There is no impact to the Company's net income or related per share amounts for the three months ended March 31, 2015.

See accompanying notes to the unaudited consolidated financial statements.

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

(1) Basis of Presentation

Overview

Brookline Bancorp, Inc. (the “Company”) is a bank holding company (within the meaning of the Bank Holding Company Act of 1956, as amended) and the parent of Brookline Bank, a Massachusetts-chartered savings bank; Bank Rhode Island (“BankRI”), a Rhode Island-chartered financial institution; and First Ipswich Bank (“First Ipswich”), a Massachusetts-chartered trust company (collectively referred to as the “Banks”). The Banks are all members of the Federal Reserve System. The Company is also the parent of Brookline Securities Corp. The Company’s primary business is to provide commercial, business and retail banking services to its corporate, municipal, and individual customers through the Banks and its non-bank subsidiaries.

Brookline Bank, which includes its wholly-owned subsidiaries BBS Investment Corp., Longwood Securities Corp. and its 84.4%-owned subsidiary, Eastern Funding LLC (“Eastern Funding”), operates 25 full-service banking offices in the greater Boston metropolitan area. BankRI, which includes its wholly-owned subsidiaries, Acorn Insurance Agency, BRI Realty Corp., Macrolease Corporation (“Macrolease”), BRI Investment Corp. and its wholly-owned subsidiary, BRI MSC Corp., operates 19 full-service banking offices in the greater Providence area. First Ipswich, which includes its wholly-owned subsidiaries, First Ipswich Insurance Agency and First Ipswich Securities II Corp., operates five full-service banking offices on the north shore of eastern Massachusetts.

The Company’s activities include acceptance of commercial, municipal and retail deposits, origination of mortgage loans on commercial and residential real estate located principally in Massachusetts and Rhode Island, origination of commercial loans and leases to small and mid-sized businesses, investment in debt and equity securities, and the offering of cash management and investment advisory services. The Company also provides specialty equipment financing through its subsidiaries Eastern Funding, which is based in New York, New York, and Macrolease, which is based in Plainview, New York.

The Company and the Banks are supervised, examined and regulated by the Board of Governors of the Federal Reserve System (“FRB”). As a Massachusetts-chartered saving bank and trust company, Brookline Bank and First Ipswich, respectively, are also subject to regulation under the laws of the Commonwealth of Massachusetts and the jurisdiction of the Massachusetts Division of Banks. As a Rhode Island-chartered financial institution, BankRI is also subject to regulation under the laws of the State of Rhode Island and the jurisdiction of the Banking Division of the Rhode Island Department of Business Regulation.

The Federal Deposit Insurance Corporation (“FDIC”) offers insurance coverage on all deposits up to \$250,000 per depositor at each of the three Banks. As FDIC-insured depository institutions, all three Banks are also secondarily subject to supervision, examination and regulation by the FDIC. Additionally, as a Massachusetts-chartered savings bank, Brookline Bank is insured by the Depositors Insurance Fund (“DIF”), a private industry-sponsored insurance company. The DIF insures savings bank deposits in excess of the FDIC insurance limits. As such, Brookline Bank offers 100% insurance on all deposits as a result of a combination of insurance from the FDIC and the DIF. Brookline Bank is required to file reports with the DIF.

Basis of Financial Statement Presentation

The unaudited consolidated financial statements of the Company presented herein have been prepared pursuant to the rules of the Securities and Exchange Commission (“SEC”) for quarterly reports on Form 10-Q and do not include all of the information and note disclosures required by U.S. generally accepted accounting principles (“GAAP”). In the opinion of Management, all adjustments (consisting of normal recurring adjustments) and disclosures considered necessary for the fair presentation of the accompanying consolidated financial statements have been included. Interim results are not necessarily reflective of the results of the entire year. The accompanying unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

The unaudited consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions and balances are eliminated in consolidation.

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

In preparing these consolidated financial statements, Management is required to make significant estimates and assumptions that affect the reported amounts of assets, liabilities, income, expenses and disclosure of contingent assets and liabilities. Actual results could differ from those estimates based upon changing conditions, including economic conditions and future events. Material estimates that are particularly susceptible to significant change in the near-term include the determination of the allowance for loan and lease losses, the determination of fair market values of assets and liabilities, including acquired loans and leases, the review of goodwill and intangibles for impairment and the review of deferred tax assets for valuation allowances.

The judgments used by Management in applying these critical accounting policies may be affected by a further and prolonged deterioration in the economic environment, which may result in changes to future financial results. For example, subsequent evaluations of the loan and lease portfolio, in light of the factors then prevailing, may result in significant changes in the allowance for loan and lease losses in future periods, and the inability to collect outstanding principal may result in increased loan and lease losses.

(2) Recent Accounting Pronouncements

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. This ASU was issued as part of the FASB Simplification Initiative which intends to reduce the complexity of GAAP while improving usefulness to users. There are eight main items in this ASU that contribute to the simplification of share-based accounting. For public entities, this ASU is effective for the fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Early adoption is permitted. Management is currently assessing the applicability of ASU 2016-09 and has not determined the impact of the deferral, if any, as of March 31, 2016.

In March 2016, the FASB issued ASU 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net). This ASU was issued to clarify how to recognize revenue depending on an entities position, in relation to another entity involved, on contracts with customers. The entity can either be a principal party or an agent, and must record revenue accordingly. This ASU is not yet effective. Since this ASU affects ASU 2014-09, and that effective date was deferred, this ASU remains suspended too. Management is currently assessing the applicability of ASU 2016-08 and has not determined the impact of the deferral, if any, as of March 31, 2016.

In March 2016, the FASB issued ASU 2016-07, Investments - Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting. This ASU was issued as part of the FASB Simplification Initiative which intends to reduce the complexity of GAAP while improving usefulness to users. This ASU no longer requires that the equity method be retroactively implemented. Only when an investment qualifies for the equity method is it necessary to switch accounting methods, assuming equity method is not already in place. For public entities, this ASU is effective for the fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. This ASU must be applied prospectively on the effective date. Early adoption is permitted. Management is currently assessing the applicability of ASU 2016-07 and has not determined the impact of the deferral, if any, as of March 31, 2016.

In March 2016, the FASB issued ASU 2016-06, Derivatives and Hedging (Topic 815): Contingent Put and Call Options in Debt Instruments. This ASU was issued to identify a consistent approach on identifying whether or not call (put) options embedded in derivatives meet certain criteria which would then require that they be accounted for separately. GAAP has established rules in order to go about evaluating options within derivatives however questions

arose. The Derivatives Implementation Group then created four steps to aid in this evaluation process. This ASU requires that this four step process be the only assessment process in place for this issue. For public entities, this ASU is effective for the fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. This ASU must be applied prospectively on the effective date. Early adoption is permitted. Management is currently assessing the applicability of ASU 2016-06 and has not determined the impact of the deferral, if any, as of March 31, 2016.

In February 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-02, Leases. This ASU requires lessees to put most leases on their balance sheet but recognize expenses on their income statements in a manner similar to current accounting. This ASU also eliminates current real estate-specific provisions for all companies. For lessors, this ASU modifies the classification criteria and the accounting for sales-type and direct financing leases. This ASU is effective for fiscal years beginning after December 15, 2018, including interim periods therein. Early

At and for the Three Months Ended March 31, 2016 and 2015

adoption is permitted. The Company is currently assessing the applicability of this ASU and has not determined the impact, if any, as of March 31, 2016.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments. This ASU significantly revises an entity's accounting related to (1) the classification and measurement of investments in equity securities and (2) the presentation of certain fair value changes for financial liabilities measured at fair value. It also amends certain disclosure requirements associated with the fair value of financial instruments. This ASU is effective for fiscal years beginning after December 15, 2017, including interim periods therein. The Company is currently assessing the applicability of this ASU and has not determined the impact, if any, as of March 31, 2016.

In August 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date. This ASU was issued to defer the effective date of ASU 2014-09 for all entities by one year. In effect, public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in ASU 2014-09 to annual reporting periods (including interim reporting periods within those period) beginning after December 15, 2017. The Company is currently assessing the applicability of this ASU and has not determined the impact, if any, as of March 31, 2016.

(3) Investment Securities

The following tables set forth investment securities available-for-sale and held-to-maturity at the dates indicated:

	At March 31, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In Thousands)

At March 31, 2016, the fair value of all investment securities available-for-sale was \$536.2 million, with net unrealized gains of \$4.7 million, compared to a fair value of \$513.2 million and net unrealized losses of \$4.4 million at December 31, 2015. At March 31, 2016, \$122.0 million, or 22.8% of the portfolio, had gross unrealized losses of \$1.6 million, compared to \$368.1 million, or 71.7%, with gross unrealized losses of \$6.0 million at December 31, 2015.

At March 31, 2016, the fair value of all investment securities held-to-maturity was \$84.3 million, with net unrealized gains of \$0.9 million, compared to a fair value of \$93.7 million with net unrealized losses of \$62.0 thousand at December 31, 2015. At March 31, 2016, \$11.2 million, or 13.2% of the portfolio, had gross unrealized losses of \$64.0 thousand, compared to \$52.3 million, or 55.8% with gross unrealized losses of \$0.4 million at December 31, 2015.

Investment Securities as Collateral

At March 31, 2016 and December 31, 2015, respectively, \$462.6 million and \$486.4 million of investment securities were pledged as collateral for repurchase agreements; municipal deposits; treasury, tax and loan deposits; swap agreements; and FHLBB borrowings.

The Company performs regular analysis on the investment securities portfolio to determine whether a decline in fair value indicates that an investment security is OTTI. In making these OTTI determinations, Management considers, among other factors, the length of time and extent to which the fair value has been less than amortized cost; projected future cash flows; credit subordination and the creditworthiness; capital adequacy; and near-term prospects of the issuers.

Management also considers the Company's capital adequacy, interest-rate risk, liquidity and business plans in assessing whether it is more likely than not that the Company will sell or be required to sell the investment securities before recovery. If the Company determines that a decline in fair value is OTTI and that it is more likely than not that the Company will not sell or be required to sell the investment security before recovery of its amortized cost, the credit portion of the impairment loss is recognized in the Company's unaudited consolidated statements of income and the noncredit portion is recognized in accumulated other comprehensive income. The credit portion of the OTTI impairment represents the difference between the amortized cost and the present value of the expected future cash flows of the investment security. If the Company determines that a decline in fair value is OTTI and it is more likely than not that it will sell or be required to sell the investment security before recovery of its amortized cost, the entire difference between the amortized cost and the fair value of the investment security will be recognized in the Company's unaudited consolidated statements of income.

Investment Securities Available-For-Sale Impairment Analysis

The following discussion summarizes, by investment security type, the basis for evaluating if the applicable investment securities within the Company's available-for-sale portfolio were OTTI at March 31, 2016. Based on the analysis below, it is more likely than not that the Company will not sell or be required to sell the investment securities before recovery of its amortized cost. The Company's ability and intent to hold these investment securities until recovery is supported by the Company's strong capital and liquidity positions as well as its historically low portfolio turnover. As such, Management has determined that the investment securities are not OTTI at March 31, 2016. If market conditions for investment securities

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

worsen or the creditworthiness of the underlying issuers deteriorates, it is possible that the Company may recognize additional OTTI in future periods.

U.S. Government-Sponsored Enterprises

The Company invests in securities issued by U.S. Government-sponsored enterprises (“GSEs”), including GSE debt securities, mortgage-backed securities (“MBSs”), and collateralized mortgage obligations (“CMOs”). GSE securities include obligations issued by the Federal National Mortgage Association (“FNMA”), the Federal Home Loan Mortgage Corporation (“FHLMC”), the Government National Mortgage Association (“GNMA”), the Federal Home Loan Banks (“FHLB”), and the Federal Farm Credit Bank. At March 31, 2016, only GNMA MBSs and CMOs, and Small Business Administration (“SBA”) commercial loan asset-backed securities with an estimated fair value of \$24.0 million were backed explicitly by the full faith and credit of the U.S. Government, compared to \$21.8 million at December 31, 2015.

At March 31, 2016, the Company held GSE debentures with a total fair value of \$57.3 million with a net unrealized gain of \$1.2 million. At December 31, 2015, the Company held GSE debentures with a total fair value of \$40.6 million, which approximated amortized cost. At March 31, 2016, none of the eighteen securities in this portfolio were in an unrealized loss position. At December 31, 2015, seven of the thirteen securities in this portfolio were in unrealized loss positions. All securities are performing and backed by the implicit (FHLB / FNMA / FHLMC) or explicit (GNMA / SBA) guarantee of the U.S. Government. During the three months ended March 31, 2016, the Company purchased \$21.5 million of GSE debentures. There were no purchases of GSE debentures during the same period in 2015.

At March 31, 2016, the Company held GSE mortgage-related securities with a total fair value of \$432.4 million with a net unrealized gain of \$2.7 million. This compares to a total fair value of \$423.7 million with a net unrealized loss of \$4.5 million at December 31, 2015. At March 31, 2016, 38 of the 254 securities in this portfolio were in unrealized loss positions, compared to 101 of the 249 securities at December 31, 2015. All securities are performing and backed by the implicit (FHLB / FNMA / FHLMC) or explicit (GNMA) guarantee of the U.S. Government. During the three months ended March 31, 2016, the Company purchased \$20.5 million in GSE CMOs and GSE MBSs. This compares to a total of \$29.5 million purchased during the same period in 2015.

SBA Commercial Loan Asset-Backed Securities

At March 31, 2016, the Company held six SBA securities with a total fair value of \$0.1 million which approximated cost as compared to December 31, 2015, where the Company held seven SBA securities with a total fair value of \$0.1 million, which approximated amortized cost. At March 31, 2016, five of the six securities in this portfolio were in unrealized loss positions and at December 31, 2015, six of the seven securities in this portfolio were in unrealized loss positions. All securities are performing and are backed by the explicit (SBA) guarantee of the U.S. Government.

Corporate Obligations

From time to time, the Company may invest in high-quality corporate obligations to provide portfolio diversification and improve the overall yield on the portfolio. At March 31, 2016, the Company held fifteen corporate obligation securities with a total fair value of \$44.2 million and a net unrealized gain of \$1.1 million as compared to fifteen corporate obligation securities with a total fair value of \$46.5 million and a net unrealized gain of \$0.3 million at December 31, 2015. At March 31, 2016, none of the fifteen securities in this portfolio was in an unrealized loss

position. At December 31, 2015, two of the fifteen securities in this portfolio were in an unrealized loss position. Full collection of the obligations is expected because the financial condition of the issuer is sound, and the issuer has not defaulted on scheduled payments, the obligations are rated investment grade, and the Company has the ability and intent to hold the obligations for a period of time to recover the amortized cost. During the three months ended March 31, 2016 and 2015, the Company did not purchase any corporate obligations.

Trust Preferred Securities

Trust preferred securities represent subordinated debt issued by financial institutions. At March 31, 2016, the Company owned two trust preferred securities with a total fair value of \$1.2 million and a net unrealized loss of \$0.3 million. This compares to two trust preferred securities with a total fair value of \$1.3 million and a net unrealized loss of \$0.2 million at December 31, 2015. At March 31, 2016 and December 31, 2015, both of the securities in this portfolio were in unrealized loss

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

positions. Full collection of the obligations is expected because the financial condition of the issuers is sound, neither of the issuers have defaulted on scheduled payments, the obligations are rated investment grade, and the Company has the ability and intent to hold the obligations for a period of time to recover the amortized cost.

Marketable Equity Securities

At March 31, 2016 and December 31, 2015, the Company owned two marketable equity securities with a fair value of \$1.0 million, which approximated amortized cost. At March 31, 2016 and December 31, 2015, neither of the securities in this portfolio was in an unrealized loss position.

Investment Securities Held-to-Maturity Impairment Analysis

As of March 31, 2016, the Company owned 93 held-to-maturity investment securities with a total fair value of \$84.3 million and a net unrealized gain of \$0.9 million. This compares to a fair value of \$93.7 million at December 31, 2015. As of March 31, 2016, five of the securities were in an unrealized loss position compared to none of the securities in an unrealized loss position at December 31, 2015. Management does not intend to sell these securities prior to maturity. As such, Management has determined that the investment securities are not OTTI at March 31, 2016. During the three months ended March 31, 2016, the Company purchased \$3.5 million of held-to-maturity investment securities. The Company did not purchase any held-to-maturity investment securities during the same period in 2015.

U.S. Government-Sponsored Enterprises

The Company invests in securities issued by GSEs including GSE debt securities, MBSs, and CMOs. GSE securities include obligations issued by FNMA, FHLMC, GNMA, FHLB, and the Federal Farm Credit Bank. As of March 31, 2016, the Company owned GSE debentures and GSE MBS with a total fair value of \$25.5 million and \$18.5 million, respectively.

As of March 31, 2016, the Company owned GSE mortgage-related securities with a total amortized cost of \$18.5 million as compared to December 31, 2015, where the amortized cost was \$19.3 million. During the period ended March 31, 2016, the Company purchased a total of \$3.0 million in GSEs and no GSE MBSs and did not make any purchases in the same period in 2015. As of March 31, 2016, four of the 20 securities were in unrealized loss positions as compared to December 31, 2015, where 16 of the 22 securities in this portfolio were in unrealized loss positions. All securities are performing and backed by the implicit (FHLB/FNMA/FHLMC) or explicit (GNMA) guarantee of the U.S Government.

Municipal Obligations

As of March 31, 2016, the Company owned 72 municipal obligation securities with a total fair value and total amortized cost of \$39.8 million and \$39.0 million, respectively, as compared to December 31, 2015 where the 72 municipal obligations had a total fair value and total amortized cost of \$39.4 million and \$39.1 million, respectively. During the periods ended March 31, 2016 and March 31, 2015, the Company did not purchase any municipal obligations. As of March 31, 2016, none of the 72 securities in this portfolio was in an unrealized loss position as compared to December 31, 2015, where 15 of the 72 securities in this portfolio were in unrealized loss positions.

Foreign Government Obligations

As of March 31, 2016 and December 31, 2015, the Company owned one foreign government obligation security with a fair value and amortized cost of \$0.5 million. As of March 31, 2016, the foreign government obligation security was in an unrealized loss position as compared to December 31, 2015, where the security was not in an unrealized loss position. During the period ended March 31, 2016, the Company repurchased the same \$0.5 million foreign government obligation securities that had matured in the same period. The Company did not purchase any foreign

government obligation securities during the same period in 2015.

At and for the Three Months Ended March 31, 2016 and 2015

Portfolio Maturities

The final stated maturities of the debt securities are as follows at the dates indicated:

	At March 31, 2016			At December 31, 2015		
	Amortized Cost	Estimated Fair Value	Weighted Average Rate	Amortized Cost	Estimated Fair Value	Weighted Average Rate
	(Dollars in Thousands)					
Investment securities available-for-sale:						
Within 1 year	\$55	\$55	2.00 %	\$2,999	\$3,003	2.09 %
After 1 year through 5 years	56,364	57,680	2.30 %	59,729	60,249	2.32 %
After 5 years through 10 years	114,774	116,956	2.03 %	100,658	100,833	2.05 %
Over 10 years	359,356	360,498	1.95 %	353,259	348,139	1.97 %
	\$530,549	\$535,189	2.00 %	\$516,645	\$512,224	2.03 %
Investment securities held-to-maturity:						
Within 1 year	\$135	\$135	1.80 %	\$651	\$651	1.00 %
After 1 year through 5 years	18,502	18,625	1.36 %	23,888	23,866	1.52 %
After 5 years through 10 years	46,368	47,157	2.02 %	50,078	50,344	2.00 %
Over 10 years	18,404	18,373	1.69 %	19,140	18,834	1.82 %
	\$83,409	\$84,290	1.80 %	\$93,757	\$93,695	1.83 %

Actual maturities of debt securities may differ from those presented above since certain obligations, particularly MBS and CMOs, amortize and provide the issuer the right to call or prepay the obligation prior to the scheduled final stated maturity without penalty.

At March 31, 2016, issuers of debt securities, excluding MBS and CMOs, with an estimated fair value of \$34.4 million had the right to call or prepay the obligations. Of the \$34.4 million, \$6.1 million matures in 1 - 5 years, \$27.2 million matures in 6 - 10 years, and \$1.2 million matures after 10 years. At December 31, 2015, issuers of debt securities with an estimated fair value of \$48.5 million had the right to call or prepay the obligations. Of the \$48.5 million, \$15.5 million matures in 1 - 5 years, \$31.8 million matures in 6 - 10 years, and \$1.3 million matures after ten years.

Security Sales

Security transactions are recorded on the trade date. When securities are sold, the adjusted cost of the specific security sold is used to compute the gain or loss on the sale. There were no security sales during the three-month periods ended March 31, 2016 and 2015.

Home equity	234,708	3.35 %	79,845	3.99 %	314,553	3.51 %
Other consumer	12,039	4.77 %	131	17.40 %	12,170	4.91 %
Total consumer loans	774,593	3.57 %	168,579	3.93 %	943,172	3.63 %
Total loans and leases	\$4,572,888	4.38 %	\$422,652	4.18 %	\$4,995,540	4.36 %

The net unamortized deferred loan origination fees and costs included in total loans and leases were \$12.6 million and \$12.8 million as of March 31, 2016 and December 31, 2015, respectively.

The Company's Banks and subsidiaries lend primarily in eastern Massachusetts, southern New Hampshire, and Rhode Island, with the exception of equipment financing, 32.9% of which is in the greater New York and New Jersey metropolitan area and 67.1% of which is in other areas in the United States of America at March 31, 2016, as compared to 32.8% of which is in the greater New York and New Jersey metropolitan area and 67.2% of which in other areas in the United States of America as of December 31, 2015.

Competition for the indirect automobile loans increased significantly as credit unions and large national banks entered indirect automobile lending. That competition drove interest rates down and, in some cases, changed the manner in which interest rates are developed, from including a dealer-shared spread to imposing a dealer-based fee to originate the loan. Given this market condition, Management ceased the Company's origination of indirect automobile loans in December 2014. For the quarter ended March 31, 2015, the Company sold over 90% of the portfolio for \$255.2 million, which resulted in a loss of \$11.8 thousand excluding the impact of the allowance for loan and lease losses.

Accretable Yield for the Acquired Loan Portfolio

The following table summarizes activity in the accretable yield for the acquired loan portfolio for the periods indicated:

	Three Months Ended March 31,	
	2016	2015
	(In Thousands)	
Balance at beginning of period	\$20,796	\$32,044
Accretion	(1,184)	(2,824)
Reclassification from nonaccretable difference for loans with improved cash flows	1,290	1,440
Changes in expected cash flows that do not affect nonaccretable difference ⁽¹⁾	(1,102)	—
Balance at end of period	\$19,800	\$30,660

⁽¹⁾ Represents changes in interest cash flows due to changes in interest rates on variable rate loans.

On a quarterly basis, subsequent to acquisition, Management reforecasts the expected cash flows for acquired ASC 310-30 loans, taking into account prepayment speeds, probability of default and loss given defaults. Management compares cash flow projections per the reforecast to the original cash flow projections and determines whether any reduction in cash flow expectations is due to credit deterioration, or if the change in cash flow expectations are related to noncredit events. This cash flow analysis is used to evaluate the need for a provision for loan and lease losses and/or prospective yield adjustments. During the three months ended March 31, 2016 and 2015, accretable yield adjustments totaling \$1.3 million and \$1.4 million, respectively, were made for certain loan pools. These prospective accretable yield adjustments, which are subject to continued re-assessment, will be recognized over the remaining lives of those pools.

The aggregate remaining nonaccretable difference applicable to acquired loans and leases totaled \$1.3 million and \$2.9 million at March 31, 2016 and December 31, 2015, respectively.

Loans and Leases Pledged as Collateral

At March 31, 2016 and December 31, 2015, there were \$2.0 billion and \$1.8 billion, respectively, of loans and leases pledged as collateral for repurchase agreements; municipal deposits; treasury, tax and loan deposits; swap agreements; and FHLBB borrowings. The Banks did not have any outstanding FRB borrowings at March 31, 2016 and December 31, 2015, respectively.

(5) Allowance for Loan and Lease Losses

The following tables present the changes in the allowance for loan and lease losses and the recorded investment in loans and leases by portfolio segment for the periods indicated:

	Three Months Ended March 31, 2016					Total
	Commercial Real Estate	Commercial	Indirect Automobile	Consumer	Unallocated	
	(In Thousands)					
Balance at December 31, 2015	\$30,151	\$ 22,018	\$ 269	\$ 4,301	\$	—\$56,739
Charge-offs	(331)	(288)	(244)	(12)	—	(875)
Recoveries	—	224	231	20	—	475
Provision (credit) for loan and lease losses	1,164	1,024	(35)	114	—	2,267
Balance at March 31, 2016	\$30,984	\$ 22,978	\$ 221	\$ 4,423	\$	—\$58,606

	Three Months Ended March 31, 2015					Total
	Commercial Real Estate	Commercial	Indirect Automobile	Consumer	Unallocated	
	(In Thousands)					
Balance at December 31, 2014	\$29,594	\$ 15,957	\$ 2,331	\$ 3,359	\$ 2,418	\$53,659
Charge-offs	(388)	(450)	(820)	(7)	—	(1,665)
Recoveries	—	212	581	18	—	811
Provision (credit) for loan and lease losses	254	3,365	(1,634)	249	67	2,301
Balance at March 31, 2015	\$29,460	\$ 19,084	\$ 458	\$ 3,619	\$ 2,485	\$55,106

The liability for unfunded credit commitments, which is included in other liabilities, was \$1.4 million, \$1.3 million and \$1.2 million at March 31, 2016, December 31, 2015, and March 31, 2015, respectively. The changes in the liability for unfunded credit commitments reflects changes in the estimate of loss exposure associated with certain unfunded credit commitments. No credit commitments were charged off against the liability account in the three-month periods ended March 31, 2016 and 2015.

Provision for Credit Losses

The provision for credit losses are set forth below for the periods indicated:

	Three Months Ended March 31,	
	2016	2015
	(In Thousands)	
Provision (credit) for loan and lease losses:		
Commercial real estate	\$1,164	\$254
Commercial	1,024	3,365
Indirect automobile	(35)	(1,634)
Consumer	114	249
Unallocated	—	67
Total provision for loan and lease losses	2,267	2,301

Unfunded credit commitments	111	(38)
Total provision for credit losses	\$2,378	\$2,263

Allowance for Loan and Lease Losses Methodology

Management has established a methodology to determine the adequacy of the allowance for loan and lease losses that assesses the risks and losses inherent in the loan and lease portfolio. Additions to the allowance for loan and lease losses are made by charges to the provision for credit losses. Losses on loans and leases are charged off against the allowance when all or a portion of a loan or lease is considered uncollectible. Subsequent recoveries on loans previously charged off, if any, are credited to the allowance when realized.

Management uses a consistent and systematic process and methodology to evaluate the adequacy of the allowance for loan and lease losses on a quarterly basis. For purposes of determining the allowance for loan and lease losses, the Company has segmented certain loans and leases in the portfolio by product type into the following segments: (1) commercial real estate loans, (2) commercial loans and leases, and (3) consumer loans. Portfolio segments are further disaggregated into classes based on the associated risks within the segments. Commercial real estate loans are divided into three classes: commercial real estate loans, multi-family mortgage loans, and construction loans. Commercial loans and leases are divided into three classes: commercial loans which includes taxi medallion loans, equipment financing, and loans to condominium associations. Consumer loans are divided into four classes: residential mortgage loans, home equity loans, indirect automobile loans, and other consumer loans. A formula-based credit evaluation approach is applied to each group, coupled with an analysis of certain loans for impairment. For each class of loan, Management makes significant judgments in selecting the estimation method that fits the credit characteristics of its class and portfolio segment as set forth below.

The general allowance related to loans collectively evaluated for impairment is determined using a formula-based approach utilizing the risk ratings of individual credits and loss factors derived from historic portfolio loss rates, which include estimates of incurred losses over an estimated loss emergence period (“LEP”). The LEP was generated utilizing a charge-off look-back analysis which studied the time from the first indication of elevated risk of repayment (or other early event indicating a problem) to eventual charge-off to support the LEP considered in the allowance calculation. This reserving methodology established the approximate number of months of LEP that represents incurred losses for each portfolio. In addition to quantitative measures, relevant qualitative factors include, but are not limited to: (1) levels and trends in past due and impaired loans, (2) levels and trends in charge-offs, (3) changes in underwriting standards, policy exceptions, and credit policy, (4) experience of lending management and staff, (5) economic trends, (6) industry conditions, (7) effects of changes in credit concentrations, (8) interest rate environment, and (9) regulatory and other changes. The general allowance related to the acquired loans collectively evaluated for impairment is determined based upon the degree, if any, of deterioration in the pooled loans subsequent to acquisition. The qualitative factors used in the determination are the same as those used for originated loans.

During 2015, the Company enhanced and refined its general allowance methodology to provide a more precise quantification of probable losses in the portfolio. Under the enhanced methodology, Management combined the historical loss histories of the Banks to generate a single set of ratios. Management believes it is appropriate to aggregate the ratios as the Banks share common environmental factors, operate in similar markets, and utilize common underwriting standards in accordance with the Company's Credit Policy. In prior periods, a historical loss history applicable to each Bank was used.

Management employed a similar analysis for the consolidation of the qualitative factors as it did for the quantitative factors. Again, Management believes the realignment of the existing nine qualitative factors used at each of the Banks into a single group of factors for use across the Company is appropriate based on the commonality of environmental factors, markets, and underwriting standards among the Banks. In the periods prior to the third quarter of 2015, each

of the Banks utilized a set of qualitative factors applicable to each Bank.

As of March 31, 2016, the Company had a portfolio of approximately \$36.1 million in loans secured by taxi medallions issued by the cities of Boston and Cambridge. Recently, application-based mobile ride services, such as Uber and Lyft, have generated increased competition in the taxi area, resulting in a reduction in taxi utilization and, as a result, a reduction in the collateral value and credit quality of taxi medallion loans. This has increased the likelihood that loans secured by taxi medallions may default, or that the borrowers may be unable to repay these loans at maturity, potentially resulting in an increase in troubled debt restructurings, therefore, beginning with the quarter ended December 31, 2015, the Company's allowance calculation included a further segmentation of the commercial loans and leases to reflect the increased risk in the Company's taxi medallion portfolio. This allowance calculation segmentation represents Management's estimations of the risks

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

associated with the portfolio, however, further declines in demand for taxi services or further deterioration in the value of taxi medallions may result in higher delinquencies and losses beyond that provided for in the allowance for loan and lease losses.

Based on the refinements to the Company's allowance methodology discussed above, Management determined that the potential risks anticipated by the unallocated allowance are now incorporated into the allowance methodology, making the unallocated allowance unnecessary. In the periods prior to the third quarter of 2015, the unallocated allowance was used to recognize the estimated risk associated with the allocated general and specific allowances. It incorporated Management's evaluation of existing conditions that were not included in the allocated allowance determinations and provided for losses that arise outside of the ordinary course of business.

Specific valuation allowances are established for impaired originated loans with book values greater than the discounted present value of expected future cash flows or, in the case of collateral-dependent impaired loans, for any excess of a loan's book balance and the fair value of its underlying collateral. Specific valuation allowances are established for acquired loans with deterioration in the discounted present value of expected future cash flows since acquisitions or, in the case of collateral dependent impaired loans, for any increase in the excess of a loan's book balance greater than the fair value of its underlying collateral. A specific valuation allowance for losses on troubled debt restructured loans is determined by comparing the net carrying amount of the troubled debt restructured loan with the restructured loan's cash flows discounted at the original effective rate. Impaired loans are reviewed quarterly with adjustments made to the calculated reserve as necessary.

As of March 31, 2016, Management believes that the methodology for calculating the allowance is sound and that the allowance provides a reasonable basis for determining and reporting on probable losses in the Company's loan portfolios.

The general allowance for loan and lease losses was \$53.2 million at March 31, 2016, compared to \$53.1 million at December 31, 2015. The general portion of the allowance for loan and lease losses increased by \$0.1 million during the three months ended March 31, 2016, primarily driven by growth and offset by the decrease in historical loss factors applied to commercial real estate and commercial loan and lease portfolios.

The specific allowance for loan and lease losses was \$5.4 million at March 31, 2016, compared to \$3.6 million at December 31, 2015. The specific allowance increased \$1.8 million during the three months ended March 31, 2016, primarily due to one commercial loan which was downgraded, changes in collateral values of previously impaired loans, and the restructure of taxi medallion loans.

Credit Quality Assessment

At the time of loan origination, a rating is assigned based on the financial strength of the borrower and the value of assets pledged as collateral. The Company continually monitors the asset quality of the loan portfolio using all available information. The officer responsible for handling each loan is required to initiate changes to risk ratings when changes in facts and circumstances occur that warrant an upgrade or downgrade in a loan rating. Based on this information, loans demonstrating certain payment issues or other weaknesses may be categorized as delinquent, impaired, nonperforming and/or put on nonaccrual status. Additionally, in the course of resolving such loans, the Company may choose to restructure the contractual terms of certain loans to match the borrower's ability to repay the loan based on their current financial condition. If a restructured loan meets certain criteria, it may be categorized as a troubled debt restructuring.

The Company reviews numerous credit quality indicators when assessing the risk in its loan portfolio. For the Commercial Real Estate, multi-family mortgage, construction, commercial, equipment financing, condominium association, and other consumer loan and lease classes, the Company utilizes an eight-grade loan rating system, which assigns a risk rating to each borrower based on a number of quantitative and qualitative factors associated with a loan transaction. Factors considered include industry and market conditions; position within the industry; earnings trends; operating cash flow; asset/liability values; debt capacity; guarantor strength; management and controls; financial reporting; collateral; and other considerations. In addition, the Company's independent loan review group evaluates the credit quality and related risk ratings of the commercial real estate and commercial loan portfolios. The results of these reviews are reported to the Board of Directors. For consumer loans, the Company primarily relies on payment status for monitoring credit risk.

The ratings categories used for assessing credit risk in the Commercial Real Estate, multi-family mortgage, construction, commercial, equipment financing, condominium association and other consumer loan and lease classes are defined as follows:

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

1-4 Rating — Pass

Loan rating grades “1” through “4” are classified as “Pass,” which indicates borrowers are performing in accordance with the terms of the loan and are less likely to result in losses due to the capacity of the borrowers to pay and the adequacy of the value of assets pledged as collateral.

5 Rating — Other Asset Especially Mentioned (“OAEM”)

Borrowers exhibit potential credit weaknesses or downward trends deserving Management’s attention. If not checked or corrected, these trends can weaken the Company’s asset position. While potentially weak, currently these borrowers are marginally acceptable; no loss of principal or interest is envisioned.

6 Rating — Substandard

Borrowers exhibit well-defined weaknesses that jeopardize the orderly liquidation of debt. Substandard loans may be inadequately protected by the current net worth and paying capacity of the obligors or by the collateral pledged, if any. Normal repayment from the borrower is in jeopardy. Although no loss of principal is envisioned, there is a distinct possibility that a partial loss of interest and/or principal will occur if the deficiencies are not corrected. Collateral coverage may be inadequate to cover the principal obligation.

7 Rating — Doubtful

Borrowers exhibit well-defined weaknesses that jeopardize the orderly liquidation of debt with the added provision that the weaknesses make collection of the debt in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Serious problems exist to the point where partial loss of principal is likely.

8 Rating — Definite Loss

Borrowers deemed incapable of repayment. Loans to such borrowers are considered uncollectable and of such little value that continuation as active assets of the Company is not warranted.

Assets rated as “OAEM,” “substandard” or “doubtful” based on criteria established under banking regulations are collectively referred to as “criticized” assets.

Commercial Real Estate Loans — At March 31, 2016, loans outstanding in the three classes within this segment expressed as a percentage of total loans and leases outstanding were as follows: commercial real estate loans — 38.2%; multi-family mortgage loans — 13.3%; and construction loans — 2.5%.

Loans in this portfolio that are on nonaccrual status and/or risk-rated “substandard” or worse are evaluated on an individual loan basis for impairment. For non-impaired commercial real estate loans, loss factors are applied to outstanding loans by risk rating for each of the three classes in the portfolio. The factors applied are based primarily on historic loan loss experience and an assessment of internal and external factors and other relevant information.

Commercial Loans and Leases — At March 31, 2016, loans and leases outstanding in the three classes within this segment expressed as a percent of total loans and leases outstanding were as follows: commercial loans and leases — 12.0%; equipment financing loans — 14.1%; and loans to condominium associations — 1.2%.

Loans and leases in this portfolio that are on nonaccrual status and/or risk-rated “substandard” or worse are evaluated on an individual basis for impairment. For non-impaired commercial loans and leases, loss factors are applied to outstanding loans by risk rating for the respective class in the portfolio.

Consumer Loans — At March 31, 2016, loans outstanding within the four classes within this segment expressed as a percent of total loans and leases outstanding were as follows: residential mortgage loans — 12.0%; home equity loans — 6.2%; indirect automobile loans — 0.2% , and other consumer loans — 0.3%.

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

Significant risk characteristics related to the residential mortgage and home equity loan portfolios are the geographic concentration of the properties financed within selected communities in the greater Boston and Providence metropolitan areas. The payment status and loan-to-value ratio are the primary credit quality indicators used for residential mortgage loans and home equity loans. Generally, loans are not made when the loan-to-value ratio exceeds 80% unless private mortgage insurance is obtained and/or there is a financially strong guarantor. Consumer loans that become 90 days or more past due, or are placed on nonaccrual regardless of past due status, are reviewed on an individual basis for impairment by assessing the net realizable value of underlying collateral and the economic condition of the borrower.

Impaired Loans and Leases

A loan is considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due (both interest and principal) according to the contractual terms of the loan agreement. The Company has defined the population of impaired loans to include nonaccrual loans and troubled debt restructured loans.

When the ultimate collectability of the total principal of an impaired loan or lease is in doubt and the loan is on nonaccrual status, all payments are applied to principal, under the cost recovery method. When the ultimate collectability of the total principal of an impaired loan or lease is not in doubt and the loan or lease is on nonaccrual status, contractual interest is credited to interest income when received, under the cash basis method.

The following tables include the recorded investment and unpaid principal balances of impaired loans and leases with the related allowance amount, if applicable, for the originated and acquired loan and lease portfolios at the dates indicated. Also presented are the average recorded investments in the impaired loans and leases and the related amount of interest recognized during the period that the impaired loans were impaired.

Troubled Debt Restructured Loans and Leases

A specific valuation allowance for losses on troubled debt restructured loans is determined by comparing the net carrying amount of the troubled debt restructured loan with the restructured loan's cash flows discounted at the original effective rate.

The following table sets forth information regarding troubled debt restructured loans and leases at the dates indicated:

	At March 31, 2016	At December 31, 2015
	(In Thousands)	
Troubled debt restructurings:		
On accrual	\$16,697	\$ 17,953
On nonaccrual	14,614	4,965

Total troubled debt restructurings \$31,311 \$ 22,918

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

The following table sets forth the Company's balances of troubled debt restructurings that were modified at the dates indicated, by type of modification.

	Three Months Ended March 31, 2016 2015 (In Thousands)	
Loans with one modification:		
Adjusted interest rate	—	140
Interest only	2,412	—
Combination maturity, principal, interest rate	6,363	125
Total loans with one modification	8,775	265
Loans with more than one modification:		
Extended maturity	—	2,568
Total loans with more than one modification	—	2,568
Total loans with modifications	\$8,775	\$2,833

There were no charge-offs or recoveries for the performing and nonperforming troubled debt restructuring loans and leases for the three months ended March 31, 2016. The net charge-offs of the performing and nonperforming troubled debt restructuring loans and leases for the three months ended March 31, 2015 was \$30 thousand.

As of March 31, 2016 and 2015, there were no commitments to lend funds to debtors owing receivables whose terms had been modified in troubled debt restructurings.

(6) Goodwill and Other Intangible Assets

The following table sets forth the carrying value of goodwill and other intangible assets at the dates indicated:

	At March 31, 2016	At December 31, 2015
	(In Thousands)	
Goodwill	\$137,890	\$137,890
Other intangible assets:		
Core deposits	8,909	9,544
Trade name	1,089	1,089
Total other intangible assets	9,998	10,633
Total goodwill and other intangible assets	\$147,888	\$148,523

The Company concluded that the BankRI name would continue to be utilized in its marketing strategies; therefore, the trade name with a carrying value of \$1.1 million has an indefinite life.

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

The estimated aggregate future amortization expense (in thousands) for intangible assets with a finite life remaining at March 31, 2016 is as follows:

Remainder of 2016	\$1,865
Year ending:	
2017	2,089
2018	1,669
2019	1,295
2020	944
Thereafter	1,047
Total	\$8,909

(7) Comprehensive Income/(Loss)

Comprehensive income (loss) represents the sum of net income (loss) and other comprehensive income (loss). For the three months ended March 31, 2016 and March 31, 2015, the Company's other comprehensive income (loss) include the following two components: (1) unrealized holding gains (losses) on investment securities available-for-sale, and (2) adjustment of accumulated obligation for postretirement benefits.

Changes in accumulated other comprehensive income (loss) by component, net of tax, were as follows for the periods indicated:

	Three Months Ended March 31, 2016		
	Investment Securities Available-for-Sale	Postretirement Benefits	Accumulated Other Comprehensive (Loss) Income
	(In Thousands)		
Balance at December 31, 2015	\$(2,827)	\$ 351	\$ (2,476)
Other comprehensive income	5,828	—	5,828
Balance at March 31, 2016	\$3,001	\$ 351	\$ 3,352

	Three Months Ended March 31, 2015		
	Investment Securities Available-for-Sale	Postretirement Benefits	Accumulated Other Comprehensive (Loss) Income
	(In Thousands)		
Balance at December 31, 2014	\$(1,733)	\$ 111	\$ (1,622)
Other comprehensive income	3,369	—	3,369
Balance at March 31, 2015	\$1,636	\$ 111	\$ 1,747

The Company did not reclassify any amounts out of accumulated other comprehensive income (loss) for the three months ended March 31, 2016 and March 31, 2015.

(8) Derivatives and Hedging Activities

The Company may use interest-rate contracts (swaps, caps, and floors) as part of its interest-rate risk management strategy. Interest-rate swap, cap and floor agreements are entered into as hedges against future interest-rate fluctuations on specifically identified assets or liabilities. The Company did not have derivative fair value hedges or derivative cash flow hedges at March 31, 2016 or December 31, 2015.

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

Derivatives not designated as hedges are not speculative but rather, result from a service the Company provides to certain commercial banking customers for a fee. The Company executes interest-rate swaps with certain commercial banking customers to aid them in managing their interest-rate risk. The interest-rate swap contracts allow the commercial banking customers to convert floating-rate loan payments to fixed-rate loan payments. The credit risks associated with the interest-rate swaps entered into with our commercial banking customers are consistent with those involved in extending loans. Interest-rate swap transactions are subject to the Company's credit policy including collateral requirements consistent with the Company's assessment of the customers' credit quality.

The Company concurrently enters into offsetting swaps with a third-party financial institution, effectively minimizing its net risk exposure resulting from such transactions. The third-party financial institution exchanges the customer's fixed-rate loan payments for floating-rate loan payments.

As the interest-rate swaps associated with this program do not meet hedge accounting requirements and the requirement of the underlying collateral of the customer swaps, the fair value of the customer swaps and the offsetting swaps are not materially different and do not significantly impact the Company's results of operations. The Company had 74 interest-rate swaps related to this program with an aggregate notional amount of \$583.0 million at March 31, 2016, compared with 64 interest-rate swaps with an aggregate notional amount of \$490.6 million at December 31, 2015.

Asset derivatives and liability derivatives are included in other assets and accrued expenses and other liabilities on the unaudited consolidated balance sheets, respectively. The table below presents the fair value and classification of the Company's derivative financial instruments at March 31, 2016 and December 31, 2015.

	At March 31, 2016		At December 31, 2015	
	Asset Derivatives	Liability Derivatives	Asset Derivatives	Liability Derivatives
	(In Thousands)			
Total derivatives (interest-rate products) not designated as hedging instruments	\$18,583	\$ 18,583	\$8,656	\$ 8,781

Certain derivative agreements contain provisions that require the Company to pledge collateral (in the form of financial instruments and/or cash) if the derivative exposure exceeds a threshold amount. The Company has pledged collateral of \$30.6 million and \$14.7 million in the normal course of business at March 31, 2016 and December 31, 2015, respectively.

The tables below present the offsetting of derivatives and amounts subject to master netting agreements not offset in the unaudited consolidated balance sheet at the dates indicated.

	At March 31, 2016				
	Gross Amounts of Recognized	Gross Amounts Offset in the Statement of Financial Position	Net Amounts of Assets Presented in the Statement of Financial Position	Gross Amounts Not Offset in Statement of Financial Instruments	Net Amount
	(In Thousands)

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

	At December 31, 2015					
	Gross Amounts of Recognized	Gross Amounts Offset in the Statement of Financial Position	Net Amounts of Assets Presented in the Statement of Financial Position	Gross Amounts Not Offset in the Statement of Financial Position Financial Instruments Pledged	Cash Collateral Pledged	Net Amount
	(In Thousands)					
Asset Derivatives	\$8,656	\$ —	\$ 8,656	\$ —	\$ —	\$ 8,656
Liability Derivatives	\$8,781	\$ —	\$ 8,781	\$ 9,873	\$ 4,790	\$ —

The Company has agreements with certain of its derivative counterparties that contain credit-risk-related contingent provisions. These provisions provide the counterparty with the right to terminate its derivative positions and require the Company to settle its obligations under the agreements if the Company defaults on certain of its indebtedness or if the Company fails to maintain its status as a well-capitalized institution.

(9) Stock Based Compensation

As of March 31, 2016, the Company had three active recognition and retention plans: the 2003 Recognition and Retention Plan (the "2003 RRP") with 1,250,000 authorized shares, the 2011 Restricted Stock Award Plan (the "2011 RSA") with 500,000 authorized shares, and the 2014 Equity Incentive Plan (the "2014 Plan") with 1,750,000 authorized shares. The 2003 RRP, the 2011 RSA, and the 2014 Plan are collectively referred to as the "Plans". The purpose of the Plans is to promote the long-term financial success of the Company and its subsidiaries by providing a means to attract, retain and reward individuals who contribute to such success and to further align their interests with those of the Company's stockholders.

Of the awarded shares, generally 50% vest ratably over three years with one-third of such shares vesting at each of the first, second, and third anniversary dates of the awards. These are referred to as "time-based shares". The remaining 50% of each award has a cliff vesting schedule and will vest three years after the award date based on the level of the Company's achievement of identified performance targets in comparison to the level of achievement of such identified performance targets by a defined peer group of financial institutions. These are referred to as "performance-based shares". The specific performance measure targets relate to return on assets, return on tangible equity, asset quality, and total shareholder return. Generally, if a participant leaves the Company prior to the third anniversary date of an award, any unvested shares are forfeited. Dividends declared with respect to shares awarded are held by the Company and paid to the participant only when the shares vest.

Under all the Plans, shares of the Company's common stock are reserved for issuance as restricted stock awards to officers, employees, and non-employee directors of the Company. Shares issued upon vesting may be either authorized but unissued shares or reacquired shares held by the Company as treasury shares. Any shares not issued because vesting requirements are not met will be retired back to treasury and be made available again for issuance under the Plans.

During the three months ended March 31, 2016, and 2015, no shares were issued upon satisfaction of required conditions of the Plans.

Total expense for the Plans was \$0.6 million and \$0.4 million for the three months ended March 31, 2016 and 2015, respectively.

Interest-rate swaps	\$—	\$8,781	\$	—\$8,781

Investment Securities Available-for-Sale

The fair value of investment securities is based principally on market prices and dealer quotes received from third-party and nationally-recognized pricing services for identical investment securities such as U.S. Treasury and agency securities. The Company's marketable equity securities are priced this way and are included in Level 1. These prices are validated by comparing the primary pricing source with an alternative pricing source when available. When quoted market prices for identical securities are unavailable, the Company uses market prices provided by independent pricing services based on recent trading activity and other observable information, including but not limited to market interest-rate curves, referenced credit spreads, and estimated prepayment speeds where applicable. These investments include GSE debentures, GSE mortgage-related securities, SBA commercial loan asset backed securities, corporate debt securities, and trust preferred securities, all of which are included in Level 2. As of March 31, 2016 and December 31, 2015, no investment securities were valued using pricing models included in Level 3.

Additionally, Management reviews changes in fair value from period to period and performs testing to ensure that prices received from the third parties are consistent with Management's expectation of the market. Changes in the prices obtained from the pricing service are analyzed from month to month, taking into consideration changes in market conditions including changes in mortgage spreads, changes in U.S. Treasury security yields, and changes in generic pricing of 15-year and 30-year securities. Additional analysis may include a review of prices provided by other independent parties, a yield analysis, a review of average life changes using Bloomberg analytics and a review of historical pricing for a particular security.

Interest-Rate Swaps

The fair values for the interest-rate swap assets and liabilities represent a Level 2 valuation and are based on settlement values adjusted for credit risks associated with the counterparties and the Company and observable market interest rate curves. Credit risk adjustments consider factors such as the likelihood of default by the Company and its counterparties, its net exposures, and remaining contractual life. To date, the Company has not realized any losses due to a counterparty's inability to pay any net uncollateralized position. See also Note 8, "Derivatives and Hedging Activities."

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

There were no transfers between levels for assets and liabilities recorded at fair value on a recurring basis during the three months ended, March 31, 2016 and 2015.

Assets and Liabilities Recorded at Fair Value on a Non-Recurring Basis

The table below summarizes assets and liabilities measured at fair value on a non-recurring basis at the dates indicated:

	Carrying Value at March 31, 2016			
	Level 1	Level 2	Level 3	Total
	(In Thousands)			
Assets measured at fair value on a non-recurring basis:				
Collateral-dependent impaired loans and leases	\$—	\$—	\$22,526	\$22,526
OREO	—	408	408	408
Repossessed assets	—	157	—	157
Total assets measured at fair value on a non-recurring basis	\$—	\$157	\$22,934	\$23,091

	Carrying Value at December 31, 2015			
	Level 1	Level 2	Level 3	Total
	(In Thousands)			
Assets measured at fair value on a non-recurring basis:				
Collateral-dependent impaired loans and leases	\$—	\$—	\$12,137	\$12,137
OREO	—	729	729	729
Repossessed assets	—	614	—	614
Total assets measured at fair value on a non-recurring basis	\$—	\$614	\$12,866	\$13,480

Collateral-Dependent Impaired Loans and Leases

For nonperforming loans and leases where the credit quality of the borrower has deteriorated significantly, fair values of the underlying collateral were estimated using purchase and sales agreements (Level 2), comparable sales, or recent appraisals (Level 3), adjusted for selling costs and other expenses.

Other Real Estate Owned

The Company records OREO at the lower of cost or fair value. In estimating fair value, the Company utilizes purchase and sales agreements (Level 2) or comparable sales, recent appraisals or cash flows discounted at an interest rate commensurate with the risk associated with these cash flows (Level 3), adjusted for selling costs and other expenses.

Repossessed Assets

Repossessed assets are carried at estimated fair value less costs to sell based on auction pricing (Level 2).

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

The table below presents quantitative information about significant unobservable inputs (Level 3) for assets measured at fair value on a recurring and non-recurring basis at the dates indicated.

	Fair Value		Valuation Technique
	At March 31, 2016	At December 31, 2015	
	(Dollars in Thousands)		
Collateral-dependent impaired loans and leases	\$ 22,526	\$ 12,137	Appraisal of collateral (1)
Other real estate owned	\$ 408	\$ 729	Appraisal of collateral (1)

(1) Fair value is generally determined through independent appraisals of the underlying collateral. The Company may also use another available source of collateral assessment to determine a reasonable estimate of the fair value of the collateral. Appraisals may be adjusted by Management for qualitative factors such as economic factors and estimated liquidation expenses. The range of these possible adjustments may vary.

Summary of Estimated Fair Values of Financial Instruments

The following table presents the carrying amount, estimated fair value, and placement in the fair value hierarchy of the Company's financial instruments at the dates indicated. This table excludes financial instruments for which the carrying amount approximates fair value. Financial assets for which the fair value approximates carrying value include cash and cash equivalents, FHLBB and FRB stock, and accrued interest receivable. Financial liabilities for which the fair value approximates carrying value include non-maturity deposits, short-term borrowings, and accrued interest payable.

Borrowed funds	983,029	981,349	—	981,349	—

Investment Securities Held-to-Maturity

The fair values of certain investment securities held-to-maturity are estimated using market prices provided by independent pricing services based on recent trading activity and other observable information, including but not limited to market interest-rate curves, referenced credit spreads, and estimated prepayment speeds, where applicable. These investments include GSE debentures, GSE MBSs, and municipal obligations, all of which are included in Level 2. Additionally, fair values of foreign government obligations are based on comparisons to market prices of similar securities and are considered to be Level 3.

Loans Held-for-Sale

Fair value is measured using quoted market prices when available. These assets are typically categorized as Level 1. If quoted market prices are not available, comparable market values may be utilized. These assets are typically categorized as Level 2.

Loans and Leases

The fair values of performing loans and leases are estimated by segregating the portfolio into its primary loan and lease categories—commercial real estate mortgage, multi-family mortgage, construction, commercial, equipment financing,

47

Table of Contents

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

condominium association, indirect automobile, residential mortgage, home equity and other consumer. These categories were further disaggregated based on significant financial characteristics such as type of interest rate (fixed / variable) and payment status (current / past-due). The Company discounts the contractual cash flows for each loan category using interest rates currently being offered for loans with similar terms to borrowers of similar quality and incorporates estimates of future loan prepayments. This method of estimating fair value does not incorporate the exit price concept of fair value.

Deposits

The fair values of deposit liabilities with no stated maturity (demand, NOW, savings and money market savings accounts) are equal to the carrying amounts payable on demand. The fair value of certificates of deposit represents contractual cash flows discounted using interest rates currently offered on deposits with similar characteristics and remaining maturities. The fair value estimates for deposits do not include the benefit that results from the low-cost funding provided by the Company's core deposit relationships (deposit-based intangibles).

Borrowed Funds

The fair value of federal funds purchased is equal to the amount borrowed. The fair value of FHLBB advances and repurchase agreements represents contractual repayments discounted using interest rates currently available for borrowings with similar characteristics and remaining maturities. The fair values reported for retail repurchase agreements are based on the discounted value of contractual cash flows. The discount rates used are representative of approximate rates currently offered on borrowings with similar characteristics and maturities. The fair values reported for subordinated deferrable interest debentures are based on the discounted value of contractual cash flows. The discount rates used are representative of approximate rates currently offered on instruments with similar terms and maturities.

(12) Commitments and Contingencies

Off-Balance-Sheet Financial Instruments

The Company is party to off-balance-sheet financial instruments in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include loan commitments, standby and commercial letters of credit, and interest-rate swaps. According to GAAP, these financial instruments are not recorded in the financial statements until they are funded or related fees are incurred or received.

The contract amounts reflect the extent of the involvement the Company has in particular classes of these instruments. Such commitments involve, to varying degrees, elements of credit risk and interest-rate risk in excess of the amount recognized in the consolidated balance sheet. The Company's exposure to credit loss in the event of non-performance by a counterparty is represented by the contractual amount of the instruments. The Company uses the same policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

BROOKLINE BANCORP, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

Financial instruments with off-balance-sheet risk at the dates indicated follow:

	At March 31, 2016	At December 31, 2015
	(In Thousands)	
Financial instruments whose contract amounts represent credit risk:		
Commitments to originate loans and leases:		
Commercial real estate	\$18,865	\$ 36,000
Commercial	74,620	78,017
Residential mortgage	15,364	19,430
Unadvanced portion of loans and leases	643,148	648,291
Unused lines of credit:		
Home equity	306,284	280,786
Other consumer	12,895	12,383
Other commercial	117	529
Unused letters of credit:		
Financial standby letters of credit	12,123	12,389
Performance standby letters of credit	622	392
Commercial and similar letters of credit	878	821
Back-to-back interest-rate swaps (Notional principal amounts)	583,035	490,632

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee by the customer. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if any, is based on Management's credit evaluation of the borrower.

Standby and commercial letters of credit are conditional commitments issued by the Company to guarantee performance of a customer to a third party. These standby and commercial letters of credit are primarily issued to support the financing needs of the Company's commercial customers. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers.

The liability for unfunded credit commitments, which is included in other liabilities, was \$1.4 million at March 31, 2016 and \$1.3 million at December 31, 2015.

From time to time, the Company enters into back-to-back interest rate swaps with commercial customers and third-party financial institutions. These swaps allow the Company to offer long-term fixed-rate commercial loans while mitigating the interest-rate risk of holding those loans. In a back-to-back interest rate swap transaction, the Company lends to a commercial customer on a floating-rate basis and then enters into an interest rate swap with that customer. Concurrently, the Company enters into an offsetting swap with a third-party financial institution, effectively minimizing its net interest-rate risk exposure resulting from such transactions.

The fair value of interest rate swap assets and liabilities was \$18.6 million and \$18.6 million, respectively, at March 31, 2016. The fair value of interest rate swap assets and liabilities was \$8.7 million and \$8.8 million, respectively, at December 31, 2015.

Lease Commitments

The Company leases certain office space under various noncancellable operating leases. These leases have original terms ranging from 5 years to over 25 years. Certain leases contain renewal options and escalation clauses which can

increase rental expenses based principally on the consumer price index and fair market rental value provisions.

Notes to Unaudited Consolidated Financial Statements

At and for the Three Months Ended March 31, 2016 and 2015

A summary of future minimum rental payments under such leases at the dates indicated follows:

Minimum Rental Payments
(In Thousands)

Remainder of 2016 \$	3,663
Year ending:	
2017	4,472
2018	4,071
2019	3,220
2020	2,664
Thereafter	13,521
Total	\$ 31,611

The leases contain escalation clauses for real estate taxes and other expenditures. Total rental expense was \$1.3 million and \$1.2 million during the three months ended March 31, 2016 and 2015.

Legal Proceedings

There are various outstanding legal proceedings in the normal course of business. In the opinion of Management, after consulting with legal counsel, the consolidated financial position and results of operations of the Company are not expected to be affected by the outcome of such proceedings.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations Forward-Looking Statements

Certain statements contained in this Quarterly Report on Form 10-Q that are not historical facts may constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are intended to be covered by the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve risks and uncertainties. These statements, which are based on certain assumptions and describe Brookline Bancorp, Inc.’s (the “Company’s”) future plans, strategies and expectations, can generally be identified by the use of the words “may,” “will,” “should,” “could,” “would,” “plan,” “potential,” “estimate,” “project,” “believe,” “intend,” “anticipate,” “expect,” “target” and expressions. These statements include, among others, statements regarding the Company’s intent, belief or expectations with respect to economic conditions, trends affecting the Company’s financial condition or results of operations, and the Company’s exposure to market, liquidity, interest-rate and credit risk.

Forward-looking statements are based on the current assumptions underlying the statements and other information with respect to the beliefs, plans, objectives, goals, expectations, anticipations, estimates and intentions of Management and the financial condition, results of operations, future performance and business are only expectations of future results. Although the Company believes that the expectations reflected in the Company’s forward-looking statements are reasonable, the Company’s actual results could differ materially from those projected in the forward-looking statements as a result of, among other factors, adverse conditions in the capital and debt markets; changes in interest rates; competitive pressures from other financial institutions; the effects of weakness in general economic conditions on a national basis or in the local markets in which the Company operates, including changes which adversely affect borrowers’ ability to service and repay their loans and leases; changes in the value of securities and other assets in the Company’s investment portfolio; changes in loan and lease default and charge-off rates; the adequacy of allowances for loan and lease losses; deposit levels necessitating increased borrowing to fund loans and investments; changes in government regulation; the risk that goodwill and intangibles recorded in the Company’s financial statements will become impaired; and changes in assumptions used in making such forward-looking statements, as well as the other risks and uncertainties detailed in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2015 and other filings submitted to the Securities and Exchange Commission. Forward-looking statements speak only as of the date on which they are made. The Company does not undertake any obligation to update any forward-looking statement to reflect circumstances or events that occur after the date the forward-looking statements are made.

Introduction

The Company, a Delaware corporation, operates as a multi-bank holding company for Brookline Bank and its subsidiaries; Bank Rhode Island (“BankRI”) and its subsidiaries; First Ipswich Bank (“First Ipswich”) and its subsidiaries; and Brookline Securities Corp.

As a commercially-focused financial institution with 49 full-service banking offices throughout greater Boston, the north shore of Massachusetts and Rhode Island, the Company, through Brookline Bank, BankRI and First Ipswich (the “Banks”), offers a wide range of commercial, business and retail banking services, including a full complement of cash management products, on-line and mobile banking services, consumer and residential loans, and investment services, designed to meet the financial needs of small to mid-sized businesses and individuals throughout central New England. Specialty lending activities include equipment financing primarily in the New York and New Jersey metropolitan area.

The Company focuses its business efforts on profitably growing its commercial lending businesses, both organically, and through acquisitions. The Company’s customer focus, multi-bank structure, and risk management are integral to its

organic growth strategy and serve to differentiate the Company from its competitors. As full-service financial institutions, the Banks and their subsidiaries focus on the continued acquisition of well-qualified customers, the deepening of long-term banking relationships through a full complement of products, excellent customer service, and strong risk management.

The Company manages the Banks under uniform strategic objectives, with one set of uniform policies consistently applied by one executive management team. Within this environment, the Company believes that the ability to make customer decisions locally enhances Management's motivation, service levels and, as a consequence, the Company's financial results. As such, while most back-office functions are consolidated at the holding company level, branding and decision-making, including credit decisioning and pricing, remain largely local in order to better meet the needs of bank customers and further motivate the Banks' commercial, business and retail bankers.

Table of Contents

The Company and the Banks are supervised, examined and regulated by the Board of Governors of the Federal Reserve System (“FRB”). As a Massachusetts-chartered savings bank and trust company, respectively, Brookline Bank and First Ipswich are also subject to regulation under the laws of the Commonwealth of Massachusetts and the jurisdiction of the Massachusetts Division of Banks. As a Rhode Island-chartered financial institution, BankRI is also subject to regulation under the laws of the State of Rhode Island and the jurisdiction of the Banking Division of the Rhode Island Department of Business Regulation. The Federal Deposit Insurance Corporation (“FDIC”) continues to insure each of the Banks’ deposits up to \$250,000 per depositor. Additionally, as a Massachusetts-chartered savings bank, Brookline Bank is also insured by the Depositors Insurance Fund (“DIF”), a private industry-sponsored company. The DIF insures savings bank deposits in excess of the FDIC insurance limits. As such, Brookline Bank offers 100% insurance on all deposits as a result of a combination of insurance from the FDIC and the DIF.

The Company’s common stock is traded on the Nasdaq Global Select MarketSM under the symbol “BRKL.”

(3) Efficiency ratio is calculated by dividing non-interest expense by the sum of non-interest income and net interest income.

Table of Contents

Executive Overview

Growth

Total assets of \$6.2 billion at March 31, 2016 increased \$138.7 million, or 9.2% on an annualized basis, from December 31, 2015. The increase was primarily driven by an increase in loans and leases.

Total loans and leases of \$5.1 billion at March 31, 2016 increased \$134.9 million, or 10.8% on an annualized basis, from \$5.0 billion at December 31, 2015. The Company's commercial loan portfolios, which are comprised of commercial real estate loans and commercial loans and leases, totaled \$4.2 billion, or 81.2% of total loans and leases, at March 31, 2016, an increase of \$126.3 million, or 12.5% on an annualized basis, from \$4.0 billion, or 80.9% of total loans and leases, at December 31, 2015. The \$126.3 million increase in the commercial loan portfolios was partially offset by the \$2.5 million decrease in the indirect automobile portfolio due to the sale during the first quarter of 2015.

Total deposits of \$4.4 billion at March 31, 2016 increased \$87.4 million from December 31, 2015. Core deposits, defined as the sum of demand checking, NOW, money market, and savings accounts, increased at a 8.3% annualized rate during the first three months of 2016.

Asset Quality

The ratio of the allowance for loan and lease losses to total loans and leases was 1.14% at March 31, 2016 and December 31, 2015. The allowance for loan and lease losses related to originated loans and leases as a percentage of total originated loans and leases was 1.20% at March 31, 2016 and December 31, 2015. The Company continued to employ its historical underwriting methodology throughout the three-month period ended March 31, 2016.

Nonperforming assets at March 31, 2016 totaled \$32.5 million, or 0.53% of total assets, as compared with \$20.7 million, or 0.34% of total assets, at December 31, 2015. Net charge-offs for the three months ended March 31, 2016 were \$0.4 million, or 0.03% of average loans and leases on an annualized basis, compared to \$0.9 million, or 0.07% annualized, for the three months ended March 31, 2015.

Capital Strength

The Company is a "well-capitalized" bank holding company as defined in the Federal Reserve Board's Regulation Y. The Company's common equity Tier 1 capital ratio was 10.47% at March 31, 2016, compared to 10.62% at December 31, 2015. The Company's Tier 1 leverage ratio was 9.27% at March 31, 2016, compared to 9.37% at December 31, 2015. Tier 1 risk-based ratio was 10.77% at March 31, 2016, compared to 10.91% at December 31, 2015. Total risk-based ratio was 13.38% at March 31, 2016, compared to 13.54% at December 31, 2015. The Company's ratio of stockholders' equity to total assets was 11.01% and 11.05% at March 31, 2016 and December 31, 2015, respectively. The Company's tangible equity ratio was 8.83% and 8.81% at March 31, 2016 and December 31, 2015, respectively.

Net Income

For the three months ended March 31, 2016, the Company reported net income of \$12.8 million, or \$0.18 per basic and diluted share, up \$1.1 million, or 9.5%, from \$11.7 million, or \$0.17 per basic share, for the three months ended March 31, 2015. This net increase in net income is primarily the result of an increase in net interest income of \$0.7 million, an increase in the provision for credit losses of \$0.1 million, an increase in non-interest income of \$2.0 million, an increase in non-interest expense of \$0.7 million, an increase in provision for income taxes of \$0.5 million

and an increase in noncontrolling income of \$0.2 million. Refer to "Results of Operations" below for further discussion.

The annualized return on average assets was 0.84% for the three months ended March 31, 2016, compared to 0.80% for the three months ended March 31, 2015, respectively. The annualized return on average stockholders' equity was 7.57% for the three months ended March 31, 2016, compared to 7.22% for the three months ended March 31, 2015.

Net interest margin was 3.45% for the three months ended March 31, 2016, compared to 3.57% for the three months ended March 31, 2015. The decrease in the net interest margin in a highly competitive and declining interest rate environment is, in part, a result of a decrease in the yield on interest-earning assets by 8 basis points to 4.03% for the three months ended March 31, 2016 from 4.11% for the three months ended March 31, 2015 and an increase of 3 basis points in interest-bearing liabilities to 0.77% for the three months ended March 31, 2016 from 0.74% for the three months ended March 31, 2015.

Table of Contents

The Company's net interest margin and net interest income continued to be placed under significant pressure due to competitive pricing in all loan categories and the continuation of a low interest-rate environment, along with the Company's diminishing ability to reduce its cost of funds.

Critical Accounting Policies

The SEC defines “critical accounting policies” as those involving significant judgments and difficult or complex assumptions by Management, often as a result of the need to make estimates about matters that are inherently uncertain or variable, which have, or could have, a material impact on the carrying value of certain assets or net income. The preparation of financial statements in accordance with U.S. generally accepted accounting principles (“GAAP”) requires Management to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates. As discussed in the Company’s 2015 Annual Report on Form 10-K, Management has identified the valuation of available-for-sale securities, accounting for assets and liabilities acquired, the determination of the allowance for loan and lease losses, the review of goodwill and intangibles for impairment, and income tax accounting as the Company’s most critical accounting policies.

Table of Contents

Non-GAAP Financial Measures and Reconciliations to GAAP

In addition to evaluating the Company's results of operations in accordance with GAAP, Management periodically supplements this evaluation with an analysis of certain non-GAAP financial measures, such as the return on tangible assets or equity, the tangible equity ratio, tangible book value per share, dividend payout ratio and the ratio of the allowance for loan and lease losses related to originated loans and leases as a percentage of originated loans and leases. Management believes that these non-GAAP financial measures provide information useful to investors in understanding the Company's underlying operating performance and trends, and facilitates comparisons with the performance assessment of financial performance, including non-interest expense control, while the tangible equity ratio and tangible book value per share are used to analyze the relative strength of the Company's capital position.

The following table summarizes the Company's return on average tangible assets and return on average tangible stockholders' equity:

	Three Months Ended

Total loans and leases	\$5,130,445	\$ 4,995,540	\$ 134,905	10.8	%

The Company's loan portfolio consists primarily of first mortgage loans secured by commercial, multi-family and residential real estate properties located in the Company's primary lending area, loans to business entities, including commercial lines of credit, loans to condominium associations, and loans and leases used to finance equipment used

by small businesses. The Company also provides financing for construction and development projects, home equity and other consumer loans.

Table of Contents

The Company employs seasoned commercial lenders and retail bankers who rely on community and business contacts as well as referrals from customers, attorneys, and other professionals to generate loans and deposits. Existing borrowers are also an important source of business since many of them have more than one loan outstanding with the Company. The Company's ability to originate loans depends on the strength of the economy, trends in interest rates, and levels of customer demand, and market competition.

The Company's current policy is that the aggregate amount of loans outstanding to any one borrower or related entities may not exceed \$35 million unless approved by the Board Credit Committee, a committee of the Company's Board of Directors.

As of March 31, 2016, there were two borrowers with aggregated loans outstanding of \$35 million or greater. The total of those loans was \$94.3 million or 1.84% of total loans outstanding as of March 31, 2016.

The Company has written underwriting policies to control the inherent risks in loan origination. The policies address approval limits, loan-to-value ratios, appraisal requirements, debt service coverage ratios, loan concentration limits, and other matters relevant to loan underwriting.

Commercial Real Estate Loans

The commercial real estate portfolio is composed of commercial real estate loans, multi-family mortgage loans, and construction loans and is the largest component of the Company's overall loan portfolio, representing 54.0% of total loans and leases outstanding at March 31, 2016.

Typically, commercial real estate loans are larger in size and involve a greater degree of risk than owner-occupied residential mortgage loans. Loan repayment is usually dependent on the successful operation and management of the properties and the value of the properties securing the loans. Economic conditions can greatly affect cash flows and property values.

A number of factors are considered in originating commercial real estate and multi-family mortgage loans. The qualifications and financial condition of the borrower (including credit history), as well as the potential income generation and the value and condition of the underlying property, are evaluated. When evaluating the qualifications of the borrower, the Company considers the financial resources of the borrower, the borrower's experience in owning or managing similar property and the borrower's payment history with the Company and other financial institutions. Factors considered in evaluating the underlying property include the net operating income of the mortgaged premises before debt service and depreciation, the debt service coverage ratio (the ratio of cash flow before debt service to debt service), the use of conservative capitalization rates, and the ratio of the loan amount to the appraised value. Generally, personal guarantees are obtained from commercial real estate loan borrowers.

Commercial real estate and multi-family mortgage loans are typically originated for terms of five years with amortization periods of 20 to 30 years. Many of the loans are priced at inception on a fixed-rate basis generally for periods ranging from two to five years with repricing periods for longer-term loans. When possible, prepayment penalties are included in loan covenants on these loans. For commercial customers who are interested in loans with terms longer than five years, the Company offers interest rate swaps to accommodate customer preferences.

The Company's urban and suburban market area is characterized by a large number of apartment buildings, condominiums and office buildings. As a result, multi-family and commercial real estate mortgage lending has been a significant part of the Company's activities for many years. These types of loans typically generate higher yields, but also involve greater credit risk. Many of the Company's borrowers have more than one multi-family or commercial real estate loan outstanding with the Company.

The commercial real estate portfolio was composed primarily of loans secured by apartment buildings (\$687.5 million), office buildings (\$624.4 million), retail stores (\$522.0 million), industrial properties (\$306.0 million), and mixed-use properties (\$212.3 million) at March 31, 2016. At that date, over 97% of the commercial real estate loans

outstanding were secured by properties located in New England.

Construction and development financing is generally considered to involve a higher degree of risk than long-term financing on improved, occupied real estate, and thus has higher concentration limits than do other commercial credit classes. Risk of loss on a construction loan is largely dependent upon the accuracy of the initial estimate of construction costs, the estimated time to sell or rent the completed property at an adequate price or rate of occupancy, and market conditions. If the estimates and projections prove to be inaccurate, the Company may be confronted with a project which, upon completion, has a value that is insufficient to assure full loan repayment.

Table of Contents

Criteria applied in underwriting construction loans for which the primary source of repayment is the sale of the property are different from the criteria applied in underwriting construction loans for which the primary source of repayment is the stabilized cash flow from the completed project. For those loans where the primary source of repayment is from resale of the property, in addition to the normal credit analysis performed for other loans, the Company also analyzes project costs, the attractiveness of the property in relation to the market in which it is located, and demand within the market area. For those construction loans where the source of repayment is the stabilized cash flow from the completed project, the Company analyzes not only project costs but also how long it might take to achieve satisfactory occupancy and the reasonableness of projected rental rates in relation to market rental rates.

Commercial Loans and Leases

The commercial loan and lease portfolio is composed of commercial loans, equipment financing loans and leases and condominium association loans and represented 27.3% of total loans outstanding at March 31, 2016.

The Company provides commercial banking services to companies in its market area. Approximately 51% of the commercial loans outstanding at March 31, 2016 were made to borrowers located in New England. Approximately 17% of the outstanding balances were made to borrowers in New York and New Jersey by the Company's equipment financing divisions. The remaining 49% of the commercial loans outstanding were made to borrowers in other areas in the United States of America. Product offerings include lines of credit, term loans, letters of credit, deposit services, and cash management. These types of credit facilities have as their primary source of repayment cash flows from the operations of a business. Interest rates offered are available on a floating basis tied to the prime rate or a similar index or on a fixed-rate basis referenced on the Federal Home Loan Bank of Boston ("FHLBB") index.

Credit extensions are made to established businesses on the basis of loan purpose and assessment of capacity to repay as determined by an analysis of their financial statements, the nature of collateral to secure the credit extension and, in most instances, the personal guarantee of the owner of the business as well as industry and general economic conditions. The Company also participates in U.S. Government programs such as the Small Business Administration ("SBA") in both the 7A program and as an SBA preferred lender.

The Company's equipment financing divisions focus on market niches in which its lenders have deep experience and industry contacts, and on making loans to customers with business experience. An important part of the Company's equipment financing loan origination volume comes from equipment manufacturers and existing customers as they expand their operations. The equipment financing portfolio is composed primarily of loans to finance laundry, tow trucks, fitness, dry

cleaning, and convenience store equipment. The borrowers are located primarily in the greater New York and New Jersey metropolitan area, although the customer base extends to locations throughout the United States. Typically, the loans are priced at a fixed rate of interest and require monthly payments over a three- to seven-year life. The yields earned on equipment financing loans are higher than those earned on the commercial loans made by the Banks because they involve a higher degree of credit risk. Equipment financing customers are typically small-business owners who operate with limited financial resources and who face greater risks when the economy weakens or unforeseen adverse events arise. Because of these characteristics, personal guarantees of borrowers are usually obtained along with liens on available assets. The size of loan is determined by an analysis of cash flow and other characteristics pertaining to the business and the equipment to be financed, based on detailed revenue and profitability data of similar operations.

Loans to condominium associations are for the purpose of funding capital improvements, are made for five- to ten-year terms and are secured by a general assignment of condominium association revenues. Among the factors considered in the underwriting of such loans are the level of owner occupancy, the financial condition and history of

the condominium association, the attractiveness of the property in relation to the market in which it is located, and the reasonableness of estimates of the cost of capital improvements to be made. Depending on loan size, funds are advanced as capital improvements are made and, in more complex situations, after completion of engineering inspections.

Consumer Loans

The consumer loan portfolio is composed of residential mortgage loans, home equity loans and lines of credit and other consumer loans and represented 18.5% of total loans outstanding at March 31, 2016. The Company focuses its mortgage loans on existing and new customers within its branch networks in the urban and suburban marketplaces in the greater Boston and Providence metropolitan areas. Loans outstanding in the indirect automobile portfolio totaled \$11.2 million at March 31, 2016, down from \$13.7 million at December 31, 2015. In December 2014, the Company ceased the origination of indirect automobile loa

Table of Contents

ns and in March 2015, sold \$255.2 million of the indirect automobile loan portfolio. As of March 31, 2016, the Company continues to service the remaining portfolio.

The Company originates adjustable- and fixed-rate residential mortgage loans secured by one- to four-family residences. Each residential mortgage loan granted is subject to a satisfactorily completed application, employment verification, credit history, and a demonstrated ability to repay the debt. Generally, loans are not made when the loan-to-value ratio exceeds 80% unless private mortgage insurance is obtained and/or there is a financially strong guarantor. Appraisals are performed by outside independent fee appraisers.

In general, the Company maintains three-, five- and seven-year adjustable-rate mortgage loans and ten-year fixed-rate fully amortizing mortgage loans in its portfolio. Fixed-rate mortgage loans with maturities beyond ten years, such as 15- and 30-year fixed-rate mortgages, are generally not maintained in the Company's portfolio but are, rather, sold into the secondary market on a servicing-released basis. At March 31, 2016, the Banks acted as correspondent banks in these secondary-market transactions. Loan sales in the secondary market provide funds for additional lending and other banking activities.

Underwriting guidelines for home equity loans and lines of credit are similar to those for residential mortgage loans. Home equity loans and lines of credit are limited to no more than 80% of the appraised value of the property securing the loan including the amount of any existing first mortgage liens.

Other consumer loans have historically been a modest part of the Company's loan originations. At March 31, 2016, other consumer loans equaled \$17.8 million, or 0.3% of total loan outstanding. Consumer equity and debt securities were pledged as collateral for a substantial part of these loans.

Asset Quality

Criticized and Classified Assets

The Company's Management negatively rates certain loans and leases as "other asset especially mentioned ("OAEM")," "substandard" or "doubtful" based on criteria established under banking regulations. These loans and leases are collectively referred to as "criticized" assets. Loans and leases rated OAEM have potential weaknesses that deserve Management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects of the loan or lease at some future date. Loans and leases rated as substandard are inadequately protected by the payment capacity of the obligor or of the collateral pledged, if any. Substandard loans and leases have a well-defined weakness or weaknesses that jeopardize the liquidation of debt and are characterized by the distinct possibility that the Company will sustain some loss if existing deficiencies are not corrected. At March 31, 2016, the Company had \$61.9 million of total assets, including acquired assets, that were designated as criticized. This compares to \$49.0 million of assets that were designated as criticized at December 31, 2015. The increase in criticized assets was primarily due to several criticized taxi medallion and equipment financing loans which were downgraded during the first quarter of 2016. See Note 5, "Allowance for Loan and Lease Losses," to the unaudited consolidated financial statements for more information on the Company's risk-rating system.

Nonperforming Assets

"Nonperforming assets" consist of nonperforming loans and leases, other real estate owned ("OREO") and other repossessed assets. Under certain circumstances, the Company may restructure the terms of a loan or lease as a concession to a borrower, except for acquired loans and leases which are individually evaluated against expected performance on the date of acquisition. These restructured loans and leases are generally considered "nonperforming loans and leases" until a history of collection of at least six months on the restructured terms of the loan or lease has

been established. OREO consists of real estate acquired through foreclosure proceedings and real estate acquired through acceptance of a deed in lieu of foreclosure. Other repossessed assets consist of assets that have been acquired through foreclosure that are not real estate and are included in other assets on the Company's unaudited consolidated balance sheets.

Table of Contents

The following table sets forth information regarding nonperforming assets at the dates indicated:

	At March 31, 2016	At December 31, 2015		
	(Dollars in Thousands)			
Nonaccrual loans and leases:				
Commercial real estate mortgage	\$5,440	\$ 5,482		
Multi-family mortgage	1,446	291		
Commercial	15,050	6,264		
Equipment financing	5,391	2,610		
Indirect automobile	308	675		
Residential mortgage	2,132	2,225		
Home equity	2,104	1,757		
Other consumer	34	29		
Total nonaccrual loans and leases	31,905	19,333		
OREO	408	729		
Other repossessed assets	157	614		
Total nonperforming assets	\$32,470	\$ 20,676		
Loans and leases past due greater than 90 days and still accruing	\$3,512	\$ 8,690		
Total nonperforming loans and leases as a percentage of total loans and leases	0.62	% 0.39		%
Total nonperforming assets as a percentage of total assets	0.53	% 0.34		%

Total nonperforming assets, which are composed of nonaccrual loans and leases, OREO and other repossessed assets, increased \$11.8 million from \$20.7 million at December 31, 2015 to \$32.5 million at March 31, 2016. The increase was primarily due to \$8.6 million of taxi medallion loans and \$2.7 million of equipment financing loans which were placed on non-accrual and downgraded during the first quarter of 2016.

Troubled Debt Restructured Loans and Leases

The following table sets forth information regarding troubled debt restructured loans and leases at the dates indicated:

	At March 31, 2016	At December 31, 2015		
	(In Thousands)			
Troubled debt restructurings:				
On accrual	\$16,697	\$ 17,953		
On nonaccrual	14,614	4,965		
Total troubled debt restructurings	\$31,311	\$ 22,918		

Table of Contents

Changes in troubled debt restructured loans and leases were as follows for the periods indicated:

	Three months ended March 31,	
	2016	2015
	(In Thousands)	
Balance at beginning of period	\$22,918	\$20,440
Additions	8,775	2,833

Repayments	(382)	(2,935)
Other reductions ⁽¹⁾	—	—
Balance at end of period	\$31,311	\$20,310

⁽¹⁾ Other reductions include transfers to OREO and changes in troubled debt restructuring status.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses consists of general and specific allowances and reflects Management's estimate of probable loan and lease losses inherent in the loan portfolio at the balance sheet date. Management uses a consistent and systematic process and methodology to evaluate the adequacy of the allowance for loan and lease losses on a quarterly basis. The allowance is calculated by loan type: commercial real estate loans, commercial loans and leases, indirect automobile loans, and consumer loans, each category of which is further segregated. A formula-based credit evaluation approach is applied to each group that is evaluated collectively, primarily by loss factors, which includes estimates of incurred losses over an estimated loss emergence period, assigned to each risk rating by type, coupled with an analysis of certain loans individually evaluated for impairment. Management continuously evaluates and challenges inputs and assumptions in the allowance for loan and lease loss.

The process to determine the allowance for loan and lease losses requires Management to exercise considerable judgment regarding the risk characteristics of the loan portfolios and the effect of relevant internal and external factors. While Management evaluates currently available information in establishing the allowance for loan and lease losses, future adjustments to the allowance for loan and lease losses may be necessary if conditions differ substantially from the assumptions used in making the evaluations. Management performs a comprehensive review of the allowance for loan and lease losses on a quarterly basis. In addition, various regulatory agencies, as an integral part of their examination process, periodically review a financial institution's allowance for loan and lease losses and carrying amounts of other real estate owned. Such agencies may require the financial institution to recognize additions to the allowance based on their judgments about information available to them at the time of their examination.

During the third quarter of 2015, the Company enhanced and refined its general allowance methodology to provide a more precise quantification of probable losses in the portfolio. Under the enhanced methodology, Management combined the historical loss information of the Banks to generate a single set of ratios. Management believes it is appropriate to aggregate the ratios as the Banks share common environmental factors, operate in similar markets, and utilize common underwriting standards in accordance with the Company's Credit Policy. In prior periods, a historical loss history applicable to each Bank was used.

Management employed a similar analysis for the consolidation of the qualitative factors as it did for the quantitative factors. Again, Management believes the combination of the existing nine qualitative factors used at each of the Banks into a single group of factors for use across the Company is appropriate based on the commonality of environmental factors, markets, and underwriting standards among the Banks. In prior periods each of the Banks utilized a set of qualitative factors applicable to each Bank.

As of March 31, 2016, the Company had a portfolio of approximately \$36.1 million in loans secured by taxi medallions issued by the cities of Boston and Cambridge. Recently, application-based mobile ride services, such as Uber and Lyft, have generated increased competition in the taxi area, resulting in a reduction in taxi utilization and, as a result, a reduction in the collateral value and credit quality of taxi medallion loans. This has increased the likelihood that loans secured by taxi medallions may default, or that the borrowers may be unable to repay these loans at maturity, potentially resulting in an increase in troubled debt restructurings, therefore, beginning with the quarter ended December 31, 2015, the Company's allowance calculation included a further segmentation of the commercial loans and leases to reflect the increased risk in the

Table of Contents

Company's taxi medallion portfolio. This allowance calculation segmentation represents Management's estimations of the risks associated with the portfolio, however, further declines in demand for taxi services or further deterioration in the value of taxi medallions may result in higher delinquencies and losses beyond that provided for in the allowance for loan and lease losses.

Based on the refinements to the Company's allowance methodology discussed above, Management determined that the potential risks anticipated by the unallocated allowance are now incorporated into the allowance methodology, making the unallocated allowance unnecessary. In prior periods, the unallocated allowance was used to recognize the estimated risk associated with the allocated general and specific allowances. It incorporated Management's evaluation of existing conditions that were not included in the allocated allowance determinations and provided for losses that arise outside of the ordinary course of business.

See Note 5, "Allowance for Loan and Lease Losses," to the unaudited consolidated financial statements for descriptions of how Management determines the balance of the allowance for loan and lease losses for each portfolio and class of loans.

The following tables present the changes in the allowance for loan and lease losses by portfolio segment for the three months ended March 31, 2016 and 2015.

	At and for the Three Months Ended March 31, 2016						Total
	Commercial Real Estate	Commercial	Indirect Automobile	Consumer	Unallocated		
	(Dollars in Thousands)						
Balance at December 31, 2015	\$30,151	\$22,018	\$269	\$4,301	\$	—	\$56,739
Charge-offs	(331)	(288)	(244)	(12)	—	(875)	(875)
Recoveries	—	224	231	20	—	475	475
Provision (credit) for loan and lease losses	1,164	1,024	(35)	114	—	2,267	2,267
Balance at March 31, 2016	\$30,984	\$22,978	\$221	\$4,423	\$	—	\$58,606
Total loans and leases	\$2,766,398	\$1,398,639	\$11,220	\$954,188	N/A		\$5,130,445
Allowance for loan and lease losses as a percentage of total loans and leases	1.12	% 1.64	% 1.97	% 0.46	% N/A	1.14	%
	At and for the Three Months Ended March 31, 2015						Total
	Commercial Real Estate	Commercial	Indirect Automobile	Consumer	Unallocated		
	(Dollars in Thousands)						
Balance at December 31, 2014	\$29,594	\$15,957	\$2,331	\$3,359	\$2,418		\$53,659
Charge-offs	(388)	(450)	(820)	(7)	—	(1,665)	(1,665)
Recoveries	—	212	581	18	—	811	811
Provision (credit) for loan and lease losses	254	3,365	(1,634)	249	67	2,301	2,301
Balance at March 31, 2015	\$29,460	\$19,084	\$458	\$3,619	\$2,485		\$55,106
Total loans and leases	\$2,500,887	\$1,227,352	\$23,335	\$883,020	N/A		\$4,634,594
Allowance for loan and lease losses as a percentage of total loans and leases	1.18	% 1.55	% 1.96	% 0.41	% N/A	1.19	%

The allowance for loan and lease losses was \$58.6 million at March 31, 2016, or 1.14% of total loans and leases outstanding. This compared to an allowance for loan and lease losses of \$56.7 million or 1.14% of total loans and leases outstanding, at December 31, 2015. The increase in the allowance for loan and lease losses from December 31, 2015 to March 31, 2016 was due to loan growth of \$134.9 million during the first quarter of 2016, and a specific reserve recorded for an equipment financing loan, and was partially offset by the reduction in reserve due to a decrease in the historical loss factor. The increase in substandard/impaired taxi medallion loans did not meaningfully increase the allowance for loan and lease losses as the risk in the portfolio was reserved for as of December 31, 2015.

Table of Contents

Commercial Real Estate Loans

The allowance for commercial real estate loan losses was \$31.0 million at March 31, 2016, or 1.12% of total commercial real estate loans outstanding. This compared to an allowance for commercial real estate loan losses of \$30.2 million, or 1.13% of total commercial real estate loans outstanding, at December 31, 2015. Specific reserves on commercial real estate loans were \$2.4 million and \$2.3 million at March 31, 2016 and December 31, 2015, respectively. The \$0.8 million increase in the allowance for commercial real estate loan losses during the first three months of 2016 was primarily driven by loan growth of \$102.0 million, or 15.3% on an annualized basis from December 31, 2015 partially offset by the decrease in reserve due to the changes in loss factors.

The ratio of total criticized and classified commercial real estate loans to total commercial real estate loans increased to 1.06% at March 31, 2016 from 1.03% at December 31, 2015. The ratio of originated commercial real estate loans on nonaccrual to total originated commercial real estate loans increased to 0.17% at March 31, 2016 from 0.13% at December 31, 2015.

Net charge-offs in the commercial real estate loan portfolio for the three months ended March 31, 2016 and March 31, 2015 were \$0.3 million and \$0.4 million, respectively. As a percentage of average commercial loans and leases, annualized net charge-offs for the three months ended March 31, 2016 and March 31, 2015 were 0.05% and 0.06%, respectively.

Commercial Loans and Leases

The allowance for commercial loan and lease losses was \$23.0 million, or 1.64% of total commercial loans and leases outstanding, at March 31, 2016, compared to \$22.0 million, or 1.60%, at December 31, 2015. Specific reserves on commercial loans and leases increased from \$1.3 million at December 31, 2015 to \$2.9 million at March 31, 2016. The \$1.0 million increase in the allowance for commercial loan and lease losses during the first three months of 2016 was primarily driven by loan growth of \$24.3 million, or 7.1% on an annualized basis, from December 31, 2015, and a specific reserve recorded for an equipment financing loan during the first quarter of 2016.

The ratio of total criticized and classified commercial loans and leases to total commercial loans and leases was 2.32% at March 31, 2016 as compared to 1.57% at December 31, 2015. The ratio of originated commercial loans and leases on nonaccrual to total originated commercial loans and leases increased to 1.28% at March 31, 2016 from 0.46% at December 31, 2015.

Net charge-offs in the commercial loan and lease portfolio for the three months ended March 31, 2016 and March 31, 2015 were \$0.1 million and \$0.2 million, respectively. As a percentage of average commercial loans and leases, annualized net charge-offs for the three months ended March 31, 2016 and March 31, 2015 were 0.02% and 0.08%, respectively.

Indirect Automobile Loans

The allowance for indirect automobile loan losses was \$0.2 million, or 1.97% of total indirect automobile loans outstanding, at March 31, 2016, compared to \$0.3 million, or 1.97% of the indirect automobile portfolio outstanding, at December 31, 2015. Loans outstanding decreased \$2.5 million from \$13.7 million at December 31, 2015 to \$11.2 million at March 31, 2016. There were no loans individually evaluated for impairment in the indirect automobile portfolio at March 31, 2016 and December 31, 2015.

The ratio of indirect automobile loans with borrower credit scores below 660 to the total indirect automobile portfolio decreased to 45.3% at March 31, 2016 from 45.5% at December 31, 2015. The ratio of indirect automobile loans on

nonaccrual to total indirect automobile loans decreased to 2.75% at March 31, 2016 compared to 4.93% at December 31, 2015.

Net charge-offs in the indirect automobile portfolio for the three months ended March 31, 2016 was negligible. This compared to net charge-offs of \$0.2 million for the three months ended March 31, 2015. As a percentage of average loans and leases, the annualized net charge-offs for the three months ended March 31, 2015 was 0.34%.

Consumer Loans

The allowance for consumer loan losses, including residential loans and home equity loans and lines of credit, was \$4.4 million, or 0.46% of total consumer loans and leases outstanding, at March 31, 2016, compared to \$4.3 million, or 0.46%, at December 31, 2015. There was a nominal reserve for consumer loans individually evaluated for impairment at March 31, 2016 and December 31, 2015. The \$0.1 million increased in the allowance for consumer loans during the first three months of 2016

Table of Contents

was primarily driven by loan growth of \$11.0 million, or 4.7% on an annualized basis, from December 31, 2015. The ratio of originated consumer loans on nonaccrual to total originated consumer loans decreased to 0.27% at March 31, 2016 from 0.29% at December 31, 2015. The risk of loss on a home equity loan is higher since the property securing the loan has often been previously pledged as collateral for a first mortgage loan. The Company gathers and analyzes delinquency data, to the extent that data are available on these first liens, for purposes of assessing the collectability of the second liens held for the Company even if these home equity loans are not delinquent. This data are further analyzed for performance differences between amortizing and non-amortizing home equity loans, the percentage borrowed to total loan commitment, and by the amount of payments made by the borrower. The loss exposure is not considered to be high due to the combination of current property values, the historically low loan-to-value ratios, the low level of losses experienced in the past few years, and the low level of loan delinquencies at March 31, 2016. If the local economy weakens, a rise in losses in those loan classes could occur. Historically, losses in these classes have been low.

Net recoveries in the consumer portfolio for the three months ended March 31, 2016 and March 31, 2015 were \$8.0 thousand and \$11.0 thousand, respectively.

The following table sets forth the Company's percent of allowance for loan and lease losses to the total allowance for loan and lease losses and the percent of loans to total loans for each of the categories listed at the dates indicated.

	At March 31, 2016			At December 31, 2015		
	Amount	Percent of Allowance to Total Allowance	Percent of Loans to Total Loans	Amount	Percent of Allowance to Total Allowance	Percent of Loans to Total Loans
(Dollars in Thousands)						
Commercial real estate loans:						
Commercial real estate	\$21,735	37.1 %	38.2 %	\$21,100	37.3 %	37.5 %

Total	\$58,606	100.0 %	100.0 %	\$56,739	100.0 %	100.0 %

Investments

The investment portfolio exists primarily for liquidity purposes, and secondarily as sources of interest and dividend income, interest-rate risk management and tax planning as a counterbalance to loan and deposit flows. Investment securities are utilized as part of the Company's asset/liability management and may be sold in response to, or in anticipation of, factors such as changes in market conditions and interest rates, security prepayment rates, deposit

outflows, liquidity concentrations, and regulatory capital requirements.

The investment policy of the Company, which is reviewed and approved by the Board of Directors on an annual basis, specifies the types of investments that are acceptable, required investment ratings by at least one nationally recognized rating agency, concentration limits and duration guidelines. Compliance with the investment policy is monitored on a regular basis. In general, the Company seeks to maintain a high degree of liquidity and targets cash, cash equivalents and investment securities available-for-sale balances between 10% and 30% of total assets.

Table of Contents

Cash, cash equivalents, and investment securities increased approximately \$11.1 million, or 6.5% on an annualized basis, to \$693.5 million at March 31, 2016 from \$682.4 million at December 31, 2015. The increase was primarily driven by investment securities. Cash, cash equivalents, and investment securities were 11.2% of total assets at March 31, 2016, compared to 11.3% of total assets at December 31, 2015.

The following table sets forth certain information regarding the amortized cost and market value of the Company's investment securities at the dates indicated:

	At March 31, 2016		At December 31, 2015	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
(In Thousands)				
Investment securities available-for-sale:				
Debt securities:				
GSEs	\$56,108	\$57,259	\$40,658	\$40,627
GSE CMOs	189,529	189,180	198,000	193,816
GSE MBSs	240,138	243,214	230,213	229,881

Total investment securities available-for-sale	\$531,508	\$536,182	\$517,601	\$513,201
Investment securities held-to-maturity:				
GSEs	\$25,420	\$25,531	\$34,915	\$34,819
GSE MBSs	18,539	18,508	19,291	18,986
Municipal Obligations	38,950	39,767	39,051	39,390
Foreign Government Obligations	500	484	500	500
Total investment securities held-to-maturity	\$83,409	\$84,290	\$93,757	\$93,695

The fair value of investment securities is based principally on market prices and dealer quotes received from third-party, nationally-recognized pricing services for identical investment securities such as U.S. Treasury and agency securities. The Company's marketable equity securities are priced this way and are included in Level 1. These prices are validated by comparing the primary pricing source with an alternative pricing source when available. When quoted market prices for identical securities are unavailable, the Company uses market prices provided by independent pricing services based on recent trading activity and other observable information, including but not limited to market interest-rate curves, referenced credit spreads, and estimated prepayment speeds, where applicable. These investments include certain U.S. and government agency debt securities, GSE residential MBSs and CMOs, corporate debt securities, SBA commercial loan asset-backed securities, and trust preferred securities, all of which are included in Level 2.

Additionally, Management reviews changes in fair value from period to period and performs testing to ensure that prices received from the third parties are consistent with their expectation of the market. Changes in the prices obtained from the pricing service are analyzed from month to month, taking into consideration changes in market conditions including changes in mortgage spreads, changes in U.S. Treasury security yields, and changes in generic pricing of 15-year and 30-year securities. Additional analysis may include a review of prices provided by other

independent parties, a yield analysis, a review of average life changes using Bloomberg analytics, and a review of historical pricing for the particular security.

Maturities, calls, and principal repayments for investment securities available-for-sale totaled \$27.7 million and \$20.0 million for the three months ended March 31, 2016 and 2015, respectively. Maturities, calls, and principal repayments for investment securities held-to-maturity totaled \$13.7 million for the three months ended March 31, 2016 compared to zero for the same period in 2015. During the three months ended March 31, 2016, the Company purchased \$42.0 million of investment

Table of Contents

securities available-for-sale and \$3.5 million investment securities held-to-maturity. This compared to \$29.5 million of investment securities available-for-sale and no purchases of investment securities held-to-maturity for the same period in 2015. During the three months ended March 31, 2016 and 2015, the Company did not sell any investment securities available-for-sale or held-to-maturity.

At March 31, 2016, the fair value of all investment securities available-for-sale was \$536.2 million, with net unrealized gains of \$4.7 million, compared to a fair value of \$513.2 million and net unrealized losses of \$4.4 million at December 31, 2015. At March 31, 2016, \$122.0 million, or 22.8% of the portfolio, had gross unrealized losses of \$1.6 million. This compares to \$368.1 million, or 71.7% of the portfolio, with gross unrealized losses of \$6.0 million at December 31, 2015.

At March 31, 2016, the fair value of all investment securities held-to-maturity was \$84.3 million with an amortized cost of \$83.4 million and net unrealized gains of \$0.9 million, compared to a fair value of \$93.7 million, which approximated cost, at December 31, 2015. At March 31, 2016, \$11.2 million, or 13.2% of the portfolio, had gross unrealized losses of \$64.0 thousand. This compares to \$52.3 million, or 55.8% of the portfolio, with gross unrealized losses of \$0.4 million at December 31, 2015.

Management believes that these negative differences between amortized cost and fair value do not include credit losses, but rather differences in interest rates between the time of purchase and the time of measurement. It is more likely than not that the Company will not sell the investment securities before recovery, and, as a result, it will recover the amortized cost basis of the investment securities. As such, Management has determined that these investment securities are not other-than-temporarily impaired at March 31, 2016. If market conditions for investment securities worsen or the creditworthiness of the underlying issuers deteriorates, it is possible that the Company may recognize additional other-than-temporary impairments in future periods. For additional discussion on how the Company validates fair values provided by the third-party pricing service, see Note 13, "Fair Value of Financial Instruments."

Restricted Equity Securities

Federal Reserve Bank Stock

The Company invests in the stock of the Federal Reserve Bank of Boston, as required by the Banks' membership in the FRB. As of March 31, 2016 and December 31, 2015, the Company owned stock in the Federal Reserve Bank of Boston with a carrying value of \$16.8 million.

FHLBB Stock

The Company invests in the stock of the FHLBB as one of the requirements to borrow funds. As of March 31, 2016 and December 31, 2015, the Company maintained an excess balance of capital stock of \$1.7 million and \$4.3 million, respectively, which allows for additional borrowing capacity at each of the Banks. The decrease of the excess balance of capital stock was the result of a stock buyback by the FHLBB in the amount of \$679.0 thousand at one of the Banks. As of March 31, 2016 and December 31, 2015, the Company owned stock in the FHLBB with a carrying value of \$48.2 million and \$48.9 million, respectively. The FHLBB stated that it remained in compliance with all regulatory capital ratios at December 31, 2015 and, based on the most recent information available, was classified as "adequately capitalized" by its regulator.

Table of Contents

Deposits

The following table presents the Company's deposit mix at the dates indicated.

	At March 31, 2016			At December 31, 2015		
	Amount	Percent of Total	Weighted Average Rate	Amount	Percent of Total	Weighted Average Rate
	(Dollars in Thousands)					
Non-interest-bearing accounts	\$793,195	18.1 %	— %	\$799,117	18.6 %	— %
NOW accounts	286,920	6.5 %	0.07 %	283,972	6.6 %	0.07 %
Savings accounts	555,843	12.7 %	0.26 %	540,788	12.5 %	0.25 %
Money market accounts	1,649,348	37.5 %	0.45 %	1,594,269	37.0 %	0.44 %
Certificate of deposit accounts	1,108,150	25.2 %	0.95 %	1,087,872	25.3 %	0.93 %
Total interest-bearing deposits	3,600,261	81.9 %	0.54 %	3,506,901	81.4 %	0.53 %
Total deposits	\$4,393,456	100.0 %	0.44 %	\$4,306,018	100.0 %	0.43 %

Total deposits increased \$87.4 million, or 8.1% on an annualized basis, to \$4.4 billion at March 31, 2016 as compared to \$4.3 billion at December 31, 2015. Although deposits increased from December 31, 2015, as a percentage of total assets deposits decreased from 71.3% at December 31, 2015 to 71.1% at March 31, 2016, primarily due to change in balance sheet mix.

At March 31, 2016, the Company had \$268.3 million of brokered deposits compared to \$252.3 million at December 31, 2015. Brokered deposits allow the Company to seek additional funding by attracting deposits from outside the Company's core market. The Company's investment policy limits the amount of brokered deposits to 15% of total assets. Brokered deposits are included in the certificate of deposit balance, which increased \$20.3 million, or 7.5% on an annualized basis, during the three months ended March 31, 2016. Certificates of deposit decreased as a percentage of total deposits to 25.2% at March 31, 2016 from 25.3% at December 31, 2015.

During the three months ended March 31, 2016, core deposits increased \$67.2 million, or 8.3% on an annualized basis. However, as a percentage of total deposits, the ratio increased from 74.7% at December 31, 2015 to 74.8% at March 31, 2016, primarily due to the shift in deposit mix and increase in money market accounts.

The following table sets forth the distribution of the average balances of the Company's deposit accounts for the periods indicated and the weighted average interest rates on each category of deposits presented. Averages for the periods presented are based on daily balances.

	Three Months Ended March 31,					
	2016			2015		
	Average Balance	Percent of Total Average Deposits	Weighted Average Rate	Average Balance	Percent of Total Average Deposits	Weighted Average Rate
	(Dollars in Thousands)					
Core deposits:						
Non-interest-bearing demand checking accounts	\$798,869	18.4 %	— %	\$728,099	17.9 %	— %
NOW accounts	279,414	6.4 %	0.07 %	237,718	5.8 %	0.07 %
Savings accounts	564,681	13.0 %	0.25 %	541,595	13.3 %	0.20 %

Edgar Filing: BROOKLINE BANCORP INC - Form 10-Q

Money market accounts	1,629,054	37.5	%	0.44	%	1,536,751	37.7	%	0.48	%
Total core deposits	3,272,018	75.2	%	0.27	%	3,044,163	74.7	%	0.28	%
Certificate of deposit accounts	1,077,639	24.8	%	0.96	%	1,033,511	25.3	%	0.85	%
Total deposits	\$4,349,657	100.0	%	0.44	%	\$4,077,674	100.0	%	0.43	%

Table of Contents

The following table sets forth the maturity periods for certificates of deposit of \$250,000 or more deposited with the Company at the dates indicated:

	At March 31, 2016			At December 31, 2015		
	Amount	Weighted Average Rate		Amount	Weighted Average Rate	
	(Dollars in Thousands)					
Maturity period:						
Six months or less	\$65,502	0.74	%	\$67,361	0.67	%
Over six months through 12 months	54,689	0.97	%	54,135	1.03	%
Over 12 months	50,676	1.51	%	46,856	1.52	%
	\$170,867	1.04	%	\$168,352	1.02	%

Borrowed Funds

The following table sets forth certain information regarding FHLBB advances, subordinated debentures and notes and other borrowed funds for the periods indicated:

	Three Months Ended			
	March 31, 2016		2015	
	(Dollars in Thousands)			
Average balance outstanding	\$986,539		\$1,061,904	
Maximum amount outstanding at any month-end during the period	1,028,309		1,094,459	
Balance outstanding at end of period	1,028,309		924,925	
Weighted average interest rate for the period	1.58	%	1.42	%
Weighted average interest rate at end of period	1.54	%	1.58	%

Advances from the FHLBB

On a long-term basis, the Company intends to continue to increase its core deposits. The Company also uses FHLBB borrowings and other wholesale borrowing opportunistically as part of the Company's overall strategy to fund loan growth and manage interest-rate risk and liquidity. The advances are secured by blanket security agreements which require the Banks to maintain as collateral certain qualifying assets, principally mortgage loans and securities in an aggregate amount at least equal to outstanding advances. The maximum amount that the FHLBB will advance to member institutions, including the Company, fluctuates from time to time in accordance with the policies of the FHLBB. The Company may also borrow from the FRB "discount window" as necessary.

FHLBB borrowings increased \$44.1 million to \$906.0 million at March 31, 2016 from \$861.9 million at December 31, 2015. The increase in FHLBB borrowings was primarily due to additional advances to fund loan and lease growth. The Company also benefited from a FHLBB program which offered \$14.1 million of borrowings at 0% interest for three years.

Repurchase Agreements

The Company periodically enters into repurchase agreements with its larger deposit and commercial customers as part of its cash management services which are typically overnight borrowings. Short-term borrowings and repurchase agreements with commercial customers increased \$1.2 million during the three months ended March 31, 2016, from \$38.2 million as of December 31, 2015 to \$39.4 million as of March 31, 2016, as customers shifted funds from other deposit products.

Subordinated Debentures and Notes

In the third quarter of 2014, the Company offered \$75.0 million of 6.0% fixed-to-floating subordinated notes due September 15, 2029. The Company is obligated to pay 6.0% interest semiannually between September 2014 and September 2024. Subsequently, the Company is obligated to pay 3-month LIBOR plus 3.315% quarterly until the notes mature in September 2029.

Table of Contents

The following table summarizes the Company's subordinated debentures and notes at the dates indicated.

Issue Date	Rate	Maturity Date	Next Call Date	Carrying Amount at March 31, 2016	Carrying Amount at December 31, 2015
(Dollars in Thousands)					
June 26, 2003	Variable; 3-month LIBOR + 3.10%	June 26, 2033	June 26, 2016	\$ 4,730	\$ 4,725
March 17, 2004	Variable; 3-month LIBOR + 2.79%	March 17, 2034	June 17, 2016	\$ 4,599	\$ 4,589
September 15, 2014	6.0% Fixed-to-Variable; 3-month LIBOR + 3.315%	September 15, 2029	September 15, 2024	\$ 73,649	\$ 73,624

The above carrying amounts of the subordinated debentures included \$671.2 thousand of accretion adjustments and \$1.4 million of capitalized debt issuance costs as of March 31, 2016. This compares to \$688.4 thousand of accretion adjustments and \$1.4 million of capitalized debt issuance costs as of December 31, 2015.

Derivative Financial Instruments

The Company has entered into interest-rate swaps with certain of its commercial customers and concurrently enters into offsetting swaps with third-party financial institutions. The Company did not have derivative fair value hedges or derivative cash flow hedges at March 31, 2016 or December 31, 2015. The following table summarizes certain information concerning the Company's interest-rate swaps at March 31, 2016 and at December 31, 2015:

	Interest-Rate Swaps	
	At March 31, 2016	At December 31, 2015
Notional principal amounts	\$583,035	\$ 490,632
Fixed weighted average interest rate from the Company to counterparty	4.23 %	4.30 %
Floating weighted average interest rate from counterparty to the Company	2.42 %	2.40 %
Weighted average remaining term to maturity (in months)	97	100
Fair value:		
Recognized as an asset	\$ 18,583	\$ 8,656
Recognized as a liability	\$ 18,583	\$ 8,781

Stockholders' Equity and Dividends

The Company's total stockholders' equity was \$680.4 million at March 31, 2016, a \$12.9 million increase compared to \$667.5 million at December 31, 2015. The increase primarily reflects net income attributable to the Company of \$12.8 million for the three months ended March 31, 2016, an unrealized gain on securities available-for-sale of \$5.8 million (after-tax), an increase of \$0.5 million related to stock-based compensation, offset by common stock dividends of \$6.3 million paid in that same period.

Stockholders' equity represented 11.01% of total assets at March 31, 2016, as compared to 11.05% at December 31, 2015. Tangible stockholders' equity (total stockholders' equity less goodwill and identified intangible assets, net) represented 8.83% of tangible assets (total assets less goodwill and identified intangible assets, net) at March 31, 2016, as compared to 8.81% at December 31, 2015.

For the three months ended March 31, 2016, the dividend payout ratios were 49.45%, compared to 47.54% for the three months ended December 31, 2015.

Results of Operations — Comparison of the Three and Three-Month Periods Ended March 31, 2016 and March 31, 2015

The primary drivers of the Company's operating income are net interest income, which is strongly affected by the net yield on interest-earning assets and liabilities ("net interest margin"), the quality of the Company's assets, its levels of non-interest income and non-interest expense, and its tax provision.

Table of Contents

The Company's net interest income represents the difference between interest income earned on its investments, loans and leases, and its cost of funds. Interest income depends on the amount of interest-earning assets outstanding during the period and the yield earned thereon. Cost of funds is a function of the average amount of deposits and borrowed money outstanding during the period and the interest rates paid thereon. The net interest margin is calculated by dividing net interest income by average interest-earning assets. Net interest spread is the difference between the average rate earned on interest-earning assets and the average rate paid on interest-bearing liabilities. The increases (decreases) in the components of interest income and interest expense, expressed in terms of fluctuation in average volume and rate, are summarized under "Rate/Volume Analysis" below. Information as to the components of interest income, interest expense and average rates is provided under "Average Balances, Net Interest Income, Interest-Rate Spread and Net Interest Margin" below.

Because the Company's assets and liabilities are not identical in duration and in repricing dates, the differential between the asset and liability repricing and duration is vulnerable to changes in market interest rates as well as the overall shape of the yield curve. These vulnerabilities are inherent to the business of banking and are commonly referred to as "interest-rate risk." How interest-rate risk is measured and, once measured, how much interest-rate risk is taken is based on numerous assumptions and other subjective judgments. See the discussion in "Item 3. Quantitative and Qualitative Disclosures about Market Risk" below.

The quality of the Company's assets also influences its earnings. Loans and leases that are not paid on a timely basis and exhibit other weaknesses can result in the loss of principal and/or interest income. Additionally, the Company must make timely provisions to the allowance for loan and lease losses based on estimates of probable losses inherent in the loan and lease portfolio. These additions, which are charged against earnings, are necessarily greater when greater probable losses are expected. Further, the Company incurs expenses as a result of resolving troubled assets. These variables reflect the "credit risk" that the Company takes on in the ordinary course of business and are further discussed under "Financial Condition — Asset Quality" above.

Net Interest Income

Net interest income of \$49.2 million for the quarter ended March 31, 2016 increased \$0.7 million, or 1.4%, as compared to the first quarter of 2015. This overall increase was the result of an increase in total interest income of \$1.3 million, or 2.3%, to \$57.9 million for the quarter ended March 31, 2016, offset by an increase in interest expense of \$0.6 million, or 7.6%, to \$8.7 million for the quarter ended March 31, 2016. Refer to "Results of Operations - Comparison of the Three-Month Period Ended March 31, 2016 and March 31, 2015 — Interest Income" and "Results of Operations - Comparison of the Three-Month Period Ended March 31, 2016 and March 31, 2015 — Interest Expense Deposit and Borrowed Funds" below for more details.

Net interest margin decreased to 3.45% in the first quarter of 2016 from 3.57% in the first quarter of 2015. The decrease in the net interest margin is the result of repricing interest-earning assets in a lower interest rate environment without a comparable offset in lower funding costs.

The yield on interest-earning assets decreased to 4.03% in the first quarter of 2016 from 4.11% during the first quarter of 2015. The decrease is the result of the continued pricing pressure due to the low interest rate environment and the intense competition in most loan categories, as well as a decrease in accretion on acquired loans and leases, offset by a slight increase in prepayment penalties and late charges and an increase in dividends from restricted equity securities, debt securities, and other short term investments during the first quarter of 2016. In the first quarter of 2016, the Company benefited from a \$0.2 million accretion on acquired loans and leases, which contributed 1 basis point to yields on

interest-earning assets, compared to \$1.2 million, or 11 basis points, in the first quarter of 2015. The decrease was due to the continued paydowns of acquired loans and the recognition of the associated purchase accounting accretion. In addition, the Company recorded \$0.6 million in prepayment penalties, which contributed 4 basis points to yields on interest-earning assets, in the first quarter of 2016, compared to \$0.6 million, or 5 basis points, in the first quarter of 2015.

The overall cost of funds (including non-interest-bearing demand checking accounts) increased 2 basis points to 0.65% for the three months ended March 31, 2016 from 0.63% for the three months ended March 31, 2015. Refer to "Financial Condition - Borrowed Funds" above for more details.

Future net interest income, net interest spread and net interest margin may continue to be negatively affected by the low interest-rate environment; ongoing pricing pressures in both loan and deposit portfolios; and the ability of the Company to increase its core deposit ratio, increase its non-interest-bearing deposits as a percentage of total deposits, decrease its loan-to-deposit ratio, or decrease its reliance on FHLBB advances. They may also be negatively affected by changes in the amount of accretion on acquired loans and leases, deposits, and borrowed funds included in interest income and interest expense.

Table of Contents

Average Balances, Net Interest Income, Interest-Rate Spread and Net Interest Margin

The following tables set forth information about the Company's average balances, interest income and interest rates earned on average interest-earning assets, interest expense and interest rates paid on average interest-bearing liabilities, interest-rate spread, and net interest margin for the three months ended March 31, 2016 and March 31, 2015. Average balances are derived from daily average balances and yields include fees, costs, and purchase-accounting-related premiums and discounts which are considered adjustments to coupon yields in accordance with GAAP. Certain amounts previously reported have been reclassified to conform to the current period's presentation.

Net interest margin (5)			3.45 %			3.57 %

(1) Tax-exempt income on debt securities, equity securities and revenue bonds included in commercial real estate and commercial loans is included on a tax-equivalent basis.

Table of Contents

- (2) Loans on nonaccrual status are included in the average balances.
- (3) Including non-interest-bearing checking accounts, the average interest rate on total deposits was 0.44% and 0.43% in the three months ended March 31, 2016 and March 31, 2015, respectively.
- (4) Interest-rate spread represents the difference between the yield on interest-earning assets and the cost of interest-bearing liabilities.
- (5) Net interest margin represents net interest income (tax equivalent basis) divided by average interest-earning assets.

Table of Contents

Rate/Volume Analysis

The following table presents, on a tax-equivalent basis, the extent to which changes in interest rates and changes in volume of interest-earning assets and interest-bearing liabilities have affected the Company's interest income and interest expense during the periods indicated. Information is provided in each category with respect to: (1) changes attributable to changes in volume (changes in volume multiplied by prior rate), (2) changes attributable to changes in rate (changes in rate multiplied by prior volume), and (3) the net change. The changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate.

Table of Contents

Interest Income

Loans and Leases

	Three Months		Dollar	Percent	
	Ended March 31, 2016	2015			
(Dollars in Thousands)					
Interest income — loans and leases:					
Commercial real estate loans	\$27,266	\$26,245	\$1,021	3.9	%
Commercial loans	6,402	6,314	88	1.4	%
Equipment financing	11,750	10,544	1,206	11.4	%
Indirect automobile loans	153	2,142	(1,989)	-92.9	%
Residential mortgage loans	5,559	5,307	252	4.7	%
Other consumer loans	3,117	2,829	288	10.2	%
Total interest income — loans and leases	\$54,247	\$53,381	\$866	1.6	%

Interest income from loans and leases was \$54.2 million for the three months ended March 31, 2016, resulting in a yield on total loans and leases of 4.3%. This compares to \$53.4 million of interest on loans and leases and a yield of 4.41% for the three months ended March 31, 2015. The year-over-year increase of \$0.9 million in interest income from loans and leases was due to an increase of \$2.8 million due to increase in origination volume, offset by a decrease of \$1.8 million due to changes in rate. Accretion on acquired loans and leases of \$0.2 million contributed 1 basis point to net interest margin during the first quarter of 2016, compared to \$1.2 million and 11 basis points in the first quarter of 2015. The decrease was due to the continued paydowns of acquired loans and the recognition of the associated purchase accounting accretion.

Investments

	Three Months		Dollar	Percent	
	Ended March 31, 2016	2015			
(Dollars in Thousands)					
Interest income — investments:					
Debt securities	\$2,932	\$2,683	\$249	9.3	%
Marketable and restricted equity securities	680	524	156	29.8	%
Short-term investments	39	21	18	85.7	%
Total interest income — investments	\$3,651	\$3,228	\$423	13.1	%

Total investment income was \$3.7 million for the three months ended March 31, 2016, compared to \$3.2 million for the three months ended March 31, 2015. The yield on investments increased to 2.09% for the quarter ended March 31, 2016 from 1.92% for the quarter ended March 31, 2015. The \$0.4 million year-over-year increase in quarterly interest income on investments was driven by a \$0.2 million increase due to volume and a \$0.3 million increase due to rates.

Total interest expense - deposits	4,745	4,304	441	10.2 %
Borrowed funds:				
Advances from the FHLBB	2,669	2,504	165	6.6 %
Subordinated debentures and notes	1,256	1,248	8	0.6 %
Other borrowed funds	25	25	—	— %
Total interest expense - borrowed funds	3,950	3,777	173	4.6 %
Total interest expense	\$8,695	\$8,081	\$ 614	7.6 %

Deposits

Interest expense on deposits increased \$0.4 million to \$4.7 million for the three months ended March 31, 2016 from \$4.3 million for the three months ended March 31, 2015. The cost of total interest-bearing deposits increased to 0.54% in the three months ended March 31, 2016 from 0.52% during the three months ended March 31, 2015. The increase in interest expense on deposits was due to a \$0.2 million increase due to rates offered and a \$0.2 million increase due to volume. Accretion on acquired deposits was \$24.0 thousand and \$43.0 thousand for the three months ended March 31, 2016 and March 31, 2015, respectively. Accretion had no impact on the Company's net interest margin for the three months ended March 31, 2016 and March 31, 2015.

Borrowed Funds

Interest expense on borrowed funds increased by \$0.2 million, or 4.6%, to \$4.0 million for the three months ended March 31, 2016 from \$3.8 million for the three months ended March 31, 2015. The cost of borrowed funds increased to 1.58% for the three months ended March 31, 2016 from 1.42% for the three months ended March 31, 2015. The increase in interest expense was due to a \$0.4 million increase due to higher borrowing rates and a decrease in interest expense of \$0.2 million due to lower volume. Accretion on acquired borrowed funds of \$0.6 million improved the Company's net interest margin by 4 basis points for the three months ended March 31, 2016. This compared to \$0.7 million and 5 basis points for the three months ended March 31, 2015.

Table of Contents

Provision for Credit Losses

The provision for credit losses are set forth below:

	Three Months		Dollar	Percent	
	Ended March 31, 2016	2015			
(Dollars in Thousands)					
Provision (credit) for loan and lease losses:					
Commercial real estate	\$1,164	\$254	\$ 910	358.3	%
Commercial	1,024	3,365	(2,341)	-69.6	%
Indirect automobile	(35)	(1,634)	1,599	-97.9	%
Consumer	114	249	(135)	-54.2	%
Unallocated	—	67	(67)	-100.0	%
Total provision for loan and lease losses	2,267	2,301	(34)	-1.5	%
Unfunded credit commitments	111	(38)	149	-392.1	%
Total provision for credit losses	\$2,378	\$2,263	\$ 115	5.1	%

The provision for credit losses increased \$0.1 million, or 5.1%, to \$2.4 million for the three months ended March 31, 2016 from \$2.3 million for the three months ended March 31, 2015. The increase in total provision was primarily driven by the increase in provision due to continued loan growth in the commercial real estate and commercial portfolios and the increases in provision for acquired loans and unfunded credit commitments, offset by the decrease in provision due to risk rating migration and loss factor changes and the decrease in net charge-offs.

See Management's discussion of "Financial Condition — Allowance for Loan and Lease Losses" and Note 5, "Allowance for Loan and Lease Losses," to the unaudited consolidated financial statements for a description of how Management determined the allowance for loan and lease losses for each portfolio and class of loans.

Non-Interest Income

The following table sets forth the components of non-interest income for the periods indicated:

	Three Months		Dollar	Percent	
	Ended March 31, 2016	2015			
(Dollars in Thousands)					
Deposit fees	\$2,145	\$2,066	\$79	3.8	%
Loan fees	330	342	(12)	(3.5)	%
Loan level derivative income, net	1,629	—	1,629	100.0	%
Gain on sales of loans and leases held-for-sale	905	869	36	4.1	%
Other	1,460	1,193	267	22.4	%
Total non-interest income	\$6,469	\$4,470	\$1,999	44.7	%

Total non-interest income increased \$2.0 million, or 44.7%, to \$6.5 million for three months ended March 31, 2016, from \$4.5 million for the same period in 2015. The increase was primarily due to an increase of \$1.6 million in loan level derivative income, net and an increase of \$0.3 million in other income.

Loan level derivative income, net increased \$1.6 million, or 100.0%, to \$1.6 million for the three months ended March 31, 2016 from zero for the same period in 2015 driven by the new loan level interest rate swap agreements completed in the period.

Other income increased \$0.3 million, or 22.4%, to \$1.5 million for three months ended March 31, 2016 from \$1.2 million for the same period of 2015, primarily driven by an increase in fee income generated by insurance and investment sales transactions.

Table of Contents

Non-Interest Expense

The following table sets forth the components of non-interest expense:

	Three Months Ended March 31,		Dollar	Percent
	2016	2015	Change	Change
	(Dollars in Thousands)			
Compensation and employee benefits	\$18,727	\$17,524	\$1,203	6.9 %
Occupancy	3,526	3,472	54	1.6 %
Equipment and data processing	3,714	4,020	(306)	(7.6)%
Professional services	966	1,094	(128)	(11.7)%
FDIC insurance	878	867	11	1.3 %
Advertising and marketing	861	748	113	15.1 %
Amortization of identified intangible assets	635	738	(103)	(14.0)%
Other	2,746	2,863	(117)	(4.1)%
Total non-interest expense	\$32,053	\$31,326	\$727	2.3 %

Non-interest expense increased \$0.7 million, or 2.3%, to \$32.1 million for the three months ended March 31, 2016 from \$31.3 million for the same period in 2015. The increase was primarily due to an increase of \$1.2 million in compensation and employee benefits expense, partially offset by a decrease of \$0.3 million in equipment and data processing expense, and a decrease of \$0.1 million in professional services expense.

The efficiency ratio decreased to 57.57% for three months ended March 31, 2016 from 59.11% for the three months ended March 31, 2015. Efforts to drive revenue growth contributed to the improvement in the efficiency ratio in 2016.

Compensation and employee benefits expense increased \$1.2 million, or 6.9%, to \$18.7 million for the three months ended March 31, 2016 from \$17.5 million for the same period in 2015, primarily driven by an increase in employee headcount and incentive plan expenses.

Equipment and data processing expense decreased \$0.3 million, or 7.6%, to \$3.7 million for three months ended March 31, 2016 from \$4.0 million for the same period in 2015, primarily driven by a decrease in core processing system expenses from the sale of the indirect automobile loan portfolio in the first quarter of 2015.

Professional services expense decreased \$0.1 million, or 11.7%, to \$1.0 million for the three months ended March 31, 2016 from \$1.1 million for the same period in 2015, primarily due to lower audit, legal, and compliance fees incurred in 2016.

Provision for Income Taxes

	Three Months Ended March 31,		Dollar	Percent
	2016	2015	Change	Change
	(Dollars in Thousands)			
Income before provision for income taxes	\$21,241	\$19,409	\$1,832	9.4 %
Provision for income taxes	7,599	7,104	495	7.0 %
Net income, before noncontrolling interest in subsidiary	\$13,642	\$12,305	\$1,337	10.9 %
Effective tax rate	35.8 %	36.6 %	N/A	-0.8 %

The Company recorded income tax expense of \$7.6 million for the three months ended March 31, 2016, compared to \$7.1 million for the three months ended March 31, 2015, representing effective tax rates of 35.8% and 36.6%, respectively. The 0.8% decrease in the effective tax rate in 2016 is primarily attributable to the recent changes in New York State, New York City, Rhode Island, and Connecticut tax laws, an increase in the Company's investments in municipal securities, and the transfer of certain municipal securities to security corporations in 2015.

Table of Contents

Liquidity and Capital Resources

Liquidity

Liquidity is defined as the ability to meet current and future financial obligations of a short-term nature. The Company further defines liquidity as the ability to respond to the needs of depositors and borrowers, as well as to earnings enhancement opportunities, in a changing marketplace. Liquidity management is monitored by an Asset/Liability Committee ("ALCO"), consisting of members of Management, which is responsible for establishing and monitoring liquidity targets as well as strategies and tactics to meet these targets.

The primary source of funds for the payment of dividends and expenses by the Company is dividends paid to it by its Banks and Brookline Securities Corp. The primary sources of liquidity for the Banks consist of deposit inflows, loan repayments, borrowed funds and maturing investment securities.

Deposits, which are considered the most stable source of liquidity, totaled \$4.4 billion at March 31, 2016, and represented 81.0% of total funding (the sum of total deposits and total borrowings), compared to deposits of \$4.3 billion, or 81.4% of total funding, at December 31, 2015. Core deposits, which consist of demand checking, NOW, savings and money market accounts, totaled \$3.3 billion at March 31, 2016 and represented 74.8% of total deposits, compared to core deposits of \$3.2 billion, or 74.7% of total deposits, at December 31, 2015. Additionally, the Company acquired \$268.3 million of brokered deposits at March 31, 2016, which represented 6.1% of total deposits compared to \$252.3 million or 5.9% of total deposits at December 31, 2015. The Company offers attractive interest rates based on market conditions to increase deposits balances, while managing cost of funds.

Borrowings are used to diversify the Company's funding mix and to support asset growth. When profitable lending and investment opportunities exist, access to borrowings provides a means to fund the balance sheet. Borrowings totaled \$1.0 billion at March 31, 2016, representing 19.0% of total funding, compared to \$983.0 million, or 18.6% of total funding, at December 31, 2015.

As members of the FHLBB, the Banks have access to both short- and long-term borrowings. As of March 31, 2016, the Company's total borrowing limit from the FHLBB for advances and repurchase agreements was \$1.5 billion as compared to \$1.3 billion as of December 31, 2015, based on the level of qualifying collateral available for these borrowings.

As of March 31, 2016, the Banks also have access to funding through certain uncommitted lines of credit of \$119.0 million. The Company had a \$12.0 million committed line of credit for contingent liquidity as of March 31, 2016. The Company has access to the Federal Reserve Bank "discount window" to supplement its liquidity. The Company has \$66.0 million of borrowing capacity at the Federal Reserve Bank as of March 31, 2016. As of March 31, 2016, the Company did not have any borrowings with the Federal Reserve Bank outstanding.

Additionally, the Banks have access to liquidity through repurchase agreements and brokered deposits.

In general, the Company seeks to maintain a high degree of liquidity and targets cash, cash equivalents and investment securities available-for-sale with balances between 10% and 30% of total assets. At March 31, 2016, cash, cash equivalents and investment securities available-for-sale totaled \$610.1 million, or 9.9% of total assets. This compares to \$588.7 million, or 9.7% of total assets, at December 31, 2015.

While Management believes that the Company has adequate liquidity to meet its commitments and to fund the Banks' lending and investment activities, the availability of these funding sources is subject to broad economic conditions and could be restricted in the future. Such restrictions would impact the Company's immediate liquidity and/or additional liquidity needs.

Off-Balance-Sheet Financial Instruments

The Company is party to off-balance-sheet financial instruments in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include loan commitments, standby and commercial letters of credit and interest-rate swaps. According to GAAP, these financial instruments are not recorded in the financial statements until they are funded or related fees are incurred or received.

The contract amounts reflect the extent of the involvement the Company has in particular classes of these instruments. Such commitments involve, to varying degrees, elements of credit risk and interest-rate risk in excess of the amount recognized in the consolidated balance sheet. The Company's exposure to credit loss in the event of non-performance by the counterparty is represented by the contractual amount of the instruments. The Company uses the same policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Table of Contents

Financial instruments with off-balance-sheet risk at the dates indicated follow:

	At March 31, 2016	At December 31, 2015
(In Thousands)		
Financial instruments whose contract amounts represent credit risk:		
Commitments to originate loans and leases:		
Commercial real estate	\$18,865	\$ 36,000
Commercial	74,620	78,017
Residential mortgage	15,364	19,430
Unadvanced portion of loans and leases	643,148	648,291
Unused lines of credit:		
Home equity	306,284	280,786
Other consumer	12,895	12,383
Other commercial	117	529
Unused letters of credit:		
Financial standby letters of credit	12,123	12,389
Performance standby letters of credit	622	392
Commercial and similar letters of credit	878	821
Back-to-back interest-rate swaps	583,035	490,632

Capital Resources

As of March 31, 2016, the Company and the Banks are each under the primary regulation of, and must comply with, the capital requirements of the FRB. As of March 31, 2016, the Company and the Banks exceeded all regulatory capital requirements and were considered “well-capitalized” under prompt corrective action regulations, as amended to reflect the changes under Basel III Capital Rules. The following table presents actual and required capital ratios as of March 31, 2016 for the Company and the Banks under the Basel III Capital Rules based on the phase-in provision of the Basel III Capital Rules and the minimum required capital levels as of January 1, 2019 when the Basel III Capital Rules have been fully phased in.

	Actual		Minimum Required for Capital Adequacy Purposes		Minimum Required for Fully Phased in Capital Adequacy Purposes		Minimum Required To Be Considered “Well-Capitalized” Under Prompt Corrective Action Provisions

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market Risk

Market risk is the risk that the market value or estimated fair value of the Company's assets, liabilities and derivative financial instruments will decline as a result of changes in interest rates or financial market volatility, or that the Company's net income will be significantly reduced by interest-rate changes.

Interest-Rate Risk

The principal market risk facing the Company is interest-rate risk, which can come in a variety of forms, including repricing risk, yield-curve risk, basis risk, and prepayment risk. Repricing risk exists when the change in the average yield of either interest-earning assets or interest-bearing liabilities is more sensitive than the other to changes in market interest rates. Such a change in sensitivity could reflect a number of possible mismatches in the repricing opportunities of the Company's assets and liabilities. Yield-curve risk reflects the possibility that the changes in the shape of the yield curve could have different effects on the Company's assets and liabilities. Basis risk exists when different parts of the balance sheet are subject to varying base rates reflecting the possibility that the spread from those base rates will deviate. Prepayment risk is associated with financial instruments with an option to prepay before the stated maturity, often a disadvantage to the person selling the option; this risk is most often associated with the prepayment of loans, callable investments and callable borrowings.

Asset/Liability Management

Market risk and interest-rate risk management are governed by the Company's Asset/Liability Committee ("ALCO"). The ALCO establishes exposure limits that define the Company's tolerance for interest-rate risk. The ALCO and the Company's Treasury Group measure and manage the composition of the balance sheet over a range of possible changes in interest rates while remaining responsive to market demand for loan and deposit products. The ALCO monitors current exposures versus limits and reports those results to the Board of Directors. The policy limits and guidelines serve as benchmarks for measuring interest-rate risk and for providing a framework for evaluation and interest-rate risk-management decision-making. The Company measures its interest-rate risk by using an asset/liability simulation model. The model considers several factors to determine the Company's potential exposure to interest-rate risk, including measurement of repricing gaps, duration, convexity, value-at-risk, market value of portfolio equity under assumed changes in the level of interest rates, the shape of yield curves, and general market volatility.

Management controls the Company's interest-rate exposure using several strategies, which include adjusting the maturities of securities in the Company's investment portfolio, limiting or expanding the terms of loans originated, limiting fixed-rate deposits with terms of more than five years, and adjusting maturities of FHLBB advances. The Company limits this risk by restricting the types of MBSs it invests in to those with limited average life changes under certain interest-rate-shock scenarios, or securities with embedded prepayment penalties. The Company also places limits on holdings of fixed-rate mortgage loans with maturities greater than five years. The Company also may use derivative instruments, principally interest-rate swaps, to manage its interest-rate risk; however, the Company had no derivative fair value hedges or derivative cash flows at March 31, 2016 or December 31, 2015. See Note 10, "Derivatives and Hedging Activities," to the unaudited consolidated financial statements.

Measuring Interest-Rate Risk

As noted above, interest-rate risk can be measured by analyzing the extent to which the repricing of assets and liabilities are mismatched to create an interest-rate sensitivity gap. An asset or liability is said to be interest-rate sensitive within a specific period if it will mature or reprice within that period. The interest-rate sensitivity gap is

defined as the difference between the amount of interest-earning assets maturing or repricing within a specific time period and the amount of interest-bearing liabilities maturing or repricing within that same time period. A gap is considered positive when the amount of interest-rate-sensitive assets exceeds the amount of interest-rate-sensitive liabilities. A gap is considered negative when the amount of interest-rate-sensitive liabilities exceeds the amount of interest-rate-sensitive assets. During a period of falling interest rates, therefore, a positive gap would tend to adversely affect net interest income. Conversely, during a period of rising interest rates, a positive gap position would tend to result in an increase in net interest income.

The Company's interest-rate risk position is measured using both income simulation and interest-rate sensitivity "gap" analysis. Income simulation is the primary tool for measuring the interest-rate risk inherent in the Company's balance sheet at a given point in time by showing the effect on net interest income, over a twelve-month period, of a variety of interest-rate shocks. These simulations take into account repricing, maturity, and prepayment characteristics of individual products. The

Table of Contents

ALCO reviews simulation results to determine whether the exposure resulting from changes in market interest rates remains within established tolerance levels over a twelve-month horizon, and develops appropriate strategies to manage this exposure. The Company's interest-rate risk analysis remains modestly asset-sensitive at March 31, 2016.

As of March 31, 2016, net interest income simulation indicated that the Company's exposure to changing interest rates was within tolerance. The ALCO reviews the methodology utilized for calculating interest-rate risk exposure and may periodically adopt modifications to this methodology. The following table presents the estimated impact of interest-rate changes on the Company's estimated net interest income over the twelve-month periods indicated:

Gradual Change in Interest Rate Levels	Estimated Exposure to Net Interest Income over Twelve-Month Horizon Beginning					
	March 31, 2016			December 31, 2015		
	Dollar Change	Percent Change	Dollar Change	Percent Change		
	(Dollars in Thousands)					
Up 300 basis points	6,412	3.2 %	11,616	5.9 %		
Up 200 basis points	4,417	2.2 %	8,144	4.2 %		
Up 100 basis points	2,277	1.2 %	4,246	2.2 %		
Down 100 basis points	(4,257)	(2.1)%	(8,852)	(4.5)%		

The estimated impact of a 300 basis points increase in market interest rates on the Company's estimated net interest income over a twelve-month horizon was a positive 3.2% at March 31, 2016, compared to a positive 5.9% at December 31, 2015. The increase in asset sensitivity was primarily due to incremental balance sheet growth funded with short term wholesale funding.

The Company also uses interest-rate sensitivity "gap" analysis to provide a more general overview of its interest-rate risk profile. The interest-rate sensitivity gap is defined as the difference between interest-earning assets and interest-bearing

liabilities maturing or repricing within a given time period. At March 31, 2016, the Company's one-year cumulative gap was a negative \$221.0 million, or 3.8% of total interest-earning assets, compared with a negative \$214.1 million, or 3.8% of total interest-earning assets, at December 31, 2015.

The assumptions used in the Company's interest-rate sensitivity simulation discussed above are inherently uncertain and, as a result, the simulations cannot precisely measure net interest income or precisely predict the impact of changes in interest rates. For additional discussion on interest-rate risk see Item 7A, "Quantitative and Qualitative Disclosures about Market Risk" of the Company's 2015 Annual Report on Form 10-K.

Economic Value of Equity ("EVE") at Risk Simulation is conducted in tandem with net interest income simulations, to ascertain a longer term view of the Company's interest-rate risk position by capturing longer-term repricing risk and options risk embedded in the balance sheet. It measures the sensitivity of the economic value of equity to changes in interest rates. The EVE at Risk Simulation values only the current balance sheet and does not incorporate growth assumptions. As with the net interest income simulation, this simulation captures product characteristics such as loan resets, repricing terms, maturity dates, and rate caps and floors. Key assumptions include loan prepayment speeds, deposit pricing elasticity and non-maturity deposit attrition rates. These assumptions can have significant impacts on valuation results as the assumptions remain in effect for the entire life of each asset and liability. The Company conducts non-maturity deposit behavior studies on a periodic basis to support deposit assumptions used in the valuation process. All key assumptions are subject to a periodic review.

EVE at Risk Simulation is calculated by estimating the net present value of all future cash flows from existing assets and liabilities using current interest rates as well as parallel shocks to the current interest-rate environment. The

following table sets forth the estimated percentage change in the Company's EVE at Risk Simulation, assuming various shifts in interest rates. Given the interest rate environment at March 31, 2016, simulations for interest rate declines of more than 100 basis points were not deemed to be meaningful.

85

Table of Contents

Parallel Shock in Interest Rate Levels	Estimated Percent Change in EVE at Risk			
	At	At		
	March 31, 2016	December 31, 2015		
Up 300%	8.8 %	7.1 %		
Up 200%	5.7 %	4.2 %		
Up 100%	2.9 %	2.0 %		
Down 100%	(6.3)%	(7.7 %)		

Item 4. Controls and Procedures

Controls and Procedures

Under the supervision and with the participation of the Company's Management, including the Company's Chief Executive Officer (Principal Executive Officer) and Chief Financial Officer (Principal Financial Officer), the Company has evaluated the effectiveness of its disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer considered that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is (i) recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's Management, including its Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There has been no change in the Company's internal control over financial reporting identified in connection with the quarterly evaluation that occurred during the Company's last fiscal quarter that has materially and detrimentally affected, or is reasonably likely to materially and detrimentally affect, the Company's internal controls over financial reporting.

The Company's Management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Exchange Act Rule 13a-15(f). The Company's internal control system was designed to provide reasonable assurance to its Management and the Board of Directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. The Company's Management assessed the effectiveness of its internal control over financial reporting as of the end of the period covered by this report.

Management's Report on Internal Control Over Financial Reporting as of December 31, 2015 and the related Report of Independent Registered Public Accounting Firm thereon appear on pages F-1 and F-2 of the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

There are no material pending legal proceedings other than those that arise in the normal course of business. In the opinion of Management, after consulting with legal counsel, the consolidated financial position and results of operations of the Company are not expected to be affected materially by the outcome of such proceedings.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in Item 1A of the Company's Form 10-K for the year ended December 31, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

- a) Not applicable.
