## **Trinity Biotech Announces Quarter 2 Results Revenues increase 20.3% and Profits increase 95%**

**DUBLIN, Ireland (August 9, 2006)** □. Trinity Biotech plc (NASDAQ: TRIB, ISE:TRIB.I), a leading developer and manufacturer of diagnostic products for the point-of-care and clinical laboratory markets, today announced results for the quarter ended June 30, 2006.

Revenues in quarter 2, 2006 increased 20.3% to US\$27.3 million compared to US\$22.7 million in quarter 2 2005. During the same period operating profit before share option expenses increased from US\$1.69 million to US\$2.34 million before the impact of the once off inventory write off of US\$5.8 million. Profit for the period increased from US\$1.08 million in quarter 2 2005 to US\$2.11 million before the inventory write off in quarter 2 2006, representing an increase of 95%.

Revenues for the six months by key product area were as follows :

	<b>H1 2005</b>	<b>H1 2006</b>	
	<b>US\$000</b>	<b>US\$000</b>	<b>% Increase</b>
Clinical Chemistry*	3,043	7,502	146.6%
Haemostasis	14,399	14,782	2.7%
Infectious Diseases	20,179	21,027	4.2%
Point of Care	6,147	8,716	41.8%
<b>Total</b>	<b>43,768</b>	<b>52,027</b>	<b>18.8%</b>

\* Primus acquired in July 2005

Revenues for the six months by geographical location were as follows :

	<b>H1 2005</b>	<b>H1 2006</b>	
	<b>US\$000</b>	<b>US\$000</b>	<b>% Increase</b>
USA	21,808	24,948	14.4%
Europe	11,894	14,274	20.0%
Asia / Africa	10,066	12,805	27.2%
<b>Total</b>	<b>43,768</b>	<b>52,027</b>	<b>18.8%</b>

Gross profit for the quarter before the inventory write off amounted to US\$13.16 million, representing a gross margin of 48.2%. This compares to a gross profit of US\$10.71 million and gross margin of 47.2% for the same period in 2005. The once off inventory write off of US\$5.8 million is primarily attributable to the discontinuation of various product lines following the acquisition of the bioMerieux haemostasis business in June.

## Edgar Filing: TRINITY BIOTECH PLC - Form 6-K

R&D expenses have increased from US\$1.31 million in quarter 2 2005 to US\$1.59 million in quarter 2 2006. The increase in selling, general and administrative expenses from US\$7.80 million in 2005 to US\$9.31 million in the current year is primarily attributable to the impact of the acquisition of Primus in July 2005.

The net effect of the above was an operating profit before share options and the once off inventory write off of US\$2.34 million for the quarter compared to US\$1.69 million for the quarter 2 2005 which represents a margin of 8.6% and 7.4% respectively.

Commenting on the results, Rory Nealon, Chief Financial Officer, said "Quarter 2 has been an eventful quarter for Trinity. We completed a US\$25 million equity fund raising in April which was oversubscribed and which included a US\$2 million participation by our CEO, Ronan O' Caoimh. We completed the acquisition of the haemostasis business of bioMerieux which was partly funded by a new US\$30 million debt facility. As part of the acquisition Trinity acquired inventory, tangible fixed assets and intangible assets including goodwill totalling approximately US\$46 million. This is based on our preliminary estimate of the fair value of the assets acquired, the finalisation of which will be completed in the coming months.

Our financial performance during the quarter has been impressive in that we have experienced strong growth in both revenues and profits versus the comparable period in 2005 and Quarter 1 of this year. Our EBITDA for the quarter has also exceeded US\$3.5 million for the first time."

Ronan O' Caoimh, CEO commented, "We are particularly pleased that we have completed the acquisition of the haemostasis product line from bioMerieux during the quarter. This acquisition is our largest to date and will, we believe, be transformational for Trinity. The combination of our existing Biopool and Amax haemostasis businesses together with the acquired bioMerieux business gives us a full range of state of the art instruments with an excellent range of both routine and specialty diagnostic tests to accompany them.

Given this combination and the scale achieved through the increased customer base in the U.S., Germany and the U.K. where Trinity has existing direct salesforces in place, we will benefit from considerable and immediate synergies in these markets. We expect the acquisition to be immediately earnings accretive and to increase our haemostasis market share from 4% to 13%.

We have also settled our legal dispute with Inverness Medical. Under the terms of the settlement Inverness has granted Trinity a royalty bearing licence to its lateral flow patents for all diagnostic uses with the exception of women's health and cardiology, including an Over the Counter ("OTC") license for Trinity's Unigold HIV products. In addition, Inverness has agreed to manufacture Trinity's Unigold HIV tests primarily for the African market in its new facility in Hangzhou, China, and will reimburse Trinity for its costs of litigation.

We are pleased to have settled this litigation and to have obtained a licence which covers the potentially substantial HIV OTC market in the USA. We believe that the combination of our platform Unigold technology, as proven with our HIV products, and the broad licence from Inverness will enable us to develop a substantial and vibrant point of care business."

Forward-looking statements in this release are made pursuant to the "safe harbor" provision of the Private Securities Litigation Reform Act of 1995. Investors are cautioned that such forward-looking statements involve risks and uncertainties including, but not limited to, the results of research and development efforts, the effect of regulation by the United States Food and Drug Administration and other agencies, the impact of competitive products, product development commercialisation and technological difficulties, and other risks detailed in the Company's periodic reports filed with the Securities and Exchange Commission.

Trinity Biotech develops, acquires, manufactures and markets over 500 diagnostic products for the point-of-care and clinical laboratory segments of the diagnostic market. The broad line of test kits are used to detect infectious diseases, sexually transmitted diseases, blood coagulation disorders, and autoimmune diseases. Trinity Biotech sells worldwide in over 80 countries through its own salesforce and a network of international distributors and strategic partners.
