ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the Fiscal Year Ended December 31, 2011

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from to

ARMOUR RESIDENTIAL REIT, INC.
(Exact name of registrant as specified in its charter)

Maryland 001-33736 26-1908763
(State or other jurisdiction of (Commission File Number) (I.R.S. Employer Identification
incorporation or organization) No.)

3001 Ocean Drive, Suite 201, Vero Beach, FL 32963
(Address of principal executive offices)(zip code)

(772) 617-4340
(Registrant's telephone number, including area code)
Securities registered pursuant to Section 12(b) of the Act:

Title of Class	Name of Exchange on which registered
Common Stock, \$0.001 par value	NYSE
Warrants to Purchase Common Stock	NYSE Amex LLC

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding twelve months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Edgar Filing: Armour Residential REIT, Inc. - Form 10-K

YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer or a smaller reporting company. See definition of "larger accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding twelve months (or for such shorter period that the registrant was required to submit and post such files). YES NO

On June 30, 2011, the aggregate value of the registrant's common stock held by non-affiliates of the registrant was approximately \$410,850,844, based on the closing sales price of our common stock on such date as reported on the NYSE.

The number of outstanding shares of the Registrant's common stock as of March 5, 2012 was 141,707,289.

Certain portions of the registrant's definitive proxy statement pursuant to Regulation 14A of the Securities Exchange Act of 1934 for its 2012 annual meeting of shareholders are incorporated by reference into Part III of this Form 10-K.

PART I

Item 1. Business

General

References to “we”, “us”, “our”, “ARMOUR” or the “Company” are to ARMOUR Residential REIT, Inc. References to “ARRM” are to ARMOUR Residential Management LLC, a Delaware limited liability company. References to “Enterprise” are to Enterprise Acquisition Corp., which became a wholly-owned subsidiary of ARMOUR after completion of the business combination (“Merger Agreement”) described below.

Overview

We are an externally-managed Maryland corporation organized in 2008, managed by ARRM. We invest primarily in hybrid adjustable rate, adjustable rate and fixed rate residential mortgage backed securities issued or guaranteed by a U.S. Government-sponsored entity (“GSE”), such as the Federal National Mortgage Association (more commonly known as Fannie Mae) and the Federal Home Loan Mortgage Corporation (more commonly known as Freddie Mac), or guaranteed by the Government National Mortgage Administration, a U.S. Government corporation (more commonly known as Ginnie Mae) (collectively, “Agency Securities”). From time to time, a portion of our portfolio may be invested in unsecured notes and bonds issued by U.S. Government-chartered entities (collectively, “Agency Debt”), U.S. Treasuries and money market instruments, subject to certain income tests we must satisfy for our qualification as a real estate investment trust (“REIT”). On December 1, 2011, our stockholders approved an amendment to our charter to broaden our investment asset class restriction in response to potential changes in Agency Securities to include non-Agency as well as Agency Securities in our investment asset class restriction. While we remain committed to investing in Agency Securities for so long as an adequate supply and pricing exists, we believe it is prudent for us to have the flexibility to invest in non-Agency Securities and respond to changes in GSE policy.

We seek attractive long-term investment returns by investing our equity capital and borrowed funds in our targeted asset class of Agency Securities. We earn returns on the spread between the yield on our assets and our costs, including the interest cost of the funds we borrow, after giving effect to our hedges. We intend to qualify and have elected to be taxed as a REIT under the Internal Revenue Code (“the Code”). We will generally not be subject to federal income tax to the extent that we distribute our taxable income to our shareholders and as long as we satisfy the ongoing REIT requirements including meeting certain asset, income and stock ownership tests. Our business plan is to identify and acquire Agency Securities, finance our acquisitions with borrowings under a series of short-term repurchase agreements at the most competitive interest rates available to us and then cost-effectively mitigate our interest rate and other risks based on our entire portfolio of assets, liabilities and derivatives and our management's view of the market. Successful implementation of our business plan requires us to address interest rate risk, maintain adequate liquidity and effectively mitigate interest rate risks. We execute our business plan in a manner consistent with our intention of qualifying as a REIT and avoiding regulation as an investment company.

Enterprise Acquisition Corp. (prior to November 6, 2009)

Enterprise was a Delaware blank check company incorporated on July 9, 2007, in order to serve as a vehicle for the acquisition of one or more operating businesses.

On July 29, 2009, Enterprise entered into an Agreement and Plan of Merger (the “Merger Agreement”), with ARMOUR and ARMOUR Merger Sub Corp., a Delaware corporation and a wholly-owned subsidiary of ARMOUR, (“Merger Sub Corp.”). The Merger Agreement provided for two primary transactions: (i) the merger of Merger Sub Corp. with and into Enterprise with Enterprise surviving the merger and becoming a wholly-owned subsidiary of ARMOUR and

(ii) ARMOUR becoming the new publicly-traded corporation of which the holders of Enterprise securities became security holders of ARMOUR. A summary of these transactions is as follows:

- On November 5, 2009, the stockholders of Enterprise approved certain proposals to: (i) amend Enterprise's amended and restated certificate of incorporation to allow for a business combination with ARMOUR and (ii) adopt the Merger Agreement and approve the merger of Merger Sub Corp. with and into Enterprise, which we refer to as the Business Combination.
- On November 6, 2009, Merger Sub Corp. merged with and into Enterprise pursuant to the Merger Agreement. In connection with the closing, the holders of Enterprise common stock and warrants became holders of the securities of ARMOUR after the Business Combination.

Our Formation and Structure

We intend to qualify and have elected to be taxed as a REIT under the Code. Our qualification as a REIT depends on our ability to meet, on a continuing basis, various complex requirements under the Code relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels and the concentration of ownership of our capital stock. We believe that we are organized in conformity with the requirements for qualification as a REIT under the Code and our manner of operations enables us to meet the requirements for taxation as a REIT for federal income tax purposes.

As a REIT, we will generally not be subject to federal income tax on the REIT taxable income that we currently distribute to our stockholders. If we fail to qualify as a REIT in any taxable year and do not qualify for certain statutory relief provisions, we will be subject to federal income tax at regular corporate rates. Even if we qualify as a REIT for federal income tax purposes, we may still be subject to some federal, state and local taxes on our income.

Our Assets

Since our formation, our assets have been invested in Agency Securities or money market instruments, primarily deposits at federally chartered banks.

Our Borrowings

We borrow against our Agency Securities using repurchase agreements. Our borrowings generally have maturities that may range from one month or less, up to one year, although occasionally we may enter into longer dated borrowing agreements to more closely match the rate adjustment period of our securities. Our total repurchase indebtedness was approximately \$5.3 billion at December 31, 2011, and had a weighted average maturity of 18 days. Depending on market conditions, we may enter into additional repurchase arrangements with similar maturities or a committed borrowing facility. Our borrowings are generally between six and ten times the amount of our stockholders' equity, but we are not limited to that range. The level of our borrowings may vary periodically depending on market conditions. In addition, certain of our master repurchase agreements and master swap agreements contain a restriction that prohibits our leverage from exceeding twelve times our stockholders' equity as well as termination events in the case of significant reductions in equity capital.

Despite recent credit market developments and prevailing trends, we believe Agency Securities will continue to be eligible for financing in the repurchase agreement market.

Our Hedging

Our hedging strategies are designed to reduce the impact on our earnings caused by the potential adverse effects of changes in interest rates on our assets and liabilities. Subject to complying with REIT requirements, we use hedging techniques to limit the risk of adverse changes in interest rates on the value of our assets as well as the differences between the interest rate adjustments on our assets and borrowings. These techniques primarily consist of entering into interest rate swap contracts and purchasing or selling Eurodollar Futures Contracts ("Futures Contracts") and may also include entering into interest rate cap or floor agreements, purchasing put and call options on securities or securities underlying Futures Contracts, or entering into forward rate agreements. Although we are not legally limited to our use of hedging, we intend to limit our use of derivative instruments to only those techniques described above and to enter into derivative transactions only with counterparties that we believe have a strong credit rating to help limit the risk of counterparty default or insolvency. These transactions are not entered into for speculative purposes. In addition, since we do not qualify to use cash flow hedge accounting, earnings reported in accordance with accounting principles generally accepted in the U.S. ("GAAP") will fluctuate even in situations where our derivatives are operating as

intended. As a result of this mark-to-market accounting treatment, our results of operations are likely to fluctuate far more than if we were able to designate our derivative activities as cash flow hedges. Comparisons with companies that are eligible to use cash flow hedge accounting for all or part of their derivative activities may not be meaningful.

Strategies

Our primary goal is to acquire Agency Securities, finance our acquisitions in the capital markets, use targeted leverage ratios and employ risk management in an effort to provide an attractive risk adjusted return on stockholders' equity. We seek to achieve this goal through the thoughtful and opportunistic application of our asset acquisition, leverage and interest rate management strategies.

Our Manager

We are externally-managed by ARRM pursuant to our Management Agreement (see Note 7 to the consolidated financial statements). All of our executive officers are also employees of ARRM. ARRM manages our day-to-day operations, subject to the direction and oversight of the Board of Directors (“Board”). The Management Agreement expires on November 6, 2014, and is thereafter automatically renewed for an additional one-year term unless terminated under certain circumstances. ARRM must provide 180 days prior notice of any such termination.

ARRM is entitled to receive a management fee payable monthly in arrears in an amount equal to 1/12th of an amount, with a minimum based on 1/12th of \$900,000, (inclusive of the original gross merger equity as defined in Note 7), determined as follows:

- our gross equity raised up to \$50 million, 1% (per annum) of gross equity;
- our gross equity raised up to \$1.0 billion, 1.5% (per annum) of gross equity;
- our gross equity raised in excess of \$1.0 billion, 0.75% (per annum) of gross equity.

Subsequent Events

See Note 15 to the consolidated financial statements.

Policies With Respect To Certain Other Activities

If, when applicable, ARRM and the Board determine that additional funding is required, we may raise such funds through equity offerings (including preferred equity), unsecured debt securities, convertible securities (including warrants, preferred equity and debt) or the retention of cash flow (subject to provisions in the Code concerning taxability of undistributed REIT taxable income) or a combination of these methods.

In the event that ARRM determines the need to raise additional equity capital, we have the authority, without stockholder approval, to issue additional common stock or preferred stock in any manner and on such terms and for such consideration as we deem appropriate, at any time.

Although we have no present intention of doing so, ARRM has the authority to have us repurchase or otherwise reacquire shares of our stock and may engage in such activities in the future.

Policy With Respect to Dividends and Distributions

As required in order to maintain our qualification as a REIT for U.S. federal income tax purposes, we intend to distribute with respect to each year at least 90% of our REIT taxable income, determined without regard to the deduction for dividends paid and excluding any net capital gain. To satisfy the requirements to qualify as a REIT and generally not be subject to U.S. federal income and excise tax, we intend to continue to make regular cash distributions of all or substantially all of our taxable income to holders of our common stock out of assets legally available for such purposes. We are not restricted from using the proceeds of equity or debt offerings to pay dividends, but we do not intend to do so. The timing and amount of any dividends we pay to holders of our common stock will be at the discretion of our Board and will depend upon various factors, including our earnings and financial condition, maintenance of REIT status, applicable provisions of the Maryland General Corporation Law (“MGCL”) and such other factors as our Board deems relevant.

Investment Company Act Exemption

We conduct our business so as not to become regulated as an investment company under the Investment Company Act of 1940 (“the Act”). If we were to fall within the definition of an investment company, we would be unable to conduct our business as described in this Annual Report on Form 10-K.

Section 3(a)(1)(A) of the Act defines an investment company as any issuer that is or holds itself out as being engaged primarily in the business of investing, reinvesting or trading in securities. Section 3(a)(1)(C) of the Act also defines an investment company as any issuer that is engaged or proposes to engage in the business of investing, reinvesting, owning, holding or trading in securities and owns or proposes to acquire investment securities having a value exceeding 40% of the value of the issuer's total assets (exclusive of U.S. Government securities and cash items) on an unconsolidated basis. Excluded from the term “investment securities,” among other things, in Section 3(a)(1)(C) of the Act, as defined above, are U.S. Government securities and securities issued by majority-owned subsidiaries that are not themselves investment companies and are not relying on the exception from the definition of investment company set forth in Section 3(c)(1) or Section 3(c)(7) of the Act.

To avoid registration as an investment company, we rely on the exclusion provided by Section 3(c)(5)(C) of the Act. To qualify for the exclusion, we intend to make investments so that at least 55% of the assets we own consist of “qualifying assets” and so that at least 80% of the assets we own consist of qualifying assets and real estate related assets. We generally expect that our investments in Agency Securities will be treated as either qualifying assets or real estate related assets under Section 3(c)(5)(C) of the Act in a manner consistent with the Securities and Exchange Commission (“SEC”) staff no-action letters. Qualifying assets for this purpose include mortgage loans and other assets, such as whole pool Agency Securities that are considered the functional equivalent of mortgage loans for the purposes of the Act. We invest at least 55% of our assets in whole pool Agency Securities that constitute qualifying assets in accordance with SEC staff guidance and at least 80% of our assets in qualifying interests plus other real estate related assets. Other real estate related assets would consist primarily of non-whole pool Agency Securities and funds awaiting investment. As a result of the foregoing restrictions, we are limited in our ability to make or dispose of certain investments. To the extent that the SEC staff publishes new or different guidance with respect to these matters, we may be required to adjust our strategy accordingly. These restrictions could also result in us holding assets we might wish to sell or selling assets we might wish to hold. Although we intend to monitor our portfolio relying on the Section 3(c)(5)(C) exclusion periodically and prior to each acquisition and disposition, there can be no assurance that we will be able to maintain this exclusion.

To the extent that we elect in the future to conduct our operations through wholly-owned subsidiaries, such business will be conducted in a manner as to ensure that we do not meet the definition of investment company under either Section 3(a)(1)(A) or Section 3(a)(1)(C) of the Act. All wholly-owned subsidiaries that we elect to conduct our business through would qualify for the Section 3(c)(5)(C) exclusion discussed above and we would, accordingly, qualify for the Section 3(a)(1)(C) exemption because less than 40% of the value of our total assets on an unconsolidated basis would consist of investment securities. We intend to monitor our portfolio periodically to ensure compliance with the 40% test. In such case, we would be a holding company which conducts business exclusively through wholly-owned subsidiaries and we would be engaged in the non-investment company business of our subsidiaries.

On August 31, 2011, the SEC issued a concept release (No. IC-29778; File No. SW7-34-11, Companies Engaged in the Business of Acquiring Mortgages and Mortgage-Related Instruments) pursuant to which it is reviewing whether certain companies that invest in MBS and rely on the exemption from registration under Section 3(c)(5)(C) of the Act (such as us) should continue to be allowed to rely on such exemption from registration. If we fail to continue to qualify for this exemption from registration as an investment company, or the SEC determines that companies that invest in MBS are no longer able to rely on this exemption, our ability to use leverage would be substantially reduced and we would be unable to conduct our business as planned, or we may be required to register as an investment company under the Act, either of which could negatively affect the value of shares of our common stock and our ability to make distributions to our shareholders.

Compliance with NYSE Corporate Governance Standards

We comply with the corporate governance standards of the New York Stock Exchange (“NYSE”). Our Audit Committee is comprised entirely of independent directors and a majority of our directors are “independent” in accordance with the rules of the NYSE.

Competition

Our success depends, in large part, on our ability to acquire assets at favorable spreads over our borrowing costs. In acquiring Agency Securities, we compete with mortgage REITs, mortgage finance and specialty finance companies, savings and loan associations, banks, mortgage bankers, insurance companies, mutual funds, institutional investors, investment banking firms, other lenders, governmental bodies and other entities. Many of these organizations have

greater financial resources and access to lower costs of capital than we do. In addition, there are numerous mortgage REITs with similar asset acquisition objectives, including Agency Securities and others may be organized in the future. The effect of the existence of additional REITs may be to increase competition for the available supply of mortgage assets suitable for purchase.

Employees

We are managed by ARRM pursuant to the Management Agreement between us and ARRM. We do not have any employees whom we compensate directly with salaries or other compensation. As of December 31, 2011, ARRM had eight full-time employees.

Facilities

Our principal offices are located at:

ARMOUR Residential REIT, Inc.
3001 Ocean Drive, Suite 201
Vero Beach, FL 32963

Phone Number

Our phone number is (772) 617-4340.

Website

Our website is www.armourreit.com. Our investor relations website is www.armourreit.com. We make available on our website under "SEC filings," free of charge, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports as soon as reasonably practicable after we electronically file or furnish such materials to the SEC.

Legal Proceedings

Our company and our manager are not currently subject to any legal proceedings.

Available Information

We are required to file Annual Reports on Form 10-K and Quarterly Reports on Form 10-Q with the SEC on a regular basis and are required to disclose certain material events (e.g., changes in corporate control; acquisitions or dispositions of a significant amount of assets other than in the ordinary course of business and bankruptcy) in a current report on Form 8-K. The public may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet website that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC. The SEC's Internet website is located at <http://www.sec.gov>.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains various “forward-looking statements.” Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as “believes,” “expects,” “may,” “will,” “would,” “could,” “should,” “seeks,” “approximately,” “intends,” “p,” “estimates” or “anticipates” or the negative of these words and phrases or similar words or phrases. All forward-looking statements may be impacted by a number of risks and uncertainties, including statements regarding the following subjects:

- our business and investment strategy;
- our anticipated results of operations;
- statements about future dividends;
- our ability to obtain financing arrangements;
- our understanding of our competition and ability to compete effectively;
- market, industry and economic trends; and
- interest rates.

The forward-looking statements in this report are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. You should carefully consider these risks before you make an investment decision with respect to our common stock, along with the following factors that could cause actual results to vary from our forward-looking statements:

- (1) the factors referenced in this report, including those set forth under the sections captioned “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations;”
- (2) the federal conservatorship of Fannie Mae and Freddie Mac and related efforts, along with any changes in laws and regulations affecting the relationship between Fannie Mae and Freddie Mac and the federal government and the federal reserve system;
- (3) mortgage loan modification programs and future legislative action;
- (4) availability, terms and deployment of capital;
- (5) changes in economic conditions generally;
- (6) changes in interest rates, interest rate spreads and the yield curve or prepayment rates;
- (7) general volatility of the financial markets, including markets for mortgage securities;
- (8) inflation or deflation;
- (9) availability of suitable investment opportunities;
- (10) the degree and nature of our competition, including competition for Agency Securities from the U.S. Treasury;

(11)changes in our business and investment strategy;

(12)our dependence on our manager and ability to find a suitable replacement if our manager were to terminate their management relationship with us;

(13)the existence of conflicts of interest in our relationship with our manager, certain of our directors and our officers, which could result in decisions that are not in the best interest of our stockholders;

(14)changes in personnel at our manager or the availability of qualified personnel at our manager;

(15)limitations imposed on our business by our status as a REIT;

(16)changes in GAAP in the U.S., including interpretations thereof; and

(17)changes in applicable laws and regulations.

We cannot guarantee future results, levels of activity, performance or achievements. You should not place undue reliance on forward-looking statements, which apply only as of the date of this report. We do not intend and disclaim any duty or obligation to update or revise any industry information or forward-looking statements set forth in this report to reflect new information, future events or otherwise, except as required under the U.S. Federal securities laws.

Item 1A. Risk Factors

An investment in our securities involves a high degree of risk. You should consider carefully the material risks described below, together with the other information contained in this Annual Report on Form 10-K, before making a decision to invest in our securities. If any of the following events occur, our business, financial condition and operating results may be materially adversely affected. In that event, the trading price of our securities could decline and you could lose all or part of your investment. This Annual Report on Form 10-K also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in the forward-looking statements as a result of specific factors, including the risks described below.

Risks Related to Our Business

Volatile market conditions for mortgages and mortgage related assets as well as the broader financial markets may adversely affect the value of the assets in which we invest.

Our results of operations are materially affected by conditions in the markets for mortgages and mortgage related assets, including mortgage backed securities, as well as the broader financial markets and the economy generally. Beginning in 2007, significant adverse changes in financial market conditions resulted in a deleveraging of the entire global financial system and the forced sale of large quantities of mortgage related and other financial assets. More recently, concerns over economic recession, inflation, geopolitical issues, unemployment, the availability and cost of financing, the mortgage market and a declining real estate market have contributed to increased volatility and diminished expectations for the economy and markets. In particular, the residential mortgage market in the U.S. has experienced a variety of difficulties and changed economic conditions, including defaults, credit losses and liquidity concerns. Certain commercial banks, investment banks and insurance companies have announced extensive losses from exposure to the residential mortgage market. These factors have impacted investor perception of the risk associated with residential mortgage backed securities, real estate-related securities and various other asset classes in which we may invest. As a result, values for residential mortgage backed securities, real estate-related securities and various other asset classes in which we may invest have experienced volatility. Any decline in the value of our investments, or perceived market uncertainty about their value, would likely make it difficult for us to obtain financing on favorable terms or at all, or maintain our compliance with terms of any financing arrangements already in place. Further increased volatility and deterioration in the broader residential mortgage and mortgage backed securities markets may adversely affect the performance and market value of our investments.

Continued adverse developments in the global capital markets, including defaults, credit losses and liquidity concerns, as well as mergers, acquisitions or bankruptcies of potential repurchase agreement counterparties, could make it difficult for us to borrow money to acquire Agency Securities on a leveraged basis, on favorable terms, or at all, which could adversely affect our profitability.

We rely on the availability of financing to acquire Agency Securities on a leveraged basis. Institutions from which we obtain financing may have invested in or financed assets that have declined in value as a result of the downturn in financial markets, particularly in Europe and the residential mortgage market, causing these institutions to suffer losses. If these conditions persist, these institutions may be forced to exit the repurchase market, become insolvent or

further tighten their lending standards or increase the amount of equity capital or the weighted average margin requirement, or the percentage amount by which the collateral value must exceed the loan amount required to obtain financing. Under such circumstances, it could be more difficult for us to obtain financing on favorable terms or at all. Our profitability may be adversely affected if we were unable to obtain cost-effective financing for our investments.

While the overall financing environment has improved, further credit losses or mergers, acquisitions, or bankruptcies of investment banks and commercial banks that have historically acted as repurchase agreement counterparties may occur. This would result in a fewer number of potential repurchase agreement counterparties operating in the market and could potentially impact the pricing and availability of financing for our business.

Continued adverse developments in the residential mortgage market may adversely affect the value of the Agency Securities in which we invest.

During the past few years, the residential mortgage market in the U.S. has experienced a variety of difficulties and changed economic conditions that adversely affected the performance and market value of the Agency Securities in which we invest. Agency Securities originated in 2006 and 2007 have experienced a higher and earlier than expected rate of delinquencies. Additionally, other earlier vintages of Agency Securities may not be performing as expected. As a result, the market for these securities may be adversely affected for a significant period of time.

Conditions within the market are being driven primarily by:

- delinquencies across a broad scope of mortgage loans that include subprime mortgage loans, Alt-A mortgage loans, and prime mortgage loans.
- declining housing prices and flattening of property values,
- resetting adjustable rate mortgages that result in increased mortgage payments, and
- constrained ability by borrowers to refinance or sell their properties.

While we primarily invest in Agency Securities, rising levels of delinquencies could negatively affect the value of our Agency Securities or create market uncertainty about their true value. At the same time, market uncertainty about residential mortgages in general could depress the market for Agency Securities, making it more difficult for us to sell Agency Securities we own on favorable terms or at all.

The federal conservatorship of Fannie Mae and Freddie Mac and related efforts, along with any changes in laws and regulations affecting the relationship between Fannie Mae and Freddie Mac and the federal government, may adversely affect our business.

The payments we receive on the Agency Securities in which we invest depend upon a steady stream of payments by borrowers on the underlying mortgages and the fulfillment of guarantees by Ginnie Mae, Fannie Mae and Freddie Mac, collectively Government Sponsored Enterprises (“GSEs”). Ginnie Mae is part of a U.S. Government agency and its guarantees are backed by the full faith and credit of the U.S. Fannie Mae and Freddie Mac are U.S. Government-sponsored entities, but their guarantees are not backed by the full faith and credit of the U.S.

Since 2007, Fannie Mae and Freddie Mac have reported substantial losses and a need for substantial amounts of additional capital. In response to the deteriorating financial condition of Fannie Mae and Freddie Mac and the credit market disruption, Congress and the U.S. Treasury undertook a series of actions to stabilize these government-sponsored entities and the financial markets, generally. The Housing and Economic Recovery Act of 2008 was signed into law on July 30, 2008, and established the Federal Housing Finance Agency (“FHFA”), with enhanced regulatory authority over, among other things, the business activities of Fannie Mae and Freddie Mac and the size of their portfolio holdings. On September 7, 2008, FHFA placed Fannie Mae and Freddie Mac into federal conservatorship and, together with the U.S. Treasury, established a program designed to boost investor confidence in Fannie Mae’s and Freddie Mac’s debt and Agency Securities. As the conservator of Fannie Mae and Freddie Mac, the FHFA controls and directs the operations of Fannie Mae and Freddie Mac and may (1) take over the assets of and operate Fannie Mae and Freddie Mac with all the powers of the shareholders, the directors and the officers of Fannie Mae and Freddie Mac and conduct all business of Fannie Mae and Freddie Mac; (2) collect all obligations and money due to Fannie Mae and Freddie Mac; (3) perform all functions of Fannie Mae and Freddie Mac which are consistent with the conservator’s appointment; (4) preserve and conserve the assets and property of Fannie Mae and Freddie Mac; and (5) contract for assistance in fulfilling any function, activity, action or duty of the conservator.

Those efforts resulted in significant U.S. Government financial support and increased control of the GSEs. In December 2011, the FHFA reported that, from the time of execution of the preferred stock purchase agreements through September 30, 2011, funding provided to Fannie Mae and Freddie Mac under the preferred stock purchase agreements amounted to approximately \$112 billion and \$71 billion, respectively. The U.S. Treasury has committed to support the positive net worth of Fannie Mae and Freddie Mac, through preferred stock purchases as necessary, through 2012. Those agreements, as amended, also require the reduction of Fannie Mae's and Freddie Mac's mortgage and Agency Securities portfolios (they must be reduced by at least 10% each year until their respective mortgage assets reach \$250 billion).

Both the secured short-term credit facility and the Agency Securities program initiated by the U.S. Treasury expired on December 31, 2009. However, through that securities purchase program (from September 2008 through December 2009), the U.S. Treasury acquired approximately \$220 billion of Agency Securities. In addition, while the U.S. Federal Reserve's program of Agency Securities purchases terminated in 2010, the U.S. Federal Reserve reported that through December 28, 2011, it held \$847.8 billion of Agency Securities. Subject to specified investment guidelines, the portfolios of Agency Securities purchased through the programs established by the U.S. Treasury and the U.S. Federal Reserve may be held to maturity and, based on mortgage market conditions, adjustments may be made to these portfolios. This flexibility may adversely affect the pricing and availability of Agency Securities that we seek to acquire during the remaining term of these portfolios.

Although the U.S. Government has committed to support the positive net worth of Fannie Mae and Freddie Mac through 2012, there can be no assurance that these actions will be adequate for their needs. These uncertainties lead to questions about the availability of and trading market for, Agency Securities. Despite the steps taken by the U.S. Government, Fannie Mae and Freddie Mac could default on their guarantee obligations which would materially and adversely affect the value of our Agency Securities. Accordingly, if these government actions are inadequate and the GSEs continue to suffer losses or cease to exist, our business, operations and financial condition could be materially and adversely affected.

In addition, the problems faced by Fannie Mae and Freddie Mac, resulting in their being placed into federal conservatorship and receiving significant U.S. Government support, have sparked serious debate among federal policy makers regarding the continued role of the U.S. Government in providing liquidity for mortgage loans. The future roles of Fannie Mae and Freddie Mac could be significantly reduced and the nature of their guarantee obligations could be considerably limited, relative to historical measurements. Alternatively, Fannie Mae and Freddie Mac could be dissolved or privatized and the U.S. Government could determine to stop providing liquidity support of any kind to the mortgage market. Any changes to the nature of their guarantee obligations could redefine what constitutes an Agency Security and could have broad adverse implications for the market and our business, operations and financial condition. If Fannie Mae or Freddie Mac were eliminated, or their structures were to change radically (i.e., limitation or removal of the guarantee obligation), we may be unable to acquire additional Agency Securities and our existing Agency Securities could be materially and adversely impacted.

We could be negatively affected in a number of ways depending on the manner in which related events unfold for Fannie Mae and Freddie Mac. We rely on our Agency Securities as collateral for our financings under our repurchase agreements. Any decline in their value or perceived market uncertainty about their value, would make it more difficult for us to obtain financing on our Agency Securities on acceptable terms or at all, or to maintain our compliance with the terms of any financing transactions. Further, the current support provided by the U.S. Treasury to Fannie Mae and Freddie Mac and any additional support it may provide in the future, could have the effect of lowering the interest rates we expect to receive from Agency Securities, thereby tightening the spread between the interest we earn on our Agency Securities and the cost of financing those assets. A reduction in the supply of Agency Securities could also negatively affect the pricing of Agency Securities, by reducing the spread between the interest we earn on our portfolio of Agency Securities and our cost of financing that portfolio.

As indicated above, legislation has changed the relationship between Fannie Mae and Freddie Mac and the U.S. Government. Future legislation could further change the relationship between Fannie Mae and Freddie Mac and the U.S. Government and could also nationalize, privatize, or eliminate such entities entirely. Any law affecting these GSEs may create market uncertainty and have the effect of reducing the actual or perceived credit quality of securities issued or guaranteed by Fannie Mae or Freddie Mac. As a result, such laws could increase the risk of loss on our investments in Agency Securities guaranteed by Fannie Mae and/or Freddie Mac. It also is possible that such laws could adversely impact the market for such securities and spreads at which they trade. All of the foregoing could materially and adversely affect our business, operations and financial condition.

Certain actions by the U.S. Federal Reserve could cause a flattening of the yield curve, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our shareholders.

On September 21, 2011, the U.S. Federal Reserve announced "Operation Twist," which is a program by which it intends to purchase, by the end of June 2012, \$400 billion of U.S. Treasury securities with remaining maturities between six and 30 years and sell an equal amount of U.S. Treasury securities with remaining maturities of three years or less. The effect of Operation Twist could be a flattening in the yield curve, which could result in increased prepayment rates due to lower long-term interest rates and a narrowing of our net interest margin. Consequently, Operation Twist and any

other future securities purchase programs by the U.S. Federal Reserve could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our shareholders.

Mortgage loan modification programs and future legislative action may adversely affect the value of and the returns on, the Agency Securities in which we invest.

The U.S. Government, through the Federal Reserve, the Federal Housing Administration (“FHA”) and the Federal Deposit Insurance Corporation, has implemented a number of federal programs designed to assist homeowners, including the Home Affordable Modification Program (“HAMP”), which provides homeowners with assistance in avoiding residential mortgage loan foreclosures, the Hope for Homeowners Program (“H4H Program”), which allows certain distressed borrowers to refinance their mortgages into FHA-insured loans in order to avoid residential mortgage loan foreclosures and the Home Affordable Refinance Program, which allows borrowers who are current on their mortgage payments to refinance and reduce their monthly mortgage payments at loan-to-value ratios up to 125 percent without new mortgage insurance. HAMP, the H4H Program and other loss mitigation programs may involve among other things, the modification of mortgage loans to reduce the principal amount of the loans (through forbearance and/or forgiveness) and/or the rate of interest payable on the loans, or to extend the payment terms of the loans. Especially with non-Agency Securities, a significant number of loan modifications with respect to a given security, including, but not limited to, those related to principal forgiveness and coupon reduction, could negatively impact the realized yields and cash flows on such security. These loan modification programs, future legislative or regulatory actions, including possible amendments to the bankruptcy laws, which result in the modification of outstanding residential mortgage loans, as well as changes in the requirements necessary to qualify for refinancing mortgage loans with Fannie Mae, Freddie Mac or Ginnie Mae, may adversely affect the value of and the returns on, our Agency Securities.

In October 2011, the FHFA announced changes to the Home Affordable Refinance Program (“HARP”) to expand access to refinancing for qualified individuals and families whose homes have lost value, including increasing the HARP loan to value ratio above 125%. However, this would only apply to mortgages guaranteed by the U.S. government-sponsored entities. There are many challenging issues to this proposal, notably the question as to whether a loan with a loan to value ratio of 125% qualifies as a mortgage or an unsecured consumer loan. The chances of this initiative’s success have created additional uncertainty in the Agency Securities market, particularly with respect to possible increases in prepayment rates.

On January 4, 2012, the Federal Reserve issued a white paper outlining additional ideas with regard to refinancings and loan modifications. It is likely that loan modifications would result in increased prepayments on some Agency Securities. These loan modification programs, as well as future legislative or regulatory actions, including amendments to the bankruptcy laws, that result in the modification of outstanding mortgage loans may adversely affect the value of, and the returns on, the Agency Securities in which we invest.

We may not be able to operate our business or implement our operating policies and strategies successfully.

The results of our operations depend on many factors, including, without limitation, the availability of opportunities for the acquisition of attractively priced Agency Securities, the level and volatility of interest rates, readily accessible funding in the financial markets and our ability to cost-effectively hedge risks as well as overall economic conditions. We may not be able to maintain any agreements with our lenders on favorable terms or at all. Furthermore, we may not be able to operate our business successfully or implement our operating policies and strategies as described in this Annual Report on Form 10-K, which could result in the loss of some or all of your investment.

Increased levels of prepayments from mortgage backed securities may decrease our net interest income or result in a net loss.

Pools of mortgage loans underlie the Agency Securities that we acquire. We generally receive payments from the payments that are made on these underlying mortgage loans. When we acquire Agency Securities, we anticipate that the underlying mortgages will prepay at a projected rate generating an expected yield. When borrowers prepay their mortgage loans faster than expected, the related prepayments on the corresponding Agency Securities will be faster than expected. Since we typically purchase Agency Securities at premium prices that reflect above market coupons, faster-than-expected prepayments reduce the period those above market coupons are outstanding and could potentially harm our financial position and results of operations. Furthermore, while the Agency Securities we purchase are guaranteed against principal loss by Fannie Mae, Freddie Mac, or Ginnie Mae, defaults, serious delinquencies and loan modifications of the underlying mortgages result in prepayment of principal as well. Continuing poor credit results at Fannie Mae, Freddie Mac and Ginnie Mae would suggest higher rates of prepayments from defaults and serious delinquencies. While we will seek to manage prepayment risk, in selecting investments, we must balance prepayment risk against other risks, the potential returns of each investment and the cost of hedging its risks. No strategy can completely insulate us from prepayment or other such risks and we may deliberately retain exposure to prepayment or other risks. In addition, there have been various proposals from the Executive Branch of the U.S. Government and the U.S. Congress to ease refinancing which could have the effect of increasing prepayments.

Recent market conditions may upset the historical relationship between interest rate changes and prepayment trends, which would make it more difficult for us to analyze our portfolio.

Our success depends to a significant degree on our ability to analyze the relationship of changing interest rates and prepayments of the mortgages that underlie our Agency Securities. Changes in interest rates and prepayments affect the market price of the Agency Securities that we purchase and any Agency Securities that we hold at a given time. As part of our overall portfolio risk management, we analyze interest rate changes and prepayment trends separately and

collectively to assess their effects on our portfolio. In conducting our analysis, we depend on industry-accepted assumptions with respect to the relationship between interest rates and prepayments under normal market conditions. If the dislocation in the residential mortgage market or other developments change the way that prepayment trends have historically responded to interest rate changes, our ability to assess the market value of our portfolio would be significantly affected and could materially adversely affect our financial position and results of operations.

The downgrade of the U.S. government's or certain European countries' credit ratings and future downgrades of the U.S. government's or certain European countries' credit ratings may materially adversely affect our business, financial condition and results of operations.

On August 5, 2011, Standard & Poor's Corporation downgraded the U.S.'s credit rating from AAA to AA+ and on August 8, 2011, Fannie Mae and Freddie Mac's credit ratings were downgraded from AAA to AA+. Because Fannie Mae and Freddie Mac are in conservatorship of the U.S. Government, the U.S.'s credit rating downgrade and Fannie Mae and Freddie Mac's credit rating downgrades will impact the credit risk associated with Agency Securities and, therefore, may decrease the value of the Agency Securities in our portfolio.

Actions of the U.S. Government, including the U.S. Congress, Federal Reserve, U.S. Treasury and other governmental and regulatory bodies for the purpose of stabilizing or reforming the financial markets, or market response to those actions, may not achieve the intended effect or benefit our business and may adversely affect our business.

In response to the financial issues affecting the banking system and financial markets and going concern threats to commercial banks, investment banks and other financial institutions, the Emergency Economic Stabilization Act ("EESA"), was enacted by the U.S. Congress in 2008. There can be no assurance that the EESA or any other U.S. Government actions will have a beneficial impact on the financial markets. To the extent the markets do not respond favorably to any such actions by the U.S. Government or such actions do not function as intended, our business may not receive the anticipated positive impact from the legislation and such result may have broad adverse market implications.

In July 2010, the U.S. Congress enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act (or the Dodd-Frank Act), in part to impose significant investment restrictions and capital requirements on banking entities and other organizations that are significant to U.S. financial markets. For instance, the Dodd-Frank Act will impose significant restrictions on the proprietary trading activities of certain banking entities and subject other systemically significant organizations regulated by the U.S. Federal Reserve to increased capital requirements and quantitative limits for engaging in such activities. The Dodd-Frank Act also seeks to reform the asset-backed securitization market (including the Agency Securities market) by requiring the retention of a portion of the credit risk inherent in the pool of securitized assets and by imposing additional registration and disclosure requirements. Certain of the new requirements and restrictions exempt Agency Securities; other government issued or guaranteed securities, or other securities. Nonetheless, the Dodd-Frank Act also imposes significant regulatory restrictions on the origination of residential mortgage loans. While the full impact of the Dodd-Frank Act cannot be assessed until implementing regulations are released, the Dodd-Frank Act's extensive requirements may have a significant effect on the financial markets and may affect the availability or terms of financing from our lender counterparties and the availability or terms of Agency Securities, both of which may have an adverse effect on our business.

In addition, U.S. Government, Federal Reserve, U.S. Treasury and other governmental and regulatory bodies have taken or are continuing to consider taking other actions to address the financial crisis. We cannot predict whether or when such actions may occur or what affect, if any, such actions could have on our business, results of operations and financial condition.

The increasing number of proposed U.S. federal, state and local laws and regulations may affect certain mortgage related assets in which we intend to invest and could increase our cost of doing business.

Legislation has been proposed which, among other provisions, could hinder the ability of a servicer to foreclose promptly on defaulted mortgage loans or would permit limited assignee liability for certain violations in the mortgage loan origination process. For example, the Dodd-Frank Act permits borrowers to assert certain defenses to foreclosure against an assignee for certain violations in the mortgage loan origination process. We cannot predict whether or in what form the U.S. Congress, the various state and local legislatures or the various federal, state or local regulatory agencies may enact legislation affecting our business. We will evaluate the potential impact of any initiatives which, if enacted, could affect our practices and results of operations. We are unable to predict whether the U.S. federal, state or local authorities will enact laws, rules or regulations that will require changes in our practices in the future and any such changes could adversely affect our cost of doing business and profitability.

Changes in interest rates may adversely affect the results of our operations and our financial position.

Interest rates are highly sensitive to many factors, including governmental, monetary and tax policies, domestic and international economic and political considerations, all of which are beyond our control. Our success depends to a significant degree on our ability to analyze the relationship changing interest rates may have on our results of operations and financial position in general and the impact such rate changes may have on critical elements underlying Agency Securities and other investments' values and borrowings in particular, as follows:

- changes in interest rates may inversely affect the fair value of our assets, which are primarily Agency Securities. When interest rates rise, the value of fixed rate Agency Securities generally declines, when interest rates fall, the value of fixed rate Agency Securities generally increase.
- changes in interest rates may inversely affect levels of prepayments on mortgages. Typically, as interest rates rise, prepayments on the underlying mortgages tend to slow; conversely, as interest rates fall, prepayments on the underlying mortgages tend to accelerate. The effect that rising or falling interest rates on these prepayments affects the price of Agency Securities and the effect can be particularly pronounced with fixed rate Agency Securities.
-

changes in interest rates may create mismatches between our assets, primarily Agency Securities and our borrowings used to fund our purchases of those assets. The risk of these mismatches may be pronounced in that, should rates increase, interest rate caps on our hybrid adjustable rate and adjustable rate mortgage backed securities would limit the income stream on these investments while our borrowings would not be subject to similar restrictions.

Interest rate fluctuations will also cause variations in the yield curve, which may reduce our net income. The relationship between short-term and longer-term interest rates is often referred to as the “yield curve.” If short-term interest rates rise disproportionately relative to longer-term interest rates (a flattening of the yield curve), our borrowing costs may increase more rapidly than the interest income earned on our assets. Because our assets may bear interest based on longer-term rates than our borrowings, a flattening of the yield curve would tend to decrease our net income and the market value of our Agency Security assets. Additionally, to the extent cash flows from investments that return scheduled and unscheduled principal are reinvested in Agency Securities, the spread between the yields of the new investments and available borrowing rates may decline, which would likely decrease our net income. It is also possible that short-term interest rates may exceed longer-term interest rates (a yield curve inversion), in which event our borrowing costs may exceed our interest income and we could incur significant operating losses. This risk and the variables created by changing interest rates discussed above are integral to our business and our investment strategies. We will seek to mitigate these risks to the degree achievable through the active formulation and execution of our hedging strategies.

Interest rate mismatches between our Agency securities and our borrowings used to fund our purchases of these securities may reduce our income during periods of changing interest rates.

We fund our fixed rate Agency Securities with short-term borrowings. As a result, an increase in short-term interest rates would likely cause an increase in our borrowing costs, resulting in a decrease in net income or a net loss. In addition, we fund most of our investments in adjustable rate Agency Securities with borrowings that have interest rates that adjust more frequently than the interest rate indices and repricing terms of our Agency Securities. Accordingly, if short-term interest rates increase, our borrowing costs may increase faster than the interest rates on our adjustable rate securities adjust. As a result, in a period of rising interest rates, we could experience a decrease in net income or a net loss.

Our investment strategy focuses in part on the acquisition of adjustable rate Agency Securities. This means that their interest rates may vary over time based upon changes in an identified short-term interest rate index. In most cases, the interest rate indices and repricing terms of the Agency Securities that we acquire and our borrowings will not be identical, thereby potentially creating an interest rate mismatch between our investments and our borrowings. While the historical spread between relevant short-term interest rate indices has been relatively stable, there have been periods when the spread between these indices was volatile. During periods of changing interest rates, these interest rate index mismatches could reduce our net income or produce a net loss and adversely affect our dividends and the market price of our common stock.

Interest rate caps on our adjustable rate Agency Securities may reduce our income or cause us to suffer a loss during periods of rising interest rates.

The mortgage loans underlying our adjustable rate securities typically will be subject to periodic and lifetime interest rate caps. Additionally, we may invest in adjustable rate mortgages (“ARMs”), with an initial rate that will provide us with a lower than market interest rate initially, which may accordingly have lower interest rate caps than ARMs without such initial rates. Periodic interest rate caps limit the amount an interest rate can increase during a given period. Lifetime interest rate caps limit the amount an interest rate can increase through maturity of a mortgage loan. If these interest rate caps apply to the mortgage loans underlying our adjustable rate securities, the interest distributions made on the related securities will be similarly impacted. Our borrowings may not be subject to similar interest rate caps. Accordingly, in a period of rapidly increasing interest rates, the interest rates paid on our borrowings could increase without limitation while caps would limit the interest distributions on our adjustable rate Agency Securities. Further, some of the mortgage loans underlying our adjustable rate Agency Securities may be subject to periodic payment caps that result in a portion of the interest on those loans being deferred and added to the principal outstanding. As a result, we could receive less interest distributions on adjustable rate Agency Securities than we need to pay interest on our related borrowings. These factors could lower our net interest income, cause us to suffer a net loss or cause us to incur additional borrowings to fund interest payments during periods of rising interest rates or sell our investments at a loss.

Because we invest in fixed rate securities, an increase in interest rates may adversely affect our book value.

Increases in interest rates may negatively affect the market value of our Agency Securities. Any fixed rate securities we invest in generally will be more negatively affected by these increases than adjustable rate securities. In accordance with accounting rules, we are required to reduce our shareholders’ equity, or book value, by the amount of any decrease in the market value of our mortgage related assets. We are required to evaluate our securities on a quarterly basis to determine their fair value by using third party pricing services or third party bid price indications provided by dealers who make markets in these securities. If the fair value of a security is not available from a third party price service or dealer, we would estimate the fair value of the security using a variety of methods including, but not limited to, discounted cash flow analysis, matrix pricing, option-adjusted spread models and fundamental analysis. Aggregate characteristics taken into consideration include, but are not limited to, type of collateral, index, margin, periodic cap, lifetime cap, underwriting standards, age and delinquency experience. However, the fair value reflects estimates and may not be indicative of the amounts we would receive in a current market exchange. If we are required by GAAP to reduce the value of one or more Agency Securities on our balance sheet then our shareholders’ equity would be correspondingly reduced. Reductions in shareholders’ equity decrease the amounts we may borrow to purchase additional securities, which could restrict our ability to increase our net income.

Mitigating against interest rate exposure may adversely affect our earnings and our interest rate risk mitigation transactions may fail to protect us from the losses that they were designed to offset.

Subject to complying with REIT tax requirements, we employ techniques that limit the adverse effects of rising interest rates on a portion of our short-term repurchase agreements and on a portion of the value of our assets. In general, our interest rate mitigation strategy depends on our view of our entire portfolio, consisting of assets, liabilities and derivative instruments, in light of prevailing market conditions. We could misjudge the condition of our portfolio or the market. Our interest rate risk mitigation activity will vary in scope based on the level and volatility of interest rates and principal repayments, the type of securities held and other changing market conditions. Our actual interest rate risk mitigation decisions will be determined in light of the facts and circumstances existing at the time and may differ from our currently anticipated strategy. These techniques may include entering into interest rate swap contracts, purchasing or selling Futures Contracts, or interest rate cap or floor agreements, swaptions, purchasing put and call options on securities or securities underlying Futures Contracts, or entering into forward rate agreements.

Because a mortgage borrower typically has no restrictions on when a loan may be paid off, either partially or in full, there are no perfect interest rate risk mitigation strategies and interest rate mitigation may fail to protect us from loss. Alternatively, we may fail to properly assess a risk to our portfolio or may fail to recognize a risk entirely leaving us exposed to losses without the benefit of any offsetting interest rate mitigation activities. The derivative instruments we select may not have the effect of reducing our interest rate risk. The nature and timing of interest rate risk mitigation transactions may influence the effectiveness of these strategies. Poorly designed strategies or improperly executed transactions could actually increase our risk and losses. In addition, interest rate risk mitigation activities could result in losses if the event against which we mitigate does not occur.

We may not be able to execute desired interest risk mitigation transactions at favorable prices.

We will continue to execute derivative instrument transactions to manage many, but not all, of the risks inherent in our portfolio. This strategy will potentially help us reduce our exposure to significant changes in interest rates but entails significant costs and other risks. These derivative instruments may not be attractively priced in the marketplace and may not be available to us given our financial condition in the future or as a result of other factors. Additionally, we may not successfully implement our business strategy, we may expose ourselves to additional risks and we could suffer significant losses.

Our use of derivative instruments may expose us to counterparty and termination risks.

We enter into transactions to hedge interest rate risks associated with our business with counterparties that have a high-quality credit rating and with futures exchanges. If counterparties, or the exchange, cannot perform under the terms of our Futures Contracts, for example, we would not receive payments due under that agreement and may lose any unrealized gain associated with the Futures Contract and the mitigated liability would cease to be mitigated by the Futures Contract. We may also be at risk for any collateral we have pledged to secure our obligations under the Futures Contract if the counterparty became insolvent or filed for bankruptcy. Similarly, if a counterparty to a cap agreement fails to perform under the terms of the agreement, in addition to not receiving payments due under that agreement that would offset our interest expense, we would also incur a loss for all remaining unamortized premium paid for that agreement. Our derivative instrument agreements generally require our counterparties to post collateral in certain events, generally related to their credit condition, to provide us some protection against their potential failure to perform. We, in turn, are subject to similar requirements. In addition, some of our derivative instrument agreements contain various termination events related to, among other items, our REIT status, equity levels and performance under related agreements which could cause the agreement to terminate at prevailing market levels, resulting in either a payment by us to the counterparty or by the counterparty to us. A termination event could also require us to realize taxable income or loss.

We do not qualify for hedge accounting treatment.

We record derivative and hedge transactions in accordance with GAAP, specifically according to the Accounting Standards Codification (“ASC”) Topic on Derivatives. Under these standards, we do not qualify for hedge accounting treatment for a number of reasons, including if we use instruments that do not meet the definition of a derivative (such as short sales), we fail to satisfy hedge documentation and hedge effectiveness assessment requirements or our instruments are not highly effective. Since we do not qualify for hedge accounting treatment, our operating results will fluctuate because losses on the derivatives we enter into may not be offset by a change in the fair value of the related hedged transaction.

Competition may prevent us from acquiring Agency Securities at favorable yields and that would harm our results of operations.

Our net income largely depends on our ability to acquire Agency Securities at favorable spreads over our borrowing costs. In acquiring Agency Securities, we compete with other REITs, investment banking firms, savings and loan associations, banks, insurance companies, mutual funds, other lenders and other entities that purchase Agency Securities, many of which have greater financial resources than we do. Additionally, many of our competitors are not subject to REIT tax compliance or required to maintain an exemption from the Act. As a result, we may not be able to acquire sufficient Agency Securities at favorable spreads over our borrowing costs, which would harm our results of operations.

We may be harmed by changes in various laws and regulation.

Our net income largely depends on our ability to acquire Agency Securities at favorable spreads over our borrowing costs. In acquiring Agency Securities, we compete with other REITs, investment banking firms, savings and loan associations, banks, insurance companies, mutual funds, other lenders and other entities that purchase Agency Securities, many of which have greater financial resources than we do. Additionally, many of our competitors are not subject to REIT tax compliance or required to maintain an exemption from the Act. As a result, we may not be able to acquire sufficient Agency Securities at favorable spreads over our borrowing costs, which would harm our results of operations.

We may not be able to acquire investments at favorable prices.

We may not be able to acquire Agency Securities at favorable prices. As a result, we may not be able to acquire enough Agency Securities in order to remain fully invested, or we may have to pay more for Agency Securities than we would expect. In either case, the return that we earn on our stockholders' equity may be reduced.

Risks Related to Debt Financing

There is no assurance that our current financing arrangements will remain in place.

During the credit crisis which began in 2007, and which continues to this day, repurchase funding became increasingly more difficult to acquire. Our relationship with AVM, L.P. (“AVM”), a securities broker dealer with which we contract for clearing and settlement services for our securities and derivative transactions, as well as assistance with financing transaction services such as repurchase financing and management of margin arrangements between us and our lenders for each of our repurchase agreements, is beneficial in addressing the potential scarcity of repurchase funding. Nonetheless, we depend on borrowings to fund our acquisitions of Agency Securities and reach our target leverage ratio. Accordingly, our ability to achieve our investment and leverage objectives depends on our ability to borrow money in sufficient amounts and on favorable terms. We have entered into Master Repurchase Agreements establishing the general terms and conditions of borrowings, if any, made by lenders. There can be no assurance that these agreements will remain in place and, even if in place, the amount and definitive terms under which we would be able to borrow. Continued adverse developments in the residential and commercial mortgage markets could make it more difficult for us to borrow money to finance our acquisition of Agency Securities.

Institutions from which we seek to obtain financing may also originate and hold residential and commercial mortgage loans and may have suffered financial difficulties as a result of the market conditions described above. Further, even lenders that do not originate and hold mortgage loans may have suffered losses related to their lending and other financial relationships with the institutions that do so as part of their businesses. As a result, institutions that originate and hold loans and other lenders that have been indirectly affected by losses in the mortgage market may become insolvent or tighten their lending standards which could result in the following:

- our lenders may not be able to obtain financing to fund our borrowings;
- our lenders may require us to enter into restrictive covenants relating to our operations;
- we may not be able to fund acquisitions of sufficient Agency Securities to reach our target leverage ratio; and
- we may become dependent on one or a few lenders for all of our financing.

We may incur increased borrowing costs related to repurchase agreements which could harm our results of operations.

Our borrowing costs under repurchase agreements that we have arranged generally are adjustable and relate to short-term interest rates, such as the Fed Funds and London Interbank Offered Rate. The price of these borrowings may vary depending upon a number of factors, including, without limitation:

- the movement of interest rates;
- the availability of financing in the market, including the financial stability of lenders; and
- the value and liquidity of our Agency Securities.

As of December 31, 2011, the weighted average margin requirement under all our repurchase agreements was approximately 5.0% (weighted by borrowing amount).

We expect that most of our borrowings will be collateralized borrowings in the form of repurchase agreements. If the interest rates on these repurchase agreements increase, our results of operations may be harmed and we may have losses.

We leverage our portfolio investments in Agency Securities, which may adversely affect our return on our investments and may reduce cash available for distribution to our stockholders.

We leverage our portfolio investments in Agency Securities through borrowings under repurchase agreements. Leverage can enhance our potential returns but can also exacerbate losses. The percentage of leverage will vary depending on our investment strategy, ability to obtain these financing facilities and the lender's estimate of the stability of the portfolio investments' cash flow. Our return on our investments and cash available for distribution to our stockholders may be reduced if market conditions cause the cost of our financing to increase relative to the income that can be derived from the assets acquired, which could adversely affect the price of our common stock. In addition, our debt service payments will reduce cash flow available for distributions to stockholders. We may not be able to meet our debt service obligations. To the extent that we cannot meet our debt service obligations, we risk the loss of some or all of our assets to sale to satisfy our debt obligations.

Our leverage strategy increases the risks of our operations, which could reduce our net income and the amount available for distributions or cause us to suffer a loss.

We generally seek to borrow (on a recourse basis) between six and ten times the amount of our shareholders' equity, although we are not limited to that range. We incur this leverage by borrowing against a substantial portion of the market value of our Agency Securities. The amount of leverage, however, is not expressly limited and will depend on our and our lenders' estimate of the stability of our portfolio's cash flow and our ability to service and repay additional debt. We may not be able to meet our debt service obligations and, to the extent we cannot, we may be forced to liquidate our assets at disadvantageous prices and you could lose some or all of your investment.

This leverage, which is fundamental to our investment strategy, also creates significant risks. For example:

- our borrowings are secured by our Agency Securities, generally under repurchase agreements. A decline in the market value of the Agency Securities used to secure these debt obligations could limit our ability to borrow or result in lenders requiring us to pledge additional collateral to secure our borrowings. In that situation, we could be required to sell Agency Securities under adverse market conditions. If these sales are made at prices lower than the carrying value of the Agency Securities, we would experience losses;
- certain lenders may require us to remain in compliance with all provisions of other material contracts, including other financing agreements. As a result, a default under one financing agreement could cause us to be in default under other financing agreements. If that occurs, our access to capital would be significantly impeded, which could materially and adversely affect our ability to operate our business; and
- to the extent we are compelled to liquidate qualified REIT assets to repay debts, our compliance with the REIT rules regarding our assets and our sources of income could be negatively affected, which would jeopardize our qualification as a REIT. Losing our REIT status would cause us to lose tax advantages applicable to REITs and would decrease our overall profitability and distributions to our stockholders, and
- certain of our master repurchase agreements contain a restriction that prohibits our leverage from exceeding twelve times our stockholders' equity.

If we experience losses as a result of our leverage policy, such losses would reduce the amounts available for distribution to our stockholders. Because the assets that we expect to acquire may experience periods of illiquidity, we may be prevented from selling our Agency Securities at opportune times and prices.

We bear the risk of being unable to dispose of our Agency Securities at advantageous times and prices or in a timely manner because Agency Securities may experience periods of illiquidity. The lack of liquidity may result from the absence of a willing buyer or an established market for these assets, as well as legal or contractual restrictions on resale. As a result, the illiquidity of Agency Securities may harm our results of operations and could cause us to suffer a loss and reduce our distributions.

Our use of repurchase agreements to borrow funds may give our lenders greater rights in the event that either we or a lender file for bankruptcy.

Our borrowings under repurchase agreements may qualify for special treatment under the bankruptcy code, giving our lenders the ability to avoid the automatic stay provisions of the bankruptcy code and to take possession of and liquidate our collateral under the repurchase agreements without delay in the event that we file for bankruptcy. Furthermore, the special treatment of repurchase agreements under the bankruptcy code may make it difficult for us to recover our pledged assets in the event that a lender files for bankruptcy. Thus, our use of repurchase agreements will expose our pledged assets to risk in the event of a bankruptcy filing by either a lender or us

Risks Related to Our Corporate Structure

We have not established a minimum dividend payment level and there are no assurances of our ability to pay dividends in the future.

We intend to continue to make regular cash distributions to our shareholders in amounts such that all or substantially all of our taxable income in each year, subject to certain adjustments, is distributed. This, along with other factors, should enable us to qualify for the tax benefits accorded to a REIT under the Code. However, we have not established a minimum dividend payment level and our ability to pay dividends may be adversely affected by the risk factors described in this report. All distributions will be made at the discretion of our Board and will depend on our earnings, our financial condition, maintenance of our REIT status and such other factors as our Board may deem relevant from

time to time. There are no assurances of our ability to pay dividends in the future. In addition, some of our distributions may include a return of capital.

Although we have no intention to do so, we may use proceeds from equity and debt offerings and other financings to fund distributions, which will decrease the amount of capital available for purchasing our target assets.

We presently have no intention of using the proceeds of any offering of our equity or debt or other financings to fund distributions to stockholders. However, there are no restrictions in our charter or in any agreement to which we are a party that prohibits us from doing so. In the event that we elect to fund any distribution to our stockholders from sources other than our earnings, the amount of capital available to us to purchase our target assets would decrease, which could have an adverse effect on our overall financial results and performance.

Maintenance of our exemption from the Investment Company Act will impose limits on our business.

We conduct our business so as not to become regulated as an investment company under the Investment Company Act “the Act”). If we were to fall within the definition of investment company, we would be unable to conduct our business as described in this Annual Report on Form 10-K. Section 3(a)(1)(A) of the Act defines an investment company as any issuer that is or holds itself out as being engaged primarily in the business of investing, reinvesting or trading in securities. Section 3(a)(1)(C) of the Act also defines an investment company as any issuer that is engaged or proposes to engage in the business of investing, reinvesting, owning, holding or trading in securities and owns or proposes to acquire investment securities having a value exceeding 40% of the value of the issuer’s total assets (exclusive of U.S. Government securities and cash items) on an unconsolidated basis. Excluded from the term “investment securities,” among other things, in Section 3(a)(1)(C) of the Act, as defined above, are U.S. Government securities and securities issued by majority-owned subsidiaries that are not themselves investment companies and are not relying on the exception from the definition of investment company set forth in Section 3(c)(1) or Section 3(c)(7) of the Act.

To avoid registration as an investment company, we rely on the exclusion provided by Section 3(c)(5)(C) of the Act. To qualify for the exclusion, we intend to make investments so that at least 55% of the assets we own consist of “qualifying assets” and so that at least 80% of the assets we own consist of qualifying assets and real estate related assets. We generally expect that our investments in Agency Securities will be treated as either qualifying assets or real estate related assets under Section 3(c)(5)(C) of the Act in a manner consistent with the SEC staff no-action letters. Qualifying assets for this purpose include mortgage loans and other assets, such as whole pool Agency Securities that are considered the functional equivalent of mortgage loans for purposes of the Act. We invest at least 55% of our assets in whole pool Agency Securities that constitute qualifying assets in accordance with SEC staff guidance and at least 80% of our assets in qualifying interests plus other real estate related assets. Other real estate related assets would consist primarily of non-whole pool Agency Securities and funds awaiting investment. As a result of the foregoing restrictions, we will be limited in our ability to make or dispose of certain investments. To the extent that the SEC staff publishes new or different guidance with respect to these matters, we may be required to adjust our strategy accordingly. These restrictions could also result in our holding assets we might wish to sell or selling assets we might wish to hold. Although we monitor our portfolio relying on the Section 3(c)(5)(C) exclusion periodically and prior to each acquisition and disposition, there can be no assurance that it will be able to maintain this exclusion.

To the extent that we elect in the future to conduct our operations through wholly-owned subsidiaries, such business will be conducted in a manner as to ensure that we do not meet the definition of investment company under either Section 3(a)(1)(A) or Section 3(a)(1)(C) of the Act. All wholly-owned subsidiaries that we elect to conduct our business through would qualify for the Section 3(c)(5)(C) exclusion discussed above and we would, accordingly, qualify for the Section 3(a)(1)(C) exemption because less than 40% of the value of our total assets on an unconsolidated basis would consist of investment securities. We monitor our portfolio periodically to insure compliance with the 40% test. In such case, we would be a holding company which conducts business exclusively through wholly-owned subsidiaries and we would be engaged in the non-investment company business of our subsidiaries.

Loss of the Act exemption would adversely affect us, the market price of shares of our common stock or warrants and our ability to distribute dividends.

As described above, we conduct our operations so as not to become required to register as an investment company under the Act based on current laws, regulations and guidance. Although we monitor our portfolio, we may not be able to maintain exemption under the Act. If we were to fail to qualify for this exemption in the future, we could be required to restructure our activities or the activities of our subsidiaries, if any, including effecting sales of assets in a manner that, or at a time when we would not otherwise choose, which could negatively affect the value of our common stock or warrants, the sustainability of our business model and our ability to make distributions. The sale could occur during adverse market conditions and we could be forced to accept a price below that which we believe is appropriate.

On August 31, 2011, the SEC issued a concept release (No. IC-29778; File No. SW7-34-11, Companies Engaged in the Business of Acquiring Mortgages and Mortgage-Related Instruments) pursuant to which it is reviewing whether certain companies that invest in MBS and rely on the exemption from registration under Section 3(c)(5)(C) of the Act (such as us) should continue to be allowed to rely on such exemption from registration. If we fail to continue to qualify for this exemption from registration as an investment company, or the SEC determines that companies that invest in MBS are no longer able to rely on this exemption, our ability to use leverage would be substantially reduced and we would be unable to conduct our business as planned, or we may be required to register as an investment company under the Act, either of which could negatively affect the value of shares of our common stock and our ability to make distributions to our shareholders.

We are subject to financial reporting and other requirements for which our accounting, internal audit and other management systems and resources may not be adequately prepared.

We are subject to reporting and other obligations under the Securities Exchange Act of 1934, as amended, including the requirements of Section 404 of the Sarbanes-Oxley Act. Section 404 requires annual management assessments of the effectiveness of our internal controls over financial reporting and a report by our independent registered public accounting firm addressing these assessments as of December 31, 2011. These reporting and other obligations, such as our status as a large accelerated filer, place significant demands on our management, administrative, operational, internal audit and accounting resources and cause us to incur significant expenses. We may need to upgrade our systems or create new systems; implement additional financial and management controls, reporting systems and procedures; expand or outsource our internal audit function; and hire additional accounting, internal audit and finance staff. If we are unable to accomplish these objectives in a timely and effective fashion, our ability to comply with the financial reporting requirements and other rules that apply to reporting companies could be impaired. Any failure to maintain effective internal controls could have a material adverse effect on our business, operating results and stock price.

There are significant restrictions on ownership of our stock and warrants.

In order for us to maintain our qualification as a REIT under the Code, not more than 50% in value of the issued and outstanding shares of our capital stock may be owned, actually or constructively, by five or fewer individuals (as defined in the Code to include certain entities) at any time during the last half of each taxable year (other than our first year as a REIT). This test is known as the "5/50 test." Attribution rules in the Code apply to determine if any individual or entity actually or constructively owns our capital stock for purposes of this requirement, including without limitation, a rule that deems a holder of a warrant or option to purchase stock as owning the shares underlying such warrant or option and a rule that treats shares owned (or treated as owned, including shares underlying warrants) by entities in which an individual has a direct or indirect interest as if they were owned by such individual. Additionally, at least 100 persons must beneficially own our capital stock during at least 335 days of each taxable year (other than our first year as a REIT). While we believe that we currently meet the 5/50 test, no assurance can be given that we will continue to meet this test.

Our charter prohibits beneficial or constructive ownership by any person of more than 9.8% in value or in number of shares, whichever is more restrictive, of the outstanding shares of our capital stock. Additionally, our charter prohibits beneficial or constructive ownership of our stock that would otherwise result in our failure to qualify as a REIT. In each case, such prohibition includes a prohibition on owning warrants or options to purchase stock if ownership of the underlying stock would cause the holder or beneficial owner to exceed the prohibited thresholds. The ownership rules in our charter are complex and may cause the outstanding stock owned by a group of related individuals or entities to be deemed to be owned by one individual or entity. As a result, these ownership rules could cause an individual or entity to unintentionally own shares beneficially or constructively in excess of our ownership limits. Any attempt to own or transfer shares of our common or preferred stock or warrants in excess of our ownership limits without the consent of ARRM or our Board shall be void and will result in the shares being transferred to a charitable trust. These provisions may inhibit market activity and the resulting opportunity for our stockholders to receive a premium for their shares that might otherwise exist if any person were to attempt to assemble a block of shares of our stock in excess of the number of shares permitted under our charter and which may be in the best interests of our stockholders. Currently, there are no holders of our capital stock and/or warrants whose ownership exceeds the thresholds set forth in our charter. We may grant waivers from the 9.8% charter restriction for holders where, based on representations, covenants and agreements received from certain equity holders; we determine that such waivers would not jeopardize our status as a REIT.

Future issuances or sales of shares could cause our share price to decline.

Sales of substantial numbers of shares of our common stock in the public market, or the perception that such sales might occur, could adversely affect the market price of our common stock. In addition, the sale of these shares could impair our ability to raise capital through a sale of additional equity securities.

Other issuances of our common stock could have an adverse effect on the market price of our common stock. In addition, future issuances of our common stock may be dilutive to existing shareholders.

Provisions of Maryland law and other provisions of our organizational documents may limit the ability of a third party to acquire control of the company.

Certain provisions of the MGCL may have the effect of delaying, deferring or preventing a transaction or a change in control of the company that might involve a premium price for holders of our common stock or otherwise be in their best interests. Additionally, our charter and bylaws contain other provisions that may delay or prevent a change of control of the company.

If we have a class of equity securities registered under the Securities Exchange Act and meet certain other requirements, Title 3, Subtitle 8 of the MGCL permits ARRM without stockholder approval and regardless of what is currently provided in our charter or bylaws, to elect on behalf of the company to be subject to statutory provisions that may have the effect of delaying, deferring or preventing a transaction or a change in control of the company that might involve a premium price for holders of our common stock or otherwise be in their best interest. Pursuant to Title 3, Subtitle 8 of the MGCL, once we meet the applicable requirements, our charter provides that our Board will have the exclusive power to fill vacancies on our Board. As a result, unless all of the directorships are vacant, our stockholders will not be able to fill vacancies with nominees of their own choosing. ARRM may elect to opt in to additional provisions of Title 3, Subtitle 8 of the MGCL without stockholder approval at any time that we have a class of equity securities registered under the Securities Exchange Act and satisfy certain other requirements.

Risks Related to Our Management and Conflicts of Interest

We depend on our manager, ARRM and particularly key personnel including Mr. Ulm and Mr. Zimmer. The loss of those key personnel could severely and detrimentally affect our operations.

As an externally-managed company, we depend on the diligence, experience and skill of our manager for the selection, acquisition, structuring, hedging and monitoring of our mortgage backed assets and associated borrowings. We depend on the efforts and expertise of our operating officers to manage our day-to-day operations and strategic business direction. If any of our key personnel were to leave the Company, locating individuals with specialized industry knowledge and skills similar to that of our key personnel may not be possible or could take months. Because we have no employees, the loss of Mr. Ulm and Mr. Zimmer could harm our business, financial condition, cash flow and results of operations.

Messrs. Ulm and Zimmer have a long term relationship with AVM and we have a contract with AVM to provide clearing and settlement services for our securities and derivative transactions. We have also entered into a second contract with AVM to assist us with financing transaction services such as repurchase financings and managing the margin arrangement between us and our lenders for each of our repurchase agreements. We rely on AVM for these aspects of our business so our executive officers can focus on our daily operations and strategic direction. Further, as our business expands, we will be increasingly dependent on AVM to provide us with timely, effective services. In the future, as we expand our staff, we may absorb internally some or all of the services provided by AVM. Until we elect to move those services in-house, we will remain dependent on AVM or other third parties that provide similar services. If we are unable to maintain a relationship with AVM or are unable to establish a successful relationship with other third parties providing similar services at comparable pricing, we may have to reduce or delay our operations and/or increase our expenditures and undertake the repurchase agreement and trading and administrative activities on our own, which could have a material adverse effect on our business operations and financial condition. However, we believe that the breadth and scope of our manager's experience will enable them to fill any needs created by discontinuing a relationship with AVM.

There are conflicts of interest in our relationship with ARRM and its affiliates, which could result in decisions that are not in the best interests of our stockholders or warrant holders.

We are subject to conflicts of interest arising out of our relationship with ARRM and its affiliates. Each of our executive officers and certain of our non-independent directors is also an employee or affiliated with ARRM and they will not be exclusively dedicated to our business. Each of Mr. Ulm and Mr. Zimmer is a partner and owner of equity interests in ARRM.

In addition, Daniel C. Staton and Marc H. Bell, two of our directors, are principal owners of Staton Bell Blank Check LLC or Sub-Manager, which, in consideration for services to be provided to ARRM under a sub-management agreement is entitled to receive a percentage of the net management fee earned by ARRM from us. As a result, the Management Agreement with ARRM may create a conflict of interest and its terms, including fees payable to ARRM, may not be as favorable to us as if they had been negotiated with an unaffiliated third party. In addition, we may choose not to enforce, or to enforce less vigorously, our rights under the Management Agreement because of our desire to maintain our ongoing relationship with ARRM. ARRM maintains a contractual as opposed to a fiduciary relationship with us. The Management Agreement with ARRM does not prevent ARRM and its affiliates from engaging in additional management or investment opportunities some of which will compete with us. ARRM and its affiliates may engage in additional management or investment opportunities that have overlapping objectives with ours and may thus face conflicts in the allocation of investment opportunities to these other investments. Such allocation is at the discretion of ARRM and there is no guarantee that this allocation would be made in the best interest of our stockholders or warrant holders. We are not entitled to receive preferential treatment as compared with the treatment given by ARRM or its affiliates to any investment company, fund or advisory account other than any fund or advisory account which contains only funds invested by ARRM (and not of any of its clients or customers) or its officers and directors. Additionally, the ability of ARRM and its respective officers and employees to engage in other business activities may reduce the time spent managing our activities.

In the future, we may enter, or ARRM may cause us to enter, into additional transactions with ARRM or its affiliates. In particular, we may purchase, or ARRM may cause us to purchase, assets from ARRM or its affiliates or make co-purchases alongside ARRM or its affiliates. These transactions may not be the result of arm's length negotiations and may involve conflicts between our interests and the interests of ARRM and/or its affiliates in obtaining favorable terms and conditions.

Members of our management team have competing duties to other entities, which could result in decisions that are not in the best interests of our stockholders or warrant holders.

Our executive officers and the employees of ARRM do not spend all of their time managing our activities and our investment portfolio. Our executive officers and the employees of ARRM allocate some, or a material portion, of their time to other businesses and activities. For example, each of our executive officers is also an employee or partner of ARRM. None of these individuals is required to devote a specific amount of time to our affairs. Accordingly, we compete with ARRM, its existing activities, investment vehicles, other ventures and possibly other entities in the future for the time and attention of these officers.

If ARRM ceases to be our investment manager, financial institutions providing any financing arrangements to us may not provide future financing to us.

Financial institutions that finance our investments may require that ARRM continue to act in such capacity. If ARRM ceases to be our manager, it may constitute an event of default and the financial institution providing the arrangement may have acceleration rights with respect to outstanding borrowings and termination rights with respect to our ability to finance our future investments with that institution. If we are unable to obtain financing for our accelerated

borrowings and for our future investments under such circumstances, it is likely that we would be materially and adversely affected.

ARRM's failure to make investments on favorable terms that satisfy our investment strategy and otherwise generate attractive risk adjusted returns initially and consistently from time to time in the future would materially and adversely affect us.

Our ability to achieve our investment objective depends on ARRM's personnel and their ability to make investments on favorable terms that satisfy our investment strategy and otherwise generate attractive risk adjusted returns initially and consistently from time to time in the future. Accomplishing this result is also a function of ARRM's ability to execute our financing strategy on favorable terms.

The manner of determining the management fee may not provide sufficient incentive to ARRM to maximize risk adjusted returns on our investment portfolio since it is based on our gross equity raised and not on our performance.

ARRM is entitled to receive a monthly management fee that is based on the total of all gross equity raised (see Note 7 to the consolidated financial statements), as measured as of the date of determination (i.e., each month), regardless of our performance. Accordingly, the possibility exists that significant management fees could be payable to ARRM for a given month despite the fact that we could experience a net loss during that month. ARRM's entitlement to such significant nonperformance-based compensation may not provide sufficient incentive to ARRM to devote its time and effort to source and maximize risk adjusted returns on our investment portfolio, which could, in turn, adversely affect our ability to pay dividends to our stockholders and the market price of our common stock or warrants. Further, the management fee structure gives ARRM the incentive to maximize gross equity raised by the issuance of new equity securities or the retention of existing equity, regardless of the effect of these actions on existing stockholders. In other words, the management fee structure will reward ARRM primarily based on the size of our equity and not on our financial returns to stockholders.

The termination of the Management Agreement may be difficult and costly, which may adversely affect our inclination to end our relationship with ARRM.

Termination of the Management Agreement with ARRM without cause is difficult and costly. The term "cause" is limited to those circumstances described in the Management Agreement with ARRM. The Management Agreement provides that, in the absence of cause, it may be terminated by us only without cause and only during any renewal term following the initial 5-year term of the Management Agreement. ARRM will be provided 180 days prior notice of any such termination by us without cause. Additionally, upon a termination by us without cause, the Management Agreement provides that we will pay ARRM a termination payment equal to three times the sum of the base management fee received by ARRM during the twelve month period before such termination, calculated as of the effective date of termination. This provision increases the effective cost to us of electing to terminate the Management Agreement, thereby adversely affecting our inclination to end our relationship with ARRM prior to the expiration of any renewal term, even if we believe ARRM's performance is not satisfactory.

ARRM may terminate the Management Agreement at any time and for any reason upon 180 days prior notice. If the Management Agreement is terminated and no suitable replacement is found to manage us, we may not be able to execute our business plan.

Additionally, following the initial 5-year term, the Management Agreement will automatically renew for successive 1-year renewal terms unless either we or ARRM give advance notice to the other of our intent not to renew the agreement prior to the expiration of the initial term or any renewal term. However, our right to give such a notice of non-renewal is limited and requires our independent directors to agree that certain conditions are met.

ARRM's liability is limited under the Management Agreement and we have agreed to indemnify ARRM and its affiliates against certain liabilities. As a result, we could experience poor performance or losses for which ARRM would not be liable.

The Management Agreement limits the liability of ARRM and any directors and officers of ARRM for money damages, except for liability resulting from actual receipt of an improper benefit or profit in money, property or services, or a final judgment based upon a finding of active and deliberate dishonesty by the director or officer that was material to the cause of action adjudicated.

Pursuant to the Management Agreement, ARRM will not assume any responsibility other than to render the services called for there under and will not be responsible for any action of our Board in following or declining to follow its

advice or recommendations. ARRM and its affiliates, directors, officers, stockholders, equity holders, employees, representatives and agents and any affiliates thereof, will not be liable to us, our shareholders, any subsidiary of ours, the shareholders of any subsidiary of ours, our Board, any issuer of mortgage securities, any credit-party, any counterparty under any agreement, or any other person for any acts or omissions, errors of judgment or mistakes of law by ARRM or its affiliates, directors, officers, stockholders, equity holders, employees, representatives or agents, or any affiliates thereof, under or in connection with the Management Agreement, except if ARRM was grossly negligent, acted with reckless disregard or engaged in willful misconduct or fraud while discharging its duties under the Management Agreement. We have agreed to indemnify ARRM and its affiliates, directors, officers, stockholders, equity holders, employees, representatives and agents and any affiliates thereof, with respect to all expenses, losses, costs, damages, liabilities, demands, charges and claims of any nature, actual or threatened (including reasonable attorneys' fees), arising from or in respect of any acts or omissions, errors of judgment or mistakes of law (or any alleged acts or omissions, errors of judgment or mistakes of law) performed or made while acting in any capacity contemplated under the Management Agreement or pursuant to any underwriting or similar agreement to which ARRM is a party that is related to our activities, unless ARRM was grossly negligent, acted with reckless disregard or engaged in willful misconduct or fraud while discharging its duties under the Management Agreement. As a result, we could experience poor performance or losses for which ARRM would not be liable.

In addition, our articles of incorporation provide that no director or officer of ours shall be personally liable to us or our stockholders for money damages. Furthermore, our articles of incorporation permit and our by-laws require, us to indemnify, pay or reimburse any present or former director or officer of ours who is made or threatened to be made a party to a proceeding by reason of his or her service to us in such capacity. Officers and directors of ours who are also officers and board members of ARRM will therefore benefit from the exculpation and indemnification provisions of our articles of incorporation and by-laws and accordingly may not be liable to us in such circumstances.

Federal Income Tax Risks

Rapid changes in the values of our target assets may make it more difficult for us to maintain our qualification as a REIT or our exemption from the Act.

If the market value or income potential of our Agency Securities declines as a result of increased interest rates, prepayment rates, general market conditions, government actions or other factors, we may need to increase certain types of our assets and income or liquidate our non-qualifying assets to maintain our REIT qualifications or our exemption from the Act. If the decline in real estate asset values or income occurs quickly, this may be especially difficult to accomplish. We may have to make decisions that we otherwise would not make absent the REIT and the Act considerations.

Our qualification as a REIT subjects us to a broad array of financial and operating parameters that may influence our business and investment decisions and limit our flexibility in reacting to market developments.

In order to qualify and maintain our qualification as a REIT, we must insure:

- that at least 75% of our gross income each year is derived from certain real estate related sources;
- that at least 75% of the value of our assets consists of cash, cash items, government securities and qualified REIT real estate assets at the end of each calendar quarter;
- that the remainder of our investment in securities generally cannot include more than 10% of the outstanding voting securities of any one issuer, or more than 10% of the total value of the outstanding securities of any one issuer; and
 - that no more than 5% of the value of our assets can consist of securities of any one issuer.

If we fail to comply with these requirements, we must dispose of a portion of our assets within 30 days after the end of the calendar quarter in order to avoid losing our REIT status and suffering adverse tax consequences. If we fail to qualify as a REIT, we will be subject to federal income tax as a regular corporation and may face substantial tax liability.

Qualification as a REIT involves the satisfaction of numerous requirements (some on an annual or quarterly basis) established under highly technical and complex provisions of the Code for which only a limited number of judicial or administrative interpretations exist. We believe we currently satisfy all the requirements of a REIT. However, the determination that we satisfy all REIT requirements requires an analysis of various factual matters and circumstances that may not be totally within our control. We have not requested and do not intend to request, a ruling from the Internal Revenue Service, or IRS, that we qualify as a REIT. Accordingly, we are not certain we will be able to qualify and remain qualified as a REIT for federal income tax purposes. Even a technical or inadvertent mistake could jeopardize our REIT status. Furthermore, the U.S. Congress or the IRS might change tax laws or regulations and the courts might issue new rulings, in each case potentially having retroactive effect, which could make it more difficult or impossible for us to qualify as a REIT.

If we fail to qualify as a REIT in any tax year, then:

- we would be taxed as a regular domestic corporation, which, among other things, means that we would be unable to deduct distributions to stockholders in computing taxable income and would be subject to federal income tax on our taxable income at regular corporate rates,
- any resulting tax liability could be substantial and would reduce the amount of cash available for distribution to stockholders and could force us to liquidate assets at inopportune times, causing lower income or higher losses than would result if these assets were not liquidated, and
- unless we were entitled to relief under applicable statutory provisions, we would be disqualified from treatment as a REIT for the subsequent four taxable years following the year during which we lost our qualification and thus, our cash available for distribution to our stockholders would be reduced for each of the years during which we do not qualify as a REIT.

Even if we remain qualified as a REIT, we may face other tax liabilities that reduce our cash flow. Further, we may be subject to certain federal, state and local taxes on our income and property. Any of these taxes would decrease cash available for distribution to our stockholders. Complying with REIT requirements may limit our ability to mitigate interest rate risk effectively or may require us to execute our risk mitigation and derivative activities through a taxable REIT subsidiary (“TRS”).

The existing REIT provisions of the Code may substantially limit our ability to hedge Agency Securities and related borrowings by requiring us to limit our income in each year from derivative transactions, other than qualified REIT hedges, together with any other income not generated from qualified REIT real estate assets, to less than 25% of our gross income. In addition, we must generally limit our aggregate income from hedging and services from all sources, other than from qualified REIT hedges, to less than 5% of our annual gross income. As a result, we may in the future need to conduct certain hedging and derivative activity through a TRS, the income from which will be fully subject to federal, state and local corporate income tax and we may have to limit our use of hedging techniques. This could result in greater risks associated with changes in interest rates than we would otherwise want to incur. If we fail to satisfy the 25% or 5% limitations, unless our failure was due to reasonable cause and not due to willful neglect and we meet certain other technical requirements, we could lose our REIT status for federal income tax purposes. Even if our failure was due to reasonable cause, we may have to pay a penalty tax equal to the amount of income in excess of certain thresholds, multiplied by a fraction intended to reflect our profitability.

Complying with REIT requirements may force us to borrow to make distributions to our stockholders.

As a REIT, we must distribute at least 90% of our annual REIT taxable income (excluding net capital gains) to our stockholders. From time to time, we may generate taxable income greater than our net income for financial reporting purposes from, among other things, the non-taxable unrealized changes in the value of our derivatives, or our taxable income may be greater than our cash flow available for distribution to our stockholders. If we do not have other funds available in these situations, we may be unable to distribute 90% of our taxable income as required by the REIT rules. Thus, we could be required to borrow funds, sell a portion of our assets at disadvantageous prices or find another alternative source of funds. These alternatives could increase our costs or reduce our equity and reduce amounts available to invest in Agency Securities.

Plans should consider ERISA risks of investing in our common stock.

Investment in our common stock may not be appropriate for a pension, profit-sharing, employee benefit, or retirement plan, considering the plan's particular circumstances, under the fiduciary standards of the Employee Retirement Income Security Act, ("ERISA"), or other applicable similar laws including standards with respect to prudence, diversification and delegation of control and the prohibited transaction provisions of ERISA, the Code and any applicable similar laws.

ERISA and Section 4975 of the Code prohibit certain transactions that involve (i) certain pension, profit-sharing, employee benefit, or retirement plans or individual retirement accounts and (ii) any person who is a "party in interest" or "disqualified person" with respect to such plan. Consequently, the fiduciary of a plan contemplating an investment in our common stock should consider whether its company, any other person associated with the issuance of its common stock or any affiliate of the foregoing is or may become a "party in interest" or "disqualified person" with respect to the plan and, if so, whether an exemption from such prohibited transaction rules is applicable.

ERISA may limit our ability to attract capital from Benefit Plan Investors.

It is unlikely that we will qualify as an operating company for purposes of ERISA. Consequently, in order to avoid our assets being deemed to include so-called "plan assets" under ERISA, we will initially limit equity ownership in us by Benefit Plan Investors to less than 25% of the value of each class or series of capital stock issued by us and to prohibit transfers of our common stock to Benefit Plan Investors. Our charter prohibits Benefit Plan Investors from holding any interest in any shares of our capital stock that are not publicly traded. These restrictions on investments in us by Benefit Plan Investors (and certain similar investors) may adversely affect the ability of our stockholders to transfer their shares of our common stock and our ability to attract private equity capital in the future.

Risks Related to Our Securities

The performance of our common stock correlates to the performance of our REIT investments, which may be aggressive, compared to other types of investments.

The investments we make in accordance with our investment objectives may result in a greater amount of risk as compared to alternative investment options, including relatively higher risk of volatility or loss of principal. Our investments may be aggressive and therefore an investment in our common stock may not be suitable for someone with lower risk tolerance.

Future issuances and/or sales of shares of our common stock may depress the market price of our common stock or have adverse consequences for our stockholders.

Our charter provides that we may issue up to 500,000,000 shares of common stock. As of December 31, 2011, 95,436,949 shares of common stock were issued and outstanding and warrants to purchase up to 32,500,000 shares of common stock were issued and outstanding.

We cannot predict the effect, if any, of future issuances or sales of our common stock on the market price of our common stock. Sales of substantial amounts of common stock or the perception that such sales could occur may adversely affect the prevailing market price for our common stock. Also, we may issue additional shares in subsequent public offerings or private placements to acquire new assets or for other purposes. We are not required to offer any such shares to existing stockholders on a preemptive basis. Therefore, it may not be possible for existing stockholders to participate in such future share issuances, which may dilute the existing stockholders' interests.

Our warrants may be exercised in the future, which would increase the number of shares eligible for future resale in the public market.

Outstanding redeemable warrants to purchase an aggregate of 32,500,000 shares of our common stock are currently exercisable at an exercise price of \$11.00 per share and expire in 2013. These warrants likely will be exercised if the market price of the shares of our common stock equals or exceeds the warrant exercise price. Therefore, as long as warrants remain outstanding, there will be a drag on any increase in the price of our common stock in excess of the warrant exercise price. To the extent such warrants are exercised, additional shares of our common stock will be issued, which would dilute the ownership of existing stockholders. Further, if these warrants are exercised at any time in the future at a price lower than the book value per share of our common stock, existing stockholders could suffer substantial dilution of their investment, such dilution could increase in the event the warrant exercise price is lowered.

Our stock price could fluctuate and could cause you to lose a significant part of your investment.

The market price of our securities may be influenced by many factors, many of which are beyond our control, including those described above and the following:

- changes in financial estimates by analysts;
- fluctuations in our quarterly financial results or the quarterly financial results of companies perceived to be similar to us;
- general economic conditions;
- changes in market valuations of similar companies;
- regulatory developments in the U.S.; and
- additions or departures of key personnel at ARRM.

Resulting fluctuations in our stock price could cause you to lose a significant part of your investment.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Facilities

We do not own any real estate or other physical properties. We maintain our executive offices at 3001 Ocean Drive, Suite 201, Vero Beach, Florida 32963. We consider our current office space adequate for our current operations.

Item 3. Legal Proceedings

Our company and our manager are not currently subject to any legal proceedings.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock and warrants are currently listed on the NYSE and the NYSE Amex under the symbols “ARR” and “ARR-WS”, respectively. The following table sets forth the range of high and low closing prices for the common stock and warrants for the period indicated since the consummation of the Business Combination with Enterprise on November 5, 2009:

Quarter ended	Common Stock		Warrants	
	High	Low	High	Low
December 31, 2011	\$ 7.27	\$ 5.91	\$ 0.03	\$ 0.01
September 30, 2011	7.67	6.73	0.05	0.02
June 30, 2011	7.77	7.15	0.07	0.04
March 31, 2011	8.08	7.14	0.08	0.06
December 31, 2010	8.02	7.05	0.09	0.05
September 30, 2010	7.70	6.12	0.08	0.04
June 30, 2010	8.50	6.36	0.17	0.05
March 31, 2010	8.45	6.30	0.20	0.10
December 31, 2009	\$ 9.00	\$ 7.35	\$ 0.25	\$ 0.15

On March 5, 2012, the per share price of our common stock as reported on the NYSE was \$7.13.

Holder of Common Equity

As of March 5, 2012, we had 101 stockholders of record of our outstanding common stock and 2 holders of record of our outstanding warrants. We believe that there are a greater number of beneficial owners of shares of our common stock and warrants.

Dividend Policy

We intend to continue to make regular cash distributions to holders of shares of common stock. Future dividends will be at the discretion of the Board and will depend on our earnings and financial condition, maintenance of our REIT qualification, restrictions on making distributions under MGCL and such other factors as our Board deems relevant. For the year ended December 31, 2011, we paid \$1.40 per share to common stockholders of record as of the applicable record dates; this amount includes \$0.006 per common share of 2011 taxable income that was paid on January 30, 2012. Of the \$1.40 per share, 86.1% represented ordinary income and 13.9% represented capital gain. There was no return of capital for tax purposes.

Graph

The following graph compares the stockholder’s cumulative total return, assuming \$100 invested at January 1, 2011, with all reinvestment of dividends, such as if such amounts had been invested in: (i) our common stock; (ii) the stocks included in the Standard and Poor’s 500 Stock Index (“S&P 500”), (iii) the stocks included in the NAREIT Mortgage REIT Index.

Item 6. Selected Financial Data

Results of Operations

The following table sets forth selected historical financial information derived from our audited financial statements included elsewhere in this Annual Report on Form 10-K for the years ended December 31, 2011, 2010 and 2009. The following data should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our financial statements including the notes thereto, included elsewhere in this Annual Report on Form 10-K. Results of operations for the periods prior to the Business Combination are those of Enterprise.

	Year Ended December 31, 2011	Year Ended December 31, 2010	Year Ended December 31, 2009
Balance Sheet Data			
Total Assets	\$6,207,746,751	\$1,209,223,950	\$126,693,608
Repurchase Agreements	\$5,335,962,345	\$971,675,658	\$46,388,602
Payable for unsettled securities	\$117,884,633	\$125,418,369	\$58,559,479
Statement of Income Data			
Interest Income	\$117,638,569	\$12,160,722	\$446,598
Interest Expense	\$(11,855,947)	\$(1,207,097)	\$(13,433)
Net Interest Income	\$105,782,622	\$10,953,625	\$433,165
Operating Expenses	\$9,711,190	\$1,683,463	\$2,026,925
Net (Loss) Income	\$(9,442,054)	\$6,536,857	\$(1,149,427)
(Loss) Earnings per share – common stock, basic and diluted	\$(0.15)	\$1.12	\$(0.11)
Weighted average shares outstanding	61,421,177	5,854,568	20,459,664
Cash dividends declared per common share	\$1.40	\$1.54	\$0.13
Key Portfolio Statistics			
*Average Agency Securities (1)	\$3,927,434,139	\$369,193,381	\$10,670,293
Average Repurchase Agreements (2)	\$3,902,680,502	\$362,183,283	\$5,531,866
Equity (3)	\$626,605,627	\$108,708,577	\$21,491,096
Average Portfolio Yield (4)	3.00 %	3.29 %	4.59 %
Average Cost of Funds (5)	0.94 %	0.45 %	0.72 %
Interest Rate Spread (6)	2.05 %	2.85 %	3.87 %
Return on Equity (7)	(2.0) %	6.0 %	(5.3) %
Average Annual Portfolio Repayment Rate (8)	13.2 %	13.0 %	8.60 %
Debt to Equity (at period end) (9)	8.52:1	8.94:1	2.16:1
Debt to Additional Paid in Capital (at period end) (10)	7.87:1	8.32:1	2.05:1

* Average numbers for each period are weighted based on days on books and records. All percentages are annualized.

(1) Our daily average investment in Agency Securities was calculated by dividing the sum of our daily Agency Securities investments during the year by the number of days in the period.

(2) Our daily average balance outstanding under our repurchase agreements was calculated by dividing the sum of our daily outstanding balances under our repurchase agreements during the year by the number of days in the period.

(3) Our shareholders’ equity is ending stockholders’ equity for the period.

(4) Our average portfolio yield was calculated by dividing our net interest income by our average Agency Securities.

(5) Our average cost of funds was calculated by dividing our total interest expense (including derivatives) by our average repurchase agreement borrowings.

(6) Our interest rate spread was calculated by subtracting our average cost of funds from our average portfolio yield.

- (7) Our return on equity was calculated by dividing net income by equity.
- (8) Our average annual portfolio repayment rate is calculated by taking the actual CPR for a month and averaging it with the other CPR's from the same year.
- (9) Our debt-to-equity ratio was calculated by dividing the amount outstanding under our repurchase agreements at period end by total shareholders' equity at period end.
- (10) Our debt to additional paid in capital ratio was calculated by dividing the amount outstanding under our repurchase agreements at period end by additional paid in capital at period end.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition and results of operations should be read in conjunction with our financial statements and related notes included elsewhere in this report.

References to “we”, “us”, “our”, “ARMOUR” or the “Company” are to ARMOUR Residential REIT, Inc. References to “ARMOUR Management” are to ARMOUR Residential Management LLC, a Delaware limited liability company. References to “Enterprise” are to Enterprise Acquisition Corp., which became a wholly-owned subsidiary of ARMOUR after completion of the business combination (“Merger Agreement”) described below.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains various “forward-looking statements.” Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as “believes,” “expects,” “may,” “will,” “would,” “could,” “should,” “seeks,” “approximately,” “intends,” “plans,” “estimates” or “anticipates” or the negative of these words and phrases or similar words or phrases. All forward-looking statements may be impacted by a number of risks and uncertainties, including statements regarding the following subjects:

- our business and investment strategy;
- our anticipated results of operations;
- statements about future dividends;
- our ability to obtain financing arrangements;
- our understanding of our competition and ability to compete effectively;
- market, industry and economic trends; and
- interest rates.

The forward-looking statements in this report are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. You should carefully consider these risks before you make an investment decision with respect to our common stock, along with the following factors that could cause actual results to vary from our forward-looking statements:

- (1)the factors referenced in this report, including those set forth under the section captioned “Risk Factors”;
- (2)the federal conservatorship of Fannie Mae and Freddie Mac and related efforts, along with any changes in laws and regulations affecting the relationship between Fannie Mae and Freddie Mac and the federal government and the federal reserve system;
- (3)mortgage loan modification programs and future legislative action;
- (4)availability, terms and deployment of capital;
- (5)changes in economic conditions generally;
- (6)changes in interest rates, interest rate spreads and the yield curve or prepayment rates;

(7)general volatility of the financial markets, including markets for mortgage securities;

(8)inflation or deflation;

(9)availability of suitable investment opportunities;

(10)the degree and nature of our competition, including competition for Agency Securities from the U.S. Treasury;

(11)changes in our business and investment strategy;

(12)our dependence on our manager and ability to find a suitable replacement if our manager were to terminate their management relationship with us;

(13)the existence of conflicts of interest in our relationship with our manager, certain of our directors and our officers, which could result in decisions that are not in the best interest of our stockholders;

(14)changes in personnel at our manager or the availability of qualified personnel at our manager;

(15)limitations imposed on our business by our status as a REIT;

(16)changes in GAAP in the U.S., including interpretations thereof; and

(17)changes in applicable laws and regulations.

We cannot guarantee future results, levels of activity, performance or achievements. You should not place undue reliance on forward-looking statements, which apply only as of the date of this report. We do not intend and disclaim any duty or obligation to update or revise any industry information or forward-looking statements set forth in this report to reflect new information, future events or otherwise, except as required under the U.S. Federal securities laws.

Overview

We are an externally-managed Maryland corporation organized in 2008, managed by ARRM. We invest primarily in hybrid adjustable rate, adjustable rate and fixed rate residential mortgage backed securities issued or guaranteed by a U.S. Government-sponsored entity (“GSE”), such as the Federal National Mortgage Association (more commonly known as Fannie Mae) and the Federal Home Loan Mortgage Corporation (more commonly known as Freddie Mac), or guaranteed by the Government National Mortgage Administration, a U.S. Government corporation (more commonly known as Ginnie Mae) (collectively, “Agency Securities”). From time to time, a portion of our portfolio may be invested in unsecured notes and bonds issued by U.S. Government-chartered entities (collectively, “Agency Debt”), U.S. Treasuries and money market instruments, subject to certain income tests we must satisfy for our qualification as a real estate investment trust (“REIT”). On December 1, 2011, our stockholders approved an amendment to our charter to broaden our investment asset class restriction in response to potential changes in Agency Securities to include non-Agency as well as Agency Securities in our investment asset class restriction. While we remain committed to investing in Agency Securities for so long as an adequate supply and pricing exists, we believe it is prudent for us to have the flexibility to invest in non-Agency Securities and respond to changes in GSE policy.

We seek attractive long-term investment returns by investing our equity capital and borrowed funds in our targeted asset class of Agency Securities. We earn returns on the spread between the yield on our assets and our costs, including the interest cost of the funds we borrow, after giving effect to our hedges. We intend to qualify and have elected to be taxed as a REIT under the Internal Revenue Code (“the Code”). We will generally not be subject to federal income tax to the extent that we distribute our taxable income to our shareholders and as long as we satisfy the ongoing REIT requirements including meeting certain asset, income and stock ownership tests. Our business plan is to identify and acquire Agency Securities, finance our acquisitions with borrowings under a series of short-term repurchase agreements at the most competitive interest rates available to us and then cost-effectively mitigate our interest rate and other risks based on our entire portfolio of assets, liabilities and derivatives and our management's view of the market. Successful implementation of our business plan requires us to address interest rate risk, maintain adequate liquidity and effectively mitigate interest rate risks. We execute our business plan in a manner consistent with our intention of qualifying as a REIT and avoiding regulation as an investment company.

Our Manager

We are externally-managed by ARRM pursuant to our Management Agreement (see Note 7 to the consolidated financial statements). All of our executive officers are also employees of ARRM. ARRM manages our day-to-day

operations, subject to the direction and oversight of the Board of Directors (“Board”). The Management Agreement expires on November 6, 2014, and is thereafter automatically renewed for an additional one-year term unless terminated under certain circumstances. ARRM must provide 180 days prior notice of any such termination.

ARRM is entitled to receive a management fee payable monthly in arrears in an amount equal to 1/12th of an amount, with a minimum based on 1/12th of \$900,000, (inclusive of the original gross merger equity as defined below), determined as follows:

- our gross equity raised up to \$50 million, 1% (per annum) of gross equity;
- our gross equity raised up to \$1.0 billion, 1.5% (per annum) of gross equity;
- our gross equity raised in excess of \$1.0 billion, 0.75% (per annum) of gross equity.

“Gross Equity Raised” represents an amount in dollars calculated as of the date of determination that is equal to (a) our initial equity capital following the consummation of the Merger (see below), plus (b) equity capital raised in public or private issuances of our equity securities (calculated before underwriting fees and distribution expenses, if any), less (c) capital returned to our stockholders, as adjusted to exclude (d) one-time charges pursuant to changes in GAAP and certain non-cash charges after discussion between the Manager and the Board and approved by a majority of the Board.

Enterprise Acquisition Corp. (prior to November 6, 2009)

Enterprise was a Delaware blank check company incorporated on July 9, 2007, in order to serve as a vehicle for the acquisition of one or more operating businesses.

On July 29, 2009, Enterprise entered into an Agreement and Plan of Merger (the “Merger” and “Merger Agreement”), with ARMOUR and ARMOUR Merger Sub Corp., a Delaware corporation and a wholly-owned subsidiary of ARMOUR (“Merger Sub Corp.”). The Merger Agreement provided for two primary transactions: (i) the merger of Merger Sub Corp. with and into Enterprise with Enterprise surviving the merger and becoming a wholly-owned subsidiary of ARMOUR and (ii) ARMOUR becoming the new publicly-traded corporation of which the holders of Enterprise securities became security holders of ARMOUR. A summary of these transactions is as follows:

- On November 5, 2009, the stockholders of Enterprise approved certain proposals to: (i) amend Enterprise's amended and restated certificate of incorporation to allow for a business combination with ARMOUR and (ii) adopt the Merger Agreement and approve the merger of Merger Sub Corp. with and into Enterprise, which we refer to as the Business Combination.
- On November 6, 2009, Merger Sub Corp. merged with and into Enterprise pursuant to the Merger Agreement. In connection with the closing, the holders of Enterprise common stock and warrants became holders of the securities of ARMOUR after the Business Combination.

Factors that Affect our Results of Operations and Financial Condition

Our results of operations and financial condition are affected by various factors, many of which are beyond our control, including, among other things, our net interest income, the market value of our assets and the supply of and demand for such assets. We invest in financial assets and markets and recent events, such as those discussed below, can affect our business in ways that are difficult to predict and may produce results outside of typical operating variances. Our net interest income varies primarily as a result of changes in interest rates, borrowing costs and prepayment speeds, the behavior of which involves various risks and uncertainties. Prepayment rates, as reflected by the rate of principal pay downs and interest rates vary according to the type of investment, conditions in financial markets, government actions, competition and other factors, none of which can be predicted with any certainty. In general, as prepayment rates on our Agency Securities purchased at a premium increase, related purchase premium amortization increases, thereby reducing the net yield on such assets. Because changes in interest rates may significantly affect our activities, our operating results depend, in large part, upon our ability to manage interest rate risks and prepayment risks effectively while maintaining our status as a REIT. In addition, since we do not qualify to use cash flow hedge accounting, earnings reported in accordance with GAAP will fluctuate even in situations where our derivatives are operating as intended. As a result of this mark-to-market accounting treatment, our results of operations are likely to fluctuate far more than if we were able to designate our derivative activities as cash flow hedges. Comparisons with companies that are eligible to use cash flow hedge accounting for all or part of their derivative activities may not be meaningful.

We anticipate that, for any period during which changes in the interest rates earned on our assets do not coincide with interest rate changes on our borrowings, such assets will reprice more slowly than the corresponding liabilities. Consequently, changes in interest rates, particularly short-term interest rates, may significantly influence our net interest income. With the maturities of our assets generally of longer term than those of our liabilities, interest rate increases will tend to decrease our net interest income and the market value of our assets (and therefore our book value). Such rate increases could possibly result in operating losses or adversely affect our ability to make distributions to our shareholders.

Prepayments on Agency Securities and the underlying mortgage loans may be influenced by changes in market interest rates and a variety of economic and geographic factors beyond our control, as well as policy decisions by Fannie Mae, Freddie Mac and Ginnie Mae. Consequently prepayment rates cannot be predicted with certainty. To the extent we have acquired Agency Securities at a premium or discount to par, or face value, changes in prepayment rates may impact our anticipated yield. In periods of declining interest rates, prepayments on our Agency Securities will likely increase. If we are unable to reinvest the proceeds of such prepayments at comparable yields, our net interest income may suffer. The recent climate of government intervention in the mortgage markets significantly increases the risk associated with prepayments.

While we intend to use strategies to economically mitigate some of our interest rate risk, we do not intend to mitigate all of our exposure to changes in interest rates and prepayment rates, as there are practical limitations on our ability to insulate our portfolio from all potential negative consequences associated with changes in short-term interest rates in a manner that will allow us to seek attractive net spreads on our portfolio.

In addition, a variety of other factors relating to our business may also impact our financial condition and operating performance. These factors include:

- our degree of leverage;
- our access to funding and borrowing capacity;
- our use of derivatives to mitigate interest rate risk; and
- the REIT requirements, the requirements to qualify for an exemption under the Act and other regulatory and accounting policies related to our business.

ARRM, our manager, is entitled to receive a monthly management fee that is based on our gross equity raised (see Note 7 to the consolidated financial statements), regardless of the performance of our portfolio. Accordingly, the payment of our monthly management fee may not decline in the event of a decline in our earnings and may cause us to incur losses.

For a discussion of additional risks relating to our business see “Risk Factors” in Item 1A above.

Market and Interest Rate Trends and the Effect on our Portfolio

Credit Market Disruption and Current Conditions

During the past few years, the residential housing and mortgage markets in the U.S. have experienced a variety of difficulties and changed economic conditions including loan defaults, credit losses and decreased liquidity. These conditions have resulted in volatility in the value of the Agency Securities we purchase and an increase in the average collateral requirements under our repurchase agreements. While these markets have recovered a great deal, further increased volatility and deterioration in the broader residential mortgage and Residential Mortgage Backed Securities (“RMBS”) markets may adversely affect the performance and market value of the Agency Securities and other high quality RMBS.

The uncertainty in the U.S. interest rate markets in 2011 has produced volatility and opportunities in our markets. Early in 2011, optimism about an economic acceleration caused many economists to increase their U.S. Gross Domestic Product forecast, with some predicting a U.S. Federal Reserve tightening of monetary policy in early 2012. However, the Federal Reserve’s Federal Open Market Committee (“FOMC”) noted in late January 2012 that despite some evidence of moderate expansion in the economy and improvement in overall labor conditions and increase in household spending, the unemployment rate remains elevated, business fixed investment has slowed and the housing sector remains depressed. Because of low rates of resource utilization and a subdued outlook for inflation the FOMC said in its January meeting that it anticipates current economic conditions are likely to warrant exceptionally low levels for the federal funds rate at least through late 2014. This environment and outlook has created strong demand for Agency Securities and has also reduced the costs of our financing and hedging.

On August 5, 2011, Standard & Poor’s Corporation downgraded the U.S.’s credit rating from AAA to AA+ and on August 8, 2011, Fannie Mae and Freddie Mac’s credit ratings were downgraded from AAA to AA+. Because Fannie Mae and Freddie Mac are in conservatorship of the U.S. Government, the U.S.’s credit rating downgrade and Fannie Mae and Freddie Mac’s credit rating downgrades will impact the credit risk associated with Agency Securities and, therefore, may decrease the value of the Agency Securities in our portfolio.

Developments at Fannie Mae and Freddie Mac

Payments on the Agency Securities in which we invest are guaranteed by Fannie Mae and Freddie Mac. Because of the guarantee and the underwriting standards associated with mortgages underlying Agency Securities, Agency Securities historically have had high stability in value and been considered to present low credit risk. In 2008, Fannie Mae and Freddie Mac were placed under the conservatorship of the U.S. Government due to the significant weakness of their financial condition. It is unclear how and when Fannie Mae and Freddie Mac may be restructured by the U.S. Government and the impact that may have on our existing portfolio and continuing investment strategy.

In response to the credit market disruption and the deteriorating financial condition of Fannie Mae and Freddie Mac, Congress and the U.S. Treasury undertook a series of actions in 2008 aimed at stabilizing the financial markets in general and the mortgage market in particular. These actions include the large-scale buying of mortgage backed securities, significant equity infusions into banks and aggressive monetary policy.

In addition, the U.S. Federal Reserve initiated a program in 2008 to purchase \$200.0 billion in direct obligations of Fannie Mae, Freddie Mac and the Federal Home Loan Banks and \$1.3 trillion in Agency Securities issued and guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae. The U.S. Federal Reserve stated that its actions were intended to reduce the cost and increase the availability of credit for the purchase of houses, which in turn was expected to support housing markets and foster improved conditions in financial markets more generally. This purchase program was completed on March 31, 2010. We are unable to predict the timing or manner in which the U.S. Treasury or the Federal Reserve will liquidate their holdings or make further interventions in the Agency Securities markets, or what impact, if any, such action could have on the Agency Securities market, the Agency Securities we hold, our business, results of operations and financial condition.

In February 2010, Fannie Mae and Freddie Mac announced that they would execute wholesale repurchases of loans which they considered seriously delinquent from existing mortgage pools. This action temporarily decreased the value of these securities until complete details of the programs and the timing were announced and reduced our yield in the months of repayment. Freddie Mac implemented its purchase program in February 2010 with actual purchases beginning in March 2010. Fannie Mae began their process in March 2010 and announced it would implement the initial purchases over a period of three months, beginning in April 2010. Further, both agencies announced that on an ongoing basis they would purchase loans from the pools of mortgage loans underlying their mortgage pass-through certificates that became 120 days delinquent.

In February 2011, the U.S. Treasury along with the U.S. Department of Housing and Urban Development released a report entitled, "Reforming America's Housing Finance Market" to the U.S. Congress outlining recommendations for reforming the U.S. housing system, specifically Fannie Mae and Freddie Mac and transforming the U.S. Government's involvement in the housing market. It is unclear how future legislation may impact the housing finance market and the investing environment for Agency Securities as the method of reform is undecided and has not yet been defined by the regulators. Without U.S. Government support for residential mortgages, we may not be able to execute our current business model in an efficient manner.

We cannot predict whether or when new actions may occur, the timing and pace of current actions already implemented, or what impact if any, such actions, or future actions, could have on our business, results of operations and financial condition.

U.S. Government Market Intervention

The U.S. Federal Reserve's program to purchase Agency Securities which had commenced in January 2009 and was terminated on March 31, 2010 has a significant impact on market prices. In total, \$1.3 trillion of Agency Securities were purchased. In addition, through the course of 2009, the U.S. Treasury purchased \$250.0 billion of Agency Securities. An effect of these purchases has been an increase in the prices of Agency Securities, which has decreased our net interest margin. When these programs terminated, the market expectation was that it might cause a decrease in demand for these securities which would likely reduce their market price. However, this has not happened and we continue to see strong demand as these securities remain desirable assets in this rather volatile economic environment. It is difficult to quantify the impact, as there are many factors at work at the same time that affect the price of Agency Securities and, therefore, our yield and book value. Due to the unpredictability in the markets for our securities in particular and yield generating assets in general, there is no pattern that can be implied with any certainty. In March 2011, the U.S. Treasury announced that it will begin the orderly wind down of its remaining Agency Securities with sales up to \$10.0 billion per month, subject to market conditions. It is unclear how these sales will affect market conditions and pricing. On September 21, 2011, the U.S. Federal Reserve announced that it will begin reinvesting principal payments from its holdings of Agency Debt and Agency mortgage backed securities into Agency mortgage backed securities.

Financial Regulatory Reform Bill and Other Government Activity

We believe that we conduct our business in a manner that allows us to avoid being regulated as an investment company under the Investment Company Act pursuant to the exemption provided by Section 3(c)(5)(C) for entities that are primarily engaged in the business of purchasing or otherwise acquiring “mortgages and other liens on and interests in real estate.” On August 31, 2011, the SEC issued a concept release (No. IC-29778; File No. SW7-34-11, Companies Engaged in the Business of Acquiring Mortgages and Mortgage-Related Instruments) pursuant to which it is reviewing whether certain companies that invest in MBS and rely on the exemption from registration under Section 3(c)(5)(C) of the Act (such as us) should continue to be allowed to rely on such exemption from registration. If we fail to continue to qualify for this exemption from registration as an investment company, or the SEC determines that companies that invest in MBS are no longer able to rely on this exemption, our ability to use leverage would be substantially reduced and we would be unable to conduct our business as planned, or we may be required to register as an investment company under the Act, either of which could negatively affect the value of shares of our common stock and our ability to make distributions to our shareholders.

Certain programs initiated by the U.S. Government, through the Federal Housing Administration and the Federal Deposit Insurance Corporation (“FDIC”), to provide homeowners with assistance in avoiding residential mortgage loan foreclosures are currently in effect. The programs may involve, among other things, the modification of mortgage loans to reduce the principal amount of the loans or the rate of interest payable on the loans, or to extend the payment terms of the loans. While the effect of these programs has not been as extensive as originally expected, the effect of such programs for holders of Agency Securities could be that such holders would experience changes in the anticipated yields of their Agency Securities due to (i) increased prepayment rates and (ii) lower interest and principal payments.

On July 21, 2010, President Obama signed the Dodd-Frank Act into law. The Dodd-Frank Act is extensive, complicated and comprehensive legislation that impacts practically all aspects of banking, and a significant overhaul of many aspects of the regulation of the financial services industry. Although many provisions remain subject to further rulemaking, the Dodd-Frank Act implements numerous and far-reaching changes that affect financial companies, including our company, and other banks and institutions which are important to our business model. Certain notable rules are, among other things:

- Requiring regulation and oversight of large, systemically important financial institutions by establishing an interagency council on systemic risk and implementation of heightened prudential standards and regulation by the Board of Governors of the U.S. Federal Reserve for systemically important financial institutions (including nonbank financial companies), as well as the implementation of the FDIC resolution procedures for liquidation of large financial companies to avoid market disruption;
- applying the same leverage and risk-based capital requirements that apply to insured depository institutions to most bank holding companies, savings and loan holding companies and systemically important nonbank financial companies;
- limiting the U.S. Federal Reserve's emergency authority to lend to nondepository institutions to facilities with broad-based eligibility, and authorizing the FDIC to establish an emergency financial stabilization fund for solvent depository institutions and their holding companies, subject to the approval of Congress, the Secretary of the U.S. Treasury and the U.S. Federal Reserve;
- creating regimes for regulation of over-the-counter derivatives and non-admitted property and casualty insurers and reinsurers;
- implementing regulation of hedge fund and private equity advisers by requiring such advisers to register with the SEC;
- providing for the implementation of corporate governance provisions for all public companies concerning proxy access and executive compensation; and
- reforming regulation of credit rating agencies.

Many of the provisions of the Dodd-Frank Act, including certain provisions described above are subject to further study, rulemaking, and the discretion of regulatory bodies. As the hundreds of regulations called for by the Dodd-Frank Act are promulgated, we will continue to evaluate the impact of any such regulations. It is unclear how this legislation may impact the borrowing environment, investing environment for Agency Securities and interest rate swaps as much of the bill's implementation has not yet been defined by the regulators.

In addition, in 2010, the Group of Governors and Heads of Supervisors of the Basel Committee on Banking Supervision, the oversight body of the Basel Committee, published its "calibrated" capital standards for major banking institutions ("Basel III"). Under these standards, when fully phased in on January 1, 2019, banking institutions will be required to maintain heightened Tier 1 common equity, Tier 1 capital and total capital ratios, as well as maintaining a "capital conservation buffer." Beginning with the Tier 1 common equity and Tier 1 capital ratio requirements, Basel III will be phased in incrementally between January 1, 2013 and January 1, 2019. The final package of Basel III reforms were approved by the G20 leaders in November 2010 and are subject to individual adoption by member nations, including the United States by January 1, 2013. It is unclear how the adoption of Basel III will affect our business at this time.

In September 2011, the White House announced work on a major initiative to allow certain homeowners who owe more on their mortgages than their homes are worth to refinance. In October 2011, the FHFA announced changes to HARP to expand access to refinancing for qualified individuals and families whose homes have lost value, including increasing the HARP loan-to-value ratio above 125%. However, this would only apply to mortgages guaranteed by the U.S. government-sponsored entities. In addition, the expansion does not change the time period which these loans were originated, maintaining the requirement that the loans must have been guaranteed by Fannie Mae or Freddie Mac prior to June 2009. There are many challenging issues to this proposal, notably the question as to whether a loan with a loan-to-value ratio of 125% qualifies as a mortgage or an unsecured consumer loan. The chances of this initiative's success have created additional uncertainty in the Agency Securities market, particularly with respect to possible increases in prepayment rates. We do not expect this announcement to have a significant impact on our results of operations.

On January 4, 2012, the U.S. Federal Reserve released a report titled “The U.S. Housing Market: Current Conditions and Policy Considerations” to Congress providing a framework for thinking about certain issues and tradeoffs that policy makers might consider. It is unclear how future legislation may impact the housing finance market and the investing environment for Agency Securities as the method of reform is undecided and has not yet been defined by the regulators.

Interest Rates

The overall credit market deterioration since August 2007 has also affected prevailing interest rates. For example, interest rates have been unusually volatile since the third quarter of 2007. Since September 18, 2007, the U.S. Federal Reserve has lowered the target for the Federal Funds Rate nine times from 4.75% to 1.00% in October 2008. In December 2008, the Federal Reserve stated that it was adopting a policy of “quantitative easing” and would target keeping the Federal Funds Rate between 0.00% and 0.25%. To date, the Federal Reserve has maintained that target range. Our funding costs, which traditionally have tracked the 30-day London Interbank Offered Rate (“LIBOR”) have generally benefited by this easing of monetary policy, although to a somewhat lesser extent. Because of continued uncertainty in the credit markets and U.S. economic conditions, we expect that interest rates are likely to experience continued volatility, which will likely affect our financial results since our cost of funds is largely dependent on short-term rates.

Historically, 30-day LIBOR has closely tracked movements in the Federal Funds Rate and the Effective Federal Funds Rate. The Effective Federal Funds Rate can differ from the Federal Funds Rate in that the Effective index represents the volume weighted average of interest rates at which depository institutions lend balances at the Federal Reserve to other depository institutions overnight (actual transactions, rather than target rate).

Our borrowings in the repurchase market have also historically closely tracked the Federal Funds Rate and LIBOR. So traditionally, a lower Federal Funds Rate has indicated a time of increased net interest margin and higher asset values. However, since July 2007 (prior to our commencement of operations) LIBOR and repurchase market rates have varied greatly and often have been significantly higher than the target and the Effective Federal Funds Rate. The difference between 30-day LIBOR and the Effective Federal Funds rate has also been quite volatile, with the spread alternately returning to more normal levels and then widening out again. The volatility in these rates and divergence from the historical relationship among these rates could negatively impact our ability to manage our portfolio. If this were to occur, our net interest margin and the value of our portfolio might suffer as a result. The following table shows 30-day LIBOR as compared to the Effective Federal Funds rate at each period end:

Quarter ended	30-Day LIBOR		Effective Federal Funds Rate	
December 31, 2011	0.30	%	0.04	%
September 30, 2011	0.24		0.06	
June 30, 2011	0.19		0.07	
March 31, 2011	0.24		0.10	
December 31, 2010	0.26		0.13	
September 30, 2010	0.26		0.15	
June 30, 2010	0.35		0.09	
March 31, 2010	0.25		0.09	
December 31, 2009	0.23		0.05	

Principal Repayment Rate

Our net income is primarily a function of the difference between the yield on our assets and the financing cost of owning those assets. Since we tend to purchase assets at a premium to par, the main item that can affect the yield on our assets after they are purchased is the rate at which the mortgage borrowers repay the loan. While the scheduled repayments, which are the principal portion of the homeowners' regular monthly payments, are fairly predictable, the unscheduled repayments, which are generally refinancing of the mortgage but can also result from repurchases of delinquent, defaulted, or modified loans, are less so. Being able to accurately estimate and manage these repayment rates is a critical portion of the management of our portfolio, not only for estimating current yield but also for considering the rate of reinvestment of those proceeds into new securities, the yields which those new securities may add to our portfolio and our hedging strategy. We expect that prepayment rates will be elevated due to repurchases of loans that reach 120 day or more delinquency by Freddie Mac and Fannie Mae on a continuing basis.

The following table shows the average principal repayment rate for those securities which have settled for each quarter since our commencement of operations (as our operations commenced in November 2009, there is only one month of prepayment data for 2009 for our portfolio of settled Agency Securities):

Quarter ended	Average Quarterly Principal Repayment Rate
December 31, 2011	19.3 %
September 30, 2011	12.4
June 30, 2011	9.3
March 31, 2011	11.7
December 31, 2010	10.8
September 30, 2010	11.1
June 30, 2010	15.4
March 31, 2010	14.5
December 31, 2009	8.6

We typically purchase Agency Securities at premium prices. The premium price paid over par value on those assets is expensed as the underlying mortgages experience repayment or prepayment. The lower the constant prepayment rate, the lower the amount of amortization expense for a particular period. Accordingly, the yield on an asset and earnings, are higher. If prepayment rates increase, the amount of amortization expense for a particular period will go up. These increased prepayment rates would act to decrease the yield on an asset and would decrease earnings.

Book Value per Share

In general, our book value is most affected by our issuance of shares of our common stock, our retained earnings or losses, and changes in the value of our investment portfolio and our derivative instruments. As of December 31, 2011, our book value per share of common stock (total shareholders' equity divided by shares of common stock outstanding) was \$6.57, a decrease of \$0.04 from \$6.61 at December 31, 2010. Book value increased for the first three quarters of 2011 compared to the year ended December 31, 2010. The increase was primarily attributable to shareholder accretion from equity capital raised during the periods. We made a strategic decision in the fourth quarter of 2011 to sell certain assets at a profit and to increase liquidity. We expected and, indeed did, reinvest the proceeds of those sales during the early part of January 2012. During the period between the sales and the reinvestment of those proceeds our hedge ratio increased because hedges were not unwound contemporaneously with the sales. The change in the value of our interest rate swap contracts at the end of the fourth quarter was the primary reason that book value

declined during the fourth quarter of 2011.

Although we attempt to structure our derivatives to offset the changes in asset prices, they are not perfectly correlated and depend on the corresponding durations and sections of the yield curve that moves to offset each other. Our derivatives, which consist of interest rate swap contracts and Futures Contracts act to fix the borrowing cost on a portion of our financing and generally help to mitigate some of the change in our book value. Generally, the value of our derivatives move in the opposite direction of the value of our Agency Securities. In an environment of very low interest rates, further interest rate reductions may cause the value of our derivative positions to decline more than the absolute and pro rata increase in the value of our Agency Securities. For the year ended December 31, 2011, the change in the fair value of our derivative positions decreased by \$119.1 million and the unrealized change in the fair value of our Agency Securities increased by \$69.6 million. For the year ended December 31, 2010, the unrealized change in the fair value of our derivative positions decreased by \$2.6 million and the unrealized change in the fair value of our Agency Securities decreased by \$4.3 million. For the year ended December 31, 2009, the unrealized change of our derivative positions increased by \$0.05 million and the unrealized change in the fair value of our Agency Securities increased by \$0.04 million.

Investments

Agency Securities

As of December 31, 2011, our Agency Security portfolio, both trades that have settled and forward settle trades that we have committed to settle, consisted of approximately \$5.4 billion in market value of Agency Securities with initial fixed-interest rate periods of three years, five years, seven years, ten years, fifteen years and twenty years.

As of December 31, 2011, our Agency Securities portfolio was purchased at a net premium to par value with a weighted average amortized cost, including settled and forward settle purchased securities of 104.23%, due to the average interest rates on these securities being higher than prevailing market rates. As of December 31, 2011, we had approximately \$216.7 million of unamortized premium included in the cost basis of our investments, inclusive of both settled and forward settle purchased securities. As of December 31, 2011, our investment portfolio of securities consisted of Agency Securities as follows:

Edgar Filing: Armour Residential REIT, Inc. - Form 10-K

- (1) The current face is the current monthly remaining dollar amount of principal of an Agency Security. We compute current face by multiplying the original face value of the security by the current principal balance factor. The current principal balance factor is a fraction, where the numerator is the current outstanding balance and the denominator is the original principal balance.
- (2) For a pass-through certificate, the coupon reflects the weighted average nominal rate of interest paid on the underlying mortgage loans, net of fees paid to the servicer and the agency. The coupon for a pass-through certificate may change as the underlying mortgage loans are prepaid.
- (3) Amortized purchase price is the dollar amount, per \$100 of current face, of our purchase price for the security, adjusted for amortization as a result of scheduled and unscheduled principal repayments.
- (4) Amortized cost is our total purchase price for the Agency Security, adjusted for amortization as a result of scheduled and unscheduled principal repayments.
- (5) Market price is the dollar amount of market value, per \$100 of nominal, or face value, of the Agency Security. We value our Agency Securities using a third-party pricing service whose pricing model incorporates common market pricing methods. Management reviews the pricing to ensure that current

market conditions are properly represented.

(6) Market value is the total fair value for the security.

As of December 31, 2011, we had committed to purchase securities for settlements in January of 2012. The information below was current as of December 31, 2011, but subject to change due to amortization prior to settlement. In addition, some forward trades of new issue securities are subject to modest changes in delivery size and coupon.

Fixed Rate Forward Settle Purchased Securities as of December 31, 2011

The current principal balance factor is a fraction, where the numerator is the current outstanding balance and the denominator is the original principal balance.
- (2) For a pass-through certificate, the coupon reflects the weighted average nominal rate of interest paid on the underlying mortgage loans, net of fees paid to the servicer and the agency. The coupon for a pass-through certificate may change as the underlying mortgage loans are prepaid.
- (3) Amortized purchase price is the dollar amount, per \$100 of current face, of our purchase price for the security, adjusted for amortization as a result of scheduled and unscheduled principal repayments.
- (4) Amortized cost is our total purchase price for the Agency Security, adjusted for amortization as a result of scheduled and unscheduled principal repayments.
- (5) Market price is the dollar amount of market value, per \$100 of nominal, or face value, of the Agency Security. We value our Agency Securities using a third-party pricing service whose pricing model incorporates common market pricing methods. Management reviews the pricing to ensure that current market conditions are properly represented.
- (6) Market value is the total fair value for the security.

As of December 31, 2011 and December 31, 2010, the adjustable and hybrid adjustable rate mortgage loans underlying our Agency Securities have fixed-interest rates for an average period of approximately 76 months and 64 months, respectively, after which time the interest rates reset and become adjustable. After a reset date, interest rates on our adjustable and hybrid adjustable Agency Securities float based on spreads over various indices, typically LIBOR or the one-year Constant Maturity Treasury (“CMT”), rate. These interest rates are subject to caps that limit the amount the applicable interest rate can increase during any year, known as an annual cap and through the maturity of the security, known as a lifetime cap.

Our investment portfolio consisted of the following breakdown between Fannie Mae, Freddie Mac and Ginnie Mae at December 31, 2011.

Agency Securities	December 31, 2011	
	Estimated Fair Value	Percentage of Total
Settled Securities		
Fannie Mae Certificates	\$ 3,542,883,368	65.7 %
Freddie Mac Certificates	1,316,500,271	24.4
Ginnie Mae Certificates	416,192,001	7.7
Forward Settle Purchased Securities		
Fannie Mae Certificates	83,648,538	1.6
Freddie Mac Certificates	34,450,503	0.6
Ginnie Mae Certificates	-	-
Total Securities	\$ 5,393,674,681	100.0 %

Our investment portfolio consisted of the following breakdown between Fannie Mae, Freddie Mac and Ginnie Mae at December 31, 2010.

Agency Securities	December 31, 2010

Freddie Mac Certificates		-	-	
Ginnie Mae Certificates		-	-	
Total Securities	\$	1,161,850,680	100.0	%

Liabilities

We have entered into repurchase agreements to finance most of our Agency Securities. Our repurchase agreements are secured by our Agency Securities and bear interest at rates that have historically moved in close relationship to Federal Funds Rate and LIBOR. We have established borrowing relationships with several investment banking firms and other lenders, 23 of which we had done repurchase trades with as of December 31, 2011 and 11 of which we had done repurchases trades with as of December 31, 2010. We had outstanding balances under our repurchase agreements at December 31, 2011 and December 31, 2010 of \$5.3 billion and \$1.0 billion, respectively.

Derivative Instruments

We generally intend to mitigate as much of our interest rate risk as our manager deems prudent in light of market conditions and the associated costs. We generally pay a fixed rate and receive a floating rate with the objective of fixing a portion of our borrowing costs and mitigating the change in our book value to some degree. The floating rate we receive is generally the Federal Funds Rate or LIBOR. While our policies do not contain specific requirements as to the percentages or amount of interest rate risk that we are required to mitigate, we maintain an overall target of hedging at least 40% of our non-adjustable rate mortgages (“ARMs”). For interest rate risk mitigation purposes, we consider Agency Securities to be ARMs if their interest rate is either currently subject to adjustment according to prevailing rates or if they are within 18 months of the period where such adjustments will occur. No assurance can be given that our derivatives will have the desired beneficial impact on our results of operations or financial condition. We do not qualify for cash flow hedge accounting treatment under the authoritative guidance. As we are not eligible to designate our derivative activities as cash flow hedges, realized as well as unrealized losses from these transactions will impact our earnings.

Use of derivative instruments may fail to protect or could adversely affect us because, among other things:

- available derivatives may not correspond directly with the interest rate risk for which protection is sought;
 - the duration of the derivatives may not match the duration of the related liability;
 - the party owing money on the derivatives may default on its obligation to pay;
- the credit-quality of the party owing money on the derivatives may be downgraded to such an extent that it impairs our ability to sell or assign our side of the hedging transaction; and
- the value of derivatives may be adjusted from time to time in accordance with accounting rules to reflect changes in fair value; downward adjustments, or “mark-to-market losses,” would reduce our net income or increase any net loss.

As of December 31, 2011 and December 31, 2010, we had interest rate swap contracts with an aggregate notional balance of \$2.8 billion and \$155.0 million, respectively. In addition, as of December 31, 2011 and December 31, 2010, we had entered into Eurodollar Futures Contracts (“Futures Contracts”) with an aggregate notional balance of \$131.0 million and \$214.0 million, respectively, traded in 1,033 and 2,361 individual contracts, respectively. Futures Contracts are traded on the Chicago Mercantile Exchange (“CME”). Counterparty risk of interest rate swap contracts and Futures Contracts are limited to some degree because of daily mark-to-market and collateral requirements. In addition, substantial credit support for the Futures Contracts is provided by the CME. These derivative transactions are designed to lock in some funding costs for financing activities associated with our assets in such a way as to help assure the realization of attractive net interest margins and to vary inversely in value with our Agency Securities. Such contracts are based on assumptions about prepayments which, if not realized, will cause results to differ from expectations.

Results of Operations

The following table represents key data regarding our financial position since the beginning of operations on November 6, 2009:

As of	Agency Securities	Repurchase Agreements	Payable for Unsettled Security Purchases	Equity	Shares Outstanding	Book Value Per Share	Dividends Declared	Quarterly Diluted Earnings Per Share (Loss)
	\$5,393,674,681	\$5,335,962,345	\$117,884,633	\$626,605,627	95,436,949	\$6.57	\$0.34	\$0.27
