Form 10-Q

August 02, 2017

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2017

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-16189

NiSource Inc.

(Exact name of registrant as specified in its charter)

Delaware 35-2108964

(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification
No.)

801 East 86th Avenue 46410
Merrillville, Indiana

(Address of principal executive offices) (Zip Code)

(877) 647-5990

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.)

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer" "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Emerging growth company

Non-accelerated filer Smaller reporting company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: Common Stock, \$0.01 Par Value: 325,870,354 shares outstanding at July 24, 2017.

MPSC	Maryland Public Service Commission
NAAQS	National Ambient Air Quality Standards
NOL	Net operating loss
NYMEX	New York Mercantile Exchange
OPEB	Other Postretirement Benefits
OUCC	Office of Utility Consumer Counselor
PHMSA	U.S. Department of Transportation Pipeline and Hazardous Materials Safety Administration
Pure Air	Pure Air on the Lake LP
RCRA	Resource Conservation and Recovery Act
ppb	Parts per billion
PUCO	Public Utilities Commission of Ohio
SEC	Securities and Exchange Commission
TDSIC	Transmission, Distribution and Storage System Improvement Charge
TUAs	Transmission Upgrade Agreements
VIE	Variable Interest Entities
VSCC	Virginia State Corporation Commission

Note regarding forward-looking statements

This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Investors and prospective investors should understand that many factors govern whether any forward-looking statement contained herein will be or can be realized. Any one of those factors could cause actual results to differ materially from those projected. These forward-looking statements include, but are not limited to, statements concerning NiSource’s plans, strategies, objectives, expected performance, expenditures, recovery of expenditures through rates, stated on either a consolidated or segment basis, and any and all underlying assumptions and other statements that are other than statements of historical fact. All forward-looking statements are based on assumptions that management believes to be reasonable; however, there can be no assurance that actual results will not differ materially.

Factors that could cause actual results to differ materially from the projections, forecasts, estimates and expectations discussed in this Quarterly Report on Form 10-Q include, among other things, NiSource’s debt obligations; any changes in NiSource’s credit rating; NiSource’s ability to execute its growth strategy; changes in general economic, capital and commodity market conditions; pension funding obligations; economic regulation and the impact of regulatory rate reviews; NiSource's ability to obtain expected financial or regulatory outcomes; any damage to NiSource's reputation; compliance with environmental laws and the costs of associated liabilities; fluctuations in demand from residential and commercial customers; economic conditions of certain industries; the success of NIPSCO's electric generation strategy; the price of energy commodities and related transportation costs; the reliability of customers and suppliers to fulfill their payment and contractual obligations; potential impairments of goodwill or definite-lived intangible assets; changes in taxation and accounting principles; potential incidents and other operating risks associated with our business; the impact of an aging infrastructure; the impact of climate change; potential cyber-attacks; construction risks and natural gas costs and supply risks; extreme weather conditions; the attraction and retention of a qualified workforce; advances in technology; the ability of NiSource's subsidiaries to generate cash; tax liabilities associated with the separation of Columbia Pipeline Group, Inc. on July 1, 2015, and other matters set forth

in the “Risk Factors” section of NiSource’s Annual Report on Form 10-K for the fiscal year ended December 31, 2016, many of which risks are beyond the control of NiSource. In addition, the relative contributions to profitability by each business segment, and the assumptions underlying the forward-looking statements relating thereto, may change over time.

All forward-looking statements are expressly qualified in their entirety by the foregoing cautionary statements. NiSource undertakes no obligation to, and expressly disclaims any such obligation to, update or revise any forward-looking statements to reflect changed assumptions, the occurrence of anticipated or unanticipated events or changes to the future results over time or otherwise, except as required by law.

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited)

1. Basis of Accounting Presentation

The accompanying Condensed Consolidated Financial Statements (unaudited) for NiSource Inc. ("NiSource" or the "Company") reflect all normal recurring adjustments that are necessary, in the opinion of management, to present fairly the results of operations in accordance with GAAP in the United States of America. The accompanying financial statements contain the accounts of the Company and its majority-owned or controlled subsidiaries.

The accompanying financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in NiSource's Annual Report on Form 10-K for the fiscal year ended December 31, 2016. Income for interim periods may not be indicative of results for the calendar year due to weather variations and other factors.

The Condensed Consolidated Financial Statements (unaudited) have been prepared pursuant to the rules and regulations of the SEC. Certain information and note disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to those rules and regulations, although NiSource believes that the disclosures made in this quarterly report on Form 10-Q are adequate to make the information herein not misleading.

2. Recent Accounting Pronouncements

Recently Issued Accounting Pronouncements

NiSource is currently evaluating the impact of certain ASUs on its Condensed Consolidated Financial Statements (unaudited) and Notes to Condensed Consolidated Financial Statements (unaudited), which are described below:

Standard	Description	Effective Date	Effect on the financial statements or other significant matters
ASU 2017-07, Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost	The pronouncement changes how defined benefit pension and other postretirement benefit plans present net periodic benefit cost. The service cost component of net periodic benefit cost will be included with other employee compensation costs whereas other components of the net periodic benefit cost will be disclosed separately outside of income from operations in the income statement. Additionally, only the service cost component of net periodic benefit cost will be eligible for capitalization.	Annual periods beginning after December 15, 2017, including interim periods therein. Early adoption is permitted.	NiSource is currently evaluating the impact of adoption on the Condensed Consolidated Financial Statements (unaudited) and Notes to Condensed Consolidated Financial Statements (unaudited).

Standard	Description	Effective Date	Effect on the financial statements or other significant matters
ASU 2016-12, Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients	The pronouncement clarifies implementation guidance in ASU 2014-09 on assessing collectability, noncash consideration and the presentation of sales and other similar taxes collected from customers.		NiSource has formed an internal stakeholder group to promote information sharing and communication of the new requirements. Additionally, NiSource participates in an informal forum of industry peers where questions can be asked and interpretations of the new standard can be shared. Recently, involvement in this group has resulted in additional clarity on industry-specific issues such as treatment of CIAC, scoping of tariff arrangements and presentation of alternative revenue programs. This clarity will help to further NiSource's adoption efforts. NiSource has separated its various revenue streams into high-level categories, which serve as the basis for accounting analysis and documentation as it relates to the pronouncement's impact on NiSource's revenues. Substantially all of NiSource's revenues are tariff based, which NiSource concluded will be in scope of ASC 606. NiSource has also undertaken efforts to outline mock footnote disclosures intended to satisfy ASC 606's disclosure requirements. NiSource expects to adopt this ASU effective January 1, 2018. As of June 30, 2017, NiSource has not concluded on a method of adoption, nor is NiSource able to estimate the impact the adoption of these standards will have on the financial statements.
ASU 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations	The pronouncement clarifies the principal versus agent guidance in ASU 2014-09. The amendment clarifies how an entity should identify the unit of accounting for the principal versus agent evaluation, and how it should apply the control principle to certain types of arrangements. The pronouncement outlines a single, comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance.	Annual periods beginning after December 15, 2017, including interim periods therein. Early adoption is permitted for annual or interim periods beginning after December 15, 2016.	
ASU 2014-09, Revenue from Contracts with Customers (Topic 606)	The core principle of the new standard is that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.		
ASU 2016-02, Leases (Topic 842)	The pronouncement introduces a lessee model that brings most leases on the balance sheet. The standard requires that lessees recognize the following for all leases (with the exception of short-term leases, as that term is defined in the	Annual periods beginning after December 15, 2018, including interim periods therein. Early adoption is permitted.	NiSource has formed an internal stakeholder group that meets periodically to share information and gather data related to leasing activity at NiSource. This includes compiling a list of all contracts that could meet the definition of a lease under the new standard and evaluating the accounting for these contracts under the new standard to determine the ultimate impact the new standard will have on

standard) at the lease commencement date: (1) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (2) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term.

NiSource's financial statements. Also, this procedure has identified process improvements to ensure data from newly initiated leases is captured to comply with the new standard. This work included the assistance of a third-party advisory firm. NiSource plans to adopt this standard effective January 1, 2019.

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

Recently Adopted Accounting Pronouncements

Standard	Adoption
<p>ASU 2017-09, Compensation-Stock Compensation (Topic 718): Scope of Modification Accounting</p>	<p>NiSource elected to adopt this ASU effective July 1, 2017. The adoption of this standard will not have a material impact on the Condensed Consolidated Financial Statements (unaudited) or Notes to Condensed Consolidated Financial Statements (unaudited).</p>
<p>ASU 2017-04, Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment</p>	<p>NiSource elected to adopt this ASU effective January 1, 2017. The adoption of this standard did not have a material impact on the Condensed Consolidated Financial Statements (unaudited) or Notes to Condensed Consolidated Financial Statements (unaudited).</p>
<p>ASU 2016-09, Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting</p>	<p>NiSource elected to adopt this pronouncement during the third quarter of 2016. Upon adoption, NiSource elected to begin accounting for forfeitures of share-based awards as they occur. The impact of this change was not material. Additionally, NiSource recorded a \$25.3 million credit to beginning retained deficit. This adjustment represents excess tax benefits generated in years prior to 2016 that were previously not recognized in stockholders' equity due to NOLs in those years. Both of these adjustments were adopted on a modified retrospective basis. Lastly, NiSource recorded income tax benefits of \$7.2 million related to excess tax benefits generated in 2016. This provision was adopted on a prospective basis. However, because NiSource adopted the standard during an interim period, the standard required this \$7.2 million benefit be reflected as though it was adopted as of January 1, 2016. Quarter-to-date March 31, 2016 and June 30, 2016 earnings per share from continuing operations increased by \$0.02 and \$0.00, respectively, as a result of the adoption. For additional information, see Note 2, "Recent Accounting Pronouncements" in NiSource's Form 10-Q for the quarterly period ended September 30, 2016.</p>

3. Earnings Per Share

Basic EPS is computed by dividing net income by the weighted-average number of shares of common stock outstanding for the period. The weighted-average shares outstanding for diluted EPS includes the incremental effects of the various long-term incentive compensation plans. The computation of diluted average common shares for the three months ended June 30, 2017 is not presented since NiSource had a loss from continuing operations on the Condensed Statements of Consolidated Income (unaudited) during the period and any incremental shares would have had an antidilutive impact on EPS. The computation of diluted average common shares is as follows:

	Three Months Ended	Six Months Ended	
	June 30, 2016	June 30, 2017	June 30, 2016
(in thousands)			
Denominator			
Basic average common shares outstanding	321,725	324,386	321,003
Dilutive potential common shares:			

Shares contingently issuable under employee stock plans	163	452	104
Shares restricted under employee stock plans	1,316	975	1,725
Diluted Average Common Shares	323,204	325,813	322,832

4. Common Stock

ATM Program. On May 3, 2017, NiSource entered into four separate equity distribution agreements, pursuant to which NiSource may sell, from time to time, up to an aggregate of \$500.0 million of its common stock. The program expires on December 31, 2018. Shares of common stock are offered pursuant to NiSource's shelf registration statement filed with the SEC. During the three and six months ended June 30, 2017, NiSource issued 1,318,461 shares of common stock under the program at an average price of \$25.88 per share, receiving proceeds, net of fees, of \$33.8 million. As of June 30, 2017, approximately \$465.9 million of equity remained available for issuance under the ATM Program.

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

5. Gas in Storage

Both the LIFO inventory methodology and the weighted-average cost methodology are used by NiSource to value natural gas in storage. Gas Distribution Operations prices natural gas storage injections at the average of the costs of natural gas supply purchased during the year. For interim periods, the difference between current projected replacement cost and the LIFO cost for quantities of gas temporarily withdrawn from storage is recorded as a temporary LIFO liquidation credit or debit within the Condensed Consolidated Balance Sheets (unaudited). Due to seasonality requirements, NiSource expects interim variances in LIFO layers to be replenished by year end. NiSource had a temporary LIFO liquidation debit of \$7.7 million and zero as of June 30, 2017 and December 31, 2016, respectively, for certain gas distribution companies recorded within "Prepayments and other," on the Condensed Consolidated Balance Sheets (unaudited).

6. Regulatory Matters

Gas Distribution Operations Regulatory Matters

Cost Recovery and Trackers. Comparability of Gas Distribution Operations line item operating results is impacted by regulatory trackers that allow for the recovery in rates of certain costs such as those described below. Increases in the expenses that are the subject of trackers result in a corresponding increase in net revenues and therefore have essentially no impact on total operating income results.

Certain operating costs of the NiSource distribution companies are significant, recurring in nature, and generally outside the control of the distribution companies. Some states allow the recovery of such costs through cost tracking mechanisms. Such tracking mechanisms allow for abbreviated regulatory proceedings in order for the distribution companies to implement charges and recover appropriate costs. Tracking mechanisms allow for more timely recovery of such costs as compared with more traditional cost recovery mechanisms. Examples of such mechanisms include GCR adjustment mechanisms, tax riders, and bad debt recovery mechanisms.

A portion of the distribution companies' revenue is related to the recovery of gas costs, the review and recovery of which occurs through standard regulatory proceedings. All states in NiSource's operating area require periodic review of actual gas procurement activity to determine prudence and to permit the recovery of prudently incurred costs related to the supply of gas for customers. NiSource distribution companies have historically been found prudent in the procurement of gas supplies to serve customers.

Certain of the NiSource distribution companies have completed rate proceedings involving infrastructure replacement or are embarking upon regulatory initiatives to replace significant portions of their operating systems that are nearing the end of their useful lives. Each LDC's approach to cost recovery may be unique, given the different laws, regulations and precedent that exist in each jurisdiction.

Columbia of Ohio. On November 28, 2012, the PUCO approved Columbia of Ohio's application to extend its IRP for an additional five years (2013-2017), allowing Columbia of Ohio to continue to invest and recover on its accelerated main replacements. Columbia of Ohio filed its application to adjust rates associated with its IRP and DSM Riders on February 27, 2017, which requested authority to increase revenues by approximately \$31.5 million. On March 23, 2017, the PUCO Staff filed comments which recommended approval of the application with only minor revisions. The PUCO issued an order on April 26, 2017, approving Columbia of Ohio's application. New rates went into effect on May 1, 2017.

On February 27, 2017, Columbia of Ohio filed an application requesting authority to extend its IRP for an additional five years (2018-2022). On July 10, 2017, the PUCO Staff recommended approval of Columbia of Ohio's IRP for an additional five years, with modifications to Columbia of Ohio's proposed IRP rates for the five-year period.

Objections to the PUCO Staff Report are due August 9, 2017. An order is expected by the end of 2017.

NIPSCO Gas. On April 30, 2013, then Indiana Governor Pence signed Senate Enrolled Act 560, the TDSIC statute, into law. Among other provisions, this legislation provides for cost recovery outside of a base rate proceeding for new

or replacement electric and gas transmission, distribution, and storage projects that a public utility undertakes for the purposes of safety, reliability, system modernization, or economic development. Provisions of the TDSIC statute require that, among other things, requests for recovery include a seven-year plan of eligible investments. Once the plan is approved by the IURC, eighty percent of eligible costs can be recovered using a periodic rate adjustment mechanism. The cost recovery mechanism is referred to as a TDSIC mechanism. Recoverable costs include a return on, and of, the investment, including AFUDC, post-in-service carrying charges, operation and maintenance expenses, depreciation and property taxes. The remaining twenty percent of recoverable costs are to be deferred for

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

future recovery in the public utility's next general rate case. The periodic rate adjustment mechanism is capped at an annual increase of no more than two percent of total retail revenues. On February 28, 2017, NIPSCO filed TDSIC-6 requesting approval of \$271.3 million of cumulative net capital spend through December 31, 2016. An order approving NIPSCO's filing was received from the IURC on June 28, 2017, and new rates went into effect on July 1, 2017.

Columbia of Massachusetts. On July 7, 2014, the Governor of Massachusetts signed into law Chapter 149 of the Acts of 2014, An Act Relative to Natural Gas Leaks ("the Act"). The Act authorizes natural gas distribution companies to file gas infrastructure replacement plans with the Massachusetts DPU to address the replacement of aging natural gas pipeline infrastructure. In addition, the Act provides that the Massachusetts DPU may, after review of the plans, allow the proposed estimated costs of the plan into rates as of May 1 of the subsequent year. On October 31, 2016, Columbia of Massachusetts filed its GSEP for the 2017 construction year. Columbia of Massachusetts is proposing to recover an incremental \$8.4 million for a cumulative revenue requirement of \$17.2 million. An order was received from the Massachusetts DPU on April 28, 2017, and rates went into effect on May 1, 2017.

Columbia of Virginia. On April 29, 2016, Columbia of Virginia filed a request with the VSCC, seeking an annual revenue increase of \$37.0 million. On September 28, 2016, Columbia of Virginia implemented updated interim base rates subject to refund. On January 17, 2017, Columbia of Virginia presented a stipulation and proposed recommendation, representing a settlement by all parties to the proceeding that included a base revenue increase of \$28.5 million. On March 17, 2017, by final order, the VSCC approved the settlement agreement without modification. In accordance with the terms of the final order, Columbia of Virginia completed its refund of the difference between the interim customer rates implemented in 2016 and the rates approved by the final order.

Columbia of Maryland. On April 14, 2017, Columbia of Maryland filed a request with the MPSC to adjust base rates. On July 28, 2017, all parties filed a settlement agreement with the MPSC, under which Columbia of Maryland will receive an annual revenue increase of \$2.4 million, effective in late October 2017. The settlement agreement is subject to approval by the MPSC. An order is expected in the fourth quarter of 2017.

Electric Operations Regulatory Matters

Cost Recovery and Trackers. Comparability of Electric Operations line item operating results is impacted by regulatory trackers that allow for the recovery in rates of certain costs such as those described below. Increases in the expenses that are the subject of trackers result in a corresponding increase in net revenues and therefore have essentially no impact on total operating income results.

Certain operating costs of the Electric Operations are significant, recurring in nature, and generally outside the control of NIPSCO. The IURC allows for recovery of such costs through cost tracking mechanisms. Such tracking mechanisms allow for abbreviated regulatory proceedings in order for NIPSCO to implement charges and recover appropriate costs. Tracking mechanisms allow for more timely recovery of such costs as compared with more traditional cost recovery mechanisms. Examples of such mechanisms include electric energy efficiency programs, MISO non-fuel costs and revenues, resource capacity charges, federally mandated costs and environmental related costs.

A portion of NIPSCO's revenue is related to the recovery of fuel costs to generate power and the fuel costs related to purchased power. These costs are recovered through a FAC, a quarterly regulatory proceeding in Indiana. NIPSCO has approval from the IURC to recover certain environmental related costs through an ECT. Under the ECT, NIPSCO is permitted to recover (1) AFUDC and a return on the capital investment expended by NIPSCO to implement environmental compliance plan projects and (2) related operation and maintenance and depreciation expenses once the environmental facilities become operational. On January 31, 2017, NIPSCO filed ECR-29 which included \$261.1 million of cumulative net capital expenditures through the period ended December 31, 2016. An order was received from the IURC on April 26, 2017, and new rates went into effect the first billing cycle of May 2017.

NIPSCO made a TDSIC-1 rate adjustment mechanism filing on June 30, 2016 seeking recovery and ratemaking relief associated with \$45.5 million of cumulative net capital expenditures invested through April 30, 2016. An IURC order approving NIPSCO's filing was received on January 25, 2017. New rates went into effect with the first billing cycle of February 2017. On June 30, 2017, NIPSCO filed TDSIC-2 which included \$177.3 million of cumulative net capital expenditures through April 30, 2017. An order is expected by the fourth quarter of 2017.

On November 1, 2016, NIPSCO filed a petition with the IURC for relief regarding the construction of additional environmental projects required to comply with the final rules for regulation of CCRs and the ELG. On June 9, 2017, a settlement agreement was filed with the IURC regarding the CCR projects and treatment of associated costs. An evidentiary hearing is scheduled for

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

August 21, 2017 and an order is expected by the end of 2017. Given the current stay of the ELG rule, NIPSCO has agreed, with the settling parties, that the ELG projects and related costs would be addressed in a later proceeding. Refer to Note 15-C, "Environmental Matters," for more information.

7. Risk Management Activities

NiSource is exposed to certain risks relating to its ongoing business operations; namely commodity price risk and interest rate risk. NiSource recognizes that the prudent and selective use of derivatives may help to lower its cost of debt capital, manage its interest rate exposure and limit volatility in the price of natural gas.

Risk management assets and liabilities on NiSource's derivatives are presented on the Condensed Consolidated Balance Sheets (unaudited) as shown below:

(in millions)	June 30, December 31,	
	2017	2016
Risk Management Assets - Current ⁽¹⁾

Commodity Price Risk Management

NiSource and NiSource's utility customers are exposed to variability in cash flows associated with natural gas purchases and volatility in natural gas prices. NiSource purchases natural gas for sale and delivery to its retail, commercial and industrial customers, and for most customers the variability in the market price of gas is passed through in their rates. Some of NiSource's utility subsidiaries offer programs whereby variability in the market price of gas is assumed by the respective utility. The objective of NiSource's commodity price risk programs is to mitigate the gas cost variability, for NiSource or on behalf of its customers, associated with natural gas purchases or sales by economically hedging the various gas cost components using a combination of futures, options, forwards or other derivative contracts.

NIPSCO received IURC approval to lock in a fixed price for its natural gas customers using long-term forward purchase instruments. The term of these instruments may range from five to ten years and is limited to ten percent of NIPSCO's average annual GCA purchase volume. Gains and losses on these derivative contracts are deferred as

regulatory liabilities or assets and are remitted to or collected from customers through NIPSCO's quarterly GCA mechanism. These instruments are not designated as accounting hedges.

Interest Rate Risk Management

18

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

As of June 30, 2017, NiSource Finance has forward-starting interest rate swaps with an aggregate notional value totaling \$750.0 million to hedge the variability in cash flows attributable to changes in the benchmark interest rate during the periods from the effective dates of the swaps to the anticipated dates of forecasted debt issuances, which are expected to take place by the end of 2018. These interest rate swaps are designated as cash flow hedges. The effective portions of the gains and losses related to these swaps are recorded to AOCI and are recognized in earnings concurrently with the recognition of interest expense on the associated debt, once issued. If it becomes probable that a hedged forecasted transaction will no longer occur, the accumulated gains or losses on the derivative will be recognized currently in earnings. Earnings may also be impacted if the anticipated dates of forecasted debt issuances differ from the dates of the interest rate swaps.

On May 11, 2017, NiSource Finance settled \$950.0 million of forward-starting interest rate swap agreements contemporaneously with the issuance of \$2.0 billion of 3.49% and 4.375% senior notes, maturing in 2027 and 2047, respectively. These derivative contracts were accounted for as cash flow hedges. As part of the transaction, the associated net unrealized loss position of \$6.9 million is being amortized from accumulated other comprehensive loss into interest expense over the term of the associated interest payments. Cash associated with this payment is reflected within operating activities within the Condensed Statements of Consolidated Cash Flows (unaudited) for the six months ended June 30, 2017.

Realized gains and losses from NiSource's interest rate cash flow hedges are presented in "Interest expense, net" on the Condensed Statements of Consolidated Income (unaudited). There was no material income statement recognition of gains or losses relating to an ineffective portion of NiSource's hedges, nor were there amounts excluded from effectiveness testing for derivatives in cash flow hedging relationships at June 30, 2017 and December 31, 2016.

NiSource's derivative instruments measured at fair value as of June 30, 2017 and December 31, 2016 do not contain any credit-risk-related contingent features.

8. Fair Value

A. Fair Value Measurements

Recurring Fair Value Measurements. The following tables present financial assets and liabilities measured and recorded at fair value on NiSource's Condensed Consolidated Balance Sheets (unaudited) on a recurring basis and their level within the fair value hierarchy as of June 30, 2017 and December 31, 2016:

Recurring Fair Value Measurements June 30, 2017 (in millions)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2017
Assets				
Risk management assets	\$ 0.3	\$ 16.9	\$ 0.3	\$ 17.5
Available-for-sale securities	—	128.0	—	128.0
Total	\$ 0.3	\$ 144.9	\$ 0.3	\$ 145.5
Liabilities				
Risk management liabilities	\$ 3.2	\$ 59.4	\$ —	\$ 62.6
Total	\$ 3.2	\$ 59.4	\$ —	\$ 62.6

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

Recurring Fair Value Measurements December 31, 2016 (in millions)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of December 31, 2016
Assets				
Risk management assets	\$ 5.4	\$ 43.6	\$ —	\$ 49.0
Available-for-sale securities	—	131.5	—	131.5
Total	\$ 5.4	\$ 175.1	\$ —	\$ 180.5
Liabilities				
Risk management liabilities	\$ 1.2	\$ 58.9	\$ 1.2	\$ 61.3
Total	\$ 1.2	\$ 58.9	\$ 1.2	\$ 61.3

Risk management assets and liabilities include interest rate swaps, exchange-traded NYMEX futures and NYMEX options and non-exchange-based forward purchase contracts. Exchange-traded derivative contracts are based on unadjusted quoted prices in active markets and are classified within Level 1. These financial assets and liabilities are secured with cash on deposit with the exchange; therefore, nonperformance risk has not been incorporated into these valuations. Certain non-exchange-traded derivatives are valued using broker or over-the-counter, on-line exchanges. In such cases, these non-exchange-traded derivatives are classified within Level 2. Non-exchange-based derivative instruments include swaps, forwards and options. In certain instances, these instruments may utilize models to measure fair value. NiSource uses a similar model to value similar instruments. Valuation models utilize various inputs that include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, other observable inputs for the asset or liability and market-corroborated inputs, (i.e., inputs derived principally from or corroborated by observable market data by correlation or other means). Where observable inputs are available for substantially the full term of the asset or liability, the instrument is categorized within Level 2. Certain derivatives trade in less active markets with a lower availability of pricing information and models may be utilized in the valuation. When such inputs have a significant impact on the measurement of fair value, the instrument is categorized within Level 3. Credit risk is considered in the fair value calculation of derivative instruments that are not exchange-traded. Credit exposures are adjusted to reflect collateral agreements which reduce exposures. As of June 30, 2017 and December 31, 2016, there were no material transfers between fair value hierarchies. Additionally, there were no changes in the method or significant assumptions used to estimate the fair value of NiSource's financial instruments.

NiSource Finance has entered into forward-starting interest rate swaps to hedge the interest rate risk on coupon payments of forecasted issuances of long-term debt. These swaps are designated as cash flow hedges. Credit risk is considered in the fair value calculation of each interest rate swap. As they are based on observable data and valuations of similar instruments, the interest rate swaps are categorized within Level 2 of the fair value hierarchy. There was no exchange of premium at the initial date of the swaps, and NiSource can settle the swaps at any time. For additional information see Note 7, "Risk Management Activities."

NIPSCO has entered into long-term forward natural gas purchase instruments that range from five to ten years to lock in a fixed price for its natural gas customers. NiSource values these contracts using a pricing model that incorporates market-based information when available, as these instruments trade less frequently and are classified within Level 2 of the fair value hierarchy. For additional information see Note 7, "Risk Management Activities."

Available-for-sale securities are investments pledged as collateral for trust accounts related to NiSource's wholly-owned insurance company. Available-for-sale securities are included within "Other investments" in the Condensed Consolidated Balance Sheets (unaudited). NiSource values U.S. Treasury, corporate debt and mortgage-backed securities using a matrix pricing model that incorporates market-based information. These securities

trade less frequently and are classified within Level 2. Total unrealized gains and losses from available-for-sale securities are included in other comprehensive income (loss).

20

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

The amortized cost, gross unrealized gains and losses and fair value of available-for-sale securities at June 30, 2017 and December 31, 2016 were:

June 30, 2017 (in millions)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available-for-sale securities				
U.S. Treasury debt securities	\$ 29.9	\$ —	\$ —	\$29.9
Corporate/Other debt securities	97.5	1.1	(0.5)	98.1
Total	\$ 127.4	\$ 1.1	\$ (0.5)	\$128.0
December 31, 2016 (in millions)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available-for-sale securities				
U.S. Treasury debt securities	\$ 35.0	\$ 0.1	\$ (0.6)	\$34.5
Corporate/Other debt securities	98.7	0.3	(2.0)	97.0
Total	\$ 133.7	\$ 0.4	\$ (2.6)	\$131.5

Realized gains and losses on available-for-sale securities were immaterial for the three and six months ended June 30, 2017 and 2016.

The cost of maturities sold is based upon specific identification. At June 30, 2017, approximately \$12.7 million of U.S. Treasury debt securities and approximately \$2.3 million of Corporate/Other debt securities have maturities of less than a year.

There are no material items in the fair value reconciliation of Level 3 assets and liabilities measured at fair value on a recurring basis for the three and six months ended June 30, 2017 and 2016.

Non-recurring Fair Value Measurements. There were no significant non-recurring fair value measurements recorded during the three and six months ended June 30, 2017.

B. Other Fair Value Disclosures for Financial Instruments. The carrying amount of cash and cash equivalents, restricted cash, customer deposits and short-term borrowings is a reasonable estimate of fair value due to their liquid or short-term nature. NiSource's long-term borrowings are recorded at historical amounts.

The following method and assumptions were used to estimate the fair value of each class of financial instruments.

Long-term Debt. The fair value of outstanding long-term debt is estimated based on the quoted market prices for the same or similar securities. Certain premium costs associated with the early settlement of long-term debt are not taken into consideration in determining fair value. These fair value measurements are classified within Level 2 of the fair value hierarchy. For the six months ended June 30, 2017, there was no change in the method or significant assumptions used to estimate the fair value of long-term debt.

The carrying amount and estimated fair values of these financial instruments were as follows:

(in millions)	Carrying Amount as of June 30, 2017	Estimated Fair Value as of June 30, 2017	Carrying Amount as of Dec. 31, 2016	Estimated Fair Value as of Dec. 31, 2016
Long-term debt (including current portion)	\$ 7,338.6	\$ 8,062.3	\$ 6,421.3	\$ 7,064.1

9. Transfers of Financial Assets

Columbia of Ohio, NIPSCO and Columbia of Pennsylvania each maintain a receivables agreement whereby they transfer their customer accounts receivables to third party financial institutions through wholly-owned and

consolidated special purpose entities. The three agreements expire between August 2017 and March 2018 and may be further extended if mutually agreed to by the parties thereto.

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

All receivables transferred to third parties are valued at face value, which approximates fair value due to their short-term nature. The amount of the undivided percentage ownership interest in the accounts receivables transferred is determined in part by required loss reserves under the agreements.

Transfers of accounts receivable are accounted for as secured borrowings resulting in the recognition of short-term borrowings on the Condensed Consolidated Balance Sheets (unaudited). As of June 30, 2017, the maximum amount of debt that could be recognized related to NiSource's accounts receivable programs is \$300.0 million.

The following table reflects the gross receivables balance and net receivables transferred as well as short-term borrowings related to the securitization transactions as of June 30, 2017 and December 31, 2016:

(in millions)	June 30, December	
	2017	31, 2016
Gross Receivables	\$ 445.9	\$ 618.3
Less: Receivables not transferred	147.6	308.3
Net receivables transferred	\$ 298.3	\$ 310.0
Short-term debt due to asset securitization	\$ 298.3	\$ 310.0

For the six months ended June 30, 2017 and 2016, \$11.7 million and \$26.8 million was recorded as cash flows used for financing activities related to the change in short-term borrowings due to securitization transactions. Fees associated with the securitization transactions were \$0.6 million and \$0.1 million for the three months ended June 30, 2017 and 2016, respectively, and \$1.3 million and \$1.2 million for the six months ended June 30, 2017 and 2016, respectively. NiSource remains responsible for collecting on the receivables securitized and the receivables cannot be transferred to another party.

10. Goodwill

The following presents NiSource's goodwill balance allocated by segment as of June 30, 2017:

(in millions)	Gas	Electric	Corporate	Total
	Distribution Operations	Operations	and Other	
Goodwill	\$ 1,690.7	\$ —	—\$	—\$1,690.7

NiSource applied the qualitative "step 0" analysis to its reporting units for the annual impairment test performed as of May 1, 2017. For the current year test, NiSource assessed various assumptions, events and circumstances that would have affected the estimated fair value of the reporting units as compared to its base line May 1, 2016 "step 1" fair value measurement. The results of this assessment indicated that it was not more likely than not that its reporting unit fair values were less than the reporting unit carrying values, accordingly, no "step 1" analysis was required.

11. Income Taxes

NiSource's interim effective tax rates reflect the estimated annual effective tax rates for 2017 and 2016, adjusted for tax expense associated with certain discrete items. The effective tax rates for the three months ended June 30, 2017 and 2016 were 37.5% and 37.1%, respectively. The effective tax rate for the six months ended June 30, 2017 and 2016 was 36.2%. These effective tax rates differ from the Federal tax rate of 35% primarily due to the effects of tax credits, state income taxes, utility ratemaking, and other permanent book-to-tax differences.

The increase in the three month effective tax rate of 0.4% in 2017 versus the same period in 2016 is primarily related to changes in excess tax benefits on stock compensation. There was no material change in the year-to-date effective tax rate in 2017 versus the same period in 2016.

Additionally, there were no material changes recorded in 2017 to NiSource's uncertain tax positions as of December 31, 2016.

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

12. Pension and Other Postretirement Benefits

NiSource provides defined contribution plans and noncontributory defined benefit retirement plans that cover certain of its employees. Benefits under the defined benefit retirement plans reflect the employees' compensation, years of service and age at retirement. Additionally, NiSource provides health care and life insurance benefits for certain retired employees. The majority of employees may become eligible for these benefits if they reach retirement age while working for NiSource. The expected cost of such benefits is accrued during the employees' years of service. For most plans, cash contributions are remitted to grantor trusts.

For the six months ended June 30, 2017, NiSource contributed \$2.5 million to its pension plans and \$14.5 million to its other postretirement benefit plans.

The following tables provide the components of the plans' actuarially determined net periodic benefit cost for the three and six months ended June 30, 2017 and 2016:

	Pension Benefits		Other Postretirement Benefits	
	2017	2016	2017	2016
Three Months Ended June 30, (in millions)				
Components of Net Periodic Benefit Cost				
Service cost ⁽¹⁾	\$ 7.5	\$ 7.7	\$ 1.2	\$ 1.2
Interest cost ⁽¹⁾	17.2	22.4	4.4	5.5
Expected return on assets	(30.2)	(33.2)	(3.9)	(4.3)
Amortization of prior service credit	(0.2)	(0.1)	(1.1)	(1.2)
Recognized actuarial loss	13.4	15.3	0.7	0.8
Total Net Periodic Benefit Cost	\$ 7.7	\$ 12.1	\$ 1.3	\$ 2.0

⁽¹⁾Effective January 1, 2017, NiSource adopted the methodology of using a full yield curve (spot rate) approach to estimate the service and interest components of net periodic benefit cost. This change in accounting estimate resulted in a decrease in these costs for the three months ended June 30, 2017 when compared to the same period in 2016.

	Pension Benefits		Other Postretirement Benefits	
	2017	2016	2017	2016
Six Months Ended June 30, (in millions)				
Components of Net Periodic Benefit Cost				
Service cost ⁽¹⁾	\$ 15.0	\$ 15.4	\$ 2.4	\$ 2.4
Interest cost ⁽¹⁾	34.4	44.8	8.9	11.0
Expected return on assets	(60.5)	(66.4)	(7.9)	(8.6)
Amortization of prior service credit	(0.4)	(0.2)	(2.2)	(2.4)
Recognized actuarial loss	26.8	30.6	1.5	1.6
Total Net Periodic Benefit Cost	\$ 15.3	\$ 24.2	\$ 2.7	\$ 4.0

⁽¹⁾Effective January 1, 2017, NiSource adopted the methodology of using a full yield curve (spot rate) approach to estimate the service and interest components of net periodic benefit cost. This change in accounting estimate resulted in a decrease in these costs for the six months ended June 30, 2017 when compared to the same period in 2016.

13. Long-Term Debt

NiSource Finance is a wholly-owned, consolidated finance subsidiary of NiSource that engages in financing activities to raise funds for the business operations of NiSource and its subsidiaries. NiSource Finance was incorporated in March 2000 under the laws of the state of Indiana. Prior to 2000, the function of NiSource Finance was performed by

Capital Markets. NiSource Finance obligations are fully and unconditionally guaranteed by NiSource. Consequently, no separate financial statements for NiSource Finance are required to be reported. No NiSource subsidiaries guarantee debt.

NiSource announced on April 26, 2017, that it intends to merge NiSource Finance and Capital Markets with and into NiSource during the second half of 2017, pending receipt of applicable approvals. Upon completion of the mergers, NiSource will become the primary obligor of NiSource Finance's and Capital Markets' outstanding obligations. The mergers are not expected to have any impact on NiSource's consolidated financial statements or the credit ratings of outstanding debt securities.

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

On March 27, 2017, Capital Markets redeemed \$30.0 million of 7.86% and \$2.0 million of 7.85% medium-term notes at maturity.

On April 3, 2017, Capital Markets redeemed \$12.0 million of 7.82%, \$10.0 million of 7.92%, \$2.0 million of 7.93% and \$1.0 million of 7.94% medium-term notes at maturity.

On May 11, 2017, NiSource Finance closed its placement of \$2.0 billion in aggregate principal amount of its senior notes, comprised of \$1.0 billion of 3.49% senior notes due 2027 and \$1.0 billion of 4.375% senior notes due 2047. Related to this placement, NiSource settled \$950.0 million of aggregate notional value forward-starting interest rate swaps, originally entered into to mitigate interest risk associated with the planned issuance of these notes. Refer to Note 7, "Risk Management Activities," for additional information.

During the second quarter of 2017, NiSource Finance executed a tender offer for \$990.7 million of outstanding notes consisting of a combination of its 6.40% notes due 2018, 6.80% notes due 2019, 5.45% notes due 2020, and 6.125% notes due 2022. In conjunction with the debt retired, NiSource Finance recorded a \$111.5 million loss on early extinguishment of long-term debt, primarily attributable to early redemption premiums.

On June 12, 2017, NIPSCO redeemed \$22.5 million of 7.59% medium-term notes at maturity.

On July 1, 2017, NIPSCO redeemed \$55.0 million of 5.70% medium-term notes at maturity.

14. Short-Term Borrowings

NiSource generates short-term borrowings from its revolving credit facility, commercial paper program, letter of credit issuances and accounts receivable transfer programs. Each of these borrowing sources is described further below.

NiSource Finance maintains a revolving credit facility to fund ongoing working capital requirements, including the provision of liquidity support for its commercial paper program, provide for issuance of letters of credit and also for general corporate purposes. NiSource Finance's revolving credit facility has a program limit of \$1.85 billion and is comprised of a syndicate of banks led by Barclays. At June 30, 2017 and December 31, 2016, NiSource had no outstanding borrowings under this facility.

NiSource Finance's commercial paper program has a program limit of up to \$1.5 billion with a dealer group comprised of Barclays, Citigroup, Credit Suisse and Wells Fargo. As of June 30, 2017 and December 31, 2016, NiSource had commercial paper outstanding of \$603.0 million and \$1,178.0 million, respectively.

As of June 30, 2017 and December 31, 2016, NiSource had \$13.0 million and \$14.7 million of stand-by letters of credit, respectively. All stand-by letters of credit were under the revolving credit facility.

Transfers of accounts receivable are accounted for as secured borrowings resulting in the recognition of short-term borrowings on the Condensed Consolidated Balance Sheets (unaudited) in the amount of \$298.3 million and \$310.0 million as of June 30, 2017 and December 31, 2016, respectively. Refer to Note 9, "Transfers of Financial Assets," for additional information.

Short-term borrowings were as follows:

(in millions)	June 30, 2017	December 31, 2016
Commercial Paper weighted-average interest rate of 1.51% and 1.24% at June 30, 2017 and December 31, 2016, respectively	\$ 603.0	\$ 1,178.0
Accounts receivable securitization facility borrowings	298.3	310.0
Total Short-Term Borrowings	\$ 901.3	\$ 1,488.0

Given their maturities are less than 90 days, cash flows related to the borrowings and repayments of the items listed above are presented net in the Condensed Statements of Consolidated Cash Flows (unaudited).

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

15. Other Commitments and Contingencies

A. Guarantees and Indemnities. As a part of normal business, NiSource and certain subsidiaries enter into various agreements providing financial or performance assurance to third parties on behalf of certain subsidiaries. Such agreements include guarantees and stand-by letters of credit. These agreements are entered into primarily to support or enhance the creditworthiness otherwise attributed to a subsidiary on a stand-alone basis, thereby facilitating the extension of sufficient credit to accomplish the subsidiaries' intended commercial purposes. As of June 30, 2017 and December 31, 2016, NiSource had issued stand-by letters of credit of \$13.0 million and \$14.7 million, respectively.

B. Legal Proceedings. The Company is party to certain claims and legal proceedings arising in the ordinary course of business, none of which is deemed to be individually material at this time. Due to the inherent uncertainty of litigation, there can be no assurance that the resolution of any particular claim or proceeding would not have a material adverse effect on the Company's results of operations, financial position or liquidity. If one or more of such matters were decided against the Company, the effects could be material to the Company's results of operations in the period in which the Company would be required to record or adjust the related liability and could also be material to the Company's cash flows in the periods the Company would be required to pay such liability.

C. Environmental Matters. NiSource operations are subject to environmental statutes and regulations related to air quality, water quality, hazardous waste and solid waste. NiSource believes that it is in substantial compliance with the environmental regulations currently applicable to its operations.

It is management's continued intent to address environmental issues in cooperation with regulatory authorities in such a manner as to achieve mutually acceptable compliance plans. However, there can be no assurance that fines and penalties will not be incurred. Management expects a significant portion of environmental assessment and remediation costs to be recoverable through rates for certain NiSource companies.

As of June 30, 2017 and December 31, 2016, NiSource had recorded a liability of approximately \$115.7 million and \$111.4 million, respectively, to cover environmental remediation at various sites. The current portion of this liability is included in "Legal and environmental" in the Condensed Consolidated Balance Sheets (unaudited). The noncurrent portion is included in "Other noncurrent liabilities" in the Condensed Consolidated Balance Sheets (unaudited).

NiSource recognizes costs associated with environmental remediation obligations when the incurrence of such costs is probable and the amounts can be reasonably estimated. The original estimates for remediation activities may differ materially from the amount ultimately expended. The actual future expenditures depend on many factors, including currently enacted laws and regulations, the nature and extent of impact, the method of remediation and the availability of cost recovery. These expenditures are not currently estimable at some sites. NiSource periodically adjusts its liability as information is collected and estimates become more refined.

Electric Operations' compliance estimates disclosed below are reflective of NIPSCO's Integrated Resource Plan submitted to the IURC on November 1, 2016. See section D, "Other Matters," below for additional information.

Air

The actions listed below could require further reductions in emissions from various emission sources. NiSource will continue to closely monitor developments in these matters.

Future legislative and regulatory programs, including implementation of the EPA CPP, could significantly limit allowed GHG emissions or impose a cost or tax on GHG emissions. Additionally, rules that increase methane leak detection, require emission reductions or impose additional requirements for natural gas facilities could restrict GHG emissions and impose additional costs. The CPP and other federally enacted or proposed GHG reduction measures are subject to numerous legal challenges that could change the way the programs are implemented, and NiSource will carefully monitor all GHG reduction proposals and regulations.

National Ambient Air Quality Standards. The CAA requires the EPA to set NAAQS for six "criteria" air pollutants considered harmful to public health and the environment. Periodically, the EPA imposes new, or modifies existing, NAAQS. States containing areas that do not meet the new or revised standards, or contribute significantly to nonattainment of downwind states, may be required to take steps to achieve and maintain compliance with the

standards. These steps could include additional pollution controls on boilers, engines, turbines and other facilities owned by electric generation and gas distribution operations.

Ozone: On October 26, 2015, the EPA issued a final rule to lower the 8-hour ozone standard from 75 ppb to 70 ppb. After the EPA proceeds with designations, areas where NiSource operates that are currently designated in attainment with the standards may be reclassified as nonattainment. NiSource will continue to monitor this matter and cannot estimate its impact at this time.

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

Clean Power Plan. On October 23, 2015, the EPA issued a final rule to regulate CO₂ emissions from existing fossil-fuel EGUs under section 111(d) of the CAA. The final rule establishes national CO₂ emission-rate standards that are applied to each state's mix of affected EGUs to establish state-specific emission-rate and mass-emission limits. The final rule requires each state to submit a plan indicating how the state will meet the EPA's emission-rate or mass-emission limit, including possibly imposing reduction obligations on specific units. If a state does not submit a satisfactory plan, the EPA will impose a federal plan on that state. On February 9, 2016, the U.S. Supreme Court stayed implementation of the CPP until litigation is decided on its merits. The cost to comply with this rule will depend on a number of factors, including the outcome of CPP litigation, the requirements of the state plan or final federal plan, and the level of NIPSCO's required CO₂ emission reductions. It is possible that this new rule, comprehensive federal or state GHG legislation or other GHG regulation could result in additional expense or compliance costs that could materially impact NiSource's financial results. NIPSCO will continue to monitor this matter and cannot estimate its impact at this time. Should costs be incurred to comply with the CPP, NIPSCO believes such costs will be eligible for recovery through customer rates.

Waste

CERCLA. NiSource subsidiaries are potentially responsible parties at waste disposal sites under the CERCLA (commonly known as Superfund) and similar state laws. Additionally, NiSource affiliates have retained environmental liabilities, including remediation liabilities, associated with certain former operations.

MGP. A program has been instituted to identify and investigate former MGP sites where Gas Distribution Operations subsidiaries or predecessors may have liability. The program has identified 64 such sites where liability is probable. Remedial actions at many of these sites are being overseen by state or federal environmental agencies through consent agreements or voluntary remediation agreements.

NiSource utilizes a probabilistic model to estimate its future remediation costs related to its MGP sites. The model was prepared with the assistance of a third party and incorporates NiSource and general industry experience with remediating MGP sites. NiSource completes an annual refresh of the model in the second quarter of each fiscal year. No material changes to the estimated future remediation costs were noted as a result of the refresh completed as of June 30, 2017. The total estimated liability at NiSource related to the facilities subject to remediation was \$108.9 million and \$105.5 million at June 30, 2017 and December 31, 2016, respectively. The liability represents NiSource's best estimate of the probable cost to remediate the facilities. NiSource believes that it is reasonably possible that remediation costs could vary by as much as \$25 million in addition to the costs noted above. Remediation costs are estimated based on the best available information, applicable remediation standards at the balance sheet date, and experience with similar facilities.

CCRs. On April 17, 2015, the EPA issued a final rule for regulation of CCRs. The rule regulates CCRs under the RCRA Subtitle D, which determines them to be nonhazardous. The rule is implemented in phases and requires increased groundwater monitoring, reporting, recordkeeping and posting of related information to the Internet. The rule also establishes requirements related to CCR management and disposal. The rule will allow NIPSCO to continue its byproduct beneficial use program.

The publication of the CCR rule resulted in revisions to previously recorded legal obligations associated with the retirement of certain NIPSCO facilities. The actual asset retirement costs related to the CCR rule may vary substantially from the estimates used to record the increased asset retirement obligation due to the uncertainty about the compliance strategies that will be used and the preliminary nature of available data used to estimate costs. In addition, to comply with the rule, NIPSCO will be required to incur future capital expenditures to modify its infrastructure and manage CCRs. Capital compliance costs are currently expected to total approximately \$193 million. As allowed by the EPA, NIPSCO will continue to collect data over time to determine the specific compliance solutions and associated costs and, as a result, the actual costs may vary.

NIPSCO filed a petition on November 1, 2016 with the IURC seeking approval of the projects and recovery of the costs associated with CCR compliance. On June 9, 2017, NIPSCO filed with the IURC a settlement reached with

certain parties regarding the CCR projects and treatment of associated costs. An evidentiary hearing is scheduled for August 21, 2017 and an order is expected by the end of 2017.

Water

ELG. On November 3, 2015, the EPA issued a final rule to amend the ELG and standards for the Steam Electric Power Generating category. The final rule became effective January 4, 2016. The rule imposes new water treatment and discharge requirements on NIPSCO's electric generating facilities to be applied between 2018 and 2023. On April 24, 2017, the Fifth Circuit Court of Appeals granted the EPA's motion to hold in abeyance the litigation challenging the ELG, while the EPA proceeds with review and reconsideration of the ELG. On April 25, 2017, the EPA published notice in the Federal Register that the EPA is reconsidering the ELG in response to two petitions for reconsideration and that the EPA administratively stays all future ELG compliance deadlines

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

during its review. NIPSCO is unable to estimate the impact of the EPA stay and reconsideration at this time. Based upon a preliminary engineering study, capital compliance costs are currently expected to cost approximately \$170 million. On November 1, 2016, NIPSCO filed a petition with the IURC seeking approval of the projects and recovery of the costs associated with ELG compliance. Given the current stay of the ELG rule, NIPSCO has agreed with the settling parties as part of the settlement agreement discussed in the "CCRs" subsection above, that these ELG projects and related costs would be addressed in a later proceeding.

D. Other Matters.

Transmission Upgrade Agreements. On February 11, 2014, NIPSCO entered into TUAs with upgrade sponsors to complete upgrades on NIPSCO's transmission system on behalf of those sponsors. The upgrade sponsors agreed to reimburse NIPSCO for the total cost to construct transmission upgrades and place them into service, multiplied by a rate of 1.71 ("the multiplier").

On June 10, 2014, certain upgrade sponsors for both TUAs filed a complaint at the FERC against NIPSCO regarding the multiplier stated in the TUAs. On June 30, 2014, NIPSCO filed an answer defending the terms of the TUAs and the just and reasonable nature of the multiplier charged therein and moved for dismissal of the complaint. On December 8, 2014, the FERC issued an order in response to the complaint finding that it is appropriate for NIPSCO to recover, through the multiplier, substantiated costs of ownership related to the TUAs. On August 10, 2016, NIPSCO reached settlement with all remaining parties to the complaint and filed with the FERC for approval. An order from the FERC approving the settlement was received on January 31, 2017. Receipt of the FERC order did not result in a material impact to the Consolidated Financial Statements.

At the time the TUAs were executed, it was assumed the proceeds received from the upgrade sponsors would be taxable to NIPSCO. Accordingly, the multiplier included a provision for such taxes. On June 10, 2016, the U.S. Treasury Department issued a notice regarding transfers of property to regulated utilities by electric generators, stating that transfers within the scope of the notice will not be treated as taxable. In response to this notice, NIPSCO recorded a liability of \$8.6 million to reflect the estimated amount owed to the upgrade sponsors for the portion of the multiplier previously collected for taxes. This activity was recorded during the second quarter of 2016, and is included within "Other, net" in the Condensed Statement of Consolidated Income (unaudited). On April 4, 2017, the U.S. Internal Revenue Service issued a private letter ruling to NIPSCO. The ruling provides that the deemed contribution of the intertie and all sums paid for construction meet the safe harbor requirements of Notice 2016-36 and, upon filing a change in accounting method, are excludable from gross income as a non-shareholder contribution to capital. The receipt of the private letter ruling will not have a material impact to the Condensed Consolidated Financial Statements (unaudited). During the second quarter of 2017, NIPSCO settled the aforementioned liability via payment to the upgrade sponsors.

PHMSA EFV. On October 14, 2016, PHMSA issued a final rule that expands safety requirements for EFVs. Among the rule's provisions is a requirement for utilities to notify customers whose service lines are not currently equipped with an EFV of their right to request installation of an EFV. The rule took effect April 14, 2017. During 2017, NiSource's operating companies posted notifications on their websites in compliance with the rule and received regulatory authority for their proposed cost recovery plans with their respective state regulatory commissions in every state except for Massachusetts, where the method of cost recovery is under consideration by the DPU. Though not expected to be material, costs incurred by NiSource to comply with the rule are expected to be fully recoverable.

NIPSCO 2016 Integrated Resource Plan. Environmental, regulatory and economic factors, including low natural gas prices and aging coal-fired units, have led NIPSCO to consider modifying its current electric generation supply mix to include less coal-fired generation. Due to enacted CCR and ELG legislation, NIPSCO would expect to incur over \$1 billion in operating, maintenance, environmental and other costs over the next seven years if the current fleet of coal-fired generating units remain operational.

On November 1, 2016, NIPSCO submitted its 2016 Integrated Resource Plan with the IURC. The plan evaluated demand-side and supply-side resource alternatives to reliably and cost effectively meet NIPSCO customers' future

energy requirements over the ensuing twenty years. The 2016 Integrated Resource Plan indicates that the most viable option for customers and NIPSCO involves the retirement of Bailly Generating Station (Units 7 and 8) as soon as mid-2018 and two units (Units 17 and 18) at the R.M. Schahfer Generating Station by the end of 2023. It is projected over the long term that the cost to customers to retire these units at these dates will be lower than maintaining and upgrading them for continuing generation.

NiSource and NIPSCO committed to the retirement of the Bailly Generating Station units in connection with the filing of the 2016 Integrated Resource Plan, pending approval by the MISO. In the fourth quarter of 2016, the MISO approved NIPSCO's plan to retire the Bailly Generating Station units by May 31, 2018. In accordance with ASC 980-360, the remaining net book value of the Bailly Generating Station units was reclassified from "Net utility plant" to "Other property, at cost, less accumulated depreciation" on the Condensed Consolidated Balance Sheets (unaudited).

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

In connection with the MISO's approval of NIPSCO's planned retirement of the Bailly Generating Station units, NiSource recorded \$22.1 million of plant retirement-related charges in the fourth quarter of 2016. These charges were comprised of contract termination charges related to NIPSCO's capital lease with Pure Air (discussed further below), voluntary employee severance benefits, and write downs of certain materials and supplies inventory balances.

NIPSCO Pure Air. NIPSCO has a service agreement with Pure Air, a general partnership between Air Products and Chemicals, Inc. and First Air Partners LP, under which Pure Air provides scrubber services to reduce sulfur dioxide emissions for Units 7 and 8 at the Bailly Generating Station. Services under this contract commenced on July 1, 1992 and expired on June 30, 2012. The agreement was renewed effective July 1, 2012 for ten years requiring NIPSCO to pay for the services under a combination of fixed and variable charges. NiSource has made an exhaustive effort to obtain information needed from Pure Air to determine the status of Pure Air as a VIE. However, NIPSCO has not been able to obtain this information and, as a result, it is unclear whether Pure Air is a VIE and if NIPSCO is the primary beneficiary. NIPSCO will continue to request the information required to determine whether Pure Air is a VIE. NIPSCO has no exposure to loss related to the service agreement with Pure Air and payments under this agreement were \$10.4 million and \$9.5 million for the six months ended June 30, 2017 and 2016, respectively. In accordance with GAAP, the renewed agreement was evaluated to determine whether the arrangement qualifies as a lease. Based on the terms of the agreement, the arrangement qualified for capital lease accounting. As the effective date of the new agreement was July 1, 2012, NiSource capitalized this lease beginning in the third quarter of 2012. As further discussed above in this Note 15 under the heading "NIPSCO 2016 Integrated Resource Plan," NIPSCO plans to retire the generation station units serviced by Pure Air by May 31, 2018. In December 2016, as allowed by the provisions of the service agreement, NIPSCO provided Pure Air formal notice of intent to terminate the service agreement, effective May 31, 2018. Providing this notice to Pure Air triggered a contract termination liability of \$16 million which was recorded in fourth quarter of 2016. This expense was included as part of the plant retirement-related charges discussed above. Payment of this liability is not due until NIPSCO ceases use of the scrubber services. The liability is presented in "Other accruals" on the Condensed Consolidated Balance Sheets (unaudited). In addition, NIPSCO remeasured the remaining capital lease asset and obligation to reflect the change in estimated remaining minimum lease payments. This remeasurement was a non-cash transaction that had no impact on the Statements of Consolidated Income.

Technology Services. On December 31, 2013, NiSource Corporate Services Company signed a seven-year agreement with IBM to continue to provide business process and support functions to NiSource under a combination of fixed and variable charges, with the variable charges fluctuating based on the actual need for such services. The agreement was effective January 1, 2014 with a commencement date of April 1, 2014.

In April 2017, NiSource initiated a process to terminate its agreement with IBM and began negotiating contracts with IT service providers other than IBM. The terminated agreement calls for NiSource to pay certain charges in the event of a termination by NiSource for any reason other than material breach by IBM. NiSource and IBM are in discussions with respect to the charges owed IBM, if any. No amounts have been recorded for termination charges as of June 30, 2017.

In May and June 2017, NiSource executed agreements with new IT service providers. The new agreements have terms ending at various dates throughout 2022. Knowledge sharing and transition of responsibilities from IBM to the new service providers is currently underway and is expected to be substantially complete by the end of 2017. Costs associated with transition activities, including legal and consulting fees, are expensed as incurred. Annual payments for services received under the new agreements are not expected to result in a material change to NiSource's aggregate contractual obligations.

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

17. Business Segment Information

At June 30, 2017, NiSource's operations are divided into two primary reportable segments. The Gas Distribution Operations segment provides natural gas service and transportation for residential, commercial and industrial customers in Ohio, Pennsylvania, Virginia, Kentucky, Maryland, Indiana and Massachusetts. The Electric Operations segment provides electric service in 20 counties in the northern part of Indiana.

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSource Inc.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

The following table provides information about business segments. NiSource uses operating income as its primary measurement for each of the reported segments and makes decisions on finance, dividends and taxes at the corporate level on a consolidated basis. Segment revenues include intersegment sales to affiliated subsidiaries, which are eliminated in consolidation. Affiliated sales are recognized on the basis of prevailing market, regulated prices or at levels provided for under contractual agreements. Operating income is derived from revenues and expenses directly associated with each segment.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)
NiSource Inc.

CONSOLIDATED REVIEW

This Management's Discussion and Analysis of Financial Condition and Results of Operations (Management's Discussion) analyzes the financial condition, results of operations and cash flows of NiSource and its subsidiaries. It also includes management's analysis of past financial results and certain potential factors that may affect future results, potential future risks and approaches that may be used to manage those risks.

Management's Discussion is designed to provide an understanding of NiSource's operations and financial performance and should be read in conjunction with NiSource's Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

Executive Summary

NiSource is an energy holding company under the Public Utility Holding Company Act of 2005 whose subsidiaries are fully regulated natural gas and electric utility companies serving customers in seven states. NiSource generates substantially all of its operating income through these rate-regulated businesses which are summarized for financial reporting purposes into two primary reportable segments: Gas Distribution Operations and Electric Operations. Refer to the "Business" section of NiSource's Annual Report on Form 10-K for the fiscal year ended December 31, 2016 for further discussion of its regulated utility business segments.

NiSource's goal is to develop strategies that benefit all stakeholders as it addresses changing customer conservation patterns, develops more contemporary pricing structures and embarks on long-term investment programs. These strategies are intended to improve reliability and safety, enhance customer services and reduce emissions while generating sustainable returns. Additionally, NiSource continues to pursue regulatory and legislative initiatives that will allow residential customers not currently on NiSource's system to obtain gas service in a cost effective manner.

Summary of Consolidated Financial Results

On a consolidated basis, NiSource reported a net loss of \$44.4 million, or a \$0.14 loss per basic share for the three months ended June 30, 2017, compared to net income of \$28.9 million, or \$0.09 per basic share for the same period in 2016. The decrease in net income during 2017 was due primarily to a loss on early extinguishment of long-term debt and decreased operating income, as discussed below.

For the three months ended June 30, 2017, NiSource reported operating income of \$124.5 million compared to \$138.2 million for the same period in 2016. The lower operating income was primarily due to increased operating expenses, including higher employee and administrative expenses, increased outside service costs, higher environmental costs, increased depreciation expense and higher gross receipts taxes. The increases to operating expense were partially offset by increased net revenues from new rates from base-rate proceedings and infrastructure replacement programs and increased rates from incremental capital spend on electric transmission projects at NIPSCO.

For the six months ended June 30, 2017, NiSource reported consolidated net income of \$166.9 million, or \$0.51 per basic share compared to \$215.5 million, or \$0.67 per basic share for the same period in 2016. The decrease in net income during 2017 was due primarily to the aforementioned loss on early extinguishment of long-term debt, partially offset by increased operating income, as discussed below.

NiSource's operating income for the six months ended June 30, 2017 was \$541.0 million compared to \$519.6 million for the same period in 2016. The higher operating income was primarily due to increased net revenues from new rates from base-rate proceedings and infrastructure replacement programs, along with increased rates from incremental capital spend on electric transmission projects at NIPSCO. Operating expenses increased due to higher employee and administrative costs, increased outside services, higher material and supplies expenses and increased environmental costs. Additionally, depreciation expense, gross receipts taxes and property taxes increased relative to 2016. These increases in operating expenses were partially offset by decreased amortization expense.

These factors and other impacts to the financial results are discussed in more detail within the following discussions of “Results of Operations,” “Results and Discussion of Segment Operations” and “Liquidity and Capital Resources.” Capital Investment. In the six months ended June 30, 2017, NiSource invested \$732.2 million in capital expenditures across its gas and electric utilities. These expenditures were primarily aimed at furthering the safety and reliability of NiSource's gas

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

NiSource Inc.

distribution system, construction of new electric transmission assets and maintaining NiSource's existing electric generation fleet. NiSource continues to execute on an estimated \$30 billion in total projected long-term regulated utility infrastructure investments and expects to invest approximately \$1.6 billion to \$1.7 billion in capital during 2017 to continue to modernize and improve its system across all seven states.

Liquidity. NiSource believes that through income generated from operating activities, amounts available under its short-term revolving credit facility, commercial paper program, accounts receivable securitization facilities, long-term debt agreements and NiSource's ability to access the capital markets, there is adequate capital available to fund its operating activities and capital expenditures in 2017 and beyond. At June 30, 2017 and December 31, 2016, NiSource had \$1,251.9 million and \$683.7 million, respectively, of net liquidity available, consisting of cash and available capacity under credit facilities. Additionally, NiSource has approximately \$466 million of available remaining capacity under its recently launched ATM Program.

Regulatory Developments

During the six months ended June 30, 2017, NiSource continued to move forward on core infrastructure and environmental investment programs supported by complementary regulatory and customer initiatives across all seven states of its operating area. The discussion below summarizes significant regulatory developments that transpired during the second quarter of 2017:

Gas Distribution Operations

Columbia of Ohio's application for a five year extension of its IRP remains pending before the PUCO. This well-established pipeline replacement program, which is currently authorized through December 31, 2017, covers replacement of priority mainline pipe and targeted customer service lines. A PUCO order is expected by the end of the year.

Columbia of Maryland's base rate case remains pending before the MPSC. The request, filed April 14, 2017, seeks to adjust the company's base rates so it can continue to expedite the replacement of aging pipe as well as adopt additional pipeline safety upgrades. On July 28, 2017, all parties filed a settlement agreement with the MPSC which, if approved as filed, would result in an annual revenue increase of \$2.4 million, effective in late October 2017.

NIPSCO continues to execute on its seven-year, \$845 million gas infrastructure modernization program to further improve system reliability and safety. On June 28, 2017, the IURC approved NIPSCO's latest semi-annual tracker update covering approximately \$61 million of investments that were made in the second half of 2016.

Electric Operations

NIPSCO's request, filed in November 2016, to invest in environmental upgrades at its Michigan City Unit 12 and R.M. Schahfer Units 14 and 15 generating facilities remains pending before the IURC. On June 9, 2017, NIPSCO, along with the Indiana OUCC, the Citizens Action Coalition and a group of NIPSCO industrial customers, submitted a settlement agreement seeking, among other things, approval and cost recovery for the CCR projects and moving ELG-related investments to a later proceeding. An IURC order is expected before the end of 2017.

NIPSCO continues to execute on its seven-year electric infrastructure modernization program, which includes enhancements to its electric transmission and distribution system designed to further improve system safety and reliability. The IURC-approved program represents approximately \$1.25 billion of electric infrastructure investments expected to be made through 2022. In February 2017, NIPSCO began recovering on \$45.5 million of these investments. On June 30, 2017, NIPSCO filed with the IURC its latest tracker update request, covering \$177.3 million of cumulative net capital expenditures through April 30, 2017. An order is expected by the fourth quarter of 2017. Refer to Note 6, "Regulatory Matters," as well as to Note 15, "Other Commitments and Contingencies," in the Notes to Condensed Consolidated Financial Statements (unaudited) for a complete discussion of key regulatory matters.

Operating Income

Substantially all of NiSource's operating income is generated by the Gas Distribution Operations and Electric Operations segments, the results of which are discussed in further detail within "Results and Discussion of Segment Operations."

Other Income (Deductions), net

Other income (deductions), net reduced income by \$195.4 million in the second quarter of 2017 compared to a reduction in income of \$92.1 million in the prior year. This change is due primarily to a loss on early extinguishment of long-term debt of \$111.5 million. Refer to Note 13, "Long-Term Debt," in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on the early extinguishment of long-term debt.

Other income (deductions), net reduced income by \$279.4 million in the six months ended June 30, 2017 compared to a reduction in income of \$181.9 million in the prior year. This change is due primarily to the aforementioned loss on early extinguishment of long-term debt of \$111.5 million.

Income Taxes

Refer to Note 11, "Income Taxes," in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on income taxes.

RESULTS AND DISCUSSION OF SEGMENT OPERATIONS

Presentation of Segment Information

NiSource's operations are divided into two primary reportable segments: Gas Distribution Operations and Electric Operations.

Commercial				277,187	275,873	1,314
Industrial				6,203	6,416	(213)
Total				3,405,739	3,382,792	22,947

Net revenues are calculated as gross revenues less the associated cost of sales (excluding depreciation and amortization). Cost of sales at the Gas Distribution Operations segment is principally comprised of the cost of natural gas used while providing transportation and distribution services to its customers. The majority of the cost of sales are tracked costs that are passed through directly to the customer resulting in an equal and offsetting amount reflected in gross revenues.

Comparability of line item operating results may also be impacted by regulatory, tax and depreciation trackers (other than those for cost of sales) that allow for the recovery in rates of certain costs such as bad debt expense. Therefore, increases in these tracked operating expenses are offset by increases in net revenues and have essentially no impact on income from continuing operations.

Three months ended June 30, 2017 vs. June 30, 2016 Operating Income

For the second quarter of 2017, Gas Distribution Operations reported operating income of \$45.1 million, a decrease of \$28.4 million from the comparable 2016 period.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

NiSource Inc.

Gas Distribution Operations

Net revenues for second quarter of 2017 were \$404.9 million, an increase of \$15.3 million from the same period in 2016. The change in net revenues was primarily driven by:

• New rates from base-rate proceedings and infrastructure replacement programs of \$19.7 million.

• The effects of increased residential customer growth of \$1.4 million.

• Increased regulatory, tax and depreciation trackers, which are offset in expense, of \$1.4 million.

Partially offset by:

• The effects of warmer weather of \$7.0 million.

Operating expenses were \$43.7 million higher for the second quarter of 2017 compared to the same period in 2016.

This change was primarily driven by:

• Increased employee and administrative expenses of \$17.6 million.

• Higher outside service costs of \$10.8 million.

• Increased property taxes of \$5.7 due to higher capital expenditures placed in service and an accrual adjustment recorded in 2016.

• Higher environmental costs of \$4.4 million.

• Increased depreciation of \$2.6 million due to higher capital expenditures placed in service.

• Higher regulatory, tax and depreciation trackers, which are offset in net revenues, of \$1.4 million.

Six months ended June 30, 2017 vs. June 30, 2016 Operating Income

For the six months ended June 30, 2017, Gas Distribution Operations reported operating income of \$385.8 million, a decrease of \$2.6 million from the comparable 2016 period.

Net revenues for the six months ended June 30, 2017 were \$1,148.5 million, an increase of \$92.3 million from the same period in 2016. The change in net revenues was primarily driven by:

• New rates from base-rate proceedings and infrastructure replacement programs of \$81.0 million.

• Higher regulatory, tax and depreciation trackers, which are offset in expense, of \$23.7 million.

• The effects of increased residential customer growth of \$4.4 million.

Partially offset by:

• The effects of warmer weather of \$14.8 million.

Operating expenses were \$94.9 million higher for the six months ended June 30, 2017 compared to the same period in 2016. This change was primarily driven by:

• Increased employee and administrative expenses of \$27.8 million.

• Higher regulatory, tax and depreciation trackers, which are offset in net revenues, of \$23.7 million.

• Higher outside service costs of \$20.1 million.

• Increased property taxes of \$7.3 million due to higher capital expenditures placed in service and an accrual adjustment recorded in 2016.

• Increased depreciation of \$6.1 million due to higher capital expenditures placed in service.

• Higher environmental costs of \$4.4 million.

• Higher material and supplies expense of \$1.7 million.

Weather

In general, NiSource calculates the weather-related revenue variance based on changing customer demand driven by weather variance from normal heating degree days. NiSource's composite heating degree days reported do not directly correlate to the weather-related dollar impact on the results of Gas Distribution Operations. Heating degree days experienced during different times of the year or in different operating locations may have more or less impact on volume and dollars depending on when and where they occur. When the detailed results are combined for reporting, there may be weather-related dollar impacts on operations when there is not an apparent or significant change in the aggregated NiSource composite heating degree day comparison.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

NiSource Inc.

Gas Distribution Operations

Weather in the Gas Distribution Operations service territories for the second quarter of 2017 was about 24% warmer than normal and about 30% warmer than 2016, decreasing net revenues \$7.0 million for the quarter ended June 30, 2017 compared to 2016.

Weather in the Gas Distribution Operations service territories for the six months ended June 30, 2017 was about 19% warmer than normal and about 13% warmer than 2016, decreasing net revenues \$14.8 million for the six months ended June 30, 2017 compared to 2016.

Throughput

Total volumes sold and transported for the second quarter of 2017 were 187.3 MMDth, compared to 192.8 MMDth for 2016. This 3% decrease is primarily attributable to the effects of warmer weather in the current year.

Total volumes sold and transported for the six months ended June 30, 2017 were 513.7 MMDth, compared to 537.4 MMDth for 2016. This 4% decrease is also mostly attributable to the effects of warmer weather in 2017.

Economic Conditions

All NiSource Gas Distribution Operations companies have state-approved recovery mechanisms that provide a means for full recovery of prudently incurred gas costs. Gas costs are treated as pass-through costs and have no impact on the net revenues recorded in the period. The gas costs included in revenues are matched with the gas cost expense recorded in the period and the difference is recorded on the Condensed Consolidated Balance Sheets (unaudited) as under-recovered or over-recovered gas cost to be included in future customer billings.

At NIPSCO, sales revenues and customer billings are adjusted for amounts related to under and over-recovered purchased gas costs from prior periods per regulatory order. These amounts are primarily reflected in the "Other" gross revenues statistic provided at the beginning of this segment discussion. The adjustments to other gross revenues for the quarter ended June 30, 2017 and 2016 were a revenue decrease of \$14.4 million and a revenue increase of \$1.7 million, respectively. The adjustments to other gross revenues for the six months ended June 30, 2017 and 2016 were a revenue decrease of \$29.0 million and a revenue increase of \$10.8 million, respectively.

Certain Gas Distribution Operations companies continue to offer choice opportunities, where customers can choose to purchase gas from a third-party supplier, through regulatory initiatives in their respective jurisdictions. These programs serve to further reduce NiSource's exposure to gas prices.

Net revenues are calculated as gross revenues less the associated cost of sales (excluding depreciation and amortization). Cost of sales at the Electric Operations segment is principally comprised of the cost of coal, related handling costs, natural gas purchased for the internal generation of electricity at NIPSCO and the cost of power purchased from third-party generators of electricity. The majority of the cost of sales are tracked costs that are passed

through directly to the customer resulting in an equal and offsetting amount reflected in gross revenues. Comparability of line item operating results may also be impacted by regulatory and depreciation trackers (other than those for cost of sales) that allow for the recovery in rates of certain costs such as bad debt expense. Therefore, increases in these tracked

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

NiSource Inc.

Electric Operations

operating expenses are offset by increases in net revenues and have essentially no impact on income from continuing operations.

Three months ended June 30, 2017 vs. June 30, 2016 Operating Income

For the second quarter of 2017, Electric Operations reported operating income of \$84.9 million, an increase of \$16.5 million from the comparable 2016 period.

Net revenues for the second quarter of 2017 were \$312.5 million, an increase of \$39.7 million from the same period in 2016. The change in net revenues was primarily driven by:

• New rates from base-rate proceedings of \$21.2 million.

• Higher regulatory and depreciation trackers, which are offset in expense, of \$8.3 million.

• Increased rates from incremental capital spend on electric transmission projects of \$5.0 million.

• Greater industrial and commercial usage of \$3.5 million.

Operating expenses were \$23.2 million higher for the second quarter of 2017 compared to the same period in 2016.

This change was primarily driven by:

• Increased outside service costs of \$8.4 million, primarily due to generation-related maintenance and vegetation management activities.

• Higher regulatory and depreciation trackers, which are offset in net revenues, of \$8.3 million.

• Increased employee and administrative expenses of \$3.9 million.

• Higher gross receipts taxes of \$3.4 million driven by higher revenues.

Partially offset by:

• Decreased amortization expense of \$3.6 million.

Six months ended June 30, 2017 vs. June 30, 2016 Operating Income

For the six months ended June 30, 2017, Electric Operations reported operating income of \$161.9 million, an increase of \$23.2 million from the comparable 2016 period.

Net revenues for the six months ended June 30, 2017 were \$618.2 million, an increase of \$72.2 million from the same period in 2016. The change in net revenues was primarily driven by:

• New rates from base-rate proceedings of \$42.1 million.

• Higher regulatory and depreciation trackers, which are offset in expense, of \$20.4 million.

• Increased rates from incremental capital spend on electric transmission projects of \$10.8 million.

Operating expenses were \$49.0 million higher for the six months ended June 30, 2017 compared to the same period in 2016. This change was primarily driven by:

• Higher regulatory and depreciation trackers, which are offset in net revenues, of \$20.4 million.

• Increased outside service costs of \$12.9 million, primarily due to generation-related maintenance and vegetation management activities.

• Higher materials and supplies expenses of \$7.9 million driven by generation-related maintenance and increased chemical usage.

• Increased employee and administrative expenses of \$9.3 million.

• Higher gross receipts taxes of \$4.7 million driven by higher revenues.

Partially offset by:

• Decreased amortization expense of \$7.2 million.

Weather

In general, NiSource calculates the weather-related revenue variance based on changing customer demand driven by weather variance from normal heating or cooling degree days. NiSource's composite heating or cooling degree days

reported do not directly

39

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

NiSource Inc.

Electric Operations

correlate to the weather-related dollar impact on the results of Electric Operations. Heating or cooling degree days experienced during different times of the year may have more or less impact on volume and dollars depending on when they occur. When the detailed results are combined for reporting, there may be weather-related dollar impacts on operations when there is not an apparent or significant change in the aggregated NiSource composite cooling degree day comparison.

Weather in the Electric Operations' territories for the second quarter of 2017 was about 15% warmer than normal and about 7% cooler than 2016, decreasing net revenues \$2.5 million for the quarter ended June 30, 2017 compared to 2016.

Weather in the Electric Operations' territories for the six months ended June 30, 2017 was about 15% warmer than normal and about 7% cooler than 2016, decreasing net revenues \$6.5 million for the quarter ended June 30, 2017 compared to 2016.

Sales

Electric Operations sales for the second quarter of 2017 were 4,171.3 gwh, a increase of 110.3 gwh compared to the same period in 2016. The 3% increase is primarily attributable to increased industrial usage, partially offset by decreased residential sales from the cooler weather in the current year.

Electric Operations sales for the six months ended June 30, 2017 were 8,235.8 gwh, an increase of 4.1 gwh compared to the same period in 2016.

Economic Conditions

NIPSCO has a state-approved recovery mechanism that provides a means for full recovery of prudently incurred fuel costs. Fuel costs are treated as pass-through costs and have no impact on the net revenues recorded in the period. The fuel costs included in revenues are matched with the fuel cost expense recorded in the period and the difference is recorded on the Condensed Consolidated Balance Sheets (unaudited) as under-recovered or over-recovered fuel cost to be included in future customer billings.

At NIPSCO, sales revenues and customer billings are adjusted for amounts related to under and over-recovered purchased fuel costs from prior periods per regulatory order. These amounts are primarily reflected in the "Other" gross revenues statistic provided at the beginning of this segment discussion. The adjustments to other gross revenues for the quarter ended June 30, 2017 and 2016 were a revenue increase of \$18.1 million and \$15.8 million, respectively. The adjustments to other gross revenues for the six months ended June 30, 2017 and 2016 were a revenue decrease of \$0.9 million and a revenue increase of \$18.4 million, respectively.

Electric Supply

NIPSCO 2016 Integrated Resource Plan. Environmental, regulatory and economic factors, including low natural gas prices and aging coal-fired units, have led NIPSCO to consider modifying its current electric generation supply mix to include less coal-fired generation. Due to enacted CCR and ELG legislation, NIPSCO would expect to incur over \$1 billion in operating, maintenance, environmental and other costs over the next seven years if the current fleet of coal-fired generating units remain operational.

On November 1, 2016, NIPSCO submitted its 2016 Integrated Resource Plan with the IURC. The plan evaluated demand-side and supply-side resource alternatives to reliably and cost effectively meet NIPSCO customers' future energy requirements over the ensuing twenty years. The 2016 Integrated Resource Plan indicates that the most viable option for customers and NIPSCO involves the retirement of Bailly Generating Station (Units 7 and 8) as soon as mid-2018 and two units (Units 17 and 18) at the R.M. Schahfer Generating Station by the end of 2023. It is projected over the long term that the cost to customers to retire these units at these dates will be lower than maintaining and upgrading them for continuing generation.

NiSource and NIPSCO committed to the retirement of the Bailly Generating Station units in connection with the filing of the 2016 Integrated Resource Plan, pending approval by the MISO. In the fourth quarter of 2016, the MISO

approved NIPSCO's plan to retire the Bailly Generating Station units by May 31, 2018.

In connection with the MISO's approval of NIPSCO's planned retirement of the Bailly Generating Station units, NiSource recorded \$22.1 million of plant retirement-related charges in the fourth quarter of 2016. These charges were comprised of contract termination charges related to NIPSCO's capital lease with Pure Air, voluntary employee severance benefits and write downs of certain materials and supplies inventory balances. Refer to Note 15-D, "Other Matters," in the Notes to Condensed Consolidated Financial Statements (unaudited) for information.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

NiSource Inc.

Liquidity and Capital Resources

Operating Activities

Net cash from operating activities for the six months ended June 30, 2017 was \$651.4 million, an increase of \$164.3 million compared to the six months ended June 30, 2016. This increase was driven by a combination of changes in weather, gas prices and the related approved rates for recovery, which significantly impacted regulatory assets and regulatory liabilities between the two periods.

Regulatory Assets and Liabilities. During the six months ended June 30, 2016, over-collected gas costs from 2015 were returned to customers resulting in a use of cash. For the six months ended June 30, 2017, the source of cash is primarily attributable to the collection of under-recovered gas costs from 2016 which resulted from increasing gas prices toward the end of the year.

Pension and Other Postretirement Plan Funding. For the six months ended June 30, 2017, NiSource contributed \$2.5 million to its pension plans and \$14.5 million to its other postretirement benefit plans. In 2017, NiSource expects to make contributions of approximately \$8.9 million to its pension plans and approximately \$25.3 million to its other postretirement medical and life plans.

Income Taxes. As of June 30, 2017, NiSource has a recorded deferred tax asset of \$663.9 million related to a Federal NOL carryforward. As a result of being in an NOL position, NiSource was not required to make any cash payments for Federal income tax purposes during the six months ended June 30, 2017 or 2016. This NOL carryforward expires in 2030; however, NiSource expects to fully utilize the carryforward benefit prior to its expiration.

Investing Activities

Net cash used for investing activities for the six months ended June 30, 2017 was \$791.2 million, an increase of \$76.2 million compared to the six months ended June 30, 2016. This increase was mostly attributable to increased capital expenditures in 2017 and, to a lesser extent, increased spend on non-ARO cost of removal activities at NIPSCO.

NiSource's capital expenditures for the six months ended June 30, 2017 were \$732.2 million compared to \$672.5 million for the comparable period in 2016. The increase in capital spend was driven by favorable weather conditions in 2017 which allowed for extended periods of construction as well as an increase in planned capital expenditures in the current year. NiSource projects 2017 capital expenditures to be approximately \$1.6 billion to \$1.7 billion.

Financing Activities

Long-term Debt. Refer to Note 13, "Long-term Debt," in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on long-term debt activity, including cash paid for debt extinguishment premiums and other issuance costs.

Short-term Debt. Refer to Note 14, "Short-Term Borrowings," in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on short-term debt activity.

Net Available Liquidity. As of June 30, 2017, an aggregate of \$1,251.9 million of net liquidity was available, including cash and credit available under the revolving credit facility and accounts receivable securitization programs.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

NiSource Inc.

The following table displays NiSource's liquidity position as of June 30, 2017 and December 31, 2016:

(in millions)	June 30, December	
	2017	31, 2016
Current Liquidity		
Revolving Credit Facility	\$1,850.0	\$1,850.0
Accounts Receivable Program ⁽¹⁾	298.3	310.0
Less:		
Drawn on Revolving Credit Facility	—	—
Commercial Paper	603.0	1,178.0
Accounts Receivable Program Utilized	298.3	310.0
Letters of Credit Outstanding Under Credit Facility	13.0	14.7
Add:		
Cash and Cash Equivalents	17.9	26.4
Net Available Liquidity	\$1,251.9	\$683.7

⁽¹⁾Represents the lesser of the seasonal limit or maximum borrowings supportable by the underlying receivables.

Debt Covenants. NiSource is subject to financial covenants under its revolving credit facility and term loan agreement, which require NiSource to maintain a debt to capitalization ratio that does not exceed 70%. A similar covenant in a 2005 private placement note purchase agreement requires NiSource to maintain a debt to capitalization ratio that does not exceed 75%. As of June 30, 2017, the ratio was 66.7%.

Sale of Trade Accounts Receivables. Refer to Note 9, "Transfers of Financial Assets," in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on the sale of trade accounts receivable.

Credit Ratings. The credit rating agencies periodically review the Company's ratings, taking into account factors such as its capital structure and earnings profile. The following table includes NiSource's and certain subsidiaries' credit ratings and ratings outlook as of June 30, 2017. Aside from those disclosed below, there were no changes to credit ratings or outlooks since December 31, 2016.

	S&P	Moody's	Fitch		
	Rating	Rating	Rating	Outlook	Outlook
NiSource ⁽¹⁾	BBB+ Stable	Baa2 Stable	BBB	Stable	Stable
NiSource Finance	BBB+ Stable	Baa2 Stable	BBB	Stable	Stable
Capital Markets	BBB+ Stable	Baa2 Stable	BBB	Stable	Stable
NIPSCO	BBB+ Stable	Baa1 Stable	BBB	Stable	Stable
Columbia of Massachusetts	BBB+ Stable	Baa2 Stable	Not rated	Not rated	Not rated
Commercial Paper	A-2 Stable	P-2 Stable	F3	Stable	Stable

⁽¹⁾In April 2017, Moody's assigned a Baa2 senior unsecured rating to NiSource, with a stable outlook.

Certain NiSource subsidiaries have agreements that contain "ratings triggers" that require increased collateral if the credit ratings of NiSource or certain of its subsidiaries are below investment grade. These agreements are primarily for insurance purposes and for the physical purchase or sale of power. As of June 30, 2017, the collateral requirement that would be required in the event of a downgrade below the ratings trigger levels would amount to approximately \$42.2 million. In addition to agreements with ratings triggers, there are other agreements that contain "adequate assurance" or "material adverse change" provisions that could necessitate additional credit support such as letters of credit and cash collateral to transact business.

Equity. NiSource has a shelf registration statement on file with the SEC that authorizes NiSource to issue an indeterminate amount of common stock and preferred stock, as well as other securities. The authorized capital stock of

NiSource consists of 420,000,000 shares, \$0.01 par value, of which 400,000,000 are common stock and 20,000,000 are preferred stock. As of June 30, 2017, 325,756,677 shares of common stock were outstanding. NiSource has no preferred stock outstanding as of June 30, 2017.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

NiSource Inc.

Contractual Obligations. Aside from the previously referenced issuance and repayment of long-term debt, there were no material changes recorded during the six months ended June 30, 2017 to NiSource's contractual obligations as of December 31, 2016.

Off Balance Sheet Arrangements

As a part of normal business, NiSource and certain subsidiaries enter into various agreements providing financial or performance assurance to third parties on behalf of certain subsidiaries. Such agreements include guarantees and stand-by letters of credit.

Refer to Note 15, "Other Commitments and Contingencies," in the Notes to Condensed Consolidated Financial Statements (unaudited) for additional information about such arrangements.

Market Risk Disclosures

Risk is an inherent part of NiSource's businesses. The extent to which NiSource properly and effectively identifies, assesses, monitors and manages each of the various types of risk involved in its businesses is critical to its profitability. NiSource seeks to identify, assess, monitor and manage, in accordance with defined policies and procedures, the following principal market risks that are involved in NiSource's businesses: commodity price risk, interest rate risk and credit risk. Risk management at NiSource is a multi-faceted process with oversight by the Risk Management Committee that requires constant communication, judgment and knowledge of specialized products and markets. NiSource's senior management takes an active role in the risk management process and has developed policies and procedures that require specific administrative and business functions to assist in the identification, assessment and control of various risks. These may include but are not limited to market, operational, financial, compliance and strategic risk types. In recognition of the increasingly varied and complex nature of the energy business, NiSource's risk management process, policies and procedures continue to evolve and are subject to ongoing review and modification.

Commodity Price Risk

NiSource is exposed to commodity price risk as a result of its subsidiaries' operations involving natural gas and power. To manage this market risk, NiSource's subsidiaries use derivatives, including commodity futures contracts, swaps, forwards and options. NiSource does not participate in speculative energy trading activity.

Commodity price risk resulting from derivative activities at NiSource's rate-regulated subsidiaries is limited, since regulations allow recovery of prudently incurred purchased power, fuel and gas costs through the ratemaking process, including gains or losses on these derivative instruments. If states should explore additional regulatory reform, these subsidiaries may begin providing services without the benefit of the traditional ratemaking process and may be more exposed to commodity price risk.

NiSource subsidiaries are required to make cash margin deposits with their brokers to cover actual and potential losses in the value of outstanding exchange traded derivative contracts. The amount of these deposits, which are reflected in NiSource's restricted cash balance, may fluctuate significantly during periods of high volatility in the energy commodity markets.

Refer to Note 7, "Risk Management Activities," in the Condensed Consolidated Financial Statements (unaudited) for further information on NiSource's commodity price risk assets and liabilities as of June 30, 2017 or December 31, 2016.

Interest Rate Risk

NiSource is exposed to interest rate risk as a result of changes in interest rates on borrowings under its revolving credit agreement, commercial paper program, accounts receivable programs and term loan, which have interest rates that are indexed to short-term market interest rates. Based upon average borrowings and debt obligations subject to fluctuations in short-term market interest rates, an increase (or decrease) in short-term interest rates of 100 basis points (1%) would have increased (or decreased) interest expense by \$4.1 million and \$8.9 million for the three and six

months ended June 30, 2017 and \$2.3 million and \$3.8 million for the three and six months ended June 30, 2016, respectively. NiSource is also exposed to interest rate risk as a result of changes in benchmark rates that can influence the interest rates of future debt issuances.

Refer to Note 7, "Risk Management Activities," in the Notes to Condensed Consolidated Financial Statements (unaudited) for further information on NiSource's interest rate risk assets and liabilities as of June 30, 2017 and December 31, 2016.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

NiSource Inc.

Credit Risk

Due to the nature of the industry, credit risk is embedded in many of NiSource's business activities. NiSource's extension of credit is governed by a Corporate Credit Risk Policy. In addition, Risk Management Committee guidelines are in place which document management approval levels for credit limits, evaluation of creditworthiness, and credit risk mitigation efforts. Exposures to credit risks are monitored by the risk management function which is independent of commercial operations. Credit risk arises due to the possibility that a customer, supplier or counterparty will not be able or willing to fulfill its obligations on a transaction on or before the settlement date. For derivative-related contracts, credit risk arises when counterparties are obligated to deliver or purchase defined commodity units of gas or power to NiSource at a future date per execution of contractual terms and conditions. Exposure to credit risk is measured in terms of both current obligations and the market value of forward positions net of any posted collateral such as cash and letters of credit.

NiSource closely monitors the financial status of its banking credit providers. NiSource evaluates the financial status of its banking partners through the use of market-based metrics such as credit default swap pricing levels, and also through traditional credit ratings provided by major credit rating agencies.

Other Information

Critical Accounting Policies

Pension and Other Postretirement Benefits. On January 1, 2017, NiSource changed the method used to estimate the service and interest components of net periodic benefit cost for pension and other postretirement benefits. This change, compared to the previous method, resulted in a decrease in the actuarially-determined service and interest cost components. Historically, NiSource estimated service and interest costs utilizing a single weighted-average discount rate derived from the yield curve used to measure the benefit obligation at the beginning of the period. NiSource now utilizes a full yield curve approach to estimate these components by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows. NiSource believes the new approach provides a more precise measurement of service and interest costs by aligning the timing of the plan's liability cash flows to the corresponding spot rates on the yield curve. The benefit obligations measured under this approach are unchanged. NiSource accounted for this change as a prospective change in accounting estimate. For further information on NiSource's pension and other postretirement benefits, see Note 12, "Pension and Other Postretirement Benefits," in the Notes to Condensed Consolidated Financial Statements (unaudited).

There were no additional significant changes to critical accounting policies for the period ended June 30, 2017.

Recently Issued Accounting Pronouncements

Refer to Note 2, "Recent Accounting Pronouncements," in the Notes to Condensed Consolidated Financial Statements (unaudited) for additional information about recently issued accounting pronouncements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

NiSource Inc.

For a discussion regarding quantitative and qualitative disclosures about market risk see “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Market Risk Disclosures.”

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

NiSource’s chief executive officer and its chief financial officer are responsible for evaluating the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)). NiSource's disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including NiSource's chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based upon that evaluation, NiSource's chief executive officer and chief financial officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to provide reasonable assurance that financial information was processed, recorded and reported accurately.

Changes in Internal Controls

There have been no changes in NiSource's internal control over financial reporting during the fiscal quarter covered by this report that has materially affected, or is reasonably likely to materially affect, NiSource's internal control over financial reporting.

Table of Contents

PART II

ITEM 1. LEGAL PROCEEDINGS

NiSource Inc.

The Company is party to certain claims and legal proceedings arising in the ordinary course of business, none of which is deemed to be individually material at this time. Due to the inherent uncertainty of litigation, there can be no assurance that the resolution of any particular claim or proceeding would not have a material adverse effect on the Company's results of operations, financial position or liquidity. If one or more of such matters were decided against the Company, the effects could be material to the Company's results of operations in the period in which the Company would be required to record or adjust the related liability and could also be material to the Company's cash flows in the periods the Company would be required to pay such liability.

ITEM 1A. RISK FACTORS

NiSource's operations and financial results are subject to various risks and uncertainties, including those disclosed in NiSource's most recent Annual Report on Form 10-K for the year ended December 31, 2016. There have been no material changes to such risk factors.
