**Delivery of Shareholder Documents.** The Securities and Exchange Commission (the "SEC") permits funds to deliver only one copy of shareholder documents, including prospectuses, proxy statements and shareholder reports, to fund investors with multiple accounts at the same residential or post office box address. This practice is often called "householding" and it helps eliminate duplicate mailings to shareholders.

**Eaton Vance, or your financial adviser, may household the mailing of your documents indefinitely unless you instruct Eaton Vance, or your financial adviser, otherwise.**

If you would prefer that your Eaton Vance documents not be househanded, please contact Eaton Vance at 1-800-262-1122, or contact your financial adviser.

Your instructions that householding not apply to delivery of your Eaton Vance documents will be effective within 30 days of receipt by Eaton Vance or your financial adviser.

**Portfolio Holdings.** Each Eaton Vance Fund and its underlying Portfolio (if applicable) will file a schedule of its portfolio holdings on Form N-Q with the SEC for the first and third quarters of each fiscal year. The Form N-Q will be available on the Eaton Vance website [www.eatonvance.com](http://www.eatonvance.com), by calling Eaton Vance at 1-800-262-1122 or in the EDGAR database on the SEC's website at [www.sec.gov](http://www.sec.gov). Form N-Q may also be reviewed and copied at the SEC's public reference room in Washington, D.C. (call 1-800-732-0330 for information on the operation of the public reference room).

**Proxy Voting.** From time to time, funds are required to vote proxies related to the securities held by the funds. The Eaton Vance Funds or their underlying Portfolios (if applicable) vote proxies according to a set of policies and procedures approved by the Funds' and Portfolios' Boards. You may obtain a description of these policies and procedures and information on how the Funds or Portfolios voted proxies relating to portfolio securities during the most recent 12 month period ended June 30, without charge, upon request, by calling 1-800-262-1122. **Eaton Vance Municipal Income Trusts as of November 30, 2007**

**management's discussion of fund performance**

Eaton Vance Municipal Income Trusts (the Trusts) are closed-end Trusts, traded on the American Stock Exchange, which are designed to provide current income exempt from regular federal income tax and state personal income taxes, as applicable. This income is earned by investing primarily in investment-grade municipal securities.

**Economic and Market Conditions**

Economic growth in the third quarter of 2007 rose 4.9%, following the 3.8% growth rate achieved in the second quarter of 2007, according to preliminary Commerce Department data. At the end of November 2007, the housing sector continued to struggle due to market concerns related to subprime mortgages. However, the weaker dollar is having a stimulative effect on economic growth in export-related industries, tourism, and on U.S.-based multinational companies whose foreign profits are translated into more dollars. Overall, we believe the economy appears to be slowing, but in a somewhat controlled manner.

According to the Federal Reserve (the Fed), core inflation (which excludes the food and energy sectors) was still fairly well contained within the upper end of the Fed's comfort zone. However, more volatile oil and food costs posed a potential threat for overall inflation longer-term. On September 18, 2007, the Fed lowered its Federal Funds rate by 50 basis points to 4.75% from 5.25% its first rate cut since the Fed stopped raising rates in June 2006 and simultaneously lowered the Discount Rate by 50 basis points to 5.25% from 5.75%. On October 31, 2007, the Fed further cut the Fed Funds rate by 0.25% to 4.50% and the Discount Rate by 0.25% to 5.00%. (Shortly after this reporting period, the Fed once again cut the Fed Funds rate on December 11, 2007 by 25 basis points to 4.25% and the Discount Rate by 25 basis points to 4.75%.) Management believes that these moves were aimed at providing liquidity during a period of increased uncertainty and tighter credit conditions that surfaced rapidly in mid-August and intensified in November.

For the year ended November 30, 2007, the Lehman Brothers Municipal Bond Index(1) (the Index), an unmanaged index of municipal bonds, posted a gain of 2.71%. For more information about each Trust's performance and that of funds in the same Lipper Classification,(1) see the Performance Information and Portfolio Composition pages that follow.

**Management Discussion**

The Trusts invest primarily in bonds with stated maturities of 10 years or longer, as longer-maturity bonds historically have provided greater tax-exempt income for investors than shorter-maturity bonds.

The Trusts underperformed their benchmark Index for the year ended November 30, 2007. Management believes that much of the underperformance can be attributed to the broader-based credit scare that took hold of the fixed-income markets in August and November of 2007 that led to a flight-to-quality bid in the Treasury market, particularly in shorter-maturity bonds. This move was driven by the continuing fear that financial companies may experience further write-downs as a result of their exposure to mortgage-backed collateralized debt

## Edgar Filing: EATON VANCE MICHIGAN MUNICIPAL INCOME TRUST - Form N-CSR

obligations (CDOs), coupled with the disclosure by some of the major municipal bond insurers of their exposure to mortgage related CDO debt. As a result of our active management style that focuses on income and longer call protection, the Trusts generally hold longer-duration bonds. The flight to shorter-maturity (duration) bonds during September and November 2007 resulted in the Trusts' relative underperformance for the period.

In November 2007, yield ratios for many municipal bonds exceeded those seen in late August 2007, when they were in the low 90% s. Management believes that this was the result of dislocation in the fixed-income marketplace caused by the sub-prime contagion fears, insurance companies' mark-to-market risks, and the decentralized nature of the municipal marketplace.

The ratio of yields on current coupon AAA-rated insured bonds to the yield on the 30-year Treasury bond was 104% as of November 30, 2007, with many individual bonds trading higher than 104%.<sup>(2)</sup> Historically, this is a rare occurrence in the municipal bond market and is generally considered a signal that municipal bonds are significantly undervalued compared to Treasuries.

With this backdrop, we continue to manage all of our municipal funds and trusts with the same relative value approach that we have traditionally employed - maintaining a long-term perspective when markets exhibit extreme short-term volatility. The Eaton Vance culture and philosophy have not changed, and we believe they have provided excellent long-term benefits to our investors over time.

*\*\* The leverage amount is Auction Preferred Shares at liquidation value as a percentage of the Trust's net assets applicable to common shares plus Auction Preferred Shares. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).*

*(1) Returns are historical and are calculated by determining the percentage change in share price or net asset value with all distributions reinvested. The Trust's performance at market share price will differ from its results at NAV. Although share price performance generally reflects investment results over time, during shorter periods, returns at share price can also be affected by factors such as changing perceptions about the Trust, market conditions, fluctuations in supply and demand for the Trust's shares, or changes in Trust distributions. Performance results reflect the effect of leverage resulting from the Trust's issuance of Auction Preferred Shares.*

*(2) The Trust's market yield is calculated by dividing the last dividend paid per common share of the fiscal year by the share price at the end of the fiscal year and annualizing the result.*

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Trust's current performance may be lower or higher than the quoted return. For performance as of the most recent month end, please refer to [www.eatonvance.com](http://www.eatonvance.com).

*\*\* The leverage amount is Auction Preferred Shares at liquidation value as a percentage of the Trust's net assets applicable to common shares plus Auction Preferred Shares. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).*

*(1) Returns are historical and are calculated by determining the percentage change in share price or net asset value with all distributions reinvested. The Trust's performance at market share price will differ from its results at NAV. Although share price performance generally reflects investment results over time, during shorter periods, returns at share price can also be affected by factors such as changing perceptions about the Trust, market conditions, fluctuations in supply and demand for the Trust's shares, or changes in Trust distributions. Performance results reflect the effect of leverage resulting from the Trust's issuance of Auction Preferred Shares.*

*(2) The Trust's market yield is calculated by dividing the last dividend paid per common share of the fiscal year by the share price at the end of the fiscal year and annualizing the result.*

*(3) Taxable-equivalent figure assumes a maximum 40.83% combined federal and state income tax rate. A lower tax rate would result in a lower tax-equivalent figure.*

*(4) It is not possible to invest directly in an Index. The Index's total return does not reflect the expenses that would have been incurred if an investor individually purchased or sold the securities represented in the Index. Index performance is available as of month end only.*

*(5) The Lipper Averages are the average annual total returns, at net asset value, of the funds that are in the same Lipper Classification as the Trust. It is not possible to invest in a Lipper Classification. Lipper Classifications may include insured and uninsured funds, as well as leveraged and unleveraged funds. The Lipper New Jersey Municipal Debt Funds Classification (closed-end) contained 13, 13 and 8 funds for the 1-year, 5-year and Life-of-Trust time periods, respectively. The aggregate percentage insured by an individual financial institution ranged from 0.5% to 18.8% of total investments.
