MidSouth Bancorp, Inc. and Subsidiaries
Notes to Interim Consolidated Financial Statements
June 30, 2011
(Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements and notes thereto contain all adjustments, consisting only of normal recurring adjustments, necessary to present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of MidSouth Bancorp, Inc. (the “Company”) and its subsidiaries as of June 30, 2011 and the results of their operations and their cash flows for the periods presented. The interim financial information should be read in conjunction with the annual consolidated financial statements and the notes thereto included in the Company’s 2010 Annual Report on Form 10-K.

The results of operations for the six month period ended June 30, 2011 are not necessarily indicative of the results to be expected for the entire year.

Use of Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

Summary of Significant Accounting Policies — The accounting and reporting policies of the Company conform with accounting principles generally accepted in the United States of America and general practices within the banking industry. There have been no material changes or developments in the application of accounting principles or in our evaluation of the accounting estimates and the underlying assumptions or methodologies that we believe to be Critical Accounting Policies and Estimates as disclosed in our 2010 Annual Report on Form 10-K.

Recently Adopted Accounting Pronouncements — In December 2010, the FASB issued Accounting Standards Update No. 2010-28, When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts (“ASU No. 2010-28”). ASU No. 2010-28 requires entities with reporting units with zero or negative carrying amounts to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In doing so, entities should consider whether there are any adverse qualitative factors indicating that an impairment may exist. For public companies this guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. ASU No. 2010-28 was not applicable to the Company for the second quarter of 2011 as negative goodwill did not exist at June 30, 2011.

In December 2010, the FASB issued Accounting Standards Update No. 2010-29, Disclosure of Supplementary Pro Forma Information for Business Combinations (“ASU No. 2010-29”). ASU No. 2010-29 specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. ASU No. 2010-29 is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010, and was not applicable to the Company for the quarter ended June 30, 2011, as no business combinations have occurred.

Recently Issued Accounting Pronouncements — In April 2011, the FASB issued ASU No. 2011-02, A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring, which amends guidance for evaluating

whether the restructuring of a receivable by a creditor is a troubled debt restructuring (“TDR”). The ASU responds to concerns that creditors are inconsistently applying existing guidance for identifying TDRs. The main provision of this Update will require a creditor to separately conclude whether the restructuring constitutes a concession and whether the debtor is experiencing financial difficulties, in order to determine if a restructuring constitutes a TDR. Guidance is also provided to assist the creditor in evaluating these two criteria. Furthermore, the amendments clarify that a creditor is precluded from using the effective interest rate test, as described in the debtors guidance on restructuring payables, when evaluating whether a restructuring constitutes a TDR. ASU 2011-02 is effective for a public entity for interim and annual periods beginning on or after June 15, 2011. Retrospective application is required for restructurings occurring on or after the beginning of the fiscal year of adoption for purposes of identifying and disclosing TDRs. However, an entity should apply prospectively changes in the method used to calculate impairment on receivables. At the same time it adopts ASU 2011-02, a public entity will be required to disclose the activity-based information about TDRs that was previously deferred by ASU No. 2011-01, Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20. The Company will adopt ASU No. 2011-02 for the interim period beginning July 1, 2011. Adoption of ASU No. 2011-02 is not expected to have a material impact on the Company’s results of operations, financial position or disclosures.

Table of Contents

In April 2011, the FASB issued ASU No. 2011-03, Transfers and Servicing (Topic 860): Reconsideration of Effective Control for Repurchase Agreements. The amendments in this Update remove from the assessment of effective control (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation guidance related to that criterion. Other criteria applicable to the assessment of effective control are not changed by the amendments in this Update. The guidance in this Update is effective for the first interim or annual period beginning on or after December 15, 2011. The guidance should be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. Early adoption is not permitted. ASU No. 2011-03 is not expected to have a material impact on the Company's results of operations, financial position or disclosures.

In May 2011, the FASB issued ASU 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. The amendments in this Update result in common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs. Consequently, the amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. For many of the requirements, the Board does not intend for the amendments in this Update to result in a change in the application of the requirements in Topic 820. The Update also reflects the FASB's consideration of the different characteristics of public and non-public entities and the needs of users of their financial statements. Non-public entities will be exempt from a number of the new disclosure requirements. The amendments in this Update are to be applied prospectively. For public entities, the amendments are effective during interim and annual periods beginning after December 15, 2011. Early application by public entities is not permitted.

In June 2011, the FASB issued ASU 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income. The amendments in this Update allows an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This Update eliminates the option to present the components of other comprehensive income as part of the statement of changes in shareholders' equity. The amendments in this Update do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The amendments in this Update should be applied retrospectively. For public entities, the amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted, because compliance with the amendments is already permitted. The amendments do not require any transition disclosures.

Reclassifications—Certain reclassifications have been made to the prior years' financial statements in order to conform to the classifications adopted for reporting in 2011. The reclassifications had no impact on shareholders' equity or net income.

Table of Contents

2. Investment Securities

The portfolio of securities consisted of the following (in thousands):

	June 30, 2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available-for-sale:				
U.S. Government sponsored enterprises	\$ 91,238	\$ 1,091	\$ -	\$ 92,329
Obligations of state and political subdivisions	94,691	4,963	8	99,646

	\$ 312,732	\$ 9,570	\$ 30	\$ 322,272

	December 31, 2010			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available-for-sale:				
U.S. Government sponsored enterprises	\$ 116,560	\$ 1,138	\$ -	\$ 117,698
Obligations of state and political subdivisions	105,376	3,593	117	108,852
GSE mortgage-backed securities	10,642	830	-	11,472
Collateralized mortgage obligations	24,894	936	43	25,787
	\$ 257,472	\$ 6,497	\$ 160	\$ 263,809

	June 30, 2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Held-to-maturity:				
Obligations of state and political subdivisions	\$ 340	\$ 4	\$ -	\$ 344

	December 31, 2010			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Held-to-maturity:				
Obligations of state and political subdivisions	\$ 1,588	\$ 20	\$ -	\$ 1,608

With the exception of three private-label collateralized mortgage obligations (“CMOs”) with a combined balance remaining of \$166,000 at June 30, 2011, all of the Company’s CMOs are government-sponsored enterprise securities.

Table of Contents

The amortized cost and fair value of debt securities at June 30, 2011 by contractual maturity are shown in the following table (in thousands) with the exception of mortgage-backed securities and collateralized mortgage obligations. Expected maturities may differ from contractual maturities for mortgage-backed securities and collateralized mortgage obligations because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
Available-for-sale:		
Due in one year or less	\$ 34,134	\$ 34,333
Due after one year through five years	108,481	111,892
Due after five years through ten years	36,681	38,899
Due after ten years	6,633	6,851
Mortgage-backed securities and collateralized mortgage obligations	126,803	130,297
	\$ 312,732	\$ 322,272
	Amortized Cost	Fair Value
Held-to-maturity:		
Due in one year or less	\$ 140	\$ 143
Due after one year through five years	200	201
	\$ 340	\$ 344

Details concerning investment securities with unrealized losses are as follows (in thousands):

	June 30, 2011					
	Securities with losses under 12 months		Securities with losses over 12 months		Total	
	Fair Value	Gross Unrealized Loss	Fair Value	Gross Unrealized Loss	Fair Value	Gross Unrealized Loss

Collateralized
mortgage
obligations

\$ 11,608	\$ 153	\$ 227	\$ 7	\$ 11,835	\$ 160
-----------	--------	--------	------	-----------	--------

Management evaluates each quarter whether unrealized losses on securities represent impairment that is other than temporary. For debt securities, the Company considers its intent to sell the securities or if it is more likely than not the Company will be required to sell the securities. If such impairment is identified, based upon the intent to sell or the more likely than not threshold, the carrying amount of the security is reduced to fair value with a charge to earnings. Upon the result of the aforementioned review, management then reviews for potential other than temporary impairment based upon other qualitative factors. In making this evaluation, management considers changes in market rates relative to those available when the security was acquired, changes in market expectations about the timing of cash flows from securities that can be prepaid, performance of the debt security, and changes in the market's perception of the issuer's financial health and the security's credit quality. If determined that a debt security has incurred other than temporary impairment, then the amount of the credit related impairment is determined. If a credit loss is evident, the amount of the credit loss is charged to earnings and the non-credit related impairment is recognized through other comprehensive income.

Table of Contents

The unrealized losses on debt securities at June 30, 2011 resulted from changing market interest rates over the yields available at the time the underlying securities were purchased. Of the 159 securities issued by state and political subdivisions, one contained unrealized losses at June 30, 2011. Three of the 22 collateralized mortgage obligations also contained unrealized losses. Management identified no impairment related to credit quality. At June 30, 2011, management had the intent and ability to hold impaired securities and no impairment was evaluated as other than temporary. As a result, no other than temporary impairment losses were recognized during the three months ended June 30, 2011.

During the six months ended June 30, 2011, the Company sold five securities classified as available for sale and one security classified as held to maturity. Of the available for sale securities, four securities were sold with gains totaling \$94,000 and one security was sold at a loss of \$4,000 for a net gain of \$90,000. The securities were sold as a result of an external review performed on the municipal securities portfolio. The decision to sell the one held to maturity security, which was sold at a gain of \$9,000, was based on the inability to obtain current financial information on the municipality. The sale was consistent with action taken on other securities with a similar deficiency, as identified in the external review. The Company did not sell any investment securities during the six month period ending June 30, 2010.

Securities with an aggregate carrying value of approximately \$139.1 million and \$150.6 million at June 30, 2011 and December 31, 2010, respectively, were pledged to secure public funds on deposit and for other purposes required or permitted by law.

3. Other Investments

The Company is required to own stock in the Federal Reserve Bank of Atlanta (“FRB-Atlanta”) and as a member of the Federal Home Loan Bank system, owns stock in the Federal Home Loan Bank of Dallas (“FHLB-Dallas”). The Company accounts for FRB-Atlanta and FHLB-Dallas stock as other investments along with stock ownership in two correspondent banks and a Community Reinvestment Act (“CRA”) investment in a Senior Housing Crime Prevention program in Louisiana. The CRA investment consisted of three government-sponsored agency mortgage-backed securities purchased by the Company and held by the Senior Housing Crime Prevention program. The majority of the interest earned on the securities provides income to the program.

For impairment analysis, the Company reviews financial statements and regulatory capital ratios for each of the banks in which the Company owns stock to verify financial stability and regulatory compliance with capital requirements. As of June 30, 2011 and December 31, 2010, based upon quarterly reviews, management determined that there was no impairment in the bank stocks held as other investments.

The aggregate carrying amount of other investments consisted of the following (in thousands):

	June 30, 2011	December 31, 2010
FRB-Atlanta	\$ 1,628	\$ 1,624
FHLB-Dallas	585	584
Other bank stocks	713	713
CRA investment	2,134	2,141
	\$ 5,060	\$ 5,062

4. Credit Quality of Loans and Allowance for Loan Losses

A summary of the activity in the allowance for loan losses is as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Balance, beginning of period	\$ 6,752	\$ 7,917	\$ 8,813	\$ 7,995
Provision for loan losses	900	1,500	2,500	2,650
Recoveries	122	99	208	151
Loans charged-off	(461)	(1,045)	(4,208)	(2,325)
Balance, end of period	\$ 7,313	\$ 8,471	\$ 7,313	\$ 8,471

The Company's loans individually evaluated for impairment were approximately \$14.7 million at June 30, 2011 and \$25.2 million at December 31, 2010. Specific reserves totaling \$825,000 were established for \$4.9 million of impaired loans reported at June 30, 2011. At December 31, 2010, specific reserves totaling \$3.1 million were established for \$11.9 million of impaired loans. Interest recognized on impaired loans totaled \$172,000 at June 30, 2011. Loans classified as TDRs totaled \$463,000 and \$653,000 at June 30, 2011 and December 31, 2010, respectively. Four commercial loans were classified as TDRs due to a reduction in monthly payments granted to the borrowers and one small consumer loan was classified as a TDR due to a credit exception granted to the borrower. As of June 30, 2011, there have been no commitments to lend additional funds to debtors owing receivables whose terms have been modified in TDRs.

To provide greater transparency on non-performing assets, additional disclosures required by ASU 2010-20 have been included below. Allowance for loan losses is reported by portfolio segment and further detail of credit quality indicators are provided by class of loans.

5. Earnings Per Common Share

Following is a summary of the information used in the computation of earnings per common share (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Net earnings available to common shareholders	\$1,054	\$951	\$1,496	\$2,087
Weighted average number of common shares outstanding used in computation of basic earnings per common share	9,723	9,707	9,722	9,692
Effect of dilutive securities:				
Stock options	13	18	13	18
Restricted stock	3	-	4	-
Warrants	-	4	-	5
Weighted average number of common shares outstanding plus effect of dilutive securities – used in computation of diluted earnings per share	9,739	9,729	9,739	9,715

Options to acquire 18,331 and 23,786 shares of common stock were not included in computing diluted earnings per share for the quarter and six months ended June 30, 2011 and 2010, respectively, because the effect of these shares was anti-dilutive. For the quarter and six months ended June 30, 2010, 22,047 shares of restricted stock were not included in computed diluted earnings because the effect of these shares was anti-dilutive. As a result of the completion of a qualified equity offering in December 2009, warrants issued to the U. S. Department of the Treasury (the "Treasury") to purchase 208,768 shares of our common stock were reduced to 104,384 shares. The remaining 104,384 shares subject to the warrants were anti-dilutive and not included in the computation of diluted earnings per share for the quarter and six months ended June 30, 2011.

6. Declaration of Dividends

A first quarter dividend of \$0.07 per share for holders of common stock of record on March 17, 2011 was declared on January 25, 2011 and was paid on April 1, 2011. On April 26, 2011, the Company declared a second quarter dividend of \$0.07 per share for holders of common stock of record on June 16, 2011, and was paid on July 1, 2011. A third quarter dividend was declared on July 27, 2011 in the amount of \$0.07 per share for holders of common stock of record on September 16, 2011 to be paid on October 1, 2011.

Table of Contents

The Company's ability to declare and pay dividends on its common stock is subject to first having paid all accrued cumulative preferred dividends that are due. For three years following the issuance of the Fixed Rate Cumulative Perpetual Preferred Stock, Series A ("Series A Preferred Stock") to the Treasury on January 9, 2009, the Company may not increase its per share common stock dividend rate above \$0.28 without the Treasury's consent, unless the Treasury has transferred all the Series A Preferred Stock to third parties.

7. Fair Value Measurement

The Company groups assets and liabilities at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 – Valuation is based upon quoted prices for identical instruments traded in active markets.

Level 2 – Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 – Valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

Following is a description of valuation methodologies used for assets and liabilities which are either recorded or disclosed at fair value.

Cash and Cash Equivalents—The carrying value of cash and cash equivalents is a reasonable estimate of fair value.

Time Deposits Held in Banks—Fair values for fixed-rate time deposits are estimated using a discounted cash flow analysis that applies interest rates currently being offered on time deposits of similar terms of maturity.

Securities Available-for-Sale—Securities available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange and U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter market funds. Securities are classified as Level 2 within the valuation hierarchy when the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information, and the bond's terms and conditions, among other things. Level 2 inputs are used to value U.S. Agency securities, mortgage-backed securities, municipal securities, single issue trust preferred securities, certain pooled trust preferred securities, and certain equity securities that are not actively traded.

Other Investments—The carrying value of other investments is a reasonable estimate of fair value.

Loans—For disclosure purposes, the fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings. For variable rate loans, the carrying amount is a reasonable estimate of fair value. The Company does not record loans at fair value on

a recurring basis. No adjustment to fair value is taken related to illiquidity discounts. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management uses one of three methods to measure impairment, which, include collateral value, market value of similar debt, and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. Impaired loans where an allowance is established based on the fair value of collateral or where the loan balance has been charged down to fair value require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and adjusts the appraisal value by taking an additional discount for market conditions and there is no observable market price, the Company records the impaired loan as nonrecurring Level 3.

Table of Contents

For non-performing loans, collateral valuations currently in file are reviewed for acceptability in terms of timeliness and applicability. Although each determination is made based on the facts and circumstances of each credit, generally valuations are no longer considered acceptable when there has been physical deterioration of the property from when it was last appraised, or there has been a significant change in the underlying assumptions of the appraisal. If the valuation is deemed to be unacceptable, a new appraisal is ordered. New appraisals are typically received within 4-6 weeks. While awaiting new appraisals, the valuation in the file is utilized, net of discounts. Discounts are derived from available relevant market data, selling costs, taxes, and insurance. Any perceived collateral deficiency utilizing the discounted value is specifically reserved (as required by ASC Topic 310) until the new appraisal is received or charged off. Thus, provisions or charge-offs are recognized in the period the credit is identified as non-performing.

The following sources are utilized to set appropriate discounts: market real estate agents, current local sales data, bank history for devaluation of similar property, Sheriff's valuations and buy/sell contracts. If a real estate agent is used to market and sell the property, values are discounted 10% for selling costs. Additional discounts may be applied if research from the above sources indicates a discount is appropriate given devaluation of similar property from the time of the initial valuation.

Other Real Estate—Other real estate properties are adjusted to fair value upon transfer of the loans to other real estate, and annually thereafter to insure other real estate assets are carried at the lower of carrying value or fair value. Exceptions to obtaining initial appraisals are properties where a buy/sell agreement exists for the loan value or greater, or where we have received a Sheriff's valuation for properties liquidated through a Sheriff sale. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the other real estate as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and adjusts the appraisal value by taking an additional discount for market conditions and there is no observable market prices, the Company records the other real estate asset as nonrecurring Level 3.

Cash Surrender Value of Life Insurance Policies—Fair value for life insurance cash surrender value is based on cash surrender values indicated by the insurance companies.

Deposits—The fair value of demand deposits, savings accounts, NOW accounts, and money market deposits is the amount payable on demand at the reporting date. The fair value of fixed maturity certificates of deposit is estimated by discounting the future cash flows using the rates currently offered for deposits of similar remaining maturities. The estimated fair value does not include customer related intangibles.

Securities Sold Under Agreements to Repurchase—The fair value approximates the carrying value of securities sold under agreements to repurchase due to their short-term nature.

Junior Subordinated Debentures—For junior subordinated debentures that bear interest on a floating basis, the carrying amount approximates fair value. For junior subordinated debentures that bear interest on a fixed rate basis, the fair value is estimated using a discounted cash flow analysis that applies interest rates currently being offered on similar types of borrowings.

Commitments to Extend Credit, Standby Letters of Credit and Credit Card Guarantees—Because commitments to extend credit and standby letters of credit are generally short-term and made using variable rates, the carrying value and estimated fair value associated with these instruments are immaterial.

Table of Contents

Assets Recorded at Fair Value

Below is a table that presents information about certain assets and liabilities measured at fair value on a recurring basis (in thousands):

Description	Assets / Liabilities Measured at Fair Value at June 30, 2011	Fair Value Measurements at June 30, 2011 using:		
		Level 1	Level 2	Level 3
Available-for-sale securities:

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on many judgments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing on and off-balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Significant assets and liabilities that are not considered financial instruments include deferred income taxes and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

The estimated fair values of the Company's financial instruments are as follows at June 30, 2011 and December 31, 2010 (in thousands):

	June 30, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Cash and cash equivalents	\$ 74,239	\$ 74,239	\$ 91,907	\$ 91,907
Time deposits held in banks	-	-	5,164	5,206
Securities available-for-sale	322,272	322,272	263,809	263,809
Securities held-to-maturity	340	344	1,588	1,608
Other investments	5,060	5,060	5,062	5,062
Loans, net	580,099	587,266	571,999	580,033
Cash surrender value of life insurance policies	4,772	4,772	4,698	4,698
Financial liabilities:				
Non-interest-bearing deposits	217,706	217,706	199,460	199,460
Interest-bearing deposits	608,190	609,119	601,312	602,188
Securities sold under agreements to repurchase	45,963	45,963	43,826	43,826
Junior subordinated debentures	15,465	16,134	15,465	16,031

8. Subsequent Events

On July 14, 2011, the Company received approval from the U.S. Treasury's Small Business Lending Fund ("SBLF") program to participate and receive up to \$32.0 million in funds under the SBLF authorized by Congress under the Small Business Jobs Act of 2010. Funds from the SBLF will also be used to refinance the Company's Series A Preferred Stock issued to the Treasury under the CPP and potentially provide a significantly lower cost of capital. The dividend rate on the shares of preferred stock issued in connection with the SBLF will be dependent on the Company's volume of qualified small business loans.

On July 29, 2011, the Company's subsidiary, MidSouth Bank, N.A. ("the Bank"), executed the purchase of five Jefferson Bank branches in the Dallas-Fort Worth, Texas area from First Bank and Trust Company of Lubbock, Texas. The Bank acquired approximately \$69.5 million in performing loans, including \$59.8 million of performing Jefferson Bank loans and \$9.7 million of participation loans from First Bank and Trust, and assumed approximately \$164.3 million in Jefferson Bank deposits for a purchase price of \$10.5 million. The \$59.8 million in performing Jefferson Bank loans were purchased at a 1.0% discount and the deposits were purchased at a 4.6% deposit premium, which included a 5.0% premium paid for \$149.9 million of deposits and excluded \$14.4 million of CD deposits for purpose of the deposit premium calculation. Fixed assets acquired in the purchase totaled approximately \$3.6 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation.

MidSouth Bancorp, Inc. (the "Company") is a bank holding company headquartered in Lafayette, Louisiana that conducts substantially all of its business through its wholly-owned subsidiary bank MidSouth Bank, N.A. (the "Bank"). We offer complete banking services to commercial and retail customers in south Louisiana and southeast Texas with 39 locations and more than 50 ATMs. We are community oriented and focus primarily on offering commercial and consumer loan and deposit services to individuals, small businesses, and middle market businesses.

The following discussion and analysis identifies significant factors that have affected our financial position and operating results during the periods included in the financial statements accompanying or incorporated by reference in this report. We encourage you to read this discussion in conjunction with our consolidated financial statements and the notes thereto presented herein and with the financial statements, the notes thereto, and related Management's Discussion and Analysis of Financial Condition and Results of Operation in the Company's Annual Report on Form 10-K for the year ended December 31, 2010.

Forward-Looking Statements

Certain statements contained herein are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and subject to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, which involve risks and uncertainties. The words "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "could," "would," "should," "potential," "fore" expressions are typically used to identify forward-looking statements. These statements include, among others, statements regarding future results, closing on our Small Business Lending Fund ("SBLF") funding, improvements in classified and criticized assets, changes in the local and national economy, the work-out of nonaccrual loans, the integration of operations from recently completed acquisitions, the competition for other potential acquisitions and the impact of regulatory changes regarding electronic transactions. Actual results may differ materially from the results anticipated in these forward-looking statements. Factors that might cause such a difference include, among other matters, changes in interest rates and market prices that could affect the net interest margin, asset valuation, and expense levels; changes in local economic and business conditions, including, without limitation, changes related to the oil and gas industries, that could adversely affect customers and their ability to repay borrowings under agreed upon terms, adversely affect the value of the underlying collateral related to their borrowings, and reduce demand for loans; the timing and ability to reach any agreement to restructure nonaccrual loans; increased competition for deposits and loans which could affect compositions, rates and terms; the timing and impact of future acquisitions, the success or failure of integrating operations, and the ability to capitalize on growth opportunities upon entering new markets; loss of critical personnel and the challenge of hiring qualified personnel at reasonable compensation levels; legislative and regulatory changes, including the impact of regulations under the Dodd-Frank Wall Street Reform and Consumer Protections Act of 2010 (the "Dodd-Frank Act") and other changes in banking, securities and tax laws and regulations and their application by our regulators, changes in the scope and cost of FDIC insurance and other coverages, and repayment of funds acquired under the U.S. Treasury's Capital Purchase Program (the "CPP"); and other factors discussed under the heading "Risk Factors" in MidSouth's Annual Report on Form 10-K for the year ended December 31, 2010 filed with the SEC on March 16, 2011 and in its other filings with the SEC. We can give no assurance that any of the events anticipated by the forward-looking statements will occur or, if any of them does, what impact they will have on our results of operations and financial condition. We disclaim any intent or obligation to publicly update or revise any forward-looking statements, regardless of whether new information becomes available, future developments occur or otherwise.

Critical Accounting Policies

Certain critical accounting policies affect the more significant judgments and estimates used in the preparation of the consolidated financial statements. Our significant accounting policies are described in the notes to the consolidated financial statements included in this report. The accounting principles we follow and the methods of applying these principles conform with accounting principles generally accepted in the United States of America (“GAAP”) and general banking practices. Our most critical accounting policy relates to the Allowance for Loan Losses (“ALL”), which reflects the estimated losses resulting from the inability of its borrowers to make loan payments. If the financial condition of our borrowers were to deteriorate, resulting in an impairment of their ability to make payments, the estimates would be updated and additional provisions for loan losses may be required. See Asset Quality.

Table of Contents

Another of our critical accounting policies relates to goodwill and intangible assets. Goodwill represents the excess of the purchase price over the fair value of net assets acquired. Goodwill is not amortized, but is evaluated for impairment annually or more frequently if deemed necessary. If the fair value of an asset exceeds the carrying amount of the asset, no charge to goodwill is made. If the carrying amount exceeds the fair value of the asset, goodwill will be adjusted through a charge to earnings.

Given the continued instability of the economic environment, it is reasonably possible that the methodology of the assessment of potential loan losses and goodwill impairment could change in the near-term or could result in impairment going forward.

Recent Developments

On July 14, 2011, we received approval from the U.S. Treasury's SBLF program to participate and receive up to \$32.0 million in funds under the SBLF authorized by Congress under the Small Business Jobs Act of 2010. Funds from the SBLF will also be used to refinance our Series A Preferred Stock issued to the Treasury under the CPP and potentially provide a significantly lower cost of capital. The dividend rate on the shares of preferred stock issued in connection with the SBLF will be dependent on our volume of qualified small business loans. We expect the SBLF transaction to close by the end of August 2011.

On July 29, 2011, we completed our acquisition of five branches from Jefferson Bank and First Bank and Trust Company. We acquired five Jefferson Bank branches located in the Dallas-Fort Worth, Texas area with approximately \$69.5 million in loans and \$164.3 million in deposits. We began operating the five branches as MidSouth Bank, N.A. on August 1, 2011. Additional information regarding the acquisition can be found under the Investor Relations page of our website at www.midsouthbank.com. We are not incorporating by reference into this report the information contained on our website, therefore the content of the website is not part of this report.

Results of Operations

Earnings Analysis

We reported net earnings available to common shareholders of \$1.1 million for the second quarter of 2011, compared to net earnings available to common shareholders of \$951,000 reported for the second quarter of 2010. Diluted earnings for the second quarter of 2011 were \$0.10 per common share, unchanged from the second quarter of 2010.

For the six months ended June 30, 2011, net income available to common shareholders totaled \$1.5 million, a 28.3% decrease from earnings of \$2.1 million for the first six months of 2010. Diluted earnings per share were \$0.15 for the first six months of 2011, compared to \$0.22 for the first six months of 2010.

Second quarter 2011 net earnings available to common shareholders increased due to a \$507,000 increase in net-interest income and a \$600,000 decrease in the provision for loan losses. Net interest income increased in prior year quarterly comparison due to a reduction in interest expense. The improvement in earnings was offset by an \$811,000 decrease in non-interest income. Service charges on deposit accounts decreased \$1.1 million, primarily as a result of fewer insufficient funds ("NSF") transactions processed. The decrease in service charges on deposit accounts was partially offset by an \$111,000 increase in ATM/debit card income and a \$140,000 increase in other non-interest income, primarily income recorded on Other Real Estate ("ORE") and net gains on sales of investment securities. Non-interest expense increased \$64,000 in prior year quarterly comparison, as decreases of \$93,000 in occupancy expenses and \$125,000 in FDIC fees offset increased expenses, including \$137,000 in legal and professional fees and \$158,000 in expenses on ORE and other assets repossessed.

In year-to-date comparison, a \$591,000 decrease in net earnings available to common shareholders resulted from a \$1.4 million reduction in non-interest income, which was partially offset by a \$548,000 improvement in net interest income and reductions of \$150,000 in provision expense and \$190,000 in income tax expense. The \$1.4 million decrease in non-interest income was driven by a \$1.8 million reduction in NSF fee income due to a lower volume of NSF transactions processed. Regulatory changes governing our ability to collect NSF fees implemented in the second half of 2010, combined with proactive steps taken during the first quarter of 2011 in response to guidance issued by the FDIC, have significantly lowered our NSF fee income. Additional regulatory changes regarding debit card transaction fees could further reduce our non-interest income earned in future periods.

Table of Contents

Net Interest Income

Our primary source of earnings is net interest income, which is the difference between interest earned on loans and investments and interest paid on deposits and other interest-bearing liabilities. Changes in the volume and mix of earning assets and interest-bearing liabilities combined with changes in market rates of interest greatly affect net interest income. Our net interest margin on a taxable equivalent basis, which is net interest income as a percentage of average earning assets, was 4.61% and 4.73% for the three months ended June 30, 2011 and 2010, respectively. Tables 1 and 3 and tables 2 and 4 below analyze the changes in net interest income in the three months ended June 30, 2011 and 2010 and the six months ended June 30, 2011 and 2010, respectively.

Fully taxable-equivalent (“FTE”) net interest income totaled \$10.9 million for the second quarter of 2011, an increase of 4.3%, or \$446,000, from the \$10.4 million reported for the second quarter of 2010. The increase in FTE net interest income resulted primarily from a 34 basis point reduction in the average rate paid on interest-bearing liabilities, from 1.18% for the three months ended June 30, 2010 to 0.84% for the three months ended June 30, 2011. The \$501,000 reduction in interest expense was partially offset by a \$55,000 decrease in interest income on earning assets for the period.

Interest income on average earning assets remained relatively flat in quarterly comparison as a \$62.8 million increase in the average volume offset a 40 basis point decline in the average yield. Interest income on loans declined \$193,000 due to a \$2.8 million decrease in the average volume and a 10 basis point decrease in the average yield on loans in quarterly comparison, as the loan portfolio continues to rollover into a lower rate environment. Interest income on investments increased \$166,000, as the impact of a 46 basis point decline in the average yield on investments was offset by a \$57.7 million increase in the average volume. Investment yields have been significantly impacted as higher yielding investments have rolled out of the portfolio into lower yielding bonds and excess liquidity has earned yields of 25 points or less. The volume increase resulted from the purchase of approximately \$84.8 million of US Agency mortgage-backed securities during March and April of 2011.

The average volume of interest-bearing deposits increased \$24.8 million in quarterly comparison, from \$587.1 million at June 30, 2010 to \$611.9 million at June 30, 2011. A \$33.9 million increase in the volume of NOW, money market and savings deposits offset a \$9.1 million decrease in the average volume of time deposits. We offer competitive market rates of interest on our Platinum money market accounts, and in the current rate environment those rates are comparable to rates earned on time deposits. The average volume of retail repurchase agreements, included in securities sold under agreements to repurchase, decreased \$0.7 million and the average rate paid on the accounts declined 32 basis points.

The average rate paid on the Company’s junior subordinated debentures decreased 3 basis points from second quarter of 2010 to second quarter of 2011 due to the rate change on the \$8.2 million of variable rate debentures. The debentures carry a floating rate equal to the 3-month LIBOR plus 2.50%, adjustable and payable quarterly. The rate at June 30, 2011 was 2.75%. The debentures mature on September 20, 2034 but may be repaid sooner, under certain circumstances. The Company also has outstanding \$7.2 million of junior subordinated debentures due 2031 that carry a fixed interest rate of 10.20%. As a result of these changes in volume and yield on earning assets and interest bearing liabilities, the FTE net interest margin decreased 12 basis points, from 4.73% for the second quarter of 2010 to 4.61% for the second quarter of 2011.

In year-to-date comparison, FTE net interest income increased \$448,000, as a \$645,000 reduction in interest income from loans and investments was offset by a \$1.1 million decrease in interest expense. Interest expense decreased primarily due to a 36 basis point reduction in the average rate paid on interest-bearing liabilities, from 1.22% for the six months ended June 30, 2010 to 0.86% for the six months ended June 30, 2011. The decrease in interest income on average earning assets resulted primarily from a 47 basis point decline in the average yield on earning assets, from

5.64% at June 30, 2010 to 5.17% at June 30, 2011. An average volume increase of \$53.9 million in average earning assets partially offset the impact of lower yields. As a result, the taxable-equivalent net interest margin declined 18 basis points, from 4.74% for the six months ended June 30, 2010 to 4.56% for the six months ended June 30, 2011.

1 Securities classified as available-for-sale are included in average balances. Interest income figures reflect interest earned on such securities.

2 Interest income of \$349,000 for 2011 and \$410,000 for 2010 is added to interest earned on tax-exempt obligations to reflect tax equivalent yields using a 34% tax rate.

3 Interest income includes loan fees of \$867,000 for 2011 and \$791,000 for 2010. Nonaccrual loans are included in average balances and income on such loans is recognized on a cash basis.

1 Securities classified as available-for-sale are included in average balances. Interest income figures reflect interest earned on such securities.

2 Interest income of \$732,000 for 2011 and \$832,000 for 2010 is added to interest earned on tax-exempt obligations to reflect tax equivalent yields using a 34% tax rate.

3 Interest income includes loan fees of \$1,580,000 for 2011 and \$1,513,000 for 2010. Nonaccrual loans are included in average balances and income on such loans is recognized on a cash basis.

Table of Contents

Non-interest Income

Non-interest income for the second quarter of 2011 totaled \$3.2 million, a decrease of \$811,000 from the \$4.0 million earned in the second quarter of 2010. For the six month period ended June 30, 2011, non-interest income totaled \$6.2 million compared to \$7.7 million for the six months ended June 30, 2010, a net decrease of \$1.4 million year-over-year. In prior-year quarterly comparison, non-interest income decreased primarily due to a \$1.1 million decrease in service charges on deposit accounts as a result of fewer NSF transactions processed. The decrease in service charges on deposit accounts was partially offset by an \$111,000 increase in ATM/debit card income and a \$140,000 increase in other non-interest income, primarily income recorded on ORE and net gains on sales of investment securities.

In year-to-date comparison, the decrease in non-interest income was also driven by a reduction in the volume of NSF transactions processed. Service charge income on deposit accounts decreased \$1.8 million and was partially offset by increases of \$203,000 in ATM and debit card income and \$50,000 in other non-interest income. Additionally, net gains on sales of investment securities of \$99,000 were recorded for the six months ended June 30, 2011.

The volume of NSF items processed decreased in both quarterly and year-to-date comparisons as a result of regulatory changes implemented in the second half of 2010 as required by Regulation E, which governs the treatment of electronic funds transfers and the Bank's ability to collect fees for overdrafts involving ATM and point of sale debit transactions. Additionally, in the first quarter of 2011, we proactively responded to regulatory guidance for overdraft protection programs issued by the FDIC by creating an ombudsman program. The program provides financial counseling to our customers in how to properly maintain and monitor their accounts in order to avoid excessive overdraft fees. These measures have resulted in a lower volume of NSF transactions and decreased NSF fee income. Additional regulatory changes regarding debit card transaction fees could further reduce non-interest income earned in future periods.

Non-interest Expenses

Non-interest expense was relatively flat in both quarterly and year-to-date comparisons, with increases of \$64,000 and \$57,000, respectively. In quarterly comparison, decreases of \$93,000 in occupancy expenses and \$125,000 in FDIC fees partially offset increases of \$137,000 in legal and professional fees and \$158,000 in expenses on ORE and other assets repossessed. The increase in legal and professional fees resulted primarily from fees related to the acquisition of the branches in the Dallas-Fort Worth market that closed on July 29, 2011. Expenses on ORE and other assets repossessed increased due to a continued focus to reduce nonperforming assets.

Non-interest expense increased \$57,000 in year-over-year comparison, from \$21.9 million at June 30, 2010 to \$22.0 million at June 30, 2011. Decreases of \$288,000 in occupancy expense, \$129,000 decrease in FDIC fees, \$104,000 in data processing costs, and \$84,000 in marketing and customer relationship management ("CRM") expenses were partially offset by increases of \$349,000 in ORE expenses and \$269,000 in legal and professional fees. Occupancy expense decreased primarily due to lower depreciation costs. The reduction in FDIC fees resulted from a regulatory change in the calculation. Data processing costs declined due primarily to a reduction in the cost of data communication lines and internet banking processing costs. Salaries and benefit costs were flat year-over-year and the number of full-time equivalent employees declined from 389 at June 30, 2010 to 387 at June 30, 2011.

Expenses on ORE increased \$349,000 in year-over-year comparison primarily due to four properties added in the first six months of 2011. The increase included general expenses incurred on repossessed properties, \$191,000 in losses on valuation of the properties, and \$66,000 in losses on sales of properties. The \$269,000 increase in legal and professional fees resulted primarily from fees related to the evaluation of potential acquisition opportunities and to various other legal actions as discussed in Part II – Other Information, Item 1. Legal Proceedings.

Analysis of Statement of Condition

Total assets at June 30, 2011 were \$1.05 billion compared to \$1.00 billion at December 31, 2010. Total assets increased \$46.8 million during the first six months of 2011 primarily due to deposit growth. Deposits totaled \$825.9 million as of June 30, 2011 compared to \$800.8 million at December 31, 2010. The growth in deposits over the six months ended June 30, 2011 reflected a strong mix of non-interest bearing commercial deposits and both non-interest and interest bearing consumer deposits. Non-interest bearing deposits were 26.4% of total deposits at June 30, 2011 compared to 24.9% at December 31, 2010. Total loans were \$587.4 million at June 30, 2011, an increase of \$6.6 million compared to \$580.8 million at December 31, 2010. Total loans decreased in the first quarter of 2011 primarily due to \$3.7 million in loans charged-off. Of the \$3.7 million in charge-offs, \$2.8 million were specific reserves charged-off on problem loans identified early on in the economic downturn. The loan portfolio grew \$13.2 million during the second quarter as loan demand improved and funding activity increased. Additional information regarding nonperforming assets and changes in the ALL is provided under the heading Asset Quality.

Table of Contents

Securities available-for-sale totaled \$322.3 million at June 30, 2011, up \$58.5 million from \$263.8 million at December 31, 2010. For the six months ended June 30, 2011, purchases of \$99.9 million in the available-for-sale portfolio exceeded calls, maturities and paydowns on mortgage-backed securities. The purchases were comprised primarily of 15 year fixed rate mortgage pass-through securities and floating rate collateral mortgage obligations and provided incremental yield improvement in the securities portfolio. Securities held-to-maturity decreased \$1.2 million from \$1.6 million at December 31, 2010 to \$340,000 at June 30, 2011 due primarily to calls and maturities within the portfolio. Additionally, one held-to-maturity municipal bond with a cost value of \$350,000 was sold as a result of an external review performed on the municipal bond portfolio. Results of the external review disclosed the inability to obtain financial information on the municipality. Consistent with action taken on other municipal bonds with a similar deficiency, the bond was sold.

The composition of the Company's loan portfolio is reflected in Table 5 below.

Table 5
Composition of Loans
(in thousands)

	June 30, 2011	December 31, 2010
Commercial, financial, and agricultural	\$ 194,136	\$ 177,598
Lease financing receivable	4,660	4,748
Real estate – commercial	213,007	208,764
Real estate – residential	71,589	72,460
Real estate – construction	46,608	54,164
Installment loans to individuals	56,768	62,272
Other	644	806
Total loans	\$ 587,412	\$ 580,812

Commercial, financial and agricultural loans increased \$16.5 million over the first six months of 2011 due to stronger loan demand in the second quarter of 2011. A \$4.2 million increase in the commercial real estate portfolio was offset by decreases of \$7.6 million in real estate construction loans and \$0.9 million in residential real estate. The \$7.6 million decrease in real estate construction loans included a \$1.7 million write-down of specific reserves on one nonperforming loan and the \$1.6 million sale of another nonperforming loan during the first quarter of 2011. Installment loans to individuals continued to decline in the first half of 2011, with a decrease of \$5.5 million in consumer credits.

Within the \$213.0 million commercial real estate portfolio, \$195.3 million is secured by commercial property, \$10.7 million is secured by multi-family property, and \$7.0 million is secured by farmland. Of the \$195.3 million secured by commercial property, \$141.1 million, or 72.2%, is owner-occupied. Of the \$71.6 million residential real estate portfolio, 83.8% represented loans secured by first liens. Within the \$46.6 million real estate construction portfolio, 90.7% represented commercial construction and land development and 9.3% represented residential construction and consumer property. We believe our risk within the real estate and construction portfolios is diversified throughout our markets and that current exposure within the two portfolios is sufficiently provided for within the ALL (Allowance for Loan Loss) at June 30, 2011.

Off-Balance Sheet Arrangements

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with U.S. generally accepted accounting principles, are not recorded in the financial statements. These transactions involve, to varying degrees, elements of credit, interest rate, and liquidity risk. Such transactions are used primarily to

manage customers' requests for funding and take the form of loan commitments, letters of credit and lines of credit.

Table of Contents

For the period ended June 30, 2011, we did not engage in any off-balance sheet transactions reasonably likely to have a material impact on our financial condition, results of operations or cash flows.

Bank Liquidity

Liquidity is the availability of funds to meet maturing contractual obligations and to fund operations. The Bank's primary liquidity needs involve its ability to accommodate customers' demands for deposit withdrawals as well as customers' requests for credit. Liquidity is deemed adequate when sufficient cash to meet these needs can be promptly raised at a reasonable cost to the Bank.

Liquidity is provided primarily by three sources: a stable base of funding sources, an adequate level of assets that can be readily converted into cash, and borrowing lines with correspondent banks. Our core deposits are our most stable and important source of funding. Cash deposits at other banks, federal funds sold, and principal payments received on loans and mortgage-backed securities provide additional primary sources of liquidity. Approximately \$37.6 million in projected cash flows from securities repayments for the remainder of 2011 provides an additional source of liquidity.

The Bank also has significant borrowing capacity with the FRB-Atlanta and with the FHLB-Dallas. As of June 30, 2011, we had no borrowings with the FRB-Atlanta or the FHLB-Dallas. The Company has \$21.3 million in borrowing capacity at the FRB Discount Window and has the ability to post additional collateral of approximately \$168.3 million if necessary to meet liquidity needs. Additionally, \$12.3 million in loan collateral is pledged under a Borrower-in-Custody line with the FRB-Atlanta. Under existing agreements with the FHLB-Dallas, our borrowing capacity totaled \$206.1 million at June 30, 2011. Additional unsecured borrowing lines totaling \$33.5 million are available through correspondent banks. We utilize these contingency funding alternatives to meet deposit volatility, which is more likely in the current environment, given unusual competitive offerings within our markets.

We are also expecting additional liquidity as a result of our recently completed branch acquisition pursuant to which we acquired five Jefferson Bank branches located in the Dallas-Fort Worth, Texas area with approximately \$69.5 million in loans and \$164.3 million in deposits.

Company Liquidity

On July 14, 2011, we received approval from the U.S. Treasury's SBLF program to participate and receive up to \$32.0 million in funds under the SBLF authorized by Congress under the Small Business Jobs Act of 2010. Funds from the SBLF will also be used to repay our \$20.0 million in Series A Preferred Stock issued to the Treasury under the CPP and potentially provide a significantly lower cost of capital. The dividend rate on the shares of preferred stock issued in connection with the SBLF will be dependent on our volume of qualified small business loans.

At the Company level, cash is needed primarily to meet interest payments on the junior subordinated debentures, dividend payments on the Series A Preferred Stock issued in the CPP transaction (which will be replaced by dividends on the investment in SBLF) and dividends on our common stock. We issued \$8,248,000 in unsecured junior subordinated debentures in September 2004 and \$7,217,000 in February 2001, the terms of which are described in the notes to the consolidated financial statements. Although no dividends have been paid to the Company in the current year, as of June 30, 2011, the Bank had the ability to pay dividends to the Company of approximately \$12.7 million without prior approval from its primary regulator. The Company received no dividends from the Bank during the first six months of 2010. At June 30, 2011, the Company had approximately \$30.0 million in cash available for general corporate purposes, including injecting capital into the Bank. As a publicly traded company, the Company also has the ability, subject to market conditions, to issue additional shares of common stock and other securities to provide funds as needed for operations and future growth of the Company.

Capital

The Company and the Bank are required to maintain certain minimum capital levels. Risk-based capital requirements are intended to make regulatory capital more sensitive to the risk profile of an institution's assets. At June 30, 2011, the Company and the Bank were in compliance with statutory minimum capital requirements and was classified as "well capitalized." Minimum capital requirements include a total risk-based capital ratio of 8.0%, with Tier 1 capital not less than 4.0%, and a leverage ratio (Tier 1 to total average adjusted assets) of 4.0% based upon the regulators latest composite rating of the institution. As of June 30, 2011, the Company's leverage ratio was 13.60%, Tier 1 capital to risk-weighted assets was 20.53% and total capital to risk-weighted assets was 21.64%. The Bank had a leverage capital ratio of 10.69% at June 30, 2011.

Table of Contents

Subsequent to quarter-end, the Bank's acquisition of five Jefferson Bank branches will reduce capital levels; however the Company and the Bank continue to be classified as "well capitalized."

Asset Quality

Credit Risk Management

We manage credit risk primarily by observing written, board approved policies that govern all credit underwriting and approval activities. The risk management program requires that each individual loan officer review his or her portfolio on a quarterly basis and assign recommended credit ratings on each loan. These efforts are supplemented by independent reviews performed by the loan review officer and other validations performed by the internal audit department. The results of the reviews are reported directly to the Audit Committee of the Board of Directors. Additionally, credit concentrations are monitored and reported quarterly whereby individual customer and aggregate industry leverage, profitability, risk rating distributions, and liquidity are evaluated for each major standard industry classification segment. At June 30, 2011, one industry segment concentration, the oil and gas industry, aggregated more than 10% of our loan portfolio. Our exposure in the oil and gas industry, including related service and manufacturing industries, totaled approximately \$99.2 million, or 16.9% of total loans. Additionally, we monitor our exposure to loans secured by commercial real estate. At June 30, 2011, loans secured by commercial real estate, including commercial construction loans, totaled approximately \$255.3 million. Of the loans secured by commercial real estate, \$6.6 million or 2.6% are nonaccrual. Additional information regarding credit quality by loan classification is provided in Note 4 – Credit Quality of Loans and Allowance for Loan Losses and Note 7 – Fair Value Measurement in the notes to the interim consolidated financial statements.

Table of Contents

Nonperforming Assets and Allowance for Loan Loss

Table 6 summarizes the Company's nonperforming assets for the quarters ending June 30, 2011 and 2010, and December 31, 2010.

Table 6
Nonperforming Assets and Loans Past Due 90 Days or More and Still Accruing
(in thousands)

	June 30, 2011	December 31, 2010	June 30, 2010
Nonaccrual loans	\$ 10,456	\$ 19,603	\$ 19,772
Loans past due 90 days and over and still accruing	69	66	1,459
Total nonperforming loans	10,525	19,669	21,231
Other real estate	5,677	1,206	1,002
Other foreclosed assets	23	36	65
Total nonperforming assets	\$ 16,225	\$ 20,911	\$ 22,298
Troubled debt restructurings	\$ 463	\$ 653	\$ 1,198
Nonperforming assets to total assets	1.55 %	2.09 %	2.29 %
Nonperforming assets to total loans + ORE + other foreclosed assets	2.74 %	3.59 %	3.80 %
ALL to nonperforming loans	69.48 %	44.81 %	39.90 %
ALL to total loans	1.24 %	1.52 %	1.45 %
YTD charge-offs	\$ 4,208	\$ 4,456	\$ 2,325
YTD recoveries	(208)	(254)	(151)
YTD net charge-offs	\$ 4,000	\$ 4,202	\$ 2,174
Annualized net charge-offs to total loans	1.37 %	0.72 %	0.75 %

Nonaccrual loans totaled \$10.5 million as of June 30, 2011, compared to \$19.6 million as of December 31, 2010 and \$19.8 million at June 30, 2010. The decrease in nonaccruals in year-end and year-over-year comparisons resulted primarily from the transfer of a \$4.9 million commercial real estate loan into ORE in the second quarter of 2011. Nonaccrual loans also declined due to first quarter 2011 charge-offs of \$2.8 million in specific reserves related to the loan transferred to ORE and a second commercial real estate loan in the Houston market. Additionally, we sold a \$1.6 million commercial real estate note in the first quarter of 2011 that further reduced nonaccrual loans in prior year comparison. We expect to transfer the commercial real estate loan in the Houston market to ORE during the third quarter of 2011.

Loans past due 90 days or more and still accruing totaled \$69,000 at June 30, 2011, an increase of \$3,000 from December 31, 2010 and a decrease of \$1.4 million from June 30, 2010. Total nonperforming assets to total assets were 1.55% at June 30, 2011, compared to 2.09% at December 31, 2010 and 2.29% at June 30, 2010. Four commercial loans were classified as TDRs due to a reduction in monthly payments granted to the borrowers and one small consumer loan was classified as a TDR due to a credit exception granted to the borrower. Additional information regarding impaired loans is included in Note 4 – Credit Quality of Loans and Allowance for Loan Losses and Note 7 – Fair Value Measurement in the notes to the interim consolidated financial statements.

Subsequent to quarter-end, we sold our largest nonperforming loan, a shared national credit totaling \$2.7 million. Prior to the sale, we recorded a specific reserve in the second quarter of 2011 of approximately \$285,000. The sale of this loan represents another 16.5% reduction after quarter-end in the level of nonperforming assets at June 30, 2011.

ALL coverage for nonperforming loans was 69.48% at June 30, 2011, compared to 44.81% at December 31, 2010 and 39.90% at June 30, 2010. While reserves in relation to nonperforming loans appear low, we remain comfortable with the overall credit exposure given the relative economic and collateral value strength in our markets and the extent of credit review performed by internal and third party sources. Annualized net charge-offs were 1.37% of total loans for the second quarter of 2011, compared to 0.72% for the year-end 2010 and 0.75% for the second quarter of 2010. The ALL/total loans ratio was 1.24% at June 30, 2011 compared to 1.52% at December 31, 2010 and 1.45% at June 30, 2010. The year-to-date annualized net charge-offs/total loans ratio of 1.37% and the ALL/total loans ratio of 1.24% at June 30, 2011 were both impacted by the \$2.8 million in specific reserves charged-off during the first quarter of 2011.

Table of Contents

Quarterly evaluations of the allowance for loan losses are performed in accordance with GAAP and regulatory guidelines. The ALL is comprised of specific reserves assigned to each impaired loan for which a probable loss has been identified as well as general reserves to maintain the allowance at an acceptable level for other loans in the portfolio where historical loss experience is available that indicates certain probable losses may exist. Factors considered in determining provisions include estimated losses in significant credits; known deterioration in concentrations of credit; historical loss experience; trends in nonperforming assets; volume, maturity and composition of the loan portfolio; off-balance sheet credit risk; lending policies and control systems; national and local economic conditions; the experience, ability and depth of lending management; and the results of examinations of the loan portfolio by regulatory agencies and others. The processes by which we determine the appropriate level of the ALL, and the corresponding provision for probable credit losses, involves considerable judgment; therefore, no assurance can be given that future losses will not vary from current estimates. We believe the \$7.3 million in the ALL as of June 30, 2011 is sufficient to cover probable losses in the loan portfolio.

Impact of Inflation and Changing Prices

The consolidated financial statements of and notes thereto, presented herein, have been prepared in accordance with GAAP, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increased cost of the Company's operations. Unlike most industrial companies, nearly all the assets and liabilities of the Company are financial. As a result, interest rates have a greater impact on the Company's performance than do the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have been no significant changes from the information regarding market risk disclosed under the heading "Funding Sources - Interest Rate Sensitivity" in the Company's Annual Report on Form 10-K for the year ended December 31, 2010.

Item 4. Controls and Procedures.

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). As of the end of the period covered by this Quarterly Report on Form 10-Q, the Chief Executive Officer and Chief Financial Officer have concluded that such disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission rules and forms.

During the second quarter of 2011, there was no change in the Company's internal controls over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

Part II – Other Information

Item 1. Legal Proceedings.

A Notice of Charge of Discrimination was filed against the Company in April 2011 with the U.S. Equal Employment Opportunity Commission by Karen L. Hail, a Director and former officer of the Company. Ms. Hail's claim alleges gender discrimination and retaliation. In May 2011, Ms. Hail also filed an action in U.S. District Court for the Western District of Louisiana against the Company and the Bank for discrimination and retaliation in violation of the Family Medical Leave Act and Title VII of the Civil Rights Act seeking unspecified monetary damages. In July 2011, the Company and the Bank filed an answer and counterclaim along with a motion to partially dismiss Ms. Hail's claims. Ms. Hail filed a response to the motion to dismiss on August 2, 2011. The Company believes Ms. Hail's claims are without merit and will strongly defend against the claim. Ms. Hail was employed by the Bank through March 31, 2011 and served as a Director of the Company through May 24, 2011.

The Bank has been named as a defendant in various other legal actions arising from normal business activities in which damages of various amounts are claimed. While the amount, if any, of ultimate liability with respect to such matters cannot be currently determined, management believes, after consulting with legal counsel, that any such liability will not have a material adverse effect on the Company's consolidated financial position, results of operations, or cash flows.

Item 1A. Risk Factors.

There have been no material changes from the risk factors previously disclosed in our Form 10-K for the year ended December 31, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The Company did not repurchase any equity securities during the quarter ended June 30, 2011.

The Company is currently prohibited from repurchasing its common shares due to its participation in the CPP with the Treasury.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Removed and Reserved.

None.

Item 5. Other Information.

None.

Item 6. Exhibits.
