic Trading's grants over the applicable vesting periods, net of anticipated forfeitures. As of December 31, 2010, unrecognized compensation cost of \$4,926 related to nonvested stock will be recognized over a weighted average period of 3.26 years.

## 22 SHARE REPURCHASE PROGRAM

On February 13, 2008, the Company's Board of Directors approved a share repurchase program for up to a total of \$50,000 of the Company's common stock. Share repurchases will be made from time to time for cash in open market transactions at prevailing market prices or in privately negotiated transactions. The timing and amount of purchases under the program will be determined by management based upon market conditions and other factors. Purchases may be made pursuant to a program adopted under Rule 10b5-1 under the Securities Exchange Act. The program does not require the Company to purchase any specific number or amount of shares and may be suspended or reinstated at any time in the Company's discretion and without notice. Repurchases will be subject to restrictions under the 2007 Credit Facility. The 2007 Credit Facility was amended as of February 13, 2008 to permit the share repurchase program and provide that the dollar amount of shares repurchased is counted toward the maximum dollar amount of dividends that may be paid in any fiscal quarter. Subsequently, on January 26, 2009, the Company entered into the 2009 Amendment which amended the 2007 Credit Facility to require the Company to suspend all share repurchases until the Company can represent that it is in a position to again satisfy the collateral maintenance covenant. Refer to Note 9 Long-Term Debt.

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

Since the inception of the share repurchase program through December 31, 2010, the Company repurchased and retired 278,300 shares of its common stock for \$11,500. An additional 3,130 shares of common stock were repurchased from employees for \$41 during 2008 pursuant to the Company's Equity Incentive Plan rather than the share repurchase program. No share repurchases were made during the years ended December 31, 2010 and 2009.

---

23 - LEGAL PROCEEDINGS

From time to time the Company may be subject to legal proceedings and claims in the ordinary course of its business, principally personal injury and property casualty claims. Such claims, even if lacking merit, could result in the expenditure of significant financial and managerial resources. The Company is not aware of any legal proceedings or claims that it believes will have, individually or in the aggregate, a material adverse effect on the Company, its financial condition, results of operations or cash flows.

24 UNAUDITED QUARTERLY RESULTS OF OPERATIONS

In the opinion of the Company's management, all adjustments, consisting of normal recurring accruals considered necessary for a fair presentation have been included on a quarterly basis.

	2010 Quarter Ended				2009 Quarter Ended			
	Mar 31	Jun 30	Sept 30	Dec. 31	Mar 31	Jun 30	Sept 30	Dec. 31
	(In thousands, except per share amounts)

25 - SUBSEQUENT EVENTS

On February 17, 2011, Baltic Trading Limited declared a dividend of \$0.17 per share to be paid on or about March 14, 2011 to shareholders of record as of March 7, 2011. The aggregate amount of the dividend is expected to be approximately \$3.8 million, of which approximately \$2.9 million will be paid to minority shareholders, which Baltic Trading anticipates will be funded from cash on hand at the time payment is to be made.

During January 2011, the Genco Success, a 1997-built Handymax vessel, was on charter to Korea Line Corporation ( KLC ) when KLC filed for the equivalency of bankruptcy protection in South Korea, otherwise referred to as a rehabilitation application. At December 31, 2010, the Company has limited exposure as a result of the bankruptcy protection filing by KLC. The vessel was redelivered to the Company by KLC on January 29, 2011. The Company estimates that it has a claim of approximately \$1.1 million against KLC related primarily to unpaid revenue earned in 2011 prior to re-delivery of the vessel. If a rehabilitation plan is approved by the South Korean courts and it is determined that the Company will receive a cash settlement for its outstanding claim, any amounts due from KLC will be recorded once the collectability of the receivable has been assessed and the amount has been deemed collectible.

**ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

No changes were made to, nor was there any disagreement with the Company's independent registered public accounting firm regarding, the Company's accounting or financial disclosure.

**ITEM 9A. CONTROLS AND PROCEDURES**

**EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES**

Under the supervision and with the participation of our management, including our President and our Chief Financial Officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15 of the Securities Exchange Act of 1934 as of the end of the period covered by this Report. Based upon that evaluation, our President and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective.

**INTERNAL CONTROL OVER FINANCIAL REPORTING**

**MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Our management is responsible for establishing and maintaining effective internal control over financial reporting. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Our internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
  
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and

## Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become ineffective because of changes in conditions, or that the degree or compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on our

assessment and those criteria, our management believes that we maintained effective internal control over financial reporting as of December 31, 2010.

Our independent registered public accounting firm, Deloitte & Touche LLP, has issued an attestation report on the Company's internal control over financial reporting. The attestation report is included on page 73 of this report.

#### **CHANGES IN INTERNAL CONTROLS**

There have been no changes in our internal controls or over financial reporting that occurred during our most recent fiscal quarter (the fourth fiscal quarter of 2010) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Stockholders of

Genco Shipping & Trading Limited

New York, New York

We have audited the internal control over financial reporting of Genco Shipping & Trading Limited and subsidiaries (the Company) as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-K

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2010 of the Company and our report dated March 9, 2011 expressed an unqualified opinion on those financial statements.
