

UMPQUA HOLDINGS CORP
Form 10-Q
May 03, 2019
United States
Securities and Exchange Commission
Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
for the quarterly period ended: March 31, 2019

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
for the transition period from _____ to _____.

Commission File Number: 001-34624

Umpqua Holdings Corporation
(Exact Name of Registrant as Specified in Its Charter)
OREGON 93-1261319
(State or Other Jurisdiction (I.R.S. Employer Identification Number)
of Incorporation or Organization)

One SW Columbia Street, Suite 1200
Portland, Oregon 97258
(Address of Principal Executive Offices)(Zip Code)

(503) 727-4100
(Registrant's Telephone Number, Including Area Code)

Securities registered pursuant to Section 12(b) of the Act:

TITLE OF EACH CLASS	TRADING SYMBOL	NAME OF EXCHANGE
Common Stock	UMPQ	The NASDAQ Global Select Market

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer
 Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to section 13(a) of the

Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding for each of the issuer's classes of common stock, as of the latest practical date:

Common stock, no par value: 220,483,700 shares outstanding as of April 30, 2019

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 – Summary of Significant Accounting Policies

The accounting and financial reporting policies of Umpqua Holdings Corporation conform to accounting principles generally accepted in the United States of America. The accompanying interim condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All inter-company balances and transactions have been eliminated. The condensed consolidated financial statements have not been audited. A more detailed description of our accounting policies is included in the 2018 Annual Report filed on Form 10-K. These interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes contained in the 2018 Annual Report filed on Form 10-K. All references in this report to "Umpqua," "we," "our," "us," the "Company" or similar references mean Umpqua Holdings Corporation and include our consolidated subsidiaries where the context so requires. References to "Bank" refer to our subsidiary Umpqua Bank, an Oregon state-chartered commercial bank, and references to "Umpqua Investments" refer to our subsidiary Umpqua Investments, Inc., a registered broker-dealer and investment adviser. The Bank also has a wholly-owned subsidiary, Financial Pacific Leasing Inc. ("FinPac"), a commercial equipment leasing company.

In preparing these condensed consolidated financial statements, the Company has evaluated events and transactions subsequent to March 31, 2019 for potential recognition or disclosure. In management's opinion, all accounting adjustments necessary to accurately reflect the financial position and results of operations on the accompanying financial statements have been made. These adjustments include normal and recurring accruals considered necessary for a fair and accurate presentation. The results for interim periods are not necessarily indicative of results for the full year or any other interim period.

Correction of Prior Period Balances

Subsequent to the issuance of the Company's March 31, 2018 condensed consolidated financial statements, the Company's management determined that the calculation and corresponding recognition of the accretion of the purchase accounting discount on the loans acquired from Sterling Financial Corporation (ASC 310-20 loans) that were not impaired was calculated in a manner that was considered to be inconsistent with accounting principles generally accepted in the United States of America as indicated in ASC 310-20. As a result, the financial statements have been restated to reflect the correction of the difference in accretion/amortization related to the loans acquired. Management believes that the effect of this restatement is not material to our previously issued consolidated financial statements. As a result, the condensed consolidated statement of income has been revised to reflect this change to the applicable line items as follows.

(in thousands, except per share amounts)	Three Months Ended March 31, 2018		
	As Originally Reported	Adjustment	As Revised
Interest and fees on loans and leases	\$227,738	\$ 1,750	\$229,488
Total interest income	247,197	1,750	248,947
Net interest income	223,231	1,750	224,981
Net interest income after provision for loan and lease losses	209,575	1,750	211,325
Income before provision for income taxes	102,029	1,750	103,779
Provision for income taxes	24,360	447	24,807
Net income	\$77,669	\$ 1,303	\$78,972
Earnings per common share:			

Basic	\$0.35	\$0.01	\$0.36
Diluted	\$0.35	\$0.01	\$0.36

The condensed consolidated statement of changes in stockholders' equity and condensed consolidated statement of comprehensive income have been updated to reflect the change in net income for the three months ended March 31, 2018. Comprehensive income increased by \$1.3 million for the three months ended March 31, 2018 to \$46.3 million. The condensed consolidated statement of cash flows has also been updated to reflect these changes, resulting in an increase in cash flows provided by operating activities for March 31, 2018 of \$1.8 million to reflect the increase in net income and the change in other liabilities (deferred tax liability) and a corresponding increase in the cash flows used in investing activities of \$1.8 million for March 31, 2018 as part of the net change in loans and leases.

Table of Contents

Application of new accounting guidance

As of January 1, 2019, Umpqua adopted the Financial Accounting Standard Board's ("FASB") Accounting Standard Update ("ASU") No. 2016-02, Leases (Topic 842) as well as additional ASUs for enhancement, clarification or transition of the new lease standard (collectively "ASC 842"). ASC 842 requires lessees, among other things, to recognize lease assets and lease liabilities on the balance sheet for those leases classified as operating leases under previous authoritative guidance. This update also introduces new disclosure requirements for leasing arrangements. Refer to Note 11 - Leases for further discussion of Umpqua's accounting policies for leases within the scope of ASC 842.

ASC 842 provides for a number of practical expedients in transition. We have elected the package of practical expedients, which permits us to not reassess under the new standard our prior conclusions about lease identification, lease classification and initial direct costs. The Company did not elect the use-of-hindsight or the practical expedient pertaining to land easement; the latter not being applicable to us. The Company also did not elect the practical expedient to not separate lease and non-lease components on our real estate leases where we are the lessee.

In addition, ASC 842 provides practical expedients for an entity's ongoing accounting. The Company has elected the short-term lease recognition exemption for certain leases. This means, for those leases that have a term of less than 12 months, we will not recognize right-of-use ("ROU") assets or lease liabilities.

Umpqua adopted ASC 842 using the prospective approach without corresponding changes in the comparable prior periods. Consequently, financial information will not be updated, and the disclosures required under the new standard will not be provided for dates and periods before January 1, 2019. Adoption of the new standard resulted in the recognition of new lease ROU assets of \$109.8 million and lease liabilities of \$118.5 million on the balance sheet for our operating leases as of March 31, 2019. The difference between the additional lease assets and lease liabilities, net of the deferred tax impact, was recorded as an adjustment to retained earnings. This standard did not materially impact our consolidated net income and had no impact on cash flows.

In August 2018, the FASB issued ASU No. 2018-15, Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Contract (A Consensus of the FASB Emerging Issues Task Force). This ASU reduces complexity for the accounting for costs of implementing a cloud computing service arrangement. This ASU aligns the requirements for capitalization of implementation costs incurred in a hosting arrangement that is a service contract with those incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). The ASU requires an entity in a hosting arrangement that is a service contract to follow the guidance in Subtopic 350-40 to determine which implementation costs to capitalize as an asset related to the service contract and which costs to expense. Costs to develop or obtain internal use software that cannot be capitalized under subtopic 350-40, such as training costs and certain data conversion costs, also cannot be capitalized for a hosting arrangement that is a service contract. The capitalized costs will be amortized over the life of the service contract. The amendments in this ASU should be applied either retrospectively or prospectively to all implementation costs incurred after the date of adoption. The ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted. The Company early adopted the ASU as of January 1, 2019 and will apply the new standard prospectively. The guidance did not have a material impact on the Company's consolidated financial statements.

Table of Contents

Recent accounting pronouncements

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments —Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The ASU is intended to improve financial reporting by requiring timelier recording of credit losses on loans and other financial instruments held by financial institutions and other organizations. The ASU requires the measurement of all expected credit losses for certain financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates, but will continue to use judgment to determine which loss estimation method is appropriate for their circumstances. The ASU requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. These disclosures include qualitative and quantitative requirements that provide additional information about the amounts recorded in the financial statements. In addition, the ASU amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early application will be permitted for specified periods. The Company has an established cross-functional team and project management governance process in place to manage implementation of this new guidance. The team continues to work on implementation and is finalizing model build and validation, documenting process flow and controls, and has begun parallel runs. The new guidance may result in an increase in the allowance for loan and lease losses; however, the Company is still in the process of determining the magnitude of the change and its impact on the Company's consolidated financial statements.

Note 2 – Investment Securities

The following tables present the amortized costs, unrealized gains, unrealized losses and approximate fair values of investment securities at March 31, 2019 and December 31, 2018:

(in thousands)	March 31, 2019			Fair Value

	\$3,606	\$ 1,038	\$—	\$4,644

Table of Contents

Investment securities that were in an unrealized loss position as of March 31, 2019 and December 31, 2018 are presented in the following tables, based on the length of time individual securities have been in an unrealized loss position.

(in thousands)	March 31, 2019					
	Less than 12 Months		12 Months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
AVAILABLE FOR SALE:						
U.S. Treasury and agencies	\$—	\$ —	\$19,789	\$ 209	\$19,789	\$ 209
Obligations of states and political subdivisions	—	—	35,434	671	35,434	671
Residential mortgage-backed securities and collateralized mortgage obligations	90,992	1,148	2,090,133	46,194	2,181,125	47,342
Total temporarily impaired securities	\$90,992	\$ 1,148	\$2,145,356	\$ 47,074	\$2,236,348	\$ 48,222

(in thousands)	December 31, 2018					
	Less than 12 Months		12 Months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
AVAILABLE FOR SALE:						
U.S. Treasury and agencies	\$—	\$ —	\$39,656	\$ 346	\$39,656	\$ 346
Obligations of states and political subdivisions	59,963	800	38,691	1,786	98,654	2,586
Residential mortgage-backed securities and collateralized mortgage obligations	332,103	5,432	1,992,546	66,790	2,324,649	72,222
Total temporarily impaired securities	\$392,066	\$ 6,232	\$2,070,893	\$ 68,922	\$2,462,959	\$ 75,154

The unrealized losses on U.S. treasury and agencies securities are due to increases in market interest rates and not due to the underlying credit of the issuers. The unrealized losses on obligations of states and political subdivisions were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities. Management monitors the published credit ratings of these securities for material rating or outlook changes. Substantially all of the Company's obligations of states and political subdivisions are general obligation issuances. All of the available for sale residential mortgage-backed securities and collateralized mortgage obligations portfolio in an unrealized loss position at March 31, 2019 are issued or guaranteed by government sponsored enterprises. The unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities, and not concerns regarding the underlying credit of the issuers or the underlying collateral. It is expected that these securities will be settled at a price at least equal to the amortized cost of each investment.

Because the unrealized loss is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities and it is not more likely than not that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until maturity, these investments are not considered other-than-temporarily impaired.

Table of Contents

The following table presents the contractual maturities of investment securities at March 31, 2019:

(in thousands)	Available For Sale		Held To Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due within one year	\$1,414	\$1,426	\$—	\$—
Due after one year through five years	93,154	93,223	—	—
Due after five years through ten years	377,171	375,130	14	14

Consumer & other, net	552,064	587,170
Total loans, net of deferred fees and costs	\$20,405,997	\$20,422,666

The loan balances are net of deferred fees and costs of \$71.1 million and \$70.4 million as of March 31, 2019 and December 31, 2018, respectively. Net loans also include discounts on acquired loans of \$45.4 million and \$50.0 million as of March 31, 2019 and December 31, 2018, respectively. As of March 31, 2019, loans totaling \$13.2 billion were pledged to secure borrowings and available lines of credit.

The outstanding contractual unpaid principal balance of purchased impaired loans, excluding acquisition accounting adjustments, was \$170.8 million and \$183.7 million at March 31, 2019 and December 31, 2018, respectively. The carrying balance of purchased impaired loans was \$123.8 million and \$134.5 million at March 31, 2019 and December 31, 2018, respectively.

Table of Contents

The following table presents the changes in the accretable yield for purchased impaired loans for the three months ended March 31, 2019 and 2018:

(in thousands)	Three Months Ended	
	March 31, 2019	March 31, 2018
Balance, beginning of period	\$56,564	\$74,268
Accretion to interest income	(4,885)	(8,778)
Disposals	(2,343)	(5,016)
Reclassifications from non-accretable difference	1,737	6,203
Balance, end of period	\$51,073	\$66,677

Umpqua, through its commercial equipment leasing subsidiary, FinPac, is a direct provider of commercial equipment leasing and financing throughout the United States, originating business through three distinct channels: small and mid-ticket third party originators, vendor finance, and Umpqua Bank Equipment Leasing & Finance. All of these leases typically have terms of three to five years and are considered to be direct financing leases. Interest income recognized on these leases is \$8.4 million for the three-months ended March 31, 2019.

Residual values on leases are established at the time equipment is leased based on an estimate of the value of the leased equipment when the Company expects to dispose of the equipment, typically at the termination of the lease. An annual evaluation is also performed each fiscal year by an independent valuation specialist and equipment residuals are confirmed or adjusted in conjunction with such evaluation.

The following table presents the net investment in direct financing leases and loans as of March 31, 2019 and December 31, 2018:

(in thousands)	March 31, December 31,	
	2019	2018
Minimum lease payments receivable	\$443,586	\$450,258
Estimated guaranteed and unguaranteed residual values	79,934	79,455

Note 4 – Allowance for Loan and Lease Loss and Credit Quality

The Bank's methodology for assessing the appropriateness of the Allowance for Loan and Lease Loss ("ALLL") consists of three key elements: 1) the formula allowance; 2) the specific allowance; and 3) the unallocated allowance. By incorporating these factors into a single allowance requirement analysis, we believe all risk-based activities within the loan and lease portfolios are simultaneously considered.

Formula Allowance

When loans and leases are originated or acquired, they are assigned a risk rating that is reassessed periodically during the term of the loan or lease through the credit review process. The Bank's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating categories are a primary factor in determining an appropriate amount for the formula allowance.

The formula allowance is calculated by applying risk factors that represent our estimate of incurred losses to various segments of pools of outstanding loans and leases. Risk factors are assigned to each portfolio segment based on management's evaluation of the losses inherent within each segment. Segments with greater risk of loss will therefore be assigned a higher risk factor.

Base risk – The portfolio is segmented into loan categories, and these categories are assigned a Base risk factor based on an evaluation of the loss inherent within each segment.

Extra risk – Additional risk factors provide for an additional allocation of ALLL based on the loan and lease risk rating system and loan delinquency, and reflect the increased level of inherent losses associated with more adversely classified loans and leases.

Risk factors may be changed periodically based on management's evaluation of the following factors: loss experience; changes in the level of non-performing loans and leases; regulatory exam results; changes in the level of adversely classified loans and leases; improvement or deterioration in economic conditions; and any other factors deemed relevant. Additionally, Financial Pacific Leasing Inc. considers additional quantitative and qualitative factors: migration analysis; a static pool analysis of historic recoveries; and forecasting uncertainties. A migration analysis is a

technique used to estimate the likelihood that an account will progress through the various delinquency states and ultimately be charged off.

Table of Contents

Specific Allowance

Regular credit reviews of the portfolio identify loans that are considered potentially impaired. Potentially impaired loans are referred to the ALLL Committee which reviews and approves designated loans as impaired. A loan is considered impaired when, based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When we identify a loan as impaired, we measure the impairment using discounted cash flows or estimated note sale price, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we either recognize an impairment reserve as a specific allowance to be provided for in the allowance for loan and lease losses or charge-off the impaired balance on collateral-dependent loans if it is determined that such amount represents a confirmed loss. Loans determined to be impaired are excluded from the formula allowance so as not to double-count the loss exposure.

The combination of the formula allowance component and the specific allowance component represents the allocated allowance for loan and lease losses. There was no unallocated allowance as of March 31, 2019 and December 31, 2018.

The reserve for unfunded commitments ("RUC") is established to absorb inherent losses associated with our commitment to lend funds, such as with a letter or line of credit. The adequacy of the ALLL and RUC are monitored on a regular basis and are based on management's evaluation of numerous factors. These factors include the quality of the current loan portfolio; the trend in the loan portfolio's risk ratings; current economic conditions; loan concentrations; loan growth rates; past-due and non-performing trends; evaluation of specific loss estimates for all significant problem loans; historical charge-off and recovery experience; and other pertinent information.

There have been no significant changes to the Bank's ALLL methodology or policies in the periods presented.

Activity in the Allowance for Loan and Lease Losses

The following tables summarize activity related to the allowance for loan and lease losses by loan and lease portfolio segment for the three months ended March 31, 2019 and 2018:

(in thousands)	Three Months Ended March 31, 2019				
	Commercial Real Estate	Commercial	Residential	Consumer & Other	Total

March 31, 2018	\$5,085,021

Table of Contents

Asset Quality and Non-Performing Loans and Leases

We manage asset quality and control credit risk through diversification of the loan and lease portfolio and the application of policies designed to promote sound underwriting and loan and lease monitoring practices. The Bank's Credit Quality Administration is charged with monitoring asset quality, establishing credit policies and procedures and enforcing the consistent application of these policies and procedures across the Bank. Reviews of non-performing, past due loans and leases and larger credits, designed to identify potential charges to the allowance for loan and lease losses, and to determine the adequacy of the allowance, are conducted on an ongoing basis. These reviews consider such factors as the financial strength of borrowers, the value of the applicable collateral, loan and lease loss experience, estimated loan and lease losses, growth in the loan and lease portfolio, prevailing economic conditions and other factors.

Non-Accrual Loans and Leases and Loans and Leases Past Due

The following tables summarize our non-accrual loans and leases and loans and leases past due, by loan and lease class, as of March 31, 2019 and December 31, 2018:

⁽¹⁾ Other includes purchased credit impaired loans of \$134.5 million.

⁽²⁾ Includes government guaranteed GNMA mortgage loans that Umpqua has the right but not the obligation to repurchase that are past due 90 days or more, totaling \$8.9 million at December 31, 2018.

Impaired Loans

Loans with no related allowance reported generally represent non-accrual loans, which are also considered impaired loans. The Bank recognizes the charge-off on impaired loans in the period it arises for collateral-dependent loans. Therefore, the non-accrual loans as of March 31, 2019 have already been written down to their estimated net realizable value and are expected to be resolved with no additional material loss, absent further decline in net realizable value. The valuation allowance on impaired loans primarily represents the impairment reserves on performing restructured loans, and is measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value.

Table of Contents

Credit Quality Indicators

As previously noted, the Bank's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The Bank differentiates its lending portfolios into homogeneous loans and leases and non-homogeneous loans and leases. Homogeneous loans and leases are not risk rated until they are greater than 30 days past due, and risk rating is based on the past due status of the loan or lease. The 10 risk rating categories can be generally described by the following groupings for loans and leases:

Minimal Risk—A minimal risk loan or lease, risk rated 1, is to a borrower of the highest quality. The borrower has an unquestioned ability to produce consistent profits and service all obligations and can absorb severe market disturbances with little or no difficulty.

Low Risk—A low risk loan or lease, risk rated 2, is similar in characteristics to a minimal risk loan. Margins may be smaller or protective elements may be subject to greater fluctuation. The borrower will have a strong demonstrated ability to produce profits, provide ample debt service coverage and to absorb market disturbances.

Modest Risk—A modest risk loan or lease, risk rated 3, is a desirable loan or lease with excellent sources of repayment and no currently identifiable risk associated with collection. The borrower exhibits a very strong capacity to repay the credit in accordance with the repayment agreement. The borrower may be susceptible to economic cycles, but will have reserves to weather these cycles.

Average Risk—An average risk loan or lease, risk rated 4, is an attractive loan or lease with sound sources of repayment and no material collection or repayment weakness evident. The borrower has an acceptable capacity to pay in accordance with the agreement. The borrower is susceptible to economic cycles and more efficient competition, but should have modest reserves sufficient to survive all but the most severe downturns or major setbacks.

Acceptable Risk—An acceptable risk loan or lease, risk rated 5, is a loan or lease with lower than average, but still acceptable credit risk. These borrowers may have higher leverage, less certain but viable repayment sources, have limited financial reserves and may possess weaknesses that can be adequately mitigated through collateral, structural or credit enhancement. The borrower is susceptible to economic cycles and is less resilient to negative market forces or financial events. Reserves may be insufficient to survive a modest downturn.

Watch—A watch loan or lease, risk rated 6, is still pass-rated, but represents the lowest level of acceptable risk due to an emerging risk element or declining performance trend. Watch ratings are expected to be temporary, with issues resolved or manifested to the extent that a higher or lower rating would be appropriate. The borrower should have a plausible plan, with reasonable certainty of success, to correct the problems in a short period of time.

Special Mention—A special mention loan or lease, risk rated 7, has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or the institution's credit position at some future date. They contain unfavorable characteristics and are generally undesirable. Loans and leases in this category are currently protected but are potentially weak and constitute an undue and unwarranted credit risk, but not to the point of a substandard classification. A special mention loan or lease has potential weaknesses, which if not checked or corrected, weaken the asset or inadequately protect the Bank's position at some future date. For commercial and commercial real estate homogeneous loans and leases to be classified as special mention, risk rated 7, the loan or lease is greater than 30 to 59 days past due from the required payment date at month-end. Residential and consumer and other homogeneous loans are risk rated 7, when the loan is greater than 30 to 89 days past due from the required payment date at month-end.

Table of Contents

Substandard—A substandard asset, risk rated 8, is inadequately protected by the current worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets classified substandard. Loans and leases are classified as substandard when they have unsatisfactory characteristics causing unacceptable levels of risk. A substandard loan or lease normally has one or more well-defined weaknesses that could jeopardize repayment of the debt. The likely need to liquidate assets to correct the problem, rather than repayment from successful operations is the key distinction between special mention and substandard. Commercial and commercial real estate homogeneous loans and leases are classified as a substandard loan or lease, risk rated 8, when the loan or lease is 60 to 89 days past due from the required payment date at month-end. Residential and consumer and other homogeneous loans are classified as a substandard loan, risk rated 8, when an open-end loan is 90 to 180 days past due from the required payment date at month-end or when a closed-end loan 90 to 120 days is past due from the required payment date at month-end.

Doubtful—Loans or leases classified as doubtful, risk rated 9, have all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors, which may work towards strengthening of the asset, classification as a loss (and immediate charge-off) is deferred until more exact status may be determined. Pending factors include proposed merger, acquisition, liquidation procedures, capital injection, and perfection of liens on additional collateral and refinancing plans. In certain circumstances, a doubtful rating will be temporary, while the Bank is awaiting an updated collateral valuation. In these cases, once the collateral is valued and appropriate margin applied, the remaining un-collateralized portion will be charged-off. The remaining balance, properly margined, may then be upgraded to substandard, however must remain on non-accrual. Commercial and commercial real estate homogeneous doubtful loans or leases, risk rated 9, are 90 to 179 days past due from the required payment date at month-end.

Loss—Loans or leases classified as loss, risk rated 10, are considered un-collectible and of such little value that the continuance as an active Bank asset is not warranted. This rating does not mean that the loan or lease has no recovery or salvage value, but rather that the loan or lease should be charged-off now, even though partial or full recovery may be possible in the future. For a commercial or commercial real estate homogeneous loss loan or lease to be risk rated 10, the loan or lease is 180 days and more past due from the required payment date. These loans are generally charged-off in the month in which the 180 day time period elapses. Residential, consumer and other homogeneous loans are risk rated 10, when a loan becomes past due 120 cumulative days from the contractual due date. Residential and consumer loans secured by real estate are generally charged down to net realizable value in the month in which the loan becomes 180 days past due. All other residential, consumer, and other homogeneous loans are generally charged-off in the month in which the 120 day period elapses.

Impaired—Loans are classified as impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal and interest when due, in accordance with the terms of the original loan agreement, without unreasonable delay. This generally includes all loans classified as non-accrual and troubled debt restructurings. Impaired loans are risk rated for internal and regulatory rating purposes, but presented separately for clarification.

Table of Contents

Troubled Debt Restructurings

At March 31, 2019 and December 31, 2018, impaired loans of \$15.7 million and \$13.9 million, respectively, were classified as accruing restructured loans. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. In order for a newly restructured loan to be considered for accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan is current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow. Impaired restructured loans carry a specific allowance and the allowance on impaired restructured loans is calculated consistently across the portfolios.

There were \$1.1 million in available commitments for troubled debt restructurings outstanding as of March 31, 2019 and \$338,000 as of December 31, 2018.

The following tables present troubled debt restructurings by accrual versus non-accrual status and by loan class as of March 31, 2019 and December 31, 2018:

(in thousands)	March 31, 2019		
	Accrual	Non-Accrual	Total
	Status	Status	Modifications
Commercial real estate, net	\$4,509	\$ 6,716	\$ 11,225
Commercial, net	5,589	7,243	12,832
Residential, net	5,628	—	5,628
Total, net of deferred fees and costs	\$ 15,726	\$ 13,959	\$ 29,685

(in thousands)	December 31, 2018		
	Accrual	Non-Accrual	Total
	Status	Status	Modifications
Commercial real estate, net	\$4,524	\$ 9,290	\$ 13,814
Commercial, net	3,696	8,736	12,432
Residential, net	5,704	—	5,704
Total, net of deferred fees and costs	\$ 13,924	\$ 18,026	\$ 31,950

The Bank's policy is that loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospect for future payment in accordance with the loan agreement appears relatively certain. The Bank's policy generally refers to six months of payment performance as sufficient to warrant a return to accrual status.

The following tables present newly restructured loans that occurred during the three months ended March 31, 2019 and 2018:

(in thousands)	Three Months Ended March 31, 2019				
	Rate	Interest Only	Payment	Combination	Total
	Modifications	Modifications	Modifications	Modifications	Modifications

Residential, net	\$—	—\$	—\$	—\$ 106	\$ 106

Total, net of deferred fees and costs	\$—	—\$	—\$	—\$ 106	\$ 106
---------------------------------------	-----	-----	-----	---------	--------

Table of Contents

For the periods presented in the tables above, the outstanding recorded investment was the same pre and post modification. There were no financing receivables modified as troubled debt restructurings within the previous 12 months for which there was a payment default during the three months ended March 31, 2019. There were \$10.2 million in financing receivables modified as troubled debt restructurings within the previous 12 months for which there was a payment default during the three months ended March 31, 2018.

Note 5 – Residential Mortgage Servicing Rights

The following table presents the changes in the Company's residential mortgage servicing rights ("MSR") for the three months ended March 31, 2019 and 2018:

(in thousands)	Three Months Ended	
	March 31, 2019	March 31, 2018
Balance, beginning of period	\$ 169,025	\$ 153,151
Additions for new MSR capitalized	3,887	6,530
Changes in fair value:		
Due to changes in model inputs or assumptions ⁽¹⁾	(8,874)	14,933
Other ⁽²⁾	(5,092)	(9,854)
Balance, end of period	\$ 158,946	\$ 164,760

⁽¹⁾ Principally reflects changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.

⁽²⁾ Represents changes due to collection/realization of expected cash flows over time.

Information related to our serviced loan portfolio as of March 31, 2019 and December 31, 2018 is as follows:

(dollars in thousands)	March 31, 2019	December 31, 2018
Balance of loans serviced for others	\$ 15,902,587	\$ 15,978,885
MSR as a percentage of serviced loans	1.00 %	1.06 %

The amount of contractually specified servicing fees, late fees and ancillary fees earned, recorded in residential mortgage banking revenue, was \$10.8 million and \$10.5 million for the three months ended March 31, 2019 and March 31, 2018, respectively.

Note 6 – Commitments and Contingencies

Financial Instruments with Off-Balance-Sheet Risk — The Company's financial statements do not reflect various commitments and contingent liabilities that arise in the normal course of the Bank's business and involve elements of credit, liquidity, and interest rate risk.

The following table presents a summary of the Bank's commitments and contingent liabilities:

(in thousands)	As of March 31, 2019
Commitments to extend credit	\$5,445,264
Forward sales commitments	\$440,814
Commitments to originate residential mortgage loans held for sale	\$252,182
Standby letters of credit	\$65,710

The Bank is a party to financial instruments with off-balance-sheet credit risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and financial guarantees. Those instruments involve elements of credit and interest-rate risk similar to the risk involved in on-balance sheet items. The contract or notional amounts of those instruments reflect the extent of the Bank's involvement in particular classes of financial instruments.

26

Table of Contents

The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit, and financial guarantees written, is represented by the contractual notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

There were no financial guarantees in connection with standby letters of credit that the Bank was required to perform on during the three months ended March 31, 2019 and March 31, 2018. At March 31, 2019, approximately \$53.0 million of standby letters of credit expire within one year, and \$12.7 million expire thereafter.

Residential mortgage loans sold into the secondary market are sold with limited recourse against the Company, meaning that the Company may be obligated to repurchase or otherwise reimburse the investor for incurred losses on any loans that suffer an early payment default, are not underwritten in accordance with investor guidelines or are determined to have pre-closing borrower misrepresentations. As of March 31, 2019, the Company had a residential mortgage loan repurchase reserve liability of \$1.7 million. For loans sold to GNMA, the Bank has a unilateral right, but not the obligation, to repurchase loans that are past due 90 days or more. As of March 31, 2019, the Bank has recorded a liability for the loans subject to this repurchase right of \$158,000, and has recorded these loans as part of the loan portfolio as if we had repurchased these loans.

Legal Proceedings—Umpqua is involved in legal proceedings occurring in the ordinary course of business. Based on information currently available, advice of counsel and available insurance coverage, we believe that the eventual outcome of actions against the Company or its subsidiaries will not, individually or in the aggregate, have a material adverse effect on our consolidated financial condition. However, it is possible that the ultimate resolution of a matter, if unfavorable, may be material to our results of operations for any particular period.

Contingencies—In late 2017, the Company launched "Umpqua Next Gen," an initiative designed to modernize and evolve the Bank focusing on operational excellence, balanced growth and human-digital programs. As part of this initiative, the Company evaluated every part of our operations and how we could evolve to deliver a highly differentiated and compelling banking experience. In 2018, Umpqua consolidated 31 stores. During the three months ended March 31, 2019, Umpqua consolidated 11 stores and sold 4 stores. Umpqua will consolidate an additional 4 stores in the second quarter of 2019. The Next Gen strategy involves evaluation of possible future consolidations.

Concentrations of Credit Risk— The Bank grants real estate mortgage, real estate construction, commercial, agricultural and installment loans and leases to customers throughout Oregon, Washington, California, Idaho, and Nevada. In management's judgment, a concentration exists in real estate-related loans, which represented approximately 75% of the Bank's loan and lease portfolio at March 31, 2019 and December 31, 2018. Commercial real estate concentrations are managed to assure wide geographic and business diversity. Although management believes such concentrations have no more than the normal risk of collectability, a substantial decline in the economy in general, material increases in interest rates, changes in tax policies, tightening credit or refinancing markets, or a decline in real estate values in the Bank's primary market areas in particular, could have an adverse impact on the repayment of these loans. Personal and business incomes, proceeds from the sale of real property, or proceeds from refinancing, represent the primary sources of repayment for a majority of these loans.

The Bank recognizes the credit risks inherent in dealing with other depository institutions. Accordingly, to prevent excessive exposure to any single correspondent, the Bank has established general standards for selecting correspondent banks as well as internal limits for allowable exposure to any single correspondent. In addition, the Bank has an investment policy that sets forth limitations that apply to all investments with respect to credit rating and concentrations with an issuer.

Note 7 – Derivatives

The Bank may use derivatives to hedge the risk of changes in the fair values of interest rate lock commitments and residential mortgage loans held for sale. None of the Company's derivatives are designated as hedging instruments. Rather, they are accounted for as free-standing derivatives, or economic hedges, with changes in the fair value of the derivatives reported in income. The Company primarily utilizes forward interest rate contracts in its derivative risk management strategy.

Table of Contents

The Bank enters into forward delivery contracts to sell residential mortgage loans or mortgage-backed securities to broker/dealers at specific prices and dates in order to hedge the interest rate risk in its portfolio of mortgage loans held for sale and its residential mortgage loan commitments. Credit risk associated with forward contracts is limited to the replacement cost of those forward contracts in a gain position. There were no counterparty default losses on forward contracts in the three months ended March 31, 2019 and 2018. Market risk with respect to forward contracts arises principally from changes in the value of contractual positions due to changes in interest rates. The Bank limits its exposure to market risk by monitoring differences between commitments to customers and forward contracts with broker/dealers. In the event the Company has forward delivery contract commitments in excess of available mortgage loans, the Company completes the transaction by either paying or receiving a fee to or from the broker/dealer equal to the increase or decrease in the market value of the forward contract. At March 31, 2019, the Bank had commitments to originate mortgage loans held for sale totaling \$252.2 million and forward sales commitments of \$440.8 million, which are used to hedge both on-balance sheet and off-balance sheet exposures.

The Bank executes interest rate swaps with commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting the interest rate swaps that the Bank executes with a third party, such that the Bank minimizes its net risk exposure. As of March 31, 2019, the Bank had 767 interest rate swaps with an aggregate notional amount of \$4.3 billion related to this program. As of December 31, 2018, the Bank had 767 interest rate swaps with an aggregate notional amount of \$4.2 billion related to this program.

At March 31, 2019 and December 31, 2018, the termination value of derivatives in a net liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$7.7 million and \$12.7 million, respectively. The Bank has collateral posting requirements for initial margins with its clearing members and clearing houses and has been required to post collateral against its obligations under these agreements of \$55.6 million and \$36.9 million as of March 31, 2019 and December 31, 2018, respectively.

Umpqua's interest rate swap derivatives are cleared through the Chicago Mercantile Exchange and London Clearing House. These clearing houses characterize the variation margin payments, for derivative contracts that are referred to as settled-to-market, as settlements of the derivative's mark-to-market exposure and not collateral. Umpqua accounts for the variation margin as an adjustment to our cash collateral, as well as a corresponding adjustment to our derivative asset and liability. As of March 31, 2019, the variation margin adjustment was a negative adjustment of \$73.0 million as compared to a negative adjustment of \$32.5 million at December 31, 2018.

The Bank incorporates credit valuation adjustments ("CVA") to appropriately reflect nonperformance risk in the fair value measurement of its derivatives. The net CVA decreased the settlement values of the Bank's net derivative assets by \$5.5 million and \$3.0 million as of March 31, 2019 and December 31, 2018, respectively. Various factors impact changes in the CVA over time, including changes in the credit spreads of the parties to the contracts, as well as changes in market rates and volatilities, which affect the total expected exposure of the derivative instruments.

The Bank also executes foreign currency hedges as a service for customers. These foreign currency hedges are then offset with hedges with other third-party banks to limit the Bank's risk exposure.

The following table summarizes the types of derivatives, separately by assets and liabilities, and the fair values of such derivatives as of March 31, 2019 and December 31, 2018:

(in thousands)	Asset Derivatives		Liability Derivatives	
	March 31, 2019	December 31, 2018	March 31, 2019	December 31, 2018
Derivatives not designated as hedging instrument				

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Interest rate lock commitments	\$8,174	\$ 6,757	\$—	\$—
Interest rate forward sales commitments	28	1	3,226	2,963

Table of Contents

The following table summarizes the types of derivatives and the gains (losses) recorded during the three months ended March 31, 2019 and 2018:

(in thousands)	Three Months Ended	
	March 31, 2019	March 31, 2018
Derivatives not designated as hedging instrument		
Interest rate lock commitments	\$1,416	\$ 1,122
Interest rate forward sales commitments	(4,727)	8,244
Interest rate swaps	(2,480)	1,131
Foreign currency derivatives	471	335
Total	\$(5,320)	\$ 10,832

The gains and losses on the Company's mortgage banking derivatives are included in mortgage banking revenue. The gains and losses on the Company's interest rate swaps and foreign currency derivatives are included in other income.

The following table summarizes the derivatives that have a right of offset as of March 31, 2019 and December 31, 2018:

(in thousands)	Gross Amounts of Recognized Assets/Liabilities	Gross Amounts Offset in the Statement of Financial Position	Net Amounts of Assets/Liabilities presented in the Statement of Financial Position	Gross Amounts Not Offset in the Statement of Financial Position		
				Financial Instruments	Collateral Posted	Net Amount

Note 8 – Earnings Per Common Share

The following is a computation of basic and diluted earnings per common share for the three months ended March 31, 2019 and 2018:

(in thousands, except per share data)	Three Months Ended	
	March 31, 2019	March 31, 2018
Net income	\$74,033	\$78,972
Weighted average number of common shares outstanding - basic	220,366	220,370
Effect of potentially dilutive common shares ⁽¹⁾	289	455
Weighted average number of common shares outstanding - diluted	220,655	220,825
EARNINGS PER COMMON SHARE:		
Basic	\$0.34	\$0.36
Diluted	\$0.34	\$0.36

(1) Represents the effect of the assumed exercise of stock options, vesting of non-participating restricted shares, and vesting of restricted stock units, based on the treasury stock method.

Note 9 – Segment Information

The Company reports four primary segments: Wholesale Bank, Wealth Management, Retail Bank, and Home Lending with the remainder as Corporate and other.

The Wholesale Bank segment includes lending, treasury and cash management services and customer risk management products to middle market corporate, commercial and business banking customers and includes the operations of Financial Pacific Leasing Inc., a commercial leasing company. The Wealth Management segment consists of the operations of Umpqua Investments, which offers a full range of retail brokerage and investment advisory services and products to its clients who consist primarily of individual investors, and Umpqua Private Bank, which serves high net worth individuals with liquid investable assets and provides customized financial solutions and offerings. The Retail Bank segment includes retail and small business lending and deposit services for customers served through the Bank's store network. The Home Lending segment originates, sells and services residential mortgage loans. The Corporate and other segment includes activities that are not directly attributable to one of the four principal lines of business and includes the operations of the parent company, eliminations and the economic impact of certain assets, capital and support functions not specifically identifiable within the other lines of business.

Management monitors the Company's results using an internal performance measurement accounting system, which provides line of business results and key performance measures. The application and development of these management reporting methodologies is a dynamic process and is subject to periodic enhancements. As these enhancements are made, financial results presented by each reportable segment may be periodically revised retrospectively, if material.

The provision for income taxes is allocated to business segments using a 25% effective tax rate. The residual income tax expense or benefit arising from tax planning strategies or other tax attributes to arrive at the consolidated effective tax rate is retained in Corporate and Other.

Table of Contents

Summarized financial information concerning the Company's reportable segments and the reconciliation to the consolidated financial results is shown in the following tables:

(in thousands)	Three Months Ended March 31, 2019					
	Wholesale Bank	Wealth Management	Retail Bank	Home Lending	Corporate & Other	Consolidated

⁽¹⁾ Other investment securities includes securities held by Umpqua Investments as trading debt securities.

The following methods were used to estimate the fair value of each class of financial instrument that is carried at fair value in the tables above:

Securities— Fair values for investment securities are based on quoted market prices when available or through the use of alternative approaches, such as matrix or model pricing, or broker indicative bids, when market quotes are not readily accessible or available. Management periodically reviews the pricing information received from the third-party pricing service and compares it to a secondary pricing service, evaluating significant price variances between services to determine an appropriate estimate of fair value to report.

Loans Held for Sale— Fair value for residential mortgage loans originated as held for sale is determined based on quoted secondary market prices for similar loans, including the implicit fair value of embedded servicing rights.

Residential Mortgage Servicing Rights— The fair value of the MSR is estimated using a discounted cash flow model. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income net of servicing costs. This model is periodically validated by an independent model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available. Management believes the significant inputs utilized are indicative of those that would be used by market participants.

Table of Contents

Junior Subordinated Debentures— The fair value of junior subordinated debentures is estimated using an income approach valuation technique. The significant inputs utilized in the estimation of fair value of these instruments are the credit risk adjusted spread and three-month LIBOR. The credit risk adjusted spread represents the nonperformance risk of the liability, contemplating the inherent risk of the obligation. The Company periodically utilizes a valuation firm to determine or validate the reasonableness of inputs and factors that are used to determine the fair value. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants. Due to credit concerns in the capital markets and inactivity in the trust preferred markets that have limited the observability of market spreads, we have classified this as a Level 3 fair value measure.

Derivative Instruments— The fair value of the interest rate lock commitments and forward sales commitments are estimated using quoted or published market prices for similar instruments, adjusted for factors such as pull-through rate assumptions based on historical information, where appropriate. The pull-through rate assumptions are considered Level 3 valuation inputs and are significant to the interest rate lock commitment valuation; as such, the interest rate lock commitment derivatives are classified as Level 3. The fair value of the interest rate swaps is determined using a discounted cash flow technique incorporating credit valuation adjustments to reflect nonperformance risk in the measurement of fair value. Although the Bank has determined that the majority of the inputs used to value its interest rate swap derivatives fall within Level 2 of the fair value hierarchy, the CVA associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of March 31, 2019, the Bank has assessed the significance of the impact of the CVA on the overall valuation of its interest rate swap positions and has determined that the CVA are not significant to the overall valuation of its interest rate swap derivatives. As a result, the Bank has classified its interest rate swap derivative valuations in Level 2 of the fair value hierarchy.

Assets and Liabilities Measured at Fair Value Using Significant Unobservable Inputs (Level 3)

The following table provides a description of the valuation technique, significant unobservable inputs, and qualitative information about the unobservable inputs for the Company's assets and liabilities classified as Level 3 and measured at fair value on a recurring basis at March 31, 2019:

Financial Instrument	Valuation Technique	Unobservable Input	Weighted Average
Residential mortgage servicing rights	Discounted cash flow	Constant prepayment rate	13.66%
		Discount rate	9.71%
Interest rate lock commitments	Internal pricing model	Pull-through rate	89.07%
		Credit spread	4.51%
Junior subordinated debentures	Discounted cash flow		

Generally, any significant increases in the constant prepayment rate and discount rate utilized in the fair value measurement of the residential mortgage servicing rights will result in negative fair value adjustments (and a decrease in the fair value measurement). Conversely, a decrease in the constant prepayment rate and discount rate will result in a positive fair value adjustment (and increase in the fair value measurement).

An increase in the pull-through rate utilized in the fair value measurement of the interest rate lock commitment derivative will result in positive fair value adjustments (and an increase in the fair value measurement). Conversely, a decrease in the pull-through rate will result in a negative fair value adjustment (and a decrease in the fair value measurement).

Management believes that the credit risk adjusted spread utilized in the fair value measurement of the junior subordinated debentures carried at fair value is indicative of the nonperformance risk premium a willing market participant would require under current market conditions, that is, the inactive market. Management attributes the change in fair value of the junior subordinated debentures during the period to market changes in the nonperformance expectations and pricing of this type of debt. The widening of the credit risk adjusted spread above the Company's contractual spreads has primarily contributed to the positive fair value adjustments. Future contractions in the instrument-specific credit risk adjusted spread relative to the spread currently utilized to measure the Company's junior subordinated debentures at fair value as of March 31, 2019, or the passage of time, will result in negative fair value adjustments. Generally, an increase in the credit risk adjusted spread and/or the forward swap interest rate curve will result in positive fair value adjustments (and decrease the fair value measurement). Conversely, a decrease in the credit risk adjusted spread and/or the forward swap interest rate curve will result in negative fair value adjustments (and increase the fair value measurement).

Table of Contents

The following table provides a reconciliation of assets and liabilities measured at fair value using significant unobservable inputs (Level 3) on a recurring basis during the three months ended March 31, 2019 and 2018: (in thousands)

Three Months Ended March 31,	Beginning Balance	Change included in earnings	Change in fair values included in comprehensive income (loss)	Purchases and issuances	Sales and settlements	Ending Balance	Net change in unrealized gains or (losses) relating to items held at end of period
2019							
Residential mortgage servicing rights	\$ 169,025	\$(13,966)	\$ —	\$ 3,887	\$ —	\$ 158,946	\$(11,174)
Interest rate lock commitments, net	6,757	1,697	—	5,399	(5,679)	8,174	8,174
Junior subordinated debentures, at fair value	300,870	4,772	(6,564)	—	(4,957)	294,121	(1,792)
2018							
Residential mortgage servicing rights	\$ 153,151	\$5,079	\$ —	\$ 6,530	\$ —	\$ 164,760	\$8,434
Interest rate lock commitments, net	4,752	(1,253)	—	6,433	(4,058)	5,874	5,874
Junior subordinated debentures, at fair value	277,155	3,775	1,683	—	(4,203)	278,410	5,458

Changes in residential mortgage servicing rights carried at fair value are recorded in residential mortgage banking revenue within non-interest income. Gains (losses) on interest rate lock commitments carried at fair value are recorded in residential mortgage banking revenue within non-interest income. The contractual interest expense on the junior subordinated debentures is recorded on an accrual basis as interest on junior subordinated debentures within interest expense. Settlements related to the junior subordinated debentures represent the payment of accrued interest that is embedded in the fair value of these liabilities.

The change in fair value of junior subordinated debentures is attributable to the change in the instrument specific credit risk, accordingly, the unrealized gain on fair value of junior subordinated debentures for the three months ended March 31, 2019 of \$6.6 million, is recorded net of tax as an other comprehensive gain of \$4.9 million, compared to a loss of \$1.7 million, recorded net of tax as an other comprehensive loss of \$1.3 million for the three months ended March 31, 2018. The gain recorded in the current quarter was due mostly to an increase in the credit spread.

From time to time, certain assets are measured at fair value on a nonrecurring basis. These adjustments to fair value generally result from the application of lower-of-cost-or-market accounting or write-downs of individual assets due to impairment, typically on collateral dependent loans.

Table of Contents

Fair Value of Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The following tables present information about the Company's assets and liabilities measured at fair value on a nonrecurring basis for which a nonrecurring change in fair value has been recorded during the reporting period. The amounts disclosed below represent the fair values at the time the nonrecurring fair value measurements were made, and not necessarily the fair value as of the dates reported upon.

(in thousands)	Three Months Ended	
	March 31, 2019	March 31, 2018
Loans and leases	\$15,496	\$14,039
Other real estate owned	59	5
Total loss from nonrecurring measurements	\$15,555	\$14,044

The following provides a description of the valuation technique and inputs for the Company's assets and liabilities classified as Level 3 and measured at fair value on a nonrecurring basis. Unobservable inputs and qualitative information about the unobservable inputs are not presented as the fair value is determined by third-party information. The loans and leases amounts above represent impaired, collateral dependent loans and leases that have been adjusted to fair value. When we identify a collateral dependent loan or lease as impaired, we measure the impairment using the current fair value of the collateral, less selling costs. Depending on the characteristics of a loan or lease, the fair value of collateral is generally estimated by obtaining external appraisals, but in some cases, the value of the collateral may be estimated as having little to no value. If we determine that the value of the impaired loan or lease is less than its recorded investment, we recognize this impairment and adjust the carrying value of the loan or lease to fair value through the allowance for loan and lease losses. The loss represents charge-offs or impairments on collateral dependent loans and leases for fair value adjustments based on the fair value of collateral.

The other real estate owned amount above represents impaired real estate that has been adjusted to fair value. Other real estate owned represents real estate which the Bank has taken control of in partial or full satisfaction of loans. At the time of foreclosure, other real estate owned is recorded at the lower of the carrying amount of the loan or fair value less costs to sell, which becomes the property's new basis. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan and lease losses. After foreclosure, management periodically performs valuations such that the real estate is carried at the lower of its new cost basis or fair value, net of estimated costs to sell. Fair value adjustments on other real estate owned are recognized within net loss on real estate owned.

The loss represents impairments on other real estate owned for fair value adjustments based on the fair value of the real estate.

Table of Contents

Fair Value Option

The following table presents the difference between the aggregate fair value and the aggregate unpaid principal balance of loans held for sale accounted for under the fair value option as of March 31, 2019 and December 31, 2018:

(in thousands)	March 31, 2019			December 31, 2018		
	Fair Value	Aggregate Unpaid Principal Balance	Fair Value Less Aggregate Unpaid Principal Balance	Fair Value	Aggregate Unpaid Principal Balance	Fair Value Less Aggregate Unpaid Principal Balance
Loans held for sale	\$240,302	\$231,318	\$8,984	\$166,461	\$160,270	\$6,191

Residential mortgage loans held for sale accounted for under the fair value option are measured initially at fair value with subsequent changes in fair value recognized in earnings. Gains and losses from such changes in fair value are reported as a component of residential mortgage banking revenue, net in the Condensed Consolidated Statements of Income. For the three months ended March 31, 2019, the Company recorded a net increase in fair value of \$2.8 million. For the three months ended March 31, 2018, the Company recorded a net decrease in fair value of \$306,000.

The Company selected the fair value measurement option for existing junior subordinated debentures (the Umpqua Statutory Trusts) and for junior subordinated debentures acquired from Sterling. The remaining junior subordinated debentures were acquired through previous business combinations and were measured at fair value at the time of acquisition and subsequently measured at amortized cost.

Accounting for the selected junior subordinated debentures at fair value enables us to more closely align our financial performance with the economic value of those liabilities. Additionally, we believe it improves our ability to manage the market and interest rate risks associated with the junior subordinated debentures. The junior subordinated debentures measured at fair value and amortized cost are presented as separate line items on the balance sheet. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants under current market conditions as of the measurement date.

Due to inactivity in the junior subordinated debenture market and the lack of observable quotes of our, or similar, junior subordinated debenture liabilities or the related trust preferred securities when traded as assets, we utilize an income approach valuation technique to determine the fair value of these liabilities using our estimation of market discount rate assumptions. The Company monitors activity in the trust preferred and related markets, to the extent available, evaluates changes related to the current and anticipated future interest rate environment, and considers our entity-specific creditworthiness, to validate the reasonableness of the credit risk adjusted spread and effective yield utilized in our discounted cash flow model. We also consider changes in the interest rate environment in our valuation, specifically the absolute level and the shape of the slope of the forward swap curve.

Note 11 – Leases

The Bank leases store locations, corporate office space, and equipment under non-cancelable leases. Leases with an initial term of 12 months or less are not recorded on the balance sheet.

The leases contain various provisions for increases in rental rates, based either on changes in the published Consumer Price Index or a predetermined escalation schedule. Substantially all of the leases provide the Company with one or more options to renew, with renewal terms that can extend the lease term from one to 10 years or more. The exercise

of lease renewal options is at our sole discretion. The depreciable life of assets and leasehold improvements are limited by the expected lease term, unless there is a transfer of title or purchase option reasonably certain of exercise. Our lease agreements do not contain any material residual value guarantees or material restrictive covenants.

We rent or sublease certain real estate to third parties. Our sublease portfolio consists of operating leases of mainly former store locations or excess space in store or corporate facilities.

Table of Contents

The following table presents the balance sheet information related to leases as of March 31, 2019:

(in thousands)

Leases	March 31, 2019
Operating lease right-of-use assets	\$ 109,807
Operating lease liabilities	\$ 118,520

The following table presents the components of lease expense for the three months ended March 31, 2019:

(in thousands)	Three Months Ended March 31, 2019
Lease Costs	
Operating lease costs	\$ 8,126
Short-term lease costs	267
Variable lease costs	2
Sublease income	(787)
Net lease costs	\$ 7,608

Prior to the adoption of ASU 2016-02, rent expense for the three months ended March 31, 2018 was \$9.6 million and was partially offset by rent income of \$684,000.

The following table presents the supplemental cash flow information related to leases for the three months ended March 31, 2019:

(in thousands)	Three Months Ended March 31, 2019
Cash Flows	
Cash paid for amounts included in the measurement of lease liabilities:	
Operating cash flows from operating leases	\$ 8,244
Right of use assets obtained in exchange for new operating lease liabilities	\$ 1,554

The following table presents the maturities of lease liabilities as of March 31, 2019:

(in thousands)

Year	Operating Leases
Remainder of 2019	\$23,266
2020	26,824
2021	20,969
2022	15,852
2023	11,924
Thereafter	35,806
Total lease payments	134,641
Less: imputed interest	(16,121)

Present value of lease liabilities \$118,520

Table of Contents

The following table presents the operating lease term and discount rate for the three months ended March 31, 2019:

(in thousands)	Three Months Ended March 31, 2019
Weighted-average remaining lease term (years)	7.0
Weighted-average discount rate	3.71 %

The following table sets forth, as of December 31, 2018, the future minimum lease payments under non-cancelable leases and future minimum income receivable under non-cancelable operating subleases:

(in thousands)		
Year	Leases Payments	Subleases Income
2019	\$ 33,948	\$ 2,851
2020	29,535	2,711
2021	23,898	2,333
2022	18,250	1,718
2023	14,100	1,337
Thereafter	37,963	3,477
Total	\$ 157,694	\$ 14,427

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Report contains certain forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbor for "forward-looking statements" provided by the Private Securities Litigation Reform Act of 1995. These statements may include statements that expressly or implicitly predict future results, performance or events. Statements other than statements of historical fact are forward-looking statements. You can find many of these statements by looking for words such as "anticipates," "expects," "believes," "estimates," "intends" and "forecast," and words or phrases of similar meaning. We make forward-looking statements regarding projected sources of funds; the Company's liquidity position; Next Gen initiatives; investments in data, analytics, technology, training and marketing; our securities portfolio; loan sales; adequacy of our allowance for loan and lease losses and reserve for unfunded commitments; provision for loan and lease losses; impaired loans and future losses; performance of troubled debt restructurings; our commercial real estate portfolio, its collectability and subsequent charge-offs; resolution of non-accrual loans; litigation; dividends; junior subordinated debentures; fair values of certain assets and liabilities, including mortgage servicing rights values and sensitivity analyses; tax rates and the effect of accounting pronouncements.

Forward-looking statements involve substantial risks and uncertainties, many of which are difficult to predict and are generally beyond our control. There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. Risks and uncertainties include those set forth in our filings with the Securities and Exchange Commission (the "SEC") and the following factors that might cause actual results to differ materially from those presented:

- our ability to successfully implement and sustain information technology product and system enhancements and operational initiatives;
- our ability to attract new deposits and loans and leases;
- our ability to retain deposits during store consolidations;
- demand for financial services in our market areas;
- competitive market pricing factors;
- our ability to effectively develop and implement new technology;
- deterioration in economic conditions that could result in increased loan and lease losses, especially those risks associated with concentrations in real estate related loans;
- market interest rate volatility;
- prolonged low interest rate environments;
- compression of our net interest margin;
- stability and cost of funding sources;
- continued availability of borrowings and other funding sources such as brokered and public deposits;
- changes in legal or regulatory requirements or the results of regulatory examinations that could increase expenses or restrict growth;
- our ability to recruit and retain key management and staff;
- availability of, and competition for, acquisition opportunities;
- risks associated with merger and acquisition integration;
- significant decline in the market value of the Company that could result in an impairment of goodwill;
- our ability to raise capital or incur debt on reasonable terms;
- regulatory limits on the Bank's ability to pay dividends to the Company;
- financial services reform and the impact of legislation and implementing regulations on our business operations, including our compliance costs, interest expense, and revenue;
- a breach or failure of our operational or security systems, or those of our third-party vendors, including as a result of cyber-attacks; and
- competition, including from financial technology companies.

Table of Contents

There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. Forward-looking statements are made as of the date of this Form 10-Q. We do not intend to update these forward-looking statements. Readers should consider any forward-looking statements in light of this explanation, and we caution readers about relying on forward-looking statements.

General

Umpqua Holdings Corporation, an Oregon corporation, is a financial holding company with two principal operating subsidiaries, Umpqua Bank and Umpqua Investments, Inc.

With headquarters located in Roseburg, Oregon, the Bank is considered one of the most innovative community banks in the United States, recognized nationally and internationally for its unique company culture and customer experience strategy, which we believe differentiates the Company from its competition. The Bank provides a wide range of banking, wealth management, mortgage and other financial services to corporate, institutional and individual customers, and also has a wholly-owned subsidiary, Financial Pacific Leasing, Inc., a commercial equipment leasing company.

Umpqua Investments is a registered broker-dealer and registered investment advisor with offices in Oregon, Washington, and California, and also offers products and services through Umpqua Bank stores. The firm is one of the oldest investment companies in the Northwest. Umpqua Investments offers a full range of investment products and services including: stocks, fixed income securities (municipal, corporate, and government bonds, CDs, and money market instruments), mutual funds, annuities, options, retirement planning, advisory account services, goals based planning and insurance.

Along with its subsidiaries, the Company is subject to the regulations of state and federal agencies and undergoes periodic examinations by these regulatory agencies.

The presentation within has been revised to reflect the effects of the Correction of the Prior Period Balances disclosed in Note 1 to the Condensed Consolidated Financial Statements.

Executive Overview

Significant items for the three months ended March 31, 2019 were as follows:

Financial Performance

Net income per diluted common share was \$0.34 for the three months ended March 31, 2019 compared to \$0.36 for the three months ended March 31, 2018.

Net interest margin, on a tax equivalent basis, was 4.03% for the three months ended March 31, 2019 as compared to 4.00% for the three months ended March 31, 2018. The increase in net interest margin for the three months ended March 31, 2019, compared to the same period in the prior year, was driven by higher average yields on the loan and lease portfolio, taxable securities, and loans held for sale, offset by an increase in the cost of interest-bearing liabilities.

Residential mortgage banking revenue was \$11.2 million for the three months ended March 31, 2019 as compared to \$38.4 million for the three months ended March 31, 2018. The decrease for the three month period was primarily driven by a loss on fair value of the MSR asset of \$14.0 million, as compared to a gain of \$5.1 million for the same period in 2018. For-sale mortgage origination volume decreased 29% as compared to the same period in the prior year, and gain on sale margin decreased to 2.95% for the three months ended March 31, 2019, compared to 3.32% in

the same period of the prior year.

Total gross loans and leases were \$20.4 billion as of March 31, 2019, a decrease of \$16.7 million, as compared to December 31, 2018. The decrease is due to the timing of commercial and corporate loan closings as well as an increase in payoffs of our commercial real estate portfolio which offset new loan production.

Total deposits were \$21.2 billion as of March 31, 2019, an increase of \$106.4 million, compared to December 31, 2018. This increase was primarily attributable to growth in time deposits during the period, partially offset by lower non-interest bearing demand deposits and money market balances.

Table of Contents

Total consolidated assets were \$27.4 billion as of March 31, 2019, compared to \$26.9 billion at December 31, 2018. The increase was due, in part, to the addition of the operating lease right of use assets recorded as of March 31, 2019 as a result of the application of the new lease standard, ASC 842.

Credit Quality

Non-performing assets decreased to \$86.5 million, or 0.32% of total assets, as of March 31, 2019, as compared to \$98.2 million, or 0.36% of total assets, as of December 31, 2018. Non-performing loans were \$76.0 million, or 0.37% of total loans, as of March 31, 2019, as compared to \$87.3 million, or 0.43% of total loans, as of December 31, 2018.

The provision for loan and lease losses was \$13.7 million for both the three months ended March 31, 2019 and March 31, 2018. As an annualized percentage of average outstanding loans and leases, the provision for loan and lease losses recorded for the three months ended March 31, 2019 was 0.27% as compared to 0.29% for the same period in 2018.

Capital and Growth Initiatives

The Company's total risk based capital was 13.6% and its Tier 1 common to risk weighted assets ratio was 10.8% as of March 31, 2019. As of December 31, 2018, the Company's total risk based capital ratio was 13.5% and its Tier 1 common to risk weighted assets ratio was 10.7%.

Cash dividends declared in the first quarter of 2019 were \$0.21 per common share, an increase of 5% from the comparable period of the prior year's cash dividend of \$0.20 per common share.

We continue to make progress on "Umpqua Next Gen," an initiative started in late 2017 designed to modernize and evolve the Bank. We focused on operational excellence, balanced growth and human digital programs in 2018. During the three months ended March 31, 2019, Umpqua consolidated 11 stores and sold an additional 4 stores, as part of this initiative. We plan to use the savings generated from store consolidations to reinvest in technology, data and analytics, new customer-focused technologies (like Umpqua Go-To), associate training, a re-designed corporate website, digital marketing efforts, and new online account origination capabilities.

Summary of Critical Accounting Policies

Our critical accounting policies are described in detail in the Summary of Critical Accounting Policies section of the Form 10-K for the year ended December 31, 2018, filed with the SEC on February 21, 2019. The SEC defines "critical accounting policies" as those that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in future periods. The Company's critical accounting policies include the allowance for loan and lease losses and reserve for unfunded commitments, residential mortgage servicing rights, valuation of goodwill, and fair value. There have been no material changes to the valuation techniques or models during the three months ended March 31, 2019.

Results of Operations

Overview

For the three months ended March 31, 2019, net income was \$74.0 million, or \$0.34 per diluted common share as compared to net income of \$79.0 million, or \$0.36 per diluted common share for the three months ended March 31, 2018. The decrease in net income for the three months ended March 31, 2019 compared to the same period of the

prior year was attributable to a decrease in non-interest income, offset by a decrease in non-interest expense and an increase in net interest income. The decrease in non-interest income was primarily due to a decrease in residential mortgage banking revenue driven by a loss on fair value change of the MSR asset. The decrease in non-interest expense was driven by lower salaries and benefits expense, resulting from the Company's operational excellence initiatives, a reduction in consulting fees, as well as lower occupancy and equipment expense resulting from the reduction in the number of store locations. The increase in net interest income was driven primarily by higher average yields on interest-earning assets, specifically within the loan and lease portfolio and taxable securities, offset by a higher cost of funds, due to a rising rate environment.

Table of Contents

The following table presents the return on average assets, average common shareholders' equity and average tangible common shareholders' equity for the three months ended March 31, 2019 and 2018. For each of the periods presented, the table includes the calculated ratios based on reported net income. Our return on average common shareholders' equity is negatively impacted as the result of capital required to support goodwill. To the extent this performance metric is used to compare our performance with other financial institutions that do not have merger and acquisition-related intangible assets, we believe it is beneficial to also consider the return on average tangible common shareholders' equity. The return on average tangible common shareholders' equity is calculated by dividing net income by average shareholders' common equity less average goodwill and intangible assets, net (excluding MSRs). The return on average tangible common shareholders' equity is considered a non-GAAP financial measure and should be viewed in conjunction with the return on average common shareholders' equity.

Return on Average Assets, Common Shareholders' Equity and Tangible Common Shareholders' Equity

(dollars in thousands)	Three Months Ended			
	March 31, 2019	March 31, 2018		
Return on average assets	1.12	% 1.25	%	
Return on average common shareholders' equity	7.34	% 8.06	%	
Return on average tangible common shareholders' equity	13.17	% 14.84	%	
Calculation of average common tangible shareholders' equity:				
Average common shareholders' equity	\$4,091,174	\$3,974,788		
Less: average goodwill and other intangible assets, net	(1,811,007)	(1,817,068)		
Average tangible common shareholders' equity	\$2,280,167	\$2,157,720		

Additionally, management believes tangible common equity and the tangible common equity ratio are meaningful measures of capital adequacy. Umpqua believes the exclusion of certain intangible assets in the computation of tangible common equity and tangible common equity ratio provides a meaningful base for period-to-period and company-to-company comparisons, which management believes will assist investors in analyzing the operating results and capital of the Company. Tangible common equity is calculated as total shareholders' equity less preferred stock and less goodwill and other intangible assets, net (excluding MSRs). In addition, tangible assets are total assets less goodwill and other intangible assets, net (excluding MSRs). The tangible common equity ratio is calculated as tangible common shareholders' equity divided by tangible assets. The tangible common equity and tangible common equity ratio is considered a non-GAAP financial measure and should be viewed in conjunction with the total shareholders' equity and the total shareholders' equity ratio.

The following table provides a reconciliation of ending shareholders' equity (GAAP) to ending tangible common equity (non-GAAP), and ending assets (GAAP) to ending tangible assets (non-GAAP) as of March 31, 2019 and December 31, 2018:

Reconciliations of Total Shareholders' Equity to Tangible Common Shareholders' Equity and Total Assets to Tangible Assets

(dollars in thousands)	March 31, 2019	December 31, 2018
Total shareholders' equity	\$4,112,326	\$4,056,442
Subtract:		
Goodwill	1,787,651	1,787,651
Other intangible assets, net	22,560	23,964
Tangible common shareholders' equity	\$2,302,115	\$2,244,827

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Total assets	\$27,355,625	\$26,939,781
Subtract:		
Goodwill	1,787,651	1,787,651
Other intangible assets, net	22,560	23,964
Tangible assets	\$25,545,414	\$25,128,166
Tangible common equity ratio	9.01	% 8.93
		%

Table of Contents

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not reviewed or audited. Although we believe these non-GAAP financial measures are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation or as a substitute for analyses of results as reported under GAAP.

Net Interest Income

Net interest income for the three months ended March 31, 2019 was \$237.7 million, an increase of \$12.7 million compared to the same period in 2018. The increase in net interest income for the three months ended March 31, 2019 as compared to the same period in 2018, was driven by growth in interest-earning assets, specifically the loan and lease portfolio, reflecting strong growth during the period, along with higher average yields on loans and leases, taxable securities, and loans held for sale related to higher interest rates during the period. The increase was partially offset by increased volumes of interest-bearing liabilities and an increase in the average cost of funds due to competitive pricing in an increasing rate environment.

The net interest margin (net interest income as a percentage of average interest-earning assets) on a fully tax equivalent basis was 4.03% for the three months ended March 31, 2019, an increase of 3 basis points as compared to the same period in 2018. The increase in net interest margin for the three month ended March 31, 2019, primarily resulted from higher average yields on the loan and lease portfolio, loans held for sale, and taxable investments, offset by an increase in the cost of interest-bearing liabilities. The yield on loans and leases increased by 26 basis points for the three months ended March 31, 2019, as compared to the same period in 2018. The cost of interest bearing liabilities increased 49 basis points for the three months ended March 31, 2019, as compared to the same period in 2018.

Our net interest income is affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, as well as changes in the yields earned on interest-earning assets and rates paid on deposits and borrowed funds.

Table of Contents

The following table presents condensed average balance sheet information, together with interest income and yields on average interest-earning assets, and interest expense and rates paid on average interest-bearing liabilities for the three months ended March 31, 2019 and 2018:

Average Rates and Balances

(dollars in thousands)

	Three Months Ended March 31, 2019			March 31, 2018

Common equity	4,091,174			3,974,788		
Total liabilities and shareholders' equity	\$26,811,621			\$25,625,869		
NET INTEREST INCOME		\$238,151			\$225,493	
NET INTEREST SPREAD			3.65 %			3.78 %
NET INTEREST INCOME TO EARNING ASSETS OR NET INTEREST MARGIN (1), (2)			4.03 %			4.00 %

(1) Non-accrual loans and leases are included in the average balance.

Tax-exempt income has been adjusted to a tax equivalent basis at a 21% tax rate. The amount of such adjustment (2) was an addition to recorded income of approximately \$466,000 for the three months ended March 31, 2019 as compared to \$512,000 for the same period in 2018.

Table of Contents

The following table sets forth a summary of the changes in tax equivalent net interest income due to changes in average asset and liability balances (volume) and changes in average rates (rate) for the three months ended March 31, 2019 as compared to the same period in 2018. Changes in tax equivalent interest income and expense, which are not attributable specifically to either volume or rate, are allocated proportionately between both variances.

Rate/Volume Analysis

Provision for Loan and Lease Losses

The provision for loan and lease losses was \$13.7 million for both the three months ended March 31, 2019 and March 31, 2018. The balance remained unchanged from the prior period, primarily due to improvement in the asset quality of the loan and lease portfolio, offset by an increase in charge-offs during the period. As an annualized percentage of average outstanding loans and leases, the provision for loan and lease losses recorded for the three months ended March 31, 2019 was 0.27% as compared to 0.29% for the same period in 2018.

For the three months ended March 31, 2019, net charge-offs were \$13.7 million or 0.27% of average loans and leases (annualized), as compared to \$12.3 million or 0.26% of average loans and leases (annualized), for the three months ended March 31, 2018. The majority of net charge-offs relate to losses realized in the lease and equipment finance portfolio, which is included in the commercial loan portfolio.

The Company recognizes the charge-off of impairment reserves on impaired loans in the period they arise for collateral-dependent loans. Therefore, the non-accrual loans of \$44.6 million as of March 31, 2019 have been written-down to their estimated fair value, less estimated costs to sell, and are expected to be resolved with no

additional material loss, absent further decline in market prices.

Table of Contents

Non-Interest Income

Non-interest income for the three months ended March 31, 2019 was \$45.7 million, a decrease of \$32.8 million, or 42%, as compared to the same period in 2018. The following table presents the key components of non-interest income for the three months ended March 31, 2019 and 2018:

Non-Interest Income

(in thousands)

Three Months Ended
March 31,

	2019	2018	Change Amount	Change Percent
Service charges on deposits	\$15,278	\$14,995	\$283	2 %
Brokerage revenue	3,810	4,194	(384)	(9)%
Residential mortgage banking revenue, net	11,231	38,438	(27,207)	(71)%
Unrealized holding gains on equity securities	695	—	695	nm
Gain on loan sales, net	769	1,230	(461)	(37)%
BOLI income	2,168	2,070	98	5 %
Other income	11,789	17,640	(5,851)	(33)%
Total	\$45,740	\$78,567	\$(32,827)	(42)%

nm = Not Meaningful

Residential mortgage banking revenue for the three months ended March 31, 2019 as compared to the same period of 2018 decreased by \$27.2 million. The decrease for the three month period was primarily driven by a loss on fair value of the MSR asset of \$14.0 million as compared to a gain on fair value of \$5.1 million for the same period in 2018. In addition, the closed loans for sale volume decreased 29% due to a slowdown in refinance activity, as well as a decrease in the gain on sale margin to 2.95% for the three months ended March 31, 2019, compared to 3.32% in the same period of the prior year.

Other income for the three months ended March 31, 2019 compared to the same period in the prior year decreased by \$5.9 million. The decrease was related to the debt capital market swap fee revenue decrease of \$2.9 million due to timing of production, as well as a decrease of \$3.6 million in the swap derivative value attributable to the decrease in long-term interest rates during the quarter.

Table of Contents

Non-Interest Expense

Non-interest expense for the three months ended March 31, 2019 was \$171.6 million, a decrease of \$14.5 million or 8% as compared to the same period in 2018. The following table presents the key elements of non-interest expense for the three months ended March 31, 2019 and 2018:

Non-Interest Expense

(in thousands)	Three Months Ended March 31,		Change Amount	Change Percent
	2019	2018		
Salaries and employee benefits	\$100,658	\$106,551	\$(5,893)	(6)%
Occupancy and equipment, net	36,245	38,661	(2,416)	(6)%
Communications	4,220	4,433	(213)	(5)%
Marketing	2,726	1,800	926	51%
Services	12,210	15,061	(2,851)	(19)%
FDIC assessments	2,942	4,480	(1,538)	(34)%
Gain on other real estate owned, net	(51)	(38)	(13)	34%
Intangible amortization	1,404	1,541	(137)	(9)%
Other expenses	11,238	13,624	(2,386)	(18)%
Total	\$171,592	\$186,113	\$(14,521)	(8)%

Salaries and employee benefits decreased by \$5.9 million for the three months ended March 31, 2019 as compared to the same period in the prior year. The decrease in salaries and employee benefits for the three months ended March 31, 2019, is primarily related to lower compensation, incentives, and payroll taxes, resulting from the Company's operational efficiency initiatives as well as lower variable compensation for mortgage originations.

Occupancy and equipment expense decreased by \$2.4 million for the three months ended March 31, 2019 as compared to the same period in the prior year resulting from the reduction in the number of store locations.

Services expense decreased by \$2.9 million for the three months ended March 31, 2019 as compared to the same period in the prior year, primarily related to lower consulting fees to assist with the identification and implementation of organizational simplification and efficiencies in the same period of the prior year.

FDIC assessments decreased by \$1.5 million due to the discontinuation of the large-institution surcharge that had been included in the assessment in the prior period.

Other non-interest expense decreased by \$2.4 million for the three months ended March 31, 2019 as compared to the same period in the prior year. The decrease is related to a decrease in exit and disposal costs during the three months ended March 31, 2019.

Income Taxes

The Company's consolidated effective tax rate as a percentage of pre-tax income for the three months ended March 31, 2019 was 24.6%, as compared to 23.9% for the three months ended March 31, 2018. The effective tax rates differed from the federal statutory rate of 21% and the apportioned state rate of 6% (net of the federal tax benefit) principally because of the relative amount of income earned in each state jurisdiction, non-taxable income arising from bank-owned life insurance, income on tax-exempt investment securities, non-deductible FDIC premiums and tax credits arising from low income housing investments.

Table of Contents

FINANCIAL CONDITION

Investment Securities

Equity and other securities were \$63.3 million at March 31, 2019, up from \$61.8 million at December 31, 2018.

Investment securities available for sale were \$2.9 billion as of March 31, 2019, compared to \$3.0 billion at December 31, 2018. The decrease was due to sales and paydowns of \$119.4 million, partially offset by an increase of \$33.3 million in fair value of investment securities available for sale and purchases of \$6.0 million of investment securities.

Investment securities held to maturity were \$3.5 million as of March 31, 2019, comparable to \$3.6 million at December 31, 2018. The change relates to paydowns and maturities of investment securities held to maturity.

The following tables present the available for sale and held to maturity investment securities portfolio by major type as of March 31, 2019 and December 31, 2018:

Investment Securities Composition

(dollars in thousands)

	Investment Securities Available for Sale			
	March 31, 2019		December 31, 2018	
	Fair Value	%	Fair Value	%
U.S. Treasury and agencies	\$19,789	1 %	\$39,656	1 %
Obligations of states and political subdivisions	305,663	10 %	309,171	10 %
Residential mortgage-backed securities and collateralized mortgage obligations	2,569,326	89 %	2,628,281	89 %
Total	\$2,894,778	100%	\$2,977,108	100%

	Investment Securities Held to Maturity			
	March 31, 2019		December 31, 2018	
	Amortized Cost	%	Amortized Cost	%
Residential mortgage-backed securities and collateralized mortgage obligations	\$3,478	100%	\$3,606	100%
Total	\$3,478	100%	\$3,606	100%

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment ("OTTI") or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors.

Gross unrealized losses in the available for sale investment portfolio were \$48.2 million at March 31, 2019. This consisted primarily of unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations of \$47.3 million. The unrealized losses were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities and are not due to the underlying credit of the issuers or the underlying collateral. In the opinion of management, these securities are considered only temporarily impaired due to these changes in market interest rates.

Restricted Equity Securities

Restricted equity securities were \$47.5 million at March 31, 2019 and \$40.3 million at December 31, 2018, the majority of which represents the Bank's investment in the FHLB of Des Moines. The increase is attributable to purchases of FHLB stock during the quarter due to additional borrowing activity. FHLB stock is carried at par and does not have a readily determinable fair value. Ownership of FHLB stock is restricted to the FHLB and member institutions and can only be purchased and redeemed at par.

Table of Contents

Loans and Leases

Loans and Leases, net

Total loans and leases outstanding at March 31, 2019 were \$20.4 billion, a decrease of \$16.7 million as compared to December 31, 2018. The decrease is attributable to charge-offs of \$17.2 million, loans sold of \$15.1 million and a decrease of \$8.8 million in GMNA loans, partially offset by net new loan and lease originations of \$23.9 million.

The following table presents the concentration distribution of the loan and lease portfolio, net of deferred fees and costs, as of March 31, 2019 and December 31, 2018.

Loan and Lease Concentrations

Asset Quality and Non-Performing Assets

Non-Performing Assets

The following table summarizes our non-performing assets and restructured loans as of March 31, 2019 and December 31, 2018:

(dollars in thousands)	March 31, 2019	December 31, 2018		
Loans and leases on non-accrual status	\$44,586	\$ 50,823		
Loans and leases past due 90 days or more and accruing ⁽¹⁾	31,424	36,444		
Total non-performing loans and leases	76,010	87,267		
Other real estate owned	10,488	10,958		
Total non-performing assets	\$86,498	\$ 98,225		
Restructured loans ⁽²⁾	\$15,726	\$ 13,924		
Allowance for loan and lease losses	\$144,872	\$ 144,871		
Reserve for unfunded commitments	4,654	4,523		
Allowance for credit losses	\$149,526	\$ 149,394		
Asset quality ratios:				
Non-performing assets to total assets	0.32	%	0.36	%
Non-performing loans and leases to total loans and leases	0.37	%	0.43	%
Allowance for loan and leases losses to total loans and leases	0.71	%	0.71	%
Allowance for credit losses to total loans and leases	0.73	%	0.73	%
Allowance for credit losses to total non-performing loans and leases	197	%	171	%

Excludes government guaranteed GNMA mortgage loans that Umpqua has the right but not the obligation to

⁽¹⁾ repurchase that are past due 90 days or more totaling \$158,000 and \$8.9 million at March 31, 2019 and December 31, 2018, respectively.

⁽²⁾ Represents accruing restructured loans performing according to their restructured terms.

The purchased non-credit impaired loans had remaining discount that is expected to accrete into interest income over the life of the loans of \$22.0 million and \$24.7 million, as of March 31, 2019 and December 31, 2018, respectively. The purchased credit impaired loan pools had remaining discounts of \$23.4 million and \$24.9 million, as of March 31, 2019 and December 31, 2018, respectively.

Loans acquired with deteriorated credit quality are accounted for as purchased credit impaired pools. Typically, this would include loans that were considered non-performing or restructured as of acquisition date. Accordingly, subsequent to acquisition, loans included in the purchased credit impaired pools are not reported as non-performing loans based upon their individual performance status, so the categories of nonaccrual, impaired and 90 days past due and accruing do not include any purchased credit impaired loans.

Restructured Loans

At March 31, 2019 and December 31, 2018, impaired loans of \$15.7 million and \$13.9 million, respectively, were classified as performing restructured loans. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. In order for a new restructured loan to be considered performing and on accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan must be current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow.

A further decline in the economic conditions in our general market areas or other factors could adversely impact individual borrowers or the loan portfolio in general. Accordingly, there can be no assurance that loans will not become 90 days or more past due, become impaired or placed on non-accrual status, restructured or transferred to other real estate owned in the future.

Table of Contents

Allowance for Loan and Lease Losses and Reserve for Unfunded Commitments

The ALLL totaled \$144.9 million at both March 31, 2019 and December 31, 2018. The following table shows the activity in the ALLL for the three months ended March 31, 2019 and 2018:

Allowance for Loan and Lease Losses

(dollars in thousands)	Three Months Ended	
	March 31, 2019	March 31, 2018
Balance, beginning of period	\$144,871	\$140,608
Charge-offs	(17,152)	(15,812)
Recoveries	3,469	3,481
Net charge-offs	(13,683)	(12,331)
Provision for loan and lease losses	13,684	13,656
Balance, end of period	\$144,872	\$141,933
As a percentage of average loans and leases (annualized):		
Net charge-offs	0.27	% 0.26
Provision for loan and lease losses	0.27	% 0.29
Recoveries as a percentage of charge-offs	20.23	% 22.01

The increase in allowance for loan and lease losses as of March 31, 2019 compared to the same period of the prior year was primarily attributable to growth in the loan and lease portfolio. Additional discussion on the change in provision for loan and lease losses is provided under the heading Provision for Loan and Lease Losses above.

The following table sets forth the allocation of the allowance for loan and lease losses and percent of loans in each category to total loans and leases as of March 31, 2019 and December 31, 2018:

(dollars in thousands)	March 31, 2019		December 31, 2018	
	Amount	% Loans to total loans	Amount	% Loans to total loans
Commercial real estate	\$47,841	49.6 %	\$47,904	50.4 %
Commercial	64,370	23.5 %	63,957	23.1 %
Residential	22,173	24.2 %	22,034	23.6 %
Consumer & other	10,488	2.7 %	10,976	2.9 %
Allowance for loan and lease losses	\$144,872		\$144,871	

At March 31, 2019, the recorded investment in loans classified as impaired totaled \$37.1 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses) of \$139,000. The valuation allowance on impaired loans represents the impairment reserves on performing current and former restructured loans and nonaccrual loans. At December 31, 2018, the total recorded investment in impaired loans was \$42.3 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses) of \$180,000.

Table of Contents

The following table presents a summary of activity in the RUC:

Summary of Reserve for Unfunded Commitments Activity

(in thousands)	Three months ended	
	March 31, 2019	March 31, 2018
Balance, beginning of period	\$4,523	\$ 3,963
Net charge to other expense	131	166
Balance, end of period	\$4,654	\$ 4,129

We believe that the ALLL and RUC at March 31, 2019 are sufficient to absorb losses inherent in the loan and lease portfolio and credit commitments outstanding as of that date based on the information available. This assessment, based in part on historical levels of net charge-offs, loan and lease growth, and a detailed review of the quality of the loan and lease portfolio, involves uncertainty and judgment. Therefore, the adequacy of the ALLL and RUC cannot be determined with precision and may be subject to change in future periods. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review.

Residential Mortgage Servicing Rights

The following table presents the key elements of our residential mortgage servicing rights portfolio for the three months ended March 31, 2019 and 2018:

Summary of Residential Mortgage Servicing Rights

(in thousands)	Three Months Ended	
	March 31, 2019	March 31, 2018
Balance, beginning of period	\$169,025	\$153,151
Additions for new MSR capitalized	3,887	6,530
Changes in fair value:		
Due to changes in model inputs or assumptions (1)	(8,874)	14,933
Other (2)	(5,092)	(9,854)
Balance, end of period	\$158,946	\$164,760

(1) Principally reflects changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.

(2) Represents changes due to collection/realization of expected cash flows over time.

Information related to our residential serviced loan portfolio as of March 31, 2019 and December 31, 2018 was as follows:

(dollars in thousands)	March 31, 2019	December 31, 2018
Balance of loans serviced for others	\$15,902,587	\$15,978,885
MSR as a percentage of serviced loans	1.00 %	1.06 %

Mortgage servicing rights are adjusted to fair value quarterly with the change recorded in mortgage banking revenue.

Table of Contents

Goodwill and Other Intangible Assets

At March 31, 2019 and December 31, 2018, we had goodwill of \$1.8 billion. Goodwill is recorded in connection with business combinations and represents the excess of the purchase price over the estimated fair value of the net assets acquired. There were no changes to goodwill during the three months ended March 31, 2019.

At March 31, 2019, we had other intangible assets of \$22.6 million, compared to \$24.0 million at December 31, 2018.

As part of a business acquisition, the fair value of identifiable intangible assets such as core deposits, which include all deposits except certificates of deposit, are recognized at the acquisition date. Intangible assets with definite useful lives are amortized to their estimated residual values over their respective estimated useful lives, and are also reviewed for impairment. We amortize other intangible assets on an accelerated or straight-line basis over an estimated ten year life. The decrease from December 31, 2018 relates to the amortization of the other intangible assets of \$1.4 million for the three months ended March 31, 2019.

Deposits

Total deposits were \$21.2 billion at March 31, 2019, an increase of \$106.4 million, as compared to December 31, 2018. The increase is attributable to growth in time deposits in addition to an increase in non-interest bearing demand and savings, partially offset by lower money market balances attributable to planned public and brokered funds run-off.

The following table presents the deposit balances by major category as of March 31, 2019 and December 31, 2018:

(dollars in thousands)	March 31, 2019			December 31, 2018		
	Amount	Percentage		Amount	Percentage	
Non-interest bearing demand	\$6,495,562	31 %		\$6,667,467	32 %	
Interest bearing demand	2,341,441	11 %		2,340,471	11 %	
Money market	6,469,286	30 %		6,645,390	31 %	
Savings	1,479,509	7 %		1,492,685	7 %	
Time, \$100,000 or greater	3,340,140	16 %		2,947,084	14 %	
Time, less than \$100,000	1,117,956	5 %		1,044,389	5 %	
Total	\$21,243,894	100 %		\$21,137,486	100 %	

The Company's brokered deposits totaled \$1.7 billion at March 31, 2019, compared to \$1.4 billion at December 31, 2018. The increase in brokered deposits serves to support our on-balance-sheet liquidity position.

Borrowings

At March 31, 2019, the Bank had outstanding \$288.9 million of securities sold under agreements to repurchase, a decrease of \$8.2 million from December 31, 2018. At both March 31, 2019 and December 31, 2018, there were no outstanding federal funds purchased balances. The Bank had outstanding term debt consisting of advances from the FHLB of \$932.4 million at March 31, 2019, which increased \$180.6 million from December 31, 2018. The FHLB advances are secured by investment securities and loans secured by real estate. The FHLB advances have fixed interest rates ranging from 1.40% to 7.10% and mature in 2019 through 2030.

Junior Subordinated Debentures

We had junior subordinated debentures with carrying values of \$382.8 million and \$389.6 million at March 31, 2019 and December 31, 2018, respectively. The decrease is due to the change in fair value for the junior subordinated debentures elected to be carried at fair value. As of March 31, 2019, substantially all of the junior subordinated

debentures had interest rates that are adjustable on a quarterly basis based on a spread over three month LIBOR.

Table of Contents

Liquidity and Cash Flow

The principal objective of our liquidity management program is to maintain the Bank's ability to meet the day-to-day cash flow requirements of our customers who either wish to withdraw funds or to draw upon credit facilities to meet their cash needs.

We monitor the sources and uses of funds on a daily basis to maintain an acceptable liquidity position. One source of funds includes public deposits. Individual state laws require banks to collateralize public deposits, typically as a percentage of their public deposit balance in excess of FDIC insurance. Public deposits represented 7% of total deposits at March 31, 2019 and 9% of total deposits at December 31, 2018. The amount of collateral required varies by state and may also vary by institution within each state, depending on the individual state's risk assessment of depository institutions. Changes in the pledging requirements for uninsured public deposits may require pledging additional collateral to secure these deposits, drawing on other sources of funds to finance the purchase of assets that would be available to be pledged to satisfy a pledging requirement, or could lead to the withdrawal of certain public deposits from the Bank. In addition to liquidity from core deposits and the repayments and maturities of loans and investment securities, the Bank can utilize established uncommitted federal funds lines of credit, sell securities under agreements to repurchase, borrow on a secured basis from the FHLB or issue brokered certificates of deposit.

The Bank had available lines of credit with the FHLB totaling \$7.3 billion at March 31, 2019, subject to certain collateral requirements, namely the amount of pledged loans and investment securities. The Bank had available lines of credit with the Federal Reserve totaling \$695.9 million, subject to certain collateral requirements, namely the amount of certain pledged loans. The Bank had uncommitted federal funds line of credit agreements with additional financial institutions totaling \$460.0 million at March 31, 2019. Availability of these lines is subject to federal funds balances available for loan and continued borrower eligibility. These lines are intended to support short-term liquidity needs, and the agreements may restrict consecutive day usage.

The Company is a separate entity from the Bank and must provide for its own liquidity. Substantially all of the Company's revenues are obtained from dividends declared and paid by the Bank. There were \$61.5 million of dividends paid by the Bank to the Company in the three months ended March 31, 2019. There are statutory and regulatory provisions that could limit the ability of the Bank to pay dividends to the Company. We believe that such restrictions will not have an adverse impact on the ability of the Company to fund its quarterly cash dividend distributions to common shareholders and meet its ongoing cash obligations, which consist principally of debt service on the outstanding junior subordinated debentures.

As disclosed in the Condensed Consolidated Statements of Cash Flows, net cash used in operating activities was \$53.6 million during the three months ended March 31, 2019, with the difference between cash used in operating activities and net income consisting of originations of loans held for sale of \$487.1 million, the net increase in other assets of \$57.0 million and net decrease in other liabilities of \$28.9 million, offset by proceeds from the sale of loans held for sale of \$428.3 million. This compares to net cash provided by operating activities of \$69.0 million during the three months ended March 31, 2018, with the difference between cash provided by operating activities and net income largely consisting of originations of loans held for sale of \$687.2 million, offset by proceeds from the sale of loans held for sale of \$660.0 million.

Net cash of \$53.5 million provided by investing activities during the three months ended March 31, 2019, consisted principally of redemption of restricted equity securities of \$198.2 million and proceeds from investment securities available for sale of \$119.4 million, offset by purchases of restricted equity securities of \$205.4 million, and net cash paid in divestiture of a store of \$44.6 million. This compares to net cash of \$236.2 million used in investing activities during the three months ended March 31, 2018, which consisted principally of net loan originations of \$276.5 million, purchases of investment securities available for sale of \$89.1 million, offset by proceeds from investment securities

available for sale of \$107.9 million and proceeds from the sale of loans and leases of \$21.6 million.

Net cash of \$280.2 million provided by financing activities during the three months ended March 31, 2019 primarily consisted of proceeds from term debt borrowings of \$230.7 million and \$155.9 million net increase in deposits, offset by \$50.0 million repayment of term debt and \$46.3 million of dividends paid on common stock. This compares to net cash of \$102.1 million provided by financing activities during the three months ended March 31, 2018, which consisted primarily of \$158.8 million net increase in deposits and proceeds from term debt borrowings of \$50.0 million, offset by \$50.5 million repayment of term debt and \$39.6 million in dividends paid on common stock.

Although we expect the Bank's and the Company's liquidity positions to remain satisfactory during 2019, it is possible that our deposit growth for 2019 may not be maintained at previous levels due to pricing pressure or store consolidations. In addition, in order to generate deposit growth, our pricing may need to be adjusted in a manner that results in increased interest expense on deposits.

Capital Resources

Shareholders' equity at March 31, 2019 was \$4.1 billion, an increase of \$55.9 million from December 31, 2018. The increase in shareholders' equity during the three months ended March 31, 2019 was principally due to net income and other comprehensive income for the period, offset by declared common dividends.

The Company's dividend policy considers, among other things, earnings, regulatory capital levels, the overall payout ratio and expected asset growth to determine the amount of dividends declared, if any, on a quarterly basis. There is no assurance that future cash dividends on common shares will be declared or increased. The following table presents cash dividends declared and dividend payout ratios (dividends declared per common share divided by basic earnings per common share) for the three months ended March 31, 2019 and 2018:

Cash Dividends and Payout Ratios per Common Share

	Three months ended		March 31,	
	2019	2018	2019	2018
Dividend declared per common share	\$0.21	\$ 0.20		
Dividend payout ratio	62	% 56	%	%

As of March 31, 2019, a total of 10.2 million shares are available for repurchase under the Company's current share repurchase plan. During the three months ended March 31, 2019, no shares were repurchased under this plan. The Board of Directors approved an extension of the repurchase plan to July 31, 2019. The timing and amount of future repurchases will depend upon the market price for our common stock, securities laws restricting repurchases, asset growth, earnings, and our capital plan. In addition, our stock plans provide that option and award holders may pay for the exercise price and tax withholdings in part or whole by tendering previously held shares.

Table of Contents

The following table shows the Company's consolidated and the Bank's capital adequacy ratios compared to the regulatory minimum capital ratio and the regulatory minimum capital ratio needed to qualify as a "well-capitalized" institution, as calculated under regulatory guidelines of the Basel Committee on Banking Supervision to the Basel capital framework ("Basel III") at March 31, 2019 and December 31, 2018:

(dollars in thousands)	Actual		For Capital Adequacy purposes		To be Well Capitalized	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of March 31, 2019

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our assessment of market risk as of March 31, 2019 indicates there are no material changes in the quantitative and qualitative disclosures from those in our Annual Report on Form 10-K for the year ended December 31, 2018.

Table of Contents

Item 4. Controls and Procedures

Our management, including our Chief Executive Officer, Chief Financial Officer and Principal Accounting Officer, has concluded that our disclosure controls and procedures are effective in timely alerting them to information relating to us that is required to be included in our periodic filings with the SEC. The disclosure controls and procedures were last evaluated by management as of March 31, 2019.

No change in our internal controls occurred during the first quarter of 2019 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

Due to the nature of our business, we are involved in legal proceedings that arise in the ordinary course of our business. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed under "Part I--Item 1A--Risk Factors" in our Form 10-K for the year ended December 31, 2018. These factors could materially and adversely affect our business, financial condition, liquidity, results of operations and capital position, and could cause our actual results to differ materially from our historical results or the results contemplated by the forward-looking statements contained in this report. There have been no material changes from the risk factors described in our Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a)Not applicable

(b)Not applicable

(c)The following table provides information about repurchases of common stock by the Company during the quarter ended March 31, 2019:

Period	Total number of Common Shares Purchased (1)	Average Price Paid per Common Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (2)	Maximum Number of Remaining Shares that May be Purchased at Period End under the Plan
1/1/19 - 1/31/19	24,878	\$ 17.68	—	10,155,429
2/1/19 - 2/28/19	57,430	\$ 17.79	—	10,155,429
3/1/19 - 3/31/19	25,780	\$ 17.73	—	10,155,429
Total for quarter	108,088	\$ 17.75	—	

(1) Common shares repurchased by the Company during the quarter consist of cancellation of 108,088 shares to be issued upon vesting of restricted stock awards to pay withholding taxes. During the three months ended March 31, 2019, no shares were repurchased pursuant to the Company's publicly announced corporate stock repurchase plan described in (2) below.

(2) The Company's share repurchase plan, which was first approved by its Board of Directors and announced in August 2003, was amended on September 29, 2011 to increase the number of common shares available for repurchase under the plan to 15 million shares. The repurchase program has been extended multiple times by the board with the current expiration date of July 31, 2019. As of March 31, 2019, a total of 10.2 million shares remained available for repurchase. The timing and amount of future repurchases will depend upon the market price for our common stock, laws and regulations restricting repurchases, asset growth, earnings, and our capital plan.
