SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

x **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 29, 2001

Commission File Number: 1-3246

PROQUEST COMPANY

(Exact Name of Registrant as Specified in its Charter)

Delaware
(State or Other Jurisdiction
of Incorporation or Organization)

36-3580106
(I.R.S. Employer
Identification No.)

300 North Zeeb Road, Ann Arbor, Michigan
(Address of Principal Executive Offices)

48103-1553
(Zip Code)

(734) 761-4700

Registrant's telephone number, including area code

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
common stock, \$.001 par value per share	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Edgar Filing: PROQUEST CO - Form 10-K

The aggregate market value of the Registrant's voting stock held by non-affiliates (based upon the per share closing price of \$37.46 on March 15, 2002) was approximately \$504 million.

The number of shares of the Registrant's common stock, \$.001 par value, outstanding as of March 15, 2002 was 24,126,187.

DOCUMENTS INCORPORATED BY REFERENCE

- (1) Portions of the Registrant's Proxy Statement related to the 2002 Annual Meeting of Stockholders, to be filed subsequent to the date hereof Part III.

Table of Contents**ProQuest Company****Item 1. Business**

ProQuest Company is a leading provider of information and content to the education and transportation industries. Formerly known as Bell & Howell, ProQuest has a 97 year history with more than 50 years in information and content aggregation. Through our Information and Learning segment, which primarily serves the academic and library markets, we aggregate and publish value-added content from a wide range of sources including newspapers, periodicals and books. Our Publishing Services segment provides electronic delivery of technical and schematic information to the automotive and powersports (motorcycle, marine, and RV) markets. Our company has demonstrated strong, stable growth in both revenue and earnings in the last few years with 2001 revenue increasing to \$401.6 million from \$359.5 million in 1999 and 2001 operating income increasing to \$68.7 million from \$42.2 million in 1999.

Our predecessor company, Bell & Howell, has been synonymous with creative and technology-based solutions since 1904. In 2001, we sold the legacy Imaging, Mail and Messaging Technologies and finance-related businesses and changed our name to ProQuest. We used the proceeds from the divestitures to significantly reduce our debt.

Information and Learning (I&L). I&L transforms information contained in periodicals, newspapers, dissertations, out-of-print books and other scholarly material into easily accessible electronic form, microfilm or print on demand. I&L aggregates information from a broad array of newspapers and periodicals with which we have licensing arrangements, including the *New York Times*, *The Wall Street Journal*, and *The Christian Science Monitor*. We convert this information through our proprietary methods and add proprietary abstracts to create an expansive microfilm and electronic information vault. I&L's information vault includes information from over 21,000 periodical titles and 7,000 newspaper titles, as well as a unique content base consisting of over 1.5 million dissertations, 390,000 out-of-print books, 550 research collections, and over 15 million proprietary abstracts. The information vault covers all major categories of study—business, humanities, social science, medical / health, ethnic and diversity studies, genealogy, psychology, biology and current events. This content is primarily English language-based, but also includes content in German, French and Spanish. The ability to provide our customers with full image content as it was originally published distinguishes us from other information providers, which typically store and provide information in a text-only format, omitting essential charts, graphs, pictures and other images. Our products are present in virtually every academic library in the U.S., and our library customers generally sign one year subscription contracts to access I&L's proprietary database. Over the last three years we have enjoyed approximately 90% renewal rates. In 2001, I&L represented approximately 59% of our total revenues.

Publishing Services (PS). PS is the leader in the development and deployment of parts and service-oriented catalogs for the automotive and powersports industries worldwide. In 1985, we pioneered the automotive Electronic Parts Catalog (EPC). The system replaced paper and microfiche parts catalogs to provide a powerful and flexible technical reference system using CD-ROM technology. Over 30,000 automobile dealerships now use our EPC worldwide. PS currently publishes electronic catalogs for GM, Ford, DaimlerChrysler, Honda, Toyota, Volvo, Nissan, Porsche, Saturn, and Land Rover among others. In addition, PS is a leading provider of dealer management systems and EPCs to dealers in the powersports markets. PS customer contracts are usually three to five years in duration, and we have enjoyed approximately 90% renewal rates over the last three years. In 2001, PS represented approximately 41% of our total revenues.

Product Overview I&L

ProQuest Online. Introduced in 1995, ProQuest Online allows users to search and find useful information from full-text articles of thousands of newspapers and periodicals dating back to 1986. Our service helps librarians build information bridges that will enable users to locate resources appropriate to their needs. Our service combines easy-to-use search menus, current information, content in a variety of formats, and convenient delivery options and support. We provide the tools to efficiently create predefined searches, electronic reserve rooms for multiple simultaneous users, create magazine racks, establish reading rooms, and generate table-of-content services (curriculum support). All online text is customizable and allows easy integration with our customers' other information holdings. ProQuest SiteBuilder™ helps librarians by

Table of Contents

providing easy-to-use templates, copy-and-paste technology, and step-by-step help. Librarians can link selected ProQuest content to their online catalogs, library web sites and other Web-based resources. Durable Links ensures that subscribers will have continuous access to our content.

ProQuest Online allows users to search and find useful information from more than 7,000 periodicals, newspapers, and other resources contained in our databases. Users can pinpoint information quickly using simple or advanced search techniques. Quality indexing ensures unparalleled accuracy and specificity. We couple databases, primary sources, web tools, and curriculum support together to enhance and improve the research and education process for all of our users. We add approximately 37 million pages of current information to ProQuest Online each year.

Chadwyck-Healey. The Chadwyck-Healey brand, acquired in 1999, is recognized internationally as a leading source of high-quality publications in the humanities. Chadwyck-Healey provides users with world-class databases in the arts, humanities and reference with particular strengths in language and literature, history, music, performing arts and film, biography, and news and reference on the United Kingdom, European Union and Asia.

Publications range from databases of medieval texts in Latin and Greek to up-to-the-minute reference resources such as KnowUK, an online reference service on the people, places and institutions that make up life in the United Kingdom.

Other humanities titles include flagship services such as Literature Online and History Online, both of which deliver a combination of primary works and extensive contextual support.

UMI. UMI sells microform newspaper and periodical subscriptions, microform newspaper and periodical backfiles, dissertation copies, dissertation publishing, out-of-print books, phonefiche, and scholarly research collections. Today, the UMI microform vault constitutes the largest commercially available microform collection in the world with over 6.5 billion pages.

Digital Vault Initiative. Based on our customers' needs, we have selected portions of our UMI microfilm collection to digitize and provide online access to important and difficult to find content from the 1980s back to as early as the 1400s. Customers include libraries and information centers, colleges and universities, and public, corporate and government libraries. Core to our initiative is the intent to create specialized content targeted at niche subject areas that allow us to segment the market more distinctly as well as broaden our selection of academic and research product offerings.

Digital Vault Initiative products include Early English Books Online (EEBO), a digital compilation of nearly all of the books printed in the English language from 1400-1700, the Gerritsen Collection of women's history and the American Periodical Series which features journal content from over 1,000 titles from 1741-1900. Historical Newspapers is an initiative to digitize the full run of several of the nation's leading newspapers, including the *New York Times*, *Wall Street Journal*, *Christian Science Monitor*, and *Washington Post*. Once completed, libraries and educational institutions will have electronic access to newspapers dating back to 1851. Digital Sanborn Maps provides electronic maps. These maps contain the detailed property and land-use records that depict such information as building outlines, size and shape, construction materials, height, windows and doors, and house numbers, showing the grid of everyday life in more than 12,000 U.S. towns and cities from 1867-1970.

XanEdu. We recently launched XanEdu to further leverage our content through the development of supplemental curriculum materials for the college classroom. XanEdu is the world's largest source of premium online content targeted directly at students and faculty of higher education institutions. Driven by our vision to deliver core courseware content and to create tools for customizing online course materials, XanEdu seeks to improve the way students learn and the way instructors teach. XanEdu has experienced strong market acceptance with over 1,000 education institutions and more than 7,500 professors utilizing the service as of the end of 2001.

Our XanEdu service is comprised of two components—the customizable XanEdu CoursePack products and textbook supplements. We employ subject-area specialists who have created a core portfolio of XanEdu CoursePacks, which professors can use to create customizable, copyright-cleared CoursePacks that are

Table of Contents

comprehensive, current and relevant to students. We have also partnered with major publishers such as Wiley, Pearson, and McGraw Hill, to create on-line supplemental materials that expand and enrich the publisher's textbook.

Further strengthening XanEdu's capability is XanEdu Publishing Services. With the acquisition of Campus Custom Publishing, we now offer instructors a turnkey solution to building CoursePacks, with the ultimate choice of distribution either online, in print, or by a hybrid combination of the two. Also, our copyright clearance services offer a streamlined solution for clearing content not currently found in XanEdu's extensive collections.

Content Wholesale. I&L provides content to premier information companies such as Reed Elsevier and Dow Jones which in turn provide content to their corporate desktop users. Under these relationships, we receive revenue based on the amount of ProQuest content accessed by these users.

I&L also provides content to bigchalk.com,inc. (bigchalk). bigchalk develops and markets products and services for research, curriculum integration, assessment, professional development, online community, and e-commerce for teachers, students, parents, librarians and school administrators in the kindergarten through twelfth grade (K-12) educational community. We have an approximate 38.0% ownership interest in bigchalk on a diluted basis.

Product Overview PS

Global Automotive. For over 17 years, we have been developing customized market-leading EPC solutions for the franchised automotive dealer market. Our ability to consolidate and transform manufacturer parts data from disparate sources into cohesive, integrated and highly customized systems is unmatched in the industry. This expertise has been recognized worldwide and is applied every day by 28 different manufacturers and over an estimated 250,000 users worldwide.

For our automotive customers, we create and market turnkey electronic parts catalog systems in 17 languages that allow automotive dealerships to electronically access manufacturers' proprietary technical documentation (such as parts catalogs, parts and service bulletins and other reference materials) and to interface with other important information systems (such as inventory management and billing) within the dealership. These applications help dealers improve business processes by transforming complex technical and performance measurement data into easily accessed answers. These applications also improve the parts-selling operations of dealerships and manufacturers, resulting in the sale of more Original Equipment Manufacturer (OEM) parts.

Performance Management Information and Services. With the acquisition of Alison Associates in 1999, we began offering performance management information to the automotive industry. Alison collects, manages and publishes key decision support information and provides tools that help automobile manufacturers and their networks measure and compare relative performance. Alison is a global company that services 29 brands in 24 key markets with 30,000 dealers worldwide.

Dealer Management Systems. The Powersports unit provides dealer management and cataloging systems for the motorcycle, marine, and recreational vehicle (RV) industries. These systems include accounting, customer service, and inventory as well as electronic parts catalog modules that help manage every aspect of the dealer's business.

Media Solutions. Media Solutions designs, develops and distributes software systems for the construction, mining and heavy equipment industries that automate product, e-commerce and corporate support functions between manufacturers, dealers and their customers.

OECConnection (OEC). OEC is a joint venture among PS, Ford Motor Company, General Motors and DaimlerChrysler. OEC extends the established electronic parts cataloging business by providing dealers and their wholesale customers a comprehensive, secure e-commerce portal. OEC has established and maintains this portal with the primary objective of facilitating the sale of original equipment automotive parts delivered through

Table of Contents

the franchised automotive dealership channel. OEC's current product offerings include CollisionLink, which allows the dealer to extend sales to their wholesale customers, primarily collision shops, and D2Dlink which is an advanced parts locator system.

Financial information for each of our business segments and operations by geographic area is contained in Note 2 to the Consolidated Financial Statements.

Research and Development. We continually seek to take advantage of new product and technology opportunities and view product development to be essential to maintaining and growing our market position. Our research and development expenditures include expenses primarily for database development and information delivery systems.

Sales & Marketing. I&L and PS employ separate sales forces. ProQuest Online, UMI, Chadwyck-Healey and Digital Vault products are sold directly to libraries. As of December 29, 2001, the ProQuest sales force was comprised of both North American and international sales representatives. Within North America, we have dedicated sales representatives for each major product type: traditional (17 salespeople), electronic (44 salespeople), and XanEdu (13 salespeople). These representatives sell directly to libraries, educational institutions, and bookstores throughout the United States and Canada. Outside of the U.S. and Canada, we use a direct international sales force comprised of 33 sales representatives who sell the full portfolio of products to markets across the globe. Third-party international distributors augment this direct sales force. We use a variety of approaches to market our products, including trade shows, direct mailings, product brochures, and online product trials.

We sell Global Automotive, Alison, Powersports and Media Solutions products both domestically and internationally through an internal sales force of 60 salespeople. We market our products and services to two groups: OEMs and individual dealership locations. To effectively reach the large OEMs, such as DaimlerChrysler, Ford, General Motors, and Toyota, we have strategically deployed a team of business development professionals in the world's principal automotive centers in the U.S., U.K., Germany and Japan. In the U.S. and Canada, products and services are sold directly to individual automotive and powersports dealerships using an experienced sales force. Key technology providers such as Reynolds and Reynolds and Automatic Data Processing (ADP) are also utilized as distributors and sales agents to supplement the efforts of our direct sales force. Through various strategic and tactical marketing efforts including trade shows, events and targeted direct response programs, our sales force is able to continue to build strong and profitable customer relationships.

Proprietary Rights

We regard certain of our technologies and content as proprietary and rely primarily on a combination of patent, copyright, trademark and trade secret laws and employee non-disclosure statements to protect our rights. There can be no assurance that the steps we have taken will be adequate to protect our rights. Although we do not believe that we have infringed on the proprietary rights of third parties, there is no assurance that a third party will not make a contrary claim. The cost of responding to such an assertion may be material, whether or not the assertion is valid.

Seasonality

Our quarterly operating results fluctuate as a result of a number of factors including the sales cycle, the amount and timing of new products and our spending patterns. In addition, our customers experience cyclical funding issues that can impact our revenue patterns. Historically, we have experienced our lowest earnings and cash flow in the first fiscal quarter with our highest earnings in the fourth fiscal quarter. Due to this seasonal factor, the Company maintains a revolving credit facility to fund interim cash requirements.

Table of Contents**Competition**

The markets in which we sell our products are highly competitive and, in certain instances, include competitors with substantially greater financial resources. In the I&L segment, our main competitors are Gale Group, a division of Thomson Corporation and EBSCO Company. We also compete with universities such as Massachusetts Institute of Technology for distribution of doctoral dissertations. Newspaper and book publishers also compete with us in the distribution of information either electronically or through another medium, such as print.

I&L competitors also range from free Internet sites to traditional primary publishers and include software publishers that market educational curriculum products to schools and homes; online educational content and electronic commerce providers; and programs that enable remote learning, or management of schools.

In the PS segment, we compete with Automated Data Processing Company, Electronic Data Systems, UCS, Infomedia, and the proprietary electronic parts systems of many original equipment manufacturers such as DaimlerChrysler, Ford Motor Company, Harley-Davidson, Honda Motor Company, and Toyota Motor Company for the distribution of electronic or other parts catalogs.

Many of our current and potential future competitors may have greater name recognition, experience and larger existing customer bases than we do. Accordingly, our competitors may succeed in responding more quickly to new technologies; responding more quickly to changes in customer requirements; devoting greater resources to the development and sale of their products; establishing stronger relationships with affiliates, advertisers, content providers, and vendors; and developing superior services and products.

Government Regulations

We are subject to various federal, state, local and foreign environmental laws and regulations limiting the discharge, storage, handling and disposal of a variety of substances. Our operations are also governed by laws and regulations relating to equal employment opportunity, workplace safety and worker health, including the Occupational Safety and Health Act and regulations thereunder. We believe that ProQuest is in compliance in all material respects with applicable laws and regulations, and that future compliance will not have a material adverse effect upon our consolidated operations or financial condition.

Concentration Risk

We are not dependent upon any one customer or a few customers, the loss of which would have a material adverse effect on our businesses. In fiscal 2001, no single customer represented more than 10.0% of the consolidated net sales of the Company. Our top five customers accounted for 11.0% of consolidated net sales in fiscal 2001.

Employees

Our future success is substantially dependent on the performance of our management team and our ability to attract and retain qualified technical and managerial personnel. We consider our employee relations to be excellent. As of December 29, 2001, we had the following number of employees, broken out by segment:

	Employees
I&L	1,530
PS	970
Corporate	40
	<hr/>
Total	2,540
	<hr/>

None of our employees are represented by collective bargaining agreements.

Table of Contents

Content and Data Licenses

We obtain most of the information and content used in our products from license agreements with third parties. These licenses are generally limited in scope and are nonexclusive. Licenses for content used in our I&L business generally have automatic renewal terms and renew for like terms unless terminated by I&L or the publishers. Our licenses with automobile and powersports manufacturers that are used in the PS business generally have a term of five years. Also, under these agreements the manufacturers have contracted to continue to provide content for the term remaining on the agreements in effect with our customers at the time of the termination. These licenses generally provide for the use of the content in many media formats including electronic, microform or paper.

Risk Factors

You should carefully consider the following risk factors in addition to the other information contained and incorporated by reference in this 10-K before purchasing our common stock.

Our sales and profitability depend on our ability to continue to develop new products that appeal to consumers.

We intend to continue to commit substantial resources to product development. We must continue to invest in technologies that help customers to use our products and services, develop new products, enhance the quality of images being transmitted to the customer, increase delivery of our products over the Internet and other electronic media, and reduce the time in which such products are transmitted. The technological life cycles of our products are difficult to estimate as some of our market niches are mature and demand for our products and services in these niches has stabilized or begun to migrate to other products such as the shift from microfilm-based products to electronic-based products, while some of our other market niches remain in their early stages of development. Our future success will depend upon our ability to continue to introduce new products, to enhance our current products, and to develop and introduce delivery and search technologies that enhance the customer experience in order to offset declining revenue from any of our more mature products. Our focus on product development may result in unanticipated expenditures and capital costs that may not be recovered. Our failure to develop and introduce new or enhanced services and products that achieve consumer acceptance in a timely and cost-effective manner would significantly harm our business.

Our products currently depend on data access agreements with third parties, and the failure to maintain these agreements or to maintain the pricing at which we obtain the data could harm our ability to manufacture existing and develop new products.

Our products are in part based on content and data supplied pursuant to data access agreements with third parties. We may not be able to maintain our current agreements at cost-effective prices. The content supplied by many of our licensors, such as the New York Times, is unique and cannot be replaced. Even if we are able to substitute content providers, we may not be able to enter into new data access agreements with alternative content providers on commercially reasonable terms, on a timely basis or at all. In addition, data used in our products might become unavailable or not be updated as required. The failure to obtain necessary third party data on reasonable terms or identify and implement alternative data access approaches could hurt our business. If a significant number of our content providers decide to terminate or not to renew their relationships with us, we may:

- be at a competitive disadvantage with respect to our competitors;
- lose customers that rely on us as a single source of resources; and
- be unable to increase the amount of revenue generated from particular clients.

Any of these results could adversely impact our operating and financial condition.

Our business will suffer if we do not anticipate changes in computer platforms and other evolving technologies.

We compete in markets characterized by continual technological change, product introductions and enhancements, changes in customer demands and evolving industry standards. For example, we rely on databases from providers such as Oracle and other software providers and we produce additional databases for production of our products and services. If our databases become incompatible with the databases on our customers' computer networks or become outdated and cannot support our products, then our products could become obsolete and our business will suffer. We must continue to expand our databases and invest in new technologies in anticipation of the needs of our customers.

Table of Contents

Similarly, we must manage our development efforts to anticipate and adapt to changes in computer operating environments and other evolving technologies. To remain competitive, we must be able to make our products available in numerous and evolving operating environments. Also, we consistently update our software to enhance retrieval speeds and ease of use. These changes must be made on a timely and cost effective basis which is difficult in our evolving technological landscape. Our business will suffer if we do not update our products and introduce new products that incorporate current technologies and media and if such updating forces us to incur costs that are not recoverable in the sales of our products.

Our businesses utilize the Internet to generate revenues. Uncertainty about the future of the Internet may have a negative impact on our ability to increase revenues.

Our businesses utilize online exchange of information and Internet commerce. We cannot predict whether the Internet will prove to be an effective vehicle for delivering our content or conducting our electronic commerce. The Internet infrastructure may be unable to support future demand as the number of users and potential customers for our products, frequency of use and bandwidth requirements continue to increase. Our business may not succeed without the continued development and maintenance of the Internet.

In addition, the Internet is rapidly changing, and we will continually need to adapt our web sites to emerging Internet standards and practices, technological advances developed by our competition, and changing subscriber, user and sponsor preferences. Ongoing adaptation of our web sites will entail significant expenditures in technology research and development and services to input the enhanced technology that may not improve our web sites markedly. If our attempted improvements of our web sites are delayed, result in systems interruptions or do not gain market acceptance, then our future revenue growth may suffer.

Unless we maintain a strong brand identity, our business may not grow.

We believe that maintaining and enhancing the value of our ProQuest and ABI brands is critical to attracting customers. Our success in growing brand awareness will depend on our ability to continually provide educational technology that students enjoy using and teachers and parents consider beneficial to the learning process. Some of our brand names are new and we may not be successful in growing our brand equity.

We will not be able to grow our Internet businesses if the market for those businesses does not continue to develop.

The success of our Internet businesses will depend in large part on the continued emergence and growth of a market for Internet-based educational technology products. The market for educational technology is characterized by rapid technological change and product innovation, unpredictable product lifecycles and unpredictable preferences among students, teachers and parents. It is difficult to estimate how and when growth or other changes in this market will occur.

The competition we face is intense, and we may not be able to compete effectively or successfully attract and retain customers.

The market for our products is fragmented and highly competitive. Increased competition may affect our ability to be successful in attracting and retaining customers that would cause revenues to decline. The information and learning markets are intensely competitive and subject to increasing commercial attention. Barriers to entering Internet markets are relatively low, and we expect competition to intensify in the future. We also may be adversely affected by pricing and other operational decisions like the recent decision of several of our competitors to offer free educational content services.

I&L's competitors range from free Internet sites to traditional primary publishers and include software publishers that market educational curriculum products to schools and homes, online educational content and electronic commerce providers, and programs that enable remote learning, or management of schools. In addition, many of our content providers could decide to produce and distribute offerings that compete with ours.

In the PS segment, we compete with Automated Data Processing Company, Electronic Data Systems, UCS, Infomedia, and the proprietary electronic parts systems of many original equipment manufacturers such as DaimlerChrysler, Ford Motor Company, Harley-Davidson, Honda Motor Company, and Toyota Motor Company for the distribution of electronic or other parts catalogs.

Many of our current and potential future competitors have substantially greater name recognition, experience and larger existing customer bases than we do. Accordingly, our competitors may succeed in responding more quickly to new technologies; responding more quickly to changes in customer requirements; devoting greater resources to the development and sale of their products; establishing stronger relationships with affiliates, advertisers, content providers, and vendors; and developing superior services and products.

Table of Contents

If we cannot attract, retain and motivate skilled personnel, our ability to compete will be impaired.

Our success depends on our ability to attract, retain and motivate highly qualified management and scientific personnel. We face intense competition for qualified personnel. If we are unable to continue to employ our key personnel or to attract and retain qualified personnel in the future, our business will suffer.

Several members of our senior management team have joined us recently. If we are unable to effectively integrate them into our business or work together as a management team, then our business will suffer. In addition, our employees, including members of our senior management team, may terminate their employment with us at any time. If any one of our key employees left or was otherwise unable to work, and we were unable to find a qualified replacement, our business could be harmed. In addition, the industry in which we compete has a high level of employee mobility and aggressive recruiting of skilled personnel.

Our products currently depend on components licensed from third parties, and the failure to maintain these licenses could harm our ability to produce and enhance existing products and develop new products.

Our products incorporate third party technologies. We do not generally have exclusive arrangements or long-term contracts with these third parties. We have obtained licenses for some of these technologies and may be required to obtain licenses for others. We may not be able to obtain all of the necessary licenses for the third party technology used in our products on commercially reasonable terms, on a timely basis or at all. In addition, technology used in our products might become unavailable or not be updated as required.

We may not be able to develop alternative approaches if third party technologies become unavailable to us on reasonable terms or obsolete. The failure to obtain necessary third party technology or identify and implement alternative technology approaches could hurt our business.

Our intellectual property protection may be inadequate, allowing others to use our technologies and thereby reduce our ability to compete.

We regard much of the technology underlying our services and products as proprietary. The steps we take to protect our proprietary technology may be inadequate to prevent misappropriation of our technology, or third parties may develop similar technology independently. We rely on a combination of patents, trademark, copyright and trade secret laws, employee and third-party non-disclosure agreements and other contracts to establish and protect our technology and other intellectual property rights. Existing trade secrets, patent and copyright law afford us limited protection. The agreements and contracts may be breached or terminated, and we may not have adequate remedies for any breach. Furthermore, policing unauthorized use of our intellectual property is difficult. A third party could copy or otherwise obtain and use our products or technology without authorization. Litigation may be necessary to protect our intellectual property rights, which could result in substantial cost to us and diversion of our efforts. Any such litigation may not even be successful, in which case our business could be further adversely affected.

Our products could infringe on the intellectual property of others, which may cause us to engage in costly litigation and, if we are not successful, could cause us to pay substantial damages and prohibit us from selling our products.

Third parties may assert infringement or other intellectual property claims against us based on their patents or other intellectual property claims. If such claims are successful, we may have to pay substantial damages, possibly including treble damages, for past infringement.

Table of Contents

We might also be prohibited from selling our products without first obtaining a license from the third party, which, if available at all, may require us to pay substantial royalties. Even if infringement claims against us are without merit, defending a lawsuit takes significant time, may be expensive and may divert management attention from other business concerns.

Our employees may be bound by confidentiality and other nondisclosure agreements regarding the trade secrets of their former employers. As a result, we could be subject to allegations of trade secret violations and other similar violations if claims are made that any of our employees have breached these agreements. Such claims could also have an adverse effect on our business.

A key component of our growth strategy is to continue to expand our operations into international markets. We may not succeed with this strategy.

Doing business in international markets is subject to a number of risks, including, among others: acceptance by foreign educational systems of our approach to educational products; expenses associated with customizing products for foreign countries; lack of existing customer base; longer accounts receivable collection periods and greater difficulty in collection; unexpected changes in regulatory requirements; potentially adverse tax consequences; tariffs and other trade barriers; difficulties in staffing and managing foreign operations; changing economic conditions; exposure to different legal standards (particularly with respect to intellectual property); burdens of complying with a variety of foreign laws; and fluctuations in currency exchange rates. If any of these risks were to materialize, our business, financial condition, and results of operations could be adversely affected.

We have entered into strategic alliances and into acquisitions and may pursue others that may disrupt our operations or fail to result in the benefits that we anticipated.

We have entered into and may make strategic acquisitions of companies, products or technologies or enter into strategic alliances as necessary in order to implement our business strategy. If we are unable to fully integrate acquired businesses, products or technologies with our existing operations, we may not receive the intended benefits of such acquisitions. A future strategic acquisition or joint venture may require us to incur debt or issue equity securities, which could dilute our existing stockholders. The success of our existing and future joint venture and strategic alliances depends in part on the ability of the other parties to these transactions to fulfill their obligations thereunder. In addition, the acquisitions or joint ventures may subject us to unanticipated risks or liabilities or disrupt our operations and divert management's attention from day-to-day operations.

Changes in funding for public school systems and libraries could reduce our revenues and impede the growth of our company.

We derive a portion of our revenues from public school and library funding, which is heavily dependent on support from federal, state and local governments. Government budget deficits may adversely affect the availability of this funding. In addition, the government appropriations process is often slow, unpredictable and subject to factors outside of our control. Curtailments, delays or reductions in the funding of schools, colleges or libraries, for example, a reduction of funds allocated to schools under Title I of the Elementary and Secondary Education Act of 1965, could delay or reduce our revenues, in part because schools may not have sufficient capital to purchase our products or services. Funding difficulties experienced by schools, colleges or libraries could also cause those institutions to be more resistant to price increases in our product, compared to other business that might better be able to pass on price increases to their customers. The growth of our business depends on continued investment by public school systems and libraries in educational technology and products. Changes to funding of public school systems and libraries could slow this kind of investment.

The loss of a few of our larger clients would adversely affect our results of operations.

While we are not dependent upon any one customer or a few customers, the loss of a few of our larger customers would adversely affect our results of operations. In fiscal 2001, no single customer represented more than 10.0% of our consolidated net sales. Our top five customers accounted for 11.0% of consolidated net sales in fiscal 2001. The loss of these customers would adversely affect us.

Our operating results continue to fluctuate and a revenue or earnings shortfall in a particular quarter could have a negative impact on the price of our common stock.

Variations in our operating results occur from time to time as a result of many factors, such as timing of customers' capital expenditures, the mix of distribution channels through which our products are distributed, annual budgetary considerations of customers, new product introductions, and general economic conditions.

Certain customers' buying patterns and funding availability cause our sales and cash flow to be generally higher in the fourth quarter of the year. Due to this seasonal factor, we require and expect to have a seasonal working capital credit line to fund cash requirements primarily during our second and third quarters.

Edgar Filing: PROQUEST CO - Form 10-K

Because a high percentage of our expenses are relatively fixed, a variation in the timing of customer orders can cause variations in operating results from quarter to quarter. Our sales cycles are relatively long and depend on factors such as the size of customer orders and the terms of subscription agreements. As a result of the difficulty in forecasting our quarterly revenues, our operating results in any given quarter may fall below securities analysts' expectations, which may cause the price of our common stock to fall abruptly and significantly.

In addition, a deterioration in economic conditions generally may adversely affect the market for our products and thereby cause our operating results to fall below expectations.

We could experience system failures, software errors, or capacity constraints, any of which would cause interruptions in the electronic content we provide to our customers and ultimately cause us to lose customers.

Any delays or failures in the systems or errors in the software that we use to deliver our electronic content to our customers would harm our business. We have occasionally suffered failures of the computer and telecommunication systems that we use to deliver our electronic content to customers. These failures have caused interruptions in the functioning of our electronic content for our customers. The growth of our customer base, as well as the number of sites we provide, may strain our systems in the future.

The systems we currently use to deliver our services to our customers (except for external telecommunications systems) are located in our facilities in Michigan and Ohio. Although we maintain property insurance, claims for any system failure could exceed the coverage obtained.

Any delays, failures or problems with our systems or software could result in loss of or delay in market acceptance and sales, diversion of development resources, injury to our reputation, or increased service and support costs.

Table of Contents

Our systems face security risks and our customers have concerns about their privacy.

We have taken security precautions with respect to our systems and sites. Still, they may be vulnerable to unauthorized access and use by hackers, computer viruses and other disruptive problems. Any security breaches or problems could lead to misappropriation of our customers information, misappropriation of our sites, misappropriation of our intellectual property and other rights, as well as disruption and interruption in the use of our systems and sites. Unauthorized access to and theft of customer information as well as denial of various Internet and online services have occurred in the past, and will likely occur again in the future. In order to maintain our security precautions or to correct problems caused by security breaches, we may need to spend significant capital or other resources. We intend to continue to put industry standard security measures in place for our systems and sites. Nevertheless, those measures may be circumvented and in order to monitor continually and maintain these measures, we may cause disruption to and interruption in our customers use of our systems and sites. These disruptions and interruptions could harm our business.

In general, users of the Internet and online services are very concerned about the security and privacy of their communications and data transmitted. These concerns may inhibit the growth of the Internet and other online services generally, and our sites in particular. Any security breach related to our sites could hurt our reputation and expose us to damages and litigation. These kinds of breaches could harm our business.

We have had limited attempts by users to gain access to certain areas of the systems that are generally not available to such users. Such attempts are constantly monitored. Upon detection a notice is investigated and an appropriate level of action is taken.

The occurrence of a fire, flood or other form of natural disaster at certain of our locations would adversely impact our business.

Copies of our microfilm collections are stored at various of our properties. If a fire, flood or similar event were to occur at one or more of these locations and destroy those collections, our operations could be materially and adversely affected.

We may be subject to government regulation and legal liabilities that may be costly and may interfere with our ability to conduct business.

We are not currently subject to direct regulation by any United States or state government agency other than the laws and regulations applicable to businesses generally. Also, there are few laws or regulations directly applicable to access to or commerce on the Internet. Because of the increasing popularity and use of the Internet, federal and state governments may adopt laws or regulations in the future with respect to commercial online services and the Internet, with respect to user privacy; copyrights and other intellectual property rights and infringement; domain names; pricing; content regulation; defamation; and taxation.

Laws and regulations directly applicable to online commerce or Internet communications are becoming more prevalent and could expose us to substantial liability. For example, recently enacted United States laws, such as the federal Digital Millennium Copyright Act and various federal laws aimed at protecting children, their privacy, and the content made available to them could expose us to substantial liability. Furthermore, various proposals at the federal, state and local level could impose additional taxes on Internet sales. These laws, regulations and proposals could decrease Internet commerce and other Internet uses, and adversely affect our opportunity to derive financial benefit from our activities.

Further, governments of foreign countries might try to regulate our Internet transmissions or prosecute us for violations of their laws covering a variety of topics, many of which are the same as those described above for United States laws and regulations. For example, Germany has taken actions to restrict the free flow of material deemed to be objectionable on the Internet. The European Union has adopted privacy, copyright, and database directives that may impose additional burdens and costs on us. We may incur substantial costs in responding to charges of violations of local laws by foreign governments.

Our stock price may be volatile and your investment in our stock could decline in value.

Our common stock price has fluctuated significantly in the recent past. In addition, market prices for securities of companies in our industries have been highly volatile and may continue to be highly volatile in the future. Often this volatility is unrelated to our operating performance.

Table of Contents

As of December 29, 2001, we had \$251.0 million of total indebtedness, net of cash and cash equivalents, which could hurt our ability to borrow and utilize cash flow as necessary.

The degree to which we are leveraged could have important consequences, including the following: (i) our ability to borrow may be limited to additional amounts for working capital, capital expenditures and potential acquisition opportunities; (ii) a substantial portion of our cash flows from operations must be used to pay our interest expense and repay our debt, which reduces the funds that would otherwise be available for our operations; (iii) we may be more vulnerable to economic downturns and competitive pressures and may have reduced flexibility in responding to changing business, regulatory and economic conditions; and (iv) fluctuations in market interest rates will affect the cost of our borrowings to the extent not covered by interest rate hedge agreements.

Our credit facility contains covenants that may significantly restrict our operations.

Our senior credit facility contains numerous covenants imposing financial and operating restrictions on our business. These restrictions may affect our ability to operate our business and may limit our ability to take advantage of potential business opportunities as they arise. These covenants place restrictions on our ability to, among other things, incur more debt, pay dividends, redeem or repurchase our stock or make other distributions, make acquisitions or investments, use assets as security, dispose of assets or use asset sale proceeds, and extend credit.

In addition, our senior credit facilities require us to meet a number of financial ratios and tests. Our ability to meet these ratios and tests and to comply with other provisions of our credit facilities can be affected by changes in economic or business conditions or other events beyond our control. Any failure to comply with the obligations in our senior credit facilities could result in an event of default under these facilities, which, if not cured or waived, could permit acceleration of our indebtedness under the senior credit facilities which could have a material adverse effect on us.

Item 2. Properties.

ProQuest's principal administrative office is located in Ann Arbor, Michigan. The following table provides certain summary information in square feet with respect to the production and development facilities that the Company owns or leases in connection with its businesses:

	I&L	PS	Total
Owned	113,000	171,000	284,000
Leased	245,000	132,000	377,000
Total	358,000	303,000	661,000

The Company primarily leases facilities in the United States, Canada and United Kingdom. The termination of any one of the leases, some of which are long-term, would not significantly affect the Company's operations.

The Company deems the buildings, machinery and equipment used in its operations (whether owned or leased), generally to be in good condition and adequate for the purposes for which they are used.

Item 3. Legal Proceedings.

The Company is involved in various legal proceedings incidental to its business. Management believes that the outcome of such proceedings will not have a material adverse effect upon the consolidated operations or financial condition of the Company.

Table of Contents**Item 4. Submission of Matters to a Vote of Security Holders.**

None.

Executive Officers and Directors

The following table sets forth the names, ages and positions held by the directors and executive officers of the Company as of March 6, 2002:

Name	Age	Positions at the Company
James P. Roemer	54	Chairman of the Board and Chief Executive Officer
Alan Aldworth	47	Director, President, Chief Operating Officer, and Chief Financial Officer
David Bonderman	59	Director
David G. Brown	45	Director
William E. Oberndorf	48	Director
Gary L. Roubos	65	Director
John H. Scully	57	Director
William J. White	63	Director
Todd W. Buchardt	42	Secretary and General Counsel
Joseph P. Reynolds	52	President and Chief Executive Officer of ProQuest Information and Learning
Bruce E. Rhoades	53	President and Chief Executive Officer of Bell & Howell Publishing Services
Linda Longo-Kazanava	49	Vice President, Human Resources
Kevin G. Gregory	38	Vice President, Controller & Treasurer
Mark Trinske	43	Vice President, Investor Relations

The business experience and certain other information relating to each director and executive officer of the Company is set forth below:

James P. Roemer, ProQuest Company's Chairman and Chief Executive Officer, has been Chairman of the Board since January 1998 and has been a Director of the Company since February 1995. From February 1997 to January 2002, Mr. Roemer served as President and Chief Executive Officer of the Company, and from February 1995 to February 1997 he served as President and Chief Operating Officer. Prior to that, he served as President and Chief Executive Officer of ProQuest Information and Learning Company from January 1994 to June 1995. Mr. Roemer joined ProQuest as Vice President and Bell & Howell Publishing Services Company as President and Chief Operating Officer in October 1991 and was promoted to President and Chief Executive Officer of Publishing Services Company in September 1993. Prior to joining ProQuest, Mr. Roemer was President of the Michie Group, Mead Data Central from December 1989 to October 1991. From January 1982 to December 1989 he was Vice President and General Manager of Lexis, an on-line information service. From April 1981 to December 1982 he served as acting President of Mead Data Central. Mr. Roemer is a Director of bigchalk.com, inc.

Alan Aldworth was appointed President and Chief Operating Officer of ProQuest Company in January 2002. Mr. Aldworth has been Chief Financial Officer of the Company since October 2000. Prior to joining ProQuest, he spent 18 years at Tribune Company where he held a variety of senior financial management and general management positions the most recent of which was as the General Manager of Tribune Education Company. Mr. Aldworth is a Director of bigchalk.com, inc.

David Bonderman has been a Director of the Company since December 1987. He has been the Managing General Partner of Texas Pacific Group (a private investment company) since December 1992. He is also a Director of Beringer Wine Estates, Inc., Continental Airlines, Inc., Denbury Resources, Inc., Oxford Health Plans, Inc., Ryanair Ltd., Co-Star Realty Information Group, Inc. and Washington Mutual Inc.

Table of Contents

David G. Brown has been a Director of the Company since January 1994. He has been the Managing Partner of Oak Hill Venture Partners since August 1999 and a Principal in Arbor Investors LLC since August 1995, Chief Financial Officer of Keystone, Inc. from September 1998 to February 2000, and a Vice President of Keystone, Inc. since August 1993. Prior to joining Keystone, Mr. Brown was a Vice President in the Corporate Finance Department of Salomon Brothers Inc. from August 1985 to July 1993. He is a Director of 2Bridge, AER Energy Resources, FEP Holdings, Lattice Communications, Lightning Finance, MarketTools, MobileForce Technologies, Owners.com, Sitara Networks, and WOW Networks.

William E. Oberndorf has been a Director of the Company since July 1988. He has served as Managing Director of SPO Partners & Co. since March 1991. He is also a Director of Plum Creek Timber Company, Inc., and bigchalk, inc.

Gary L. Roubos has been a Director of the Company since February 1994. He was Chairman of the Board of Dover Corporation from August 1989 to May 1998 and was President from May 1977 to May 1993. He is also a Director of Dover Corporation and Omnicom Group, Inc.

John H. Scully has been a Director of the Company since July 1988. He has served as Managing Director of SPO Partners & Co. since March 1991. He is also a Director of Plum Creek Timber Company, Inc.

William J. White has been a Director of the Company since February 1990 and was Chairman of the Board from February 1990 to January 1998. He served as Chief Executive Officer of the Company from February 1990 to February 1997 and was President of the Company from February 1990 to February 1995. Since January 1998 he has been a Professor of Industrial Engineering and Management Science at Northwestern University. He is also a Director of Ivex Packaging Corporation and Readers Digest Association, Inc.

Todd W. Buchardt was appointed General Counsel in April 1998, and in September 1998 was elected to the additional office of Secretary. Prior to joining ProQuest, he held various legal positions with First Data Corporation from 1986 to 1998.

Joseph P. Reynolds has been President and Chief Executive Officer of ProQuest Information and Learning Company since April 1998. Prior to joining ProQuest, he was Chief Executive Officer of the School and Career Education Group of Thomson Corporation from June 1997 to April 1998 and was Chief Operating Officer of that Group from June 1995 to June 1997. From 1982 to June 1995 he held various positions in management, sales and marketing at Thomson and its Delmar Publishers subsidiary. Mr. Reynolds is a Director of bigchalk.com, inc.

Bruce E. Rhoades has been President and Chief Executive Officer of Bell & Howell Publishing Services since January 2001. He joined the Company in 1999, and has managed several of the Company's business units. Prior to joining the Company, he was Chief Executive Officer of a consulting practice specializing in business and product strategy formulation, software and information product development, and strategic alliances and acquisitions from 1995 to 1999. Prior to that, he held a number of executive positions at Lexis-Nexis Group from 1979 to 1995, and held various positions at ADP Network Services from 1975 to 1979.

Linda Longo-Kazanova has been Vice President, Human Resources of the Company since May 2000. Prior to joining the Company, she was Senior Vice President, Human Resources-North America, for Information Resources, Inc. from 1995 to 2000. From 1985 to 1995, she held various human resource positions with Kraft Foods, Inc.

Kevin G. Gregory has been Vice President, Controller & Treasurer of the Company since February 2001. From August 1997 to February 2001, he served as Tax Counsel and Vice President Tax. Prior to joining the Company, he was Senior Manager at Ernst & Young LLP, and prior to that spent seven years at PricewaterhouseCoopers.

Table of Contents

Mark Trinske has been Vice President, Investor Relations of the Company since October 2001. Prior to joining the Company, he was the founder and President of Lafayette, Colorado-based Trinske Communications, a full-service investor relations firm, in 1992. Previously, Mr. Trinske held positions at the investor and public relations firms Metzger Associates and Carl Thompson Associates. From 1984 to 1989, he was an investment executive with A.G. Edwards and PaineWebber, and prior to that was a corporate securities paralegal at Brobeck, Phleger & Harrison.

Item 5. Market for Registrant's Common Equity and Related Stockholder Matters.

The Company's common stock is traded on the New York Stock Exchange under the symbol **PQE**.

The high and low closing prices of the Company's common stock were as follows:

Quarter	2001		2000	
	High	Low	High	Low
First	\$ 23.6000	\$ 16.4375	\$ 38.7500	\$ 29.6250
Second	31.0000	21.7000	32.1250	19.8750
Third	36.5000	28.2000	26.0625	19.6875
Fourth	34.8000	29.9400	21.9375	15.1250

The Company has not declared or paid any cash dividends on its common stock. The Company's Credit Agreement (as defined herein) contains certain restrictions on the payment of dividends on and repurchases of its common stock. (See Note 9 to the Consolidated Financial Statements.)

Item 6. Selected Financial Data.

The following selected financial data has been derived from the audited Consolidated Financial Statements as of the end of and for each of the fiscal years in the five-year period ended December 29, 2001. The following financial data should be read in conjunction with the Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere herein.

	Fiscal				
	2001	2000	1999	1998	1997
(Dollars in thousands, except per share data)					
Continuing Operations Data (1)(2):					
Net sales	\$ 401,628	\$ 374,301	\$ 359,460	\$ 321,047	\$ 307,050
Cost of sales	(186,963)	(189,196)	(182,300)	(159,335)	(152,520)
Research and development expense	(21,381)	(19,034)	(19,259)	(19,974)	(18,894)
Selling and administrative expense	(124,546)	(123,642)	(115,732)	(102,302)	(97,220)
Gain (loss) on sales of assets	(2,312)	2,726	5,152		
Restructuring charge		(5,196)	(10,505)		
Earnings before interest, income taxes and equity in loss of affiliate and cumulative effect of a change in accounting principle	66,426	39,959	36,816	39,436	38,416
Net interest expense	(25,039)	(28,361)	(10,132)	(14,165)	(22,389)
Income tax expense	(15,727)	(4,639)	(10,674)	(10,108)	(6,411)
Equity in loss of affiliate	(13,374)	(20,848)	(950)		
Earnings (loss)	12,286	(13,889)	15,060	15,163	9,616
Diluted earnings (loss) per common share	\$ 0.51	\$ (0.59)	\$ 0.64	\$ 0.64	\$ 0.48

Other Continuing Operations Data:

Edgar Filing: PROQUEST CO - Form 10-K

EBITDA (3)	\$ 121,650	\$ 93,797	\$ 86,407	\$ 79,357	\$ 75,847
Gross profit as a percent of net sales (4)	53.4%	49.5%	49.3%	50.4%	50.3%
Capital expenditures	52,924	42,623	35,055	29,874	28,181

Table of Contents

	At the End of Fiscal				
	2001	2000	1999	1998	1997
	(Dollars in thousands)				
Balance Sheet Data (2):					
Total assets	628,097	806,586	783,812	657,598	633,495
Long-term debt	252,782	501,821	506,783	445,240	497,252

Footnotes to the Selected Consolidated Financial and Operating Data:

(1) In the first quarter of 2000, the Company adopted a plan to divest its Mail and Messaging Technologies and Imaging businesses and its financing subsidiary. Accordingly, the operating results of these businesses have been segregated from the Company's continuing operations, and are separately reported as discontinued operations in the consolidated financial statements. Excludes extraordinary losses of \$28.9 million in fiscal 1997, and cumulative effect of a change in accounting principle of \$65.3 million in fiscal 2000. The fiscal 1997 to 1999 results have not been retroactively restated to reflect the impact of the change of the method of revenue recognition.

(2) During fiscal 2000, the Company changed its method of accounting for certain inventory costs from LIFO to FIFO (see Note 1 to the Consolidated Financial Statements). The fiscal 1997 to 1999 operating and balance sheet data have been retroactively restated to reflect this change in accounting.

(3) EBITDA from continuing operations is defined as earnings from continuing operations before gain/(loss) on sales of assets, restructuring charges, interest, income taxes, equity in loss of affiliate and cumulative effect of a change in accounting principle, plus depreciation and amortization of other long-term assets, primarily intangibles of acquired companies, but excluding the amortization/write-off of deferred financing costs. EBITDA is generally regarded as providing useful information regarding a company's financial performance, but it is not a measure of financial performance under generally accepted accounting principles. EBITDA from continuing operations should not be considered in isolation from or as a substitute for net income as a measure of the Company's profitability, or as an alternative to the Company's cash flow from operating activities determined under generally accepted accounting principles as a measure of liquidity. Additionally, the Company's calculation of EBITDA from continuing operations may not be comparable to other similarly titled measures of other companies. EBITDA from continuing operations has been included as a supplemental disclosure because it provides useful information about how management assesses the Company's ability to service debt and to fund. The Company's ability to service debt and fund capital expenditures in the future, however, may be affected by other operating or legal requirements.

(4) Gross profit is defined as net sales less cost of sales.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Except for the historical information and discussions contained herein, statements contained in this release may constitute forward-looking statements that involve known and unknown risks, uncertainties, and other factors that may cause actual results, performance or achievements of the Company to be materially different from those projected in forward-looking statements made by, or on behalf of the Company. Factors that could cause or contribute to such differences include risks detailed in Part 1, Item 1 under the caption Risk Factors and elsewhere in the Annual Report on Form 10-K. You should read the following discussion in conjunction with the Selected Financial Data and the Company's Consolidated Financial Statements and Notes thereto appearing elsewhere in this Report on Form 10-K.

Overview. ProQuest Company is a leading provider of information and content to the education and transportation industries. Formerly known as Bell & Howell, ProQuest has a 97 year history with more than 50 years in information and content aggregation. Through our Information and Learning segment, which primarily serves the academic and library markets, we aggregate and publish value-added content from a wide range of sources including newspapers, periodicals and books. Our Publishing Services segment provides electronic delivery of technical and schematic information to the automotive and powersports (motorcycle, marine, and RV) markets. Our company has demonstrated strong, stable growth in both revenue and earnings in the last few years with 2001 revenue increasing to \$401.6 million from \$359.5 million in 1999 and 2001 operating income increasing to \$68.7 million from \$42.2 million in 1999.

Our predecessor company, Bell & Howell, has been synonymous with creative and technology-based solutions since 1904. In 2001, we sold the legacy Imaging, Mail and Messaging Technologies and finance related businesses and changed our name to ProQuest. We used the proceeds from the divestitures to significantly reduce our debt.

Edgar Filing: PROQUEST CO - Form 10-K

Discontinued Operations. In the first quarter of 2000, we began plans to divest our Mail and Messaging Technologies and Imaging businesses and our financing subsidiary. Accordingly, the operating results of these businesses have been segregated from our continuing operations, and are separately reported as a discontinued operation in the consolidated financial statements. We completed our divestiture plan in fiscal 2001.

Table of Contents

Financial information for each of the Company's business segments and operations by geographic area is contained in Note 2 to the Consolidated Financial Statements.

Revenue. The Company derives revenues from licenses of database content (electronic products), sales of microform subscriptions, service, software, and equipment.

Information & Learning provides its customers with access to periodicals, newspapers, dissertations, out-of-print books and other scholarly material in exchange for a fee that normally covers a period of twelve months. Revenues from these subscription agreements are recognized ratably over the term of the agreements using the straight-line method. I&L also sells products where revenue is recognized when product is shipped. These products include microform newspaper and periodical backfiles, research collections, out of print books, dissertation copies, and dissertation publishing.

PS publishes parts catalogs for automotive dealerships and also provides dealer management systems software for powersports dealerships. Parts catalog products are generally sold under multiple-element arrangements that include hardware and related operating systems software, an electronic parts catalog (EPC) database and retrieval system, an agreement to provide periodic updates to the EPC database over the term of the arrangement, and specified services. The Company allocates the total revenue to be received under these arrangements between two elements-the hardware and related operating system software element and the remaining deliverables considered together as a group-based on relative fair value.

The Company accounts for the hardware and related operating systems software element as a sales-type lease, and recognizes sales revenue equal to the normal selling price for such systems upon shipment, when all significant contractual obligations are satisfied and collection of the resulting receivable is reasonably assured. The remainder of the fee due under these arrangements is recognized as revenue on a straight-line basis over the term of the agreement.

Revenue from powersports dealer management systems software is recognized when evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collection is probable. Multiple element software license fees are allocated based on the relative fair values of the elements and recognized when accepted by the customer.

Cost of Sales. Cost of sales consists of product and service costs. Product costs include costs such as production costs, depreciation of electronic and microfilm product masters, amortization of capitalized software costs, royalties for the use of content, Internet hosting costs and technical support costs. Service costs consist primarily of costs for installation and training including personnel, materials, facilities and travel. Except for cost associated with capitalized product development and software, the costs of sales are generally recognized as incurred.

Research and Development Expense. We continually seek to take advantage of new product and technology opportunities and view product development to be essential to maintaining and growing our market position. We expense all software development costs associated with products until technological feasibility is established. In general, we have not historically capitalized significant amounts of these costs. Our research and development expenditures include expenses primarily for database development and information delivery systems.

Table of Contents

Selling and Administrative Expense. Our sales and marketing expenses primarily consist of salaries and compensation paid to employees engaged in sales and marketing activities, advertising and promotional materials, public relations cost and travel. General and administrative expenses principally consist of salaries and compensation paid to our executives and other employees, as well as incidental costs incurred in managing our business.

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States, which requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results may differ from these estimates which could have a material impact on our financial statements. Our significant accounting policies are described in Note 1 of Notes to Consolidated Financial Statements. We believe that our most critical accounting policies include accounting for income taxes and risk of impairment of goodwill and product masters.

Income Taxes. Significant judgement is required in determining the Company's provision for income taxes, deferred tax assets and liabilities and valuation allowance recorded against the net deferred tax assets. In determining realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. As of December 29, 2001, management believes it is more likely than not the Company will realize the benefits of these deductible differences, net of the existing valuation allowances. However, the amount of the deferred tax asset considered realizable could be reduced in the near term if estimates of future taxable income during the carryforward period are reduced.

Risk of Impairment on Goodwill and Product Masters. The Company reviews the carrying value of goodwill and other intangible assets and product masters for impairment whenever events or changes in circumstances indicate that the net book value of an asset may not be recoverable from the estimated undiscounted future cash flows expected to result from its use and eventual disposition. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment is measured by the amount by which the carrying amount of the assets exceeds the fair value as estimated by discounted cash flows. Assets to be disposed of are reported at the lower of the carrying amount or fair value less cost of disposal.

Results of Operations

The following table sets forth continuing operations financial data, excluding gain / (loss) on sales of assets, restructuring charges, equity in loss of affiliate and cumulative effect of a change in accounting principle and its related tax impact:

	Fiscal					
	2001		2000		1999	
	Amount	% of sales	Amount	% of sales	Amount	% of sales
Revenues	\$ 401.6	100.0%	\$ 374.3	100.0%	\$ 359.5	100.0%
Cost of sales	187.0	46.6%	189.2	50.5%	182.3	50.7%
Gross margin	214.6	53.4%	185.1	49.5%	177.2	49.3%
Less:						
Research and development	21.4	5.3%	19.0	5.1%	19.3	5.4%
Selling, general and administrative	124.5	31.0%	123.7	33.0%	115.7	32.2%

------------	---------	------	--------	------	---------	------

Fiscal Year 2001 Compared to Fiscal Year 2000

Revenue.

	<u>2001</u>	<u>2000</u>
I&L	\$ 236.0	\$ 220.0
PS	165.6	154.3
Total	\$ 401.6	\$ 374.3

The Company's net sales from continuing operations increased \$27.3 million, or 7.3%, to \$401.6 million in 2001. Revenue growth was adversely impacted by lower than expected international sales, a virtual halt in one-time, non-subscription sales of digital vault content and microfilm after the September 11th tragedy, and a decline in revenue from our content wholesale channel due to the overall soft economy in 2001.

I&L revenue increased \$16.0 million, or 7.3%, to \$236.0 million. Growth in revenue is primarily due to an 11.8% increase in sales of electronic products. This growth is driven by a price increase of 3.0% and new product sales which increased 9.0%. The growth in electronic products revenue is demonstrated by the growth of the annualized on-line subscription contract value. Annualized on-line subscription contract value is the projected 12-month revenue from all outstanding on-line subscription contracts. The total annualized on-line subscription contract value was \$91.1 million and \$79.0 million at year end 2001 and 2000, respectively. This represents a 15.3% increase which we believe is a good indicator of electronic subscription revenue growth, however, actual on-line subscription revenue may be impacted by other factors such as subscription renewal rates. Microfilm sales increased 7.0% as a result of price increases which more than offset declining unit sales.

Table of Contents

PS revenue increased \$11.3 million, or 7.3%, to \$165.6 million. Growth in revenue is primarily due to a higher number of renewals and higher contract renewal pricing. Additionally, Alison's revenue grew 11.1% from \$25.2 million in 2000 to \$28.0 million in 2001 mainly due to the release of the electronic version of their product TrackerPac in 2001.

Cost of Sales.

	<u>2001</u>	<u>2000</u>
I&L	\$ 125.5	\$ 125.8
PS	61.5	63.4
	<u> </u>	<u> </u>
Total	\$ 187.0	\$ 189.2
	<u> </u>	<u> </u>

Our cost of sales decreased \$2.2 million, or 1.2%, to \$187.0 million in 2001 as a result of reduced sales of low margin hardware at PS and reduced costs associated with I&L's data center.

Our overall gross profit margin (net sales less cost of sales) increased by 3.9 percentage points to 53.4% due to leveraging of our fixed cost infrastructure over increased revenues.

Research and Development.

	<u>2001</u>	<u>2000</u>
I&L	\$ 10.0	\$ 6.1
PS	11.4	12.9
	<u> </u>	<u> </u>
Total	\$ 21.4	\$ 19.0
	<u> </u>	<u> </u>

Research and development expense increased \$2.4 million, or 12.6%, to \$21.4 million in 2001 as we continue to invest in creating new products and integrating technology that streamlines the delivery of this content to our customers. I&L research and development expense increased 63.9% from increased expenditures for database and information delivery systems, while PS research and development expense decreased 11.6% from expense management.

Selling and Administrative.

	<u>2001</u>	<u>2000</u>
I&L	\$ 60.2	\$ 58.0
PS	52.7	52.2
Corporate	11.6	13.5
	<u> </u>	<u> </u>
Total	\$ 124.5	\$ 123.7
	<u> </u>	<u> </u>

Selling and administrative expense increased \$0.8 million, or 0.6%, to \$124.5 million in 2001. This reflects additional sales and marketing resources at I&L and PS offset by reduced Corporate expenses from staff reduction due to sale of discontinued operations.

Table of Contents*Earnings from Continuing Operations.*

	<u>2001</u>	<u>2000</u>
I&L	\$ 40.3	\$ 30.3
PS	40.0	28.0
Corporate	(11.6)	(15.9)
	<u> </u>	<u> </u>
Total	\$ 68.7	\$ 42.4
	<u> </u>	<u> </u>

Earnings from continuing operations increased \$26.3 million, or 62.0%, to \$68.7 million in 2001. The increase in earnings from continuing operations was due to the continuing high levels of subscription renewals, successful development of content for our ProQuest product line, and cost management.

I&L earnings increased \$10.0 million, or 33.0%, to \$40.3 million in 2001. I&L's increased operating earnings is due to strong performance of our core electronic business, sales of new digital products from our Digital Vault Initiative and increased revenue from our XanEdu products.

PS earnings increased \$12.0 million, or 42.9%, to \$40.0 million in 2001. These strong results reflect the increased sales of EPCs and increased sales of motorcycle, marine and RV dealer management systems from the Powersports division.

Corporate expenses decreased \$4.3 million, or 27.0%, to \$11.6 million in 2001 due to reduction in corporate staff and cost management.

Net Interest Expense. Net interest expense decreased \$3.4 million, or 12.0%, to \$25.0 million in 2001, primarily reflecting lower debt levels due to the Company utilizing the proceeds from the sales of discontinued operations to reduce the outstanding debt levels.

Income Tax Expense. Income tax expense increased in 2001 as a result of higher operating earnings, partially offset by a lower effective tax rate for fiscal 2001.

The following items are not reflected in the Results of Operations table, but are reflected in the Consolidated Statements of Operations:

Restructuring.

	<u>2001</u>	<u>2000</u>
I&L	\$	\$ 4.8
PS		1.7
Corporate		(1.3)
	<u> </u>	<u> </u>
Total	\$	\$ 5.2
	<u> </u>	<u> </u>

In connection with the restructuring plan that commenced in December 1999, additional restructuring charges of \$5.2 million for our continuing operations were incurred in 2000. These charges related to severance, obligations under non-cancelable leases for which no economic benefit will be subsequently realized, and business separation costs.

Gain / (Loss) on Sales of Assets.

	<u>2001</u>	<u>2000</u>
I&L	\$	\$
PS	(2.3)	
Corporate		2.7
	<u> </u>	<u> </u>
Total	\$ (2.3)	\$ 2.7

On October 31, 2001, the Company sold certain assets of MotorcycleWorld.com, Inc. (MCW), including MCW's various domain names and web site content to Powersports Network, Inc. During the fourth quarter of 2001, PS sold its interest in MotorcycleWorld.com, Inc.

Equity Loss. The Company's equity in bigchalk's loss equaled \$13.4 million in 2001. As a result of both venture capital financing and the exchange of the Company's investment in an entity acquired by bigchalk for additional shares in bigchalk, the Company owns approximately 38.0% of bigchalk on a fully-diluted basis as of December 29, 2001.

Acquisitions. In 2001, the Company purchased Softline Information, Campus Custom Publishing, and Heritage Quest for a total of \$17.8 million. We also made an additional \$10.0 million investment in bigchalk.

Table of Contents

The acquisition of CCP strengthens XanEdu's current business. CCP provides electronic and paper supplements to more than 1,000 colleges and universities nationwide. In addition, CCP has streamlined copyright capabilities, which accelerates the timeframe in which copyrighted materials can be incorporated into XanEdu products. Finally, we acquired CCP's archive of copyrighted content.

The Heritage Quest product line which includes the popular Heritage Quest Web-based information service, as well as microfilm, CD-ROMs, and print products (Heritage Quest magazine, Genealogy Bulletin, more than 400 books, and more than 100 indexes) is a valuable addition to ProQuest's genealogical resources, including the Genealogy and Local History Online database and Sanborn Maps Online.

Softline Information offers more than 500 newspapers and magazines from ethnic, minority, native, gender, alternative, and independent press. The titles are organized into five specialized databases covering ethnic, cultural, and demographic diversity, including: Ethnic NewsWatch, Ethnic NewsWatch History, Alt-Press Watch, Gender Watch, and Diversity Your World.

These acquisitions did not have a material effect on the comparability to the 2000 Consolidated Financial Statements.

Fiscal 2000 Compared to Fiscal 1999*Net Sales.*

	2000	1999
I&L	\$ 220.0	\$ 198.2
PS	154.3	161.3
Total	\$ 374.3	\$ 359.5

The Company's net sales from continuing operations increased \$14.8 million, or 4.1%, to \$374.3 million in 2000, resulting from strong sales growth of the I&L business, partially offset by a decline in sales of lower margin hardware products at PS.

Net sales at I&L increased \$21.8 million, or 11.0%, to \$220.0 million due to a growing electronic subscription base. Sales growth would have been 18.0% if 1999 sales were adjusted to reflect treatment consistent with 2000 accounting for both revenue recognition for new on-line subscriptions and for the results of the Company's kindergarten through twelfth grade (K-12) Internet business (which was combined with the K-12 Internet business of Infonautics, Inc. in December 1999 to form bigchalk). Sales of electronic content (on a comparable basis) increased 33.0%, from fiscal 1999 to fiscal 2000 with the electronic subscription base continuing to reflect strong sales of ProQuest (the Company's Internet based product offering), which was partially offset by lower CD-ROM/tape subscriptions as customers continued to migrate to on-line delivery of information via the Internet. Net sales of the more traditional microfilm and paper products (which represent 46.0% of I&L's 2000 sales) were slightly above the prior year as increased pricing offset the lower unit volumes in subscription products.

Net sales of PS decreased \$7.0 million, or 4.3%, to \$154.3 million in 2000 as increased sales of performance database products and increased micropublishing sales to select vertical markets were more than offset by lower sales of hardware related to electronic parts catalogs. Fiscal 2000 hardware sales were impacted as our former proprietary hardware systems, which were non-Y2K compliant, were previously replaced in 1999. Sales of parts catalogs and dealer management systems and related service increased slightly and accounted for 68.0% of PS's 2000 sales. Sales of non-electronic products including hardware decreased 20.0% from prior year, principally due to the lower hardware sales. Despite the modest overall sales decline in fiscal 2000, the installed base of systems in U.S. dealers subscribing to PS's electronic parts catalog increased 7.0%. The sales decline would have been 3.0% if the prior year sales were adjusted to reflect consistent revenue recognition.

Table of Contents*Cost of Sales.*

	<u>2000</u>	<u>1999</u>
I&L	\$ 125.8	\$ 113.2
PS	63.4	69.1
	<u> </u>	<u> </u>
Total	\$ 189.2	\$ 182.3
	<u> </u>	<u> </u>

The Company's cost of sales increased \$6.9 million, or 3.8%, to \$189.2 million in 2000, with the gross profit percentage increasing by 0.2 percentage points to 49.5% reflecting a slightly more profitable product mix, increased pricing, and improved leveraging of the ProQuest data center cost infrastructure.

Research and Development.

	<u>2000</u>	<u>1999</u>
I&L	\$ 6.1	\$ 7.0
PS	12.9	12.3
	<u> </u>	<u> </u>
Total	\$ 19.0	\$ 19.3
	<u> </u>	<u> </u>

Research and development expense decreased \$0.3 million, or 1.6%, to \$19.0 million in 2000 as the prior year reflected additional Y2K and ProQuest product development costs.

Selling and Administrative.

	<u>2000</u>	<u>1999</u>
I&L	\$ 58.0	\$ 54.4
PS	52.2	46.3
Corporate	13.5	15.0
	<u> </u>	<u> </u>
Total	\$ 123.7	\$ 115.7
	<u> </u>	<u> </u>

Selling and administrative expense increased \$8.0 million, or 6.9%, to \$123.7 million in 2000, reflecting additional sales/marketing resources to capitalize on the sales growth opportunities from Internet based products, as well as increased distribution costs associated with the higher sales volumes offset by a decrease in corporate expenses due to reduced corporate staff levels due to discontinued operations.

Table of Contents*Earnings from Continuing Operations.*

	<u>2000</u>	<u>1999</u>
I&L	\$ 30.3	\$ 23.7
PS	28.0	33.3
Corporate	(15.9)	(14.8)
	<u> </u>	<u> </u>
Total	\$ 42.4	\$ 42.2
	<u> </u>	<u> </u>

Earnings from continuing operations increased \$0.2 million, or 0.5%, to \$42.4 million in 2000 resulting from higher sales volume at I&L and leveraged operating costs and expenses offset by decreases at PS due to costs associated with our Internet initiative MotorcycleWorld.

I&L earnings increased \$6.6 million, or 27.8%, to \$30.3 million in 2000 as the ProQuest on-line service became profitable. The on-line service achieved profitability through continued strong revenue growth as well as several initiatives to improve the cost structure of the technical infrastructure of the on-line system. Spending on Y2K related activities reduced software development costs in 2000 and helped drive the profit performance as well. Margins continued to improve on the microfilm business as pricing increases more than offset volume erosion. Partially offsetting this positive earnings performance was continued investment in several new Internet initiatives.

PS earnings decreased \$5.3 million, or 15.9%, to \$28.0 million in 2000. Improved results from the performance database products and powersports business lines were more than offset by increased investments.

Corporate expenses increased \$1.1 million, or 7.4%, to \$15.9 million in 2000 due to inflationary cost increases.

Net Interest Expense. Net interest expense increased \$18.3 million to \$28.4 million in 2000, primarily reflecting increased debt levels associated with funding acquisitions in the prior year, the change in revenue recognition methodology at PS (see Note 1 to the Consolidated Financial Statements), and the impact of \$4.2 million of interest income accrued in the prior year related to a favorable settlement with the Internal Revenue Service which resulted in an income tax refund with interest.

Income Tax Expense. Income tax expense decreased in 2000 as a result of the lower level of pretax profit, with the effective income tax rate remaining constant with the prior year.

The following items are not reflected in the Results of Operations table, but are reflected in the Consolidated Statements of Operations:

Restructuring.

	<u>2000</u>	<u>1999</u>
I&L	\$ 4.8	\$
PS	1.7	
Corporate	(1.3)	10.5
	<u> </u>	<u> </u>
Total	\$ 5.2	\$ 10.5
	<u> </u>	<u> </u>

In connection with the restructuring plan (that commenced in December 1999), additional restructuring charges for the Company's continuing operations of \$5.2 million were incurred in 2000 related to severance, obligations under non-cancelable leases for which no economic benefit will be subsequently realized, and business separation costs.

Gain / (Loss) on Sales of Assets.

	<u>2000</u>	<u>1999</u>
I&L	\$	\$ 2.6

Edgar Filing: PROQUEST CO - Form 10-K

PS		
Corporate	2.7	2.6
	<u> </u>	<u> </u>
Total	\$ 2.7	\$ 5.2
	<u> </u>	<u> </u>

Gains/(losses) on sales of assets during fiscal 2000 of \$2.7 million related to:

the sale of a portion of the Company's investment in its affiliate bigchalk resulting from the exercise of stock options granted to employees (gain of \$0.9 million),

the sale of the Company's investment in an entity acquired by bigchalk in exchange for additional common stock of bigchalk (gain of \$0.5 million), and

additional proceeds related to the sale in 1999 of vacant land adjacent to one of the Company's manufacturing operations (gain of \$1.3 million).

Table of Contents**Staff Accounting Bulletin No.101 Implementation**

In December 1999, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 101, *Revenue Recognition in Financial Statements* (SAB 101). As a result of this pronouncement, the Company has modified its accounting for revenue from new on-line subscriptions at I&L, and from electronic parts catalog agreements at PS. See footnotes to the Consolidated Financial Statements for a more complete discussion of the impact of the implementation of SAB 101.

As a result of the changes in the methods of accounting for revenue, approximately \$114.8 million in revenue recognized in fiscal 1999 and prior years was reversed and included in the cumulative effect adjustment determined as of the beginning of fiscal 2000. Of this amount, \$31.7 million and \$44.3 million was recognized in 2001 and 2000, respectively. Furthermore, \$38.8 million will be recognized in 2002 and future years.

International Operations

	<u>2001</u>	<u>2000</u>	<u>1999</u>
Domestic sales	\$ 310.4	\$ 293.7	\$ 290.0
Foreign sales	91.2	80.6	69.5
	<u> </u>	<u> </u>	<u> </u>
Total sales	\$ 401.6	\$ 374.3	\$ 359.5
	<u> </u>	<u> </u>	<u> </u>

Foreign sales increased \$10.6 million, or 13.1%, to \$91.2 million in 2001 as a result of increased sales at PS of electronic products. New product sales at I&L were adversely impacted by currency valuations.

For I&L, we generally invoice international customers in U.S. dollars. During 2001 the U.S. dollar was very strong relative to most foreign currencies. Consequently, we reevaluated our policy of invoicing in U.S. dollars, and for certain customers in certain foreign countries, we began invoicing in local currencies.

Liquidity and Capital Resources

The Company generated cash from operations of \$25.6 million during 2001, compared to cash generated of \$42.1 in 2000. The decrease in cash generated from continuing operations was primarily related to an increase in earnings offset by costs associated with content licenses, and payments in 2001 for charges accrued in 2000 related to accounts payable and the restructuring.

Cash utilized in funding acquisitions in 2001 was \$27.8 million versus \$9.7 million for 2000. In 2001, the Company purchased Softline Information, Campus Custom Publishing, and Heritage Quest, and made an additional investment in bigchalk. In 2000, the Company purchased Media Solutions, Inc. and made an additional investment in bigchalk. Acquisitions and investments are funded from cash generated from operations or from borrowings under the credit facility.

Cash received from the sale of discontinued operations was \$286.9 million for 2001 (net of expenses) compared to none in 2000. The cash received from the sale of discontinued operations was a result of the sales of the Imaging business and the Mail and Messaging Technologies business and its financing subsidiary.

Table of Contents

Cash used by financing activities was \$252.4 million for 2001, compared to \$14.2 million in 2000. The change in cash from financing activities was primarily due to the payment of debt with cash received from the sale of discontinued operations.

As part of the sale of MMT and its financing subsidiary, the Company entered into certain contractual obligations and will continue to monetize limited amounts due from customers through MMT's financing subsidiary for the next three years. The Company's obligation related to certain portions of these monetized amounts have been classified as long-term deferred income on the Consolidated Balance Sheets. In connection with these transactions, the Company retains maximum credit risk of approximately \$0.3 million per year.

The Company primarily finances its operations via a revolving credit agreement (Credit Agreement) which matures in December 2003. The financial covenants of the Credit Agreement require the Company to maintain a minimum net worth level, a maximum leverage ratio, and a minimum fixed charge coverage ratio. Although there are no principal payments due until December 2002 (at which time the maximum amount of the credit facility is reduced by \$50.0 million), there are limitations on the Company's ability to pay dividends, repurchase common stock, incur additional indebtedness, and make certain investments, acquisitions or divestitures.

When the Company sold its discontinued operations, the maximum amount of the credit facility was reduced from \$600.0 million to \$375.0 million. In February 2002, the credit facility was amended, decreasing the maximum amount of the credit facility to \$325.0 million to reflect the Company's decreased borrowing needs after the sale of discontinued operations.

For the remaining two years on the term of the existing Credit Agreement, annual maturities of long-term debt are:

2002	\$	0.3	million
2003		252.8	million

The Company is in compliance with all debt covenants.

Capital Expenditures and Outlook

	<u>2001</u>	<u>2000</u>	<u>1999</u>
Capital expenditures			
I&L	\$ 5.3	\$ 9.1	\$ 9.6
PS	3.7	3.2	2.3
Corporate	0.2	0.1	0.4
	<u>9.2</u>	<u>12.4</u>	<u>12.3</u>
Product masters			
I&L	43.7	30.2	22.8
	<u>52.9</u>	<u>\$ 42.6</u>	<u>\$ 35.1</u>

In fiscal 2001, 2000, and 1999, capital expenditures for the Company's continuing operations were \$52.9 million, \$42.6 million, and \$35.1 million, respectively, a significant portion of which consisted of expenditures for product masters and creation of databases for I&L.

The Company expects to meet its needs for working capital for operations, to fund capital expenditures and potential acquisitions and to meet its debt service requirements through cash generated from operations and the credit facilities discussed above. Although there are no material commitments, the Company expects capital spending in 2002 to increase to approximately to \$54.0 million. These expenditures will be concentrated

Table of Contents

primarily on ongoing and new product master prepublication costs that management believes will generate future revenue growth. The Company's plans are dependent on the availability of funds as well as the identification of projects showing sufficient returns. As a result, there is no assurance that the Company's planned level or type of capital spending will actually occur in the future.

Seasonality

The Company's quarterly operating results fluctuate as a result of a number of factors including the sales cycle, the amount and timing of new products and the Company's spending patterns. In addition, our customers experience cyclical funding issues that can impact our revenue patterns. Historically, the Company has experienced its lowest earnings and cash flow in the first fiscal quarter with its highest earnings in the fourth fiscal quarter. Due to this seasonal factor, the Company maintains a revolving credit facility to fund interim cash requirements.

Recently Issued Financial Accounting Standards

In July 2001, the Financial Accounting Standards Boards (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 141, *Business Combinations* and No. 142, *Goodwill and Other Intangible Assets*. SFAS No. 141 addresses financial accounting and reporting for business combinations, and eliminates the pooling of interest method as a valid method to account for a business combination for all business combinations initiated after June 30, 2001. SFAS No. 142 requires that goodwill no longer be amortized to earnings, but instead be reviewed for impairment on an annual basis. The amortization of goodwill ceases upon adoption of the Statement, which for the Company will be December 30, 2001, the first day of the Company's next fiscal year. The net book value of the Company's goodwill and other intangible assets was \$231.5 million and \$222.3 million for 2001 and 2000, respectively. While management is continuing to assess the impact of these Statements on the Company's results of operations and financial position, the adoption of these statements is expected to reduce 2002 annual goodwill amortization expense by approximately \$7.7 million. Additionally, the effects of any future impairment, as provided by SFAS No. 142, on the Company's consolidated financial position and results of operations are unknown.

In October 2001, the FASB approved Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment of Disposal of Long-Lived Assets* (SFAS 144). This statement addresses financial accounting and reporting for the impairment of long-lived assets and for long-lived assets to be disposed of and supersedes SFAS 121 and APB Opinion No. 30. SFAS 144 is effective for fiscal years beginning after December 15, 2001, and interim periods within those fiscal years, with early application encouraged. The Company is still evaluating the effects of any future impairment and disposal of long-lived assets, as provided by SFAS 144, but does not believe they will have a material impact on the Company's results of operations and financial position.

Table of Contents**Item 7a. *Quantitative and Qualitative Disclosures About Market Risk****Interest Rate Risk*

The Company, as a result of its global operating and financing activities, is exposed to changes in foreign currency and interest rates which may adversely affect its results of operations and financial position. In seeking to minimize such risks, the Company uses derivative financial instruments. The Company periodically utilizes interest rate swaps, caps and collars in order to hedge its exposure to interest rate risk on outstanding debt. Specifically, the Company has entered into interest rate swaps having notional amounts totaling \$200 million at December 29, 2001. The potential impact on the Company's earnings from a 50 basis point increase or decrease in quoted interest rates would be approximately \$0.2 million expense or benefit for 2001. The interest rate swaps have expiration dates through December 2003. The notional amounts outstanding and the approximate weighted-average swap rate versus 3-month LIBOR at December 31 are as follows:

December 31, 2002	\$200 million	6.14%
-------------------	---------------	-------

Foreign Currency Risk

The Company's practice is to hedge its significant operating balance sheet exposures to foreign currency rate fluctuations via use of foreign currency forward or option contracts. The Company does not utilize financial derivatives for trading or other speculative purposes. The Company has entered into various contracts to buy or sell foreign currencies. The contracts have maturity dates extending through February 2002, and are for an aggregate amount of \$67.3 million (which approximates the fair value based on quoted market prices). The Company is exposed to market risk in the event of nonperformance by the other parties (major international banks) to these contracts, however, such nonperformance is not anticipated. The potential impact on the Company's earnings from a 10% adverse change in quoted foreign currency rates would be insignificant.

Item 8. *Financial Statements and Supplementary Data*

Table of Contents

INDEPENDENT AUDITORS REPORT

The Board of Directors
ProQuest Company:

We have audited the accompanying consolidated balance sheets of ProQuest Company and subsidiaries (the Company) as of December 29, 2001 and December 30, 2000, and the related consolidated statements of operations, shareholders' equity and comprehensive income (loss), and cash flows for the fiscal years ended December 29, 2001, December 30, 2000, and January 1, 2000. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ProQuest Company and subsidiaries as of December 29, 2001 and December 30, 2000, and the results of their operations and their cash flows for the fiscal years ended December 29, 2001, December 30, 2000, and January 1, 2000 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Notes 1 and 7 to the Consolidated Financial Statements, the Company changed its methods of accounting for certain inventory costs and revenue recognition during fiscal 2000.

The accompanying Notes to the Consolidated Financial Statements are an integral part of these statements.

Table of Contents

PROQUEST COMPANY AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(dollars and shares in thousands, except per share data)

Note 1 Significant Accounting Policies

Nature of Operations. ProQuest Company and its subsidiaries (collectively, the Company) is a leading global information solutions provider. The Company consists of two business segments, Information and Learning (I&L), and Publishing Services (PS). Within its I&L segment, ProQuest develops and markets information services and systems that are focused on the needs of its customers in select vertical niches, including libraries of all kinds (government, college/university, corporate and public). PS provides systems and information products used by automotive, powersports and recreational vehicle dealers.

Basis of Presentation. Certain amounts in the prior years' financial statements have been reclassified to conform to the current year presentation.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Subsequent actual results may differ from those estimates.

Principles of Consolidation. The consolidated financial statements include the accounts of the Company and its majority owned subsidiaries except where control is temporary.

In December 1999, the Company combined its kindergarten through twelfth grade (K-12) Internet business with the K-12 Internet business from Infonautics, Inc. to form bigchalk.com, inc. (bigchalk). At the end of fiscal 1999, the Company owned 69% of the common equity of bigchalk; such control was temporary, as in January 2000, venture capital financing was raised which lowered the Company's ownership interest to approximately 45%. Further venture capital financing was raised in December 2000 and February 2001 which lowered the Company's ownership interest to approximately 38% on a fully-diluted basis. Accordingly, the Company accounts for its ownership interest in bigchalk using the equity method.

In the first quarter of 2000, the Company adopted a plan to divest its Mail and Messaging Technologies and Imaging businesses and its financing subsidiary. Accordingly, the operating results of these businesses have been segregated from the Company's continuing operations, and are separately reported as discontinued operations in the consolidated financial statements. (See Note 6)

Fiscal Year. The Company's fiscal year ends on the Saturday nearest to December 31. References to fiscal 2001 are for the 52 weeks ended December 29, 2001, references to fiscal 2000 are for the 52 weeks ended December 30, 2001, and references to fiscal 1999 are for the 52 weeks ended January 1, 2000.

Revenue Recognition. The Company derives revenues from licenses of database content, sales of microform subscriptions, service, software, and equipment.

I&L provides its customers with access to periodicals, newspapers, dissertations, out-of-print books and other scholarly material in exchange for a fee that normally covers a period of twelve months. Revenues from these subscription agreements are recognized ratably over the term of the agreements using the straight-line method. In addition to sales of subscription products, I&L also sells products where revenue is recognized when all material elements of the sale have been realized. These products include microform newspaper and periodical backfiles, research collections, out of print books, dissertation copies, and dissertation publishing.

Table of Contents**PROQUEST COMPANY AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

PS publishes parts catalogs for automotive dealerships and also provides dealer management systems software for powersports dealerships. Parts catalog products are generally sold under multiple-element arrangements that include hardware and related operating systems software, an electronic parts catalog (EPC) database and retrieval system, an agreement to provide periodic updates to the EPC database over the term of the arrangement, and specified services. The Company allocates the total revenue to be received under these arrangements between two elements - the hardware and related operating system software element and the remaining deliverables considered together as a group - based on relative fair value.

The Company accounts for the hardware and related operating systems software element as a sales-type lease, and recognizes sales revenue equal to the normal selling price for such systems upon shipment, when all significant contractual obligations are satisfied and collection of the resulting receivable is reasonably assured. The remainder of the fee due under these arrangements is recognized as revenue on a straight-line basis over the term of the agreement.

Revenue from powersports dealer management systems software is recognized when evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collection is probable. Multiple element software license fees are allocated based on the relative fair values of the elements and recognized when accepted by the customer.

The Company periodically reviews its accounts receivable balances and estimates required allowances for doubtful accounts. Allowances for doubtful accounts at the end of fiscal 2001 and 2000 were \$1,353 and \$1,693, respectively.

Foreign Currency Translation. The financial position and results of operations of each of the Company's foreign subsidiaries are measured using the local currency as the functional currency. Revenues and expenses are translated at average exchange rates prevailing during the respective fiscal periods. Assets and liabilities are translated into U.S. dollars using the exchange rates at the end of the respective fiscal periods. Balance sheet translation adjustments arising from differences in exchange rates from period to period are reflected as a separate component of shareholders' equity, and are included in the determination of the Company's comprehensive income.

Net Earnings (Loss) per Common Share. Basic net earnings (loss) per common share is computed by dividing net earnings (loss) by the weighted average number of common shares outstanding during the period. Diluted net earnings (loss) per common share is computed by dividing net earnings (loss) by the weighted average number of common shares outstanding during the period, and assumes the issuance of additional common shares for all dilutive stock options outstanding during the period. A reconciliation of the weighted average number of common shares and equivalents outstanding used in the calculation of basic and diluted net earnings (loss) per common share is shown in the table below for the periods indicated:

	<u>2001</u>	<u>2000</u>	<u>1999</u>
Basic	23,805	23,657	23,569
Dilutive effect of stock options	272		284
Diluted	<u>24,077</u>	<u>23,657</u>	<u>23,853</u>

Cash and Cash Equivalents. The Company considers all highly liquid investments with maturities of three months or less (when purchased) to be cash equivalents. The carrying amount reported in the consolidated balance sheets approximates fair value.

Table of Contents**PROQUEST COMPANY AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Inventory. Inventory costs include material, labor and overhead. Inventories are stated at the lower of cost (determined using the first in, first out (FIFO) method) or market. During the fourth quarter of 2000, the Company changed its method of inventory valuation for the PS business from the last-in, first-out (LIFO) method to the FIFO method as the majority of the inventory items for this business have been continuing to decrease in price. Accordingly, the Company believes that the FIFO method results in a better measurement of operating results. All previously reported results have been restated to reflect the retroactive application of this accounting change as required by generally accepted accounting principles. The accounting change lowered net earnings by \$105 and \$197 for 2000 and 1999, respectively.

Property, Plant, Equipment and Product Masters. Property, plant, equipment and product masters are recorded at cost. The straight-line method of depreciation is primarily used, except for I&L product masters (which represent the cost to create electronic and microform master document copies which are subsequently used in the production process to fulfill customers information requirements), which are depreciated on the double declining balance method. Estimated lives range from 10 to 40 years for buildings and building improvements, 3 to 15 years for machinery and equipment and 10 years for product masters.

Goodwill and Other Intangible Assets. Goodwill and other intangible assets are amortized on a straight-line basis over the expected future periods to be benefited, which range from 15 to 40 years. The Company periodically evaluates the recoverability of the net book value of this intangible asset, particularly in the case of a change in business circumstances or other triggering event, by determining whether the amortization of the asset balance over its remaining life can be recovered through forecasted future operating cash flows for each operation having a significant goodwill balance. In cases where expected undiscounted future cash flows are less than the net book value, an impairment loss is recognized equal to the amount by which the net book value exceeds the fair value of the assets. The assessment of the recoverability of goodwill will be impacted if estimated future operating cash flows are not achieved. Accumulated amortization at the end of fiscal 2001 and 2000 was \$64,905 and \$56,853, respectively.

Impairment of Long-Lived Assets. The Company reviews the carrying value of property, plant, equipment and product masters and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the net book value of an asset may not be recoverable from the estimated undiscounted future cash flows expected to result from its use and eventual disposition. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment is measured by the amount by which the carrying amount of the assets exceeds the fair value as estimated by discounted cash flows. Assets to be disposed of are reported at the lower of the carrying amount or fair value less cost of disposal.

Long-Term Deferred Income. Long-term deferred income represents amounts due from customers in the future that have been monetized by the Company s previously owned finance subsidiary (Bell & Howell Financial Services, or BHFS). As part of the sale of MMT, BHFS was sold and the Company entered into certain contractual obligations and will continue to monetize limited amounts due from customers through BHFS for the next three years. The Company s obligation related to certain portions of these monetized amounts will be satisfied within the next twelve months; these amounts have been classified as the current portion of long-term deferred income.

Income Taxes. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to be in effect for the year in which those temporary differences are expected to be recovered or settled.

Table of Contents**PROQUEST COMPANY AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Stock Option Plan. As permitted by Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock Based Compensation* , the Company accounts for its stock option plan in accordance with the provisions of Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees* and related interpretations. As such, compensation expense would be recorded on the date of grant only if the current market price of the underlying stock exceeded the exercise price. Pro forma net income and earnings per share disclosures for employee stock option grants based on the fair value-based method (defined in SFAS No. 123), whereby the fair value of stock-based awards at the date of grant would be subsequently expensed over the related vesting periods, are included in Note 15.

Derivative Financial Instruments and Hedging Activities. On December 31, 2000, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 138, *Accounting for Certain Derivative Instruments and Certain Hedging Activities an amendment of SFAS No. 133* and, SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. SFAS No. 138 amends the accounting and reporting standards of SFAS No. 133 for certain derivative instruments and certain hedging activities. SFAS No. 133 requires the recognition of all derivative instruments as assets or liabilities in the balance sheet and measures them at fair value. Adoption of SFAS No. 138 and SFAS No. 133 did not have a material impact on the Company's financial position, operating results or cash flows.

Interest Rate Risk

The Company's interest bearing loans and borrowings are subject to interest rate risk. As part of the Company's risk management, \$200,000 of notional amount US dollar interest rate swaps are currently designated as cash flow hedges of the U.S. dollar LIBOR interest rate debt issuances. During fiscal 2001, the Company dedesignated \$150,000 of notional amount swaps due to the sale of discontinued operations.

All derivative contracts that are designated as cash flow hedges are also reported at fair value with the changes in fair value recorded in Other Comprehensive Income (Loss). The Company recognizes the earnings impact of interest rate swaps designated as cash flow hedges upon the payment of the interest related to the underlying debt. The terms of the interest rate swaps exactly match the terms of the underlying transaction, therefore, there is no hedge ineffectiveness or corresponding earnings impact.

All derivative contracts that were dedesignated as cash flow hedges are reported at fair value. The Company recognized an additional \$6,258 million (net of tax) expense as a result of the dedesignation of these cash flow hedges, and is reporting it as a component of the gain on sales of discontinued operations.

Foreign Exchange Risks

A portion of revenues, earnings and net investment in foreign affiliates is exposed to changes in foreign exchange rates. Substantially all foreign exchange risks are managed through operational means. However, the Company believes that foreign exchange risks related to certain transactions are better managed by utilizing foreign currency forwards or option contracts. These contracts are reported at fair value and any changes in fair value are recognized currently in earnings. These contracts have not been designated for hedging treatment under SFAS No. 138 and SFAS No. 133.

Accounting

The impact the derivatives have on the financial statements are as follows:

Other Liabilities

Fair value of interest rate
swaps

Accumulated Other Comprehensive Income

Interest rate swaps designated as cash flow hedges

Interest Expense

Interest rate swaps designated as cash flow hedges

Gain on Sales of Discontinued Operations, net

Interest rate swaps dedesignated as cash flow hedges

Approximately \$11,113 of net derivative losses included in other comprehensive income at December 29, 2001 will be reclassified into earnings within twelve months from that date.

The following table summarizes the net activities in other comprehensive income related to derivatives classified as cash flow hedges held by the Company during fiscal 2001:

Cumulative effect of adopting SFAS No. 133 as of December 31, 2000	\$ (3,277)
(Gains)/losses reclassified into net earnings	5,760
Year-to-date net unrealized loss on derivatives	(13,595)
Income tax expense related to items of other comprehensive income	4,222
	<hr/>
Total, net of tax	\$ (6,890)
	<hr/>

For the year ended December 30, 2000, prior to the adoption of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. Amounts related to derivative contracts were recorded using the hedge accounting approach, and gains and losses on derivative instruments were included in the basis of the underlying hedged transaction. The Company did not recognize the fair values of these derivative financial investments or their changes in fair value in its consolidated financial statements.

New Accounting Pronouncements. In accordance with recently issued accounting pronouncements, the Company will be required to comply with certain changes in accounting rules and regulations.

In July 2001, the Financial Accounting Standards Boards (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 141, *Business Combinations* and No. 142, *Goodwill and Other Intangible Assets*. SFAS No. 141 addresses financial accounting and reporting for business combinations, and eliminates the pooling of interest method as a valid method to account for a business combination for all business combinations initiated after June 30, 2001. SFAS No. 142 requires that goodwill no longer be amortized to earnings, but instead be reviewed for impairment on an annual basis. The amortization of goodwill ceases upon adoption of the Statement, which for the Company will be December 30, 2001, the first day of the Company's next fiscal year. The net book value of the Company's goodwill and other intangible assets was \$231.5 million and \$222.3 million for 2001 and 2000, respectively. While management is continuing to assess the impact of these Statements on the Company's results of operations and financial position, the adoption of these statements is expected to reduce 2002 annual goodwill amortization expense by approximately \$7.7 million. Additionally, the effects of any future impairment, as provided by SFAS No. 142, on the Company's consolidated financial position and results of operations are unknown.

In October 2001, the FASB approved Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144). This Statement addresses financial accounting and reporting for the impairment of long-lived assets and for long-lived assets to be disposed of and supersedes SFAS 121 and APB Opinion No. 30. SFAS 144 is effective for fiscal years beginning after

December 15, 2001, and interim periods within those fiscal years, with early application encouraged. The Company is still evaluating the effects of any future impairment and disposal of long-lived assets as provided by SFAS 144.

Note 2 Business Segments

The Company has two reportable business segments, I&L and PS. (Refer to Note 1 to the Consolidated Financial Statements for a description of segment operations.) The Company evaluates the performance of and allocates resources to each of the segments based on their operating results excluding interest and taxes. The accounting policies for each of the segments are described in the summary of significant accounting policies in Note 1.

Information concerning the Company's reportable business segments and operations by geographic area for fiscal 2001, 2000, and 1999 for its continuing operations is as follows (dollars in millions):

	2001			
	I&L	PS	Corp.	Total
