SECURITIES AND EXCHANGE COMMISSION**
Washington, D. C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

for the quarterly period ended June 30, 2004

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

for the transition period from _____ to _____

Commission File Number 0-13143

Innovex, Inc.

(Exact name of registrant as specified in its charter)

Minnesota

(State or other jurisdiction of incorporation or organization)

41-1223933

(IRS Employer Identification No.)

5540 Pioneer Creek Drive, Maple Plain, MN 55359

(Address of principal executive offices)

(763) 479-5300

(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practical date: As of July 30, 2004, 19,079,487 shares of the registrant's common stock, \$.04 par value per share, were outstanding.

Principal payments on long-term debt	(5,074,212)	(7,228,516)
Issuance of long-term debt	9,867,139	
Net activity on line of credit		10,815,392
Proceeds from exercise of stock options	932,615	360,390
Net cash provided by (used in) financing activities	5,725,542	3,947,266
Increase (decrease) in cash and equivalents	53,406	1,443,906
Cash and equivalents at beginning of period	21,606,761	2,364,136
Cash and equivalents at end of period	\$ 21,660,167	\$ 3,808,042

SUPPLEMENTAL DISCLOSURES OF CASH FLOW INFORMATION:

Cash paid for interest was \$641,000 and \$1,744,000 in the nine months ended June 30, 2004 and 2003.

Cash paid for income taxes was \$44,000 and \$6,000 in the nine months ended June 30, 2004 and 2003.

See accompanying notes to condensed consolidated financial statements.

INNOVEX INC. AND SUBSIDIARIES**Notes to Condensed Consolidated Financial Statements****NOTE 1 FINANCIAL INFORMATION**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the instructions on Form 10-Q and do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. The unaudited condensed consolidated financial statements include the accounts of Innovex, Inc. and its subsidiaries (the Company) after elimination of all significant intercompany transactions and accounts. In the opinion of management, all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of operating results have been made. Operating results for interim periods are not necessarily indicative of results that may be expected for the year as a whole. The Company utilizes a fiscal year that ends on the Saturday nearest to September 30. For clarity of presentation, the Company has described all periods as if they end at the end of the calendar quarter. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. For further information, refer to the consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended September 30, 2003.

Preparation of the Company's condensed consolidated financial statements requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and related revenues and expenses. Actual results could differ from these estimates.

NOTE 2 RESTRUCTURING CHARGES

During the third quarter of fiscal 2004, the Company recorded asset impairment and restructuring charges of \$13,109,000 and \$714,000 related to the planned closure of the Maple Plain facility and the plan to discontinue the support of the FSA attachment process. The assets that were impaired included the Maple Plain facility and related equipment and equipment used in the FSA attachment process. The fair value of these assets was determined using quoted market prices where available, appraised values or estimated future cash flows where more definitive values were not available.

In order to reduce its cost structure, the Company plans to close its Maple Plain facility and consolidate its operations with its Lamphun, Thailand and Litchfield, Minnesota facilities. In addition, the Company plans to discontinue supporting the FSA attachment process in order to utilize its resources in other areas with higher expected returns. Excluding asset impairment charges, restructuring charges are expected to be approximately \$7 million. The \$7 million is expected to be comprised of \$1.6 million for one-time termination benefits, \$0.4 million for contract termination costs and \$5 million for other moving and closing costs associated with the consolidation of the Maple Plain location with the Company's other locations. Restructuring charges of \$714,000 were recorded in the third quarter of fiscal 2004. These charges were comprised of \$310,000 for one-time termination benefits and \$404,000 related to contract termination costs. The remaining charges are expected to be incurred in the fiscal 2004 fourth quarter and fiscal 2005.

(in thousands)	Manufacturing Operations Restructuring		Total
	Other Associated Costs	Employee Termination Benefits	
Accrual at October 1, 2003	\$	\$	\$
Restructuring charges		310	310
Payments		(49)	(49)
Accrual at June 30, 2004	\$	\$ 261	\$ 261

During fiscal 2001, the Company recorded asset impairment and restructuring charges related to the restructuring of the Company's manufacturing operations. The restructuring was primarily related to moving manufacturing operations from the Company's Chandler, Arizona facility to the Company's Minnesota and Thailand locations.

During fiscal 2002 and the fiscal 2003 first quarter, additional restructuring charges of \$876,000 and \$750,000, respectively, were recorded due to an increase in the estimate of the leased Chandler facility disposition costs. As of March 31, 2003, the restructuring was substantially complete.

NOTE 3 NET INCOME (LOSS) PER SHARE

The Company's basic net income (loss) per share is computed by dividing net income (loss) by the weighted average number of outstanding common shares. The Company's diluted net income (loss) per share is computed by dividing net income (loss) by the weighted average number of outstanding common shares and common share equivalents relating to stock options when dilutive. Options to purchase 1,274,376 and 962,985 shares of common stock with weighted average exercise prices of \$11.06 and \$12.05 were outstanding during the three and nine month periods ending June 30, 2004, but were excluded from the computation of common share equivalents because they were not dilutive. Options to purchase 721,100 and 1,049,917 shares of common stock with weighted average exercise prices of \$14.24 and \$11.87 were outstanding during the three and nine month periods ending June 30, 2003, but were excluded from the computation of common share equivalents because they were not dilutive.

The Company uses the intrinsic value method for valuing stock options granted. Had the fair value method been applied, the Company's compensation expense would have been different. The following table illustrates the effect on the net loss and net loss per share if the Company had applied the fair value method to stock-based compensation for the following three and nine months ended:

	Three months ended June 30,		Nine months ended June 30,	
	2004	2003	2004	2003
Net loss as reported	\$ (16,877,000)	\$ (55,000)	\$ (15,146,000)	\$ (3,718,000)
Less total stock-based employee compensation expense determined under the fair value based method for all awards, net of tax effects	(202,000)	(176,000)	(498,000)	(532,000)
Net loss- pro forma	\$ (17,079,000)	\$ (231,000)	\$ (15,644,000)	\$ (4,250,000)
Basic and diluted net loss per common share - as reported	\$ (0.88)	\$ (0.00)	\$ (0.80)	\$ (0.25)
Basic and diluted net loss per common share pro forma	\$ (0.90)	\$ (0.02)	\$ (0.82)	\$ (0.28)

The weighted average fair value of options granted in 2004 and 2003 was \$4.04 and \$1.52, respectively. The weighted average fair value was computed by applying the following weighted average assumptions to the Black-Scholes options pricing model: average volatility of 57% and 66%; dividends yields of 0.0%; average risk-free rate of return of 3.1% and 2.6%; and an average term of 4.5 years for 2004 and 2003, respectively. No adjustment was made to the Black Scholes calculation to reflect that the options are not freely traded.

NOTE 4 INVENTORIES

Inventories are comprised of the following (in thousands):

	June 30, 2004	September 30, 2003
Raw materials and purchased parts	\$ 4,187	\$ 4,361
Work-in-process and finished goods	6,403	4,274
	\$ 10,590	\$ 8,635

NOTE 5 DERIVATIVE INSTRUMENTS

The Company enters into forward exchange contracts that are recorded at fair value, with related fair value gains or losses recorded in income within the caption net other (income) expense. Generally, these contracts have maturities of six months or less. These contracts are entered into to offset the gains or losses on foreign currency denominated assets and liabilities. The Company does not enter into forward exchange contracts for trading purposes and the

contracts are not designated as hedges. At June 30, 2004, the Company had open forward exchange contracts to buy Thailand baht maturing July 16, 2004 and September 14, 2004 with notional amounts of 50,000,000 baht and 350,000,000 baht. The total open contracts for 400,000,000 baht equates to approximately \$9.9 million.

NOTE 6 REVENUE RECOGNITION

Innovex makes electronic components (flexible circuits) based on customer specifications. The Company's revenue recognition policy is consistently applied regardless of sales channels utilized and product destination. The Company has an implied warranty that the products meet the customer's specification. Credits only are issued for customer returns. Revenue from product sales is recognized when persuasive evidence of an arrangement exists, the product has been delivered, the fee is fixed and determinable and collection of the resulting receivable is reasonably assured.

For all sales, a binding purchase order is used as evidence of an arrangement. The Company also stores inventory in warehouses (JIT hubs - third party owned warehouses) that are located close to the customer's manufacturing facilities. Revenue is recognized on sales from JIT hubs upon the transfer of title and risk of loss which follows the customer's acknowledgement of the receipt of the goods.

NOTE 7 INCOME TAXES

The Company records income taxes in accordance with the liability method of accounting. Deferred taxes are provided for temporary differences between the financial reporting and tax bases of assets and liabilities. A valuation allowance is set up where the realization of a deferred tax becomes less likely than not to occur. The valuation allowance is analyzed periodically by the Company and may result in income tax expense different than statutory rates.

NOTE 8 RECLASSIFICATIONS

Certain 2003 amounts have been reclassified to conform to the 2004 presentation. These reclassifications had no effect on net income (loss) or stockholders' equity as previously reported.

PART I: ITEM 2:

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

You should read the following discussion of our financial condition and results of operations in conjunction with the consolidated financial statements and notes to those statements included in this report. This discussion may contain forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those described under the heading "Risks Related to Our Business" in our Annual Report on Form 10-K for the year ended September 30, 2003, as well as others not now anticipated.

We utilize a fiscal year that ends on the Saturday nearest to September 30. For clarity of presentation, we have described all periods as if they end at the end of the calendar quarter. The first quarter of fiscal 2004 included 14 weeks while all remaining quarters of fiscal 2004 and all fiscal 2003 quarters include 13 weeks.

Overview

We are a leading worldwide provider of flexible circuit interconnect solutions to OEMs in the electronics industry. We offer a full range of customized flexible circuit applications and services from initial design, development and prototype to fabrication, assembly and test on a global basis. We target high-volume markets where miniaturization, form and weight are driving factors and flexible circuits are an enabling technology. Applications for flexible circuits currently addressed by us include data storage devices such as hard disk drives, liquid crystal displays (LCDs) for mobile communication devices, tape drives and arrays, flat panel displays and printers. Our customers include 3M, Dell, Hitachi, HP, Maxtor, Medtronic, Philips, Quantum, SAE Magnetics (a subsidiary of TDK), Samsung, Seagate, Staktek, StorageTek, Xerox and other leading electronic OEMs.

Net Sales and Revenue Recognition

We manufacture flexible circuits and perform certain additional assembly and test functions on these flexible circuits based on customer specifications. We sell our products directly throughout the world, primarily in North America, Europe and the Pacific Rim countries. We use non-exclusive sales representatives to augment our direct sales efforts. We recognize revenue from the sale of our products upon shipment or delivery of our product to our customers, depending on the customer agreement or shipping terms. We store some inventory in third party owned warehouses that are located close to customers' manufacturing facilities. Sales from third party warehouses are recognized upon the transfer of title and risk of loss which follows the customer's acknowledgment of the receipt of the goods.

Costs and Expenses

Cost of sales consists primarily of:

- material costs for raw materials and semi-finished components used for assembly of our products;
- labor costs directly related to manufacture, assembly and inspection of our products;
- costs of general utilities, production supplies and chemicals consumed in the manufacturing processes;
- costs related to the maintenance of our manufacturing equipment and facilities;
- costs related to material and product handling and shipment;
- depreciation costs related to facilities, machinery and equipment used to manufacture, assemble and inspect our products; and
- salaries and overhead attributed to our supply chain, process engineering and manufacturing personnel.

Selling, general and administrative expenses primarily consist of:

- salaries and related selling (commissions, travel, business development and program management), administrative, finance, human resources, regulatory, information services and executive personnel expenses;
- other significant expenses related to external accounting, software maintenance and legal and regulatory fees; and
- overhead attributed to our selling, general and administrative personnel.

Engineering expenses include costs associated with the design, development and testing of our products and processes. These costs consist primarily of:

- salaries and related development personnel expenses;
- overhead attributed to our development and test engineering personnel; and
- prototyping costs related to the development of new products.

Restructuring charges are those costs primarily related to manufacturing facility closures, severance and product discontinuations. In the third quarter of fiscal 2004, we recorded asset impairments and restructuring charges related to the planned closure of our Maple Plain, Minnesota facility and the plan to discontinue the support of the FSA attachment process once all current program qualifications have reached their end of life. In fiscal 2001, we recorded restructuring charges related to closing our Chandler, Arizona facility and transferring manufacturing operations to our Minnesota and Thailand locations. Because we initially underestimated the costs relating to this restructuring, we recorded additional restructuring charges in fiscal 2002 and 2003. We believe that the restructuring related to the closing of the Chandler facility has been substantially completed as of March 31, 2003.

Results of Operations

The following table sets forth certain operating data as a percentage of net sales for the periods indicated:

	For the Three months Ended June 30,		For the Nine Months Ended June 30,	
	2004	2003	2004	2003
Net Sales	100%	100%	100%	100%
Cost of goods sold	97.4	85.3	87.2	87.8
Gross profit	2.6	14.7	12.8	12.2
Operating expenses:				
Selling, general and administrative	13.8	10.6	11.9	12.2
Engineering	4.4	4.1	4.2	4.3
Restructuring	39.2		11.6	0.7
Total operating expenses	57.4	14.7	27.7	17.2
Income (loss) from operations	(54.8)		(14.9)	(5.0)
Interest and other expense, net	0.1	(1.4)	(0.0)	(1.5)
Income (loss) before provision (benefit) for income taxes	(54.7)	(1.4)	(14.9)	(6.5)
Provision (benefit) for income taxes	(6.8)	1.3	(2.2)	3.2
Net income (loss)	(47.9)%	(0.1)%	(12.7)%	(3.3)%

Comparison of Three Months Ended June 30, 2004 and 2003**Net Sales**

Our net sales were \$35.2 million for the three months ended June 30, 2004, compared to \$39.9 million for the three months ended June 30, 2003, a decrease of 12%. This decrease was due to lower volume of sales generated by flex suspension assembly (FSA), flat panel display (FPD) and stacked memory product lines. The decreased FSA sales were related to disk drive industry softness as compared to fiscal 2003. The lower level of FPD sales in the fiscal 2004 third quarter was due to our largest FPD program beginning to ramp down while the ramp up of new FPD program qualifications was delayed. Revenue from our stacked memory applications decreased as our stacked memory customers held excess inventory at the beginning of the fiscal 2004 third quarter and experienced component shortages during the quarter which reduced their build plans.

FSA sales to the disk drive industry generated 67% of our net sales for the three months ended June 30, 2004, compared to 63% for the three months ended June 30, 2003. Sales of AFC s to the disk drive industry were 17%, compared to 14%, sales from stacked memory applications were 5%, compared to 6%, display application net sales were 4% versus 6%, network system application sales were 4% compared to 5% and sales from other industry applications were 3% for the three months ended June 30, 2004 compared to 6% for the three months ended June 30, 2003, respectively.

Gross Profit

Our gross profit was \$920,000 for the three months ended June 30, 2004, compared to \$5.9 million for the three months ended June 30, 2003, a decrease of 84%. Our gross margin for the three months ended June 30, 2004 decreased to 3%, compared to 15% for the three months ended June 30, 2003. The decrease in gross margin was primarily due to lower net sales decreasing fixed cost leverage and a higher level of fixed costs in place to meet the expected higher levels of AFC, stacked memory and FPD product revenue. This was compounded by our decision to reduce inventory by limiting production in the third quarter of fiscal 2004. We anticipate that gross margins for the remainder of fiscal 2004 will improve as new programs begin to increase revenue levels.

Selling, General and Administrative

Selling, general and administrative expenses for the three months ended June 30, 2004 were \$4.9 million, compared to \$4.2 million in the three months ended June 30, 2003. As a percentage of net sales, selling, general and administrative expenses were 14% for the three months ended June 30, 2004, up from 11% for the same period in the prior year. The dollar increase in selling, general and administrative expenses from the prior year is primarily due to higher payroll expenses, payments made to resolve Thailand customs issues and consulting expenses related to Sarbanes Oxley compliance. The increase in fiscal 2004 as a percent of net sales was primarily due to the spending increases compounded by a decrease in fiscal 2004 net sales. Selling, general and administrative expenses for the remainder of fiscal 2004 are expected to decrease as a percentage of net sales due to anticipated increased sales.

Engineering

Engineering expenses for the three months ended June 30, 2004 were \$1.5 million, compared to \$1.6 million for the three months ended June 30, 2003, a decrease of 5%. The decrease in fiscal 2004 engineering expenses was primarily due to higher environmental compliance costs in the third quarter of fiscal 2003. As a percentage of net sales, engineering expenses were 4% of sales for the three months ended June 30, 2004, unchanged as compared to the same period in the prior year.

Restructuring

During the third quarter of fiscal 2004, we recorded asset impairment and restructuring charges of \$13.1 million and \$0.7 million related to the planned closure of the Maple Plain facility and the plan to discontinue the support of the FSA attachment process. The assets that were impaired included the Maple Plain facility and related equipment and equipment used in the FSA attachment process. In order to reduce our cost structure, we plan to close our Maple Plain facility and consolidate its operations with our Lamphun, Thailand and Litchfield, Minnesota facilities. In addition, we plan to discontinue supporting the FSA attachment process in order to utilize our resources in other areas with higher expected returns. Excluding asset impairment charges, restructuring charges are expected to be up to \$7 million. The \$7 million is expected to be comprised of \$1.6 million for one-time termination benefits, \$0.4 million for contract termination costs and \$5 million for other moving and closing costs associated with the consolidation of the Maple Plain location with the Company's other locations. Restructuring charges of \$714,000 were recorded in the third quarter of fiscal 2004. These charges were comprised of \$310,000 for one-time termination benefits and \$404,000 related to contract termination costs. The remaining charges are expected to be incurred in the fiscal 2004 fourth quarter and fiscal 2005.

Net Interest and Other Expense

Net interest expense was \$0.2 million for the three months ended June 30, 2004, compared to \$0.5 million reported for the three months ended June 30, 2003. The decrease is due to a portion of the proceeds from a secondary public offering of the Company's common stock in the fourth quarter of fiscal 2003 being used to reduce the level of outstanding debt. Net other income was \$0.2 million in the three months ended June 30, 2004 as compared to net other expense of \$21,000 in the three months ended June 30, 2003. The change was the result of foreign currency exchange gains being incurred in fiscal 2004 while foreign currency losses were incurred in fiscal 2003.

Income Taxes

Income tax benefit for the three months ended June 30, 2004 was \$2.4 million, compared to \$0.5 million for the three months ended June 30, 2003. The tax benefit for the nine months ended June 30, 2004 was calculated at a rate lower than the statutory federal rate primarily due to the exclusion of income generated from our foreign operating corporation and the exclusion of restructuring charges. We have determined that it is more likely than not that we will be able to utilize the tax benefit carried on our balance sheet in the future.

Comparison of Nine Months Ended June 30, 2004 and 2003

Net Sales

Our net sales were \$118.9 million for the nine months ended June 30, 2004, compared to \$111.5 million for the nine months ended June 30, 2003, an increase of 7%. This increase was due to higher sales generated by Flex Suspension Assembly (FSA), actuator flex circuit (AFC), flat panel display (FPD) and stacked memory product lines. The increased FSA sales in fiscal 2004 were related to improved market share as our largest customer in the disk drive industry transitioned to the 80 gigabyte (GB) per platter technology platform. The increased AFC sales were related to our market share improvement at one of our larger customers. The FPD sales improvement was due to strong demand earlier in fiscal 2004 for the mobile phone product using our initial FPD flexible circuit. Revenue from our stacked memory applications also increased as our stacked memory customers experienced higher demand earlier in fiscal 2004.

FSA sales from the disk drive industry generated 57% of our net sales for the nine months ended June 30, 2004, compared to 59% for the nine months ended June 30, 2003. Sales of AFC s to the disk drive industry were 21% compared to 17%, stacked memory application sales were 9%, compared to 7%, display application net sales were 6% versus 5%, network system application sales were 4% compared to 6% and sales from other industry applications were 3% for the nine months ended June 30, 2004 compared to 6% for the nine months ended June 30, 2003, respectively. We expect FSA sales to decrease as a percentage of our net sales for the last quarter of fiscal 2004.

Gross Profit

Our gross profit was \$15.2 million for the nine months ended June 30, 2004, compared to \$13.6 million for the nine months ended June 30, 2003, an increase of 12%. Our gross margin for the nine months ended June 30, 2004 increased to 13%, compared to 12% for the nine months ended June 30, 2003. The increase in gross margin was primarily due to higher net sales improving fixed cost leverage and efficiency improvements primarily related to our Six Sigma initiative.

Selling, General and Administrative

Selling, general and administrative expenses for the nine months ended June 30, 2004 were \$14.1 million, compared to \$13.6 million in the nine months ended June 30, 2003. As a percentage of net sales, selling, general and administrative expenses were 12% for the nine months ended June 30, 2004 and June 30, 2003. The dollar increase in selling, general and administrative expenses from the prior year is primarily due to higher payroll expenses, payments made to resolve Thailand customs issues and consulting expenses related to Sarbanes Oxley compliance.

Engineering

Engineering expenses for the nine months ended June 30, 2004 were \$5.0 million, compared to \$4.8 million for the nine months ended June 30, 2003, an increase of 4%. The increase in fiscal 2004 engineering expenses primarily reflects increased spending on new product development, qualifying products and processes for new applications including FPDs, printers, stacked memory substrates and other high-end flexible circuit technology development related to new products. In addition, the fiscal 2004 first quarter included 14 weeks of expenses as compared to 13 weeks in the fiscal 2003 first quarter. As a percentage of net sales, engineering expenses were 4% of sales for the nine months ended June 30, 2004, unchanged as compared to the same period in the prior year.

Restructuring

During the third quarter of fiscal 2004, the we recorded asset impairment and restructuring charges of \$13.1 million and \$0.7 million related to the planned closure of the Maple Plain facility and the plan to discontinue the support of the FSA attachment process. The assets that were impaired included the Maple Plain facility and related equipment and equipment used in the FSA attachment process. In order to reduce our cost structure, we plan to close our Maple Plain facility and consolidate its operations with our Lamphun, Thailand and Litchfield, Minnesota facilities. In addition, we plan to discontinue supporting the FSA attachment process in order to utilize our resources in other areas with higher expected returns. Excluding asset impairment charges, restructuring charges are expected to be up to \$7 million. The \$7 million is expected to be comprised of \$1.6 million for one-time termination benefits, \$0.4 million for contract termination costs and \$5 million for other moving and closing costs associated with the consolidation of the Maple Plain location with the Company's other locations. Restructuring charges of \$714,000 were recorded in the third quarter of fiscal 2004. These charges were comprised of \$310,000 for one-time termination benefits and \$404,000 related to contract termination costs.

Restructuring charges for the nine months ended June 30, 2003 were \$750,000. In fiscal 2003, the charges were recorded due to an increase in the estimate of the leased Chandler, Arizona facility disposition costs, primarily to buy out the remainder of the Chandler, Arizona facility lease through its June 2003 termination. As of March 31, 2003, the restructuring was substantially complete.

Net Interest and Other Expense

Net interest expenses were \$0.5 million for the nine months ended June 30, 2004, compared to \$1.7 million reported for the nine months ended June 30, 2003. The decrease is due to a portion of the proceeds from a secondary public offering of the Company's common stock in the fourth quarter of fiscal 2003 being used to reduce the level of outstanding debt. Net other income was \$444,000 in the nine months ended June 30, 2004 as compared to net other expense of \$23,000 in the nine months ended June 30, 2003. The change was the result of foreign currency exchange gains being incurred in the nine months ended June 30, 2004 while foreign currency losses were incurred in the nine months ended June 30, 2003.

Income Taxes

Income tax benefit for the nine months ended June 30, 2004 was \$2.6 million, compared to \$3.5 million for the nine months ended June 30, 2003. The tax benefit for the nine months ended June 30, 2004 was calculated at a rate lower than the statutory federal rate primarily due to the exclusion of income generated from our foreign operating corporation and the exclusion of restructuring charges. We have determined that it is more likely than not that we will be able to utilize the tax benefit carried on our balance sheet in the future.

Critical Accounting Policies

Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, sales and expenses and related disclosure of contingent assets and liabilities. On an on-going basis, estimates are evaluated based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

We apply the following critical accounting policies in the preparation of our consolidated financial statements:

Allowance for Excess and Obsolete Inventory. Inventories, which are composed of raw materials, work in process and finished goods, are valued at the lower of cost or market with cost being determined by the first-in, first-out method. On a periodic basis, we analyze the level of inventory on hand, our cost in relation to market value and estimated customer requirements to determine whether write-downs for excess or obsolete inventory are required. Actual customer requirements in any future periods are inherently uncertain and thus may differ from estimates. If actual or expected requirements were significantly greater

or lower than the established reserves, a reduction or increase to the obsolescence allowance would be recorded in the period in which such a determination was made.

Goodwill. Goodwill and other intangible assets with indefinite lives are tested for impairment annually or whenever an impairment indicator arises. If events or circumstances change, including reductions in anticipated cash flows generated by operations, goodwill could become impaired and result in a charge to earnings.

Deferred Taxes. We account for income taxes using the liability method. Deferred income taxes are provided for temporary differences between the financial reporting and tax bases of assets and liabilities. A valuation allowance is set up where the realization of any deferred taxes becomes less likely than not to occur. We analyze the valuation allowance periodically which may result in income tax expense being different than statutory rates.

Revenue Recognition. We make electronic components (flexible circuits) based on customer specifications. Our revenue recognition policy is consistently applied regardless of sales channels utilized and product destination. We have an implied warranty that the products meet our customers' specification. Credits only are issued for customer returns. In recognizing revenue in any period, we apply the provisions of SEC Staff Accounting Bulletin 101, Revenue Recognition. Revenue from product sales is recognized when persuasive evidence of an arrangement exists, the product has been delivered, the fee is fixed and determinable and collection of the resulting receivable is reasonably assured. For all sales, a binding purchase order is used as evidence of an arrangement. We recognize revenue from the sale of our products upon shipment or delivery of our products to our customers, depending upon the customer agreement or shipping terms. We also store inventory in warehouses (JIT hubs - third party owned warehouses) that are located close to our customers' manufacturing facilities. Revenue is recognized on sales from JIT hubs upon the transfer of title and risk of loss which follows our customers' acknowledgement of the receipt of the goods.

Liquidity and Capital Resources

We have historically financed our operations primarily through cash from operating activities, bank credit facilities and employee stock option exercises. Cash and equivalents were \$21.7 million at June 30, 2004 and \$21.6 million at September 30, 2003.

For the nine months ended June 30, 2004, net cash provided by operating activities of \$2.6 million benefited from non-cash charges for depreciation, restructuring and asset impairment charges more than offsetting increases in inventories and deferred taxes. Inventories increased as a result of planned increases in manufacturing activity levels. Deferred taxes increased as a result of tax benefits recorded as a result of net operating losses.

Net cash used in investing activities was \$8.3 million in the first nine months of fiscal 2004, compared to \$3.2 million in the first nine months of fiscal 2003. In fiscal 2004, net cash used in investing activities was attributed to the purchase of selected equipment to expand capacity in our bottleneck processes. Fiscal 2003 net cash used in investing activities was due to capital expenditures primarily for test equipment and capacity increases in selected areas.

Net cash provided by financing activities was \$5.7 million in the first nine months of fiscal 2004, compared to \$3.9 million in the first nine months of fiscal 2003. During the first nine months of fiscal 2004, net cash provided by financing activities was the result of the \$9.9 million drawdown under our expanded Thailand credit facility partially offset by scheduled debt payments on our existing Thailand debt facilities and US based capital leases. Fiscal 2003 first nine months net cash provided by financing activities was due to scheduled debt payments being offset by draw downs under our Thailand packing credit facilities.

In June 2004 we entered into a new credit facility with Bank of Ayudhya Public Company Limited and The Industrial Finance Corporation of Thailand which expanded our existing credit facility with these banks. The long-term facilities were increased by 1,060 million baht, the packing credit was increased by 270 million baht and the short-term working capital facility was increased by 20 million baht. The facility is now comprised of a 660 million baht long-term facility, a 400 million baht long-term facility, a 590 million baht long-term facility, a 220 million baht

facility, packing credit facilities totaling 1,070 million baht, short-term working capital facilities totaling 90 million baht and a 10 million baht overdraft facility. The Thailand facilities are secured by certain receivables, inventory and assets held by us in Thailand. As of June 30, 2004, we had approximately \$17.7 million outstanding under our Thailand credit facilities. Total unused availability under our Thailand credit facilities as of June 30, 2004 was approximately \$46 million, of which \$30 million was related to the packing credit and working capital facilities and \$16 million was available under the long term facilities to fund capital equipment expansions in Thailand. We are currently in compliance with covenants under our Thailand based financing agreements.

We believe that with the existing Thailand credit facilities, cash generated from operations and the proceeds from a secondary offering of our common stock received on August 4, 2003, we will have adequate funds to support projected working capital and capital expenditures for the next twenty-four months. We are considering alternatives for generating additional working capital and long-term financing and will continue to pursue financing opportunities to better leverage our assets. Our financing needs and the financing alternatives available to us are subject to change depending on, among other things, general economic and market conditions, changes in industry buying patterns, customer acceptance of our FSA, AFC, stacked memory flex and FPD flex products and cash flow from operations.

Recent Accounting Pronouncements

There have been no accounting pronouncements relevant to us since the end of fiscal 2003.

Forward Looking Statements

Statements included in this Management's Discussion and Analysis of Financial Condition and Results of Operations, elsewhere in this report and in future filings by the Company with the SEC, except for the historical information contained herein and therein, are forward-looking statements that involve risks and uncertainties. These risks and uncertainties include: the increased utilization by our largest customer of alternative interconnect technologies that compete with our FSA product, any interruption in the operations of the Company's single source suppliers or any failure of any of the Company's single source suppliers to timely deliver an adequate supply of components, the risk related to the closing of our Maple Plain facility and its consolidation with our other facilities, the timely availability and acceptance of new products, as well as timely significant levels of sales of new products, including display flexible circuits and stacked memory substrates, the impact of competitive products and pricing, changes in manufacturing efficiencies and other risks detailed from time to time in the Company's reports filed with the Securities and Exchange Commission, including those risks described under the heading "Risks Related to Our Business" in our Annual Report on Form 10-K for the year ended September 30, 2003. In addition, a significant portion of the Company's revenue is generated from the disk drive, stacked memory substrates, consumer electronics and data storage industries and the global economic softness has had and may continue to have an adverse impact on the Company's operations. The Company disclaims any obligation subsequently to revise any forward-looking statements to reflect subsequent events or circumstances or the occurrence of unanticipated events.

PART 1: ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The following discusses our exposure to market risk related to changes in interest rates and foreign currency exchange rates. These exposures may change over time as business practices evolve and could have a material adverse impact on our business, financial condition and results of operations.

Our earnings and cash flows are subject to fluctuations due to changes in foreign currency exchange rates. While we transact business predominately in U.S. dollars, a portion of our sales and expenses are denominated in foreign currencies. Changes in the relation of foreign currencies to the U.S. dollar will affect our cost of sales and operating margins and could result in exchange gains or losses. To reduce the impact of certain foreign currency fluctuations, we enter into short-term forward foreign currency exchange contracts in the regular course of business to manage our risk exposure, not as speculative instruments. Typically, these contracts have maturities of 6 months or less. The forward exchange contracts generally require us to exchange Thailand baht for U.S. dollars or U.S.

dollars for Thailand baht at maturity, at rates agreed to at inception of the contracts. These contracts are not designated as hedges, therefore, the gains and losses on foreign currency transactions are included in income.

We periodically review the outlook for expected currency exchange rate movements as well as the policy on desired future foreign currency cash flow positions (long, short or balanced) for those currencies in which we have significant activity. Expected future cash flow positions and strategies are continuously monitored. At June 30, 2004, we had open forward exchange contracts to buy Thailand baht maturing July 16, 2004 and September 14, 2004 with notional amounts of 50,000,000 baht and 350,000,000 baht. The total open contracts for 400,000,000 baht equates to approximately \$9.9 million. No assurance can be given that our strategies will prevent future currency fluctuations from adversely affecting our business, financial condition and results of operations.

We are exposed to interest rate risk as a large portion of our interest-bearing debt is subject to interest rates which fluctuate with changes in market interest rates or are periodically reset based on market interest rates. A large change in market interest rates could have an adverse impact on our business, financial condition and results of operations.

PART 1: ITEM 4: CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

The Company's Chief Executive Officer, William P. Murnane, and Chief Financial Officer, Thomas Paulson, have evaluated the Company's disclosure controls and procedures as of the end of the period covered by this report. Based upon that review, they have concluded that these controls and procedures are effective in ensuring that material information related to the Company is made known to them by others within the Company.

(b) Changes in Internal Control Over Financial Reporting

There have been no significant changes in internal control over financial reporting that occurred during the fiscal quarter covered by this report that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

PART II - OTHER INFORMATION

Responses to Items 1 through 5 are omitted since these items are either inapplicable or the response thereto would be negative.

ITEM 6: EXHIBITS AND REPORTS ON FORM 8-K

(a) The following exhibits are included herein:

- 10.1 Second Credit Facilities Agreement effective as of June 11, 2004 among Innovex (Thailand) Limited, Bank of Ayudhya Public Company Limited and the Industrial Finance Corporation of Thailand.
- 31.1 Certification of Chief Executive Officer pursuant Rules 13a-14 and 15d-14 of the Exchange Act.
- 31.2 Certification of Chief Financial Officer pursuant Rules 13a-14 and 15d-14 of the Exchange Act.
- 32 Certificate pursuant Section 906 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. §1350).

(b) Reports on Form 8-K.

During the quarter covered by this report, the Company furnished Current Reports on Form 8-K dated April 23, 2004 reporting under Item 12 the disclosure of material non-public information relating to the Company's results of operations for the three month period ending March 31, 2004 and attaching at Item 7 a related press release.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
