NOTE C GOING CONCERN

As reflected in the accompanying financial statements, the Company has current liabilities of \$1,420,792 in excess of current assets resulting in negative working capital and an accumulated deficit of \$11,371,592. RESULTS OF OPERATIONS FOR THE THREE MONTHS AND SIX MONTHS ENDED JUNE 30, 2006 COMPARED TO THE THREE MONTHS AND SIX MONTHS ENDED JUNE 30, 2005.

We are an operating conglomerate with operations in steel fabrication, and construction. Revenues for the three months and six months ended June 30, 2006 were \$4,869,422 and \$8,805,271, respectively, compared to \$5,163,980 and \$8,492,402 for the same periods in 2005. Total operating expenses were \$4,678,913 and \$8,885,554 for the three months and six months ended June 30, 2006, respectively, compared to \$5,494,732 and \$10,039,607 for the same periods in 2005. These declines were primarily a result of decreased contracts in the construction segment. The decline in operating expenses was not proportional to the decline in revenues due primarily to \$1,175,335 in stock based compensation in 2006 relating to the granting of restricted shares to management and the issuance of restricted shares in payment of consulting fees.

Interest expense for the three months and six months ended June 30, 2006 was \$70,663 and \$194,508, respectively, compared to \$99,230 and \$249,612 for the same periods in 2005. The decreases were primarily due to the conversion of convertible promissory notes.

As a result, Income (Loss) Prior to discontinued operations was \$148,076 and (\$209,729) for the three months and six months ended June 30, 2006, respectively, compared to (\$478,140) and (\$1,712,727) for the same periods in 2005.

LIQUIDITY AND CAPITAL RESOURCES

Net cash used in operating activities was (\$500,972) for the six months ended June 30, 2006. This was primarily related to the gain of discontinued operating subsidiaries.

Total short-term and long-term debt at June 30, 2006 was \$6,841,415 and total shareholders' equity was \$23,682.

Our businesses are seasonally working capital intensive and require funding for purchases of raw materials used in production, replacement parts inventory, capital expenditures, expansion and upgrading of existing facilities, as well as for financing receivables from customers. Additionally, our auditors, in their opinion on our financial statements for the year ended December 31, 2005 issued a going concern qualification to their report dated June 21, 2006. We believe that cash generated from operations, together with our bank credit lines, and cash on hand, will provide us with a majority of our liquidity to meet our operating requirements. We believe that the combination of funds available through future anticipated financing arrangements, as discussed below, coupled with forecasted cash flows, will be sufficient to provide the necessary capital resources for our anticipated working capital, capital expenditures, and debt repayments for at least the next twelve months.

We are seeking to raise up to \$20 million of additional capital from private investors and institutional money managers in the next few months, but there can be no assurance that we will be successful in doing so. If we are not successful in raising any of this additional capital, our current cash resources may not be sufficient to fund our current operations.

12

We may experience problems, delays, expenses, and difficulties sometimes encountered by an enterprise in our stage of development, many of which are beyond our control. For potential acquisitions, these include, but are not limited to, unanticipated problems relating to the identifying partner(s), obtaining financing, culminating the identified partner due to a number of possibilities (prices, dates, terms, etc). Due to limited experience in operating the combined entities for the Company, we may experience production and marketing problems, incur additional costs and expenses that may exceed current estimates, and competition.

Our businesses are seasonally working capital intensive and require funding for purchases of raw materials used in production, replacement parts inventory, capital expenditures, expansion and upgrading of existing facilities, as well as for financing receivables from customers. During the six months ended June 30, 2006, the Company has not engaged in:

- Material off-balance sheet activities, including the use of structured finance or special purpose entities;
- Trading activities in non-exchange traded contracts; or

- Transactions with persons or entities that benefit from their non-independent relationship with the Company.

Inflation

We are subject to the effects of inflation and changing prices. As previously mentioned, we experienced rising prices for steel and other commodities during fiscal 2005 and for the first six months of 2006 that had a negative impact on our gross margins and net earnings. In the remainder of fiscal 2006, we expect average prices of steel and other commodities to be higher than the average prices paid in fiscal 2005 and for the first six months of 2006. We will attempt to mitigate the impact of these anticipated increases in steel and other commodity prices and other inflationary pressures by actively pursuing internal cost reduction efforts and introducing price increases.

Critical Accounting Policies and Estimates

In preparing our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, we must make decisions that impact the reported amounts of assets, liabilities, revenues and expenses, and related disclosures. Such decisions include the selection of the appropriate accounting principles to be applied and the assumptions on which to base accounting estimates. In reaching such decisions, we apply judgments based on our understanding and analysis of the relevant circumstances, historical experience, and actuarial valuations. Actual amounts could differ from those estimated at the time the consolidated financial statements are prepared.

Our significant accounting policies are described in Note A to the consolidated financial statements. Some of those significant accounting policies require us to make difficult subjective or complex judgments or estimates. An accounting estimate is considered to be critical if it meets both of the following criteria: (i) the estimate requires assumptions about matters that are highly uncertain at the time the accounting estimate is made, and (ii) different estimates that reasonably could have been used, or changes in the estimate that are reasonably likely to occur from period to period, would have a material impact on the presentation of our financial condition, changes in financial condition or results of operations.

Accounts Receivable Valuation. We value accounts receivable, net of an allowance for doubtful accounts. Each quarter, we estimate our ability to collect outstanding receivables that provides a basis for an allowance estimate for doubtful accounts. In doing so, we evaluate the age of our receivables, past collection history, current financial conditions of key customers, and economic conditions. Based on this evaluation, we establish a reserve for specific accounts receivable that we believe are uncollectible, as well as an estimate of uncollectible receivables not specifically known. A deterioration in the financial condition of any key customer or a significant slow down in the economy could have a material negative impact on our ability to collect a portion or all of the accounts and notes receivable.

OFF-BALANCE SHEET ARRANGEMENTS

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on us.

ITEM 3. CONTROLS AND PROCEDURES.

The Company's management evaluated, with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report. There has been no change in the Company's internal control over financial reporting that occurred during the quarter covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In the normal course of our business, we and/or our subsidiaries are named as defendants in suits filed in various state and federal courts. We believe that none of the litigation matters in which we, or any of our subsidiaries, are involved would have a material adverse effect on our consolidated financial condition or operations.

There is no past, pending or, to our knowledge, threatened litigation or administrative action which has or is expected by our management to have a material effect upon our business, financial condition or operations, including any litigation or action involving our officers, directors, or other key personnel.
