### NOTES TO SCHEDULE OF PORTFOLIO INVESTMENTS (UNAUDITED):

#### SECURITY VALUATION

Securities traded on a national securities exchange are valued at the last reported sales price on the day the valuations are made. Securities traded primarily on the NASDAQ Stock Market ("NASDAQ") are normally valued by the Fund at the NASDAQ Official Closing Price ("NOCP") provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. Such securities that are not traded on a particular day, securities traded in the over-the-counter market that are not on NASDAQ, and foreign securities are valued at the mean between the current bid and asked prices. Certain of the securities in which the Fund invests are priced through pricing services that may utilize a matrix pricing system which takes into consideration factors such as yields, prices, maturities, call features, and ratings on comparable securities. Bonds may be valued according to prices quoted by a dealer in bonds that offers pricing services. Debt obligations with remaining maturities of 60 days or less are valued at cost adjusted for amortization of premiums and accretion of discounts. Securities for which quotations are not readily available or reliable and other assets may be valued as determined in good faith under the direction of and pursuant to procedures established by the Fund's Board of Directors.

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("FAS 157") on January 1, 2008. FAS 157 defines fair value as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. FAS 157 establishes a framework for measuring fair value and a three level hierarchy for fair value measurements based on the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The Fund's investment in its entirety is assigned a level based upon the inputs which are significant to the overall valuation. The hierarchy of inputs is summarized below.

- Level 1 - quoted prices in active markets for identical investments
- Level 2 - other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining fair value of investments)

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

## Edgar Filing: FOXYBY CORP. - Form N-Q

The following is a summary of the inputs used as of March 31, 2008 in valuing the Fund's investments:

### **ILLIQUID AND RESTRICTED SECURITIES**

Edgar Filing: FOXBY CORP. - Form N-Q

The Fund owns securities which have a limited trading market and/or certain restrictions on trading and, therefore, may be illiquid and/or restricted. Such securities have been valued at fair value in accordance with the procedures described above. Due to the uncertainty of valuation, these values may differ from the values that would have been used had a ready market for these securities existed and these differences could be material. Illiquid and/or restricted securities owned at March 31, 2008, were as follows:

Security	Acquisition Date	Cost	Value
