Item 2.02 Results of Operations and Financial Condition

The information included in this Current Report on Form 8-K is being furnished, not filed, pursuant to Item 2.02 of Form 8-K.

On August 3, 2005, PG&E Corporation issued the press release attached hereto as Exhibit 99.1 announcing its financial results and the financial results of its subsidiary, Pacific Gas and Electric Company (Utility), for the quarter ended June 30, 2005. Additional supplemental information relating to PG&E Corporation's and the Utility's financial results is attached as Exhibit 99.2. This additional supplemental financial information also will be posted on the "Investors" section of PG&E Corporation's website at www.pgecorp.com. Much of this information is derived from the Quarterly Report on Form 10-Q for the quarter ended June 30, 2005 to be filed by PG&E Corporation and the Utility with the Securities and Exchange Commission (SEC) and should be read in conjunction with such Quarterly Report on Form 10-Q.

PG&E Corporation presents results and guidance on an "earnings from operations" basis in order to provide investors with a measure that reflects the underlying financial performance of the business and offers investors a basis on which to compare performance from one period to another, exclusive of items that, in management's judgment, are not reflective of the normal course of operations.

The attached exhibits contain forward-looking statements regarding 2005 and 2006 guidance for earnings per common share from operations for PG&E Corporation that are necessarily subject to various risks and uncertainties. Actual results could differ materially from those contemplated by the forward-looking statements. These statements are based on current expectations and assumptions which management believes are reasonable, including that the Utility earns an authorized return on equity of 11.22 percent, the second series of energy recovery bonds is issued in November 2005 in the approximate amount of \$800 million, the Utility makes certain capital expenditures, and PG&E Corporation repurchases additional shares of its common stock. In addition to the risk that these assumptions prove to be inaccurate, some of the factors that could cause actual results to differ materially include:

- Unanticipated changes in operating expenses or capital expenditures, which may affect the Utility's ability to earn its authorized rate of return;
- The level and volatility of wholesale electricity and natural gas prices and supplies, the Utility's ability to manage and respond to the levels and volatility successfully, and the extent to which the Utility is able to timely recover increased costs related to such volatility;
- The operation of the Utility's Diablo Canyon nuclear power plant, which exposes the Utility to potentially significant environmental costs and capital expenditure outlays;
- The impact of current and future ratemaking actions of the California Public Utilities Commission (CPUC) and the Federal Energy Regulatory Commission (FERC), including the risk of material differences between forecasted costs used to determine rates and actual costs incurred;
- Whether the assumptions and forecasts underlying the Utility's CPUC-approved long-term electricity procurement plan prove to be accurate, the terms and conditions of the generation or procurement commitments the Utility enters into in connection with its plan, the extent to which the Utility is able to recover the costs it incurs in connection with these commitments, and the extent to which a failure to perform

by any of the counterparties to the Utility's electricity purchase contracts or the California Department of Water Resources' contracts allocated to the Utility's customers affects the Utility's ability to meet its obligations or to recover its costs;

- The extent to which the CPUC or the FERC delays or denies recovery of the Utility's costs, including electricity purchase costs, from customers due to a regulatory determination that such costs were not reasonable or prudent or for other reasons, resulting in write-offs of regulatory balancing accounts;
- How the CPUC administers the capital structure, stand-alone dividend, and first priority conditions of the CPUC's decisions permitting the establishment of holding companies for the California investor-owned electric utilities;
- The impact of future legislative or regulatory actions or policies;
- The timing and resolution of the pending appeal of the bankruptcy court's confirmation of the Utility's plan of reorganization;
- The outcome of regulatory proceedings pending at the CPUC and the FERC, including the Utility's request for a revenue requirement to fund pension contributions that may be required in the future;
- The outcome of the litigation pending against the Utility in California state court involving allegations of injury allegedly caused by exposure to chromium at certain of the Utility's gas compressor stations and other pending litigation;
- Increased competition; and
- Other factors discussed in PG&E Corporation's SEC reports.

Item 7.01 Regulation FD Disclosure

The additional supplemental information included in Exhibit 99.2 is incorporated by reference in response to this Item 7.01, and is deemed to be furnished, not filed, pursuant to Item 7.01 of Form 8-K.

Item 9.01 Financial Statements and Exhibits

Exhibits

The following exhibits are being furnished, and are not deemed to be filed:

Exhibit 99.1 PG&E Corporation Press Release Dated August 3, 2005
