

United States Natural Gas Fund, LP
Form 424B3
April 17, 2007

Filed Pursuant to Rule 424(b)(3)
Registration No. 333-137871

PROSPECTUS

United States Natural Gas Fund, LP

30,000,000 Units

United States Natural Gas Fund, LP, a Delaware limited partnership, is a commodity pool that will issue units that may be purchased and sold on the American Stock Exchange. United States Natural Gas Fund, LP is referred to as USNG throughout this document. The investment objective of USNG is for the changes in percentage terms of the units' net asset value to reflect the changes in percentage terms of the price of natural gas delivered at the Henry Hub, Louisiana, as measured by the changes in the price of the futures contract on natural gas traded on the New York Mercantile Exchange that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire, less USNG's expenses. This is a best efforts offering. USNG will continuously offer creation baskets consisting of 100,000 units to authorized purchasers through ALPS Distributors, Inc., which is the marketing agent. Merrill Lynch Professional Clearing Corp. is expected to be the initial authorized purchaser. A list of USNG's current authorized purchasers will be available from the marketing agent. Authorized purchasers will pay a transaction fee of \$1,000 for each order to create one or more baskets. There are no arrangements to place funds in an escrow, trust, or similar account. This will be a continuous offering and will not terminate until all of the registered units have been sold.

•

It is anticipated that on the effective date (the date the Securities and Exchange Commission declares the registration statement relating to this Prospectus effective), the initial authorized purchaser will, though it is under no obligation to do so, purchase one or more initial creation baskets of 100,000 units at a price per unit of \$50.00. It is expected that the proceeds from that purchase will be invested on that day and that USNG's initial per unit net asset value will be established as of 4:00 p.m. New York City time that day. The units are expected to begin trading on the day following the effective date. Units offered in creation baskets on any day after the effective date will be offered at the per unit net asset value as of the earlier of 4:00 p.m. New York time or the close of trading on the New York Stock Exchange.

•

Authorized purchasers will be the only persons that may place orders to create and redeem baskets. An authorized purchaser is under no obligation to create or redeem baskets, and an authorized purchaser is under no obligation to offer to the public units of any baskets it does create. Authorized purchasers that do offer to the public units from the baskets they create will do so at per-unit offering prices that are expected to reflect, among other factors, the trading price of the units on the American Stock Exchange, the net asset value of USNG at the time the authorized purchaser purchased the creation basket and the net asset value at the time of the offer of the units to the public, the supply of and demand for units at the time of sale, and the liquidity of the natural gas futures contract market and the market for other natural gas-related investments. The prices of units offered by authorized purchasers are expected to fall between USNG's net asset value and the trading price of the units on the American Stock Exchange at the time of sale. The difference between the price paid by authorized purchasers as underwriters and the price paid to such authorized purchasers by investors will be deemed underwriting compensation. Units initially comprising the same basket but offered by authorized purchasers to the public at different times may have different offering prices. Units are expected to trade in the secondary market on the American Stock Exchange. Units may trade in the secondary market at prices

that are lower or higher relative to their net asset value per unit. The amount of the discount or premium in the trading price relative to the net asset value per unit may be influenced by various factors, including the number of investors who seek to purchase or sell units in the secondary market and the liquidity of the natural gas futures contract market and the market for other natural gas-related investments. Authorized purchasers will not be required to sell any specific number or dollar amount of units.

USNG is not a mutual fund registered under the Investment Company Act of 1940 and is not subject to regulation under such Act.

Some of the risks of investing in USNG include:

-

Investing in natural gas interests subjects USNG to the risks of the natural gas industry which could result in large fluctuations in the price of USNG's units.

-

If certain correlations do not exist, then investors may not be able to use USNG as a cost-effective way to invest indirectly in natural gas or as a hedge against the risk of loss in natural gas-related transactions.

-

USNG does not expect to make cash distributions.

-

USNG and its general partner may have conflicts of interest, which may permit them to favor their own interests to your detriment.

-

USNG has no operating history so there is no performance history to serve as a basis for you to evaluate an investment in USNG.

Investing in USNG involves other significant risks. See [What Are the Risk Factors Involved with an Investment in USNG?](#) starting on page 10.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION (SEC) NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THE SECURITIES OFFERED IN THIS PROSPECTUS, OR DETERMINED IF THIS PROSPECTUS IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

THE COMMODITY FUTURES TRADING COMMISSION (CFTC) HAS NOT PASSED UPON THE MERITS OF PARTICIPATING IN THIS POOL NOR HAS IT PASSED ON THE ADEQUACY OR ACCURACY OF THIS DISCLOSURE DOCUMENT.

This prospectus is in two parts: a disclosure document and a statement of additional information. These parts are bound together, and both contain important information.

	Per Unit	Per Basket
Price of the units in the first basket(s) sold	\$ 50.00	\$ 5,000,000.00

The date of this prospectus is April 17, 2007.

**COMMODITY FUTURES TRADING COMMISSION
RISK DISCLOSURE STATEMENT**

YOU SHOULD CAREFULLY CONSIDER WHETHER YOUR FINANCIAL CONDITION PERMITS YOU TO PARTICIPATE IN A COMMODITY POOL. IN SO DOING, YOU SHOULD BE AWARE THAT FUTURES AND OPTIONS TRADING CAN QUICKLY LEAD TO LARGE LOSSES AS WELL AS GAINS. SUCH TRADING LOSSES CAN SHARPLY REDUCE THE NET ASSET VALUE OF THE POOL AND CONSEQUENTLY THE VALUE OF YOUR INTEREST IN THE POOL. IN ADDITION, RESTRICTIONS ON REDEMPTIONS MAY AFFECT YOUR ABILITY TO WITHDRAW YOUR PARTICIPATION IN THE POOL.

FURTHER, COMMODITY POOLS MAY BE SUBJECT TO SUBSTANTIAL CHARGES FOR MANAGEMENT, ADVISORY AND BROKERAGE FEES. IT MAY BE NECESSARY FOR THOSE POOLS THAT ARE SUBJECT TO THESE CHARGES TO MAKE SUBSTANTIAL TRADING PROFITS TO AVOID DEPLETION OR EXHAUSTION OF THEIR ASSETS. THIS DISCLOSURE DOCUMENT CONTAINS A COMPLETE DESCRIPTION OF EACH EXPENSE TO BE CHARGED THIS POOL BEGINNING ON PAGE 63 AND A STATEMENT OF THE PERCENTAGE RETURN NECESSARY TO BREAK EVEN, THAT IS, TO RECOVER THE AMOUNT OF YOUR INITIAL INVESTMENT, ON PAGE 5.

THIS BRIEF STATEMENT CANNOT DISCLOSE ALL THE RISKS AND OTHER FACTORS NECESSARY TO EVALUATE YOUR PARTICIPATION IN THIS COMMODITY POOL. THEREFORE, BEFORE YOU DECIDE TO PARTICIPATE IN THIS COMMODITY POOL, YOU SHOULD CAREFULLY STUDY THIS DISCLOSURE DOCUMENT, INCLUDING THE DESCRIPTION OF THE PRINCIPAL RISK FACTORS OF THIS INVESTMENT, BEGINNING ON PAGE 10.

YOU SHOULD ALSO BE AWARE THAT THIS COMMODITY POOL MAY TRADE FOREIGN FUTURES OR OPTIONS CONTRACTS. TRANSACTIONS ON MARKETS LOCATED OUTSIDE THE UNITED STATES, INCLUDING MARKETS FORMALLY LINKED TO A UNITED STATES MARKET, MAY BE SUBJECT TO REGULATIONS WHICH OFFER DIFFERENT OR DIMINISHED PROTECTION TO THE POOL AND ITS PARTICIPANTS. FURTHER, UNITED STATES REGULATORY AUTHORITIES MAY BE UNABLE TO COMPEL THE ENFORCEMENT OF THE RULES OF REGULATORY AUTHORITIES OR MARKETS IN NON-UNITED STATES JURISDICTIONS WHERE TRANSACTIONS FOR THE POOL MAY BE EFFECTED.

AS OF THE DATE OF THIS PROSPECTUS THIS POOL HAS NOT COMMENCED TRADING AND DOES NOT HAVE ANY PERFORMANCE HISTORY.

Until May 14, 2007 (25 days after the date of this prospectus), all dealers effecting transactions in the offered units, whether or not participating in this distribution, may be required to deliver a prospectus. This requirement is in addition to the obligations of dealers to deliver a prospectus when acting as underwriters and with respect to unsold allotments or subscriptions.

PROSPECTUS SUMMARY

This is only a summary of the Prospectus and, while it contains material information about USNG and its units, it does not contain or summarize all of the information about USNG and the units contained in this Prospectus that is material and/or which may be important to you. You should read this entire Prospectus, including What Are the Risk Factors Involved with an Investment in USNG? beginning on page 10, before making an investment decision about the units.

Overview of USNG

United States Natural Gas Fund, LP, a Delaware limited partnership (USNG or Us or We), is a commodity pool that will issue units that may be purchased and sold on the American Stock Exchange. USNG was organized as a limited partnership under Delaware law on September 11, 2006. USNG is operated pursuant to the Agreement of Limited Partnership dated April 17, 2007 (LP Agreement), which is included as Appendix B. It is managed and controlled by its general partner, Victoria Bay Asset Management, LLC (General Partner). The General Partner is a single member limited liability company formed in Delaware on May 10, 2005 that is registered as a commodity pool operator (CPO) with the Commodities Futures Trading Commission (CFTC) and is a member of the National Futures Association (NFA). USNG will pay the General Partner a management fee of 0.60% of NAV on the first \$1,000,000,000 of assets and 0.50% of NAV after the first \$1,000,000,000 of assets.

The net assets of USNG will consist primarily of investments in futures contracts for natural gas, crude oil, heating oil, gasoline, and other petroleum-based fuels that are traded on the New York Mercantile Exchange, ICE Futures or other U.S. and foreign exchanges (collectively, Futures Contracts). USNG may also invest in other natural gas-related investments such as cash-settled options on Futures Contracts, forward contracts for natural gas, and over-the-counter transactions that are based on the price of natural gas, oil and other petroleum-based fuels, Futures Contracts and indices based on the foregoing (collectively, Other Natural Gas-Related Investments). For convenience and unless otherwise specified, Futures Contracts and Other Natural Gas-Related Investments collectively are referred to as Natural Gas Interests in this Prospectus.

USNG will invest in Natural Gas Interests to the fullest extent possible without being leveraged or unable to satisfy its current or potential margin or collateral obligations with respect to its investments in Futures Contracts and Other Natural Gas-Related Investments. The primary focus of the General Partner will be the investment in Futures Contracts and the management of its investments in short-term obligations of the United States of two years or less (Treasuries), cash and cash equivalents for margining purposes and as collateral.

The investment objective of USNG is to have the changes in percentage terms of the unit's net asset value reflect the changes in percentage terms of the price of natural gas delivered at the Henry Hub, Louisiana, as measured by the changes in the price of the futures contract on natural gas traded on the New York Mercantile Exchange (the Benchmark Futures Contract) that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire, less USNG's expenses. It is not the intent of USNG to be operated in a fashion such that its NAV will equal, in dollar terms, the dollar price of spot natural gas or any particular futures contract based on natural gas. USNG invests in interests other than the Benchmark Futures Contract to comply with accountability levels and position limits. For a detailed discussion of accountability levels and position limits, see What are Futures Contracts?

As a specific benchmark, the General Partner will endeavor to place USNG's trades in Futures Contracts and Other Natural Gas-Related Investments and otherwise manage USNG's investments so that A will be within plus/minus 10 percent of B, where:

-

Edgar Filing: United States Natural Gas Fund, LP - Form 424B3

A is the average daily change in USNG's NAV for any period of 30 successive valuation days, i.e., any day as of which USNG calculates its NAV, and

-

B is the average daily change in the price of the Benchmark Futures Contract over the same period.

An investment in the units will allow both retail and institutional investors to easily gain exposure to the natural gas market in a cost-effective manner. The units are also expected to provide additional means for diversifying an investor's investments or hedging exposure to changes in natural gas prices.

The Benchmark Futures Contract will be changed or rolled from the near month contract to expire to the next month contract to expire over a four (4) day period.

The General Partner will employ a neutral investment strategy intended to track the changes in the price of natural gas regardless of whether the price of natural gas goes up or goes down. USNG's neutral investment strategy is designed to permit investors generally to purchase and sell USNG's units for the purpose of investing indirectly in natural gas in a cost-effective manner, and/or to permit participants in the natural gas or other industries to hedge the risk of losses in their natural gas-related transactions. Accordingly, depending on the investment objective of an individual investor, the risks generally associated with investing in natural gas and/or the risks involved in hedging may exist. In addition, an investment in USNG involves the risk that the changes in the price of USNG's units will not accurately track the changes in the price of the Benchmark Futures Contract. For example, USNG will also invest a substantial amount of its assets in Treasuries and hold cash and cash equivalents to be used to meet its current or potential margin or collateral requirements with respect to its investments in Futures Contracts and Other Natural Gas-Related Investments. USNG does not expect there to be any meaningful correlation between the performance of USNG's investments in Treasuries/cash/cash equivalents and the changes in the price of natural gas. While the level of interest earned on or the market price of these investments may in some respect correlate to changes in the price of natural gas, this correlation is not anticipated as part of USNG's efforts to meet its objectives. This and certain risk factors discussed in this Prospectus may cause a lack of correlation between the changes in USNG's NAV and the changes in the price of natural gas.

USNG will create and redeem units only in blocks of 100,000 units called Creation Baskets and Redemption Baskets, respectively. Only Authorized Purchasers may purchase or redeem Creation Baskets or Redemption Baskets. An Authorized Purchaser is under no obligation to create or redeem baskets, and an Authorized Purchaser is under no obligation to offer to the public units of any baskets it does create. It is expected that baskets will be created when there is sufficient demand for units that the market price per unit is at a premium to the NAV per unit. Authorized Purchasers will then sell such units, which will be listed on the American Stock Exchange, to the public at per-unit offering prices that are expected to reflect, among other factors, the trading price of the units on the American Stock Exchange, the NAV of USNG at the time the Authorized Purchaser purchased the Creation Baskets and the NAV at the time of the offer of the units to the public, the supply of and demand for units at the time of sale, and the liquidity of the Futures Contracts market and the market for Other Natural Gas-Related Investments. The prices of units offered by authorized purchasers are expected to fall between USNG's NAV and the trading price of the units on the American Stock Exchange at the time of sale. Similarly, it is expected that baskets will be redeemed when the market price per unit is at a discount to the NAV per unit. Retail investors seeking to purchase or sell units on any day are expected to effect such transactions in the secondary market, on the American Stock Exchange, at the market price per unit, rather than in connection with the creation or redemption of baskets.

The minimum number of Creation Baskets that must be sold is one. All proceeds from the sale of Creation Baskets will be invested as quickly as possible in the investments described in this Prospectus. There will be no escrow or similar holding of funds that has a time period or other conditions. Investments will be held through USNG's custodian, Brown Brothers Harriman & Co. (Custodian) or through accounts with USNG's commodities futures brokers. There is no stated maximum time period for USNG's operations and the fund will continue until all units are redeemed or the fund is liquidated pursuant to the terms of the LP Agreement.

There is no specified limit on the maximum amount of Creation Baskets that can be sold. At some point, position limits on certain of the Futures Contracts in which USNG intends to invest may practically limit the maximum amount of Creation Baskets that will be sold if the General Partner determines that the other investment alternatives available to USNG at that time will not enable it to meet its stated investment objective.

Units may also be purchased and sold in smaller increments than a Creation Basket on the American Stock Exchange. However, these transactions will be effected at bid and ask prices established by specialist firm(s). Like any listed security, units of USNG can be purchased and sold at any time a secondary market is open.

In managing USNG's assets, the General Partner does not intend to use a technical trading system that issues buy and sell orders. The General Partner does intend to employ quantitative methodologies whereby each time one or more

baskets are purchased or redeemed, the General Partner will purchase or sell Futures Contracts and Other Natural Gas-Related Investments with an aggregate face amount that approximates the amount of Treasuries and /or cash received or paid upon the purchase or redemption of the basket(s).

Note to Secondary Market Investors: The units can be directly purchased from or redeemed by USNG only in Creation Baskets or Redemption Baskets, respectively, and only by Authorized Purchasers. Each Creation Basket and Redemption Basket will consist of 100,000 units and may be worth millions of dollars. Individual investors, therefore, will not be able to directly purchase units from or redeem units with USNG. Some of the information

contained in this Prospectus, including information about buying and redeeming units directly from and to USNG is only relevant to Authorized Purchasers. Units will also be listed and traded on the American Stock Exchange and may be purchased and sold as individual units. Individuals interested in purchasing units in the secondary market should contact their broker. Units purchased or sold through a broker may be subject to commissions.

Except when aggregated in Redemption Baskets, units will not be redeemable securities. There is no guarantee that units will trade at or near the per-unit NAV.

The Units

The units are registered as securities under the Securities Act of 1933 (1933 Act) and will not provide dividend rights or conversion rights and there will not be sinking funds. The units may only be redeemed when aggregated in Redemption Baskets as discussed under Creations and Redemptions and limited partners will have limited voting rights as discussed under Who is the General Partner? Cumulative voting will neither be permitted nor required and there will be no preemptive rights. As discussed in the LP Agreement, upon liquidation of USNG, its assets will be distributed pro rata to limited partners based upon the number of units held. Each limited partner will receive its share of the assets in cash or in kind, and the proportion of such share that is received in cash may vary from partner to partner, as the General Partner in its sole discretion may decide.

This will be a continuous offering under Rule 415 of the 1933 Act and it will terminate when all of the registered units have been sold. It is anticipated that when all registered units have been sold, additional units will be registered in subsequent continuous offerings. As discussed above, the minimum purchase requirement for Authorized Purchasers is a Creation Basket, which will consist of 100,000 units. Under the plan of distribution, USNG does not require a minimum purchase amount for investors who purchase units from Authorized Purchasers. There are no arrangements to place funds in an escrow, trust, or similar account.

USNG's Investments in Natural Gas Interests

A brief description of the principal types of Natural Gas Interests in which USNG may invest is set forth below.

-

A futures contract is a standardized contract traded on a futures exchange that calls for the future delivery of a specified quantity of a commodity at a specified time and place.

-

A forward contract is a supply contract between principals, not traded on an exchange, to buy or sell a specified quantity of a commodity at or before a specified date at a specified price.

-

A spot contract is a cash market transaction in which the buyer and seller agree to the immediate purchase and sale of a commodity, usually with a two-day settlement. Spot contracts are not uniform and are not exchange-traded.

-

An option on a futures contract, forward contract or a commodity on the spot market gives the buyer of the option the right, but not the obligation, to buy or sell a futures contract, forward contract or a commodity as applicable, at a specified price on or before a specified date. Options on futures contracts are standardized contracts traded on an exchange, while options on forward contracts and commodities on the spot market, referred to collectively in this

Prospectus as over-the-counter options, generally are individually negotiated, principal-to-principal contracts not traded on an exchange.

-

Over-the-counter contracts (such as swap contracts) generally involve an exchange of a stream of payments between the contracting parties. Over-the-counter contracts generally are not uniform and not exchange-traded.

A more detailed description of natural gas interests and other aspects of the natural gas and natural gas interest markets can be found later in this Prospectus.

As noted, USNG expects to invest primarily in Futures Contracts, including those traded on the New York Mercantile Exchange. USNG expressly disclaims any association with such Exchange or endorsement of USNG by such Exchange and acknowledges that NYMEX and New York Mercantile Exchange are registered trademarks of such Exchange.

Principal Investment Risks of an Investment in USNG

An investment in USNG involves a degree of risk. Some of the risks you may face are summarized below. A more extensive discussion of these risks appears beginning on page 10.

•

Unlike mutual funds, commodity pools or other investment pools that actively manage their investments in an attempt to realize income and gains from their investing activities and distribute such income and gains to their investors, USNG generally does not expect to distribute cash to limited partners or other unitholders. You should not invest in USNG if you will need cash distributions from USNG to pay taxes on your share of income and gains of USNG, if any, or for any other reason.

•

There is the risk that the changes in the price of USNG's units on the American Stock Exchange will not closely track the changes in the price of natural gas. This could happen if the price of units traded on the American Stock Exchange does not correlate closely with USNG's NAV; the changes in USNG's NAV do not closely correlate with the changes in the price of the Benchmark Futures Contract; or the changes in the price of the Benchmark Futures Contract do not closely correlate with the changes in the cash or spot price of natural gas. This is a risk because if these correlations do not exist, then investors may not be able to use USNG as a cost-effective way to invest indirectly in natural gas or as a hedge against the risk of loss in natural gas-related transactions.

•

USNG seeks to have the changes in its units' NAV in percentage terms track changes in the price of natural gas in percentage terms rather than profit from speculative trading of Natural Gas Interests. The General Partner will therefore endeavor to manage USNG's positions in Natural Gas Interests so that USNG's assets are, unlike those of other commodity pools, not leveraged (*i.e.*, so that the aggregate value of USNG's unrealized losses from its investments in such Natural Gas Interests at any time will not exceed the value of USNG's assets). There is no assurance that the General Partner will successfully implement this investment strategy. If the General Partner permits USNG to become leveraged, you could lose all or substantially all of your investment if USNG's trading positions suddenly turn unprofitable. These movements in price may be the result of factors outside of the General Partner's control and may not be anticipated by the General Partner.

•

The price relationship between the near month contract to expire and the next month contract to expire that compose the Benchmark Futures Contract will vary and may impact both the total return over time of USNG's NAV, as well as the degree to which its total return tracks other natural gas price indices' total returns. In cases in which the near month contract's price is lower than the next month contract's price (a situation known as *contango* in the futures markets), then absent the impact of the overall movement in natural gas prices the value of the benchmark contract would tend to decline as it approaches expiration. In cases in which the near month contract's price is higher than the next month contract's price (a situation known as *backwardation* in the futures markets), then absent the impact of the overall movement in natural gas prices the value of the benchmark contract would tend to rise as it approaches expiration.

•

Investors may choose to use USNG as a means of investing indirectly in natural gas and there are risks involved in such investments. The risks and hazards that are inherent in the natural gas industry may cause the price of natural gas to widely fluctuate. The exploration for, and production of, natural gas is an uncertain process with many risks. The

cost of drilling, completing and operating wells for natural gas is often uncertain, and a number of factors can delay or prevent drilling operations or production.

•

Investors, including those who participate in the natural gas industry, may choose to use USNG as a vehicle to hedge against the risk of loss and there are risks involved in hedging activities. While hedging can provide protection against an adverse movement in market prices, it can also preclude a hedger's opportunity to benefit from a favorable market movement.

•

USNG expects to invest primarily in Futures Contracts that are traded in the United States. However, a portion of USNG's trades may take place in markets and on exchanges outside the United States. Some non-U.S. markets present risks because they are not subject to the same degree of regulation as their U.S. counterparts. In some of these non-U.S. markets, the performance on a contract is the responsibility of the counterparty and is not backed by an exchange or clearing corporation and therefore exposes USNG to credit risk. Trading in non-U.S. markets also leaves USNG susceptible to fluctuations in the value of the local currency against the U.S. dollar.

•

USNG may also invest in Other Natural Gas-Related Investments, many of which are negotiated contracts that are not as liquid as Futures Contracts and expose USNG to credit risk that its counterparty may not be able to satisfy its obligations to USNG.

•

USNG will pay fees and expenses that are incurred regardless of whether it is profitable.

•

You will have no rights to participate in the management of USNG and will have to rely on the duties and judgment of the General Partner to manage USNG.

•

The structure and operation of USNG may involve conflicts of interest. For example, a conflict may arise because the General Partner and its principal and affiliates may trade for themselves. In addition, the General Partner has sole current authority to manage the investments and operations, which may create a conflict with the unitholders' best interests. The General Partner may also have a conflict to the extent that its trading decisions may be influenced by the effect they would have on United States Oil Fund, LP (USOF), the other commodity pool that it manages, or any other commodity pool the General Partner may form in the future.

•

USNG is new and has no operating history. Therefore, you do not have the benefit of reviewing the past performance of USNG as a basis for you to evaluate an investment in USNG.

For additional risks, see [What Are the Risk Factors Involved with an Investment in USNG?](#)

Principal Offices of USNG and the General Partner

USNG's principal office is located at 1320 Harbor Bay Parkway, Suite 145, Alameda, California 94502. The telephone number is 510.522.3336. The General Partner's principal office is also located at 1320 Harbor Bay Parkway, Suite 145, Alameda, California 94502.

Financial Condition of USNG

USNG will not calculate the NAV prior to the effective date. The initial NAV will be determined as of 4:00 p.m. New York time on the effective date.

Defined Terms

For a glossary of defined terms, see Appendix A.

Breakeven Analysis

The breakeven analysis below indicates the approximate dollar returns and percentage required for the redemption value of a hypothetical \$50.00 initial investment in a single unit to equal the amount invested twelve months after the investment was made. This breakeven analysis refers to the redemption of baskets by Authorized Purchasers and is

Edgar Filing: United States Natural Gas Fund, LP - Form 424B3

not related to any gains an individual investor would have to achieve in order to break even. The breakeven analysis is an approximation only.

Assumed initial selling price per unit	\$ 50.00
Management Fee (0.60%)*	\$.30
Creation Basket Fee**	\$ (.01)
Estimated Brokerage Fee (0.13%)***	\$.065
Interest Income (5.19%)****	\$ (2.60)
New York Mercantile Exchange Licensing Fee****	\$.02
Independent Directors and Officers Fees*****	\$.015
Amount of trading income (loss) required for the redemption value at the end of one year to equal the initial selling price of the unit	\$ (2.21)
Percentage of initial selling price per unit	0 %

*

USNG is contractually obligated to pay the General Partner a management fee based on daily net assets and paid monthly of 0.60% per annum on average net assets of \$1,000,000,000 or less. For purposes of this example we assumed that the average net assets are \$1,000,000,000 or less. If the average net assets were greater than \$1,000,000,000 then the management fee would be 0.50% on the incremental net assets and the breakeven amount would be lower.

**

Authorized Purchasers are required to pay a Creation Basket fee of \$1,000 for each order they place to create or redeem one or more baskets. An order must be at least one basket, which is 100,000 units. This breakeven analysis assumes a hypothetical investment in a single unit so the Creation Basket fee is \$.01 (1,000/100,000).

USNG determined this estimate as follows. The breakeven analysis assumes an initial investment by an investor in one unit. Assuming the price of the unit is \$50.00, USNG would receive \$5,000,000 upon the sale of a Creation Basket (100,000 units multiplied by \$50.00). Assuming no change in the settlement price of the contracts, USNG would be required to purchase and sell 69 futures contracts each month to support the Creation Basket (\$5,000,000 divided by the total value of a natural gas contract of \$72,930 (as of February 28, 2007, the settlement price for natural gas contracts was 7.293)). Assuming futures commission merchants charge approximately \$4.00 per natural gas contract for each buy or sale, the monthly futures commission merchant commission charge per contract would be approximately \$8.00, and the annual futures commission merchant commission charge per contract would be approximately \$96. Assuming no change in the settlement price of the contracts, USNG would buy and sell 69 natural gas contracts each month to support a Creation Basket, which means that USNG's monthly commission charge per Creation Basket would be approximately \$552, and the annual commission charge per Creation Basket would be approximately \$6,624 (69 contracts bought and sold * approximately \$8 per month * 12 months). As a percentage of the total investment of \$5,000,000 to support the issuance of the Creation Basket, USNG's annual commission expense would be approximately 0.13% (\$6,624 divided by \$5,000,000).

USNG will earn interest on funds it will deposit with the futures commission merchant and the Custodian and it estimates that the interest rate will be 5.19% based on the current interest rate on three-month Treasury Bills as of February 26, 2007. The actual rate may vary.

Assuming the aggregate assets of USNG and USO are \$1,000,000,000 or less, the New York Mercantile Exchange licensing fee is .04%. For more information see Fees of USNG.

For 2007, this amount is estimated at \$92,000. USNG determined the per unit estimate as follows: it is assumed that USNG will have an aggregate NAV of \$30,000,000 and that the offering price per unit is \$50.00. Assuming that 6 million units are issued, the allocation cost per unitholder would be \$.015.

The Offering

- Offering:** USNG will be offering Creation Baskets consisting of 100,000 units through ALPS Distributors, Inc. (Marketing Agent) as marketing agent to Authorized Purchasers. The initial Authorized Purchaser will purchase one or more initial Creation Baskets of 100,000 units at an initial offering price per unit equal to \$50.00. The initial Authorized Purchaser intends to offer the units of the initial Creation Basket(s) publicly. The effective date will be the date on which the SEC declares the registration statement relating to this Prospectus effective and is expected to be the date of the sale of the initial Creation Basket(s). However, the proceeds are not expected to be invested until the order for the first Creation Basket has settled and cash is received from the initial Authorized Purchaser. The units are expected to begin trading on the day following the purchase of the initial Creation Basket(s) by the initial Authorized Purchaser.
- Use of Proceeds:** The General Partner will initially apply all of USNG's assets toward trading in Futures Contracts and investing in Treasuries, cash and cash equivalents. The General Partner expects to deposit substantially all of USNG's net assets with the futures commission merchant, UBS Securities LLC, or other custodian to be used to meet its current or potential margin or collateral requirements in connection with its investment in Futures Contracts. USNG will use only Treasuries or cash or cash equivalents to satisfy these requirements. The General Partner expects that all entities that will hold or trade USNG's assets will be based in the United States and will be subject to United States regulations. The General Partner believes that 5% to 10% of USNG's assets will normally be committed as margin for Futures Contracts. However, from time to time, the percentage of assets committed as margin may be substantially more, or less, than such range. The remaining portion of USNG's assets will be held in Treasuries and/or cash or cash equivalents by its custodian, Brown Brothers Harriman & Co. (Custodian) or posted as collateral to support USNG's investments in Natural Gas Interests. All interest income earned on these investments will be retained for USNG's benefit.
- American Stock Exchange Symbol:** UNG
- Creation and Redemption:** Authorized Purchasers will pay a \$1,000 fee for each order to create or redeem one or more Creation Baskets or Redemption Baskets. Authorized Purchasers will not be required to sell any specific number or dollar amount of units. The per unit price of units offered in Creation Baskets on any day after the effective date will be the per-unit NAV of USNG calculated shortly after the close of the American Stock Exchange on that day divided by the number of issued and outstanding units.
- Withdrawal:** As discussed in the LP Agreement, if the General Partner gives at least fifteen (15) days' written notice to a limited partner, then the

General Partner may for any reason, in its sole discretion, require any such limited partner to withdraw entirely from the partnership or to withdraw a portion of its partner capital account. If the General Partner does not give at least fifteen (15) days written notice to a limited partner, then it may only require withdrawal of all or any portion of the capital account of any limited partner in the following circumstances:

(i) the unitholder made a misrepresentation to the General Partner in connection with its purchase of units;

(ii) the limited partner's ownership of units would result in the violation of any law or regulation applicable to the partnership or a partner.

Registration Clearance and Settlement:

Individual certificates will not be issued for the units. Instead, units will be represented by one or more global certificates, which will be deposited by the Custodian with the Depository Trust Company (DTC) and registered in the name of Cede & Co., as nominee for DTC. The global certificates evidence all of the units outstanding at any time. Unitholders are limited to (1) participants in DTC such as banks, brokers, dealers and trust companies (DTC Participants), (2) those who maintain, either directly or indirectly, a custodial relationship with a DTC Participant (Indirect Participants), and (3) those banks, brokers, dealers, trust companies and others who hold interests in the units through DTC Participants or Indirect Participants, in each case who satisfy the requirements for transfers of units. DTC Participants acting on behalf of investors holding units through such participants' accounts in DTC will follow the delivery practice applicable to securities eligible for DTC's Same-Day Funds Settlement System. Units will be credited to DTC Participants' securities accounts following confirmation of receipt of payment.

The administrator, Brown Brothers Harriman & Co. (Administrator) has been appointed registrar and transfer agent for the purpose of registering and transferring units. The General Partner will recognize transfer of units only if such transfer is done in accordance with the LP Agreement, including the delivery of a transfer application.

Net Asset Value:

The NAV is calculated by taking the current market value of USNG's total assets and subtracting any liabilities. Under USNG's current operational procedures, the Administrator calculates the NAV of USNG's units as of the earlier of 4:00 p.m. New York time or the close of the New York Stock Exchange each day. The American Stock Exchange currently calculates an approximate net asset value every 15 seconds throughout each day USNG's units are traded on the American Stock Exchange for as long as the New York Mercantile Exchange's main pricing mechanism is open.

Fund Expenses:

USNG will pay the General Partner a management fee of 0.60% of NAV on the first \$1,000,000,000 of assets and 0.50% of NAV after the first \$1,000,000,000 of assets. Brokerage fees for Treasuries, Futures Contracts, and Other Natural Gas-Related Investments are estimated to be 0.13% and will be paid to unaffiliated brokers. USNG also pays any licensing fees for the use of intellectual property. Registration fees paid to the SEC, NASD, or other regulatory agency in connection with the initial offers and sales of the units and the legal, printing, accounting and other expenses associated with such registrations will be paid

by the General Partner, but the fees and expenses associated with subsequent SEC registrations of units will be borne by USNG. The license fee paid to the New York Mercantile Exchange is .04% of NAV for the first \$1,000,000 of assets and .02% of NAV after the first \$1,000,000 of assets. The assets of USNG are aggregated with those of other funds formed or to be formed by the General Partner. USNG also pays a portion of the fees and expenses, including directors and officers liability insurance, of the independent directors of the General Partner which is currently estimated to be \$92,000 for 2007, though this amount may change in future years. The General Partner, and not USNG, is responsible for payment of the fees of USNG's Marketing Agent, Administrator and Custodian. USNG and/or the General Partner may be required to indemnify the Marketing Agent, Administrator or Custodian under certain circumstances.

Termination Events:

USNG shall continue in effect from the date of its formation in perpetuity, unless sooner terminated upon the occurrence of any one or more of the following events: the death, adjudication of incompetence, bankruptcy, dissolution, withdrawal, or removal of a General Partner who is the sole remaining General Partner, unless a majority in interest of limited partners within ninety (90) days after such event elects to continue the partnership and appoints a successor general partner; or the affirmative vote of a majority in interest of the limited partners subject to certain conditions. Upon termination of the partnership, the affairs of the partnership shall be wound up and all of its debts and liabilities discharged or otherwise provided for in the order of priority as provided by law. The fair market value of the remaining assets of the partnership shall then be determined by the General Partner. Thereupon, the assets of the partnership shall be distributed pro rata to the partners in accordance with their units.

Authorized Purchasers:

We expect the initial Authorized Purchaser to be Merrill Lynch Professional Clearing Corp. We expect subsequent Authorized Purchasers to purchase or redeem Creation Baskets or Redemption Baskets, respectively, from or to USNG. Authorized Purchasers must be (1) registered broker-dealers or other securities market participants, such as banks and other financial institutions, that are not required to register as broker-dealers to engage in securities transactions, and (2) DTC Participants. To become an Authorized Purchaser, a person must enter into an Authorized Purchaser Agreement with the General Partner.

What Are the Risk Factors Involved with an Investment in USNG?

You should consider carefully the risks described below before making an investment decision. You should also refer to the other information included in this Prospectus, including USNG's financial statements and the related notes.

Risks Associated With Investing Directly or Indirectly in Natural Gas

Investing in Natural Gas Interests subjects USNG to the risks of the natural gas industry and this could result in large fluctuations in the price of USNG's units.

USNG is subject to the risks and hazards of the natural gas industry because it invests in Natural Gas Interests. The risks and hazards that are inherent in the natural gas industry may cause the price of natural gas to widely fluctuate. If the changes in percentage terms of USNG's units' NAV reflects the changes in percentage terms of the price of natural gas, then the price of USNG's units may also fluctuate. The exploration for, and production of, natural gas is an uncertain process with many risks. The cost of drilling, completing and operating wells for natural gas is often uncertain, and a number of factors can delay or prevent drilling operations or production, including:

- unexpected drilling conditions;
- pressure or irregularities in formations;
- equipment failures or repairs;
- fires or other accidents;
- adverse weather conditions;
- pipeline ruptures or spills; and
- shortages or delays in the availability of drilling rigs and the delivery of equipment.

Natural gas transmission, distribution, gathering, and processing activities involve numerous risks that may affect the price of natural gas.

There are a variety of hazards inherent in natural gas transmission, distribution, gathering, and processing, such as leaks, explosions, pollution, release of toxic substances, adverse weather conditions (such as hurricanes and flooding), pipeline failure, abnormal pressures, uncontrollable flows of natural gas, scheduled and unscheduled maintenance,

physical damage to the gathering or transportation system, and other hazards which could affect the price of natural gas. To the extent these hazards limit the supply or delivery of natural gas, natural gas prices will increase.

The price of natural gas may fluctuate on a seasonal and quarterly basis and this would result in fluctuations in the price of USNG's units.

Natural gas prices fluctuate seasonally. For example, in some parts of the United States and other markets, the natural gas demand for power peaks during the cold winter months, with market prices peaking at that time. As a result, in the future, the overall price of natural gas may fluctuate substantially on a seasonal and quarterly basis and thus make consecutive period to period comparisons less relevant.

Natural gas transmission and storage operations are subject to government regulations and rate proceedings which could have an impact on the price of natural gas.

Natural gas transmission and storage operations in North America are subject to regulation and oversight by the Federal Energy Regulatory Commission, various state regulatory agencies, and Canadian regulatory authorities. These regulatory bodies have the authority to effect rate settlements on natural gas storage, transmission and distribution services. As a consequence, the price of natural gas may be affected by a change in the rate settlements effected by one or more of these regulatory bodies.

The price of USNG's units may be influenced by factors such as the short-term supply and demand for natural gas and the short-term supply and demand for USNG's units. This may cause the units to trade at a price that is above or below USNG's NAV per unit. Accordingly, changes in the price of units may substantially vary from changes in the price of natural gas. If this variation occurs, then you may not be able to effectively use USNG as a way to hedge against natural gas-related losses or as a way to indirectly invest in natural gas.

While it is expected that the trading prices of the units will fluctuate in accordance with the changes in USNG's NAV, the prices of units may also be influenced by other factors, including the short-term supply and demand for natural gas and the units. There is no guarantee that the units will not trade at appreciable discounts from, and/or premiums to, USNG's NAV. This could cause the changes in the price of the units to substantially vary from the changes in the price of natural gas. This may be harmful to you because if changes in the price of units vary substantially from changes in the Benchmark Futures Contract or the spot price of natural gas, then you may not be able to effectively use USNG as a way to hedge the risk of losses in your natural gas-related transactions or as a way to indirectly invest in natural gas.

Changes in USNG's NAV may not correlate with changes in the price of the Benchmark Futures Contract. If this were to occur, you may not be able to effectively use USNG as a way to hedge against natural gas-related losses or as a way to indirectly invest in natural gas.

The General Partner will endeavor to invest USNG's assets as fully as possible in Futures Contracts and Other Natural Gas-Related Investments so that changes in percentage terms in the NAV will closely correlate with changes in percentage terms in the price of the Benchmark Futures Contract. However, changes in USNG's NAV may not correlate with changes in the price of the Benchmark Futures Contract for several reasons as set forth below:

-

USNG (i) may not be able to buy/sell the exact amount of Futures Contracts and Other Natural Gas-Related Investments to have a perfect correlation with NAV; (ii) may not always be able to buy and sell Futures Contracts or Other Natural Gas-Related Investments at the market price; (iii) may not experience a perfect correlation between the Benchmark Futures Contract and the underlying investments in Futures Contracts, Other Natural Gas-Related Investments and Treasuries, cash and cash equivalents, and (iv) is required to pay brokerage fees and the management fee, which will have an effect on the correlation.

-

Short-term supply and demand for natural gas may cause the changes in the market price of the Benchmark Futures Contract to vary from changes in USNG's NAV if USNG has fully invested in Futures Contracts that do not reflect such supply and demand and it is unable to replace such contracts with Futures Contracts that do reflect such supply and demand.

-

USNG plans to buy only as many Futures Contracts and Other Natural Gas-Related Investments that it can to get the changes in percentage terms of the NAV as close as possible to the changes in percentage terms in the price of the Benchmark Futures Contract. The remainder of its assets will be invested in Treasuries, cash and cash equivalents and will be used to satisfy initial margin and additional margin requirements, if any, and to otherwise support its investments in Natural Gas Interests. Investments in Treasuries, cash and cash equivalents, both directly and as margin, will provide rates of return that will vary from changes in the value of the price of natural gas and the price of the Benchmark Futures Contract.

-

In addition, because USNG will incur certain expenses in connection with its investment activities, and will hold most of its assets in more liquid short-term securities for margin and other liquidity purposes and for redemptions that may be necessary on an ongoing basis, the General Partner will not be able to fully invest USNG's assets in Futures Contracts or Other Natural Gas-Related Investments and there cannot be perfect correlation between changes in USNG's NAV and changes in the price of the Benchmark Futures Contract.

•

As USNG grows, there may be more or less correlation. For example, if USNG only has enough money to buy three Benchmark Futures Contracts and it needs to buy four contracts to track the price of natural gas then the correlation will be lower, but if it buys 20,000 Benchmark Futures Contracts and it needs to buy 20,001 contracts then the correlation will be higher. At certain asset levels, USNG may be limited in its ability to purchase the Benchmark Futures Contract or other Futures Contracts due to accountability levels imposed by the relevant exchanges. To the extent that USNG invests in these other Futures Contracts or Other Natural Gas-Related Investments, the correlation with the Benchmark Futures Contract may be lower. If USNG is required to invest in other Futures Contracts and Other Natural Gas-Related Investments that are less correlated with the Benchmark Futures Contract, USNG would likely invest in over-the-counter contracts to increase the level of correlation of USNG's assets. Over-the-counter contracts entail certain risks described below under Over-the-Counter Contract Risk.

- USNG may not be able to buy the exact number of Futures Contracts and Other Natural Gas-Related Investments to have a perfect correlation with the Benchmark Futures Contract if the purchase price of Futures Contracts required to be fully invested in such contracts is higher than the proceeds received for the sale of a Creation Basket on the day the basket was sold. In such case, USNG could not invest the entire proceeds from the purchase of the Creation Basket in such futures contracts (for example, assume USNG receives \$4,000,000 for the sale of a Creation Basket and assume that the price of a Futures Contract for natural gas is \$59,950, then USNG could only invest in only 66 Futures Contracts with an aggregate value of \$3,956,700), USNG would be required to invest a percentage of the proceeds in Treasuries to be deposited as margin with the futures commission merchant through which the contract was purchased. The remainder of the purchase price for the Creation Basket would remain invested in cash and Treasuries as determined by the General Partner from time to time based on factors such as potential calls for margin or anticipated redemptions. If the trading market for Futures Contracts is suspended or closed, USNG may not be able to purchase these investments at the last reported price for such investments.

If changes in USNG's NAV do not correlate with changes in the price of the Benchmark Futures Contract, then investing in USNG may not be an effective way to hedge against natural gas-related losses or indirectly invest in natural gas.

The Benchmark Futures Contract may not correlate with the price of natural gas and this could cause the changes in the price of units to substantially vary from changes in the price of natural gas. If this were to occur, then you may not be able to effectively use USNG as a way to hedge against natural gas-related losses or as a way to indirectly invest in natural gas.

When using the Benchmark Futures Contract as a strategy to track the price of natural gas, at best the correlation between changes in prices of such Natural Gas Interests and the delivery price of natural gas can be only approximate. The degree of imperfection of correlation depends upon circumstances such as variations in the speculative natural gas market, supply of and demand for such Natural Gas Interests and technical influences in futures trading. If there is a weak correlation between the Natural Gas Interests and the price of natural gas, then the price of units may not accurately track the price of natural gas and you may not be able to effectively use USNG as a way to hedge the risk of losses in your natural gas-related transactions or as a way to indirectly invest in natural gas.

USNG may experience a loss if it is required to sell Treasuries at a price lower than the price at which they were acquired.

The value of Treasuries generally moves inversely with movements in interest rates. If USNG is required to sell Treasuries at a price lower than the price at which they were acquired, USNG will experience a loss. This loss may adversely impact the price of the units and may decrease the correlation between the price of the units, the price of USNG's Futures Contracts and Other Natural Gas-Related Investments, and the delivery price of natural gas.

Certain of USNG's investments could be illiquid which could cause large losses to investors at any time or from time to time.

USNG may not always be able to liquidate its positions in its investments at the desired price. It is difficult to execute a trade at a specific price when there is a relatively small volume of buy and sell orders in a market. A market disruption, such as a foreign government taking political actions that disrupt the market in its currency, its natural gas production or exports, or in another major export, can also make it difficult to liquidate a position. Alternatively, limits imposed by futures exchanges or other regulatory organizations, such as accountability levels, position limits and price fluctuation limits, may contribute to a lack of liquidity with respect to some Natural Gas Interests.

Unexpected market illiquidity may cause major losses to investors at any time or from time to time. In addition, USNG does not intend at this time to establish a credit facility, which would provide an additional source of liquidity and instead will rely only on the Treasuries, cash and cash equivalents that it holds. The anticipated large value of the positions in Futures Contracts that the General Partner will acquire or enter into for USNG increases the risk of illiquidity. Other Natural Gas-Related Investments that USNG invests in, such as negotiated over-the-counter contracts, may have a greater likelihood of being illiquid since they are contracts between two parties that take into account not only market risk, but also the relative credit, tax, and settlement risks under such contracts. Such contracts also have limited transferability that results from such risks and from the contract's express limitations.

Because both Futures Contracts and Other Natural Gas-Related Investments may be illiquid, USNG's Natural Gas Interests may be more difficult to liquidate at favorable prices in periods of illiquid markets and losses may be incurred during the period in which positions are being liquidated.

If the nature of hedgers and speculators in futures markets has shifted such that natural gas purchasers are the predominant hedgers in the market, USNG might have to reinvest at higher futures prices or choose Other Natural Gas-Related Investments.

The changing nature of the hedgers and speculators in the natural gas market will influence whether futures prices are above or below the expected future spot price. In order to induce speculators to take the corresponding long side of the same futures contract, natural gas producers must generally be willing to sell futures contracts at prices that are below expected future spot prices. Conversely, if the predominant hedgers in the futures market are the purchasers of the natural gas who purchase futures contracts to hedge against a rise in prices, then speculators will only take the short side of the futures contract if the futures price is greater than the expected future spot price of natural gas. This can have significant implications for USNG when it is time to reinvest the proceeds from a maturing Futures Contract into a new Futures Contract.

While USNG does not intend to take physical delivery of natural gas under Futures Contracts, physical delivery under such contracts impacts the value of the contracts.

While it is not the current intention of USNG to take physical delivery of natural gas under its Futures Contracts, futures contracts are not required to be cash-settled and it is possible to take delivery under these contracts. Storage costs associated with purchasing natural gas could result in costs and other liabilities that could impact the value of Futures Contracts or Other Natural Gas-Related Investments. Storage costs include the time value of money invested in natural gas as a physical commodity plus the actual costs of storing the natural gas less any benefits from ownership of natural gas that are not obtained by the holder of a futures contract. In general, Futures Contracts have a one-month delay for contract delivery and the back month (the back month is any future delivery month other than the spot month) includes storage costs. To the extent that these storage costs change for natural gas while USNG holds Futures Contracts or Other Natural Gas-Related Investments, the value of the Futures Contracts or Other Natural Gas-Related Investments, and therefore USNG's NAV, may change as well.

The price relationship between the near month contract and the next to near month contract that compose the Benchmark Futures Contract will vary and may impact both the total return over time of USNG's NAV, as well as the degree to which its total return tracks other natural gas price indices' total returns.

The design of USNG's Benchmark Futures Contract is such that every month it begins by using the near month contract to expire until the near month contract is within two weeks of expiration, when it will use the next month contract to expire as its benchmark contract and keeps that contract as its benchmark until it becomes the near month contract and close to expiration. In the event of a natural gas futures market where near month contracts trade at a higher price than next to near month to expire contracts, a situation described as "backwardation" in the futures market, then absent the impact of the overall movement in natural gas prices the value of the benchmark contract would tend to rise as it approaches expiration. As a result the total return of the Benchmark Futures Contract would tend to track higher. Conversely, in the event of a natural gas futures market where near month contracts trade at a lower price than next to near month contracts, a situation described as "contango" in the futures market, then absent the impact of the overall movement in natural gas prices the value of the benchmark contract would tend to decline as it approaches expiration. As a result the total return of the Benchmark Futures Contract would tend to track lower. When compared to total return of other price indices, such as the spot price of natural gas, the impact of backwardation and contango may lead the total return of USNG's NAV to vary significantly. In the event of a prolonged period of contango, and absent the impact of rising or falling natural gas prices, this could have a significant negative impact on USNG's NAV and total return.

Regulation of the commodity interests and energy markets is extensive and constantly changing; future regulatory developments are impossible to predict but may significantly and adversely affect USNG.

The regulation of commodity interest transactions in the United States is a rapidly changing area of law and is subject to ongoing modification by governmental and judicial action. In addition, various national governments have expressed concern regarding the disruptive effects of speculative trading in the energy markets and the need to regulate the derivatives markets in general. The effect of any future regulatory change on USNG is impossible to predict, but could be substantial and adverse.

If you are investing in USNG for purposes of hedging, you might be subject to several risks including the possibility of losing the benefit of favorable market movement.

While USNG will not engage in hedging strategies, participants in the natural gas or in other industries may use USNG as a vehicle to hedge the risk of losses in their natural gas-related transactions. There are several risks in connection with using USNG as a hedging device. While hedging can provide protection against an adverse movement in market prices, it can also preclude a hedger's opportunity to benefit from a favorable market movement. In a hedging transaction, the hedger may be concerned that the hedged item will increase in price, but must recognize the risk that the price may instead decline and if this happens he will have lost his opportunity to profit from the change in price because the hedging transaction will result in a loss rather than a gain. Thus, the hedger foregoes the opportunity to profit from favorable price movements.

In addition, if the hedge is not a perfect one, the hedger can lose on the hedging transaction and not realize an offsetting gain in the value of the underlying item being hedged.

When using futures contracts as a hedging technique, at best, the correlation between changes in prices of futures contracts and of the items being hedged can be only approximate. The degree of imperfection of correlation depends upon circumstances such as: variations in speculative markets, demand for futures and for natural gas products, technical influences in futures trading, and differences between anticipated energy costs being hedged and the instruments underlying the standard futures contracts available for trading. Even a well-conceived hedge may be unsuccessful to some degree because of unexpected market behavior as well as the expenses associated with creating the hedge.

In addition, using an investment in USNG as a hedge for changes in energy costs (*e.g.*, investing in natural gas, crude oil, gasoline, or other fuels, or electricity) may not correlate because changes in the spot price of natural gas may vary from changes in energy costs because the spot price of natural gas does not reflect the refining, transportation, and other costs that may impact the hedger's energy costs.

An investment in USNG may provide you little or no diversification benefits. Thus, in a declining market, USNG may have no gains to offset your losses from other investments, and you may suffer losses on your investment in USNG at the same time you incur losses with respect to other asset classes.

Historically, Futures Contracts and Other Natural Gas-Related Investments have generally been non-correlated to the performance of other asset classes such as stocks and bonds. Non-correlation means that there is a low statistically valid relationship between the performance of futures and other commodity interest transactions, on the one hand, and stocks or bonds, on the other hand. However, there can be no assurance that such non-correlation will continue during future periods. If, contrary to historic patterns, USNG's performance were to move in the same general direction as the financial markets, you will obtain little or no diversification benefits from an investment in the units. In such a case, USNG may have no gains to offset your losses from other investments, and you may suffer losses on your investment in USNG at the same time you incur losses with respect to other investments.

Variables such as drought, floods, weather, embargoes, tariffs and other political events may have a larger impact on natural gas prices and natural gas-linked instruments, including Futures Contracts and Other Natural Gas-Related Investments, than on traditional securities. These additional variables may create additional investment risks that subject USNG's investments to greater volatility than investments in traditional securities.

Non-correlation should not be confused with negative correlation, where the performance of two asset classes would be opposite of each other. There is no historic evidence that the spot price of natural gas and prices of other financial assets, such as stocks and bonds, are negatively correlated. In the absence of negative correlation, USNG cannot be expected to be automatically profitable during unfavorable periods for the stock market, or vice versa.

USNG's Operating Risks

USNG is not a registered investment company so you do not have the protections of the Investment Company Act of 1940.

USNG is not an investment company subject to the Investment Company Act of 1940. Accordingly, you do not have the protections afforded by that statute which, for example, requires investment companies to have a majority of disinterested directors and regulates the relationship between the investment company and its investment manager.

USNG has no operating history so there is no performance history to serve as a basis for you to evaluate an investment in USNG.

USNG is new and has no operating history. Therefore, you do not have the benefit of reviewing the past performance of USNG as a basis for you to evaluate an investment in USNG. The General Partner's current experience involves managing United States Oil Fund, LP (USOF), an exchange traded security that invests primarily in Futures Contracts for crude oil, Treasuries, cash and cash equivalents. However, there are significant differences between the crude oil futures market and that of natural gas futures. The General Partner's results with the crude oil fund may not be representative of results that may be experienced with a fund investing in natural gas futures.

The General Partner is leanly staffed and relies heavily on key personnel to manage trading activities.

In managing and directing the day-to-day activities and affairs of USNG, the General Partner relies heavily on Mr. Nicholas Gerber, Mr. John Love and Mr. John Hyland (all discussed in greater detail below). If Mr. Gerber, Mr. Love or Mr. Hyland were to leave or be unable to carry out their present responsibilities, it may have an adverse effect on the management of USNG. Furthermore, Mr. Gerber, Mr. Hyland, and Mr. Love are involved in the management of USOF. Mr. Gerber and Mr. Love are also employed by Ameristock Corporation, a registered investment adviser that manages a public mutual fund. It is estimated that Mr. Gerber will spend approximately 50% of his time on USNG and USOF matters. Mr. Love will spend approximately 80% of his time on USNG and USOF matters and Mr. Hyland will spend approximately 75% of his time on USNG and USOF matters.

Accountability levels, position limits, and daily price fluctuation limits set by the exchanges have the potential to cause a tracking error, which could cause the price of units to substantially vary from the price of the Benchmark Futures Contract and prevent you from being able to effectively use USNG as a way to hedge against natural gas-related losses or as a way to indirectly invest in natural gas.

U.S. designated contract markets such as the New York Mercantile Exchange have established accountability levels and position limits on the maximum net long or net short futures contracts in commodity interests that any person or group of persons under common trading control (other than as a hedge, which an investment in USNG is not) may hold, own or control. For example, the current accountability level for investments at any one time in natural gas Futures Contracts (including investments in the Benchmark Futures Contract) is 12,000. While this is not a fixed ceiling, it is a threshold above which the New York Mercantile Exchange may exercise greater scrutiny and control over an investor, including limiting an investor to holding no more than 12,000 natural gas Futures Contracts. With regard to position limits, the New York Mercantile Exchange limits an investor from holding more than 1,000 net futures in the last 3 days of trading in the near month contract to expire.

In addition to accountability levels and position limits, the New York Mercantile Exchange also sets daily price fluctuation limits on the Benchmark Futures Contract. The daily price fluctuation limit establishes the maximum amount that the price of futures contract may vary either up or down from the previous day's settlement price. Once the daily price fluctuation limit has been reached in a particular Futures Contract, no trades may be made at a price beyond that limit.

In addition to accountability levels and position limits, the New York Mercantile Exchange also limits the amount of price fluctuation for Futures Contracts. For example, the New York Mercantile Exchange imposes a \$3.00 per mmBtu (\$30,000 per contract) price fluctuation limit for natural gas Futures Contracts. This limit is initially based off of the previous trading day's settlement price. If any natural gas Futures Contract is traded, bid, or offered at the limit for five minutes, trading is halted for five minutes. When trading resumes it begins at the point where the limit was imposed and the limit is reset to be \$3.00 per mmBtu in either direction of that point. If another halt were triggered, the market would continue to be expanded by \$3.00 per mmBtu in either direction after each successive five-minute trading halt. There is no maximum price fluctuation limit during any one trading session.

All of these limits may potentially cause a tracking error between the price of the units and the price of the Benchmark Futures Contract. This may in turn prevent you from being able to effectively use USNG as a way to hedge against natural gas-related losses or as a way to indirectly invest in natural gas.

USNG is not limiting the size of the offering and is committed to utilizing substantially all of its proceeds to purchase Futures Contracts and Other Natural Gas-Related Investments. If USNG encounters accountability levels, position limits, or price fluctuation limits for natural gas contracts on the New York Mercantile Exchange, it may

then, if permitted under applicable regulatory requirements, purchase Futures Contracts on the ICE Futures (formerly, the International Petroleum Exchange) or other exchanges that trade listed natural gas futures. The Futures Contracts available on the ICE Futures are comparable to the contracts on the New York Mercantile Exchange, but they may have different underlying commodities, sizes, deliveries, and prices.

There are technical and fundamental risks inherent in the trading system the General Partner intends to employ.

The General Partner's trading system is quantitative in nature and it is possible that the General Partner might make a mathematical error. In addition, it is also possible that a computer or software program may malfunction and cause an error in computation.

USNG and the General Partner may have conflicts of interest, which may permit them to favor their own interests to your detriment.

USNG and the General Partner may have inherent conflicts to the extent the General Partner attempts to maintain USNG's asset size in order to preserve its fee income and this may not always be consistent with USNG's objective of having the value of its unit's NAV tracking changes in the price of the Benchmark Futures Contract. The General Partner's officers, directors and employees do not devote their time exclusively to USNG. These persons are directors, officers or employees of other entities that may compete with USNG for their services. They could have a conflict between their responsibilities to USNG and to those other entities.

In addition, the General Partner's principals, officers, directors or employees may trade futures and related contracts for their own account. A conflict of interest may exist if their trades are in the same markets and at the same time as USNG trades using the clearing broker to be used by USNG. A potential conflict also may occur if the General Partner's principals, officers, directors or employees trade their accounts more aggressively or take positions in their accounts which are opposite, or ahead of, the positions taken by USNG.

The General Partner has sole current authority to manage the investments and operations of USNG, and this may allow it to act in a way that furthers its own interests which may create a conflict with your best interests. Limited partners have limited voting control, which will limit the ability to influence matters such as amendment of the LP Agreement, change in USNG's basic investment policy, dissolution of this fund, or the sale or distribution of USNG's assets.

The General Partner serves as the general partner to both USNG and USOF. The General Partner may have a conflict to the extent that its trading decisions for USNG may be influenced by the effect they would have on USOF. These trading decisions may be influenced since the General Partner also serves as the general partner for USOF, and is required to meet USOF's investment objective as well as USNG's. If the General Partner believes that a trading decision it made on behalf of USNG might (i) impede USOF from reaching its investment objective, or (ii) improve the likelihood of meeting USOF's objective, then the General Partner may choose to change its trading decision for USNG, which could either impede or improve the opportunity for USNG from meeting its investment objective. In addition, the General Partner is required to indemnify the officers and directors of USOF, if the need for indemnification arises. This potential indemnification will cause the General Partner's assets to decrease. If the General Partner's other sources of income are not sufficient to compensate for the indemnification, then the General Partner may terminate and you could lose your investment.

Unitholders may only vote on the removal of the General Partner and limited partners have only limited voting rights. Unitholders and limited partners will not participate in the management of USNG and do not control the General Partner so they will not have influence over basic matters that affect USNG.

Unitholders that have not applied to become limited partners have no voting rights, other than to remove the General Partner. Limited partners will have limited voting rights with respect to USNG's affairs. Unitholders may remove the

General Partner only if $66 \frac{2}{3} \%$ of the unitholders elect to do so. Unitholders and limited partners will not be permitted to participate in the management or control of USNG or the conduct of its business. Unitholders and limited partners must therefore rely upon the duties and judgment of the General Partner to manage USNG's affairs.

The General Partner may manage a large amount of assets and this could affect USNG's ability to trade profitably.

Increases in assets under management may affect trading decisions. In general, the General Partner does not intend to limit the amount of assets of USNG that it may manage. The more assets the General Partner manages, the more difficult it may be for it to trade profitably because of the difficulty of trading larger positions without adversely affecting prices and performance and of managing risk associated with larger positions.

USNG could terminate at any time and cause the liquidation and potential loss of your investment and could upset the overall maturity and timing of your investment portfolio.

USNG may terminate at any time, regardless of whether USNG has incurred losses, subject to the terms of the LP Agreement. In particular, unforeseen circumstances, including the death, adjudication of incompetence, bankruptcy, dissolution, or removal of the General Partner could cause USNG to terminate unless a majority interest of the limited partners within 90 days of the event elects to continue the partnership and appoints a successor general partner, or the affirmative vote of a majority interest of the limited partners subject to conditions. However, no level of losses will require the General Partner to terminate USNG. USNG's termination would cause the liquidation and potential loss of your investment. Termination could also negatively affect the overall maturity and timing of your investment portfolio.

Limited partners may not have limited liability in certain circumstances, including potentially having liability for the return of wrongful distributions.

Under Delaware law, a limited partner might be held liable for our obligations as if it were a General Partner if the limited partner participates in the control of the partnership's business and the persons who transact business with the partnership think the limited partner is the General Partner.

A limited partner will not be liable for assessments in addition to its initial capital investment in any of our capital securities representing limited partnership interests. However, a limited partner may be required to repay to us any amounts wrongfully returned or distributed to it under some circumstances. Under Delaware law, we may not make a distribution to limited partners if the distribution causes our liabilities (other than liabilities to partners on account of their partnership interests and nonrecourse liabilities) to exceed the fair value of our assets. Delaware law provides that a limited partner who receives such a distribution and knew at the time of the distribution that the distribution violated the law will be liable to the limited partnership for the amount of the distribution for three years from the date of the distribution.

With adequate notice, a limited partner may be required to withdraw from the partnership for any reason.

If the General Partner gives at least fifteen (15) days' written notice to a limited partner, then the General Partner may for any reason, in its sole discretion, require any such limited partner to withdraw entirely from the partnership or to withdraw a portion of its partner capital account. The General Partner may require withdrawal even in situations where the limited partner has complied completely with the provisions of the LP Agreement.

USNG's existing units are, and any units USNG issues in the future will be, subject to restrictions on transfer. Failure to satisfy these requirements will preclude you from being able to have all the rights of a limited partner.

No transfer of any unit or interest therein may be made if such transfer would (a) violate the then applicable federal or state securities laws or rules and regulations of the SEC, any state securities commission, the CFTC or any other governmental authority with jurisdiction over such transfer, or (b) cause USNG to be taxable as a corporation or affect USNG's existence or qualification as a limited partnership. In addition, investors may only become limited partners if they transfer their units to purchasers that meet certain conditions outlined in the LP Agreement, which provides that

each record holder or limited partner or unitholder applying to become a limited partner (each a record holder) may be required by the General Partner to furnish certain information, including that holder's nationality, citizenship or other related status. A transferee who is not a U.S. resident may not be eligible to become a record holder or a limited partner if its ownership would subject USNG to the risk of cancellation or forfeiture of any of its assets under any federal, state or local law or regulation. All purchasers of USNG's units, who wish to become limited partners or record holders, and receive cash distributions, if any, or have certain other rights, must deliver an executed transfer application in which the purchaser or transferee must certify that, among other things, he, she or it agrees to be bound by USNG's LP Agreement and is eligible to purchase USNG's securities. Any transfer of units

will not be recorded by the transfer agent or recognized by us unless a completed transfer application is delivered to the General Partner or the Administrator. A person purchasing USNG's existing units, who does not execute a transfer application and certify that the purchaser is eligible to purchase those securities acquires no rights in those securities other than the right to resell those securities. Whether or not a transfer application is received or the consent of the General Partner obtained, our units will be securities and will be transferable according to the laws governing transfers of securities. See Transfer of Units.

USNG does not expect to make cash distributions.

The General Partner intends to re-invest any realized gains in Natural Gas Interests rather than distributing cash to limited partners. Therefore, unlike mutual funds, commodity pools or other investment pools that actively manage their investments in an attempt to realize income and gains from their investing activities and distribute such income and gains to their investors, USNG generally does not expect to distribute cash to limited partners. You should not invest in USNG if you will need cash distributions from USNG to pay taxes on your share of income and gains of USNG, if any, or for any other reason. Although USNG does not intend to make cash distributions, the income earned from its investments held directly or posted as margin may reach levels that merit distribution, e.g., at levels where such income is not necessary to support its underlying investments in Natural Gas Interests and investors adversely react to being taxed on such income without receiving distributions that could be used to pay such tax. If this income becomes significant then cash distributions may be made.

There is a risk that USNG will not earn trading gains sufficient to compensate for the fees and expenses that it must pay and as such USNG may not earn any profit.

USNG pays brokerage charges of approximately 0.13% (including futures commission merchant fees of \$4.00 per buy or sell), any licensing fees for the use of intellectual property, registration fees with the SEC, the NASD, or other regulatory agency in connection with offers and sales of the units subsequent to the initial offering of the units including the legal, printing, accounting and other expenses associated therewith. USNG also pays the fees and expenses, including directors and officers liability insurance, of the independent directors, management fees of 0.60% of NAV on the first \$1,000,000,000 of assets and 0.50% of NAV after the first \$1,000,000,000 of assets, and over-the-counter spreads and extraordinary expenses (*i.e.* expenses not in the ordinary course of business, including the indemnification of any person against liabilities and obligations to the extent permitted by law and required under the LP Agreement and under agreements entered into by the General Partner on USNG's behalf and the bringing and defending of actions at law or in equity and otherwise engaging in the conduct of litigation and the incurring of legal expenses and the settlement of claims and litigation) that can not be quantified. These fees and expenses must be paid in all cases regardless of whether USNG's activities are profitable. Accordingly, USNG must earn trading gains sufficient to compensate for these fees and expenses before it can earn any profit.

USNG, to date, has depended upon its affiliates to pay all its expenses. If this offering of units does not raise sufficient funds to pay USNG's future expenses, its affiliates no longer pay such expenses and no other source of funding of expenses is found, USNG will terminate and investors may lose all or part of their investment.

To date, all of USNG's expenses have been funded by the General Partner. Previously, affiliates of the General Partner had funded the General Partner's expenses. These affiliates are under no obligation to continue payment of the General Partner's expenses or to pay USNG's expenses. If the General Partner and USNG are unsuccessful in raising sufficient funds to cover its expenses or in locating any other source of funding, USNG will terminate and investors may lose all or part of their investment.

USNG may incur higher fees and expenses upon renewing existing or entering into new contractual relationships.

The clearing arrangements between the clearing brokers and USNG generally are terminable by the clearing brokers once the clearing broker has given USNG notice. Upon termination, the General Partner may be required to

renegotiate or make other arrangements for obtaining similar services if USNG intends to continue trading in Futures Contracts or Other Natural Gas-Related Investments at its present level of capacity. The services of any clearing broker may not be available, or even if available, these services may not be available on the terms as favorable as those of the expired or terminated clearing arrangements.

USNG may miss certain trading opportunities because it will not receive the benefit of the expertise of trading advisors.

The General Partner does not employ trading advisors for USNG; however, it reserves the right to employ them in the future. The only advisor to USNG is the General Partner. A lack of trading advisors may be disadvantageous to USNG because it will not receive the benefit of a trading advisors' expertise.

An unanticipated number of redemption requests during a short period of time could have an adverse effect on the NAV of USNG.

If a substantial number of requests for redemption of Redemption Baskets are received by USNG during a relatively short period of time, USNG may not be able to satisfy the requests from USNG's assets not committed to trading. As a consequence, it could be necessary to liquidate positions in USNG's trading positions before the time that the trading strategies would otherwise dictate liquidation.

The failure or bankruptcy of a clearing broker could result in a substantial loss of USNG's assets.

Under CFTC regulations, a clearing broker maintains customers' assets in a bulk segregated account. If a clearing broker fails to do so, or is unable to satisfy a substantial deficit in a customer account, its other customers may be subject to risk of loss of their funds in the event of that clearing broker's bankruptcy. In that event, the clearing broker's customers, such as USNG, are entitled to recover, even in respect of property specifically traceable to them, only a proportional share of all property available for distribution to all of that clearing broker's customers. USNG also may be subject to the risk of the failure of, or delay in performance by, any exchanges and markets and their clearing organizations, if any, on which commodity interest contracts are traded.

From time to time, the clearing brokers may be subject to legal or regulatory proceedings in the ordinary course of their business. A clearing broker's involvement in costly or time-consuming legal proceedings may divert financial resources or personnel away from the clearing broker's trading operations, which could impair the clearing broker's ability to successfully execute and clear USNG's trades.

Third parties may infringe upon or otherwise violate intellectual property rights or assert that the General Partner has infringed or otherwise violated their intellectual property rights, which may result in significant costs and diverted attention.

Third parties may utilize USNG's intellectual property or technology, including the use of its business methods, trademarks and trading program software, without permission. The General Partner has a patent pending for USNG's business method and it is registering its trademarks. USNG does not currently have any proprietary software. However, if it obtains proprietary software in the future, then any unauthorized use of USNG's proprietary software and other technology could also adversely affect its competitive advantage. USNG may have difficulty monitoring unauthorized uses of its patents, trademarks, proprietary software and other technology. Also, third parties may independently develop business methods, trademarks or proprietary software and other technology similar to that of the General Partner or claim that the General Partner has violated their intellectual property rights, including their copyrights, trademark rights, trade names, trade secrets and patent rights. As a result, the General Partner may have to litigate in the future to protect its trade secrets, determine the validity and scope of other parties' proprietary rights, defend itself against claims that it has infringed or otherwise violated other parties' rights, or defend itself against claims that its rights are invalid. Any litigation of this type, even if the General Partner is successful and regardless of the merits, may result in significant costs, divert its resources from USNG, or require it to change its proprietary software and other technology or enter into royalty or licensing agreements. See [Legal Risks](#) below.

The success of USNG depends on the ability of the General Partner to accurately implement trading systems, and any failure to do so could subject USNG to losses on such transactions.

The General Partner anticipates using mathematical formulas built into a generally available spreadsheet program to decide whether it should buy or sell Natural Gas Interests each day. Specifically, the General Partner anticipates using the spreadsheet to make mathematical calculations and to monitor positions in Natural Gas Interests and Treasuries and correlations to the Benchmark Futures Contract. The General Partner must accurately process the spreadsheets outputs and execute the transactions called for by the formulas. In addition, USNG relies on the General Partner to properly operate and maintain its computer and communications systems. Execution of the

formulas and operation of the systems are subject to human error. Any failure, inaccuracy or delay in implementing any of the formulas or systems and executing USNG's transactions could impair its ability to achieve USNG's investment objective. It could also result in decisions to undertake transactions based on inaccurate or incomplete information. This could cause substantial losses on transactions.

USNG may experience substantial losses on transactions if the computer or communications system fails.

USNG's trading activities, including its risk management, depend on the integrity and performance of the computer and communications systems supporting them. Extraordinary transaction volume, hardware or software failure, power or telecommunications failure, a natural disaster or other catastrophe could cause the computer systems to operate at an unacceptably slow speed or even fail. Any significant degradation or failure of the systems that the General Partner uses to gather and analyze information, enter orders, process data, monitor risk levels and otherwise engage in trading activities may result in substantial losses on transactions, liability to other parties, lost profit opportunities, damages to the General Partner's and USNG's reputations, increased operational expenses and diversion of technical resources.

If the computer and communications systems are not upgraded, USNG's financial condition could be harmed.

The development of complex computer and communications systems and new technologies may render the existing computer and communications systems supporting USNG's trading activities obsolete. In addition, these computer and communications systems must be compatible with those of third parties, such as the systems of exchanges, clearing brokers and the executing brokers. As a result, if these third parties upgrade their systems, the General Partner will need to make corresponding upgrades to continue effectively its trading activities. USNG's future success will depend on USNG's ability to respond to changing technologies on a timely and cost-effective basis.

USNG depends on the reliable performance of the computer and communications systems of third parties, such as brokers and futures exchanges, and may experience substantial losses on transactions if they fail.

USNG depends on the proper and timely function of complex computer and communications systems maintained and operated by the futures exchanges, brokers and other data providers that the General Partner uses to conduct trading activities. Failure or inadequate performance of any of these systems could adversely affect the General Partner's ability to complete transactions, including its ability to close out positions, and result in lost profit opportunities and significant losses on commodity interest transactions. This could have a material adverse effect on revenues and materially reduce USNG's available capital. For example, unavailability of price quotations from third parties may make it difficult or impossible for the General Partner to use its proprietary software that it relies upon to conduct its trading activities. Unavailability of records from brokerage firms may make it difficult or impossible for the General Partner to accurately determine which transactions have been executed or the details, including price and time, of any transaction executed. This unavailability of information also may make it difficult or impossible for the General Partner to reconcile its records of transactions with those of another party or to accomplish settlement of executed transactions.

The occurrence of a terrorist attack, or the outbreak, continuation or expansion of war or other hostilities could disrupt USNG's trading activity and materially affect USNG's profitability.

The operations of USNG, the exchanges, brokers and counterparties with which USNG does business, and the markets in which USNG does business could be severely disrupted in the event of a major terrorist attack or the outbreak, continuation or expansion of war or other hostilities. The terrorist attacks of September 11, 2001 and the war in Iraq, global anti-terrorism initiatives and political unrest in the Middle East and Southeast Asia continue to fuel this concern.

Risk of Leverage and Volatility

If the General Partner permits USNG to become leveraged, you could lose all or substantially all of your investment if USNG's trading positions suddenly turn unprofitable.

Commodity pools trading positions in futures contracts or other commodity interests are typically required to be secured by the deposit of margin funds that represent only a small percentage of a futures contract's (or other

commodity interests) entire face value. This feature permits commodity pools to leverage their assets by purchasing or selling futures contracts (or other commodity interests) with an aggregate value in excess of the commodity pool's assets. While this leverage can increase the pool's profits, relatively small adverse movements in the price of the pool's futures contracts can cause significant losses to the pool. While the General Partner does not currently intend to leverage USNG's assets, it is not prohibited from doing so under the LP Agreement or otherwise.

The price of natural gas is volatile which could cause large fluctuations in the price of units.

Movements in the price of natural gas may be the result of factors outside of the General Partner's control and may not be anticipated by the General Partner. Among the factors that can cause volatility in the price of natural gas are:

- worldwide or regional demand for energy, which is affected by economic conditions;
- the domestic and foreign supply and inventories of oil and gas;
- weather conditions, including abnormally mild winter or summer weather, and abnormally harsh winter or summer weather;
- availability and adequacy of pipeline and other transportation facilities;
- domestic and foreign governmental regulations and taxes;
- political conditions in gas or oil producing regions;
- the ability of members of the Organization of Petroleum Exporting Countries (OPEC) to agree upon and maintain oil prices and production levels;
- the price and availability of alternative fuels; and
- the impact of energy conservation efforts.

The impact of environmental and other governmental laws and regulations that may affect the price of natural gas.

Environmental and other governmental laws and regulations have increased the costs to plan, design, drill, install, operate and abandon natural gas and oil wells. Other laws have prevented exploration and drilling of natural gas in certain environmentally sensitive federal lands and waters. Several environmental laws that have a direct or an indirect impact on the price of natural gas include, but are not limited to, the Clean Air Act, Clean Water Act, Resource Conservation and Recovery Act, and the Comprehensive Environmental Response, Compensation and Liability Act of 1980.

The limited method for transporting and storing natural gas may cause the price of natural gas to increase.

Natural gas is primarily transported and stored throughout the United States by way of pipeline and underground storage facilities. These systems may not be adequate to meet demand, especially in times of peak demand or in areas of the United States where gas service is already limited due to minimal pipeline and storage infrastructure. As a result of the limited method for transporting and storing natural gas, the price of natural gas may increase.

Over-the-Counter Contract Risk

Over-the-counter transactions are subject to little, if any, regulation.

A portion of USNG's assets may be used to trade over-the-counter natural gas interest contracts, such as forward contracts or swap or spot contracts. Over-the-counter contracts are typically traded on a principal-to-principal basis through dealer markets that are dominated by major money center and investment banks and other institutions and are essentially unregulated by the CFTC. You therefore do not receive the protection of CFTC regulation or the statutory scheme of the Commodity Exchange Act in connection with this trading activity by USNG. The markets for over-the-counter contracts rely upon the integrity of market participants in lieu of the additional regulation imposed by the CFTC on participants in the futures markets. The lack of regulation in these

markets could expose USNG in certain circumstances to significant losses in the event of trading abuses or financial failure by participants.

USNG will be subject to credit risk with respect to counterparties to over-the-counter contracts entered into by USNG or held by special purpose or structured vehicles.

USNG also faces the risk of non-performance by the counterparties to the over-the-counter contracts. Unlike in futures contracts, the counterparty to these contracts is generally a single bank or other financial institution, rather than a clearing organization backed by a group of financial institutions. As a result, there will be greater counterparty credit risk in these transactions. A counterparty may not be able to meet its obligations to USNG, in which case USNG could suffer significant losses on these contracts.

If a counterparty becomes bankrupt or otherwise fails to perform its obligations due to financial difficulties, USNG may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding. USNG may obtain only limited recovery or may obtain no recovery in such circumstances.

USNG may be subject to liquidity risk with respect to its over-the-counter contracts.

Over-the-counter contracts have terms that make them less marketable than Futures Contracts. Over-the-counter contracts are less marketable because they are not traded on an exchange, do not have uniform terms and conditions, and are entered into based upon the creditworthiness of the parties and the availability of credit support, such as collateral, and in general, they are not transferable without the consent of the counterparty. These conditions diminish the ability to realize the full value of such contracts.

Risk of Trading in International Markets

Trading in international markets would expose USNG to credit and regulatory risk.

The General Partner expects to invest primarily in Futures Contracts, a significant portion of which will be on United States exchanges including the New York Mercantile Exchange. However, a portion of USNG's trades may take place on markets and exchanges outside the United States. Some non-U.S. markets present risks because they are not subject to the same degree of regulation as their U.S. counterparts. None of the CFTC, NFA, or any domestic exchange regulates activities of any foreign boards of trade or exchanges, including the execution, delivery and clearing of transactions, nor has the power to compel enforcement of the rules of a foreign board of trade or exchange or of any applicable non-U.S. laws. Similarly, the rights of market participants, such as USNG, in the event of the insolvency or bankruptcy of a non-U.S. market or broker are also likely to be more limited than in the case of U.S. markets or brokers. As a result, in these markets, USNG has less legal and regulatory protection than it does when it trades domestically.

In some of these non-U.S. markets, the performance on a contract is the responsibility of the counterparty and is not backed by an exchange or clearing corporation and therefore exposes USNG to credit risk. Trading in non-U.S. markets also leaves USNG susceptible to swings in the value of the local currency against the U.S. dollar. Additionally, trading on non-U.S. exchanges is subject to the risks presented by exchange controls, expropriation, increased tax burdens and exposure to local economic declines and political instability. An adverse development with respect to any of these variables could reduce the profit or increase the loss earned on trades in the affected international markets.

International trading activities subject USNG to foreign exchange risk.

The price of any non-U.S. Futures Contract, option on any non-U.S. Futures Contract or other non-U.S. Natural Gas-Related Investment, and, therefore, the potential profit and loss on such Natural Gas Interests, may be affected by

any variance in the foreign exchange rate between the time the order is placed and the time it is liquidated, offset or exercised. As a result, changes in the value of the local currency relative to the U.S. dollar may cause losses to USNG even if the contract traded is profitable.

USNG's international trading would expose it to losses resulting from non-U.S. exchanges that are less developed or less reliable than United States exchanges.

Some non-U.S. exchanges also may be in a more developmental stage so that prior price histories may not be indicative of current price dynamics. In addition, USNG may not have the same access to certain positions on foreign trading exchanges as do local traders, and the historical market data on which General Partner bases its strategies may not be as reliable or accessible as it is for U.S. exchanges.

Tax Risk

Please refer to "U.S. Federal Income Tax Considerations" for information regarding the U.S. federal income tax consequences of the purchase, ownership and disposition of units.

Your tax liability may exceed the amount of distributions, if any, on your units.

Cash or property will be distributed at the sole discretion of the General Partner, and the General Partner currently does not intend to make cash or other distributions with respect to units. You will be required to pay U.S. federal income tax and, in some cases, state, local, or foreign income tax, on your allocable share of USNG's taxable income, without regard to whether you receive distributions or the amount of any distributions. Therefore, your tax liability with respect to your units may exceed the amount of cash or value of property (if any) distributed.

Your allocable share of taxable income or loss may differ from your economic income or loss on your units.

Due to the application of the assumptions and conventions applied by USNG in making allocations for tax purposes and other factors, your allocable share of USNG's income, gain, deduction or loss may be different than your economic profit or loss from your units for a taxable year. This difference could be temporary or permanent and, if permanent, could result in your being taxed on amounts in excess of your economic income.

Items of income, gain, deduction, loss and credit with respect to units could be reallocated if the IRS does not accept the assumptions and conventions applied by USNG in allocating those items, with potential adverse consequences for you.

The U.S. tax rules pertaining to partnerships are complex and their application to large, publicly traded partnerships such as USNG is in many respects uncertain. USNG will apply certain assumptions and conventions in an attempt to comply with the intent of the applicable rules and to report taxable income, gains, deductions, losses and credits in a manner that properly reflects unitholders' economic gains and losses. These assumptions and conventions may not fully comply with all aspects of the Internal Revenue Code ("Code") and applicable Treasury Regulations, however, and it is possible that the U.S. Internal Revenue Service will successfully challenge our allocation methods and require us to reallocate items of income, gain, deduction, loss or credit in a manner that adversely affects you. If this occurs, you may be required to file an amended tax return and to pay additional taxes plus deficiency interest.

We could be treated as a corporation for federal income tax purposes, which may substantially reduce the value of your units.

USNG has received an opinion of counsel that, under current U.S. federal income tax laws, USNG will be treated as a partnership that is not taxable as a corporation for U.S. federal income tax purposes, provided that (i) at least 90 percent of USNG's annual gross income consists of "qualifying income" as defined in the Code, (ii) USNG is organized and operated in accordance with its governing agreements and applicable law and (iii) USNG does not elect to be taxed as a corporation for federal income tax purposes. Although the General Partner anticipates that USNG will satisfy the "qualifying income" requirement for all of its taxable years, that result cannot be assured. USNG has not requested and will not request any ruling from the IRS with respect to its classification as a partnership not taxable as

a corporation for federal income tax purposes. If the IRS were to successfully assert that USNG is taxable as a corporation for federal income tax purposes in any taxable year, rather than passing through its income, gains, losses and deductions proportionately to unitholders, USNG would be subject to tax on its net income for the year at corporate tax rates. In addition, although the General Partner does not currently intend to make distributions with respect to units, any distributions would be taxable to unitholders as dividend income. Taxation of

USNG as a corporation could materially reduce the after-tax return on an investment in units and could substantially reduce the value of your units.

PROSPECTIVE INVESTORS ARE STRONGLY URGED TO CONSULT THEIR OWN TAX ADVISORS WITH RESPECT TO THE POSSIBLE TAX CONSEQUENCES TO THEM OF AN INVESTMENT IN UNITS; SUCH TAX CONSEQUENCES MAY DIFFER IN RESPECT OF DIFFERENT INVESTORS.

Legal Risks

Others may notify USNG of intellectual property rights that could adversely impact USNG.

New York Mercantile Exchange

The General Partner has engaged in discussions with the New York Mercantile Exchange regarding a possible license agreement regarding USNG and its use of the prices and service marks of the New York Mercantile Exchange. At this time, the General Partner is unable to determine what the outcome from this matter will be. Thus, depending on the outcome of this matter, USNG may or may not enter into a licensing agreement with the New York Mercantile Exchange.

Representatives of the New York Mercantile Exchange have notified the General Partner that the other fund that it manages, USOF, is engaging in unauthorized use of such Exchange's service marks and settlement prices. The General Partner has engaged in discussions with the New York Mercantile Exchange regarding a possible license agreement. In this regard, USOF received a letter from the Exchange dated March 29, 2006 (the "March 29th Letter"). The March 29th Letter was in response to USOF's request for additional information in connection with the negotiation of the possible license agreement. In the March 29th Letter, the Exchange stated that it would cause the cessation of any market data vendor's provision of New York Mercantile Exchange settlement prices to USOF and/or take other action to prevent USOF from using any New York Mercantile Exchange settlement prices unless USOF enters into a license agreement with the Exchange, or has indicated in writing that it will cease from using any Exchange settlement prices. USOF will continue to seek an amicable resolution to this situation. It is evaluating the current draft of the license agreement in view of the March 29th letter but is also taking into account a recent New York federal district court decision against New York Mercantile Exchange that found under similar circumstances that New York Mercantile Exchange's intellectual property rights, including those related to its settlement prices, were significantly limited. USOF and the General Partner have retained separate counsel to represent them in this matter.

If a license agreement is not consummated, it is possible that the New York Mercantile Exchange would cause the cessation of any market data vendor's provision of New York Mercantile Exchange settlement prices to USNG and/or take other action to prevent the USNG from using any New York Mercantile Exchange settlement prices. It is estimated that if a license agreement is consummated, then USNG, together with USOF, will pay a license fee based on daily NAV that equals .04% for the first \$1,000,000,000 of combined assets of both funds and .02% for combined assets above \$1,000,000,000.

At this time, the General Partner is unable to determine what the outcome from this matter will be. Thus, depending on the outcome of this matter, USNG may or may not enter into a licensing agreement with the New York Mercantile Exchange.

Goldman, Sachs & Co.

Separately, Goldman, Sachs & Co. ("Goldman Sachs") sent USOF a letter on March 17, 2006, providing USOF and the General Partner notice under 35 U.S.C. Section 154(d) of two pending United States patent applications, Publication Nos. 2004/0225593A1 and 2006/0036533A1. Both patent applications are generally directed to a method and system for creating and administering a publicly traded interest in a commodity pool. In particular, the Abstract of each patent

application defines a means for creating and administering a publicly traded interest in a commodity pool that includes the steps of forming a commodity pool having a first position in a futures contract and a corresponding second position in a margin investment, and issuing equity interest of the commodity pool to third party investors. If patents were to be issued to Goldman Sachs based upon these patent applications as currently drafted, and USOF continued to operate as currently contemplated after the patents were issued, claims against USOF and the General Partner for infringement of the patents may be made by Goldman Sachs. USNG and USOF

are similarly structured and USNG will be a commodity pool that is administered like USOF. As a result, a claim could also be made against USNG. However, as these patent applications are pending and have not been substantively examined by the U.S. Patent and Trademark Office, it is uncertain at this time what subject matter will be covered by the claims of any patent issuing on one of these applications, should a patent issue at all.

Under the provisions of 35 U.S.C. § 154(d), Goldman Sachs may seek damages in the form of a reasonable royalty from the date the units are publicly offered for sale to the date one of their cited patent applications issues as a U.S. Patent if, and only if, the invention as claimed in the issued patent is substantially identical to the invention as claimed in the published patent application. To obtain a reasonable royalty under 35 U.S.C. § 154(d), one of Goldman Sachs' patents must issue and then it must be proved that post-issuance acts or systems of USOF infringe a valid claim of the issued patent, and that the infringed claim is substantially identical to one of the claims in the corresponding published application. If at the time a Goldman Sachs patent issues, USOF does not infringe the claims of the issued patent based on its current design or through modifications made prior to issuance, or if any infringed issued claim is not substantially identical to a published claim, then Goldman Sachs will not be able to obtain a reasonable royalty under 35 U.S.C. § 154(d). At this time neither of Goldman Sachs' patent applications have been substantively examined by an examiner at the U.S. Patent and Trademark Office nor are they currently being considered for examination on an expedited basis under a Petition to Make Special, and considering that both have been placed in Class 705 for examination, which has an average pendency of approximately 44-45 months to issuance (or abandonment) and an issuance rate of approximately 11% in 2004, it is likely that neither application will issue within the next two years. Nonetheless, USOF is currently reviewing the Goldman Sachs published patent applications, and is engaged in discussions with Goldman Sachs regarding their pending applications and USNG's own pending patent application. At this time, due in part to the requirements of 35 U.S.C. § 154(d) and the fact that the Goldman Sachs patent applications are pending and have not been issued as U.S. Patents, we are unable to determine what the outcome from this matter will be. See Operating Risks. Third parties may infringe upon or otherwise violate intellectual property rights or assert that the General Partner has infringed or otherwise violated their intellectual property rights, which may result in significant costs and diverted attention.

The Offering

What is USNG?

USNG is a Delaware limited partnership organized on September 11, 2006. USNG maintains its main business office at 1320 Harbor Bay Parkway, Suite 145, Alameda, California 94502. USNG is a commodity pool. It operates pursuant to the terms of the LP Agreement, which grants full management control to the General Partner.

Who is the General Partner?

Our sole General Partner is Victoria Bay Asset Management, LLC, a single member limited liability company that was formed in the state of Delaware on May 10, 2005. It maintains its main business office at 1320 Harbor Bay Parkway, Suite 145, Alameda, California 94502. The General Partner is a wholly-owned subsidiary of Wainwright Holdings, Inc., a Delaware corporation ("Wainwright"). Mr. Nicholas Gerber (discussed below) controls Wainwright by virtue of his ownership of Wainwright's shares. Wainwright is a holding company that also owns an insurance company organized under Bermuda law and a registered investment advisor firm named Ameristock Corporation. The General Partner is a member of the NFA and is registered with the CFTC as of December 1, 2005. The General Partner's registration as a CPO with the NFA was approved on December 1, 2005.

The General Partner is also currently the general partner of USOF. USOF is a publicly traded limited partnership which seeks to have the changes in percentage terms of its unit's NAV track the changes in percentage terms in the spot price of West Texas Intermediate light, sweet crude oil as traded in the United States. USOF invests in a mixture of listed crude oil futures contracts, other non-listed oil related investments, Treasuries, cash and cash equivalents. USOF began trading on the American Stock Exchange on April 10, 2006. As of February 27, 2007, USOF had total

net assets of \$976,715,539.04 and had outstanding units of 19,200,000. USOF employs an investment strategy in its operations that is similar to the investment strategy of USNG.

The General Partner is required to evaluate the credit risk for USNG to the futures commission merchant, oversee the purchase and sale of USNG's units by certain Authorized Purchasers, review daily positions and margin requirements of USNG, and manage USNG's investments. The General Partner also pays the fees of the Marketing Agent, the Administrator, and the Custodian and, in connection with the initial public offering of the units,

registration fees paid to SEC, the NASD, or any other regulatory agency, including the legal, printing, accounting and other expenses associated therewith.

Limited partners have no right to elect the General Partner on an annual or any other continuing basis. If the General Partner voluntarily withdraws, however, the holders of a majority of our outstanding limited partner interests (excluding for purposes of such determination interests owned by the withdrawing General Partner and its affiliates) may elect its successor. The General Partner may not be removed as general partner except upon approval by the affirmative vote of the holders of at least 66 2/3 percent of our outstanding limited partner interests (excluding limited partner interests owned by the General Partner and its affiliates), subject to the satisfaction of certain conditions set forth in the LP Agreement.

The business and affairs of our General Partner are managed by a board of directors, and will be comprised of four management directors who are also its executive officers (the Management Directors) and three independent directors who meet the independent director requirements established by the American Stock Exchange and the Sarbanes-Oxley Act of 2002. Notwithstanding the foregoing, the Management Directors have the authority to manage the General Partner pursuant to its Limited Liability Company Agreement. The General Partner has an audit committee which is made up of the three independent directors (Peter M. Robinson, Gordon L. Ellis, and Malcolm R. Fobes III). The audit committee is governed by an audit committee charter that is posted on USNG's website. Gordon L. Ellis and Malcolm R. Fobes III meet the financial sophistication requirements of the American Stock Exchange and the audit committee charter. Through its Management Directors, the General Partner manages the day-to-day operations of USNG.

Nicholas Gerber has been the President and CEO of the General Partner since June 9, 2005 and a Management Director of the General Partner since May 10, 2005. He maintains his main business office at 1320 Harbor Bay Parkway, Suite 145, Alameda, California 94502. Mr. Gerber will act as a portfolio manager for USNG. He registered with NFA as a Principal of the General Partner in November 2005, and as an Associated Person of the General Partner in December 2005. Currently, Mr. Gerber manages USOF. Mr. Gerber also serves as Vice President/Chief Investment Officer of Lyon's Gate Reinsurance Company, Ltd. since June of 2003. Mr. Gerber has an extensive background in securities portfolio management and in developing investment funds that make use of indexing and futures contracts. He is also the founder of Ameristock Corporation, a California-based investment adviser registered under the Investment Advisers Act of 1940, that has been sponsoring and providing portfolio management services to mutual funds since 1995. Since 1995, Mr. Gerber has been the portfolio manager of the Ameristock Mutual Fund, Inc. a mutual fund registered under the Investment Company Act of 1940, focused on large cap U.S. equities that currently has approximately \$800 million in assets. In these roles, Mr. Gerber has gained extensive experience in evaluating and retaining third-party service providers, including custodians, accountants, transfer agents, and distributors. Prior to managing Ameristock Mutual Fund Inc., Mr. Gerber served as a portfolio manager with Bank of America Capital Management. While there he was responsible for the daily stewardship of four funds with a combined value in excess of \$240 million. At Bank of America Capital Management, Mr. Gerber worked extensively in the development and managing of mutual funds and institutional accounts that were designed to track assorted equity market indices such as the Standard & Poor's 500 and the Standard & Poor's Midcap 400. Before joining Bank of America, he was managing director and founder of the Marc Stevens Futures Index Fund, a fund that combined the use of commodity futures with equity stock index futures. The futures index fund was a commodity pool and Mr. Gerber was the CPO. It was ultimately purchased by Newport Commodities. Mr. Gerber's two decades of experience in institutional investment include a period of employment as a floor trader on the New York Futures Exchange. Mr. Gerber has passed the Series 3 examination for associated persons. He holds an MBA in finance from the University of San Francisco and a BA from Skidmore College. Mr. Gerber is 44 years old.

Andrew F. Ngim has been a Management Director of the General Partner since May 10, 2005 and Treasurer of the General Partner since June 9, 2005. As treasurer of the General Partner, Mr. Ngim is involved in the management of both USOF and USNG. He received a Bachelor of Arts from the University of California at Berkeley in 1983. Mr. Ngim has been the Managing Director of Ameristock Corporation since 1999. He was the co-portfolio manager of the Ameristock Large Company Growth Fund from December 2000 to June 2002 and a Benefits Consultant with

PriceWaterhouseCoopers from 1994 to 1999. Mr. Ngim is 46 years old.

Howard Mah has been a Management Director of the General Partner since May 10, 2005, Secretary of the General Partner since June 9, 2005, and Chief Financial Officer of the General Partner since May 23, 2006. In these roles, Mr. Mah is involved in the management of both USOF and USNG. Mr. Mah also serves as the General Partner's Chief Compliance Officer. He received a Bachelor of Education from the University of Alberta, in 1986 and an MBA from the University of San Francisco in 1988. He has been the Compliance Officer of Ameristock

Corporation since 2001; a tax & finance consultant in private practice since 1995, Secretary of Ameristock Mutual Fund since 1995 and Ameristock Focused Value Fund from December 2000 to January 2005; Chief Compliance Officer of Ameristock Mutual Fund since 2004 and the Co-Portfolio Manager of the Ameristock Focused Value Fund from December 2000 to January 2005. Mr. Mah is 42 years old.

Robert L. Nguyen has been a Management Director of the General Partner since May 10, 2005. As a Management Director of the General Partner, Mr. Nguyen is involved in the management of both USOF and USNG. He received a Bachelor of Science from California State University Sacramento in 1981. Mr. Nguyen has been the Managing Principal of Ameristock Corporation since 2000. He was Co-Portfolio Manager of the Ameristock Large Company Growth Fund from December 2000 to June 2002 and Institutional Specialist with Charles Schwab & Company Inc. from 1995 to 1999. Mr. Nguyen is 47 years old.

Peter M. Robinson has been an Independent Director of the General Partner since September 30, 2005. Mr. Robinson has been employed as a Research Fellow with the Hoover Institution since 1993. Mr. Robinson graduated from Dartmouth College in 1979 and Oxford University in 1982. Mr. Robinson spent six years in the White House, serving from 1982 to 1983 as chief speechwriter to Vice President George Bush and from 1983 to 1988 as special assistant and speechwriter to President Ronald Reagan. After the White House, Mr. Robinson received an MBA from the Stanford University Graduate School of Business. Mr. Robinson then spent a year in New York City with Fox Television. He spent a second year in Washington, D.C., with the Securities and Exchange Commission, where he served as the director of the Office of Public Affairs, Policy Evaluation, and Research. Mr. Robinson has also written three books and has been published in the *New York Times*, *Red Herring*, and *Forbes ASAP* and he is the editor of *Can Congress Be Fixed?: Five Essays on Congressional Reform* (Hoover Institution Press, 1995). Mr. Robinson is 49 years old.

Gordon L. Ellis has been an Independent Director of the General Partner since September 30, 2005. Mr. Ellis has been Chairman of International Absorbents, Inc. since July 1988, President and Chief Executive Officer since November 1996 and a Class I Director of the company since July 1985. Mr. Ellis is also a director of Absorption Corp., International Absorbents, Inc.'s wholly-owned subsidiary. Mr. Ellis is a director/trustee of Polymer Solutions, Inc., a former publicly-held company that sold all of its assets effective as of February 3, 2004 and is currently winding down its operations and liquidating following such sale. Mr. Ellis is a professional engineer with an MBA in international finance. Mr. Ellis is 59 years old.

Malcolm R. Fobes III has been an Independent Director of the General Partner since September 30, 2005. Mr. Fobes is the founder, Chairman and Chief Executive Officer of Berkshire Capital Holdings, Inc., a California-based investment adviser registered under the Investment Advisers Act of 1940, that has been sponsoring and providing portfolio management services to mutual funds since 1997. Since 1997, Mr. Fobes has been the Chairman and President of The Berkshire Funds, a mutual fund investment company registered under the Investment Company Act of 1940. Mr. Fobes also serves as portfolio manager of the Berkshire Focus Fund, a mutual fund registered under the Investment Company Act of 1940, which concentrates its investments in the electronic technology industry. From April 2000 to July 2006, Mr. Fobes also served as co-portfolio manager of The Wireless Fund, a mutual fund registered under the Investment Company Act of 1940, which concentrates its investments in companies engaged in the development, production, or distribution of wireless-related products or services. In these roles, Mr. Fobes has gained extensive experience in evaluating and retaining third-party service providers, including custodians, accountants, transfer agents, and distributors. Mr. Fobes was also contributing editor of *Start a Successful Mutual Fund: The Step-by-Step Reference Guide to Make It Happen* (JV Books, 1995). Prior to forming Berkshire Capital Holdings, Inc., Mr. Fobes was employed by various technology-related companies, including Adobe Systems, Inc., a leading provider of digital publishing and imaging software technologies. Mr. Fobes holds a B.S. degree in Finance and Economics from San Jose State University in California. Mr. Fobes is 42 years old.

John Love will act as the Operations Manager. In April 2006, Mr. Love became the operations manager for USOF. Mr. Love has also served as the operations manager of Ameristock Corporation since 2002, where he is responsible

for marketing the Ameristock Mutual Fund. From April 2001 to September 2002, Mr. Love was the project manager for TouchVision Interactive where he provided leadership to project teams while assisting with business and process development. From January 1996 to November 2000, Mr. Love was the managing director of Jamison/ Gold (Keane Inc.) where he provided leadership to all departments including operations, production, technology, sales, marketing, administration, recruiting, and finance. From December 2000 to February 2001, Mr. Love was employed by Digital Boardwalk Inc. Mr. Love's experience also includes leading a group of multimedia producers who controlled web and kiosk projects from pre-contract to deployment. He holds a BFA in cinema-television from the University of Southern California. Mr. Love is 34 years old.

John T. Hyland, CFA will act as a Portfolio Manager and as the Director of Portfolio Research. He registered with NFA as an Associated Person of the General Partner in December 2005, and as a Principal of the General Partner in January 2006. In April 2006, Mr. Hyland became the Portfolio Manager and Director of Portfolio Research for USOF. As part of his responsibilities for USOF, Mr. Hyland handles day-to-day trading, helps set investment policies, and oversees USOF's activities with its futures commission brokers, custodian-administrator, and marketing agent. Mr. Hyland has an extensive background in portfolio management and research with both equity and fixed income securities, as well as in the development of new types of complex investment funds. In July 2001, Mr. Hyland founded Towerhouse Capital Management, LLC, a firm that provides portfolio management and new fund development expertise to non-U.S. institutional investors. Mr. Hyland has been, and remains, a Principal and Portfolio Manager for Towerhouse. From July 2001 to January 2002, Mr. Hyland was the Director of Global Property Securities Research for Roulac International, where he worked on the development of a hedge fund focused on global real estate stocks. From 1996 through 2001, Mr. Hyland was the Director of Securities Research and Portfolio Manager for the capital markets division of CB Richard Ellis, a global commercial real estate services firm. His division provided portfolio management of equities as an advisor or sub-advisor for mutual funds and separate accounts focused on real estate investment trusts. In addition, his group conducted research in the area of structured commercial real estate debt (including Commercial Mortgage-Back Securities, or CMBS), and lead the creation of one of the earliest re-securitizations of multiple CMBS pool tranches into a Collateralized Debt Obligation (CDO) vehicle. In the ten years prior to working at CB Richard Ellis, Mr. Hyland had worked as a portfolio manager or financial representative for several other investment firms and mutual funds. Mr. Hyland received his Chartered Financial Analyst (CFA) designation in 1994. From 1993 until 2003, Mr. Hyland was on the Board of Directors of the Security Analysts of San Francisco (SASF), a not-for-profit organization of investment management professionals. He served as the president of the SASF from 2001-2002. Mr. Hyland is a member of the CFA Institute (formerly AIMR). He is also a member of the National Association of Petroleum Investment Analysts (NAPIA), a not-for-profit organization of investment professionals focused on the oil industry. He serves as an arbitrator for the National Association of Securities Dealers (NASD), as part of their dispute resolution program. He is a graduate of the University of California, Berkeley and received a BA in political science/international relations in 1982. Mr. Hyland is 47 years old.

The following are individual Principals, as that term is defined in CFTC Rule 3.1, for USNG: Melinda Gerber, Howard Mah, Andrew Ngim, Robert Nguyen, Peter Robinson, Gordon Ellis, Malcolm Fobes, John Love, and John Hyland. These individuals are principals due to their positions, however, Nicholas Gerber and Melinda Gerber are also principals due to their controlling stake in Wainwright. None of the principals owns or has any other beneficial interest in USNG. Nicholas Gerber and John Hyland make trading and investment decisions for USNG. Nicholas Gerber, John Love, and John Hyland execute trades on behalf of USNG. In addition, Nicholas Gerber, John Love, and John Hyland are registered with the CFTC as Associated Persons of the General Partner and are members of the NFA.

Currently, the General Partner contributed \$20 and Wainwright contributed \$980 to USNG for their limited partnership interests. However, following the commencement of the offering, neither the General Partner nor its affiliates will have any beneficial interest in the pool because USNG will redeem out the General Partner's and Wainwright's initial limited partnership interests.

Compensation and Fees to the General Partner

USNG pays a management fee to the General Partner as follows:

Assets	Management Fee
First \$1,000,000,000	0.60% of NAV
After the first \$1,000,000,000	0.50% of NAV

Prior Performance of the General Partner and Affiliates

The General Partner is also currently the general partner of USOF. Both the General Partner and USOF are located in California. USOF is a publicly traded limited partnership which seeks to have the changes in its unit's NAV track the changes in the spot price of West Texas Intermediate light, sweet crude oil as traded in the United States. USOF invests in a mixture of listed crude oil futures contracts, other non-listed oil related investments, Treasuries, cash and cash equivalents. USOF began trading on the American Stock Exchange on April 10th, 2006 and is a continuous offering. As of December 31, 2006, the total amount of money raised by USOF from Authorized Purchasers was \$1,706,503,000; the total number of Authorized Purchasers was 9; the number of baskets purchased by Authorized Purchasers was 290; and the aggregate amount of units purchased was 29 million. There are

significant differences between the crude oil futures market and that of natural gas futures. The General Partner's results with the crude oil fund may not be representative of results that may be experienced with a fund investing in natural gas futures. For more information on the performance of USOF, see the Performance Tables below.

General Partner:	0.50% annualized
	0.13% annualized

Portfolio Brokerage

Commissions:

Total Expense Ratio: 0.63% annualized

USOF Performance:

Name of Commodity Pool:	USOF
Type of Commodity Pool:	Exchange traded security
Inception of Trading:	April 10, 2006
Aggregate Subscriptions (from inception through March 30, 2007):	\$2,933,494,900
Total Net Assets as of March 30, 2007:	\$964,116,921
Initial NAV Per Unit as of Inception:	\$67.39
NAV per Unit as of March 30, 2007:	\$53.56
Worst Monthly Percentage Draw-down:	September 2006 (11.71%)
Worst Peak-to-Valley Draw-down:	June 2006-January 2007 (30.6%)

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

Month	Rates of Return For the Year 2006
April	3.47 %
May	(2.91 %)
June	3.16 %
July	(0.50 %)
August	(6.97 %)
September	(11.71 %)
October	(8.46 %)
November	4.73 %
December	(5.21 %)
Total Rate of Return (since inception through December 31, 2006)	(23.03 %)

Month	Rates of Return For the Year 2007
January	(6.55 %)
February	5.63 %
March	4.61 %
Total Rate of Return (through March 30, 2007)	3.26 %

Draw-down: Losses experienced by USOF over a specified period. Draw-down is measured on the basis of monthly returns only and does not reflect intra-month figures.

Worst Monthly Percentage Draw-down: The largest single month loss sustained since inception of trading.

Worst Peak-to-Valley Draw-down: The largest percentage decline in the NAV per unit over the history of USOF. This need not be a continuous decline, but can be a series of positive and negative returns where the negative returns are larger than the positive returns. Worst Peak-to-Valley Draw-down represents the greatest percentage decline from any month-end NAV per unit that occurs without such month-end NAV per unit being equaled or exceeded as of a subsequent month-end. For example, if the NAV per unit declined by \$1 in each of January and February, increased by \$1 in March and declined again by \$2 in April, a peak-to-trough drawdown analysis conducted as of the end of April would consider that drawdown to be still continuing and to be \$3 in amount, whereas if the NAV per unit had increased by \$2 in March, the January-February drawdown would have ended as of the end of February at the \$2 level.

Nicholas Gerber, the president and CEO of the General Partner, ran the Marc Stevens Futures Index Fund over 10 years ago. This fund combined commodity futures with equity stock index futures. It was a very small private

offering, which had under \$1 million in assets. The Marc Stevens Futures Index Fund was a commodity pool and Mr. Gerber was the CPO. Ameristock Corporation is an affiliate of the General Partner and it is a California-based registered investment advisor registered under the Investment Advisors Act of 1940 that has been sponsoring and providing portfolio management services to mutual funds since 1995. Ameristock Corporation is the investment adviser to the Ameristock Mutual Fund, Inc., a mutual fund registered under the Investment Company Act of 1940 that focuses on large cap U.S. equities that has approximately \$800 million in assets.

How Does USNG Operate?

The net assets of USNG will consist primarily of investments in futures contracts for natural gas, crude oil, heating oil, gasoline, and other petroleum-based fuels traded on the New York Mercantile Exchange, ICE Futures or other U.S. and foreign exchanges (collectively, *Futures Contracts*). USNG may also invest in other natural gas-related investments such as cash-settled options on Futures Contracts, forward contracts for natural gas, and over-the-counter transactions that are based on the price of natural gas, oil and other petroleum-based fuels, Futures Contracts and indices based on the foregoing (collectively, *Other Natural Gas-Related Investments*). For

convenience and unless otherwise specified, Futures Contracts and Other Natural Gas-Related Investments collectively are referred to as Natural Gas Interests in this Prospectus.

USNG will invest in Natural Gas Interests to the fullest extent possible without being leveraged or unable to satisfy its current or potential margin or collateral obligations with respect to its investments in Futures Contracts and Other Natural Gas-Related Investments. The primary focus of the General Partner, will be the investment in Futures Contracts and the management of its investments in short-term obligations of the United States of two years or less (Treasuries), cash and cash equivalents for margining purposes and as collateral.

The investment objective of USNG is to have the changes in percentage terms of the units net asset value reflect the changes in percentage terms of the price of natural gas delivered at the Henry Hub, Louisiana as measured by the Futures Contract on natural gas traded on the New York Mercantile Exchange (the Benchmark Futures Contract) that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case the futures contract will be the next month contract to expire, less USNG s expenses.

It is not the intent of USNG to be operated in a fashion such that its NAV will equal, in dollar terms, the dollar price of spot natural gas or any particular futures contract based on natural gas.

As a specific benchmark, the General Partner will endeavor to place USNG s trades in Futures Contracts and Other Natural Gas-Related Investments and otherwise manage USNG s investments so that A will be within plus/minus 10 percent of B , where:

-

A is the average daily change in USNG s NAV for any period of 30 successive valuation days, i.e., any day as of which USNG calculates its NAV, and

-

B is the average daily change in the price of the Benchmark Futures Contract over the same period.

An investment in the units will allow both retail and institutional investors to easily gain exposure to the natural gas market in a cost-effective manner. The units are also expected to provide additional means for diversifying an investor s investments or hedging exposure to changes in natural gas prices.

The Benchmark Futures Contract will be changed or rolled from the near month contract to expire to the next month to expire over a four (4) day period.

The General Partner believes that market arbitrage opportunities will cause changes in USNG s unit price on the American Stock Exchange to closely track changes in USNG s NAV. The General Partner believes that changes in USNG s NAV in percentage terms will closely track the changes in percentage terms in the Benchmark Futures Contract in, less USNG s expenses.

These relationships are illustrated in the following diagram:

The General Partner will employ a neutral investment strategy intended to track changes in the price of natural gas regardless of whether the price of natural gas goes up or goes down. USNG's neutral investment strategy is designed to permit investors generally to purchase and sell USNG's units for the purpose of investing indirectly in natural gas in a cost-effective manner, and/or to permit participants in the natural gas or other industries to hedge the risk of losses in their natural gas-related transactions. Accordingly, depending on the investment objective of an individual investor, the risks generally associated with investing in natural gas and/or the risks involved in hedging may exist. In addition, an investment in USNG involves the risk that the changes in the price of USNG's units will not accurately track the changes in the Benchmark Futures Contract.

USNG's total portfolio composition will be disclosed each business day that the American Stock Exchange is open for trading, on USNG's website at www.unitedstatesnaturalgasfund.com and through the American Stock Exchange's website at <http://www.amex.com>. The website disclosure of portfolio holdings will be made daily and will include, as applicable, the name and value of each Natural Gas Interest, the specific types of Other Natural Gas-Related Investments and characteristics of such Other Natural Gas-Related Investments, Treasuries, and the amount of cash and cash equivalents held in USNG's portfolio. USNG's website is publicly accessible at no charge.

USNG will create and redeem units only in blocks of 100,000 units called Creation Baskets and Redemption Baskets, respectively. Only Authorized Purchasers may purchase or redeem Creation Baskets or Redemption Baskets. An Authorized Purchaser is under no obligation to create or redeem baskets, and an Authorized Purchaser is under no obligation to offer to the public units of any baskets it does create. It is expected that baskets will be created when there is sufficient demand for units that the market price per unit is at a premium to the NAV per unit. Authorized Purchasers will then sell such units, which will be listed on the American Stock Exchange, to the public at per-unit offering prices that are expected to reflect, among other factors, the trading price of the units on the American Stock Exchange, the NAV of USNG at the time the Authorized Purchaser purchased the Creation Baskets and the NAV at the time of the offer of the units to the public, the supply of and demand for units at the time of sale, and the liquidity of the Futures Contracts market and the market for Other Natural Gas-Related Investments. The prices of units offered by Authorized Purchasers are expected to fall between USNG's NAV and the trading price of the units on the American Stock Exchange at the time of sale. Similarly, it is expected that baskets will be redeemed when the market price per unit is at a discount to the NAV per unit. Retail investors seeking to purchase or sell units on any day are expected to effect such transactions in the secondary market, on the American Stock Exchange, at the market price per unit, rather than in connection with the creation or redemption of baskets.

The minimum number of Creation Baskets that must be sold is one. All proceeds from the sale of Creation Baskets will be invested as quickly as possible in the investments described in this Prospectus. There will be no escrow or similar holding of funds that has a time period or other conditions. Investments will be held through the Custodian or through accounts with USNG's commodities futures brokers. There is no stated maximum time period for USNG's operations and the fund will continue until all units are redeemed or the fund is liquidated pursuant to the terms of the LP Agreement.

There is no specified limit on the maximum amount of Creation Baskets that can be sold. At some point, accountability levels on certain of the Futures Contracts in which USNG intends to invest may practically limit the maximum amount of Creation Baskets that will be sold if the General Partner determines that the other investment alternatives available to USNG at that time will not enable it to meet its stated investment objective.

Units may also be purchased and sold in smaller increments than a Creation Basket on the American Stock Exchange. However, these transactions will be effected at bid and ask prices established by specialist firm(s). Like any listed security, units of USNG can be purchased and sold at any time a secondary market is open.

In managing USNG's assets the General Partner does not intend to use a technical trading system that issues buy and sell orders. The General Partner does intend to employ quantitative methodologies whereby each time one or more baskets are purchased or sold, the General Partner will purchase or sell Futures Contracts and Other Natural

Gas-Related Investments with an aggregate face amount that approximates the amount of Treasuries and /or cash received or paid upon the purchase or sale of the basket(s).

What is USNG's Investment Strategy?

In managing USNG's assets the General Partner does not intend to use a technical trading system that issues buy and sell orders. The General Partner does intend to employ a quantitative methodology whereby each time a Creation Basket is sold, the General Partner will purchase Natural Gas Interests, such as the Benchmark Futures

Contract, that have an aggregate face amount that approximates the amount of Treasuries and/or cash received from the sale of the Creation Basket.

As an example, assume that a Creation Basket is sold by USNG, and that USNG's closing NAV per unit is \$50.00. In that case, USNG would receive \$5,000,000 in proceeds from the sale of the Creation Basket (\$50 NAV per unit multiplied by 100,000 units, and ignoring the Creation Basket fee of \$1,000). If one were to assume further that the General Partner wants to invest the entire proceeds from the Creation Basket in the Benchmark Futures Contract and that the face amount of the Benchmark Futures Contract is \$59,950, USNG would be unable to buy the exact number of Benchmark Futures Contracts whose face amount equaled \$5,000,000. Instead, USNG would be able to purchase 83 Benchmark Futures Contracts with an aggregate face amount of \$4,975,850. Assuming a margin requirement equal to 10% of the value of the Benchmark Futures Contract, USNG would be required to deposit \$497,585 in Treasuries and cash with the futures commission merchant through which the Benchmark Futures Contracts were purchased. The remainder of the proceeds from the sale of the Creation Basket would remain invested in cash, cash equivalents, and Treasuries as determined by the General Partner from time to time based on factors such as potential calls for margin or anticipated redemptions.

The specific Futures Contracts to be purchased will depend on various factors, including a judgment by the General Partner as to the appropriate diversification of USNG's investments in futures contracts with respect to the month of expiration, and the prevailing price volatility of particular contracts. While the General Partner anticipates significant investments in New York Mercantile Exchange futures contracts, as USNG reaches certain position limits on the New York Mercantile Exchange, or for other reasons, it will invest in Futures Contracts traded on other exchanges or invest in Other Natural Gas-Related Investments such as contracts in the over-the-counter market.

The General Partner does not anticipate letting its Futures Contracts expire and taking delivery of the underlying natural gas. Instead, the General Partner will close existing positions when it is determined appropriate to do so and reinvest the proceeds in new Futures Contracts. Positions may also be closed out to meet orders for Redemption Baskets.

By remaining invested as fully as possible in Futures Contracts or Other Natural Gas-Related Investments, the General Partner believes that the changes in percentage terms in USNG's NAV will closely track the changes in percentage terms in the prices of the futures contracts in which USNG invests. The General Partner believes that certain arbitrage opportunities will result in the price of the units traded on the American Stock Exchange closely tracking the NAV of USNG.

What are Futures Contracts?

Futures Contracts are agreements between two parties. One party agrees to buy natural gas from the other party at a later date at a price and quantity agreed upon when the contract is made. Futures Contracts are traded on futures exchanges. For example, natural gas futures contracts traded on the New York Mercantile Exchange trade in units of 10,000 million British Thermal Units (mmBtu). The price of natural gas futures contracts traded on the New York Mercantile Exchange are priced by floor brokers and other exchange members both through an open outcry of offers to purchase or sell the contracts and through an electronic, screen-based system that determines the price by matching electronically offers to purchase and sell.

Certain typical and significant characteristics of Futures Contracts are discussed below. Additional risks of investing in Futures Contracts are included in [What are the Risk Factors Involved with an Investment in USNG?](#)

Impact of Accountability levels, Position Limits and Price Fluctuation Limits. Futures Contracts include typical and significant characteristics. Most significantly, the CFTC and U.S. designated contract markets such as the New York Mercantile Exchange have established accountability levels and position limits on the maximum net long or net short Futures Contracts in commodity interests that any person or group of persons under common trading control (other

than as a hedge, which an investment in USNG is not) may hold, own or control. The net position is the difference between an individual or firm's open long contracts and open short contracts in any one commodity. In addition, most U.S. futures exchanges, such as the New York Mercantile Exchange, limit the daily price fluctuation for Futures Contracts.

The accountability levels for the Benchmark Futures Contract and other Futures Contracts traded on the New York Mercantile Exchange are not a fixed ceiling, but rather a threshold above which the New York Mercantile Exchange may exercise greater scrutiny and control over an investor's positions. The current accountability level for investments at any one time in natural gas Futures Contracts (including investments in the Benchmark Futures Contract) is 12,000 contracts. If USNG exceeds this accountability level for investments in natural gas Futures

Contracts, the New York Mercantile Exchange will monitor USNG's exposure and ask for further information on USNG's activities including the total size of all positions, investment and trading strategy, and the extent of USNG's liquidity resources. If deemed necessary by the New York Mercantile Exchange, it could also order USNG to reduce its position back to the accountability level.

If the New York Mercantile Exchange orders USNG to reduce its position back to the accountability level, or to an accountability level that the New York Mercantile Exchange deems appropriate for USNG, such an accountability level may impact the mix of investments in Natural Gas Interests made by USNG. To illustrate, assume that the Benchmark Futures Contract and the unit price of USNG are each \$10, and that the New York Mercantile Exchange has determined that USNG may not own more than 12,000 contracts in natural gas Futures Contracts. In such case, USNG could invest up to \$1.2 billion of its daily net assets in the Benchmark Futures Contract (i.e., \$10 per contract multiplied by 10,000 (a Benchmark Futures Contract is a contract for 10,000 million British Thermal Units) multiplied by 12,000 contracts) before reaching the accountability level imposed by the New York Mercantile Exchange. Once the daily net assets of the portfolio exceed \$1.2 billion in the Benchmark Futures Contract, the portfolio may not be able to make any further investments in the Benchmark Futures Contract, depending on whether the New York Mercantile Exchange imposes limits. If the New York Mercantile Exchange does impose limits at the \$1.2 billion level (or another level), USNG anticipates that it will invest the majority of its assets above that level in a mix of other Futures Contracts or Other Natural Gas-Related Investments.

In addition to accountability levels, the New York Mercantile Exchange imposes position limits on contracts held in the last few days of trading in the near month contract to expire. It is unlikely that USNG will run up against such position limits because USNG's investment strategy is to change or roll from the near month contract to expire to the next month contract over a four day period beginning two weeks from expiration of the contract.

U.S. futures exchanges, including the New York Mercantile Exchange, also limit the amount of price fluctuation for Futures Contracts. For example, the New York Mercantile Exchange imposes a \$3.00 per mmBtu (\$30,000 per contract) price fluctuation limit for natural gas Futures Contracts. This limit is initially based off of the previous trading day's settlement price. If any natural gas Futures Contract is traded, bid, or offered at the limit for five minutes, trading is halted for five minutes. When trading resumes it begins at the point where the limit was imposed and the limit is reset to be \$3.00 per mmBtu in either direction of that point. If another halt were triggered, the market would continue to be expanded by \$3.00 per mmBtu in either direction after each successive five-minute trading halt. There is no maximum price fluctuation limit during any one trading session.

Examples of the position and price limits imposed are as follows:

Futures Contract	Position Accountability Levels and Limits	Maximum Daily Price Fluctuation
New York Mercantile Exchange Natural Gas	Any one month/all months: 12,000 net futures, but not to exceed 1,000 in the last three days of trading in the spot month.	\$3.00 per mmBtu (\$30,000 per contract) for all months. If any contract is traded, bid, or offered at the limit for five minutes, trading is halted for five minutes. When trading resumes, the limit is expanded by \$3.00 per mmBtu in either direction. If another halt were triggered, the market would continue to be expanded by \$3.00 per mmBtu in either direction after each successive five-minute trading halt. There will be no maximum price fluctuation limits during any one trading session.

York Mercantile
ange WTI Light,

Any one month/all months: 20,000 net futures, but
not to exceed 2,000 contracts in the last three days
of trading in the spot month.

\$10.00 per barrel (\$10,000 per contract) for all
months. If any contract is traded, bid, or offered
the limit for five minutes, trading is halted for
minutes. When trading resumes, the limit is
expanded by \$10.00 per barrel in either direction.
another halt were triggered, the market would
continue to be expanded by \$10.00 per barrel in
either direction after each successive five-minute
trading halt. There will be no maximum price
fluctuation limits during any one trading session.

Futures Contract	Position Accountability Levels and Limits	Maximum Daily Price Fluctuation
New York Mercantile Exchange Heating Oil	7,000 contracts for all months combined, but not to exceed 1,000 in the last three days of trading in the spot month.	\$0.25 per gallon (\$10,500 per contract) for all months. If any contract is traded, bid, or offered, the limit for five minutes, trading is halted for five minutes. When trading resumes, the limit is expanded by \$0.25 per gallon in either direction. If another halt were triggered, the market would continue to be expanded by \$0.25 per gallon in either direction after each successive five-minute trading halt. There will be no maximum price fluctuation limits during any one trading session.
New York Mercantile Exchange Gasoline	Any one month/all months: 7,000 net futures.	\$0.25 per gallon (\$10,500 per contract) for all months. If any contract is traded, bid, or offered, the limit for five minutes, trading is halted for five minutes. When trading resumes, the limit is expanded by \$0.25 per gallon in either direction. If another halt were triggered, the market would continue to be expanded by \$0.25 per gallon in either direction after each successive five-minute trading halt. There will be no maximum price fluctuation limits during any one trading session.
NYMEX Natural Gas Futures	There are no position limits	There is no maximum daily price fluctuation limit.
Brent Crude Futures	There are no position limits.	There is no maximum daily price fluctuation limit.
WTI Crude Futures	There are no position limits.	There is no maximum daily price fluctuation limit.

Price Volatility. Despite daily price limits, the price volatility of Futures Contracts generally has been historically greater than that for traditional securities such as stocks and bonds. Price volatility often is greater day-to-day as opposed to intra-day. Futures Contracts tend to be more volatile than stocks and bonds because price movements of natural gas are more currently and directly influenced by economic factors for which current data is available and are traded by natural gas futures traders throughout the day. These economic factors include changes in interest rates; governmental, agricultural, trade, fiscal, monetary and exchange control programs and policies; weather and climate conditions; changing supply and demand relationships; changes in balances of payments and trade; U.S. and international rates of inflation; currency devaluations and revaluations; U.S. and international political and economic events; and changes in philosophies and emotions of market participants. Because USNG invests a significant portion of its assets in Futures Contracts, the assets of USNG, and therefore the prices of USNG units, may be subject to greater volatility than traditional securities.

Marking-to-Market Futures Positions. Futures Contracts are marked to market at the end of each trading day and the margin required with respect to such contracts is adjusted accordingly. This process of marking-to-market is designed

to prevent losses from accumulating in any futures account. Therefore, if USNG's futures positions have declined in value, USNG may be required to post variation margin to cover this decline. Alternatively, if USNG futures positions have increased in value, this increase will be credited to USNG's account.

What is the Natural Gas Market and the Petroleum-Based Fuel Market?

Natural Gas. Natural gas accounts for almost a quarter of U.S. energy consumption. The price of natural gas is established by the supply and demand conditions in the North American market, and more particularly, in the main refining center of the U.S. Gulf Coast. The natural gas market essentially constitutes an auction, where the highest bidder wins the supply. When markets are strong (i.e., when demand is high and/or supply is low), the bidder must be willing to pay a higher premium to capture the supply. When markets are weak (i.e., when demand is low and/or supply is high), a bidder may choose not to outbid competitors, waiting instead for later, possibly lower priced, supplies. Demand for natural gas by consumers, as well as agricultural, manufacturing and transportation industries, determines overall demand for natural gas. Since the precursors of product demand are linked to economic activity, natural gas demand will tend to reflect economic conditions. However, other factors such as weather significantly influence natural gas demand.

The New York Mercantile Exchange is the world's largest physical commodity futures exchange and the dominant market for the trading of energy and precious metals. The Benchmark Futures Contract trades in units of 10,000 mmBtu and is based on delivery at the Henry Hub in Louisiana, the nexus of 16 intra- and interstate natural gas pipeline systems that draw supplies from the region's prolific gas deposits. The pipelines serve markets throughout the U.S. East Coast, the Gulf Coast, the Midwest, and up to the Canadian border. Because of the volatility of natural gas prices, a vigorous basis market has developed in the pricing relationships between the Henry Hub and other important natural gas market centers in the continental United States and Canada. The New York Mercantile Exchange makes available for trading a series of basis swap futures contracts that are quoted as price differentials between approximately 30 natural gas pricing points and the Henry Hub. The basis contracts trade in units of 2,500 mmBtu on the New York Mercantile Exchange ClearPort® trading platform. The New York Mercantile Exchange ClearPort® is an electronic trading platform through which a slate of energy futures contracts are available for competitive trading. Transactions can also be consummated off-New York Mercantile Exchange and submitted to the New York Mercantile Exchange for clearing via the New York Mercantile Exchange ClearPort® clearing website as an exchange of futures for physicals or an exchange of futures for swaps transactions.

WTI Light, Sweet Crude Oil. Crude oil is the world's most actively traded commodity. The oil Futures Contracts for light, sweet crude oil that are traded on the New York Mercantile Exchange are the world's most liquid forum for crude oil trading, as well as the most liquid futures contracts on a physical commodity. Due to the liquidity and price transparency of oil Futures Contracts, they are used as a principal international pricing benchmark. The oil Futures Contracts for WTI light, sweet crude oil trade on the New York Mercantile Exchange in units of 1,000 U.S. barrels (42,000 gallons) and, if not closed out before maturity, will result in delivery of oil to Cushing, Oklahoma, which is also accessible to the world market by two major interstate petroleum pipeline systems.

The price of crude oil is established by the supply and demand conditions in the global market overall, and more particularly, in the main refining centers of Singapore, Northwest Europe, and the U.S. Gulf Coast. Demand for petroleum products by consumers, as well as agricultural, manufacturing and transportation industries, determines demand for crude oil by refiners. Since the precursors of product demand are linked to economic activity, crude oil demand will tend to reflect economic conditions. However, other factors such as weather also influence product and crude oil demand.

The price of WTI light, sweet crude oil has historically exhibited periods of significant volatility.

Heating Oil. Heating oil, also known as No. 2 fuel oil, accounts for 25% of the yield of a barrel of crude oil, the second largest cut from oil after gasoline. The heating oil futures contract, listed and traded on New York Mercantile Exchange, trades in units of 42,000 gallons (1,000 barrels) and is based on delivery in the New York harbor, the principal cash market center.

Gasoline. Gasoline is the largest single volume refined product sold in the U.S. and accounts for almost half of national oil consumption. The gasoline Futures Contract, listed and traded on the New York Mercantile Exchange, trades in units of 42,000 gallons (1,000 barrels) and is based on delivery at petroleum products terminals in the New York harbor, the major East Coast trading center for imports and domestic shipments from refineries in the New York harbor area or from the Gulf Coast refining centers. The price of gasoline is volatile.

As illustrated by the following graph, there is a correlation among natural gas futures contracts, crude oil futures contracts, gasoline futures contracts, and heating oil futures contracts.

Why Does USNG Purchase and Sell Futures Contracts?

USNG's investment objective is for the changes in percentage terms of the units' NAV to reflect the changes in percentage terms of the Benchmark Futures Contract, less USNG's expenses. USNG expects to invest primarily in Futures Contracts. USNG seeks to have its aggregate NAV approximate at all times the aggregate face amount of the Futures Contracts and Other Natural Gas-Related Investments it holds.

Other than investing in Futures Contracts and Other Natural Gas-Related Investments, USNG will only invest in assets to support these investments in Natural Gas Interests. At any given time, a significant majority of USNG's investments will be in Treasuries that serve as segregated assets supporting USNG's positions in Futures Contracts and Other Natural Gas-Related Investments. For example, the purchase of a Futures Contract with a stated value of \$10 million would not require USNG to pay \$10 million upon entering into the contract; rather, only a margin deposit, generally of 5% to 10% of the stated value of the Futures Contract, would be required. To secure its Futures Contract obligations, USNG would deposit the required margin with the futures commission merchant and hold, through its Custodian, Treasuries, cash and cash equivalents in an amount equal to the balance of the current market value of the contract, which at the contract's inception would be \$10 million minus the amount of the margin deposit, or \$9.5 million (assuming a 5% margin).

As a result of the foregoing, USNG expects that 5% to 10% of its assets will be held as margin in segregated accounts with a futures commission merchant. In addition to the Treasuries it posts with the futures commission merchant for the Futures Contracts it owns, USNG will hold through the Custodian, Treasuries, cash and cash equivalents that can be posted as margin or as collateral to support its over-the-counter contracts. USNG intends to earn interest income from the Treasuries, cash and cash equivalents that it will purchase, and on the cash it holds through the Custodian. It anticipates that the earned interest income will increase the NAV and limited partners' capital contribution accounts. USNG plans to reinvest the earned interest income, hold it in cash, or use it to pay its expenses. If USNG reinvests the

earned interest income, it will make investments that are consistent with its investment objectives.

What is the Flow of Units?

What are the Trading Policies of USNG?

Liquidity

USNG will invest only in Futures Contracts and Other Natural Gas-Related Investments that are traded in sufficient volume to permit, in the opinion of the General Partner, ease of taking and liquidating positions in these financial interests.

Spot Commodities

While natural gas futures contracts traded on the New York Mercantile Exchange can be physically settled, USNG does not intend to take or make physical delivery. However, USNG may from time to time trade in Other Natural Gas-Related Investments, including contracts based on the spot price of natural gas.

Leverage

While USNG expects its ratio of margin to total assets to generally range from 5% to 10%, the General Partner endeavors to have the value of USNG's Treasuries, cash and cash equivalents, whether held by USNG or posted as margin or collateral, at all times approximate the aggregate face value of USNG's obligations under its Futures Contracts and Other Natural Gas-Related Investments.

Borrowings

Borrowings will not be used by USNG, unless USNG is required to borrow money in the event of physical delivery, USNG trades in cash commodities, or for short-term needs created by unexpected redemptions. USNG expects to have the value of its Treasuries, cash and cash equivalents, whether held by USNG or posted as margin or collateral, at all times approximate the aggregate face value of its obligations under USNG's Futures Contracts and Other Natural Gas-Related Investments. USNG does not plan to establish credit lines.

Over-the-Counter Derivatives (Including Spreads and Straddles)

In addition to Futures Contracts, there are also a number of listed options on the Futures Contracts on the principal futures exchanges. These contracts offer investors and hedgers another set of financial vehicles to use in managing exposure to the natural gas market. Consequently, USNG may purchase options on natural gas futures contracts on these exchanges in pursuing its investment objective.

In addition to the Futures Contracts and options on the Futures Contracts, there also exists an active non-exchange-traded market in derivatives tied to natural gas. These derivatives transactions (also known as over-the-counter contracts) are usually entered into between two parties. Unlike most of the exchange-traded Futures Contracts or exchange-traded options on the Futures Contracts, each party to such contract bears the credit risk that the other party may not be able to perform its obligations under its contract.

Some natural gas-based derivatives transactions contain fairly generic terms and conditions and are available from a wide range of participants. Other natural gas-based derivatives have highly customized terms and conditions and are not as widely available. Many of these over-the-counter contracts are cash-settled forwards for the future delivery of natural gas- or petroleum-based fuels that have terms similar to the Futures Contracts. Others take the form of swaps in which the two parties exchange cash flows based on pre-determined formulas tied to the natural gas spot price, forward natural gas price, the Benchmark Futures Contract price, or other natural gas futures contract price. For example, USNG may enter into over-the-counter derivative contracts whose value will be tied to changes in the difference between the natural gas spot price, the Benchmark Futures Contract price, or some other futures contract price traded on New York Mercantile Exchange or ICE Futures and the price of other Futures Contracts that may be

invested in by USNG.

To protect itself from the credit risk that arises in connection with such contracts, USNG will enter into agreements with each counterparty that provide for the netting of its overall exposure to its counterparty, such as the agreements published by the International Swaps and Derivatives Association, Inc. USNG will also require that the counterparty be highly rated and/or provide collateral or other credit support to address USNG's exposure to the counterparty.

The creditworthiness of each potential counterparty will be assessed by the General Partner. The General Partner will assess or review, as appropriate, the creditworthiness of each potential or existing counterparty to an over-the-counter contract pursuant to guidelines approved by the General Partner's Board of Directors. Furthermore, the General Partner on behalf of USNG will only enter into over-the-counter contracts with (a) members of the Federal Reserve System or foreign banks with branches regulated by the Federal Reserve Board; (b) primary dealers in U.S. government securities; (c) broker-dealers; (d) commodities futures merchants; or (e) affiliates of the foregoing. Existing counterparties will also be reviewed periodically by the General Partner. USNG anticipates that the use of Other Natural Gas-Related Investments, together with its investments in Futures Contracts, will produce price and total return results that closely track the investment objective of USNG.

USNG anticipates that the use of Other Natural Gas-Related Investments together with its investments in Futures Contracts will produce price and total return results that closely track the investment goals of USNG.

USNG may employ spreads or straddles in its trading to mitigate the differences in its investment portfolio and its goal of tracking the price of the Benchmark Futures Contract. USNG would use a spread when it chooses to take simultaneous long and short positions in futures written on the same underlying asset, but with different delivery months. The effect of holding such combined positions is to adjust the sensitivity of USNG to changes in the price relationship between futures contracts which will expire sooner and those that will expire later. USNG would use such a spread if the General Partner felt that taking such long and short positions, when combined with the rest of its holdings, would more closely track the investment goals of USNG, or if the General Partner felt it would lead to an overall lower cost of trading to achieve a given level of economic exposure to movements in natural gas prices. USNG would enter into a straddle when it chooses to take an option position consisting of a long (or short) position in both a call option and put option. The economic effect of holding certain combinations of put options and call options can be very similar to that of owning the underlying futures contracts. USNG would make use of such a straddle approach if, in the opinion of the General Partner, the resulting combination would more closely track the investment goals of USNG or if it would lead to an overall lower cost of trading to achieve a given level of economic exposure to movements in natural gas prices.

Pyramiding

USNG will not employ the technique, commonly known as pyramiding, in which the speculator uses unrealized profits on existing positions as variation margin for the purchase or sale of additional positions in the same or another commodity interest.

Who are the Service Providers?

Brown Brothers Harriman & Co. is the registrar and transfer agent for the units. Brown Brothers Harriman & Co. is also the Custodian for USNG. In this capacity, Brown Brothers Harriman & Co. will hold USNG's cash and Treasuries pursuant to a custodial agreement. In addition, Brown Brothers Harriman & Co. will perform certain administrative and accounting services for USNG and will prepare certain SEC and CFTC reports on behalf of USNG. The General Partner will pay Brown Brothers Harriman & Co.'s fees.

USNG also employs ALPS Distributors, Inc. as the Marketing Agent, which is further discussed under "What is USNG's Plan of Distribution?" The General Partner will pay the Marketing Agent's fees.

USNG and the futures commission merchant, UBS Securities LLC ("UBS Securities"), have entered into an Institutional Futures Client Account Agreement. This Agreement requires UBS Securities to provide services to USNG in connection with the purchase and sale of Natural Gas Interests that may be purchased or sold by or through UBS Securities for USNG's account. USNG will pay the futures commission merchant fees.

UBS Securities' principal business address is 677 Washington Blvd, Stamford, CT 06901. UBS Securities is a futures clearing broker for USNG. UBS Securities is registered in the U.S. with the NASD as a broker-dealer and with the CFTC as a futures commission merchant. UBS Securities is a member of various U.S. futures and securities exchanges.

UBS Securities was involved in the 2003 Global Research Analyst Settlement. This settlement is part of the global settlement that UBS Securities and nine other firms have reached with the SEC, NASD, NYSE and various state regulators. As part of the settlement, UBS Securities has agreed to pay \$80,000,000 divided among retrospective relief, for procurement of independent research and for investor education. UBS Securities has also

undertaken to adopt enhanced policies and procedures reasonably designed to address potential conflicts of interest arising from research practices.

Further, UBS Securities, like most large, full service investment banks and broker-dealers, receives inquiries and is sometimes involved in investigations by the SEC, NYSE and various other regulatory organizations and government agencies. UBS Securities fully cooperates with the authorities in all such requests. UBS Securities regularly reports to the SEC on Form B-D investigations that result in orders. These reports are publicly available.

UBS Securities will act only as clearing broker for USNG and as such will be paid commissions for executing and clearing trades on behalf of USNG. UBS Securities has not passed upon the adequacy or accuracy of this Prospectus. UBS Securities neither will act in any supervisory capacity with respect to the General Partner nor participate in the management of the General Partner or USNG.

Currently, the General Partner does not employ commodities trading advisors. If, in the future, the General Partner does employ commodities trading advisors, it will choose each advisor based on arms-length negotiations and will consider the advisor's experience, fees, and reputation.

Service Provider

Compensation Paid by the General Partner

Brown Brothers Harriman & Co., Custodian and Administrator

Minimum amount of \$125,000 annually* for its custody, fund accounting and fund administration services rendered to both funds, as well as a \$25,000 annual fee for its transfer agency services. In addition, an asset charge of (a) 0.06% for the first \$500 million of USNG and USOF's combined assets, (b) .0465% for USNG and USOF's combined assets greater than \$500 million but less than \$1 billion, and (c) .035% once USNG and USOF's combined net assets exceed \$1 billion.**
 .06% on assets up to \$3 billion; .04% on assets in excess of \$3 billion.**

ALPS Distributors, Inc., Marketing Agent

*

The annual minimum amount will not apply if the asset charge for all accounts in the aggregate exceeds \$125,000. The General Partner also will pay transaction charge fees to Brown Brothers, ranging from \$7.00 to \$15.00 per transaction for the funds.

**

The General Partner pays this compensation.

Service Provider

Compensation Paid by USNG

Non-Affiliated Brokers

Approximately .13% of assets (including futures commission merchant fees of approximately \$4.00 per buy or sell)**

**

USNG pays this compensation.

New York Mercantile Exchange Licensing Fee

Assets	Management Fee
First \$1,000,000,000	0.04% of NAV
After the first \$1,000,000,000	0.02% of NAV

Assets of USNG are aggregated with those of USOF. USNG pays this fee.

Fees are calculated on a daily basis (accrued at 1/365 of the applicable percentage of NAV on that day) and paid on a monthly basis.

Form of Units

Registered Form. Units are issued in registered form in accordance with the LP Agreement. The Administrator has been appointed registrar and transfer agent for the purpose of transferring units in certificated form. The

Administrator will keep a record of all holders of the units in the registry (Register). The General Partner will recognize transfers of units in certificated form only if done in accordance with the LP Agreement. The beneficial interests in such units will be held in book-entry form through participants and/or accountholders in DTC.

Book-Entry. Individual certificates will not be issued for the units. Instead, units will be represented by one or more global certificates, which will be deposited by the Administrator with DTC and registered in the name of Cede & Co., as nominee for DTC. The global certificates will evidence all of the units outstanding at any time. Unitholders are limited to (1) participants in DTC such as banks, brokers, dealers and trust companies (DTC Participants), (2) those who maintain, either directly or indirectly, a custodial relationship with a DTC Participant (Indirect Participants), and (3) those banks, brokers, dealers, trust companies and others who hold interests in the units through DTC Participants or Indirect Participants, in each case who satisfy the requirements for transfers of units. DTC participants acting on behalf of investors holding units through such participants' accounts in DTC will follow the delivery practice applicable to securities eligible for DTC's Same-Day Funds Settlement System. Units will be credited to DTC Participants' securities accounts following confirmation of receipt of payment.

DTC. DTC is a limited purpose trust company organized under the laws of the State of New York and is a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934, as amended (Exchange Act). DTC holds securities for DTC Participants and facilitates the clearance and settlement of transactions between DTC Participants through electronic book-entry changes in accounts of DTC Participants.

Transfer of Units

Transfers of Units Only Through DTC. The units are only transferable through the book-entry system of DTC. Limited partners who are not DTC Participants may transfer their units through DTC by instructing the DTC Participant holding their units (or by instructing the Indirect Participant or other entity through which their units are held) to transfer the units. Transfers are made in accordance with standard securities industry practice.

Transfers of interests in units with DTC will be made in accordance with the usual rules and operating procedures of DTC and the nature of the transfer. DTC has established procedures to facilitate transfers among the participants and/or accountholders of DTC. Because DTC can only act on behalf of DTC Participants, who in turn act on behalf of Indirect Participants, the ability of a person or entity having an interest in a global certificate to pledge such interest to persons or entities that do not participate in DTC, or otherwise take actions in respect of such interest, may be affected by the lack of a definitive security in respect of such interest.

DTC has advised us that it will take any action permitted to be taken by a unitholder (including, without limitation, the presentation of a global certificate for exchange) only at the direction of one or more DTC Participants in whose account with DTC interests in global certificates are credited and only in respect of such portion of the aggregate principal amount of the global certificate as to which such DTC Participant or Participants has or have given such direction.

Transfer/Application Requirements. All purchasers of USNG's units, and potentially any purchasers of limited partner interests in the future, who wish to become limited partners or other record holders and receive cash distributions, if any, or have certain other rights, must deliver an executed transfer application in which the purchaser or transferee must certify that, among other things, he, she or it agrees to be bound by USNG's LP Agreement and is eligible to purchase USNG's securities. Each purchaser of units offered by this Prospectus must execute a transfer application and certification. The obligation to provide the form of transfer application will be imposed on the seller of units or, if a purchase of units is made through an exchange, the form may be obtained directly through USNG. Further, the General Partner may request each record holder to furnish certain information, including that holder's nationality, citizenship or other related status. A record holder is a unitholder that is, or has applied to be, a limited partner. An investor who is not a U.S. resident may not be eligible to become a record holder or one of the USNG's limited

partners if that investor's ownership would subject USNG to the risk of cancellation or forfeiture of any of USNG's assets under any federal, state or local law or regulation. If the record holder fails to furnish the information or if the General Partner determines, on the basis of the information furnished by the holder in response to the request, that such holder is not qualified to become one of USNG's limited partners, the General Partner may be substituted as a holder for the record holder, who will then be treated as a non-citizen assignee, and USNG will have the right to redeem those securities held by the record holder.

A transferee's broker, agent or nominee may complete, execute and deliver a transfer application and certification. USNG may, at its discretion, treat the nominee holder of a unit as the absolute owner. In that case, the beneficial holder's rights are limited solely to those that it has against the nominee holder as a result of any agreement between the beneficial owner and the nominee holder.

A person purchasing USNG's existing units, who does not execute a transfer application and certify that the purchaser is eligible to purchase those securities acquires no rights in those securities other than the right to resell those securities. Whether or not a transfer application is received or the consent of the General Partner obtained, our units will be securities and will be transferable according to the laws governing transfers of securities.

Any transfer of units will not be recorded by the transfer agent or recognized by the General Partner unless a completed transfer application is delivered to the General Partner or the Administrator. When acquiring units, the transferee of such units that completes a transfer application will:

- be an assignee until admitted as a substituted limited partner upon the consent and sole discretion of the General Partner and the recording of the assignment on the books and records of the partnership;
- automatically request admission as a substituted limited partner;
- agree to be bound by the terms and conditions of, and execute, our LP Agreement;
- represent that such transferee has the capacity and authority to enter into our LP Agreement;
- grant powers of attorney to our General Partner and any liquidator of us; and
- make the consents and waivers contained in our LP Agreement.

An assignee will become a limited partner in respect of the transferred units upon the consent of our General Partner and the recordation of the name of the assignee on our books and records. Such consent may be withheld in the sole discretion of our General Partner.

If consent of the General Partner is withheld such transferee shall be an assignee. An assignee shall have an interest in the partnership equivalent to that of a limited partner with respect to allocations and distributions, including, without limitation, liquidating distributions, of the partnership. With respect to voting rights attributable to units that are held by assignees, the General Partner shall be deemed to be the limited partner with respect thereto and shall, in exercising the voting rights in respect of such units on any matter, vote such units at the written direction of the assignee who is the record holder of such units. If no such written direction is received, such units will not be voted. An assignee shall have no other rights of a limited partner.

Until a unit has been transferred on our books, we and the transfer agent may treat the record holder of the unit as the absolute owner for all purposes, except as otherwise required by law or stock exchange regulations.

Withdrawal of Limited Partners

As discussed in the LP Agreement, if the General Partner gives at least fifteen (15) days written notice to a limited partner, then the General Partner may for any reason, in its sole discretion, require any such limited partner to withdraw entirely from the partnership or to withdraw a portion of its partner capital account. If the General Partner does not give at least fifteen (15) days written notice to a limited partner, then it may only require withdrawal of all or any portion of the capital account of any limited partner in the following circumstances: (i) the unitholder made a misrepresentation to the General Partner in connection with its purchase of units; or (ii) the limited partner's ownership of units would result in the violation of any law or regulations applicable to the partnership or a partner. In these circumstances, the General Partner without notice may require the withdrawal at any time, or retroactively. The limited partner thus designated shall withdraw from the partnership or withdraw that portion of its partner capital account specified, as the case may be, as of the close of business on such date as determined by the General Partner. The limited partner thus designated shall be deemed to have withdrawn from the partnership or to have made a partial withdrawal from its partner capital account, as the case may be, without further action on the part of the limited partner and the provisions of the LP Agreement shall apply.

What is the Plan of Distribution?

Buying and Selling Units

Most investors will buy and sell units of USNG in secondary market transactions through brokers. Units will trade on the American Stock Exchange under the ticker symbol listed in this Prospectus. Units will be bought and sold throughout the trading day like other publicly traded securities. The Authorized Purchaser's function will be to maintain an orderly market in the units, including establishing the bid and ask prices on the Exchange. When buying or selling units through a broker, most investors will incur customary brokerage commissions and charges. Investors are encouraged to review the terms of their brokerage account for details on applicable charges.

Marketing Agent and Authorized Purchasers

The offering of USNG's units is a best efforts offering. USNG will continuously offer Creation Baskets consisting of 100,000 units through the Marketing Agent, to Authorized Purchasers. Merrill Lynch Professional Clearing Corp. is the initial Authorized Purchaser. The initial Authorized Purchaser will, subject to conditions, purchase the initial Creation Basket of 100,000 units at an initial offering price per unit equal to the closing price of the Benchmark Futures Contract on the last business day prior to the effective date. Authorized Purchasers will pay a \$1,000 fee for each order to create one or more Creation Baskets. The Marketing Agent will receive, for its services as marketing agent to USNG, as a marketing fee .06% on assets up to the first \$3 billion, .04% on assets in excess of \$3 billion, provided, however, that in no event may the aggregate compensation paid to the Marketing Agent and any affiliate of the General Partner for distribution-related services in connection with this offering of units exceed ten percent (10%) of the gross proceeds of this offering.

The initial Authorized Purchaser proposes to offer to the public these 100,000 units at per-unit offering prices that are expected to reflect, among other factors, the trading price of the units on the American Stock Exchange, the NAV of USNG at the time the Authorized Purchaser purchased the Creation Basket and the NAV of the units at the time of the offer of the units to the public, the supply of and demand for units at the time of sale, and the liquidity of the Futures Contract market and the market for Other Natural Gas-Related Investments and the offering prices are expected to fall between USNG's NAV and the trading price of the units on the American Stock Exchange at the time of sale. Units offered by the initial Authorized Purchaser at different times may have different offering prices. The initial Authorized Purchaser will not receive from USNG, the General Partner or any of their affiliates any fee or other compensation in connection with the sale of the units. USNG will not bear any expenses in connection with the offering or sales of the initial Creation Basket of units.

The offering of baskets is being made in compliance with Conduct Rule 2810 of the NASD. Accordingly, the initial Authorized Purchaser will not make any sales to any account over which it has discretionary authority without the prior written approval of a purchaser of units.

The per unit price of units offered in Creation Baskets on any subsequent day will be the total NAV of USNG calculated shortly after the close of the American Stock Exchange on that day divided by the number of issued and outstanding units. An Authorized Purchaser is not required to sell any specific number or dollar amount of units.

By executing an Authorized Purchaser Agreement, the Authorized Purchaser becomes part of the group of parties eligible to purchase baskets from, and put baskets for redemption to, USNG. An Authorized Purchaser is under no obligation to create or redeem baskets, and an Authorized Purchaser is under no obligation to offer to the public units of any baskets it does create.

As of the date of this Prospectus, Merrill Lynch Professional Clearing Corp. is the only Authorized Purchaser. Because new units can be created and issued on an ongoing basis, at any point during the life of USNG, a distribution, as such term is used in the 1933 Act, will be occurring. Authorized Purchasers, including the initial Authorized

Purchaser, other broker-dealers and other persons are cautioned that some of their activities may result in their being deemed participants in a distribution in a manner that would render them statutory underwriters and subject them to the prospectus-delivery and liability provisions of the 1933 Act. For example, the initial Authorized Purchaser will be a statutory underwriter with respect to its initial purchase of Creation Baskets. Authorized Purchasers will comply with the prospectus-delivery requirements in connection with the sale of units to customers. For example, an Authorized Purchaser, other broker-dealer firm or its client will be deemed a statutory underwriter if it purchases a basket from USNG, breaks the basket down into the constituent units and sells the units to its customers; or if it chooses to couple the creation of a supply of new units with an active selling effort involving

solicitation of secondary market demand for the units. Authorized Purchasers may also engage in secondary market transactions in units that would not be deemed underwriting. For example, an Authorized Purchaser may act in the capacity of a broker or dealer with respect to units that were previously distributed by other Authorized Purchasers. A determination of whether a particular market participant is an underwriter must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that would lead to designation as an underwriter and subject them to the prospectus-delivery and liability provisions of the 1933 Act.

Dealers who are neither Authorized Purchasers nor underwriters but are nonetheless participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with units that are part of an unsold allotment within the meaning of Section 4(3)(C) of the 1933 Act, would be unable to take advantage of the prospectus-delivery exemption provided by Section 4(3) of the 1933 Act.

The General Partner may qualify the units in states selected by the General Partner and intends that sales be made through broker-dealers who are members of the NASD. Investors intending to create or redeem baskets through Authorized Purchasers in transactions not involving a broker-dealer registered in such investor's state of domicile or residence should consult their legal advisor regarding applicable broker-dealer or securities regulatory requirements under the state securities laws prior to such creation or redemption.

While the Authorized Purchasers may be indemnified by the General Partner, they will not be entitled to receive a discount or commission from USNG for their purchases of Creation Baskets. The difference between the price paid by Authorized Purchasers as underwriters and the price paid to such Authorized Purchasers by investors will be deemed underwriting compensation.

Calculating NAV

USNG's NAV is calculated by:

-

Taking the current market value of its total assets

-

Subtracting any liabilities

The Administrator will calculate the NAV of USNG once each trading day. The NAV for a particular trading day will be released after 4:15 p.m. New York time. It will calculate NAV as of the earlier of the close of the New York Stock Exchange or 4:00 p.m. New York time. Trading on the American Stock Exchange typically closes at 4:15 p.m. New York time. USNG will use the New York Mercantile Exchange closing price (determined at the earlier of the close of that Exchange or 2:30 p.m. New York time) for the contracts held on the New York Mercantile Exchange, but will calculate or determine the value of all other USNG investments as of the earlier of the close of the New York Stock Exchange or 4:00 p.m. New York time.

In addition, in order to provide updated information relating to USNG for use by investors and market professionals, the American Stock Exchange will calculate and disseminate throughout the trading day an updated indicative fund value. The indicative fund value will be calculated by using the prior day's closing NAV per unit of USNG as a base and updating that value throughout the trading day to reflect changes in the most recently reported trade price for the active Futures Contract on the New York Mercantile Exchange. The prices reported for the active Futures Contract month will be adjusted based on the prior day's spread differential between settlement values for that contract and the spot month contract. In the event that the spot month contract is also the active contract, the last sale price for the

active contract will not be adjusted. The indicative fund value unit basis disseminated during American Stock Exchange trading hours should not be viewed as an actual real time update of the NAV, because NAV is calculated only once at the end of each trading day.

The indicative fund value will be disseminated on a per unit basis every 15 seconds during regular American Stock Exchange trading hours of 9:30 a.m. New York time to 4:15 p.m. New York time. The normal trading hours of the New York Mercantile Exchange are 10:00 a.m. New York time to 2:30 p.m. New York time. This means that there will be a gap in time at the beginning and the end of each day during which USNG's units will be traded on the American Stock Exchange, but real-time New York Mercantile Exchange trading prices for futures contracts traded on such Exchange will not be available. As a result, during those gaps there will be no update to the indicative fund value.

The American Stock Exchange will disseminate the indicative fund value through the facilities of CTA/CQ High Speed Lines. In addition, the indicative fund value will be published on the American Stock Exchange's website and will be available through on-line information services such as Bloomberg and Reuters.

Dissemination of the indicative fund value provides additional information that is not otherwise available to the public and is useful to investors and market professionals in connection with the trading of USNG units on the American Stock Exchange. Investors and market professionals will be able throughout the trading day to compare the market price of USNG and the indicative fund value. If the market price of USNG units diverges significantly from the indicative fund value, market professionals will have an incentive to execute arbitrage trades. For example, if USNG appears to be trading at a discount compared to the indicative fund value, a market professional could buy USNG units on the American Stock Exchange and sell short futures contracts. Such arbitrage trades can tighten the tracking between the market price of USNG and the indicative fund value and thus can be beneficial to all market participants.

In addition, other Futures Contracts, Other Natural Gas-Related Investments and Treasuries held by USNG will be valued by the Administrator, using rates and points received from client-approved third party vendors (such as Reuters and WM Company) and advisor quotes. These investments will not be included in the indicative value. The indicative fund value is based on the prior day's NAV and moves up and down according to changes in the Benchmark Futures Contracts for natural gas traded on the New York Mercantile Exchange.

Creation and Redemption of Units

USNG will create and redeem units from time to time, but only in one or more Creation Baskets or Redemption Baskets. The creation and redemption of baskets will only be made in exchange for delivery to USNG or the distribution by USNG of the amount of Treasuries and any cash represented by the baskets being created or redeemed, the amount of which will be based on the combined NAV of the number of units included in the baskets being created or redeemed determined as of 4:00 p.m. New York time on the day the order to create or redeem baskets is properly received.

Authorized Purchasers will be the only persons that may place orders to create and redeem baskets. Authorized Purchasers must be (1) registered broker-dealers or other securities market participants, such as banks and other financial institutions, that are not required to register as broker-dealers to engage in securities transactions as described below, and (2) DTC Participants. To become an Authorized Purchaser, a person must enter into an Authorized Purchaser Agreement with the General Partner. The Authorized Purchaser Agreement provides the procedures for the creation and redemption of baskets and for the delivery of the Treasuries and any cash required for such creations and redemptions. The Authorized Purchaser Agreement and the related procedures attached thereto may be amended by USNG, without the consent of any limited partner or unitholder or Authorized Purchaser. Authorized Purchasers will pay a transaction fee of \$1,000 to USNG for each order they place to create or redeem one or more baskets. Authorized Purchasers who make deposits with USNG in exchange for baskets will receive no fees, commissions or other form of compensation or inducement of any kind from either USNG or the General Partner, and no such person will have any obligation or responsibility to the General Partner or USNG to effect any sale or resale of units.

Certain Authorized Purchasers are expected to have the facility to participate directly in the physical natural gas market and the natural gas futures market. In some cases, an Authorized Purchaser or its affiliates may from time to time acquire natural gas or sell natural gas and may profit in these instances. The General Partner believes that the size and operation of the natural gas market make it unlikely that an Authorized Purchaser's direct activities in the natural gas or securities markets will impact the price of natural gas, Futures Contracts, or the price of the units.

Each Authorized Purchaser will be registered as a broker-dealer under the Exchange Act and is a member in good standing with the NASD, or will be exempt from being or otherwise will not be required to be licensed as a broker-dealer or a member of the NASD, and will be qualified to act as a broker or dealer in the states or other jurisdictions where the nature of its business so requires. Certain Authorized Purchasers may be regulated under

federal and state banking laws and regulations. Each Authorized Purchaser will have its own set of rules and procedures, internal controls and information barriers as it determines is appropriate in light of its own regulatory regime.

Under the Authorized Purchaser Agreement, the General Partner has agreed to indemnify the Authorized Purchasers against certain liabilities, including liabilities under the 1933 Act, and to contribute to the payments the Authorized Purchasers may be required to make in respect of those liabilities.

The following description of the procedures for the creation and redemption of baskets is only a summary and an investor should refer to the relevant provisions of the LP Agreement and the form of Authorized Purchaser Agreement for more detail, each of which is attached as an exhibit to the registration statement of which this Prospectus is a part. See [Where You Can Find More Information](#) for information about where you can obtain the registration statement.

Creation Procedures

On any business day, an Authorized Purchaser may place an order with the Marketing Agent to create one or more baskets. For purposes of processing purchase and redemption orders, a business day means any day other than a day when any of the American Stock Exchange, the New York Mercantile Exchange, or the New York Stock Exchange is closed for regular trading. Purchase orders must be placed by 12:00 p.m. New York time or the close of regular trading on the American Stock Exchange, whichever is earlier; except in the case of the initial Authorized Purchaser's or any other Authorized Purchaser's initial order to purchase one or more Creation Baskets on the first day the baskets are to be offered and sold, when such orders shall be placed by 9:00 a.m. New York time on the day agreed to by the General Partner and the initial Authorized Purchaser. The day on which the Marketing Agent receives a valid purchase order is the purchase order date.

By placing a purchase order, an Authorized Purchaser agrees to deposit Treasuries with USNG, or a combination of Treasuries and cash, as described below. Prior to the delivery of baskets for a purchase order, the Authorized Purchaser must also have wired to the Custodian the non-refundable transaction fee due for the purchase order. Authorized Purchasers may not withdraw a creation request.

Determination of Required Deposits

The total deposit required to create each basket (Creation Basket Deposit) will be an amount of Treasuries and/or cash that is in the same proportion to the total assets of USNG (net of estimated accrued but unpaid fees, expenses and other liabilities) on the date the order to purchase is accepted as the number of units to be created under the purchase order is in proportion to the total number of units outstanding on the date the order is received. The General Partner determines, directly in its sole discretion or in consultation with the Administrator, the requirements for Treasuries and the amount of cash, including the maximum permitted remaining maturity of a Treasury and proportions of Treasury and cash that may be included in deposits to create baskets. The Marketing Agent will publish such requirements at the beginning of each business day. The amount of cash deposit required will be the difference between the aggregate market value of the Treasuries required to be included in a Creation Basket Deposit as of 4:00 p.m. New York time on the date the order to purchase is properly received and the total required deposit.

Delivery of Required Deposits

An Authorized Purchaser who places a purchase order is responsible for transferring to USNG's account with the Custodian the required amount of Treasuries and cash by 3:00 p.m. New York time on the third business day following the purchase order date. Upon receipt of the deposit amount, the Administrator will direct DTC to credit the number of baskets ordered to the Authorized Purchaser's DTC account on the third business day following the purchase order date. The expense and risk of delivery and ownership of Treasuries until such Treasuries have been received by the Custodian on behalf of USNG shall be borne solely by the Authorized Purchaser.

Because orders to purchase baskets must be placed by 12:00 p.m., New York time (except in the case of the initial Authorized Purchaser's or any other Authorized Purchaser's initial order to purchase one or more Creation Baskets on the first day the baskets are to be offered and sold, when such orders shall be placed by 9:00 a.m. New York time on the day agreed to by the General Partner and the initial Authorized Purchaser), but the total payment required to create a basket during the continuous offering period will not be determined until 4:00 p.m., New York time, on the date the purchase order is received, Authorized Purchasers will not know the total amount of the payment required to create a basket at the time they submit an irrevocable purchase order for the basket. USNG's NAV and the total amount of the

payment required to create a basket could rise or fall substantially between the time an irrevocable purchase order is submitted and the time the amount of the purchase price in respect thereof is determined.

Rejection of Purchase Orders

The General Partner acting by itself or through the Marketing Agent may reject a purchase order or a Creation Basket Deposit if:

- it determines that the investment alternative available to USNG at that time will not enable it to meet its investment objective;
- it determines that the purchase order or the Creation Basket Deposit is not in proper form;
- it believes that the purchase order or the Creation Basket Deposit would have adverse tax consequences to USNG or its unitholders;
- the acceptance or receipt of the Creation Basket Deposit would, in the opinion of counsel to the General Partner, be unlawful; or
- circumstances outside the control of the General Partner, Marketing Agent or Custodian make it, for all practical purposes, not feasible to process creations of baskets.

None of the General Partner, Marketing Agent or Custodian will be liable for the rejection of any purchase order or Creation Basket Deposit.

Redemption Procedures

The procedures by which an Authorized Purchaser can redeem one or more baskets mirror the procedures for the creation of baskets. On any business day, an Authorized Purchaser may place an order with the Marketing Agent to redeem one or more baskets. Redemption orders must be placed by 12:00 p.m. New York time or the close of regular trading on the American Stock Exchange, whichever is earlier. A redemption order so received will be effective on the date it is received in satisfactory form by the Marketing Agent. The redemption procedures allow Authorized Purchasers to redeem baskets and do not entitle an individual unitholder to redeem any units in an amount less than a Redemption Basket, or to redeem baskets other than through an Authorized Purchaser. By placing a redemption order, an Authorized Purchaser agrees to deliver the baskets to be redeemed through DTC's book-entry system to USNG not later than 3:00 p.m. New York time on the third business day following the effective date of the redemption order. Prior to the delivery of the redemption distribution for a redemption order, the Authorized Purchaser must also have wired to USNG's account at the Custodian the non-refundable transaction fee due for the redemption order. Authorized Purchasers may not withdraw a redemption request.

Determination of Redemption Distribution

The redemption distribution from USNG will consist of a transfer to the redeeming Authorized Purchaser of an amount of Treasuries and cash that is in the same proportion to the total assets of USNG (net of estimated accrued but

unpaid fees, expenses and other liabilities) on the date the order to redeem is properly received as the number of units to be redeemed under the redemption order is in proportion to the total number of units outstanding on the date the order is received. The General Partner, directly or in consultation with the Administrator, determines the requirements for Treasuries and the amounts of cash, including the maximum permitted remaining maturity of a Treasury, and the proportions of Treasuries and cash that may be included in distributions to redeem baskets. The Marketing Agent will publish such requirements as of 4:00 p.m. New York time on the redemption order date.

Delivery of Redemption Distribution

The redemption distribution due from USNG will be delivered to the Authorized Purchaser by 3:00 p.m. New York time on the third business day following the redemption order date if, by 3:00 p.m. New York time on such third business day, USNG's DTC account has been credited with the baskets to be redeemed. If USNG's DTC account has not been credited with all of the baskets to be redeemed by such time, the redemption distribution will be delivered to the extent of whole baskets received. Any remainder of the redemption distribution will be delivered on the next business day to the extent of remaining whole baskets received if USNG receives the fee applicable to the extension of the redemption distribution date which the General Partner may, from time to time, determine and the remaining baskets to be redeemed are credited to USNG's DTC account by 3:00 p.m. New York time on such next business day. Any further outstanding amount of the redemption order shall be cancelled and the Authorized Purchaser will indemnify USNG for any losses, if any, due to such cancellation including but not limited to the difference in the price of investments sold as a result of the redemption order and investments made to reflect that

such order has been cancelled. Pursuant to information from the General Partner, the Custodian will also be authorized to deliver the redemption distribution notwithstanding that the baskets to be redeemed are not credited to USNG's DTC account by 3:00 p.m. New York time on the third business day following the redemption order date if the Authorized Purchaser has collateralized its obligation to deliver the baskets through DTC's book entry-system on such terms as the General Partner may from time to time determine.

Suspension or Rejection of Redemption Orders

The General Partner may, in its discretion, suspend the right of redemption, or postpone the redemption settlement date, (1) for any period during which the American Stock Exchange or the New York Mercantile Exchange is closed other than customary weekend or holiday closings, or trading on the American Stock Exchange or the New York Mercantile Exchange is suspended or restricted, (2) for any period during which an emergency exists as a result of which delivery, disposal or evaluation of Treasuries is not reasonably practicable, or (3) for such other period as the General Partner determines to be necessary for the protection of the limited partners. None of the General Partner, the Marketing Agent, the Administrator, or the Custodian will be liable to any person or in any way for any loss or damages that may result from any such suspension or postponement.

The General Partner will reject a redemption order if the order is not in proper form as described in the Authorized Purchaser Agreement or if the fulfillment of the order, in the opinion of its counsel, might be unlawful. The General Partner may also reject a redemption order if the number of units being redeemed would reduce the remaining outstanding units to 100,000 units (i.e., one basket) or less, unless the General Partner has reason to believe that the placer of the redemption order does in fact possess all the outstanding units and can deliver them.

Creation and Redemption Transaction Fee

To compensate USNG for its expenses in connection with the creation and redemption of baskets, an Authorized Purchaser is required to pay a transaction fee to USNG of \$1,000 per order to create or redeem baskets. An order may include multiple baskets. The transaction fee may be reduced, increased or otherwise changed by the General Partner. The General Partner shall notify DTC of any change in the transaction fee and will not implement any increase in the fee for the redemption of baskets until 30 days after the date of the notice.

Tax Responsibility

Authorized Purchasers are responsible for any transfer tax, sales or use tax, stamp tax, recording tax, value added tax or similar tax or governmental charge applicable to the creation or redemption of baskets, regardless of whether or not such tax or charge is imposed directly on the Authorized Purchaser, and agree to indemnify the General Partner and USNG if they are required by law to pay any such tax, together with any applicable penalties, additions to tax or interest thereon.

Secondary Market Transactions

As noted, USNG will create and redeem units from time to time, but only in one or more Creation Baskets or Redemption Baskets. The creation and redemption of baskets will only be made in exchange for delivery to USNG or the distribution by USNG of the amount of Treasuries and cash represented by the baskets being created or redeemed, the amount of which will be based on the aggregate NAV of the number of units included in the baskets being created or redeemed determined on the day the order to create or redeem baskets is properly received.

As discussed above, Authorized Purchasers are the only persons that may place orders to create and redeem baskets. Authorized Purchasers must be registered broker-dealers or other securities market participants, such as banks and other financial institutions that are not required to register as broker-dealers to engage in securities transactions. An Authorized Purchaser is under no obligation to create or redeem baskets, and an Authorized Purchaser is under no

obligation to offer to the public units of any baskets it does create. Authorized Purchasers that do offer to the public units from the baskets they create will do so at per-unit offering prices that are expected to reflect, among other factors, the trading price of the units on the American Stock Exchange, the NAV of USNG at the time the Authorized Purchaser purchased the Creation Baskets and the NAV at the time of the offer of the units to the public, the supply of and demand for units at the time of sale, and the liquidity of the Futures Contract market and the market for Other Natural Gas-Related Investments. The prices of units offered by Authorized Purchasers are expected to fall between USNG's NAV and the trading price of the units on the American Stock Exchange at the

time of sale. Units initially comprising the same basket but offered by Authorized Purchasers to the public at different times may have different offering prices. An order for one or more baskets may be placed by an Authorized Purchaser on behalf of multiple clients. Authorized Purchasers who make deposits with USNG in exchange for baskets receive no fees, commissions or other form of compensation or inducement of any kind from either USNG or the General Partner, and no such person has any obligation or responsibility to the General Partner or USNG to effect any sale or resale of units. Units are expected to trade in the secondary market on the American Stock Exchange. Units may trade in the secondary market at prices that are lower or higher relative to their NAV per unit. The amount of the discount or premium in the trading price relative to the NAV per unit may be influenced by various factors, including the number of investors who seek to purchase or sell units in the secondary market and the liquidity of the Futures Contracts market and the market for Other Natural Gas-Related Investments. While the units trade on the American Stock Exchange until 4:15 p.m. New York time, liquidity in the market for Futures Contracts and Other Natural Gas-Related Investments may be reduced after the close of the New York Mercantile Exchange at 2:30 p.m. New York time. As a result, during this time, trading spreads, and the resulting premium or discount, on the units may widen.

Use of Proceeds

The General Partner will initially invest all of USNG's assets in Futures Contracts and other Natural Gas-Related Investments Treasuries, cash and cash equivalents. The General Partner has sole authority to determine the percentage of assets that will be:

-

held on deposit with the futures commission merchant or other custodian,

-

used for other investments, and

-

held in bank accounts to pay current obligations and as reserves.

The General Partner expects to deposit substantially all of USNG's net assets with UBS Securities or other custodian for trading. When USNG purchases a Futures Contract and certain exchange traded Other Natural Gas-Related Investments, USNG is required to deposit with the selling futures commission merchant on behalf of the exchange a portion of the value of the contract or other interest as security to ensure payment for the obligation under natural gas interests at maturity. This deposit is known as margin. USNG will invest the remainder of its assets equal to the difference between the margin deposited and the face value of the Futures Contract in Treasuries.

The General Partner expects that all entities that will hold or trade USNG's assets will be based in the United States and will be subject to United States regulations.

The General Partner believes that 5% to 10% of USNG's assets will normally be committed as margin for commodity futures contracts. However, from time to time, the percentage of assets committed as margin may be substantially more, or less, than such range. The General Partner intends to invest the balance of USNG's assets not invested in natural gas interests or held in margin as reserves to be available for changes in margin. All interest income will be used for USNG's benefit.

The futures commission merchant, a government agency or a commodity exchange could increase margins applicable to USNG to hold trading positions at any time. Moreover, margin is merely a security deposit and has no bearing on the profit or loss potential for any positions taken.

USNG's assets will be held in segregation pursuant to the Commodity Exchange Act and CFTC regulations.

The Commodity Interest Markets

General

The Commodity Exchange Act or CEA governs the regulation of commodity interest transactions, markets and intermediaries. In December 2000, the CEA was amended by the Commodity Futures Modernization Act of 2000, or CFMA, which substantially revised the regulatory framework governing certain commodity interest transactions and the markets on which they trade. The CEA, as amended by the CFMA, now provides for varying degrees of regulation of commodity interest transactions depending upon the variables of the transaction. In general, these variables include (1) the type of instrument being traded (e.g., contracts for future delivery, options, swaps or spot contracts), (2) the type of commodity underlying the instrument (distinctions are made between instruments based on agricultural commodities, energy and metals commodities and financial commodities), (3) the nature of the

parties to the transaction (retail, eligible contract participant, or eligible commercial entity), (4) whether the transaction is entered into on a principal-to-principal or intermediated basis, (5) the type of market on which the transaction occurs, and (6) whether the transaction is subject to clearing through a clearing organization. Information regarding commodity interest transactions, markets and intermediaries, and their associated regulatory environment, is provided below.

Futures Contracts

A futures contract such as a Futures Contract is a standardized contract traded on, or subject to the rules of, an exchange that calls for the future delivery of a specified quantity and type of a commodity at a specified time and place. Futures contracts are traded on a wide variety of commodities, including agricultural products, bonds, stock indices, interest rates, currencies, energy and metals. The size and terms of futures contracts on a particular commodity are identical and are not subject to any negotiation, other than with respect to price and the number of contracts traded between the buyer and seller.

The contractual obligations of a buyer or seller may generally be satisfied by taking or making physical delivery of the underlying of commodity or by making an offsetting sale or purchase of an identical futures contract on the same or linked exchange before the designated date of delivery. The difference between the price at which the futures contract is purchased or sold and the price paid for the offsetting sale or purchase, after allowance for brokerage commissions, constitutes the profit or loss to the trader. Some futures contracts, such as stock index contracts, settle in cash (reflecting the difference between the contract purchase/sale price and the contract settlement price) rather than by delivery of the underlying commodity.

In market terminology, a trader who purchases a futures contract is long in the market and a trader who sells a futures contract is short in the market. Before a trader closes out his long or short position by an offsetting sale or purchase, his outstanding contracts are known as open trades or open positions. The aggregate amount of open positions held by traders in a particular contract is referred to as the open interest in such contract.

Forward Contracts

A forward contract is a contractual obligation to purchase or sell a specified quantity of a commodity at or before a specified date in the future at a specified price and, therefore, is economically similar to a futures contract. Unlike futures contracts, however, forward contracts are typically traded in the over-the-counter markets and are not standardized contracts. Forward contracts for a given commodity are generally available for various amounts and maturities and are subject to individual negotiation between the parties involved. Moreover, generally there is no direct means of offsetting or closing out a forward contract by taking an offsetting position as one would a futures contract on a U.S. exchange. If a trader desires to close out a forward contract position, he generally will establish an opposite position in the contract but will settle and recognize the profit or loss on both positions simultaneously on the delivery date. Thus, unlike in the futures contract market where a trader who has offset positions will recognize profit or loss immediately, in the forward market a trader with a position that has been offset at a profit will generally not receive such profit until the delivery date, and likewise a trader with a position that has been offset at a loss will generally not have to pay money until the delivery date. In recent years, however, the terms of forward contracts have become more standardized, and in some instances such contracts now provide a right of offset or cash settlement as an alternative to making or taking delivery of the underlying commodity.

The forward markets provide what has typically been a highly liquid market for foreign exchange trading, and in certain cases the prices quoted for foreign exchange forward contracts may be more favorable than the prices for foreign exchange futures contracts traded on U.S. exchanges. The forward markets are largely unregulated. Forward contracts are, in general, not cleared or guaranteed by a third party. Commercial banks participating in trading foreign exchange forward contracts often do not require margin deposits, but rely upon internal credit limitations and their judgments regarding the creditworthiness of their counterparties. In recent years, however, many over-the-counter

market participants in foreign exchange trading have begun to require that their counterparties post margin.

Further, as the result of the CFMA, over-the-counter derivative instruments such as forward contracts and swap agreements (and options on forwards and physical commodities) may begin to be traded on lightly-regulated exchanges or electronic trading platforms that may, but are not required to, provide for clearing facilities. Exchanges and electronic trading platforms on which over-the-counter instruments may be traded and the regulation and criteria for that trading are more fully described below under Futures Exchanges and Clearing Organizations.

Nonetheless, absent a clearing facility, USNG's trading in foreign exchange and other forward contracts is exposed to the creditworthiness of the counterparties on the other side of the trade.

Options on Futures Contracts

Options on futures contracts are standardized contracts traded on an exchange. An option on futures contract gives the buyer of the option the right, but not the obligation, to take a position at a specified price (the striking, strike, or exercise price) in the underlying futures contract or underlying interest. The buyer of a call option acquires the right, but not the obligation, to purchase or take a long position in the underlying interest, and the buyer of a put option acquires the right, but not the obligation, to sell or take a short position in the underlying interest.

The seller, or writer, of an option is obligated to take a position in the underlying interest at a specified price opposite to the option buyer if the option is exercised. Thus, the seller of a call option must stand ready to take a short position in the underlying interest at the strike price if the buyer should exercise the option. The seller of a put option, on the other hand, must stand ready to take a long position in the underlying interest at the strike price.

A call option is said to be in-the-money if the strike price is below current market levels and out-of-the-money if the strike price is above current market levels. Conversely, a put option is said to be in-the-money if the strike price is above the current market levels and out-of-the-money if the strike price is below current market levels.

Options have limited life spans, usually tied to the delivery or settlement date of the underlying interest. Some options, however, expire significantly in advance of such date. The purchase price of an option is referred to as its premium, which consists of its intrinsic value (which is related to the underlying market value) plus its time value. As an option nears its expiration date, the time value shrinks and the market and intrinsic values move into parity. An option that is out-of-the-money and not offset by the time it expires becomes worthless. On certain exchanges, in-the-money options are automatically exercised on their expiration date, but on others unexercised options simply become worthless after their expiration date.

Regardless of how much the market swings, the most an option buyer can lose is the option premium. The option buyer deposits his premium with his broker, and the money goes to the option seller. Option sellers, on the other hand, face risks similar to participants in the futures markets. For example, since the seller of a call option is assigned a short futures position if the option is exercised, his risk is the same as someone who initially sold a futures contract. Because no one can predict exactly how the market will move, the option seller posts margin to demonstrate his ability to meet any potential contractual obligations.

Options on Forward Contracts or Commodities

Options on forward contracts or commodities operate in a manner similar to options on futures contracts. An option on a forward contract or commodity gives the buyer of the option the right, but not the obligation, to take a position at a specified price in the underlying forward contract or commodity. However, similar to forward contracts, options on forward contracts or on commodities are individually negotiated contracts between counterparties and are typically traded in the over-the-counter market. Therefore, options on forward contracts and physical commodities possess many of the same characteristics of forward contracts with respect to offsetting positions and credit risk that are described above.

Swap Contracts

Swap transactions generally involve contracts between two parties to exchange a stream of payments computed by reference to a notional amount and the price of the asset that is the subject of the swap. Swap contracts are principally traded off-exchange, although recently, as a result of regulatory changes enacted as part of the CFMA, certain swap contracts are now being traded in electronic trading facilities and cleared through clearing organizations.

Swaps are usually entered into on a net basis, that is, the two payment streams are netted out in a cash settlement on the payment date or dates specified in the agreement, with the parties receiving or paying, as the case may be, only the net amount of the two payments. Swaps do not generally involve the delivery of underlying assets or principal. Accordingly, the risk of loss with respect to swaps is generally limited to the net amount of payments that the party is contractually obligated to make. In some swap transactions one or both parties may require collateral deposits from the counterparty to support that counterparty's obligation under the swap agreement. If the

counterparty to such a swap defaults, the risk of loss consists of the net amount of payments that the party is contractually entitled to receive less to any collateral deposits it is holding.

Participants

The two broad classes of persons who trade commodities are hedgors and speculators. Hedgors include financial institutions that manage or deal in interest rate-sensitive instruments, foreign currencies or stock portfolios, and commercial market participants, such as farmers and manufacturers, that market or process commodities. Hedging is a protective procedure designed to lock in profits that could otherwise be lost due to an adverse movement in the underlying commodity, for example, the adverse price movement between the time a merchandiser or processor enters into a contract to buy or sell a raw or processed commodity at a certain price and the time he must perform the contract. In such a case, at the time the hedgor contracts to physically sell the commodity at a future date he will simultaneously buy a futures or forward contract for the necessary equivalent quantity of the commodity. At the time for performance of the contract, the hedgor may accept delivery under his futures contract and sell the commodity quantity as required by his physical contract or he may buy the actual commodity, sell if under the physical contract and close out his position by making an offsetting sale of a futures contract.

The commodity interest markets enable the hedgor to shift the risk of price fluctuations. The usual objective of the hedgor is to protect the profit that he expects to earn from farming, merchandising, or processing operations rather than to profit from his trading. However, at times the impetus for a hedge transaction may result in part from speculative objectives.

Unlike the hedgor, the speculator generally expects neither to make nor take delivery of the underlying commodity. Instead, the speculator risks his capital with the hope of making profits from price fluctuations in the commodities. The speculator is, in effect, the risk bearer who assumes the risks that the hedgor seeks to avoid. Speculators rarely make or take delivery of the underlying commodity; rather they attempt to close out their positions prior to the delivery date. Because the speculator may take either a long or short position in commodities, it is possible for him to make profits or incur losses regardless of whether prices go up or down.

Futures Exchanges and Clearing Organizations

Futures exchanges provide centralized market facilities in which multiple persons have the ability to execute or trade contracts by accepting bids and offers from multiple participants. Futures exchanges may provide for execution of trades at a physical location utilizing trading pits and/or may provide for trading to be done electronically through computerized matching of bids and offers pursuant to various algorithms. Members of a particular exchange and the trades executed on such exchange are subject to the rules of that exchange. Futures exchanges and clearing organizations are given reasonable latitude in promulgating rules and regulations to control and regulate their members. Examples of regulations by exchanges and clearing organizations include the establishment of initial margin levels, rules regarding trading practices, contract specifications, speculative position limits, daily price fluctuation limits, and execution and clearing fees.

Clearing organizations provide services designed to mutualize or transfer the credit risk arising from the trading of contracts on an exchange or other electronic trading facility. Once trades made between members of an exchange or electronic trading facility have been confirmed, the clearing organization becomes substituted for the clearing member acting on behalf of each buyer and each seller of contracts traded on the exchange or trading platform and in effect becomes the other party to the trade. Thereafter, each clearing member party to the trade looks only to the clearing organization for performance. The clearing organization generally establishes some sort of security or guarantee fund to which all clearing members of the exchange must contribute; this fund acts as an emergency buffer that is intended to enable the clearing organization to meet its obligations with regard to the other side of an insolvent clearing member's contracts. Furthermore, the clearing organization requires margin deposits and continuously marks positions to market to provide some assurance that its members will be able to fulfill their contractual obligations. Thus, a

central function of the clearing organization is to ensure the integrity of trades, and members effecting transactions on an exchange need not concern themselves with the solvency of the party on the opposite side of the trade; their only remaining concerns are the respective solvencies of their own customers, their clearing broker and the clearing organization. The clearing organizations do not deal with customers, but only with their member firms and the guarantee of performance for open positions provided by the clearing organization does not run to customers.

U.S. Futures Exchanges

Futures exchanges in the United States are subject to varying degrees of regulation by the CFTC based on their designation as one of the following: a designated contract market, a derivatives transaction execution facility, an exempt board of trade or an electronic trading facility.

A designated contract market is the most highly regulated level of futures exchange. Designated contract markets may offer products to retail customers on an unrestricted basis. To be designated as a contract market, the exchange must demonstrate that it satisfies specified general criteria for designation, such as having the ability to prevent market manipulation, rules and procedures to ensure fair and equitable trading, position limits, dispute resolution procedures, minimization of conflicts of interest and protection of market participants. Among the principal designated contract markets in the United States are the Chicago Board of Trade, the Chicago Mercantile Exchange and the New York Mercantile Exchange. Each of the designated contract markets in the United States must provide for the clearance and settlement of transactions with a CFTC-registered derivatives clearing organization.

A derivatives transaction execution facility, or DTEF, is a new type of exchange that is subject to fewer regulatory requirements than a designated contract market but is subject to both commodity interest and participant limitations. DTEFs limit access to eligible traders that qualify as either eligible contract participants or eligible commercial entities for futures and option contracts on commodities that have a nearly inexhaustible deliverable supply, are highly unlikely to be susceptible to the threat of manipulation, or have no cash market, security futures products, and futures and option contracts on commodities that the CFTC may determine, on a case-by-case basis, are highly unlikely to be susceptible to the threat of manipulation. In addition, certain commodity interests excluded or exempt from the CEA, such as swaps, etc. may be traded on a DTEF. There is no requirement that a DTEF use a clearing organization, except with respect to trading in security futures contracts, in which case the clearing organization must be a securities clearing agency. However, if futures contracts and options on futures contracts on a DTEF are cleared, then it must be through a CFTC-registered derivatives clearing organization, except that some excluded or exempt commodities traded on a DTEF may be cleared through a clearing organization other than one registered with the CFTC.

An exempt board of trade is also a newly designated form of exchange. An exempt board of trade is substantially unregulated, subject only to CFTC anti-fraud and anti-manipulation authority. An exempt board of trade is permitted to trade futures contracts and options on futures contracts provided that the underlying commodity is not a security or securities index and has an inexhaustible deliverable supply or no cash market. All traders on an exempt board of trade must qualify as eligible contract participants. Contracts deemed eligible to be traded on an exempt board of trade include contracts on interest rates, exchange rates, currencies, credit risks or measures, debt instruments, measures of inflation, or other macroeconomic indices or measures. There is no requirement that an exempt board of trade use a clearing organization. However, if contracts on an exempt board of trade are cleared, then it must be through a CFTC-registered derivatives clearing organization. A board of trade electing to operate as an exempt board of trade must file a written notification with the CFTC.

An electronic trading facility is a new form of exchange that operates by means of an electronic or telecommunications network and maintains an automated audit trail of bids, offers, and the matching of orders or the execution of transactions on the electronic trading facility. The CEA does not apply to, and the CFTC has no jurisdiction over, transactions on an electronic trading facility in certain excluded commodities that are entered into between principals that qualify as eligible contract participants, subject only to CFTC anti-fraud and anti-manipulation authority. In general, excluded commodities include interest rates, currencies, securities, securities indices or other financial, economic or commercial indices or measures.

The General Partner intends to monitor the development of and opportunities and risks presented by the new less-regulated exchanges and exempt boards and may, in the future, allocate a percentage of USNG's assets to trading in products on these exchanges. Provided USNG maintains assets exceeding \$5 million, USNG would qualify as an eligible contract participant and thus would be able to trade on such exchanges.

Non-U.S. Futures Exchanges

Non-U.S. futures exchanges differ in certain respects from their U.S. counterparts. Importantly, non-U.S. futures exchanges are not subject to regulation by the CFTC, but rather are regulated by their home country regulator. In contrast to U.S. designated contract markets, some non-U.S. exchanges are principals markets, where

trades remain the liability of the traders involved, and the exchange or an affiliated clearing organization, if any, does not become substituted for any party. Due to the absence of a clearing system, such exchanges are significantly more susceptible to disruptions. Further, participants in such markets must often satisfy themselves as to the individual creditworthiness of each entity with which they enter into a trade. Trading on non-U.S. exchanges is often in the currency of the exchange's home jurisdiction. Consequently, USNG is subject to the additional risk of fluctuations in the exchange rate between such currencies and U.S. dollars and the possibility that exchange controls could be imposed in the future. Trading on non-U.S. exchanges may differ from trading on U.S. exchanges in a variety of ways and, accordingly, may subject USNG to additional risks.

Accountability Levels and Position Limits

The CFTC and U.S. designated contract markets have established accountability levels and position limits on the maximum net long or net short futures contracts in commodity interests that any person or group of persons under common trading control (other than a hedgor, which USNG is not) may hold, own or control. Among the purposes of accountability levels and position limits is to prevent a corner or squeeze on a market or undue influence on prices by any single trader or group of traders. The position limits currently established by the CFTC apply to certain agricultural commodity interests, such as grains (oats, barley, and flaxseed), soybeans, corn, wheat, cotton, eggs, rye, and potatoes, but not to interests in energy products. In addition, U.S. exchanges may set accountability levels and position limits for all commodity interests traded on that exchange. For example, the current accountability level for investments at any one time in natural gas Futures Contracts (including investments in the Benchmark Futures Contract) on the New York Mercantile Exchange is 12,000 contracts. The New York Mercantile Exchange also imposes position limits on contracts held in the last few days of trading in the near month contract to expire. Certain exchanges or clearing organizations also set limits on the total net positions that may be held by a clearing broker. In general, no position limits are in effect in forward or other over-the-counter contract trading or in trading on non-U.S. futures exchanges, although the principals with which USNG and the clearing brokers may trade in such markets may impose such limits as a matter of credit policy. For purposes of determining accountability levels and position limits, USNG's commodity interest positions will not be attributable to investors in their own commodity interest trading.

Daily Price Limits

Most U.S. futures exchanges (but generally not non-U.S. exchanges) limit the amount of fluctuation in some futures contract or options on futures contract prices during a single trading period by regulations. These regulations specify what are referred to as daily price fluctuation limits or more commonly, daily limits. The daily limits establish the maximum amount that the price of a futures or options on futures contract may vary either up or down from the previous day's settlement price. Once the daily limit has been reached in a particular futures or option on a futures contract, no trades may be made at a price beyond the limit. Positions in the futures or options contract may then be taken or liquidated, if at all, only at inordinate expense or if traders are willing to effect trades at or within the limit during the period for trading on such day. Because the daily limit rule governs price movement only for a particular trading day, it does not limit losses and may in fact substantially increase losses because it may prevent the liquidation of unfavorable positions. Futures contract prices have occasionally moved the daily limit for several consecutive trading days, thus preventing prompt liquidation of positions and subjecting the trader to substantial losses for those days. The concept of daily price limits is not relevant to over-the-counter contracts, including forwards and swaps, and thus such limits are not imposed by banks and others who deal in those markets.

In contrast, the New York Mercantile Exchange does not impose daily limits but rather limits the amount of price fluctuation for Futures Contracts. For example, the New York Mercantile Exchange imposes a \$3.00 per mmBtu (\$30,000 per contract) price fluctuation limit for natural gas Futures Contracts. This limit is initially based off of the previous trading day's settlement price. If any natural gas Futures Contract is traded, bid, or offered at the limit for five minutes, trading is halted for five minutes. When trading resumes it begins at the point where the limit was imposed and the limit is reset to be \$3.00 per mmBtu in either direction of that point. If another halt were triggered, the market would continue to be expanded by \$3.00 per mmBtu in either direction after each successive five-minute trading halt.

There is no maximum price fluctuation limit during any one trading session.

Commodity Prices

Commodity prices are volatile and, although ultimately determined by the interaction of supply and demand, are subject to many other influences, including the psychology of the marketplace and speculative assessments of future

world and economic events. Political climate, interest rates, treaties, balance of payments, exchange controls and other governmental interventions as well as numerous other variables affect the commodity markets, and even with comparatively complete information it is impossible for any trader to predict reliably commodity prices.

Regulation

Futures exchanges in the United States are subject to varying degrees of regulation under the CEA depending on whether such exchange is a designated contract market, DTEF, exempt board of trade or electronic trading facility. Derivatives clearing organizations are also subject to the CEA and CFTC regulation. The CFTC is the governmental agency charged with responsibility for regulation of futures exchanges and commodity interest trading conducted on those exchanges. The CFTC's function is to implement the CEA's objectives of preventing price manipulation and excessive speculation and promoting orderly and efficient commodity interest markets. In addition, the various exchanges and clearing organizations themselves exercise regulatory and supervisory authority over their member firms.

The CFTC possesses exclusive jurisdiction to regulate the activities of CPOs and commodity trading advisors and has adopted regulations with respect to the activities of those persons and/or entities. Under the CEA, a registered CPO, such as the General Partner, is required to make annual filings with the CFTC describing its organization, capital structure, management and controlling persons. In addition, the CEA authorizes the CFTC to require and review books and records of, and documents prepared by, registered CPOs. Pursuant to this authority, the CFTC requires CPOs to keep accurate, current and orderly records for each pool that they operate. The CFTC may suspend the registration of a CPO (1) if the CFTC finds that the operator's trading practices tend to disrupt orderly market conditions, (2) if any controlling person of the operator is subject to an order of the CFTC denying such person trading privileges on any exchange, and (3) in certain other circumstances. Suspension, restriction or termination of the General Partner's registration as a CPO would prevent it, until that registration were to be reinstated, from managing USNG, and might result in the termination of USNG. USNG itself is not required to be registered with the CFTC in any capacity.

The CEA gives the CFTC similar authority with respect to the activities of commodity trading advisors. If a trading advisor's commodity trading advisor registration were to be terminated, restricted or suspended, the trading advisor would be unable, until the registration were to be reinstated, to render trading advice to USNG.

The CEA requires all futures commission merchants, such as USNG's clearing brokers, to meet and maintain specified fitness and financial requirements, to segregate customer funds from proprietary funds and account separately for all customers' funds and positions, and to maintain specified books and records open to inspection by the staff of the CFTC. The CFTC has similar authority over introducing brokers, or persons who solicit or accept orders for commodity interest trades but who do not accept margin deposits for the execution of trades. The CEA authorizes the CFTC to regulate trading by futures commission merchants and by their officers and directors, permits the CFTC to require action by exchanges in the event of market emergencies, and establishes an administrative procedure under which customers may institute complaints for damages arising from alleged violations of the CEA. The CEA also gives the states powers to enforce its provisions and the regulations of the CFTC.

USNG's investors are afforded prescribed rights for reparations under the CEA. Investors may also be able to maintain a private right of action for violations of the CEA. The CFTC has adopted rules implementing the reparation provisions of the CEA, which provide that any person may file a complaint for a reparations award with the CFTC for violation of the CEA against a floor broker or a futures commission merchant, introducing broker, commodity trading advisor, CPO, and their respective associated persons.

Pursuant to authority in the CEA, the NFA has been formed and registered with the CFTC as a registered futures association. At the present time, the NFA is the only self-regulatory organization for commodity interest professionals, other than futures exchanges. The CFTC has delegated to the NFA responsibility for the registration of

commodity trading advisors, CPOs, futures commission merchants, introducing brokers, and their respective associated persons and floor brokers. The General Partner, each trading advisor, the selling agents and the clearing brokers are members of the NFA. As such, they are subject to NFA standards relating to fair trade practices, financial condition and consumer protection. USNG itself is not required to become a member of the NFA. As the self-regulatory body of the commodity interest industry, the NFA promulgates rules governing the conduct of professionals and disciplines those professionals that do not comply with these rules. The NFA also arbitrates

disputes between members and their customers and conducts registration and fitness screening of applicants for membership and audits of its existing members.

The regulations of the CFTC and the NFA prohibit any representation by a person registered with the CFTC or by any member of the NFA, that registration with the CFTC, or membership in the NFA, in any respect indicates that the CFTC or the NFA, as the case may be, has approved or endorsed that person or that person's trading program or objectives. The registrations and memberships of the parties described in this summary must not be considered as constituting any such approval or endorsement. Likewise, no futures exchange has given or will give any similar approval or endorsement.

The regulation of commodity interest trading in the United States and other countries is an evolving area of the law. The various statements made in this summary are subject to modification by legislative action and changes in the rules and regulations of the CFTC, the NFA, the futures exchanges, clearing organizations and other regulatory bodies.

The function of the CFTC is to implement the objectives of the CEA of preventing price manipulation and other disruptions to market integrity, avoiding systemic risk, preventing fraud and promoting innovation, competition and financial integrity of transactions. As mentioned above, this regulation, among other things, provides that the trading of commodity interest contracts generally must be upon exchanges designated as contract markets or DTEFs and that all trading on those exchanges must be done by or through exchange members. Under the CFMA, commodity interest trading in some commodities between sophisticated persons may be traded on a trading facility not regulated by the CFTC. As a general matter, trading in spot contracts, forward contracts, options on forward contracts or commodities, or swap contracts between eligible contract participants is not within the jurisdiction of the CFTC and may therefore be effectively unregulated. The trading advisors may engage in those transactions on behalf of USNG in reliance on this exclusion from regulation.

In general, the CFTC does not regulate the interbank and forward foreign currency markets with respect to transactions in contracts between certain sophisticated counterparties such as USNG or between certain regulated institutions and retail investors. Although U.S. banks are regulated in various ways by the Federal Reserve Board, the Comptroller of the Currency and other U.S. federal and state banking officials, banking authorities do not regulate the forward markets.

While the U.S. government does not currently impose any restrictions on the movements of currencies, it could choose to do so. The imposition or relaxation of exchange controls in various jurisdictions could significantly affect the market for that and other jurisdictions' currencies. Trading in the interbank market also exposes USNG to a risk of default since failure of a bank with which USNG had entered into a forward contract would likely result in a default and thus possibly substantial losses to USNG.

The CFTC is prohibited by statute from regulating trading on non-U.S. futures exchanges and markets. The CFTC, however, has adopted regulations relating to the marketing of non-U.S. futures contracts in the United States. These regulations permit certain contracts traded on non-U.S. exchanges to be offered and sold in the United States.

Commodity Margin

Original or initial margin is the minimum amount of funds that must be deposited by a commodity interest trader with the trader's broker to initiate and maintain an open position in futures contracts. Maintenance margin is the amount (generally less than the original margin) to which a trader's account may decline before he must deliver additional margin. A margin deposit is like a cash performance bond. It helps assure the trader's performance of the futures contracts that he purchases or sells. Futures contracts are customarily bought and sold on initial margin that represents a very small percentage (ranging upward from less than 2%) of the aggregate purchase or sales price of the contract. Because of such low margin requirements, price fluctuations occurring in the futures markets may create profits and losses that, in relation to the amount invested, are greater than are customary in other forms of investment or

speculation. As discussed below, adverse price changes in the futures contract may result in margin requirements that greatly exceed the initial margin. In addition, the amount of margin required in connection with a particular futures contract is set from time to time by the exchange on which the contract is traded and may be modified from time to time by the exchange during the term of the contract.

Brokerage firms, such as USNG's clearing brokers, carrying accounts for traders in commodity interest contracts may not accept lower, and generally require higher, amounts of margin as a matter of policy to further

protect themselves. The clearing brokers require USNG to make margin deposits equal to exchange minimum levels for all commodity interest contracts. This requirement may be altered from time to time in the clearing brokers discretion.

Trading in the over-the-counter markets where no clearing facility is provided generally does not require margin but generally does require the extension of credit between counterparties.

When a trader purchases an option, there is no margin requirement; however, the option premium must be paid in full. When a trader sells an option, on the other hand, he or she is required to deposit margin in an amount determined by the margin requirements established for the underlying interest and, in addition, an amount substantially equal to the current premium for the option. The margin requirements imposed on the selling of options, although adjusted to reflect the probability that out-of-the-money options will not be exercised, can in fact be higher than those imposed in dealing in the futures markets directly. Complicated margin requirements apply to spreads and conversions, which are complex trading strategies in which a trader acquires a mixture of options positions and positions in the underlying interest.

Margin requirements are computed each day by a trader's clearing broker. When the market value of a particular open commodity interest position changes to a point where the margin on deposit does not satisfy maintenance margin requirements, a margin call is made by the broker. If the margin call is not met within a reasonable time, the broker may close out the trader's position. With respect to USNG's trading, USNG (and not its investors personally) is subject to margin calls.

Finally, many major U.S. exchanges have passed certain cross margining arrangements involving procedures pursuant to which the futures and options positions held in an account would, in the case of some accounts, be aggregated and margin requirements would be assessed on a portfolio basis, measuring the total risk of the combined positions.

Potential Advantages of Investment

The Advantages of Non-Correlation

Given that historically, the price of natural gas and of Futures Contracts and Other Natural Gas-Related Investments has had very little correlation to the stock and bond markets, the General Partner believes that the performance of USNG should also exhibit a substantial degree of non-correlation with the performance of traditional equity and debt portfolio components, in part because of the ease of selling commodity interests short. This feature of many commodity interest contracts—being able to be long or short a commodity interest position with similar ease—means that profit and loss from commodity interest trading is not dependent upon economic prosperity or stability.

However, non-correlation will not provide any diversification advantages unless the non-correlated assets are outperforming other portfolio assets, and it is entirely possible that USNG may not outperform other sectors of an investor's portfolio, or may produce losses. Additionally, although adding USNG's units to an investor's portfolio may provide diversification, USNG is not a hedging mechanism vis-à-vis traditional debt and equity portfolio components and you should not assume that USNG units will appreciate during periods of inflation or stock and bond market declines.

Non-correlated performance should not be confused with negatively correlated performance. Negative correlation occurs when the performance of two asset classes are in opposite direction to each other. Non-correlation means only that USNG's performance will likely have little relation to the performance of equity and debt instruments, reflecting the General Partner's belief that certain factors that affect equity and debt prices may affect USNG differently and that certain factors that affect equity and debt prices may not affect USNG at all. USNG's net asset value per unit may decline or increase more or less than equity and debt instruments during both rising and falling cash markets. The General Partner does not expect that USNG's performance will be negatively correlated to general debt and equity

markets.

Interest Income

Unlike some alternative investment funds, USNG does not borrow money in order to obtain leverage, so USNG does not incur any interest expense. Rather, USNG's margin deposits are maintained in Treasuries and interest is earned on 100% of USNG's available assets, which include unrealized profits credited to USNG's accounts.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Critical Accounting Policies

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate accounting rules and guidance, as well as the use of estimates. USNG's application of these policies involves judgments and actual results may differ from the estimates used.

The General Partner has evaluated the nature and types of estimates that it will make in preparing USNG's financial statements and related disclosures once USNG commences trading operations and has determined that the valuation of its investments which are not traded on a U.S. or internationally recognized futures exchange (such as forward contracts and over-the-counter contracts) involves a critical accounting policy. While not currently applicable given the fact that USNG is not currently involved in trading activities, the values which will be used by USNG for its forward contracts will be provided by its commodity broker who will use market prices when available, while over-the-counter contracts will be valued based on the present value of estimated future cash flows that would be received from or paid to a third party in settlement of these derivative contracts prior to their delivery date and will be valued on a daily basis.

Liquidity and Capital Resources

USNG does not anticipate making use of borrowings or other lines of credit to meet its obligations. It is anticipated that USNG will meet its liquidity needs in the normal course of business from the proceeds of the sale of its investments or from cash and/or the Treasuries that it intends to hold at all times. USNG's liquidity needs include: redeeming units, providing margin deposits for its existing futures contracts or the purchase of additional oil futures contracts, posting collateral for its over-the-counter contracts and payment of its expenses, summarized below under Contractual Obligations.

USNG will generate cash primarily from (i) the sale of Creation Baskets and (ii) interest earned on cash and its investments in Treasuries. As of April 17, 2007, USNG has not begun trading activities. Once USNG begins trading activities, it is anticipated that all of its net assets will be allocated to trading in Natural Gas Interests. A significant portion of the NAV will be held in Treasuries and cash that could or will be used as margin for USNG's trading in Natural Gas Interests. The percentage that Treasuries will bear to the total net assets will vary from period to period as the market values of the Natural Gas Interests change. The balance of the net assets will be held in USNG's Futures Contracts and Other Natural Gas-Related Investments trading account. Interest earned on USNG's interest bearing-funds will be paid to USNG.

USNG's investment in Natural Gas Interests will be subject to periods of illiquidity because of market conditions, regulatory considerations and other reasons. For example, most commodity exchanges limit the fluctuations in Futures Contracts prices during a single day by regulations referred to as daily limits. During a single day, no trades may be executed at prices beyond the daily limit. Once the price of a Futures Contract has increased or decreased by an amount equal to the daily limit, positions in the contracts can neither be taken or liquidated unless the traders are willing to effect trades at or within the limit. Such market conditions could prevent USNG from promptly liquidating its positions in Futures Contracts.

Through April 10, 2006, all of USOF's and the General Partner's expenses were funded by its affiliates. Since April 10, 2006, these expenses, as well as the expenses relating to the organization and formation of USNG and its registration of units with the SEC, have largely been borne by the General Partner and its affiliates, other than USOF and USNG. Ameristock Corporation, through its parent, Wainwright Holdings, Inc. has provided funds for USOF's payment of SEC and NASD registration fees for its most recent registration statement that went effective in October of 2006. Wainwright Holdings, Inc. wholly owns both the General Partner and Ameristock Corporation. However, there is no commitment on the part of Wainwright, Ameristock Corporation or any other affiliate to continue to pay the expenses of the General Partner, nor is there any obligation or intention to reimburse any such payment or pay the expenses of USNG. To date, all of USNG's expenses, including its organization and offering

expenses relating to the initial offering of its units, have been paid by the General Partner. Fees and expenses associated with SEC registrations of units subsequent to the initial offering will be borne by USNG. In addition, fees and expenses (including directors and officers liability insurance) of the independent directors (currently estimated to be \$92,000 in 2007, though this amount may change in future years), the management fee to the General Partner, brokerage fees and licensing fees will be paid by USNG. The General Partner and USNG are unsuccessful in raising sufficient funds to cover USNG's expenses or in locating any other source of funding, USNG will terminate and investors may lose all or part of their investment.

Market Risk

Trading in Futures Contracts and Other Natural Gas-Related Investments such as forwards will involve USNG entering into contractual commitments to purchase or sell natural gas at a specified date in the future. The gross or face amount of the contracts will significantly exceed USNG's future cash requirements since USNG intends to close out its open positions prior to settlement. As a result, USNG should only be subject only to the risk of loss arising from the change in value of the contracts. USNG considers the fair value of its derivative instruments to be the unrealized gain or loss on the contracts. The market risk associated with USNG's commitments to purchase natural gas will be limited to the aggregate face amount of the contracts held. However, should USNG enter into a contractual commitment to sell natural gas, it would be required to make delivery of the natural gas at the contract price, repurchase the contract at prevailing prices or settle in cash. Since there are no limits on the future price of natural gas, the market risk to USNG could be unlimited.

USNG's exposure to market risk will depend on a number of factors including the markets for natural gas, the volatility of interest rates and foreign exchange rates, the liquidity of the Futures Contracts and Other Natural Gas-Related Investments markets and the relationships among the contracts held by USNG. The limited experience that USNG has had in utilizing its model to trade in Natural Gas Interests in a manner intended to track the changes in the spot price of natural gas, as well as drastic market occurrences, could ultimately lead to the loss of all or substantially all of an investor's capital.

Credit Risk

When USNG enters into Futures Contracts and Other Natural Gas-Related Investments, it will be exposed to the credit risk that its counterparty will not be able to meet its obligations. The counterparty for the Futures Contracts traded on the New York Mercantile Exchange and on most other foreign futures exchanges is the clearinghouse associated with the particular exchange. In general, clearinghouses are backed by their members who may be required to share in the financial burden resulting from the nonperformance of one of their members that should significantly reduce credit risk. Some foreign exchanges are not backed by their clearinghouse members but may be backed by a consortium of banks or other financial institutions. There can be no assurance that any counterparty, clearing house, or their financial backers will satisfy their obligations to USNG.

The General Partner will attempt to manage the credit risk of USNG by following various trading limitations and policies. In particular, USNG intends to post margin and/or hold liquid assets that will be approximately equal to the face amount of its obligations to counterparties under the Futures Contracts and Other Natural Gas-Related Investments it holds. The General Partner will implement procedures that will include, but will not be limited to, executing and clearing trades only with creditworthy parties and/or requiring the posting of collateral or margin by such parties for the benefit of USNG to limit its credit exposure.

USNG's commodity broker, or any other broker that may be retained by USNG in the future, when acting as USNG's futures commission merchant in accepting orders to purchase or sell Futures Contracts on United States exchanges, will be required by CFTC regulations to separately account for and segregate as belonging to USNG, all assets of USNG relating to domestic Futures Contracts trading. These commodity brokers are not allowed to commingle USNG's assets with their other assets. In addition, the CFTC requires commodity brokers to hold in a secure account

the USNG assets related to foreign Futures Contract trading.

Off Balance Sheet Financing

As of December 18, 2006, USNG has no loan guarantee, credit support or other off-balance sheet arrangements of any kind other than agreements entered into in the normal course of business, which may include indemnification provisions relating to certain risks service providers undertake in performing services which are in the best interests of USNG. While USNG's exposure under these indemnification provisions cannot be estimated, they are not expected to have a material impact on USNG's financial position.

Redemption Basket Obligation

Other than as necessary to meet its investment objective and pay its contractual obligations described below, USNG will require liquidity to redeem Redemption Baskets. USNG intends to satisfy this obligation through the transfer of its Treasuries and/or cash in an amount of proportionate to the number of units being redeemed, as described above under Determination of Redemption Distribution.

Contractual Obligations

USNG's primary contractual obligations will be with the General Partner. In return for its services, the General Partner will be entitled to a management fee calculated as a fixed percentage of USNG's NAV, currently .60% for an NAV of \$1 billion or less, and thereafter .50% of the NAV above \$1 billion. The General Partner has agreed to pay the start-up costs associated with the formation of USNG, primarily its legal, accounting and other costs in connection with its contracts with service providers and its registration with the SEC and other regulatory filings in connection with the initial public offering of the units, and the registration fees paid to the SEC, the NASD and the American Stock Exchange in connection with such offering. The General Partner has agreed to pay the fees of the Custodian and transfer agent, Brown Brothers Harriman & Co., as well as Brown Brothers Harriman & Co.'s fees for performing administrative services, including in connection with USNG's preparation of its financial statements and its SEC and CFTC reports. The General Partner will also pay the fees of USNG's accountants in connection with its SEC and CFTC reporting, as well as those of its Marketing Agent.

In addition to the General Partner's management fee, USNG pays its brokerage fees (including fees to the futures commission merchant), over-the-counter dealer spreads, any licensing fees for the use of intellectual property, registration and, subsequent to the initial offering, the fees paid to the SEC, NASD, or other regulatory agency in connection with the offer and sale of the units, as well as the legal, printing, accounting, and other expenses associated therewith, and extraordinary expenses. The latter are expenses not in the ordinary course of its business, including the indemnification of any person against liabilities and obligations to the extent permitted by law and under the LP Agreement, the bringing or defending of actions in law or in equity or otherwise conducting litigation and incurring legal expenses and the settlement of claims and litigation. Commission payments to the futures commission merchant are on a contract-by-contract, or round turn, basis.

The parties cannot anticipate the amount of payments that will be required under these arrangements for future periods as USNG's net asset values and trading levels to meet its investment objectives will not be known until a future date. These agreements are effective for a specific term agreed upon by the parties with an option to renew, or, in some cases, are in effect for the duration of USNG's existence. Either party may terminate these agreements earlier for certain reasons listed in the agreements.

Limited Partnership Agreement

The following paragraphs are a summary of certain provisions of our LP Agreement. The following discussion is qualified in its entirety by reference to our LP Agreement.

Authority of the General Partner

Our General Partner is generally authorized to perform all acts deemed necessary to carry out the purposes of the limited partnership and to conduct our business. Our partnership existence will continue into perpetuity, until terminated in accordance with our LP Agreement. Our General Partner has a power of attorney to take certain actions, including the execution and filing of documents, on our behalf and with respect to our LP Agreement. However, our partnership agreement limits the authority of our General Partner as follows:

-

Other than in connection with the issuance or redemption of units, or upon termination of the partnership as contemplated by the LP Agreement, the General Partner may not sell, exchange or otherwise dispose of all or substantially all of the partnership's assets in a single transaction or a series of related transactions (including by way of merger, consolidation or other combination with any other person) or approve on behalf of the partnership, the sale, exchange or other disposition of all or substantially all of the assets of all of the partnership, taken as a whole, without the approval of at least a majority of the limited partners; provided, however, that this provision shall not preclude or limit the General Partner's ability to mortgage, pledge, hypothecate or grant a security interest in all or substantially all of the partnership's assets and shall

not apply to any forced sale of any or all of the partnership's assets pursuant to the foreclosure of, or other realization upon, any such encumbrance.

•

The General Partner is not authorized to institute or initiate on behalf of, or otherwise cause, the partnership to (a) make a general assignment for the benefit of creditors; (b) file a voluntary bankruptcy petition; or (c) file a petition seeking for the partnership a reorganization, arrangement, composition, readjustment liquidation, dissolution or similar relief under any law.

•

The General Partner may not, without written approval of the specific act by all of the limited partners or by other written instrument executed and delivered by all of the limited partners subsequent to the date of the LP Agreement, take any action in contravention of the LP Agreement, including, without limitation, (i) any act that would make it impossible to carry on the ordinary business of the partnership, except as otherwise provided in the LP Agreement; (ii) possess partnership property, or assign any rights in specific partnership property, for other than a partnership purpose; (iii) admit a person as a partner, except as otherwise provided in the LP Agreement; (iv) amend the LP Agreement in any manner, except as otherwise provided in the LP Agreement or applicable law; or (v) transfer its interest as General Partner of the partnership, except as otherwise provided in the LP Agreement.

•

In general, unless approved by a majority of the limited partners, our General Partner shall not take any action, or refuse to take any reasonable action, the effect of which would be to cause us, to the extent it would materially and adversely affect limited partners, to be taxable as a corporation or to be treated as an association taxable as a corporation for federal income tax purposes.

Withdrawal or Removal of Our General Partner

The General Partner shall be deemed to have withdrawn from the partnership upon the occurrence of any one of the following events:

•

the General Partner voluntarily withdraws from the partnership by giving written notice to the other partners;

•

the General Partner transfers all of its rights as General Partner;

•

the General Partner is removed;

•

the General Partner (A) makes a general assignment for the benefit of creditors; (B) files a voluntary bankruptcy petition; (C) files a petition or answer seeking for itself a reorganization, arrangement, composition, readjustment liquidation, dissolution or similar relief under any law; (D) files an answer or other pleading admitting or failing to contest the material allegations of a petition filed against the General Partner in a proceeding of the type described in

clauses (A) (C) of this sentence; or (E) seeks, consents to or acquiesces in the appointment of a trustee, receiver or liquidator of the General Partner or of all or any substantial part of its properties;

•

a final and non-appealable judgment is entered by a court with appropriate jurisdiction ruling that the General Partner is bankrupt or insolvent or a final and non-appealable order for relief is entered by a court with appropriate jurisdiction against the General Partner, in each case under any federal or state bankruptcy or insolvency laws as now or hereafter in effect; or

•

a certificate of dissolution or its equivalent is filed for the General Partner, or 90 days expire after the date of notice to the General Partner of revocation of its charter without a reinstatement of its charter, under the laws of its state of incorporation.

The General Partner may be removed if such removal is approved by at least 66 2/3 % of the units (excluding for this purpose units held by the General Partner and its affiliates).

Meetings

All acts of the limited partners should be done in accordance with the Delaware Revised Uniform Limited Partnership Act (DRULPA). Upon the written request of 20% or more in interest of the limited partners, the General Partner may, but is not required to, call a meeting of the limited partners. Notice of such meeting shall be given within 30 days after, and the meeting shall be held within 60 days after, receipt of such request. The General Partner may also call a meeting not less than 20 and not more than 60 days prior to the meeting. Any such notice

shall state briefly the purpose of the meeting, which shall be held at a reasonable time and place. Any limited partner may obtain a list of names, addresses, and interests of the limited partners upon written request to the General Partner.

Limited Liability

Assuming that a limited partner does not take part in the control of our business, and that he otherwise acts in conformity with the provisions of our LP Agreement, his liability under Delaware law will be limited, subject to certain possible exceptions, generally to the amount of capital he is obligated to contribute to us in respect of his units or other limited partner interests plus his share of any of our undistributed profits and assets. In light of the fact that a limited partner's liability may extend beyond his capital contributions, a limited partner may lose more money than he contributed.

Under Delaware law, a limited partner might be held liable for USNG's obligations as if it were a General Partner if the limited partner participates in the control of the partnership's business and the persons who transact business with the partnership think the limited partner is the General Partner.

Under the LP Agreement, a limited partner will not be liable for assessments in addition to its initial capital investment in any of USNG's capital securities representing limited partnership interests. However, a limited partner still may be required to repay to USNG any amounts wrongfully returned or distributed to it under some circumstances. Under Delaware law, USNG may not make a distribution to limited partners if the distribution causes USNG's liabilities (other than liabilities to partners on account of their partnership interests and nonrecourse liabilities) to exceed the fair value of USNG's assets. Delaware law provides that a limited partner who receives such a distribution and knew at the time of the distribution that the distribution violated the law will be liable to the limited partnership for the amount of the distribution for three years from the date of the distribution.

Fees of USNG

Management Fees

	Management
\$1,000,000,000	0.60% of NAV
the first \$1,000,000,000	0.50% of NAV

Fees are calculated on a daily basis (accrued at 1/365 of the applicable percentage of NAV on that day) and paid on a monthly basis. NAV is calculated by taking the current market value of USNG's total assets and subtracting any liabilities.

Brokerage Fees

Brokerage fees

0.13%

Fees are calculated on a daily basis (based on a percentage of the value of the transaction) and paid on a monthly basis. These fees, including the brokerage fee for Futures Contracts based upon the futures commission merchant's fees shown below, are estimated on an annualized percentage basis.

Futures Commission Merchant Fee

Edgar Filing: United States Natural Gas Fund, LP - Form 424B3

Futures Commission Merchant
fee

\$ 4.00 per buy or
sell

Fees are calculated on a daily basis for each buy or sell and paid on a monthly basis. These are the bases for and not in addition to the brokerage fee for Futures Contracts included in the brokerage fees shown above.

New York Mercantile Exchange Licensing Fee

Assets	Management Fee
First \$1,000,000,000	0.04% of NAV
After the first \$1,000,000,000	0.02% of NAV
Assets of USNG are aggregated with those of USOF. USNG pays this fee.	

Fees are calculated on a daily basis (accrued at 1/365 of the applicable percentage of NAV on that day) and paid on a monthly basis.

The General Partner Has Conflicts of Interest

There are present and potential future conflicts of interest in USNG's structure and operation you should consider before you purchase units. The General Partner will use this notice of conflicts as a defense against any claim or other proceeding made.

The General Partner's officers, directors and employees, do not devote their time exclusively to USNG. These persons are directors, officers or employees of other entities which may compete with USNG for their services. They could have a conflict between their responsibilities to USNG and to those other entities. The General Partner believes that it has sufficient personnel, time, and working capital to discharge its responsibilities in a fair manner and that these persons' conflicts should not impair their ability to provide services to USNG.

The General Partner and the General Partner's principals, officers, directors and employees may trade futures and related contracts for their own account. Limited partners and other unitholders will not be permitted to inspect the trading records or any written policies related to such trading of the General Partner and its principals, officers, directors, and employees. A conflict of interest may exist if their trades are in the same markets and at the same time as USNG trades using the clearing broker to be used by USNG. A potential conflict also may occur when the General Partner's principals trade their accounts more aggressively or take positions in their accounts which are opposite, or ahead of, the positions taken by USNG. The General Partner will adopt a Code of Ethics to ensure that the officers, directors, and employees of the General Partner and its affiliates do not engage in trades that will harm the fund or the unitholders.

The General Partner has sole current authority to manage the investments and operations of USNG, and this may allow it to act in a way that furthers its own interests which may create a conflict with your best interests. Limited partners have limited voting control, which will limit their ability to influence matters such as amendment of the LP Agreement, change in USNG's basic investment policy, dissolution of this fund, or the sale or distribution of USNG's assets.

The General Partner serves as the general partner to both USNG and USOF. The General Partner may have a conflict to the extent that its trading decisions may be influenced by the effect they would have on USOF. In addition, the General Partner is required to indemnify the officers and directors of USOF, if the need for indemnification arises. This potential indemnification will cause the General Partner's assets to decrease. If the General Partner's other sources of income are not sufficient to compensate for the indemnification, then the General Partner may terminate and you could lose your investment.

No Resolution of Conflicts Procedures

Whenever a conflict of interest exists or arises between the General Partner on the one hand, and the partnership or any limited partner, on the other hand, any resolution or course of action by the General Partner in respect of such conflict of interest shall be permitted and deemed approved by all partners and shall not constitute a breach of the LP Agreement or of any agreement contemplated hereby or of a duty stated or implied by law or equity, if the resolution or course of action is, or by operation of the LP Agreement is deemed to be, fair and reasonable to the partnership. If a dispute arises, under the LP Agreement it will be resolved either through negotiations with the General Partner or by courts located in the State of Delaware.

Under the LP Agreement, any resolution is deemed to be fair and reasonable to the partnership if the resolution is:

- approved by the audit committee, although no party is obligated to seek approval and the General Partner may adopt a resolution or course of action that has not received approval;

- on terms no less favorable to the limited partners than those generally being provided to or available from unrelated third parties; or

- fair to the limited partners, taking into account the totality of the relationships of the parties involved including other transactions that may be particularly favorable or advantageous to the limited partners.

The previous risk factors and conflicts of interest are complete as of the date of this prospectus; however, additional risks and conflicts may occur which are not presently foreseen by the General Partner. You may not construe this Prospectus as legal or tax advice. Before making an investment in this fund, you should read this entire Prospectus, including the LP Agreement (Appendix B). You should also consult with your personal legal, tax, and other professional advisors.

Interests of Named Experts and Counsel

The General Partner has employed Sutherland Asbill & Brennan LLP to prepare this Prospectus. Neither the law firm nor any other expert hired by USNG to give advice on the preparation of this offering document has been hired on a contingent fee basis. Nor do any of them have any present or future expectation of interest in the General Partner, Marketing Agent, Authorized Purchasers, Custodian, Administrator or other service providers to USNG.

The General Partner's Responsibility and Remedies

Pursuant to the DRULPA, parties may contractually modify or even eliminate fiduciary duties in a partnership agreement to the limited partnership itself, or to another partner or person otherwise bound by the partnership agreement. Parties may not, however, eliminate the implied covenant of good faith and fair dealing. Where parties unambiguously provide for fiduciary duties in a partnership agreement, those expressed duties become the standard courts will use to determine whether such duties were breached. For this reason, USNG's limited partnership agreement does not explicitly provide for any fiduciary duties so that common law fiduciary duty principles will apply to measure the General Partner's conduct.

A prospective investor should be aware that the General Partner has a responsibility to limited partners of USNG to exercise good faith and fairness in all dealings. The fiduciary responsibility of a general partner to limited partners is a developing and changing area of the law and limited partners who have questions concerning the duties of the General Partner should consult with their counsel. In the event that a limited partner of USNG believes that the General Partner has violated its fiduciary duty to the limited partners, he may seek legal relief individually or on behalf of USNG under applicable laws, including under DRULPA and under commodities laws, to recover damages from or require an accounting by the General Partner. Limited partners may also have the right, subject to applicable procedural and jurisdictional requirements, to bring class actions in federal court to enforce their rights under the federal securities laws and the rules and regulations promulgated thereunder by the SEC. Limited partners who have suffered losses in connection with the purchase or sale of the units may be able to recover such losses from the General Partner where the losses result from a violation by the General Partner of the federal securities laws. State securities laws may also provide certain remedies to limited partners. Limited partners should be aware that performance by the General Partner of its fiduciary duty to is measured by the terms of the LP Agreement as well as

applicable law. Limited partners are afforded certain rights to institute reparations proceedings under the Commodity Exchange Act for violations of the Commodity Exchange Act or of any rule, regulation or order of the CFTC by the General Partner.

Liability and Indemnification

Under the LP Agreement, neither a General Partner nor any employee or other agent of USNG nor any officer, director, stockholder, partner, employee or agent of a General Partner (a Protected Person) shall be liable to any partner or USNG for any mistake of judgment or for any action or inaction taken, nor for any losses due to any mistake of judgment or to any action or inaction or to the negligence, dishonesty or bad faith of any officer, director, stockholder, partner, employee, agent of USNG or any officer, director, stockholder, partner, employee or agent of such General Partner, provided that such officer, director, stockholder, partner, employee, or agent of the partner or officer, director, stockholder, partner, employee or agent of such General Partner was selected, engaged or retained by such General Partner with reasonable care, except with respect to any matter as to which such General Partner

shall have been finally adjudicated in any action, suit or other proceeding not to have acted in good faith in the reasonable belief that such Protected Person's actions were in the best interests of USNG and except that no Protected Person shall be relieved of any liability to which such Protected Person would otherwise be subject by reason of willful misfeasance, gross negligence or reckless disregard of the duties involved in the conduct of the Protected Person's office.

USNG shall, to the fullest extent permitted by law, but only out of USNG assets, indemnify and hold harmless a General Partner and each officer, director, stockholder, partner, employee or agent thereof (including persons who serve at USNG's request as directors, officers or trustees of another organization in which USNG has an interest as a unitholder, creditor or otherwise) and their respective Legal Representatives and successors (hereinafter referred to as a *Covered Person*) against all liabilities and expenses, including but not limited to amounts paid in satisfaction of judgments, in compromise or as fines and penalties, and counsel fees reasonably incurred by any Covered Person in connection with the defense or disposition of any action, suit or other proceedings, whether civil or criminal, before any court or administrative or legislative body, in which such Covered Person may be or may have been involved as a party or otherwise or with which such person may be or may have been threatened, while in office or thereafter, by reason of an alleged act or omission as a General Partner or director or officer thereof, or by reason of its being or having been such a General Partner, director or officer, except with respect to any matter as to which such Covered Person shall have been finally adjudicated in any such action, suit or other proceeding not to have acted in good faith in the reasonable belief that such Covered Person's action was in the best interest of USNG, and except that no Covered Person shall be indemnified against any liability to USNG or limited partners to which such Covered Person would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of such Covered Person's office. Expenses, including counsel fees so incurred by any such Covered Person, may be paid from time to time by USNG in advance of the final disposition of any such action, suit or proceeding on the condition that the amounts so paid shall be repaid to USNG if it is ultimately determined that the indemnification of such expenses is not authorized hereunder.

Provisions of Law

According to applicable law, indemnification of the General Partner is payable only if the General Partner determined, in good faith, that the act, omission or conduct that gave rise to the claim for indemnification was in the best interest of USNG and the act, omission or activity that was the basis for such loss, liability, damage, cost or expense was not the result of negligence or misconduct and such liability or loss was not the result of negligence or misconduct by the General Partner, and such indemnification or agreement to hold harmless is recoverable only out of the assets of USNG and not from the members, individually.

Provisions of Federal and State Securities Laws

This offering is made pursuant to federal and state securities laws. If any indemnification of the General Partner arises out of an alleged violation of such laws, it is subject to certain legal conditions.

Those conditions require that no indemnification may be made in respect of any losses, liabilities or expenses arising from or out of an alleged violation of federal or state securities laws unless: there has been a successful adjudication on the merits of each count involving alleged securities law violations as to the General Partner or other particular indemnitee, or such claim has been dismissed with prejudice on the merits by a court of competent jurisdiction as to the General Partner or other particular indemnitee, or a court of competent jurisdiction approves a settlement of the claims against the General Partner or other agent of USNG and finds that indemnification of the settlement and related costs should be made, provided, before seeking such approval, the General Partner or other indemnitee must apprise the court of the position held by regulatory agencies against such indemnification. These agencies are the SEC and the securities administrator of the State or States in which the plaintiffs claim they were offered or sold membership interests.

Provisions of the Securities Act of 1933 and NASAA Guidelines

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to the General Partner or its directors, officers, or persons controlling USNG, USNG has been informed that SEC and the various State administrators believe that such indemnification is against public policy as expressed in the Securities Act of 1933 and the North American Securities Administrators Association, Inc. (NASAA) commodity pool guidelines and is therefore unenforceable.

Books and Records

USNG will keep its books of record and account at its office located at 1320 Harbor Bay Parkway, Suite 145, Alameda, California 94502 or such office, including of an administrative agent, as it may subsequently designate upon notice. These books and records are open to inspection by any person who establishes to USNG's satisfaction that such person is a limited partner upon reasonable advance notice at all reasonable times during the usual business hours of USNG.

USNG will keep a copy of USNG's LP Agreement on file in its office which will be available for inspection on reasonable advance notice at all reasonable times during its usual business hours by any limited partner.

Analysis of Critical Accounting Policies

USNG's critical accounting policies are set forth in the financial statements in this Prospectus prepared in accordance with accounting principles generally accepted in the United States of America, which require the use of certain accounting policies that affect the amounts reported in these financial statements, including the following: USNG trades are accounted for on a trade-date basis and marked to market on a daily basis. The difference between their cost and market value is recorded as change in unrealized profit/loss for open (unrealized) contracts, and recorded as realized profit/loss when open positions are closed out; the sum of these amounts constitutes USNG's trading revenues. Earned interest income revenue, as well as management fee, and brokerage fee expenses of USNG are recorded on an accrual basis. The General Partner believes that all relevant accounting assumptions and policies have been considered.

Statements, Filings, and Reports

At the end of each fiscal year, USNG will furnish to DTC Participants for distribution to each person who is a unitholder at the end of the fiscal year an annual report containing USNG's audited financial statements and other information about USNG. The General Partner is responsible for the registration and qualification of the units under the federal securities laws and federal commodities laws and any other securities and blue sky laws of the United States or any other jurisdiction as the General Partner may select. The General Partner is responsible for preparing all reports required by the SEC and the CFTC, but has entered into an agreement with the Administrator to prepare these reports as required by the SEC, CFTC and the American Stock Exchange on USNG's behalf.

The financial statements of USNG will be audited, as required by law and as may be directed by the General Partner, by an independent registered public accounting firm designated from time to time by the General Partner. The accountants report will be furnished by USNG to unitholders upon request. USNG will make such elections, file such tax returns, and prepare, disseminate and file such tax reports, as it is advised by its counsel or accountants are from time to time required by any applicable statute, rule or regulation.

Reports to Limited Partners

As provided in the LP Agreement, the following reports will be provided to limited partners:

Annual Reports. Within 90 days after the end of each fiscal year, the General Partner shall cause to be delivered to each limited partner who was a limited partner at any time during the fiscal year, an annual report containing the following:

(i) financial statements of the partnership, including, without limitation, a balance sheet as of the end of the partnership's fiscal year and statements of income, partners' equity and changes in financial position, for such fiscal year, which shall be prepared in accordance with accounting principles generally accepted in the United States of America consistently applied and shall be audited by a firm of independent certified public accountants registered

with the Public Company Accounting Oversight Board,

(ii) a general description of the activities of the partnership during the period covered by the report, and

(iii) a report of any material transactions between the partnership and the General Partner or any of its affiliates, including fees or compensation paid by the partnership and the services performed by the General Partner or any such affiliate for such fees or compensation.

Quarterly Reports. Within 45 days after the end of each quarter of each fiscal year, the General Partner shall cause to be delivered to each limited partner who was a limited partner at any time during the quarter then ended, a quarterly report containing a balance sheet and statement of income for the period covered by the report, each of which may be unaudited but shall be certified by the General Partner as fairly presenting the financial position and results of operations of the partnership during the period covered by the report. The report shall also contain a description of any material event regarding the business of the partnership during the period covered by the report.

Monthly Reports. Within 30 days after the after the end of each month, the General Partner shall cause to be delivered to each limited partner who was a limited partner at any time during the month then ended, a monthly report containing an account statement, which will include a statement of income (loss) and a statement of changes in NAV, for the prescribed period. In addition, the account statement will disclose any material business dealings between the partnership, General Partner, commodity trading advisor (if any), futures commission merchant, or the principals thereof that previously have not been disclosed in the this Prospectus or any amendment thereto, other account statements or annual reports.

USNG will provide information to its unitholders to the extent required by applicable SEC, CFTC, and American Stock Exchange requirements. An issuer, such as USNG, of exchange-traded securities may not always readily know the identities of the investors who own those securities. USNG will post the same information that would otherwise be provided in USNG's reports to limited partners described above including its monthly account statements, which will include, without limitation, USNG's NAV, on USNG's website www.unitedstatesnaturalgasfund.com.

Fiscal Year

The fiscal year of USNG will initially be the calendar year. The General Partner may select an alternate fiscal year.

Governing Law; Consent To Delaware Jurisdiction

The rights of the General Partner, USNG, DTC (as registered owner of USNG's global certificate for units) and the unitholders, are governed by the laws of the State of Delaware. The General Partner, USNG and DTC and, by accepting units, each DTC Participant and each unitholder, consent to the jurisdiction of the courts of the State of Delaware and any federal courts located in Delaware. Such consent is not required for any person to assert a claim of Delaware jurisdiction over the General Partner or USNG.

Legal Matters

Litigation and Claims

Within the past 5 years of the date of this Prospectus, there have been no material administrative, civil or criminal actions against the General Partner, underwriter, or any principal or affiliate of either of them. This includes any actions pending, on appeal, concluded, threatened, or otherwise known to them.

Legal Opinion

Sutherland Asbill & Brennan LLP is counsel to advise USNG and the General Partner with respect to the preparation of units being offered hereby and will pass upon the validity of the units being issued hereunder. Sutherland Asbill & Brennan LLP has also provided the General Partner with its opinion with respect to federal income tax matters addressed herein.

Experts

The General Partner engaged an independent registered public accounting firm to audit USNG. Spicer Jeffries, LLP, an independent registered public accounting firm, has audited the financial statements of United States Natural Gas Fund, LP, at December 31, 2006 appearing in this Prospectus and in the registration statement and have been included herein in reliance upon the report of March 5, 2007 given on its authority of such firm as experts in accounting and auditing.

Privacy Policy

USNG and the General Partner collect certain nonpublic personal information about investors from the information provided by them in certain documents, as well as in the course of processing transaction requests. None of this information is disclosed except as necessary in the course of processing creations and redemptions and otherwise administering USNG and then only subject to customary undertakings of confidentiality. USNG and the General Partner do not disclose nonpublic personal information about investors to anyone, except as required by law. USNG and the General Partner restrict access to the nonpublic personal information they collect from investors to those employees who need access to this information to provide products and services to investors. USNG and the General Partner each maintain physical, electronic and procedural controls to safeguard this information. These standards are reasonably designed to (1) ensure the security and confidentiality of investors' records and information, (2) protect against any anticipated threats or hazards to the security or integrity of investors' records and information, and (3) protect against unauthorized access to or use of investors' records or information that could result in substantial harm or inconvenience to any investor.

U.S. Federal Income Tax Considerations

The following discussion summarizes the material U.S. federal income tax consequences of the purchase, ownership and disposition of units in USNG, and the U.S. federal income tax treatment of USNG, as of the date hereof. This discussion is applicable to a beneficial owner of units who purchases units in the offering to which this Prospectus relates, including a beneficial owner who purchases units from an Authorized Purchaser. Except where noted otherwise, it deals only with units held as capital assets and does not deal with special situations, such as those of dealers in securities or currencies, financial institutions, tax-exempt entities, insurance companies, persons holding units as a part of a position in a straddle or as part of a hedging, conversion or other integrated transaction for federal income tax purposes, traders in securities or commodities that elect to use a mark-to-market method of accounting, or holders of units whose functional currency is not the U.S. dollar. Furthermore, the discussion below is based upon the provisions of the Internal Revenue Code of 1986, as amended (the Code), and regulations (Treasury Regulations), rulings and judicial decisions thereunder as of the date hereof, and such authorities may be repealed, revoked or modified so as to result in U.S. federal income tax consequences different from those discussed below.

Persons considering the purchase, ownership or disposition of units should consult their own tax advisors concerning the United States federal income tax consequences in light of their particular situations as well as any consequences arising under the laws of any other taxing jurisdiction. As used herein, a U.S. unitholder of a unit means a beneficial owner of a unit that is, for United States federal income tax purposes, (i) a citizen or resident of the United States, (ii) a corporation or partnership created or organized in or under the laws of the United States or any political subdivision thereof, (iii) an estate the income of which is subject to United States federal income taxation regardless of its source or (iv) a trust (X) that is subject to the supervision of a court within the United States and the control of one or more United States persons as described in section 7701(a)(30) of the Code or (Y) that has a valid election in effect under applicable Treasury Regulations to be treated as a United States person. A Non-U.S. unitholder is a holder that is not a U.S. unitholder. If a partnership holds our units, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding our units, you should consult your own tax advisor regarding the tax consequences.

The General Partner of USNG has received the opinion of Sutherland Asbill & Brennan LLP, counsel to USNG, that the material U.S. federal income tax consequences to USNG and to U.S. unitholders and Non-U.S. unitholders will be as described below. In rendering its opinion, Sutherland Asbill & Brennan LLP has relied on the facts described in this Prospectus as well as certain factual representations made by USNG and the General Partner. The opinion of Sutherland Asbill & Brennan LLP is not binding on the Internal Revenue Service (IRS), and as a result, the IRS may not agree with the tax positions taken by USNG. If challenged by the IRS, USNG's tax positions might not be sustained by the courts. No ruling has been requested from the IRS with respect to any matter affecting USNG or prospective investors.

EACH PROSPECTIVE INVESTOR IS ADVISED TO CONSULT ITS OWN TAX ADVISOR AS TO HOW THE U.S. FEDERAL INCOME TAX CONSEQUENCES OF AN INVESTMENT IN USNG APPLY TO YOU AND AS TO HOW THE APPLICABLE STATE, LOCAL OR FOREIGN TAXES APPLY TO YOU.

Tax Status of USNG

USNG is organized and will be operated as a limited partnership in accordance with the provisions of the LP Agreement and applicable state law. Under the Code, an entity classified as a partnership that is deemed to be a publicly traded partnership is generally taxable as a corporation for federal income tax purposes. The Code provides an exception to this general rule for a publicly traded partnership whose gross income for each taxable year of its existence consists of at least 90% qualifying income (qualifying income exception). For this purpose, section 7704 defines qualifying income as including, in pertinent part, interest (other than from a financial business), dividends and gains from the sale or disposition of capital assets held for the production of interest or dividends. In addition, in the case of a partnership a principal activity of which is the buying and selling of commodities (other than as inventory) or of futures, forwards and options with respect to commodities, qualifying income includes income and gains from such commodities and futures, forwards and options with respect to commodities. USNG and the General Partner have represented the following to Sutherland Asbill & Brennan LLP:

-

At least 90% of USNG's gross income for each taxable year will constitute qualifying income within the meaning of Code section 7704 (as described above);

-

USNG will be organized and operated in accordance with its governing agreements and applicable law;

-

USNG has not elected, and will not elect, to be classified as a corporation for U.S. federal income tax purposes.

Based in part on these representations, Sutherland Asbill & Brennan LLP is of the opinion that USNG will be classified as a partnership for federal income tax purposes and that it will not be taxable as a corporation for such purposes.

If USNG failed to satisfy the qualifying income exception in any year, other than a failure that is determined by the IRS to be inadvertent and that is cured within a reasonable time after discovery, USNG would be taxable as a corporation for federal income tax purposes and would pay federal income tax on its income at regular corporate rates. In that event, unitholders would not report their share of USNG's income or loss on their returns. In addition, distributions to unitholders would be treated as dividends to the extent of USNG's current and accumulated earnings and profits. To the extent a distribution exceeded USNG's earnings and profits, the distribution would be treated as a return of capital to the extent of a unitholder's basis in its units, and thereafter as gain from the sale of units. Accordingly, if USNG were to be taxable as a corporation, it would likely have a material adverse effect on the economic return from an investment in USNG and on the value of the units.

The remainder of this summary assumes that USNG will be classified as a partnership for federal income tax purposes and that it will not be taxable as a corporation.

U.S. Unitholders

Tax Consequences of Ownership of Units

Taxation of USNG's Income. No U.S. federal income tax will be paid by USNG on its income. Instead, USNG will file annual information returns, and each U.S. unitholder will be required to report on its U.S. federal income tax return its allocable share of the income, gain, loss and deduction of USNG. For example, unitholders will take into

account their share of ordinary income realized by USNG from accruals of interest on Treasuries and other investments, and their share of gain from Futures Contracts and Other Natural Gas-Related Investments. These items must be reported without regard to the amount (if any) of cash or property the unitholder receives as a distribution from USNG during the taxable year. Consequently, a unitholder may be allocated income or gain by USNG but receive no cash distribution with which to pay its tax liability resulting from the allocation, or may receive a distribution that is insufficient to pay such liability. Because the General Partner currently does not intend to make distributions, it is likely that in any year USNG realizes net income and/or gain that a U.S. unitholder will be required to pay taxes on its allocable share of such income or gain from sources other than USNG distributions.

Allocations of USNG's Profit and Loss. Under Code section 704, the determination of a partner's distributive share of any item of income, gain, loss, deduction or credit is governed by the applicable organizational document unless the allocation provided by such document lacks substantial economic effect. An allocation that lacks substantial economic effect nonetheless will be respected if it is in accordance with the partners' interests in the

partnership, determined by taking into account all facts and circumstances relating to the economic arrangements among the partners.

In general, USNG will apply a monthly closing-of-the-books convention in determining allocations of economic profit or loss to unitholders. Income, gain, loss and deduction will be determined on a monthly mark-to-market basis, taking into account our accrued income and deductions and realized and unrealized gains and losses for the month. These items will be allocated among the holders of units in proportion to the number of units owned by them as of the close of business on the last business day of the month. Items of taxable income, deduction, gain, loss and credit recognized by USNG for federal income tax purposes for any taxable year will be allocated among holders in a manner that equitably reflects the allocation of economic profit or loss. USNG intends to make the election permitted by section 754 of the Code, which election will be irrevocable without the consent of the Service. The effect of this election will be that when a secondary market sale of our units occur, we will adjust the purchaser's proportionate share of the tax basis of our assets to fair market value, as reflected in the price paid for the units, as if the purchaser had directly acquired an interest in our assets. The section 754 election is intended to eliminate disparities between a partner's basis in its partnership interest and its share of the tax bases of the partnership's assets, so that the partner's allocable share of taxable gain or loss on a disposition of an asset will correspond to its share of the appreciation or depreciation in the value of the asset since it acquired its interest. Depending on the price paid for units and the tax bases of USNG's assets at the time of the purchase, the effect of the section 754 election on a purchaser of units may be favorable or unfavorable.

USNG will apply certain assumptions and conventions in determining and allocating items for tax purposes in order to reduce the complexity and costs of administration. The General Partner believes that application of these assumptions and conventions will be consistent with the intent of the partnership provisions of the Code, and that the resulting allocations will have substantial economic effect or otherwise will be respected as being in accordance with unitholders' interests in USNG for federal income tax purposes. However, the Code and Treasury Regulations do not expressly permit adoption of these assumptions and conventions, and Sutherland Asbill & Brennan LLP is therefore unable to opine on the validity of our allocation method. It is possible that the IRS could successfully challenge this method and require a unitholder to report a greater or lesser share of items of income, gain, loss, deduction, or credit than if our method were respected. The General Partner is authorized to revise our allocation method to conform to any method permitted under future Treasury Regulations.

The assumptions and conventions used in making tax allocations may cause a unitholder to be allocated more or less income or loss for federal income tax purposes than its proportionate share of the economic income or loss realized by USNG during the period it held its units. This mismatch between taxable and economic income or loss in some cases may be temporary, reversing itself in a later year when the units are sold, but could be permanent. For example, a unitholder could be allocated income accruing before it purchased its units, resulting in an increase in the basis of the units (see *Tax basis in units*, below). On a subsequent disposition of the units, the additional basis might produce a capital loss the deduction of which may be limited (see *Limitations on Deductibility of Losses and Certain Expenses*, below).

Mark to Market of Certain Exchange-Traded Contracts. For federal income tax purposes, USNG generally will be required to use a mark-to-market method of accounting under which unrealized gains and losses on instruments constituting section 1256 contracts are recognized currently. A section 1256 contract is defined as: (1) a futures contract that is traded on or subject to the rules of a national securities exchange which is registered with the SEC, a domestic board of trade designated as a contract market by the CFTC, or any other board of trade or exchange designated by the Secretary of the Treasury, and with respect to which the amount required to be deposited and the amount that may be withdrawn depends on a system of marking to market; (2) a forward contract on exchange-traded foreign currencies, where the contracts are traded in the interbank market; (3) a non-equity option traded on or subject to the rules of a qualified board or exchange; (4) a dealer equity option; or (5) a dealer securities futures contract.

Under these rules, section 1256 contracts held by USNG at the end of each taxable year, including for example Futures Contracts and options on Futures Contracts traded on a U.S. exchange or board of trade or certain foreign exchanges, will be treated as if they were sold by USNG for their fair market value on the last business day of the taxable year. A unitholder's distributive share of USNG's net gain or loss with respect to each section 1256 contract generally will be treated as long-term capital gain or loss to the extent of 60 percent thereof, and as short-term capital gain or loss to the extent of 40 percent thereof, without regard to the actual holding period.

Limitations on Deductibility of Losses and Certain Expenses. A number of different provisions of the Code may defer or disallow the deduction of losses or expenses allocated to you by USNG, including but not limited to those described below.

A unitholder's deduction of its allocable share of any loss of USNG will be limited to the lesser of (1) the tax basis in its units or (2) in the case of a unitholder that is an individual or a closely held corporation, the amount which the unitholder is considered to have at risk with respect to our activities. In general, the amount at risk will be your invested capital plus your share of any recourse debt of USNG for which you are liable. Losses in excess of the amount at risk must be deferred until years in which USNG generates additional taxable income against which to offset such carryover losses or until additional capital is placed at risk.

Noncorporate taxpayers are permitted to deduct capital losses only to the extent of their capital gains for the taxable year plus \$3,000 of other income. Unused capital losses can be carried forward and used to offset capital gains in future years. In addition, a noncorporate taxpayer may elect to carry back net losses on section 1256 contracts to each of the three preceding years and use them to offset section 1256 contract gains in those years, subject to certain limitations. Corporate taxpayers generally may deduct capital losses only to the extent of capital gains, subject to special carryback and carryforward rules.

Otherwise deductible expenses incurred by noncorporate taxpayers constituting miscellaneous itemized deductions, generally including investment-related expenses (other than interest and certain other specified expenses), are deductible only to the extent they exceed 2 percent of the taxpayer's adjusted gross income for the year. Although the matter is not free from doubt, we believe management fees we pay to the General Partner and other expenses we incur will constitute investment-related expenses subject to the miscellaneous itemized deduction limitation, rather than expenses incurred in connection with a trade or business.

Noncorporate unitholders generally may deduct investment interest expense only to the extent of their net investment income. Investment interest expense of a unitholder will generally include any interest accrued by USNG and any interest paid or accrued on direct borrowings by a unitholder to purchase or carry its units, such as interest with respect to a margin account. Net investment income generally includes gross income from property held for investment (including portfolio income under the passive loss rules but not, absent an election, long-term capital gains or certain qualifying dividend income) less deductible expenses other than interest directly connected with the production of investment income.

To the extent that we allocate losses or expenses to you that must be deferred or disallowed as a result of these or other limitations in the Code, you may be taxed on income in excess of your economic income or distributions (if any) on your units. As one example, you could be allocated and required to pay tax on your share of interest income accrued by USNG for a particular taxable year, and in the same year allocated a share of a capital loss that you cannot deduct currently because you have insufficient capital gains against which to offset the loss. As another example, you could be allocated and required to pay tax on your share of interest income and capital gain for a year, but be unable to deduct some or all of your share of management fees and/or margin account interest incurred by you with respect to your units. Unitholders are urged to consult their own professional tax advisors regarding the effect of limitations under the Code on your ability to deduct your allocable share of USNG's losses and expenses.

Tax Basis of Units

A unitholder's tax basis in its units is important in determining (1) the amount of taxable gain it will realize on the sale or other disposition of its units, (2) the amount of non-taxable distributions that it may receive from USNG and (3) its ability to utilize its distributive share of any losses of USNG on its tax return. A unitholder's initial tax basis of its units will equal its cost for the units plus its share of USNG's liabilities (if any) at the time of purchase. In general, a unitholder's share of those liabilities will equal the sum of (i) the entire amount of any otherwise nonrecourse liability of USNG as to which the unitholder or an affiliate is the creditor (a partner nonrecourse liability) and (ii) a *pro rata*

share of any nonrecourse liabilities of USNG that are not partner nonrecourse liabilities as to any unitholder.

A unitholder's tax basis in its units generally will be (1) increased by (a) its allocable share of USNG's taxable income and gain and (b) any additional contributions by the unitholder to USNG and (2) decreased (but not below zero) by (a) its allocable share of USNG's tax deductions and losses and (b) any distributions by USNG to the unitholder. For this purpose, an increase in a unitholder's share of USNG's liabilities will be treated as a contribution of cash by the unitholder to USNG and a decrease in that share will be treated as a distribution of cash

by USNG to the unitholder. Pursuant to certain IRS rulings, a unitholder will be required to maintain a single, unified basis in all units that it owns. As a result, when a unitholder that acquired its units at different prices sells less than all of its units, such unitholder will not be entitled to specify particular units (e.g., those with a higher basis) as having been sold. Rather, it must determine its gain or loss on the sale by using an equitable apportionment method to allocate a portion of its unified basis in its units to the units sold.

Treatment of Fund Distributions. If USNG makes non-liquidating distributions to unitholders, such distributions generally will not be taxable to the unitholders for federal income tax purposes except to the extent that the sum of (i) the amount of cash and (ii) the fair market value of marketable securities distributed exceeds the unitholder's adjusted basis of its interest in USNG immediately before the distribution. Any cash distributions in excess of a unitholder's tax basis generally will be treated as gain from the sale or exchange of units.

Constructive Termination of the Partnership. We will be considered to have been terminated for tax purposes if there is a sale or exchange of 50 percent or more of the total interests in our units within a 12-month period. A termination would result in the closing of our taxable year for all unitholders. In the case of a unitholder reporting on a taxable year other than a fiscal year ending December 31, the closing of our taxable year may result in more than 12 months of our taxable income or loss being includable in its taxable income for the year of termination. We would be required to make new tax elections after a termination. A termination could result in tax penalties if we were unable to determine that the termination had occurred. Moreover, a termination might either accelerate the application of, or subject us to, any tax legislation enacted before the termination.

Tax Consequences of Disposition of Units

If a unitholder sells its units, it will recognize gain or loss equal to the difference between the amount realized and its adjusted tax basis for the units sold. A unitholder's amount realized will be the sum of the cash or the fair market value of other property received plus its share of any USNG debt outstanding.

Gain or loss recognized by a unitholder on the sale or exchange of units held for more than one year will generally be taxable as long-term capital gain or loss; otherwise, such gain or loss will generally be taxable as short-term capital gain or loss. A special election is available under the Treasury Regulations that will allow unitholders to identify and use the actual holding periods for the units sold for purposes of determining whether the gain or loss recognized on a sale of units will give rise to long-term or short-term capital gain or loss. It is expected that most unitholders will be eligible to elect, and generally will elect, to identify and use the actual holding period for units sold. If a unitholder fails to make the election or is not able to identify the holding periods of the units sold, the unitholder will have a split holding period in the units sold. Under such circumstances, a unitholder will be required to determine its holding period in the units sold by first determining the portion of its entire interest in USNG that would give rise to long-term capital gain or loss if its entire interest were sold and the portion that would give rise to short-term capital gain or loss if the entire interest were sold. The unitholder would then treat each unit sold as giving rise to long-term capital gain or loss and short-term capital gain or loss in the same proportions as if it had sold its entire interest in USNG.

Under Section 751 of the Code, a portion of a unitholder's gain or loss from the sale of units (regardless of the holding period for such units), will be separately computed and taxed as ordinary income or loss to the extent attributable to unrealized receivables or inventory owned by USNG. The term unrealized receivables includes, among other things, market discount bonds and short-term debt instruments to the extent such items would give rise to ordinary income if sold by USNG.

If some or all of your units are lent by your broker or other agent to a third party—for example, for use by the third party in covering a short sale—you may be considered as having made a taxable disposition of the loaned units, in which case

-

you may recognize taxable gain or loss to the same extent as if you had sold the units for cash;

-

any of USNG's income, gain, loss or deduction allocable to those units during the period of the loan will not be reportable by you for tax purposes; and

-

any distributions you receive with respect to the units will be fully taxable, most likely as ordinary income.

Unitholders desiring to avoid these and other possible consequences of a deemed disposition of their units should consider modifying any applicable brokerage account agreements to prohibit the lending of their units.

Other Tax Matters

Information Reporting. We intend to report tax information to the beneficial owners of units. Unitholders who have become additional limited partners will be treated as partners for federal income tax purposes. The IRS has ruled that assignees of partnership interests who have not been admitted to a partnership as partners but who have the capacity to exercise substantial dominion and control over the assigned partnership interests will be considered partners for federal income tax purposes. On the basis of such ruling, except as otherwise provided herein, we intend to treat the following persons as partners for federal income tax purposes: (1) assignees of units who are pending admission as limited partners, and (2) unitholders whose units are held in street name or by another nominee and who have the right to direct the nominee in the exercise of all substantive rights attendant to the ownership of their units. USNG will furnish unitholders each year with tax information on IRS Schedule K-1 (Form 1065), which will be used by the unitholders in completing their tax returns.

Persons who hold an interest in USNG as a nominee for another person are required to furnish to us the following information: (1) the name, address and taxpayer identification number of the beneficial owner and the nominee; (2) whether the beneficial owner is (a) a person that is not a U.S. person, (b) a foreign government, an international organization or any wholly-owned agency or instrumentality of either of the foregoing, or (c) a tax-exempt entity; (3) the amount and description of units acquired or transferred for the beneficial owner; and (4) certain information including the dates of acquisitions and transfers, means of acquisitions and transfers, and acquisition cost for purchases, as well as the amount of net proceeds from sales. Brokers and financial institutions are required to furnish additional information, including whether they are U.S. persons and certain information on units they acquire, hold or transfer for their own account. A penalty of \$50 per failure, up to a maximum of \$100,000 per calendar year, is imposed by the Internal Revenue Code of 1986, as amended for failure to report such information to us. The nominee is required to supply the beneficial owner of the units with the information furnished to us.

Partnership Audit Procedures. The IRS may audit the federal income tax returns filed by USNG. Adjustments resulting from any such audit may require each unitholder to adjust a prior year's tax liability and could result in an audit of the unitholder's own return. Any audit of a unitholder's return could result in adjustments of non-partnership items as well as USNG items. Partnerships are generally treated as separate entities for purposes of federal tax audits, judicial review of administrative adjustments by the IRS, and tax settlement proceedings. The tax treatment of partnership items of income, gain, loss and deduction are determined at the partnership level in a unified partnership proceeding rather than in separate proceedings with the unitholders. The Code provides for one unitholder to be designated as the tax matters partner and represent the partnership purposes of these proceedings. The LP Agreement appoints the General Partner as the tax matters partner of USNG.

Tax Shelter Disclosure Rules. In certain circumstances the Code and Treasury Regulations require that the IRS be notified of taxable transactions through a disclosure statement attached to a taxpayer's United States federal income tax return. In addition, certain material advisers must maintain a list of persons participating in such transactions and furnish the list to the IRS upon written request. These disclosure rules may apply to transactions irrespective of whether they are structured to achieve particular tax benefits. They could require disclosure by USNG or unitholders (1) if a unitholder incurs a loss in excess a specified threshold from a sale or redemption of its units, (2) if USNG engages in transactions producing differences between its taxable income and its income for financial reporting purposes, or (3) possibly in other circumstances. While these rules generally do not require disclosure of a loss recognized on the disposition of an asset in which the taxpayer has a qualifying basis (generally a basis equal to the amount of cash paid by the taxpayer for such asset), they apply to a loss recognized with respect to interests in a passthrough entity, such as the units, even if the taxpayer's basis in such interests is equal to the amount of cash it paid. In addition, under recently enacted legislation, significant penalties may be imposed in connection with a failure to comply with these reporting requirements. *Investors should consult their own tax advisors concerning the application of these reporting requirements to their specific situation.*

Tax-Exempt Organizations. Subject to numerous exceptions, qualified retirement plans and individual retirement accounts, charitable organizations and certain other organizations that otherwise are exempt from federal income tax (collectively exempt organizations) nonetheless are subject to the tax on unrelated business taxable income (UBTI). Generally, UBTI means the gross income derived by an exempt organization from a trade or business that it regularly carries on, the conduct of which is not substantially related to the exercise or performance of its exempt purpose or function, less allowable deductions directly connected with that trade or business. If USNG were to regularly carry on (directly or indirectly) a trade or business that is unrelated with respect to an exempt

organization unitholder, then in computing its UBTI, the unitholder must include its share of (1) USNG's gross income from the unrelated trade or business, whether or not distributed, and (2) USNG's allowable deductions directly connected with that gross income.

UBTI generally does not include dividends, interest, or payments with respect to securities loans and gains from the sale of property (other than property held for sale to customers in the ordinary course of a trade or business). Nonetheless, income on, and gain from the disposition of, debt-financed property is UBTI. Debt-financed property generally is income-producing property (including securities), the use of which is not substantially related to the exempt organization's tax-exempt purposes, and with respect to which there is acquisition indebtedness at any time during the taxable year (or, if the property was disposed of during the taxable year, the 12-month period ending with the disposition). Acquisition indebtedness includes debt incurred to acquire property, debt incurred before the acquisition of property if the debt would not have been incurred but for the acquisition, and debt incurred subsequent to the acquisition of property if the debt would not have been incurred but for the acquisition and at the time of acquisition the incurrence of debt was foreseeable. The portion of the income from debt-financed property attributable to acquisition indebtedness is equal to the ratio of the average outstanding principal amount of acquisition indebtedness over the average adjusted basis of the property for the year. USNG currently does not anticipate that it will borrow money to acquire investments; however, USNG cannot be certain that it will not borrow for such purpose in the future. In addition, an exempt organization unitholder that incurs acquisition indebtedness to purchase its units in USNG may have UBTI.

The federal tax rate applicable to an exempt organization unitholder on its UBTI generally will be either the corporate or trust tax rate, depending upon the unitholder's form of organization. USNG may report to each such unitholder information as to the portion, if any, of the unitholder's income and gains from USNG for any year that will be treated as UBTI; the calculation of that amount is complex, and there can be no assurance that USNG's calculation of UBTI will be accepted by the Service. An exempt organization unitholder will be required to make payments of estimated federal income tax with respect to its UBTI.

Regulated Investment Companies. Under recently enacted legislation, interests in and income from qualified publicly traded partnerships satisfying certain gross income tests are treated as qualifying assets and income, respectively, for purposes of determining eligibility for regulated investment company (RIC) status. A RIC may invest up to 25% of its assets in interests in a qualified publicly traded partnership. The determination of whether a publicly traded partnership such as USNG is a qualified publicly traded partnership is made on an annual basis. USNG expects to be a qualified publicly traded partnership in each of its taxable years. However, such qualification is not assured.

Non-U.S. Unitholders

Generally, non-U.S. persons who derive U.S. source income or gain from investing or engaging in a U.S. business are taxable on two categories of income. The first category consists of amounts that are fixed, determinable, annual and periodic income, such as interest, dividends and rent that are not connected with the operation of a U.S. trade or business (FDAP). The second category is income that is effectively connected with the conduct of a U.S. trade or business (ECI). FDAP income (other than interest that is considered portfolio interest) is generally subject to a 30 percent withholding tax, which may be reduced for certain categories of income by a treaty between the U.S. and the recipient's country of residence. In contrast, ECI is generally subject to U.S. tax on a net basis at graduated rates upon the filing of a U.S. tax return. Where a non-U.S. person has ECI as a result of an investment in a partnership, the ECI is subject to a withholding tax at a rate of 35 percent for both individual and corporate unitholders.

Withholding on Allocations and Distributions. The Code provides that a non-U.S. person who is a partner in a partnership that is engaged in a U.S. trade or business during a taxable year will also be considered to be engaged in a U.S. trade or business during that year. Classifying an activity by a partnership as an investment or an operating business is a factual determination. Under certain safe harbors in the Code, an investment fund whose activities consist of trading in stocks, securities, or commodities for its own account generally will not be considered to be

engaged in a U.S. trade or business unless it is a dealer in such stocks, securities, or commodities. This safe harbor applies to investments in commodities only if the commodities are of a kind customarily dealt in on an organized commodity exchange and if the transaction is of a kind customarily consummated at such place. Although the matter is not free from doubt, USNG believes that the activities directly conducted by USNG will not result in USNG being

engaged in a trade or business within in the United States. However, there can be no assurance that the IRS would not successfully assert that USNG's activities constitute a U.S. trade or business.

In the event that USNG's activities were considered to constitute a U.S. trade or business, USNG would be required to withhold at the highest rate specified in Code section 1 (currently 35 percent) on allocations of our income to non-U.S. unitholders. A non-U.S. unitholder with ECI will generally be required to file a U.S. federal income tax return, and the return will provide the non-U.S. unitholder with the mechanism to seek a refund of any withholding in excess of such unitholder's actual U.S. federal income tax liability. Any amount withheld by USNG will be treated as a distribution to the non-U.S. unitholder.

If USNG is not treated as engaged in a U.S. trade or business, a non-U.S. unitholder may nevertheless be treated as having FDAP income, which would be subject to a 30 percent withholding tax (possibly subject to reduction by treaty), with respect to some or all of its distributions from USNG or its allocable share of USNG income. Amounts withheld on behalf of a non-U.S. unitholder will be treated as being distributed to such unitholder.

To the extent any interest income allocated to a non-U.S. unitholder that otherwise constitutes FDAP is considered portfolio interest, neither the allocation of such interest income to the non-U.S. unitholder nor a subsequent distribution of such interest income to the non-U.S. unitholder will be subject to withholding, provided that the non-U.S. unitholder is not otherwise engaged in a trade or business in the U.S. and provides USNG with a timely and properly completed and executed IRS Form W-8BEN or other applicable form. In general, portfolio interest is interest paid on debt obligations issued in registered form, unless the recipient owns 10 percent or more of the voting power of the issuer.

USNG expects that most of its interest income will qualify as portfolio interest. In order for USNG to avoid withholding on any interest income allocable to non-U.S. unitholders that would qualify as portfolio interest, it will be necessary for all non-U.S. unitholders to provide USNG with a timely and properly completed and executed Form W-8BEN (or other applicable form). If a non-U.S. unitholder fails to provide a properly completed Form W-8BEN, the General Partner may request that the non-U.S. unitholder provide, within 15 days after the request by the General Partner, a properly completed Form W-8BEN. If a non-U.S. unitholder fails to comply with this request, the units owned by such non-U.S. unitholder will be subject to redemption.

Gain from Sale of Units. Gain from the sale or exchange of the units may be taxable to a non-U.S. unitholder if the non-U.S. unitholder is a nonresident alien individual who is present in the U.S. for 183 days or more during the taxable year. In such case, the nonresident alien individual will be subject to a 30 percent withholding tax on the amount of such individual's gain.

Branch Profits Tax on Corporate Non-U.S. Unitholders. In addition to the taxes noted above, any non-U.S. unitholders that are corporations may also be subject to an additional tax, the branch profits tax, at a rate of 30 percent. The branch profits tax is imposed on a non-U.S. corporation's dividend equivalent amount, which generally consists of the corporation's after-tax earnings and profits that are effectively connected with the corporation's U.S. trade or business but are not reinvested in a U.S. business. This tax may be reduced or eliminated by an income tax treaty between the United States and the country in which the non-U.S. unitholder is a qualified resident.

Prospective non-U.S. unitholders should consult their tax advisor with regard to these and other issues unique to non-U.S. unitholders.

Backup Withholding

USNG may be required to withhold U.S. federal income tax (backup withholding) at a rate of 28 percent from all taxable distributions payable to: (1) any unitholder who fails to furnish USNG with his, her or its correct taxpayer identification number or a certificate that the unitholder is exempt from backup withholding, and (2) any unitholder

with respect to whom the IRS notifies USNG that the unitholder has failed to properly report certain interest and dividend income to the IRS and to respond to notices to that effect. Backup withholding is not an additional tax and may be returned or credited against a taxpayer's regular federal income tax liability if appropriate information is provided to the IRS.

Other Tax Considerations

In addition to federal income taxes, unitholders may be subject to other taxes, such as state and local income taxes, unincorporated business taxes, business franchise taxes, and estate, inheritance or intangible taxes that may be imposed by the various jurisdictions in which USNG does business or owns property or where the unitholders reside. Although an analysis of those various taxes is not presented here, each prospective unitholder should consider their potential impact on its investment in USNG. It is each unitholder's responsibility to file the appropriate U.S. federal, state, local, and foreign tax returns. Sutherland Asbill & Brennan LLP has not provided an opinion concerning any aspects of state, local or foreign tax or U.S. federal tax other than those U.S. federal income tax issues discussed herein.

Investment By ERISA Accounts

General

Most employee benefit plans and individual retirement accounts (IRAs) are subject to the Employee Retirement Income Security Act of 1974, as amended (ERISA) or the Internal Revenue Code of 1986, as amended (the Code), or both. This section discusses certain considerations that arise under ERISA and the Code that a fiduciary of an employee benefit plan as defined in ERISA or a plan as defined in Section 4975 of the Code who has investment discretion should take into account before deciding to invest the plan's assets in USNG. Employee benefit plans and plans are collectively referred to below as plans, and fiduciaries with investment discretion are referred to below as plan fiduciaries.

This summary is based on the provisions of ERISA and the Code as of the date hereof. This summary is not intended to be complete, but only to address certain questions under ERISA and the Code likely to be raised by your advisors. The summary does not include state or local law.

Potential plan investors are urged to consult with their own professional advisors concerning the appropriateness of an investment in USNG and the manner in which units should be purchased.

Special Investment Considerations

Each plan fiduciary must consider the facts and circumstances that are relevant to an investment in USNG, including the role that an investment in USNG would play in the plan's overall investment portfolio. Each plan fiduciary, before deciding to invest in USNG, must be satisfied that the investment is prudent for the plan, that the investments of the plan are diversified so as to minimize the risk of large losses and that an investment in USNG complies with the terms of the plan.

USNG and Plan Assets

A regulation issued under ERISA contains rules for determining when an investment by a plan in an equity interest of a limited partnership will result in the underlying assets of the partnership being deemed plan assets for purposes of ERISA and Section 4975 of the Code. Those rules provide that assets of a limited partnership will not be plan assets of a plan that purchases an equity interest in the partnership if the equity interest purchased is a publicly-offered security. If the underlying assets of a partnership are considered to be assets of any plan for purposes of ERISA or Section 4975 of the Code, the operations of that partnership would be subject to and, in some cases, limited by, the provisions of ERISA and Section 4975 of the Code.

The publicly-offered security exception described above applies if the equity interest is a security that is:

1. freely transferable (determined based on the relevant facts and circumstances);

2. part of a class of securities that is widely held (meaning that the class of securities is owned by 100 or more investors independent of the issuer and of each other); and

3. either (a) part of a class of securities registered under Section 12(b) or 12(g) of the Exchange Act or (b) sold to the plan as part of a public offering pursuant to an effective registration statement under the Securities Act of 1933 and the class of which such security is a part is registered under the Exchange Act within 120 days (or such later time as may be allowed by the SEC) after the end of the fiscal year of the issuer in which the offering of such security occurred.

The plan asset regulations under ERISA state that the determination of whether a security is freely transferable is to be made based on all the relevant facts and circumstances. In the case of a security that is part of an offering in which the minimum investment is \$10,000 or less, the following requirements, alone or in combination, ordinarily will not affect a finding that the security is freely transferable: (1) a requirement that no transfer or assignment of the security or rights relating to the security be made that would violate any federal or state law, (2) a requirement that no transfer or assignment be made without advance written notice given to the entity that issued the security, and (3) any restriction on the substitution of assignee as a limited partner of a partnership, including a general partner consent requirement, provided that the economic benefits of ownership of the assignor may be transferred or assigned without regard to such restriction or consent (other than compliance with any of the foregoing restrictions).

The General Partner believes that the conditions described above will be satisfied with respect to the units. The General Partner believes that the units should therefore constitute publicly-offered securities, and the underlying assets of USNG should not be considered to constitute plan assets of any plan that purchases units.

Prohibited Transactions

ERISA and the Code generally prohibit certain transactions involving the plan and persons who have certain specified relationships to the plan.

In general, units may not be purchased with the assets of a plan if the General Partner, the clearing brokers, the trading advisors (if any), or any of their affiliates, agents or employees either:

- exercise any discretionary authority or discretionary control with respect to management of the plan;
- exercise any authority or control with respect to management or disposition of the assets of the plan;
- render investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of the plan;
- have any authority or responsibility to render investment advice with respect to any monies or other property of the plan; or
- have any discretionary authority or discretionary responsibility in the administration of the plan.

Also, a prohibited transaction may occur under ERISA or the Code when circumstances indicate that (1) the investment in a unit is made or retained for the purpose of avoiding application of the fiduciary standards of ERISA, (2) the investment in a unit constitutes an arrangement under which USNG is expected to engage in transactions that would otherwise be prohibited if entered into directly by the plan purchasing the unit, (3) the investing plan, by itself, has the authority or influence to cause USNG to engage in such transactions, or (4) a person who is prohibited from transacting with the investing plan may, but only with the aid of certain of its affiliates and the investing plan, cause USNG to engage in such transactions with such person.

Special IRA Rules

IRAs are not subject to ERISA's fiduciary standards, but are subject to their own rules, including the prohibited transaction rules of Section 4975 of the Code, which generally mirror ERISA's prohibited transaction rules. For example, IRAs are subject to special custody rules and must maintain a qualifying IRA custodial arrangement separate and distinct from USNG and its custodial arrangement. Otherwise, if a separate qualifying custodial arrangement is not maintained, an investment in the units will be treated as a distribution from the IRA. Second, IRAs are prohibited from investing in certain commingled investments, and the General Partner makes no representation regarding whether an investment in units is an inappropriate commingled investment for an IRA. Third, in applying the prohibited transaction provisions of Section 4975 of the Code, in addition to the rules summarized above, the individual for whose benefit the IRA is maintained is also treated as the creator of the IRA. For example, if the owner or beneficiary of an IRA enters into any transaction, arrangement, or agreement involving the assets of his or her IRA to benefit the IRA owner or beneficiary (or his or her relatives or business affiliates) personally, or with the understanding that such benefit will occur, directly or indirectly, such transaction could give rise to a prohibited transaction that is not exempted by any available exemption. Moreover, in the case of an IRA, the consequences of a non-exempt prohibited transaction are that the IRA's assets will be treated as if they were distributed, causing immediate taxation of the assets (including any early distribution penalty tax applicable under Section 72 of the Code), in addition to any other fines or penalties that may apply.

Exempt Plans

Certain employee benefit plans may be governmental plans or church plans. Governmental plans and church plans are generally not subject to ERISA, nor do the above-described prohibited transaction provisions described above apply to them. These plans are, however, subject to prohibitions against certain related-party transactions under Section 503 of the Code, which operate similar to the prohibited transaction rules described above. In addition, the fiduciary of any governmental or church plan must consider any applicable state or local laws and any restrictions and duties of common law imposed upon the plan.

No view is expressed as to whether an investment in USNG (and any continued investment in USNG), or the operation and administration of USNG, is appropriate or permissible for any governmental plan or church plan under Code Section 503, or under any state, county, local or other law relating to that type of plan.

Allowing an investment in USNG is not to be construed as a representation by USNG, its General Partner, any trading advisor, any clearing broker, the Marketing Agent or legal counsel or other advisors to such parties or any other party that this investment meets some or all of the relevant legal requirements with respect to investments by any particular plan or that this investment is appropriate for any such particular plan. The person with investment discretion should consult with the plan's attorney and financial advisors as to the propriety of an investment in USNG in light of the circumstances of the particular plan, current tax law and ERISA.

INFORMATION YOU SHOULD KNOW

This Prospectus contains information you should consider when making an investment decision about the units. You may rely on the information contained in this Prospectus. Neither USNG nor its General Partner has authorized any person to provide you with different information and, if anyone provides you with different or inconsistent information, you should not rely on it. This Prospectus is not an offer to sell the units in any jurisdiction where the offer or sale of the units is not permitted.

The information contained in this Prospectus was obtained from us and other sources believed by us to be reliable.

You should rely only on the information contained in this Prospectus or any applicable prospectus supplement. We have not authorized anyone to provide you with any information that is different. If you receive any unauthorized information, you must not rely on it. You should disregard anything we said in an earlier document that is inconsistent with what is included in this Prospectus or any applicable prospectus supplement. Where the context requires, when we refer to this Prospectus, we are referring to this Prospectus and (if applicable) the relevant prospectus supplement.

You should not assume that the information in this Prospectus or any applicable prospectus supplement is current as of any date other than the date on the front page of this Prospectus or the date on the front page of any applicable prospectus supplement.

We include cross references in this Prospectus to captions in these materials where you can find further related discussions. The table of contents tells you where to find these captions.

STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Prospectus includes forward-looking statements which generally relate to future events or future performance. In some cases, you can identify forward-looking statements by terminology such as may, will, should, expect, plan, anticipate, believe, estimate, predict, potential or the negative of these terms or other comparable terminology. All statements (other than statements of historical fact) included in this Prospectus that address activities, events or developments that will or may occur in the future, including such matters as changes in inflation in the United States,

movements in the stock market, movements in U.S. and foreign currencies, and movements in the commodities markets and indexes that track such movements, USNG's operations, the General Partner's plans and references to USNG's future success and other similar matters, are forward-looking statements. These statements are only predictions. Actual events or results may differ materially. These statements are based upon certain assumptions and analyses the General Partner has made based on its perception of historical trends, current conditions and expected future developments, as well as other factors appropriate in the

circumstances. Whether or not actual results and developments will conform to the General Partner's expectations and predictions, however, is subject to a number of risks and uncertainties, including the special considerations discussed in this Prospectus, general economic, market and business conditions, changes in laws or regulations, including those concerning taxes, made by governmental authorities or regulatory bodies, and other world economic and political developments. See "What Are the Risk Factors Involved with an Investment in USNG?" Consequently, all the forward-looking statements made in this Prospectus are qualified by these cautionary statements, and there can be no assurance that the actual results or developments the General Partner anticipates will be realized or, even if substantially realized, that they will result in the expected consequences to, or have the expected effects on, USNG's operations or the value of the units.

WHERE YOU CAN FIND MORE INFORMATION

The General Partner has filed on behalf of USNG a registration statement on Form S-1 with the SEC under the Securities Act of 1933. This Prospectus does not contain all of the information set forth in the registration statement (including the exhibits to the registration statement), parts of which have been omitted in accordance with the rules and regulations of the SEC. For further information about USNG or the units, please refer to the registration statement, which you may inspect, without charge, at the public reference facilities of the SEC at the below address or online at www.sec.gov, or obtain at prescribed rates from the public reference facilities of the SEC at the below address. Information about USNG and the units can also be obtained from USNG's website, which is www.unitedstatesnaturalgasfund.com. USNG's website address is only provided here as a convenience to you and the information contained on or connected to the website is not part of this Prospectus or the registration statement of which this Prospectus is part. USNG is subject to the informational requirements of the Exchange Act and the General Partner and USNG will each, on behalf of USNG, file certain reports and other information with the SEC. The General Partner will file an updated Prospectus annually for USNG pursuant to the Securities Act. The reports and other information can be inspected at the public reference facilities of the SEC located at 100 F Street, NE, Washington, D.C. 20549 and online at www.sec.gov. You may also obtain copies of such material from the public reference facilities of the SEC at 100 F Street, NE, Washington, D.C. 20549, at prescribed rates. You may obtain more information concerning the operation of the public reference facilities of the SEC by calling the SEC at 1-800-SEC-0330 or visiting online at www.sec.gov.

SUMMARY OF PROMOTIONAL AND SALES MATERIAL

USNG does not currently have any promotional or sales material.

PATENT APPLICATION PENDING

A patent application by the General Partner directed to the creation and operation of the United States Natural Gas Fund, LP is pending and the General Partner's registration of USNG's trademarks is in process at the United States Patent and Trademark Office.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Partners of
United States Natural Gas Fund, LP

We have audited the accompanying statement of financial condition of United States Natural Gas Fund, LP, (the Fund) as of December 31, 2006. This financial statement is the responsibility of the Fund's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statement referred to above presents fairly, in all material respects, the financial position of United States Natural Gas Fund, LP as of December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

UNITED STATES NATURAL GAS FUND, LP

NOTES TO STATEMENT OF FINANCIAL CONDITION

December 31, 2006

Note 1 Organization and Business

United States Natural Gas Fund, LP (the Fund), was organized as a limited partnership under the laws of the state of Delaware on September 11, 2006. The Fund is a commodity pool that intends to issue units that may be purchased and sold on the American Stock Exchange. The Fund will continue in perpetuity, unless terminated sooner upon the occurrence of one or more events as described in its Limited Partnership Agreement (the Limited Partnership Agreement). The net assets of the Fund will consist primarily of investments in futures contracts for natural gas, crude oil, heating oil, gasoline and other petroleum based fuels traded on the New York Mercantile Exchange, ICE or other U.S. and foreign-exchanges (collectively, Futures Contracts). The Fund may also invest in other natural gas-related investments such as gas-settled options on futures contracts, forward contracts for natural gas and over-the-counter transactions that are based on the price of natural gas, oil and other petroleum-based fuels, Futures Contracts and indices based on the foregoing (collectively, Other Natural Gas-Related Investments). The investment objective of the Fund is to have changes in percentage terms of the unit's net asset value reflect the changes in percentage terms of the price of natural gas delivered at the Henry Hub, Louisiana as measured by the Futures Contract on natural gas traded on the New York Mercantile Exchange (the Benchmark Futures Contract) that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will invest in the next month to expire, less the Fund's expenses. Victoria Bay Asset Management, LLC is the general partner of the Fund (the General Partner) and is also responsible for the management of the Fund. For the period ended December 31, 2006, all of the Fund's organizational expenses in the amount of \$311,262 have been funded by the General Partner. The Fund does not have any obligation or intention to reimburse such payments. (See Note 5). The General Partner is a member of the National Futures Association (NFA) and is a commodity pool operator effective December 1, 2005. The Fund has a fiscal year ending on December 31.

The Fund will issue limited partnership interests (Units) to authorized purchasers by offering creation baskets consisting of 100,000 Units (Creation Baskets) through a marketing agent. The purchase price for a Creation Basket is based upon the net asset value of a Fund Unit. In addition, authorized purchasers will pay the Fund a \$1,000 fee for the creation of each Creation Basket. Subsequent to the sale of the initial Creation Basket, Units can be purchased or sold on a nationally recognized securities exchange in smaller increments. Units purchased or sold on a nationally recognized securities exchange are not made at the net asset value of the Fund but rather at market prices quoted on the stock exchange.

Victoria Bay Asset Management, LLC is also the General Partner of United States Oil Fund, LP (USO) which listed its Units on the American Stock Exchange under the ticker symbol USO on April 10, 2006.

The Fund is in the process of filing a registration statement on Form S-1A with the Securities and Exchange Commission. The following summary of significant accounting policies will be followed by the Fund once operations commence.

Note 2 Summary of Significant Accounting Policies

Revenue Recognition

Commodity futures contracts, forward contracts, physical commodities, and related options will be recorded on the trade date. All such transactions will be recorded on the identified cost basis and marked to market daily. Unrealized gains or losses on open contracts will be reflected in the statement of financial condition and the difference between original contract amount and market value (as determined by exchange settlement prices for futures contracts and

related options and cash dealer prices at a predetermined time for forward contracts, physical commodities, and their related options) as of the last business day of the year or as of the last date of the financial statements. Changes in the unrealized gains or losses between periods will be reflected in the statement of operations. The Fund will earn interest on its assets on deposit at the clearing broker.

F-4

UNITED STATES NATURAL GAS FUND, LP

NOTES TO STATEMENT OF FINANCIAL CONDITION

December 31, 2006

Note 2 Summary of Significant Accounting Policies (continued)

Brokerage Commissions

Brokerage commissions on all open commodity futures contracts will be accrued on a full-turn basis.

General Partner Management Fee

Under the Limited Partnership Agreement, the General Partner is responsible for investing the assets of the Fund in accordance with the objectives and policies of the Fund. In addition, the General Partner will arrange for one or more third parties to provide administrative, custody, accounting, transfer agency and other necessary services to the Fund. For these services, the Fund is contractually obligated to pay a monthly management fee to the General Partner, based on average daily net assets, at a rate equal to 0.60% per annum on average net assets of \$1,000,000,000 or less and 0.50% of average daily net assets that are greater than \$1,000,000,000. The Fund will pay for all brokerage fees, taxes and other expenses, including licensing fees for the use of intellectual property, registration or other fees paid to the Securities and Exchange Commission (SEC), the National Association of Securities Dealers (NASD), or any other regulatory agency in connection with the offer and sale of subsequent Units after its initial registration and all legal, accounting, printing and other expenses associated therewith. The Fund also pay the fees and expenses, including directors and officers liability insurance, of the independent directors.

Offering Costs

Offering costs incurred in connection with the registration of additional units after the initial registration of Units will be borne by the Fund. These costs include registration fees paid to regulatory agencies and all legal, accounting, printing and other expenses associated therewith. These costs will be accounted for as a deferred charge and thereafter amortized to expense over twelve months on a straight line basis or a shorter period if warranted.

Income Taxes

The Fund is not taxed on its income; instead the individual investors' respective share of the Fund's taxable income will be reported on the individual investors' income tax returns.

Redemptions

Authorized persons may redeem Units from the Fund only in blocks of 100,000 Units called Redemption Baskets. The amount of the redemption proceeds for a Redemption Basket will be equal to the net asset value of the Fund Units in the Redemption Basket.

Partnership Capital and Allocation of Partnership Income and Losses

Profit or loss shall be allocated among the partners of the Fund in proportion to the number of Units each partner holds as of the close of each month. The General Partner may revise, alter or otherwise modify this method of allocation as described in the Limited Partnership Agreement.

Calculation of Net Asset Value

The Fund will calculate its net asset value on each trading day by taking the current market value of its total assets, subtracting any liabilities and dividing the amount by the total number of Units issued and outstanding. The Fund will use the New York Mercantile Exchange closing price on that day for contracts held on the New York Mercantile Exchange.

Cash Equivalents

The Fund's cash equivalents will include highly liquid investments with original maturity of three months or less.

UNITED STATES NATURAL GAS FUND, LP

NOTES TO STATEMENT OF FINANCIAL CONDITION

December 31, 2006

Note 2 Summary of Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statement, and the reported amounts of the revenue and expenses during the reporting period. Actual results could differ from those estimates.

Note 3 Contracts and Agreements

The Fund is a party to a marketing agent agreement with ALPS Distributors Inc., a Colorado corporation (*ALPS*), whereby ALPS provides certain marketing services as outlined in the agreement. ALPS charges a fee of .06% on the Fund's assets up to \$3 billion; and .04% on assets in excess of \$3 billion. These fees will be paid by the General Partner and not charged to the Fund.

The above fees will not include the following expenses, which will be borne by the General Partner: cost of placing advertisements in various periodicals; web construction and development; or the printing and production of various marketing materials.

The Fund has also entered into a custodian agreement with Brown Brothers Harriman & Co. (*Brown Brothers*), whereby Brown Brothers will hold investments on behalf of the Fund. The General Partner of the Fund will pay the fees of the custodian, which shall be agreed upon from time to time between the parties. In addition, the Fund also intends to enter into an administrative agency agreement with Brown Brothers, whereby Brown Brothers will act as the administrative agent, transfer agent and registrar for the Fund. The General Partner will also pay the fees of Brown Brothers for its services under this agreement and such fees will be determined by the parties from time to time.

Upon the launch of the Fund, the General Partner will pay Brown Brothers for its services in the foregoing capacity for both USO and the Fund, a minimum amount of \$125,000 annually for its custody, fund accounting and fund administration services rendered to both funds, as well as a \$25,000 annual fee for its transfer agency services. In addition, the General Partner will pay an asset charge of (a) 0.06% for the first \$500 million of USO and the Fund's assets, (b) .0465% for USO and the Fund's assets greater than \$500 million but less than \$1 billion, and (c) .035% once USO and the Fund's net assets exceed \$1 billion. The annual minimum amount will not apply if the asset charge for all accounts in the aggregate exceeds \$125,000. The General Partner also will pay transaction charge fees to Brown Brothers, ranging from \$7.00 to \$15.00 per transaction for the Funds.

The Fund has entered into a brokerage agreement with UBS Securities LLC, the Futures Commission Merchant (the *FCM* or *Clearing Broker*). Pursuant to this agreement, the FCM will charge the Fund commissions at a rate to be determined per round turn trade plus applicable exchange and NFA fees for futures contracts and options on futures contracts.

The Fund will invest primarily in Natural Gas futures contracts traded on the New York Mercantile Exchange (the *Exchange*). The Fund and the Exchange are discussing entering into and in the process of finalizing a License Agreement whereby the Fund will be granted a non-exclusive license to use certain of the Exchange's settlement prices and service marks. Under the proposed License Agreement, the Exchange will receive an asset-based fee for the license, which will be paid by the General Partner on behalf of the Fund.

The Fund expressly disclaims any association with the Exchange or endorsement of the Fund by the Exchange and acknowledges that NYMEX and New York Mercantile Exchange are registered trademarks of such Exchange.

F-6

UNITED STATES NATURAL GAS FUND, LP

NOTES TO STATEMENT OF FINANCIAL CONDITION

December 31, 2006

Note 4 Financial Instruments, Off-balance Sheet Risks and Contingencies

The Fund intends to engage in the speculative trading of U.S. futures contracts and options on U.S. futures contracts, (collectively derivatives). The Fund will be exposed to both market risk, the risk arising from changes in the market value of the contracts; and credit risk, the risk of failure by another party to perform according to the terms of a contract.

Initially, all of the contracts traded by the Fund are expected to be exchange traded. The risks associated with exchange-traded contracts are generally perceived to be less than those associated with over-the-counter transactions since, in over-the-counter transactions, the Fund must rely solely on the credit of their respective individual counterparties. However, in the future, if the Fund were to enter into non-exchange traded contracts, it would be subject to the credit risk associated with counterparty non-performance. The credit risk from counterparty non-performance associated with such instruments is the net unrealized gain, if any. The Fund will also incur credit risk since the sole counterparty to all domestic futures contracts is the exchange clearing corporation. In addition, the Fund bears the risk of financial failure by the Clearing Broker.

The purchase and sale of futures and options on futures contracts requires margin deposits with a FCM. Additional deposits may be necessary for any loss on contract value. The Commodity Exchange Act requires an FCM to segregate all customer transactions and assets from the FCM's proprietary activities.

The Fund's cash and other property such as U.S. Treasury Bills, deposited with an FCM are considered commingled with all other customer funds subject to the FCM's segregation requirements. In the event of an FCM's insolvency, recovery may be limited to a pro rata share of segregated funds available. It is possible that the recovered amount could be less than the total of cash and other property deposited.

For derivatives, risks arise from changes in the market value of the contracts. Theoretically, the Fund will be exposed to a market risk equal to the value of futures contracts purchased and unlimited liability on such contracts sold short. As both buyer and seller of options, the Fund pays or receives a premium at the outset and then bears the risk of unfavorable changes in the price of the contract underlying the option.

The Fund's policy is to continuously monitor its exposure to market and counterparty risk through the use of a variety of financial, position and credit exposure reporting controls and procedures. In addition, the Fund has a policy of reviewing the credit standing of each clearing broker or counterparty with which it conducts business.

The financial instruments that will be held by the Fund are reported in the statement of financial condition at market or fair value, or at carrying amounts that approximate fair value, because of their highly liquid nature and short-term maturity.

Note 5 Subsequent Event

For the period from January 1, 2007 through March 12, 2007, an additional \$222,283 of the Fund's organizational and offering expenses was funded by the General Partner. The Fund does not have any obligation or intention to reimburse such payments.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Member
Victoria Bay Asset Management, LLC and Subsidiaries
(formerly Standard Asset Management, LLC)

We have audited the accompanying consolidated statements of financial condition of Victoria Bay Asset Management, LLC and Subsidiaries (formerly Standard Asset Management, LLC), (the Company) as of December 31, 2006 and 2005, and the related consolidated statements of operations, changes in member s equity (deficit) and cash flows for the year ended December 31, 2006 and the period from inception (June 23, 2005) through December 31, 2005. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Victoria Bay Asset Management, LLC and Subsidiaries as of December 31, 2006 and 2005, and the consolidated results of their operations and their cash flows for the year ended December 31, 2006 and the period from inception (June 23, 2005) through December 31, 2005 in conformity with accounting principles generally accepted in the United States of America.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Organization and Operation

Victoria Bay Asset Management, LLC (formerly Standard Asset Management, LLC) (the Company) was formed as a single-member limited liability company in the State of Delaware on May 10, 2005 and changed its name on June 10, 2005. The Company is the General Partner (the General Partner) of United States Oil Fund, LP (formerly New York Oil ETF, LP), a limited partnership (USO). The Company is registered as a commodity pool operator with the Commodity Futures Trading Commission (CFTC) and is a member of the National Futures Association (NFA). USO is a commodity pool registered with the CFTC and a member of the NFA that issues units that may be purchased and sold on the American Stock Exchange under the ticker symbol USO. USO began trading on April 10, 2006 by purchasing futures contracts for light, sweet crude oil that are traded on the New York Mercantile Exchange. The investment objective of USO is for its net asset value to reflect the performance of the price of light, sweet crude oil, less USO's expenses. USO will accomplish its objectives through investments in futures contracts for light, sweet crude oil, other types of crude oil, heating oil, gasoline, national gas and other petroleum-based fuels that are traded on the New York Mercantile Exchange and other U.S. and foreign exchanges (Oil Futures Contracts) and other oil interests such as cash-settled options on Oil Futures Contracts, forward contracts for oil, and over-the-counter transactions that are based on the price of oil.

The Company is a wholly owned subsidiary of Wainwright Holdings, Inc. (Wainwright), a Delaware corporation. Wainwright is a holding company that is controlled by the president of the Company and was USO's initial limited partner.

On September 11, 2006, the Company formed United States Natural Gas Fund, LP (USNG), another limited partnership registered with the CFTC and a member of the NFA as a commodity pool. The Company intends to list the units issued by USNG on the American Stock Exchange. The investment objective of USNG is for the changes in percentage terms of the units' net asset value to reflect the changes in percentage terms of the price of natural gas delivered to the Henry Hub, Louisiana as measured by the Benchmark Futures Contract, less USNG's expenses. The Company is the General Partner of USNG and is also responsible for the management of the USNG. Wainwright is also the initial limited partner of USNG.

As the General Partner of USO and USNG (collectively the Funds), the Company is required to accept the credit risk of the Funds to their futures commission merchant, oversee the purchases and sale of the Funds' Units by certain authorized purchasers, review the daily positions and margin requirements of the Funds, and manage the Funds' investments. The Company also pays the continuing service fees to the marketing selling agent for communicating with investors.

At December 31, 2006, the Company has accumulated a net loss since inception of \$869,865, and has been partly dependent upon the contributions from an affiliate of the Company. On April 10, 2006, USO commenced operations, and as of December 31, 2006, the Company has generated \$1,460,448 in management fee income from United States Oil Fund, LP to meet its operational expenses.

Management anticipates the Funds to raise and maintain sufficient capital to generate management fee income to meet its ongoing operational expenses.

VICTORIA BAY ASSET MANAGEMENT, LLC AND SUBSIDIARIES
(formerly Standard Asset Management, LLC)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 2 Summary of Significant Accounting Policies

Principles of consolidation

The Company as General Partner of the Funds has included the accounts of the USO at December 31, 2005 and the accounts of USNG at December 31, 2006 in the consolidated statements of financial condition. The Company has recorded a minority interest for the amount directly owned by the limited partner (representing the limited partner interest owned by Wainwright). Subsequent to December 31, 2005, the Company and Wainwright withdrew their partnership interests in USO and as of December 31, 2006, the accounts of USO are no longer included in the consolidated statement of financial condition. All intercompany accounts and balances have been eliminated in consolidation.

Revenue recognition

The Company recognizes revenue in the period earned under the terms of its management agreement with the Funds. This agreement provides for fees based upon a percentage of the daily average net asset value of the Funds.

In connection with the Funds trading activities, commodity futures contracts, forward contracts, physical commodities, and related options are recorded on the trade-date basis. All such transactions are recorded on the identified cost basis and marked to market daily. Unrealized gains and losses on open contracts are reflected in the statement of financial condition and represent the difference between original contract amount and market value (as determined by exchange settlement prices for futures contracts and related options and cash dealer prices at a predetermined time for forward contracts, physical commodities, and their related options) as of the last business day of the year or as of the last date of the financial statements. Changes in the unrealized gains or losses between periods are reflected in the statement of operations. The Company earns interest on its assets on deposit at the Broker at the 90-day Treasury bill rate less fifty basis points for deposits denominated in U.S. dollars.

General Partner management fee

Under the Funds' respective Limited Partnership Agreements, the Company is responsible for investing the assets of the Funds in accordance with the objectives and policies of the Funds. In addition, the Company will arrange for one or more third parties to provide administrative, custody, accounting, transfer agency and other necessary services to the Funds. For these services, the Funds are contractually obligated to pay the Company a management fee, which is paid monthly, based on the average daily net assets of USO and USNG. USO pays a fee equal to 0.50% per annum on average daily net assets of \$1,000,000,000 or less and 0.20% of average daily net assets that are greater than \$1,000,000,000. USNG pays a fee equal to 0.60% per annum on average daily net assets of \$1,000,000,000 or less and 0.50% of average daily net assets that are greater than \$1,000,000,000. The Funds will pay for all brokerage fees, taxes and other expenses, including licensing fees for the use of intellectual property, registration or other fees paid to the Securities and Exchange Commission (SEC), the National Association of Securities Dealers (NASD), or any other regulatory agency in connection with the offer and sale of subsequent Units after its initial registration and all legal, accounting, printing and other expenses associated therewith. The Funds also pay the fees and expenses, including directors and officers' liability insurance, of the independent directors.

Brokerage commissions

Brokerage commissions on all open commodity futures contracts are accrued on a full-turn basis.

Redemptions

Authorized persons may redeem Units from the Funds only in blocks of 100,000 Units called Redemption Baskets . The amount of the redemption proceeds for a Redemption Basket will be equal to the net asset value of the Funds Units in the Redemption Basket.

F-8

**VICTORIA BAY ASSET MANAGEMENT, LLC AND SUBSIDIARIES
(formerly Standard Asset Management, LLC)**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 2 Summary of Significant Accounting Policies (continued)

Partnership capital and allocation of partnership income and losses

Profit or loss shall be allocated among the partners of the Funds in proportion to the number of Units each partner holds as of the close of each month. The General Partner may revise, alter or otherwise modify this method of allocation as described in the Limited Partnership Agreements.

Calculation of net asset value

USO calculates net asset value on each trading day by taking the current market value of its total assets, subtracting any liabilities and dividing the amount by the total number of Units issued and outstanding. USO uses the New York Mercantile Exchange closing price on that day for contracts held on the New York Mercantile Exchange.

Cash equivalents

Cash equivalents are highly liquid investments with original maturity of three months or less.

Accounting estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Income taxes

No provision for federal income taxes has been made since, as a limited liability company, the Company is not subject to income taxes. The Company's income or loss is reportable by its member on its tax return.

Note 3 Capitalization

As of December 31, 2006, Wainwright has contributed \$474,020 in connection with its interest in the Company. In addition, the Company and USO have incurred offering and organization costs in the amount of \$1,571,318, which are not included in the accompanying consolidated statements. Wainwright has provided funding for these costs, but is under no obligation to do so or continue funding these costs. The Company and USO are not required to reimburse Wainwright or its affiliate for any such costs incurred. Included in deferred offering costs at December 31, 2006 is \$311,262 of initial offering and organizational costs incurred by USNG, other than the fees paid to the SEC in connection with the registration of the offering of units and to the NASD in connection therewith. These initial offering and organization costs incurred by USNG will be borne by the Company and not be charged to USNG. USO and USNG were each capitalized with \$1,000, of which the Company contributed \$20 and Wainwright contributed \$980.

Note 4 Off-balance Sheet Risks, Commitments and Contingencies

The Company, together with USO, is a party to a marketing agent agreement with ALPS Distributors Inc., a Colorado corporation (ALPS), whereby ALPS provides certain marketing services for USO as outlined in the agreement. The

Edgar Filing: United States Natural Gas Fund, LP - Form 424B3

fees charged to USO by the marketing agent include a marketing fee of \$425,000 per annum plus the following incentive fee: zero basis points on USO assets from \$0 - \$500 million; 0.04% on USO assets from \$500 million - \$4 billion; and 0.03% on USO assets in excess of \$4 billion. The Company, together with USNG, is also a party to a marketing agent agreement with ALPS. ALPS charges USNG a fee of .06% on USNG's assets up to \$3 billion; and .04% on USNG's assets in excess of \$3 billion, but no annual marketing fee. These fees will be paid by the Company and not charged to the funds.

F-9

**VICTORIA BAY ASSET MANAGEMENT, LLC AND SUBSIDIARIES
(formerly Standard Asset Management, LLC)**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 4 Off-balance Sheet Risks, Commitments and Contingencies (continued)

The above fees do not include the following expenses, which are also borne by the Company: cost of placing advertisements in various periodicals; web construction and development; or the printing and production of various marketing materials.

The Company, together with USO, is also party to a custodian agreement dated March 13, 2006 with Brown Brothers Harriman & Co. (Brown Brothers), whereby Brown Brothers holds investments on behalf of USO. The Company as General Partner of USO pays the fees of the custodian, which shall be agreed to from time to time between the parties. In addition, the Company, together with USO, is party to an administrative agency agreement dated March 13, 2006, also with Brown Brothers, whereby Brown Brothers acts as the administrative agent, transfer agent and registrar for USO. The Company also pays the fees of Brown Brothers for its services under this agreement and such fees will be determined by the parties from time to time. Currently, the Company pays Brown Brothers for its services in the foregoing capacity a minimum amount of \$250,000 annually for its custody, fund accounting and fund administration services, as well as a \$50,000 annual fee for its transfer agency services. In addition, the Company pays an asset charge of (a) 0.06% for the first \$500 million of USO's assets, (b) .0465% for USO's assets greater than \$500 million but less than \$1 million, and (c) .035% once USO's net assets exceed \$1 billion. The annual minimum amount does not apply if the asset charge paid by the Company exceeds \$250,000. The Company also pays transaction charge fees to Brown Brothers, ranging from \$7.00 to \$15.00 per transaction.

The Company, together with USNG, is also party to a custodian agreement dated March 5, 2007 with Brown Brothers, whereby Brown Brothers holds investments on behalf of USNG. The Company as General Partner of USNG pays the fees of the custodian, which shall be agreed to from time to time between the parties. In addition, the Company, together with USNG, is party to an administrative agency agreement dated March 5, 2007, also with Brown Brothers, whereby Brown Brothers acts as the administrative agent, transfer agent and registrar for USNG. The Company also pays the fees of Brown Brothers for its services under this agreement and such fees will be determined by the parties from time to time.

Upon the launch of USNG, the Company will pay Brown Brothers for its services in the foregoing capacity for both USO and USNG, a minimum amount of \$125,000 annually for its custody, fund accounting and fund administration services, as well as a \$25,000 annual fee for its transfer agency services. In addition, the Company will pay an asset charge of (a) 0.06% for the first \$500 million of the Funds' assets, (b) .0465% for the Funds' assets greater than \$500 million but less than \$1 million, and (c) .035% once the Funds' net assets exceed \$1 billion. The annual minimum amount will not apply if the asset charge for all accounts in the aggregate exceeds \$125,000. The Company also will pay transaction charge fees to Brown Brothers, ranging from \$7.00 to \$15.00 per transaction for the Funds.

USO has entered into a brokerage agreement with UBS Securities LLC, formerly ABN AMRO, Inc., as the Futures Commission Merchant (the FCM). The agreement provides that the FCM charge the Fund commissions of approximately \$7 per round-turn trade plus applicable exchange and NFA fees for futures contracts and options on futures contracts.

USNG has also entered into a brokerage agreement with UBS Securities LLC, the FCM. Pursuant to this agreement, the FCM will charge the Fund commissions at a rate to be determined per round turn trade plus applicable exchange and NFA fees for futures contracts and options on futures contracts.

USO has invested primarily in oil futures contracts traded on the New York Mercantile Exchange (the Exchange) during the period ended December 31, 2006. USO and the Exchange are discussing entering into and in the process of finalizing a License Agreement whereby USO, as well as USNG, will be granted a non-exclusive license to use certain of the Exchange's settlement prices and service marks. Under the proposed License Agreement, the Exchange will receive an asset-based fee for the license, which will be paid by the Company on behalf of the Funds.

F-10

**VICTORIA BAY ASSET MANAGEMENT, LLC AND SUBSIDIARIES
(formerly Standard Asset Management, LLC)**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 4 Off-balance Sheet Risks, Commitments and Contingencies (continued)

USO and USNG both expressly disclaim any association with the Exchange or endorsement of USO or USNG by the Exchange and acknowledges that NYMEX and New York Mercantile Exchange are registered trademarks of such Exchange.

USO received a letter from Goldman, Sachs & Co. (Goldman Sachs) on March 17, 2006, providing the USO notice under 35 U.S.C. Section 154(d) of two pending United States patent applications, Publication Nos. 2004/0225593A1 and 2006/0036533A1. USO is currently reviewing the Goldman Sachs published patent applications, and has engaged in discussions with Goldman Sachs regarding their pending applications and the Fund's own pending patent application. At this time, due in part to the fact that the Goldman Sachs patent applications are pending and have not been issued as U.S. Patents, USO is unable to determine what the outcome of this matter will be.

USO engages in the trading of U.S. futures contracts and options on U.S. contracts (collectively derivatives). USO is exposed to both market risk, the risk arising from changes in the market value of the contracts; and credit risk, the risk of failure by another party to perform according to the terms of a contract.

All of the contracts currently traded by USO are exchange traded. The risks associated with exchange-traded contracts are generally perceived to be less than those associated with over-the-counter transactions since, in over-the-counter transactions, USO must rely solely on the credit of their respective individual counterparties. However, in the future, if USO were to enter into non-exchange traded contracts, it would be subject to the credit risk associated with counterparty non-performance. The credit risk from counterparty non-performance associated with such instruments is the net unrealized gain, if any. USO also has credit risk since the sole counterparty to all domestic futures contracts is the exchange clearing corporation. In addition, USO bears the risk of financial failure by the clearing broker.

The purchase and sale of futures and options on futures contracts requires margin deposits with an FCM. Additional deposits may be necessary for any loss on contract value. The Commodity Exchange Act requires an FCM to segregate all customer transactions and assets from the FCM's proprietary activities.

A customer's cash and other property such as U.S. Treasury Bills, deposited with an FCM are considered commingled with all other customer funds subject to the FCM's segregation requirements. In the event of an FCM's insolvency, recovery may be limited to a pro rata share of segregated funds available. It is possible that the recovered amount could be less than the total of cash and other property deposited.

For derivatives, risks arise from changes in the market value of the contracts. Theoretically, USO is exposed to a market risk equal to the value of futures and forward contracts purchased and unlimited liability on such contracts sold short. As both a buyer and seller of options, USO pays or receives a premium at the outset and then bears the risk of unfavorable changes in the price of the contract underlying the option.

The Company's policy is to continuously monitor its exposure to market and counterparty risk through the use of a variety of financial, position and credit exposure reporting and control procedures. In addition, the Company has a policy of reviewing the credit standing of each clearing broker or counter party with which it conducts business.

The financial instruments held by the Company is reported in the statement of financial condi
