Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited****1. Organization and Principal Business Activity**

MarketAxess Holdings Inc. (the Company) was incorporated in the State of Delaware on April 11, 2000. Through its subsidiaries, the Company operates an electronic trading platform for corporate bonds and certain other types of fixed-income securities, through which the Company's institutional investor clients can access the liquidity provided by its broker-dealer clients. The Company's multi-dealer trading platform allows its institutional investor clients to simultaneously request competitive, executable bids or offers from multiple broker-dealers, and to execute trades with the broker-dealer of their choice. The Company offers its clients the ability to trade U.S. high-grade corporate bonds, European high-grade corporate bonds, credit default swaps, agencies, high yield and emerging markets bonds. The Company's DealerAxess® trading service allows dealers to trade fixed-income securities with each other on its platform. The Company also provides a range of trading-related technologies and services. In addition, through its Corporate BondTicker service, the Company provides fixed-income market data, analytics and compliance tools that help its clients make trading decisions.

The Company's stockholder broker-dealer clients as of January 1, 2008 were BNP Paribas, Credit Suisse and JPMorgan. All of these broker-dealer clients constitute related parties of the Company (together, the Stockholder Broker-Dealer Clients). For 2007, a total of seven dealers were considered to be Stockholder Broker-Dealer Clients. See Note 10, Related Parties.

2. Significant Accounting Policies***Basis of Presentation***

The Consolidated Financial Statements include the accounts of the Company and its subsidiaries. All intercompany transactions and balances have been eliminated.

These Consolidated Financial Statements are unaudited and should be read in conjunction with the audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007. The consolidated financial information as of December 31, 2007 has been derived from audited financial statements not included herein.

These unaudited Consolidated Financial Statements are prepared in accordance with accounting principles generally accepted in the United States and the rules and regulations of the U.S. Securities and Exchange Commission (SEC) with respect to Form 10-Q and reflect all adjustments that, in the opinion of management, are normal and recurring, and which are necessary for a fair statement of the results for the interim periods presented. In accordance with such rules and regulations, certain disclosures that are normally included in annual financial statements have been omitted. Interim period operating results may not be indicative of the operating results for a full year.

Cash and Cash Equivalents

Cash and cash equivalents include cash maintained at U.S. and U.K. banks and in money market funds. The Company defines cash equivalents as short-term interest-bearing investments with maturities at the time of purchase of three months or less.

Securities and Cash Provided as Collateral

Securities provided as collateral consist of U.S. government obligations and cash. Collectively, these amounts are used as collateral for standby letters of credit, electronic bank settlements, foreign currency forward contracts to hedge the Company's net investments in certain foreign subsidiaries and a broker-dealer clearance account.

Securities Available-for-Sale

The Company classifies its marketable securities as available-for-sale securities. Unrealized marketable securities gains and losses are reflected as a net amount under the caption of accumulated other comprehensive loss in the Consolidated Statements of Financial Condition. Realized gains and losses are recorded in the Consolidated Statements of Operations in other revenues. For the purpose of computing realized gains and losses, cost is determined on a specific identification basis.

Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)**

The Company assesses whether an other-than-temporary impairment loss on the investments has occurred due to declines in fair value or other market conditions. Declines in fair values that are considered other-than-temporary are recorded as charges in the Consolidated Statements of Operations. No charges for other-than-temporary declines were recorded in 2008 and 2007.

Allowance for Doubtful Accounts

The Company continually monitors collections and payments from its clients and maintains an allowance for doubtful accounts. The allowance for doubtful accounts is based upon the historical collection experience and specific collection issues that have been identified. Additions to the allowance for doubtful accounts are charged to bad debt expense, which is included in general and administrative expense in the Consolidated Statements of Operations.

Depreciation and Amortization

Fixed assets are carried at cost less accumulated depreciation. The Company uses the straight-line method of depreciation over three or five years. Leasehold improvements are stated at cost and are amortized using the straight-line method over the lesser of the life of the improvement or the remaining term of the lease.

Software Development Costs

The Company capitalizes certain costs associated with the development of internal use software at the point at which the conceptual formulation, design and testing of possible software project alternatives have been completed. The Company capitalizes employee compensation and related benefits and third party consulting costs incurred during the preliminary software project stage. Once the product is ready for its intended use, such costs are amortized on a straight-line basis over three years. The Company reviews the amounts capitalized for impairment whenever events or changes in circumstances indicate that the carrying amounts of the assets may not be recoverable.

Revenue Recognition

The majority of the Company's revenues are derived from monthly distribution fees and commissions for trades executed on its platform that are billed to its broker-dealer clients on a monthly basis. The Company also derives revenues from information and user access fees, investment income, technology products and services and other income.

Commission revenue. Commissions are generally calculated as a percentage of the notional dollar volume of bonds traded on the platform and vary based on the type and maturity of the bond traded. Under the Company's transaction fee plans, bonds that are more actively traded or that have shorter maturities are generally charged lower commissions, while bonds that are less actively traded or that have longer maturities generally command higher commissions.

Technology licenses and services. The Company recognizes revenues from technology software licenses, maintenance and support services (referred to as post-contract technical support or PCS) and professional consulting services in accordance with the provisions of the American Institute of Certified Public Accountants' Statement of Position (SOP) 97-2, Software Revenue Recognition (SOP 97-2) as amended by SOP 98-4 and SOP 98-9 and clarified by Staff Accounting Bulletin (SAB) 101, SAB No. 104 and Emerging Issues Task Force (EITF) 00-21 and SOP 81-1,

Accounting for Performance of Construction-Type and Certain Production-Type Contracts (SOP 81-1). Revenue is generally recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collection is considered probable. The Company generally sells software licenses and services together as part of multiple-element arrangements. The Company also enters contracts for technology integration consulting services unrelated to any software product. When the Company enters into a multiple-element arrangement, it uses the residual method to allocate the total fee among the elements of the arrangement. Under the residual method, license revenue is recognized upon delivery when vendor-specific objective evidence of fair value exists for all of the undelivered elements in the arrangement, but does not exist for one or more of the delivered elements in the arrangement. Each license arrangement requires that the Company analyze the individual elements in the transaction and estimate the fair value of each undelivered element, which typically includes PCS and professional services. License revenue consists of license fees charged for the use of the Company's products under perpetual and, to a lesser extent, term license arrangements. License revenue from a perpetual arrangement is generally recognized upon delivery while license revenue from a term arrangement is recognized ratably over the duration of the

arrangement on a straight-line basis. If the professional services are essential to the functionality of the software product, the license revenue is recognized upon customer acceptance or satisfaction of the service obligation.

Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)**

Professional services are generally separately priced, are available from a number of suppliers and are typically not essential to the functionality of the Company's software products. Revenues from these services are recognized separately from the license fee if the arrangements qualify as service transactions as defined by SOP 97-2. Generally, revenue from time-and-materials consulting contracts is recognized as services are performed.

PCS includes telephone support, bug fixes and unspecified rights to product upgrades and enhancements, and is recognized ratably over the term of the service period, which is generally 12 months. The Company estimates the fair value of the PCS portion of an arrangement based on the price charged for PCS when sold separately. The Company sells PCS separately from any other element when customers renew PCS.

Revenues from contracts for technology integration consulting services are recognized on the percentage-of-completion method in accordance with SOP 81-1. Percentage-of-completion accounting involves calculating the percentage of services provided during the reporting period compared to the total estimated services to be provided over the duration of the contract. If estimates indicate that a contract loss will occur, a loss provision is recorded in the period in which the loss first becomes probable and reasonably estimable. Contract losses are determined to be the amount by which the estimated direct and indirect costs of the contract exceed the estimated total revenues that will be generated by the contract. There were no contract loss provisions recorded as of March 31, 2008 and December 31, 2007. Revenues recognized in excess of billings are recorded as unbilled services. Billings in excess of revenues recognized are recorded as deferred revenues until revenue recognition criteria are met.

Stock-Based Compensation for Employees

The Company measures and recognizes compensation expense for all share-based payment awards made to employees in accordance with Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), Share-Based Payment (SFAS 123R). This statement requires that compensation expense for all share-based awards be recognized based on their estimated fair values measured as of the grant date. These costs are recognized as an expense in the Consolidated Statements of Operations over the requisite service period, which is typically the vesting period, with an offsetting increase to additional paid-in capital.

Income Taxes

Income taxes are accounted for using the asset and liability method in accordance with SFAS No. 109, Accounting for Income Taxes (SFAS 109). Deferred income taxes reflect the net tax effects of temporary differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when such differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is recognized against deferred tax assets if it is more likely than not that such assets will not be realized in future years.

Foreign Currency Translation and Forward Contracts

Assets and liabilities denominated in foreign currencies are translated using exchange rates at the end of the period; revenues and expenses are translated at average monthly rates. Gains and losses on foreign currency translation are a component of accumulated other comprehensive loss in the Consolidated Statements of Financial Condition. Transaction gains and losses are recorded in general and administrative expense in the Consolidated Statements of Operations.

The Company enters into foreign currency forward contracts to hedge its net investment in its U.K. subsidiaries. In accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, gains and losses on these transactions are deferred and included in accumulated other comprehensive loss in the Consolidated Statements of Financial Condition.

Business Combinations, Goodwill and Intangible assets

Business acquisitions are accounted for under the purchase method of accounting in accordance with SFAS No. 141, Business Combinations. The total cost of an acquisition is allocated to the underlying net assets based on their respective estimated fair values. The excess of the purchase price over the estimated fair values of the net assets acquired is recorded as goodwill. Determining the fair value of certain assets acquired and liabilities assumed is judgmental in nature and often involves the use of

Table of Contents

MARKETAXESS HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)

significant estimates and assumptions, including assumptions with respect to future cash flows, discount rates, growth rates and asset lives.

In accordance with SFAS No. 142, Goodwill and Other Intangible Assets, goodwill and other intangibles with indefinite lives are no longer amortized. An impairment review of goodwill is performed on an annual basis and more frequently if circumstances change. Intangible assets with definite lives, including purchased technologies, customer relationships and other intangible assets, are amortized on a straight-line basis over their estimated useful lives ranging from five to ten years. Intangible assets are assessed for impairment when events or circumstances indicate a possible impairment pursuant to the provisions of SFAS No. 144, Accounting for Long Lived Assets and for Long Lived Assets to be Disposed Of.

Earnings Per Share

Basic earnings per share (EPS) is computed by dividing the net income attributable to common stock by the weighted-average number of shares of common stock outstanding for the period. Diluted EPS is computed using the same method as basic EPS, but in the denominator, shares of common stock outstanding reflect the dilutive effect that could occur if convertible securities or other contracts to issue common stock were converted into or exercised for common stock.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recent Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value and requires enhanced disclosures about fair value measurements. Effective January 1, 2008, the Company adopted SFAS 157 for all financial assets and liabilities and for non-financial assets and liabilities recognized or disclosed at fair value at least annually. In February 2008, the FASB issued Staff Position No. 157-2, which delayed the effective date of SFAS 157 to fiscal years beginning after November 15, 2008 for non-financial assets and liabilities, except for items that are recognized or disclosed at fair value on a recurring basis. The Company is currently evaluating the impact of SFAS 157 on valuation of all other non-financial assets and liabilities. The adoption of SFAS 157 had no effect on the Consolidated Statements of Financial Condition and Consolidated Statements of Operations.

In February 2007, the FASB issued SFAS No. 159, Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159). SFAS 159 permits companies to elect to measure eligible financial instruments, commitments and certain other arrangements at fair value at specified election dates, with changes in fair value recognized in earnings at each subsequent reporting period. The Company adopted SFAS 159 effective January 1, 2008. The Company did not elect the fair value option for any of its existing financial instruments. Accordingly, adoption of SFAS 159 had no effect on the Consolidated Financial Statements.

In December 2007, the FASB issued SFAS No. 141 (revised), Business Combinations (SFAS 141R). The standard changes the accounting for business combinations, including the measurement of acquirer shares issued in consideration for a business combination, the recognition of contingent consideration, the accounting for pre-acquisition gain and loss contingencies, the recognition of capitalized in-process research and development, the accounting for acquisition-related restructuring cost accruals, the treatment of acquisition-related transaction costs and the recognition of changes in the acquirer's income tax valuation allowance. SFAS 141R is effective for fiscal years beginning after December 15, 2008. The Company is currently evaluating the impact of SFAS 141R on its Consolidated Financial Statements.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an Amendment of ARB No. 51 (SFAS 160). SFAS 160 establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 is effective for fiscal

years beginning after December 15, 2008. The Company does not expect SFAS 160 to have a material impact on its Consolidated Financial Statements.

In March 2008, the FASB issued SFAS, No. 161, Disclosures about Derivative Instruments and Hedging Activities An Amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 expands the disclosure requirements for derivative instruments

Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)**

and hedging activities. SFAS 161 is effective for fiscal years beginning after November 15, 2008. The Company is currently evaluating the potential impact of SFAS 161 on its Consolidated Financial Statements.

Reclassifications

Certain reclassifications have been made to the prior periods' financial statements in order to conform to the current period's presentation. Such reclassifications had no effect on previously reported net income.

3. Acquisition

On March 5, 2008, the Company acquired all of the outstanding capital stock of Greenline Financial Technologies, Inc. (Greenline), an Illinois-based provider of integration, testing and management solutions for Financial Information Exchange-related products and services designed to optimize electronic trading of fixed-income, equity and other exchange-based products, and approximately ten percent of the outstanding capital stock of TradeHelm, Inc., a Delaware corporation that was spun-out from Greenline immediately prior to the acquisition. The acquisition of Greenline broadens the range of technology services that the Company offers to institutional financial markets, provides an expansion of the Company's client base, including global exchanges and hedge funds, and further diversifies the Company's revenues beyond the core electronic credit trading products. The results of operations of Greenline are included in the Consolidated Financial Statements from the date of the acquisition.

The aggregate consideration for the Greenline acquisition was \$41.4 million comprised of \$35.0 million in cash, 725,923 shares of the Company's common stock valued at \$5.8 million and \$0.6 million of acquisition-related costs. In addition, the sellers are eligible to receive up to an aggregate of \$3.0 million in cash, subject to Greenline attaining certain specified earn-out targets over the next two years. The cash portion of the purchase price is subject to a post-closing adjustment based on the net working capital of Greenline on the closing date, on customary terms. A total of \$2.3 million of the purchase price has been deposited into escrow accounts to satisfy potential indemnity claims and the post-closing net working capital adjustment. Absent any indemnity claims, the final amounts held in escrow will be distributed to the sellers on March 6, 2009. The shares of our common stock to be issued to each selling shareholder of Greenline shall be held by the Company and released in two equal installments on December 20, 2008 and December 20, 2009, respectively. The value ascribed to the shares was discounted from the market value to reflect the non-marketability of such shares during the restriction period.

The Company has completed a preliminary allocation of the purchase price to the fair value of assets acquired and liabilities assumed at the date of acquisition. It is possible that the purchase price allocation will be adjusted upon finalization of the accounting for the acquired assets. The preliminary purchase price allocation is as follows (in thousands):

Cash	\$ 6,396
Accounts receivable	2,200
Amortizable intangibles	8,420
Goodwill	28,502
Deferred tax assets, net	3,200
Other assets, including investment in TradeHelm	1,062
Accounts payable, accrued expenses and deferred revenue	(8,412)
Total purchase price	\$ 41,368

The amortizable intangibles include \$3.2 million of acquired technology, \$3.4 million of customer relationships, \$1.3 million of non-competition agreements and \$0.5 million of tradenames. Useful lives of ten years and five years have been assigned to the customer relationships intangible and all other amortizable intangibles, respectively. The identifiable intangible assets and goodwill are not deductible for tax purposes.

The following unaudited pro forma consolidated financial information reflects the results of operations of the Company for the three months ended March 31, 2008 and 2007, as if the acquisition of Greenline had occurred as of

January 1, 2007, after giving effect to certain purchase accounting adjustments. These pro forma results are not necessarily indicative of what the Company's operating results would have been had the acquisition actually taken place at January 1, 2007. The pro forma financial information includes the amortization charges from acquired intangible assets, adjustments to interest income and related tax effects.

4. Net Capital Requirements and Customer Protection Requirements

One of the Company's U.S. subsidiaries, MarketAxess Corporation, is a registered broker-dealer with the SEC and is a member of the Financial Industry Regulatory Authority (FINRA). MarketAxess Corporation claims exemption from SEC Rule 15c3-3, as it does not hold customer securities or funds on account, as defined. Pursuant to the Uniform Net Capital Rule under the Securities Exchange Act of 1934, MarketAxess Corporation is required to maintain minimum net capital, as defined, equal to the greater of \$5,000 or 6 2/3% of aggregate indebtedness. A summary of MarketAxess Corporation's capital requirements is as follows:

	March 31,	As of December 31,
	2008	2007
	(In thousands)	
Net capital	\$ 14,071	\$ 21,474
Required net capital	(603)	(1,140)
Excess net capital	\$ 13,468	\$ 20,334
Ratio of aggregate indebtedness to net capital	0.64 to 1	0.80 to 1

One of the Company's foreign subsidiaries, MarketAxess Europe Limited, is registered as a Multilateral Trading Facility with the Financial Services Authority (FSA) in the United Kingdom (U.K.). MarketAxess Europe is subject to certain financial resource requirements of the FSA. A summary of these financial resource requirements is as follows:

	March	As of December 31,
	31,	2007
	2008	2007
	(In thousands)	
Financial resources	\$ 20,719	\$ 17,099
Resource requirement	(6,402)	(6,977)
Excess financial resources	\$ 14,317	\$ 10,122

MarketAxess Corporation and MarketAxess Europe Limited are subject to U.S. and U.K. regulations as a registered broker-dealer and as a Multilateral Trading Facility dealer, respectively, which prohibit repayment of borrowings from the Company or affiliates, paying cash dividends, making loans to the Company or affiliates or

otherwise entering into transactions that result in a significant reduction in regulatory net capital or financial resources, respectively, without prior notification to or approval from such regulated entity's principal regulator.

5. Fair Value Measurements

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It also establishes a three-tiered fair value hierarchy that prioritizes inputs to valuation techniques used in fair value calculations. The three levels of inputs are defined as Level 1 (unadjusted quoted prices for identical assets or liabilities in active markets), Level 2 (inputs that are observable in the marketplace other than those inputs classified in Level 1) and Level 3 (inputs that are unobservable in the marketplace). The Company's financial assets and liabilities measured at fair value on a recurring basis consist of its securities available-for-sale portfolio. As of January 1, 2008 and March 31, 2008, all of the securities available-for-sale were classified as Level 2. There were no securities classified as Level 3 during the three months

Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)**

ended March 31, 2008. Securities included in Level 2 were valued using a market approach utilizing prices and other relevant information generated by market transactions involving comparable assets.

The following is a summary of the Company's securities available-for-sale:

	Amortized cost	Gross unrealized gains (In thousands)	Gross unrealized losses	Estimated fair value
As of March 31, 2008				
Federal agency issues and municipal securities	\$34,146	\$160	\$(16)	\$34,290

As of December 31, 2007

Federal agency issues and municipal securities	\$51,512	\$78	\$(11)	\$51,579
--	----------	------	--------	----------

As of March 31, 2008, the Company had \$9.0 million invested in municipal auction rate securities. Liquidity for these securities is typically provided by an auction process that resets the applicable interest rate at pre-determined intervals. Auctions for these securities failed in 2008 and, as a result, the Company was unable to liquidate these holdings. All of the municipal auction rate securities held are rated AAA by Standard & Poor's and the Company does not believe that the value of these investments has been impaired.

6. Furniture, Equipment and Leasehold Improvements

Furniture, equipment and leasehold improvements, net, are comprised of the following:

	March 31, 2008	As of December 31, 2007
	(In thousands)	
Computer hardware and related software	\$16,988	\$16,523
Office hardware	3,529	3,317
Furniture and fixtures	1,911	1,834
Leasehold improvements	2,226	2,226
Accumulated depreciation and amortization	(21,680)	(20,969)
Total furniture, equipment and leasehold improvements, net	\$2,974	\$2,931

7. Software Development Costs

During the three months ended March 31, 2008 and 2007, software development costs totaling \$0.7 million and \$0.9 million, respectively, were capitalized. Non-capitalized software costs and routine maintenance costs are expensed as incurred and are included in employee compensation and benefits and professional and consulting fees in the Consolidated Statements of Operations. Software development costs, net, are comprised of the following:

	March 31, 2008	As of December 31, 2007
	(In thousands)	
Software development costs	\$18,029	\$17,344
Accumulated amortization	(12,509)	(11,585)
Total software development costs, net	\$5,520	\$5,759

Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)****8. Goodwill and Intangible Assets**

The following is a summary of changes in goodwill for the three months ended March 31, 2008 (in thousands):

Balance at December 31, 2007	\$ 2,361
Add: Goodwill from Greenline acquisition	28,502
Add: Purchase price allocation adjustment	18
Balance at March 31, 2008	\$ 30,881

Intangible assets and goodwill principally relate to the preliminary allocation of purchase price associated with the acquisitions of Trade West Systems, LLC, which was completed in November 2007, and Greenline. Intangible assets that are subject to amortization, including the related accumulated amortization, are comprised of the following:

	March 31, 2008			December 31, 2007		
	Cost	Accumulated Amortization (In thousands)	Net Carrying Amount	Cost	Accumulated Amortization (In thousands)	Net Carrying Amount
Technology	\$ 4,010	\$ (109)	\$ 3,901	\$ 770	\$ (26)	\$ 744
Customer relationships	3,620	(35)	3,585	220	(4)	216
Non-competition agreements	1,260	(18)	1,242			
Tradenames	590	(14)	576	70	(2)	68
Total	\$ 9,480	\$ (176)	\$ 9,304	\$ 1,060	\$ (32)	\$ 1,028

Amortization expense associated with identifiable intangible assets was \$0.1 million for the three months ended March 31, 2008. Estimated amortization expense is \$1.4 million for 2008, \$1.7 million for 2009 and 2010 and \$1.6 million for 2011 and 2012.

9. Income Taxes

The provision for income taxes consists of the following:

	Three Months Ended March 31, 2008 2007	
	(In thousands)	
Current:		
Federal	\$	\$
State and local		
Foreign	56	(9)
Total current provision	56	(9)
Deferred:		
Federal	786	1,222
State and local	380	607

Foreign	146	199
Total deferred provision	1,312	2,028
Provision for income taxes	\$ 1,368	\$ 2,019

Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)**

The following is a summary of the Company's net deferred tax assets:

	March 31, 2008	As of December 31, 2007
	(In thousands)	
Deferred tax assets and liabilities	\$ 39,583	\$ 37,830
Valuation allowance	(623)	(623)
Deferred tax assets, net	\$ 38,960	\$ 37,207

The Company or one of its subsidiaries files U.S. federal, state and foreign income tax returns. With the exception of New York and Connecticut state tax returns, all U.S. federal, state and U.K. income tax returns have not been subject to audit. The Company's New York State franchise tax returns for 2000 through 2003 are currently under examination. The Company cannot estimate when the examination will conclude.

As a result of the implementation of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes and Interpretation of FASB Statement No. 109, effective January 1, 2007, the Company recognized an increase in deferred tax assets of \$3.0 million related to previously unrecognized tax benefits, which was accounted for as an increase to additional paid-in capital of \$0.3 million and an increase in accrued expenses of \$2.7 million. Unrecognized tax benefits as of December 31, 2007 and March 31, 2008 were \$2.7 million. If recognized, this entire amount would impact the effective tax rate.

The Company recognizes interest and penalties related to unrecognized tax benefits in general and administrative expenses in the Consolidated Statements of Operations. No interest expense was recognized for the three months ended March 31, 2008 and 2007 respectively.

In the first quarter of 2007, the Company experienced an ownership change within the meaning of Section 382 of the Internal Revenue Code. The Company does not believe that this ownership change significantly impacts its ability to utilize existing net operating loss carryforwards.

10. Related Parties

The Company generates commissions, information and user access fees, investment income and other income and related accounts receivable balances from Stockholder Broker-Dealer Clients or their affiliates. In addition, a Stockholder Broker-Dealer Client acts in an investment advisory, custodial and cash management capacity for the Company. The Company incurs investment advisory and bank fees in connection with this arrangement. The Company also maintained an account with a Stockholder Broker-Dealer Client in connection with its share repurchase program. As of the dates and for the periods indicated below, the Company had the following balances and transactions with the Stockholder Broker-Dealer Clients or their affiliates:

Table of Contents

11. Stockholders' Equity

As of March 31, 2008 and December 31, 2007, the Company had 110,000,000 authorized shares of common stock and 10,000,000 authorized shares of non-voting common stock. Common stock entitles the holder to one vote per share of common stock held. During the three months ended March 31, 2007, a total of 539,725 shares of non-voting common stock were converted to common stock.

During the three months ended March 31, 2007, one Stockholder Broker-Dealer Clients converted 180,808 warrants into 180,770 shares of common stock through a cashless exercise. The exercise of warrants during 2007 and prior years resulted in an unrecognized deferred tax asset of \$18.3 million that will be recorded as an increase to additional paid-in capital once the tax benefit serves to reduce taxes payable in future years.

In October 2006, the Board of Directors of the Company authorized a share repurchase program for up to \$40.0 million of the Company's common stock. Shares repurchased under the program will be held in treasury for future use. During the three months ended March 31, 2008, a total of 221,406 shares were repurchased at a cost of \$2.8 million. The share repurchase program was completed in January 2008. A total of 2,864,120 shares were repurchased at an aggregate cost of \$40.0 million over the life of the repurchase program.

Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)****12. Stock-Based Compensation Plans**

Stock-based compensation expense for the three months ended March 31, 2008 and 2007 was as follows:

	Three Months Ended March 31,	
	2008	2007
	(In thousands)	
Employee:		
Stock options	\$ 925	\$ 913
Restricted stock	692	563
	1,617	1,476
Non-employee directors:		
Stock options	37	39
Restricted stock	85	81
	122	120
Total stock-based compensation	\$ 1,739	\$ 1,596

The Company records stock-based compensation for employees in employee compensation and benefits and for non-employee directors in general and administrative expenses in the Consolidated Statements of Operations.

During the three months ended March 31, 2008, the Company granted to employees a total of 695,470 options to purchase shares of the Company's common stock, 83,370 shares of restricted stock and performance-based shares with a target pay-out of 177,680 shares of common stock. Based on the Black-Scholes-Merton closed-form model, the weighted average fair value for each option granted was \$4.72 per share. The fair value of the restricted stock and performance-based share awards was based on a weighted-average grant date fair value of \$10.93 per share. The total pre-forfeiture compensation expense for such awards measured on the date of grant amounted to \$6.1 million and will be recognized over the three-year requisite service period.

13. Earnings Per Share

A reconciliation of basic to diluted weighted-average shares of common stock is as follows:

	Three Months Ended March 31,	
	2008	2007
	(In thousands, except share and per share amounts)	
Net income	\$ 1,596	\$ 2,450
Common stock voting	29,827,475	27,688,099
Common stock non-voting	2,585,654	3,125,379
Basic weighted average shares outstanding	32,413,129	30,813,478

Basic earnings per share	\$ 0.05	\$ 0.08
Weighted average shares outstanding	32,413,129	30,813,478
Effect of dilutive shares:		
Warrants		2,318,930
Stock options and restricted stock	981,737	1,394,140
Diluted weighted average shares outstanding	33,394,866	34,526,548
Diluted earnings per share	\$ 0.05	\$ 0.07

Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)**

Stock options and restricted stock totaling 4,178,681 shares and 1,078,851 shares for the three months ended March 31, 2008 and 2007, respectively, were excluded from the computation of diluted earnings per share because their effect would have been antidilutive.

14. Commitments and Contingencies

The Company leases office space and equipment under non-cancelable lease agreements expiring at various dates through 2016. These leases are subject to escalation based on certain costs incurred by the landlord. Minimum rental commitments under such leases, net of sublease income, are as follows:

	Minimum Rentals (In thousands)
Remainder of 2008	\$ 2,036
2009	2,750
2010	1,554
2011	1,127
2012	1,066
2013	1,068
Thereafter	2,050

Rental expense of \$0.6 million for each of the three months ended March 31, 2008 and 2007 is included in occupancy expenses in the Consolidated Statements of Operations. Rental expense has been recorded based on the total minimum lease payments after giving effect to rent abatement and concessions, which are being amortized on a straight-line basis over the life of the lease, and sublease income.

The Company has entered into a sublease agreement on one of its leased properties through the April 2011 lease termination date. A loss on the sublease was recorded in 2001. The sublease loss accrual as of March 31, 2008 and December 31, 2007 was \$0.6 million and \$0.7 million, respectively.

The Company is contingently obligated for standby letters of credit that were issued to landlords for office space. The Company uses a U.S. government obligation as collateral for these standby letters of credit. This collateral is included with securities and cash provided as collateral in the Consolidated Statements of Financial Condition and had a fair market value of \$3.3 million as of March 31, 2008 and December 31, 2007.

In June 2006, MarketAxess Corporation commenced operating an anonymous matching service for its broker-dealer clients. MarketAxess Corporation executes trades on a riskless principal basis, which are cleared and settled by an independent clearing broker. The securities clearing agreement that MarketAxess Corporation maintains with the independent clearing broker commenced in December 2004. Under the securities clearing agreement, MarketAxess Corporation maintains a collateral deposit with the clearing broker in the form of cash or U.S. government securities. As of March 31, 2008 and December 31, 2007, the collateral deposit included in securities and cash provided as collateral in the Consolidated Statements of Financial Condition was \$0.5 million. MarketAxess Corporation is exposed to credit risk in the event a counterparty does not fulfill its obligation to complete a transaction. Pursuant to the terms of the securities clearing agreement between MarketAxess Corporation and the independent clearing broker, the clearing broker has the right to charge MarketAxess Corporation for losses resulting from a counterparty's failure to fulfill its contractual obligations. The losses are not capped at a maximum amount and apply to all trades executed through the clearing broker. As of March 31, 2008, MarketAxess Corporation recorded no contingent liabilities with regard to this right.

In the normal course of business, the Company enters into contracts that contain a variety of representations, warranties and general indemnifications. The Company's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Company that have not yet occurred. However, based on experience, the Company believes the risk of loss to be remote.

In January 2007, two former employees commenced arbitration proceedings against MarketAxess Corporation before FINRA arising out of the expiration of certain vested and unvested stock options and unvested restricted shares issued to them. In April 2007, one of those former employees brought a separate FINRA arbitration against MarketAxess Holdings Inc. based on the same claim he

Table of Contents**MARKETAXESS HOLDINGS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Unaudited (Continued)**

had filed against MarketAxess Corporation. The arbitrations brought by that employee against both MarketAxess Corporation and MarketAxess Holdings Inc. have been consolidated before FINRA. The claims made by these two former employees total \$4.5 million plus interest.

One former employee has alleged that the Company wrongfully prevented him from exercising his vested options when he sought to do so and that the Company wrongfully claimed that such options had expired on the previous day. The other former employee has alleged that the Company wrongfully failed to accelerate the vesting of his then unvested options and restricted shares upon his termination and to waive the 90-day time period within which he was required to exercise his vested options. He further alleges that he is entitled to a bonus for the approximately five months that he worked for the Company during 2006.

MarketAxess Corporation answered both arbitration claims brought against it. The Company has vigorously defended the claims brought against both MarketAxess Corporation and MarketAxess Holdings Inc. Based on currently available information, management believes that the likelihood of a material loss is not probable. Accordingly, no amounts have been provided in the accompanying financial statements. However, arbitration is subject to inherent uncertainties and unfavorable rulings could occur.

15. Comprehensive Income

Comprehensive income was as follows:

	Three Months Ended March 31,	
	2008	2007
	(In thousands)	
Net income	\$ 1,596	\$ 2,450
Cumulative translation adjustment and foreign currency exchange hedge, net of taxes	(121)	(41)
Unrealized net gains on securities available-for-sale, net of taxes	29	
Total Comprehensive income	\$ 1,504	\$ 2,409

Forward-Looking Statements

This report contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by words such as expects, intends, anticipates, plans, believes, seeks, estimates, will, or words of similar meaning and include, but are not limited to, statements regarding the outlook for our future business and financial performance. Forward-looking statements are based on management's current expectations and assumptions, which are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. It is routine for our internal projections and expectations to change as the year or each quarter in the year progresses, and therefore it should be clearly understood that the internal projections and beliefs upon which we base our expectations may change prior to the end of each quarter or the year. Although these expectations may change, we are under no obligation to revise or update any forward-looking statements contained in this report. Our company policy is generally to provide our expectations only once per quarter, and not to update that information until the next quarter. Actual future events or results may differ materially from those contained in the projections or forward-looking statements. Factors that could cause or contribute to such differences include those discussed below and elsewhere in this report, particularly in the section captioned Part II, Item 1A, Risk Factors.

Executive Overview

MarketAxess operates one of the leading platforms for the electronic trading of corporate bonds and certain other types of fixed-income securities. Through our platform, 656 active institutional investor client firms (firms that executed at least one trade through our electronic trading platform between April 2007 and March 2008) can access the aggregate liquidity provided by the collective interest of our 30 broker-dealer clients in buying or selling bonds through our platform. Our active institutional investor clients include investment advisers, mutual funds, insurance companies, public and private pension funds, bank portfolios and hedge funds. Our DealerAxess® trading service allows dealers to trade fixed-income securities and credit default swaps with each other on our platform. We also provide a range of trading-related technologies and services. In addition, through our Corporate BondTicker service, we provide fixed-income market data, analytics and compliance tools that help our clients make trading decisions. Our revenues are primarily generated from the trading of U.S. and European high-grade corporate bonds.

Our multi-dealer trading platform allows our institutional investor clients to simultaneously request competing, executable bids or offers from our broker-dealer clients and execute trades with the broker-dealer of their choice from among those that choose to respond. We offer our broker-dealer clients a solution that enables them to efficiently reach our institutional investor clients for the distribution and trading of bonds. In addition to U.S. high-grade corporate bonds, European high-grade corporate bonds and emerging markets bonds, including both investment-grade and non-investment grade debt, we also offer our clients the ability to trade crossover and high-yield bonds, agency bonds and credit default swap indices.

The majority of our revenues are derived from monthly distribution fees and commissions for trades executed on our platform that are billed to our broker-dealer clients on a monthly basis. We also derive revenues from information and user access fees, investment income, technology products and services and other income. Our expenses consist of employee compensation and benefits, depreciation and amortization, technology and communication expenses, professional and consulting fees, occupancy, marketing and advertising and other general and administrative expenses.

We seek to grow and diversify our revenues by capitalizing on our status as the operator of a leading platform for the electronic trading of corporate bonds and certain other types of fixed-income securities. The key elements of our strategy are:

- to innovate and efficiently add new functionality and product offerings to the MarketAxess platform that we believe will help to increase our market share with existing clients, as well as expand our client base;

- to leverage our technology, as well as our strong broker-dealer and institutional investor relationships, to deploy our electronic trading platform into additional product segments within the fixed-income securities markets, deliver fixed-income securities-related technical services and products and deploy our electronic

trading platform into new client segments;

to continue building our existing service offerings so that our electronic trading platform is fully integrated into the workflow of our broker-dealer and institutional investor clients and to continue to add functionality to allow our clients to achieve a fully automated end-to-end straight-through processing solution (automation from trade initiation to settlement);

Table of Contents

to add new content and analytical capabilities to Corporate BondTicker in order to improve the value of the information we provide to our clients; and

to continue to supplement our internal growth by entering into strategic alliances, or acquiring businesses or technologies that will enable us to enter new markets, provide new products or services, or otherwise enhance the value of our platform to our clients.

Critical Factors Affecting Our Industry and Our Company

Economic, Political and Market Factors

The global fixed-income securities industry is risky and volatile and is directly affected by a number of economic, political and market factors that may result in declining trading volume. These factors could have a material adverse effect on our business, financial condition and results of operations. These factors include, among others, credit market conditions, the current interest rate environment, including the volatility of interest rates and investors forecasts of future interest rates, and economic and political conditions in the United States, Europe and elsewhere.

Competitive Landscape

The global fixed-income securities industry generally, and the electronic financial services markets in which we engage in particular, are highly competitive, and we expect competition to intensify in the future. Sources of competition for us will continue to include, among others, bond trading conducted directly between broker-dealers and their institutional investor clients over the telephone or electronically and other multi-dealer trading companies. Competitors, including companies in which some of our broker-dealer clients have invested, have developed electronic trading platforms or have announced their intention to explore the development of electronic platforms that may compete with us.

In general, we compete on the basis of a number of key factors, including, among others, the liquidity provided on our platform, the magnitude and frequency of price improvement enabled by our platform and the quality and speed of execution. We believe that we compete favorably with respect to these factors. Our trading volume and client acceptance have grown significantly over the past five years and we continue to proactively build technology solutions that serve the needs of the credit markets.

Our competitive position is also enhanced by the familiarity and integration of our broker-dealer and institutional investor clients with our electronic trading platform and other systems. We have focused on the unique aspects of the credit markets we serve in the development of our platform, working closely with our clients to provide a system that is suited to their needs.

Regulatory Environment

Our industry has been and is subject to continuous regulatory changes and may become subject to new regulations or changes in the interpretation or enforcement of existing regulations, which could require us to incur significant costs.

Our U.S. subsidiary, MarketAxess Corporation, is a registered broker-dealer with the SEC and is a member of FINRA. Our U.K. subsidiary, MarketAxess Europe Limited, is registered as a Multilateral Trading Facility dealer with the FSA in the U.K. MarketAxess Canada Limited, a Canadian subsidiary that we incorporated in May 2003, is registered as an Alternative Trading System dealer under the Securities Act of Ontario and is a member of the Investment Dealers Association of Canada. Relevant regulations prohibit repayment of borrowings from these subsidiaries or their affiliates, paying cash dividends, making loans to us or our affiliates or otherwise entering into transactions that result in a significant reduction in regulatory net capital or financial resources, without prior notification to or approval from such regulated entity's principal regulator.

As a public company, we are subject to the reporting requirements of the Securities Exchange Act of 1934, the Sarbanes-Oxley Act of 2002 and NASDAQ rules promulgated in response to the Sarbanes-Oxley Act. The requirements of these rules and regulations have increased our legal and financial compliance costs, made some activities more difficult, time-consuming or costly and may also place a strain on our systems and resources. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight are required.

Table of Contents

Rapid Technological Changes

We must continue to enhance and improve our electronic trading platform. The electronic financial services industry is characterized by increasingly complex systems and infrastructures and new business models. Our future success will depend on our ability to enhance our existing products and services, develop and/or license new products and technologies that address the increasingly sophisticated and varied needs of our broker-dealer and institutional investor clients and prospective clients and respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis.

Trends in Our Business

The majority of our revenues are derived from monthly distribution fees and commissions for transactions executed on our platform between our institutional investor and broker-dealer clients. We believe that there are five key variables that impact the notional value of such transactions on our platform and the amount of commissions earned by us:

the number of institutional investor clients that participate on the platform and their willingness to originate transactions through the platform;

the number of broker-dealer clients on the platform and the competitiveness of the prices they provide to the institutional investor clients;

the number of markets for which we make trading available to our clients;

the overall level of activity in these markets; and

the level of commissions that we collect for trades executed through the platform.

We believe that overall corporate bond market trading volume is affected by various factors including the absolute levels of interest rates, the direction of interest rate movements, the level of new issues of corporate bonds and the volatility of corporate bond spreads versus U.S. Treasury securities. Because a significant percentage of our revenue is tied directly to the volume of securities traded on our platform, it is likely that a general decline in trading volumes, regardless of the cause of such decline, would reduce our revenues and have a significant negative impact on profitability.

The past nine months have been a period of significant turmoil in the U.S. and European credit markets, especially in short-term funding and floating rate note instruments. A widespread retrenchment in the credit markets resulted in increased credit spreads and significantly higher credit spread volatility across a wide range of asset classes. The average daily trading volume of U.S. high-grade corporate bonds for the nine months ended March 31, 2008 decreased by 15.5% compared to the nine months ended March 31, 2007. We believe that a resultant lack of liquidity in the credit markets led institutional investors to reduce overall bond trading activity and conduct a higher percentage of their trades directly with their broker-dealer counterparties via the telephone, resulting in lower volumes on our platform. We also believe that a stabilization in credit market conditions, at higher overall levels of credit spreads, is likely to favorably impact the volume of trades conducted over our platform.

We have historically earned a substantial portion of our commissions and overall revenues from broker-dealer clients that are (or whose affiliates are) our stockholders. For 2008, a total of three dealers, and for 2007, a total of seven dealers, were considered to be Stockholder Broker-Dealer Clients. As a result of the reduction in the number of our Stockholder Broker-Dealer Clients, the percentage of our revenues derived from such clients has been declining due to the sale of shares of our common stock by several of our founding dealers. For the three months ended March 31, 2008, the percentage decreased to 15.4% from 39.5% for the three months ended March 31, 2007. Affiliates of most of our Stockholder Broker-Dealer Clients are also among our institutional investor clients. A table detailing the amount of our revenues generated by the Stockholder Broker-Dealer Clients, and their respective affiliates, as well as the corresponding percentage of the respective revenue line item, is provided below for the three months ended March 31, 2008 and 2007.

Commission Revenue Trends

Commissions are generally calculated as a percentage of the notional dollar volume of bonds traded on our platform and vary based on the type, size, yield and maturity of the bond traded. The commission rates are based on a number of factors, including fees charged by inter-dealer brokers in the respective markets, average bid-offer spreads in the products we offer and transaction costs through alternative channels including the telephone. Under our transaction fee plans, bonds that are more actively traded or that have shorter maturities are generally charged lower commissions, while bonds that are less actively traded or that have longer maturities generally command higher commissions.

U.S. High-Grade Corporate Bond Commissions. On June 1, 2005, we introduced a new fee plan primarily for secondary market transactions in U.S. high-grade corporate bonds executed on our institutional client to multi-dealer electronic trading platform. The fee plan incorporates higher monthly distribution fees and lower transaction fees for our broker-dealer clients than the previous U.S. high-grade corporate transaction fee plans and incorporates volume incentives to our broker-dealer clients that are designed to increase the volume of transactions effected on our platform. Under the fee plan, we electronically add the transaction fee to the spread quoted by the broker-dealer client but do not charge for inquiries that an institutional investor client sends to a single broker-dealer client. The combination of higher distribution fees and lower transaction fees in the plan results in higher total revenue to us at current or lower volume levels. If volume grows, total revenues could be less under the new plan than the previous plan due to the lower transaction fees. For trades on our DealerAxess® dealer-to-dealer electronic trading platform, we typically charge a fee to the broker-dealer client involved in the transaction that is based on the size of the transaction and the maturity of the bond traded. Monthly minimum fees applied to certain dealers participating on the DealerAxess® platform in their first year of trading. The majority of the DealerAxess® monthly minimum commitments expired as of June 30, 2007.

European High-Grade Corporate Bond Commissions. On June 1, 2007, we introduced a new fee plan for European high-grade corporate bond trades for the majority of our European dealers. Similar to the U.S. high-grade plan, the new European high-grade corporate bond fee plan incorporates monthly distribution fees and a transaction fee that is lower than the transaction fee under the previous European high-grade plan and incorporates incentives to our broker-dealer clients that are designed to increase the volume of transactions effected on our platform. The transaction fee under the new plan is dependent on the type of bond traded and the maturity of the issue. The combination of the distribution fees and transaction fees in the new plan results in higher total revenue to us at current or lower volume levels. If volume grows, total revenues could be less under the new plan than the previous plan due to the lower transaction fees. Under the fee plan in effect prior to June 1, 2007, broker-dealer transaction fees varied based on the type of bond traded and the maturity of the issue. This fee schedule applied a tiered fee structure, which reduced the fee per trade upon the attainment of certain specified amounts of monthly commissions generated by a particular broker-dealer and did not carry a monthly distribution fee.

Other Commissions. Commissions for other bond and credit default swap trades generally vary based on the type and the maturity of the instrument traded. We generally operate using standard fee schedules that may include both transaction fees and monthly distribution fees that are charged to the participating dealers.

We anticipate that average fees per million may change in the future. Consequently, past trends in commissions are not necessarily indicative of future commissions.

Table of Contents

Other Revenue Trends

In addition to the commissions discussed above, we earn revenue from information services fees paid by institutional investor and broker-dealer clients, income on investments, technology products and services and other income.

Information and User Access Fees. We charge information services fees for Corporate BondTicker™ to our broker-dealer clients, institutional investor clients and data-only subscribers. The information services fee is a flat monthly fee, based on the level of service. We also generate information services fees from the sale of bulk data to certain institutional investor clients and data-only subscribers. Institutional investor clients trading U.S. high-grade corporate bonds are charged a monthly user access fee for the use of our platform. The fee, billed quarterly, is charged to the client based on the number of the client's users. To encourage institutional investor clients to execute trades on our U.S. high-grade corporate bond platform, we reduce these information and user access fees for such clients once minimum quarterly trading volumes are attained.

Investment Income. Investment income consists of income earned on our investments.

Technology Products and Services. Technology products and services includes software licenses, maintenance and support services and professional consulting services. On March 5, 2008, we acquired all of the outstanding capital stock of Greenline Financial Technologies, Inc. ("Greenline"), an Illinois-based provider of integration, testing and management solutions for Financial Information Exchange-related products and services designed to optimize electronic trading of fixed-income, equity and other exchange-based products. In November 2007, we acquired certain assets and assumed certain obligations of Trade West Systems, LLC ("TWS"), a Utah-based financial software and technology services provider focused on providing gateway adapters for connecting order management systems and trading systems to fixed-income trading venues.

Other. Other revenues includes fees from telecommunications line charges to broker-dealer clients and other miscellaneous revenues.

Expense Trends

In the normal course of business, we incur the following expenses:

Employee Compensation and Benefits. Employee compensation and benefits is our most significant expense and includes employee salaries, stock compensation costs, other incentive compensation, employee benefits and payroll taxes.

Depreciation and Amortization. We depreciate our computer hardware and related software, office hardware, and furniture and fixtures and amortize our capitalized software development costs on a straight-line basis over a three-year or five-year period. We amortize leasehold improvements on a straight-line basis over the lesser of the life of the improvement or the remaining term of the lease. Intangible assets with definite lives, including purchased technologies, customer relationships and other intangible assets, are amortized on a straight-line basis over their estimated useful lives, ranging from five to ten years.

Technology and Communications. Technology and communications expense consists primarily of costs relating to maintenance on software and hardware, our internal network connections, data center hosting costs and data feeds provided by outside vendors or service providers. The majority of our broker-dealer clients have dedicated high-speed communication lines to our network in order to provide fast data transfer. We charge our broker-dealer clients a monthly fee for these connections, which is recovered against the relevant expenses we incur.

Professional and Consulting Fees. Professional and consulting fees consist primarily of accounting fees, legal fees and fees paid to information technology and non-information technology consultants for services provided for the maintenance of our trading platform and information services products.

Occupancy. Occupancy costs consist primarily of office and equipment rent, utilities and commercial rent tax.

Marketing and Advertising. Marketing and advertising expense consists primarily of print and other advertising expenses we incur to promote our products and services. This expense also includes costs associated with attending or exhibiting at industry-sponsored seminars, conferences and conventions, and travel and entertainment expenses incurred by our sales force to promote our trading platform and information services.

Table of Contents

General and Administrative. General and administrative expense consists primarily of general travel and entertainment, board of directors expenses, charitable contributions, provision for doubtful accounts, and various state franchise and U.K. value-added taxes.

We anticipate expense growth in the future, primarily due to investment in new products, notably in employee compensation and benefits, professional and consulting fees, and general and administrative expense, but we believe that operating leverage can be achieved by increasing volumes in existing products and adding new products without substantial additions to our infrastructure.

Critical Accounting Policies

This Management's Discussion and Analysis of Financial Condition and Results of Operations discusses our Consolidated Financial Statements, which have been prepared in accordance with U.S. generally accepted accounting principles, also referred to as U.S. GAAP. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of income and expenses during the reporting periods. We base our estimates and judgments on historical experience and on various other factors that we believe are reasonable under the circumstances. Actual results may differ from these estimates under varying assumptions or conditions. Note 2 of the Notes to our Consolidated Financial Statements includes a summary of the significant accounting policies and methods used in the preparation of our Consolidated Financial Statements. Other than the expansion of our revenue recognition policy to embody additional products and services from our Greenline acquisition, there were no significant changes to our critical accounting policies and estimates during the three months ended March 31, 2008, as compared to those we disclosed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2007.

Segment Results

As an electronic, multi-dealer to client platform for trading fixed-income securities, our operations constitute a single business segment pursuant to SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information. Because of the highly integrated nature of the financial markets in which we compete and the integration of our worldwide business activities, we believe that results by geographic region, products or types of clients are not necessarily meaningful in understanding our business.

Statistical Information

Our trading volume for each of the periods presented was as follows:

	Three Months Ended March 31,	
	2008	2007
Trading Volume Data (in billions)		
U.S. high-grade multi dealer	\$ 36.4	\$ 55.9
U.S. high-grade single dealer	2.4	4.9
Total U.S. high-grade	38.8	60.8
European high-grade	8.1	28.3
Other	17.6	15.3
Total	\$ 64.5	\$ 104.4
Number of U.S. Trading Days	61	62
Number of U.K. Trading Days	62	64

For volume reporting purposes, transactions in foreign currencies are converted to U.S. dollars at average monthly rates. Single-dealer inquiries represent U.S. high-grade trades on which no fees were charged in accordance with the U.S. high-grade corporate bond fee plan that went into effect on June 1, 2005. Credit default swap trading volume data

are included in Other. Trading volume data related to DealerAxess® bond trading between broker-dealer clients are included in either U.S. high-grade or Other trading volumes, as appropriate.

Our active institutional investor clients (firms that executed at least one trade through our electronic trading platform for the twelve months ended March 31, 2008 and 2007, respectively) and our broker-dealer clients as of March 31, 2008 and 2007 were as follows:

25

Results of Operations***Three Months Ended March 31, 2008 Compared to Three Months Ended March 31, 2007******Overview***

Total revenues decreased by \$0.8 million or 3.5% to \$22.9 million for the three months ended March 31, 2008, from \$23.8 million for the three months ended March 31, 2007. This decrease in total revenues was primarily due to a decline in U.S. high-grade revenues of \$1.3 million, offset by an increase in technology products and services revenues of \$0.7 million. Technology products and services revenues reflect the impact of the Greenline and TWS acquisitions.

Total expenses increased by \$0.7 million or 3.5% to \$20.0 million for the three months ended March 31, 2008, from \$19.3 million for the three months ended March 31, 2007. Increases in technology and communications, professional and consulting fees and general and administrative expenses totaling \$1.0 million were partially offset by a decrease in employee compensation and benefits of \$0.5 million. The Greenline and TWS acquisitions increased expenses by \$1.0 million.

Income before taxes decreased by \$1.5 million or 33.7% to \$3.0 million for the three months ended March 31, 2008, from \$4.5 million for the three months ended March 31, 2007. Net income decreased by \$0.9 million or 34.9% to \$1.6 million for the three months ended March 31, 2008, from \$2.5 million for three months ended March 31, 2007.

Revenues

Our revenues for the three months ended March 31, 2008 and 2007, and the resulting dollar and percentage changes, were as follows:

	Three Months Ended March 31,					
	2008		2007			
	\$	% of Revenues	\$	% of Revenues	\$ Change	% Change
	(\$ in thousands)					
Revenues

Commissions. Total commissions decreased by \$1.4 million or 6.8% to \$19.3 million for the three months ended March 31, 2008 from \$20.7 million for the three months ended March 31, 2007. The following table shows the extent to which the decrease in

Table of Contents

commissions for the three months ended March 31, 2008 was attributable to changes in transaction volumes, transaction fees per million, monthly distribution fees and DealerAxess® minimum fees:

	Change from Three Months Ended March 31, 2007			
	U.S. High-Grade	European High-Grade	Other	Total
	(In thousands)			
Volume (decrease) increase	\$ (1,621)	\$ (3,393)	\$ 339	\$ (4,675)
Transaction fee per million increase (decrease)	1,487	(510)	(292)	685
Monthly distribution fees increase	398	3,738		4,136
DealerAxess® minimum fees decrease	(1,544)			(1,544)
Total commissions (decrease) increase	\$ (1,280)	\$ (165)	\$ 47	\$ (1,398)

Our average fees per million for the three months ended March 31, 2008 and 2007 were as follows:

	Three Months Ended March 31,	
	2008	2007
Average Fee Per Million		
U.S. high-grade		
Total	\$ 320	\$ 225
Transaction	\$ 112	\$ 74
European high-grade		
Total	\$ 567	\$ 168
Transaction	\$ 105	\$ 168
Other	\$ 131	\$ 148
All Products	\$ 299	\$ 198

U.S. high-grade volume decreased by 36.2% for the three months ended March 31, 2008, compared to the three months ended March 31, 2007. The decrease in U.S. high-grade volume was due to a decline in the Company's estimated market share of total U.S. high-grade corporate bond volume as reported by the FINRA Trade Reporting and Compliance Engine (TRACE) from 9.4% for the three months ended March 31, 2007 to 7.3% for the three months ended March 31, 2008, coupled with a decline in overall market volume as measured by FINRA TRACE. Estimated FINRA TRACE U.S. high-grade volume decreased by 18.2% from \$649.3 billion for the three months ended March 31, 2007 to \$531.0 billion for the three months ended March 31, 2008. We believe that the credit market turmoil has negatively impacted overall FINRA TRACE volume and the share of that volume transacted over our platform. The U.S. high-grade distribution fees were \$8.1 million for the three months ended March 31, 2008, compared to \$7.7 million for the three months ended March 31, 2007. The DealerAxess® monthly minimum fees were zero and \$1.5 million for the three months ended March 31, 2008 and 2007, respectively. The majority of the DealerAxess® high-grade minimum fee commitments expired as of June 30, 2007. The total U.S. high-grade average fee per million is calculated for each period presented using both the transaction fees and the monthly distribution fees, including the DealerAxess® monthly minimum fees, paid by our broker-dealer clients. The U.S. high-grade average transaction fee per million increased by 51.4% from \$74 per million for the three months ended March 31, 2007 to \$112 per million for the three months ended March 31, 2008 due to the longer maturity of trades executed on the platform, for which we charge higher commissions.

European high-grade volume decreased by 71.5% for the three months ended March 31, 2008, compared to the three months ended March 31, 2007. During the first quarter of 2008, we believe that the European credit markets experienced market conditions similar to those experienced in the U.S. On June 1, 2007, we introduced a new fee plan for European high-grade corporate bond trades. Similar to the U.S. high-grade plan, the new European high-grade

corporate bond fee plan incorporates a monthly distribution fee and a transaction fee that is dependent on the type of bond traded and the maturity of the issue. The European high-grade distribution fee was \$3.7 million for the three months ended March 31, 2008. The total European high-grade average fee per million is calculated for each period presented using both the transaction fees and the monthly distribution fees paid by our broker-dealer clients. The European high-grade average transaction fee per million decreased from \$168 per million for the three months ended March 31, 2007 to \$105 per million for the three months ended March 31, 2008 principally due to the introduction of the new European high-grade fee plan.

Table of Contents

Other volume increased by 15.2% for the three months ended March 31, 2008, compared to the three months ended March 31, 2007. The increase was primarily due to higher credit default swap and high-yield volume. Other average fee per million declined primarily due to higher volume in lower margin products, principally credit default swap indices.

Information and User Access Fees. Information and user access fees increased by \$0.1 million or 9.4% to \$1.5 million for the three months ended March 31, 2008 from \$1.4 million for the three months ended March 31, 2007.

Investment Income. Investment income decreased by \$0.2 million or 18.9% to \$1.0 million for the three months ended March 31, 2008 from \$1.2 million for the three months ended March 31, 2007. The decrease was due to lower cash and cash equivalents and securities available-for-sale resulting from the Greenline acquisition and lower interest rates.

Technology Products and Services. Technology products and services revenues increased to \$0.8 million for the three months ended March 31, 2008 from \$25,000 for the three months ended March 31, 2007. The increase was a result of the Greenline and TWS acquisitions.

Other. Other revenues decreased to \$0.4 million for the three months ended March 31, 2008 from \$0.5 million for the three months ended March 31, 2007.

Expenses

Our expenses and percentage of revenues for the three months ended March 31, 2008 and 2007, and the resulting dollar and percentage changes, were as follows:

	Three Months Ended March 31,					
	2008		2007		\$ Change	% Change
	\$	% of Revenues	\$ (\$ in thousands)	% of Revenues		
Expenses						
Employee compensation and benefits	\$ 11,018	48.0%	\$ 11,503	48.4%	\$ (485)	(4.2)%
Depreciation and amortization	1,780	7.8	1,911	8.0	(131)	(6.9)
Technology and communications	2,106	9.2	1,763	7.4	343	19.5
Professional and consulting fees	2,153	9.4	1,836	7.7	317	17.3
Occupancy	767	3.3	749	3.2	18	2.4
Marketing and advertising	583	2.5	353	1.5	230	65.2
General and administrative	1,568	6.8	1,181	5.0	387	32.8
Total expenses	\$ 19,975	87.1%	\$ 19,296	81.2%	\$ 679	3.5%

Employee Compensation and Benefits. Employee compensation and benefits decreased by \$0.5 million or 4.2% to \$11.0 million for the three months ended March 31, 2008 from \$11.5 million for the three months ended March 31, 2007. This decrease was primarily attributable to reduced incentive compensation of \$1.1 million and benefits and employment taxes of \$0.4 million, offset by higher wages of \$0.5 million and severance costs of \$0.2 million.

Depreciation and Amortization. Depreciation and amortization expense decreased by \$0.1 million or 6.9% to \$1.8 million for the three months ended March 31, 2008 from \$1.9 million for the three months ended March 31, 2007. For the three months ended March 31, 2008 and 2007, we capitalized \$0.7 million and \$0.9 million, respectively, of software development costs, and \$0.3 million and \$0.3 million, respectively, of computer and related equipment purchases. For the three months ended March 31, 2008, \$8.4 million of definite-life intangibles were

created in connection with the Greenline acquisition.

Technology and Communications. Technology and communications expense increased by \$0.3 million or 19.5% to \$2.1 million for the three months ended March 31, 2008 from \$1.8 million for the three months ended March 31, 2007. This increase was attributable to higher software license and maintenance costs and the purchase of market data.

Table of Contents

Professional and Consulting Fees. Professional and consulting fees increased by \$0.3 million or 17.3% to \$2.2 million for the three months ended March 31, 2008 from \$1.8 million for the three months ended March 31, 2007. The increase was principally due to higher information technology consultant costs and audit expense.

Occupancy. Occupancy costs increased to \$0.8 million for the three months ended March 31, 2008 from \$0.7 million for the three months ended March 31, 2007.

Marketing and Advertising. Marketing and advertising expense increased by \$0.2 million or 65.2% to \$0.6 million for the three months ended March 31, 2008 from \$0.4 million for the three months ended March 31, 2007, primarily due to higher promotional and other marketing expenses.

General and Administrative. General and administrative expense increased by \$0.4 million or 32.8% to \$1.6 million for the three months ended March 31, 2008 from \$1.2 million for the three months ended March 31, 2007, primarily due to increased charges for doubtful accounts.

Provision for Income Tax. For the three months ended March 31, 2008 and 2007, we recorded an income tax provision of \$1.4 million and \$2.0 million, respectively. The decrease in the tax provision was primarily attributable to the \$1.5 million decline in pre-tax income for the period. With the exception of the payment of certain foreign taxes, the provision for income taxes was a non-cash expense since we had available net operating loss carryforwards and tax credits to offset the cash payment of taxes.

Our consolidated effective tax rate for the three months ended March 31, 2008 was 46.2% compared to 45.2% for the three months ended March 31, 2007. The 2008 effective tax rate was unfavorably impacted by the absence of a research and development tax credit, a decrease in tax-exempt investment income and a relative increase in non-deductible expenses. The 2007 effective tax rate includes an adjustment to the deferred tax balance to reflect the tax rate anticipated to be in effect when temporary differences are expected to reverse, which had the effect of increasing the effective tax rate by 5.2 percentage points. Our consolidated effective tax rate can vary from period to period depending on, among other factors, the geographic and business mix of our earnings and changes in tax legislation and tax rates.

Liquidity and Capital Resources

During the past three years, we have met our funding requirements through cash on hand and internally generated funds. Cash and cash equivalents and securities available-for-sale totaled \$88.6 million at March 31, 2008. We have no long-term or short-term debt and do not maintain bank lines of credit.

On October 26, 2006, our Board of Directors authorized a stock repurchase program for up to \$40.0 million of our common stock. Shares repurchased under the program will be held in treasury for future use. During the three months ended March 31, 2008, a total of 221,406 shares were repurchased at a cost of \$2.8 million. The share repurchase program was completed in January 2008. A total of 2,864,120 shares were repurchased at an aggregate cost of \$40.0 million over the life of the repurchase program.

Our cash flows for the periods presented below were as follows:

	Three Months Ended March 31,	
	2008	2007
	(In thousands)	
Net cash (used in) operating activities	\$ (1,908)	\$ (1,760)
Net cash (used in) provided by investing activities	(13,029)	3,362
Net cash (used in) financing activities	(3,411)	(15,268)
Effect of exchange rate changes on cash	(64)	(43)
Net (decrease) for the period	\$ (18,412)	\$ (13,709)

Operating Activities

Net cash used in operating activities of \$1.9 million for the three months ended March 31, 2008 consisted of net income of \$1.6 million, adjusted for non-cash charges, primarily consisting of depreciation and amortization of

\$1.8 million, stock-based compensation expense of \$1.7 million and deferred taxes of \$1.5 million, offset by an increase in cash used for working capital of

Table of Contents

\$8.8 million. The use of working capital primarily resulted from a decrease in accrued employee compensation of \$11.2 million, which included the payment of annual bonuses of \$13.4 million in January 2008, and a decrease in accounts payable, accrued expense and other liabilities of \$0.4 million, offset by a decrease in accounts receivable of \$2.8 million.

Net cash used in operating activities of \$1.8 million for the three months ended March 31, 2007 consisted of net income of \$2.5 million, adjusted for non-cash charges, primarily consisting of depreciation and amortization of \$1.9 million, stock-based compensation expense of \$1.6 million and deferred taxes of \$1.6 million, offset by an increase in cash used for working capital of \$9.4 million. The use of working capital primarily resulted from a decrease in accrued employee compensation of \$7.4 million, which included the payment of annual bonuses of \$10.8 million in January 2007, and an increase in accounts receivable of \$2.6 million.

Investing Activities

Net cash used in investing activities of \$13.0 million for the three months ended March 31, 2008 primarily consisted of \$29.2 million for the acquisition of Greenline, net maturities of securities available-for-sale of \$17.2 million, purchases of furniture, equipment and leasehold improvements of \$0.3 million and capitalization of software development costs of \$0.7 million.

Net cash provided by investing activities of \$3.4 million for the three months ended March 31, 2007 primarily consisted of net proceeds from the maturities and sales of securities-available-for-sale of \$4.6 million, offset by purchases of furniture, equipment and leasehold improvements of \$0.3 million and capitalization of software development costs of \$0.9 million.

Financing Activities

Net cash used in financing activities of \$3.4 million for the three months ended March 31, 2008 primarily consisted of the purchase of treasury stock of \$2.8 million.

Net cash used in financing activities of \$15.3 million for the three months ended March 31, 2007 consisted of the purchase of treasury stock of \$18.5 million, offset by proceeds from the exercise of stock options and issuance of restricted stock of \$2.6 million and excess tax benefits of \$0.7 million.

Past trends of cash flows are not necessarily indicative of future cash flow levels. A decrease in cash flows may have a material adverse effect on our liquidity, business and financial condition.

Other Factors Influencing Liquidity and Capital Resources

We are dependent on our broker-dealer clients, three of which are also our stockholders, who are not restricted from buying and selling fixed-income securities, directly or through their own proprietary or third-party platforms, with institutional investors. None of our broker-dealer clients is contractually or otherwise obligated to continue to use our electronic trading platform. The loss of, or a significant reduction in the use of our electronic platform by, our broker-dealer clients could reduce our cash flows, affect our liquidity and have a material adverse effect on our business, financial condition and results of operations.

We believe that our current resources are adequate to meet our liquidity needs and capital expenditure requirements for at least the next 12 months. However, our future liquidity and capital requirements will depend on a number of factors, including expenses associated with product development and expansion and new business opportunities that are intended to further diversify our revenue stream. We may also acquire or invest in technologies, business ventures or products that are complementary to our business. In the event we require any additional financing, it will take the form of equity or debt financing. Any additional equity offerings may result in dilution to our stockholders. Any debt financings may involve restrictive covenants with respect to dividends, issuances of additional capital and other financial and operational matters related to our business.

As of March 31, 2008, we had \$9.0 million invested in municipal auction rate securities. Liquidity for these securities is typically provided by an auction process that resets the applicable interest rate at pre-determined intervals.

Auctions for these securities failed in 2008 and, as a result, we were unable to liquidate these holdings. However, we believe that other cash, cash equivalents and securities balances are adequate to meet our liquidity requirements for expected growth and investment needs. All of the municipal auction rate securities that we hold are rated AAA by Standard & Poor's and we do not believe that the value of these investments has been impaired.

Table of Contents

We have three regulated subsidiaries, MarketAxess Corporation, MarketAxess Europe Limited and MarketAxess Canada Ltd. MarketAxess Corporation is a registered broker-dealer in the U.S., MarketAxess Europe Limited is a registered Multilateral Trading Facility in the U.K. and MarketAxess Canada Ltd. is a registered Alternative Trading System in the Province of Ontario. As such, they are subject to minimum regulatory capital requirements imposed by their respective market regulators that are intended to ensure general financial soundness and liquidity based on certain minimum capital requirements. The relevant regulations prohibit a registrant from repaying borrowings from its parent or affiliates, paying cash dividends, making loans to its parent or affiliates or otherwise entering into transactions that result in a significant reduction in its regulatory net capital position without prior notification to or approval from the registrant's principal regulator. The capital structures of our subsidiaries are designed to provide each with capital and liquidity consistent with its business and regulatory requirements. As of March 31, 2008, MarketAxess Corporation had net capital of \$14.1 million, which was \$13.5 million in excess of its required minimum net capital of \$0.6 million. MarketAxess Europe Limited had financial resources, as defined by the FSA, of \$20.7 million, which was \$14.3 million in excess of its required financial resources of \$6.4 million. We believe that MarketAxess Corporation and MarketAxess Europe Limited were required to maintain approximately \$9.6 million and \$3.6 million, respectively, in cash as of March 31, 2008 to support their minimum regulatory capital requirements.

In June 2006, our U.S. subsidiary, MarketAxess Corporation, commenced operating an anonymous matching service for its broker-dealer clients. MarketAxess Corporation executes bond trades on a riskless principal basis, which are cleared and settled by an independent clearing broker. The securities clearing agreement that MarketAxess Corporation maintains with the independent clearing broker commenced in December 2004. Under the securities clearing agreement, MarketAxess Corporation maintains a collateral deposit with the clearing broker in the form of cash or U.S. government securities. As of March 31, 2008, the collateral deposit included in securities and cash provided as collateral in the Consolidated Statements of Financial Condition was \$0.5 million. MarketAxess Corporation is exposed to credit risk in the event a counterparty does not fulfill its obligation to complete a transaction. Pursuant to the terms of the securities clearing agreement between MarketAxess Corporation and the independent clearing broker, the clearing broker has the right to charge MarketAxess Corporation for losses resulting from a counterparty's failure to fulfill its contractual obligations. The losses are not capped at a maximum amount and apply to all trades executed through the clearing broker. At March 31, 2008, MarketAxess Corporation had not recorded any liabilities with regard to this right.

Effects of Inflation

Because the majority of our assets are short-term in nature, they are not significantly affected by inflation. However, the rate of inflation may affect our expenses, such as employee compensation, office leasing costs and communications expenses, which may not be readily recoverable in the prices of our services. To the extent inflation results in rising interest rates and has other adverse effects on the securities markets, it may adversely affect our financial condition and results of operations.

Contractual Obligations and Commitments

As of March 31, 2008, we had the contractual obligations and commitments detailed in the following table:

		Payments due by period			
		Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
	Total		(In thousands)		
Operating leases	\$ 11,651	\$ 2,036	\$ 4,303	\$ 2,193	\$ 3,119
Foreign currency forward contracts	22,523	22,523			
	\$ 34,174	\$ 24,559	\$ 4,303	\$ 2,193	\$ 3,119

As of March 31, 2008, we had unrecognized tax benefits of \$2.7 million. Due to the nature of the underlying positions, it is not currently possible to schedule the future payment obligations by period. In addition, in connection with the acquisition of Greenline, the sellers are eligible to receive up to an aggregate of \$3.0 million in cash, subject to Greenline attaining certain specified earn-out targets over the next two years.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of loss resulting from adverse changes in market rates and prices, such as interest rates and foreign currency exchange rates.

Market Risk

The global financial services business is, by its nature, risky and volatile and is directly affected by many national and international factors that are beyond our control. Any one of these factors may cause a substantial decline in the U.S. and global financial services markets, resulting in reduced trading volume. These events could have a material adverse effect on our business, financial condition and results of operations.

As of March 31, 2008, we had securities available-for-sale of \$34.3 million. Adverse movements, such as a 10% decrease in the value of these securities or a downturn or disruption in the markets for these securities, could result in a substantial loss. In addition, principal gains and losses resulting from these securities could on occasion have a disproportionate effect, positive or negative, on our financial condition and results of operations for any particular reporting period.

Interest Rate Risk

Interest rate risk represents our exposure to interest rate changes with respect to the money market instruments, U.S. Treasury obligations and short-term fixed-income securities in which we invest. As of March 31, 2008, our Cash and cash equivalents and Securities available-for-sale amounted to \$88.6 million and were primarily in money market instruments, federal agency issues and municipal securities. We do not maintain an inventory of bonds that are traded on our platform.

Derivative Risk

Our limited derivative risk stems from our activities in the foreign currency forward contract market. We use this market to mitigate our U.S. dollar versus Pound Sterling exposure that arises from the activities of our U.K. subsidiaries. As of March 31, 2008, the notional value of our foreign currency forward contracts was \$22.5 million. We do not speculate in any derivative instruments.

Credit Risk

In June 2006, we began executing riskless principal transactions between our broker-dealer clients through our subsidiary, MarketAxess Corporation. We act as an intermediary in these transactions by serving as counterparty to both the buyer and the seller in matching back-to-back bond trades, which are then settled through a third-party clearing organization. Settlement typically occurs within one to three trading days after the trade date. Cash settlement of the transaction occurs upon receipt or delivery of the underlying instrument that was traded.

We are exposed to credit risk in our role as trading counterparty to our broker-dealer clients executing bond trades on the DealerAxess® platform. We are exposed to the risk that third parties that owe us money, securities or other assets will not perform their obligations. These parties may default on their obligations to us due to bankruptcy, lack of liquidity, operational failure or other reasons. Adverse movements in the prices of securities that are the subject of these transactions can increase our risk. Where the unmatched position or failure to deliver is prolonged, there may also be regulatory capital charges required to be taken by us. The policies and procedures we use to manage this credit risk are new and untested. There can be no assurance that these policies and procedures will effectively mitigate our exposure to credit risk. CDS transactions are conducted on the DealerAxess® platform on a name give-up basis and are directly settled between the two trading counterparties.

Item 4. Controls and Procedures

(a) *Evaluation of Disclosure Controls and Procedures.* Our management, including the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as that term is defined in Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act), as of March 31, 2008. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective to ensure that information required to be disclosed by MarketAxess in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange

Table of Contents

Commission's rules and forms, and to ensure that information is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) *Changes in Internal Control Over Financial Reporting.* There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) and Rule 15d-15(f) under the Exchange Act) during the quarter ended March 31, 2008 identified in connection with the evaluation thereof by our management, including the Chief Executive Officer and Chief Financial Officer, that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II Other Information

Item 1. Legal Proceedings

In January 2007, two former employees commenced arbitration proceedings against MarketAxess Corporation before FINRA arising out of the expiration of certain vested and unvested stock options and unvested restricted shares issued to them. In April 2007, one of those former employees brought a separate FINRA arbitration against MarketAxess Holdings Inc. based on the same claim he had filed against MarketAxess Corporation. The arbitrations brought by that employee against both MarketAxess Corporation and MarketAxess Holdings Inc. have been consolidated before FINRA. The claims made by these two former employees total \$4.5 million plus interest.

One former employee has alleged that we wrongfully prevented him from exercising his vested options when he sought to do so and that we wrongfully claimed that such options had expired on the previous day. The other former employee has alleged that we wrongfully failed to accelerate the vesting of his then unvested options and restricted shares upon his termination and to waive the 90-day time period within which he was required to exercise his vested options. He further alleges that he is entitled to a bonus for the approximately five months that he worked for us during 2006.

MarketAxess Corporation answered both arbitration claims brought against it. We have vigorously defended the claims brought against both MarketAxess Corporation and MarketAxess Holdings Inc. Based on currently available information, we believe that the likelihood of a material loss is not probable. Accordingly, no amounts have been provided in the accompanying financial statements. However, arbitration is subject to inherent uncertainties and unfavorable rulings could occur.

Item 1A. Risk Factors

Risks that could have a negative impact on our business, results of operations and financial condition include: our dependence on our broker-dealer clients, three of which were also our stockholders as of January 1, 2008; the level and intensity of competition in the fixed-income electronic trading industry and the pricing pressures that may result; the variability of our growth rate; our limited operating history; the level of trading volume transacted on the MarketAxess platform; potential fluctuations in our operating results, which may cause our stock price to decline; the absolute level and direction of interest rates and the corresponding volatility in the corporate fixed-income market; our ability to develop new products and offerings and the market's acceptance of those products; technology failures, security breaches or rapid technology changes that may harm our business; our ability to enter into strategic alliances and to acquire other businesses and successfully integrate them with our business; extensive government regulation; continuing international expansion that may present economic and regulatory challenges; and our future capital needs and our ability to obtain capital when needed. This list is intended to identify only certain of the principal factors that could have a material adverse impact on our business, results of operations and financial condition. A more detailed description of each of these and other important risk factors can be found under the caption "Risk Factors" in our most recent Form 10-K, filed on March 3, 2008. There have been no material changes to the risk factors described in the Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Recent Sales of Unregistered Securities

On March 5, 2008, we issued 725,923 shares of our common stock in connection with our acquisition of all of the outstanding capital stock of Greenline Financial Technologies, Inc. The shares of common stock issued to the selling shareholders of Greenline are subject to certain restrictions and cancellation as set forth in a restricted stock agreement executed by each selling shareholder of Greenline and us. Pursuant to each restricted stock agreement, the certificates

evidencing the shares of our common stock to be issued

33

Table of Contents

to each selling shareholder of Greenline shall be held by us and released in two equal installments on December 20, 2008 and December 20, 2009, respectively.

Issuer Purchases of Equity Securities

During the quarter ended March 31, 2008, we repurchased the following shares of our common stock:

Period		Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Dollar Value of Shares That May Yet Be Purchased Under the Plans (In thousands)
January 1, 2008	January 31, 2008	230,612	\$ 12.47	221,406	\$
February 1, 2008	February 29, 2008	38,621	9.12		
March 1, 2008	March 31, 2008				
		269,233	\$ 11.99	221,406	

On October 26, 2006, our Board of Directors authorized a stock repurchase program for up to \$40.0 million of our common stock. Shares repurchased under the program will be held in treasury for future use. The share repurchase program was completed in January 2008. A total of 2,864,120 shares were repurchased at an aggregate cost of \$40.0 million over the life of the repurchase program. During the three months ended March 31, 2008, a total of 47,827 shares were forfeited by employees to us to satisfy employee withholding tax obligations upon the vesting of restricted shares or upon termination of employment.
