

Atlas Technology Group, Inc.

Form 424B3

November 07, 2007

**Filed pursuant to Rule 424(b)(3)**

**Under the Securities Act of 1933, as amended**

**(Registration Statement 333-146060)**

## PROSPECTUS

### ATLAS TECHNOLOGY GROUP, INC.

#### 4,423,660 SHARES OF COMMON STOCK

This is an offering of shares of our common stock by persons and companies that were issued shares of common stock, par value \$0.0004 (the "Common Stock"), of Atlas Technology Group, Inc. (the "Company" or the "Registrant") in various private offerings. We will not receive any proceeds from the sale of the shares of Common Stock offered by the selling stockholders.

We are currently a reporting company under Section 12(g) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Our Common Stock is traded on the NASD Over-The-Counter Bulletin Board (the "OTC Bulletin Board") under the symbol "ATYG.OB".

Registration of the shares of Common Stock contemplated herein, will allow certain stockholders to sell all or part of their equity interests in the Company. The stockholders whose shares will become freely tradable shares under the Registration Statement are identified herein. *See Selling Stockholders.*

The Company shall bear all of the cost of preparing and printing the Registration Statement, Prospectus and any Prospectus Supplements and all filing fees and legal and accounting expenses associated with registration under federal and state securities laws. The selling stockholders will be responsible for any brokerage commissions, discounts or other expenses relating to the sales of the shares.

---

THE PURCHASE OF THE SECURITIES OFFERED HEREBY INVOLVES A HIGH DEGREE OF RISK. YOU SHOULD CAREFULLY CONSIDER THE FACTORS DESCRIBED UNDER THE HEADING "RISK FACTORS" BEGINNING ON PAGE 6.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR DETERMINED IF THIS PROSPECTUS IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

On November 6, 2007, the closing price of our Common Stock as quoted on the OTC Bulletin Board was \$0.80. The terms "we," "our" and "us," refer to the Company.

**The date of this prospectus is November 7, 2007.**

---

## Table of Contents

The following table of contents has been designed to help you find important information contained in this prospectus. We encourage you to read the entire prospectus.

You should rely only upon the information contained in this prospectus and the registration statement of which this prospectus is a part. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. The selling stockholders will only sell shares of our Common Stock and seek offers to buy shares of our Common Stock in jurisdictions where offers and sales are permitted. The information contained in this prospectus is accurate as of November 7, 2007.

We obtained statistical data, market data and other industry data and forecasts used throughout this prospectus from market research, publicly available information and industry publications. Industry publications generally state that they obtain their information from sources that they believe to be reliable, but they do not guarantee the accuracy and completeness of the information. We have not sought the consent of the sources to refer to their reports in this prospectus.

## PROSPECTUS SUMMARY

### Our Business

We are leveraging the recent advances in software, monitoring systems, and communications, to build a new, cutting edge, global support infrastructure, providing 24x7 software support to large and medium sized companies. Our new application on-boarding and monitoring processes allow for dramatic cost savings over existing Information Technology (“IT”) service providers. With more than thirty years of combined experience in IT support, our management team brings a significant level of knowledge and experience in outsourced application support. Our management team’s experience includes worldwide application support for companies such as JP Morgan, Microsoft, and Avanade.

We intend to offer our services worldwide, with the majority of our targeted customers having multi-national operations. Our operations are designed to be a highly distributable venture, with the ability to place people in the best possible locations so that we can provide a seamless service offering across the world. The worldwide IT market is approximately one trillion US dollars in size including hardware, software and communications. (Source: Gartner Group, Inc. (“Gartner”) available at <http://www.gartner.com/Init>.)

The latest trend in outsourcing toward outsourcing application support is dramatic. According to Forrester Research Inc. (“Forrester”), Tier 2 application support and business outsourcing grew to represent a \$220 billion market by 2006 with additional growth averaging 10% annually. According to Forrester the percentage of IT budgets spent on maintaining existing applications was 73% in 2004 and 76% in 2005. (Source: Forrester Research, Inc. “2005 Enterprise IT Outlook: Business Technographics North America”.)

To many industry leaders, managed services represent an important change to how technology is delivered and consumed. The managed services market has expanded rapidly over the past several years, particularly in the under-served small- and medium-sized business (“S-MMB”) market. The S-MMB IT services market estimated to be worth \$220 is expected to grow at a compound annual growth rate (“CAGR”) of 7.6% from 2004 to 2008. Remote monitoring and management (“RMM”) is the hottest growing segment expected to grow at 36% CAGR through 2008 in North America. A recent study by Forrester cited the S-MMB market at 48% of overall U.S. IT spending, stating that it will surpass enterprise IT spending by 2007. (Source: Gartner - Forecast IT Service, Worldwide, November 2005.)

### Products and Services

We are in the business of providing custom, outsourced, application software support services to our customers. These services range from supporting specialized networks and single applications to providing the entire IT infrastructure management for customers who want to outsource IT application support and focus on their core business competencies. Through partnerships with other IT development consultants, fully outsourced IT services can be provided, with hard performance metrics and predictable costs.

With more than thirty years of combined experience in IT support, our management team brings a significant level of knowledge and experience in outsourced application support. Our management team’s experience includes worldwide application support for companies such as JP Morgan, Microsoft, and Avanade.

We have spent two years developing our own proprietary software tools and processes. We are currently leveraging the recent advances in software, monitoring systems, and communications, to build a new, leading edge, global support infrastructure that provides 24x7 software support to large and medium sized companies. These new application on-boarding and monitoring processes should allow for dramatic cost savings over existing legacy IT service providers.

Through our BLive Networks, Inc. subsidiary we also provide our proprietary interactive support tools for both smaller and larger companies via systems that can be used by companies for remote technical support and sales, both externally, and for internal corporate “Helpdesk” support departments. This technology enables our service providers to deliver faster response times and a personal connection with users.

We provide both technical support and training to our customers as well as in-house and external training to our staff. Successful training of our technical support staff is key to our success. During 2006, all of our technical staff received training for various Microsoft technical qualifications. During 2007, we anticipate becoming a Microsoft “Gold Partner” with advanced infrastructure and learning solutions specializations. We believe that by becoming a Microsoft “Gold Partner” this will provide us with additional recognition and therefore revenue opportunities.

### **Our History and Recent Developments**

We were incorporated in August 1998 as Tribeworks, Inc., a California corporation (“California Tribeworks”). On November 2, 1999, we entered into a transaction with Pan World Corporation, a publicly-traded Nevada corporation (“Pan World”), whereby Pan World agreed to provide financing in connection with the merger of a newly formed subsidiary of Pan World into California Tribeworks (the “Recapitalization”). Prior to the Recapitalization, Pan World never had any material operations. As a result of the Recapitalization, shareholders of California Tribeworks exchanged all of their shares of California Tribeworks for shares of Pan World common stock. Subsequent to the Recapitalization, we were reincorporated in Delaware as Tribeworks, Inc. We opened a wholly-owned subsidiary in Japan (“Tribeworks Japan”) in August 2000, which engaged in sales and professional services activities primarily in our Enterprise application development business, until it was closed during the third quarter of 2004.

Beginning in 2003, we partnered with Kinoma, Inc. (“Kinoma”) to create new products for the mobile software market, specifically targeting Palm OS devices. Kinoma makes Kinoma Player, which is a high-resolution, interactive movie player for handhelds running the Palm OS. We developed two products in partnership with Kinoma that create Kinoma Player content, iShell Mobile, an iShell-based application development tool, launched in October 2003, and Kinoma Media Album, a consumer multimedia management tool, launched in May of 2004.

During 2005, the previous business lines of Tribeworks were separated into a wholly owned subsidiary named Tribeworks Development Corporation (“TDC”). The TDC business was primarily built around the sale of software through two main distribution channels: the graphics software tools business and proprietary products called iShell or iShell Mobile and an enterprise application development business. TDC was sold to its former management on September 14, 2006. Until approximately the middle part of 2006, the iShell line of products and an enterprise application development business were our primary product offering and business. The former assets, liabilities and business operations of TDC have been reclassified as discontinued operations beginning with the financial statements for the year ended December 31, 2006 on Form 10-KSB (the “Annual Report”).

On January 20, 2006 we acquired TakeCareofIT Holdings Ltd., doing business as Atlas Technology Group, a Malta Corporation that was established in September 2004 to provide external IT application support services for organizations with large IT functions. This support business is our primary business focus going forward. We plan to become a leading IT outsourcing support company for custom software applications worldwide. After extensive beta testing, the AtlasTG business line is now at the revenue launch stage with the first support customers being signed on in February 2007. Our in-house developed tools and processes needed to onboard IT applications and provide remote IT application support are now ready to meet the needs of our customers.

In January of 2007, we acquired all of the assets and approximately 700 customers of BLive Networks, Inc. This acquisition further strengthens our capability of delivering high quality outsourced support into the US\$220 billion worldwide IT Support market. The BLive Networks, Inc. acquisition strengthens our proprietary interactive support tools for companies providing IT support worldwide. The BLive Networks, Inc. systems can be used by companies for remote technical support and sales, both externally, and for internal corporate “Helpdesk” support departments. This technology enables our service providers to deliver faster response times and a personal connection with users.

We are currently a reporting company under Section 12(g) of the Exchange Act and our Common Stock is quoted on the OTC Bulletin Board under the symbol ATYG.OB.

### **Corporate Information**

Our head operating office is located in Malta. We also have subsidiary offices in Wellington, New Zealand and Redmond, Washington and a data center in Seattle, Washington. We currently have 28 employees and 3 working executive directors. Our US headquarters are located at 2001 152<sup>nd</sup> Ave NE, Redmond, Washington 98052 and our telephone number there is (425) 458-2360. We also maintain a website at [www.atlastg.com](http://www.atlastg.com). Information included on our website is not a part of this prospectus.

**About The Offering**

<i>Common Stock Offered by the Selling Stockholders</i>	Up to 4,423,660 shares of Common Stock
<i>Common Stock Currently Outstanding</i> (1)	33,856,805 shares
<i>Use of Proceeds</i>	The selling stockholders will receive the proceeds from the sale of shares of Common Stock. We will not receive any of the proceeds from the sale of shares of Common Stock offered by this prospectus.
<i>Risk Factors</i>	See "Risk Factors" for a discussion of factors you should carefully consider before deciding to invest in shares of our Common Stock.
<i>OTCBB Trading Symbol</i>	ATYG.OB

(1) The number of shares of our Common Stock outstanding is based on the number of shares outstanding as of November 6, 2007 and excludes:

· 8,639,019 shares of Common Stock issuable upon exercise of outstanding warrants with exercise prices ranging from \$1.00 to \$2.60;

· 134,084 shares of Common Stock issuable upon exercise of outstanding options with exercise prices ranging from \$0.42 to \$37.08; and

· 8,374,201 shares of Common Stock reserved for issuance under our 2004 Employee Stock Incentive Plan.

### Summary Financial Information

You should read the following summary consolidated financial data together with our consolidated financial statements and related notes appearing at the end of this prospectus and our “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Risk Factors” sections included elsewhere in this prospectus. The consolidated summary financial data as of and for the years ended December 31, 2006 and 2005 are derived from our audited financial statements and are included elsewhere in this prospectus. Our summary consolidated financial information for the six months ended June 30, 2007 and 2006 are derived from our unaudited consolidated financial statements which are included elsewhere in this prospectus. Historical results are not necessarily indicative of future results.

Statements of Operations Data:	6 Months Ended June 30, (Unaudited)		Year Ended December 31, (Audited)

Stockholders’ equity	3,593,696	1,295,820	772,437	415,583

## RISK FACTORS

*An investment in our Common Stock involves a high degree of risk. You should carefully consider the risks described below and the other information in this prospectus before investing in our Common Stock. If any of the following risks occur, our business, operating results and financial condition could be seriously harmed. Additional risk and uncertainties not currently known to us, or that we currently believe are not material, could also materially adversely affect our business, financial condition or operating results.*

**The following risk factors apply to our business:**

***We have a limited operating history and there is a great degree of uncertainty as to our future results. We have experienced losses recently and may never achieve sustained profitability.***

We have a limited operating history upon which an evaluation of our business and prospects can be based. Our prospects must be evaluated with a view to the risks encountered by a company in an early stage of development, particularly in light of the uncertainties relating to the new and evolving markets in which we intend to operate and in light of the uncertainty as to market acceptance of our business model.

We will be incurring costs in marketing our products and services to customers and in building and developing an administrative organization. To the extent that revenues do not match these expenses, our business, results of operations, and financial conditions will be materially adversely affected. There can be no assurance that we will be able to generate sufficient revenues from the new IT support business to maintain profitability on a quarterly or annual basis in the future. We may not be able to sustain or increase profitability on a quarterly basis or achieve profitability on an annual basis.

***We face substantial competition in our industry.***

While we are seeking to position ourselves in a new and unique space, there are also a large number of traditional consultancy competitors competing in this space, including IBM Global Services (“IBM”), Hewlett-Packard (“HP”), Electronic Data Systems Corporation (“EDS”), and Accenture Ltd. (“Accenture”) as well as a number of smaller independent service providers. The industry is broken down into three segments; first are the hardware manufacturers that provide additional IT services; second, are the large pure-play IT service providers targeting fortune 500 companies, and third are smaller independent companies that generally specialize in specific local markets.

The improvement of infrastructure has meant the introduction of additional competitors to the competitive picture, notably in India, where Wipro Limited (“Wipro”) and Infosys Technologies Limited (“Infosys”) provide support services and call centers. Many hosting providers are also trying to offer Application Service Provider (“ASP”) services as an add-on. There are other smaller regional players, such as Wavex and Motive that are also targeting the S-MMB market.

In addition, we believe that the single biggest competitive factor is existing in-house support groups. We believe that we will be competing with in-house support groups rather than external competitors in over 90% of competitive cases. Having stated all of the above, we believe that there is a market for our IT support services and that we are well positioned to take advantage of large customers deciding to outsource the final element of their IT business, specifically their IT application support.

***Our success depends on our ability to address potential market opportunities while managing our expenses. If we are unable to manage our expenses, our business and financial conditions will be materially adversely affected.***

Our future success depends upon our ability to successfully balance maximizing market opportunities and managing our expenses. Our need to manage expenses will place a strain on our management and operational resources. If we are unable to manage our expenses effectively, our business, financial condition, and operating results will be materially adversely affected. We have experienced an unprofitable year during 2006 and for the six months ended June 30, 2007 and we expect increased expenses in the near future as we increase the size of our operations and continue to comply with the requirements of the Sarbanes-Oxley Act of 2002.

***Our future success depends on our ability to attract customers from both within and outside the United States. Jurisdictions outside the United States may impose tax and regulatory burdens on our business, which could have a material adverse affect on our business, financial condition, and results of operations.***

Our future success will be affected by our ability to attract customers from countries outside the United States. Foreign countries could impose withholding taxes or otherwise tax our foreign income, impose tariffs, embargoes or exchange controls, or adopt other restrictions on foreign trade or restrictions relating to use or access of or distribution of software through electronic means.

The laws of certain countries also do not protect our intellectual property rights to the same extent as the laws of the United States. In addition, we are subject to the United States export control regulations that may restrict our ability to market and sell our products to certain countries outside of the United States. Failure in successfully marketing our products in international markets could have a material adverse effect on our business, operating results and financial conditions.

***Our success depends on our key personnel and attracting suitably skilled staff. We may be unable to attract and retain qualified employees***

Our performance and success of the existing business is dependent substantially on the services of our existing small group of experienced senior staff as well as on our ability to recruit, retain and motivate our key employees. We will require a much larger staff as our business grows.

We do not have employment contracts with our key officers. Their relationships with us are terminable at-will. We intend to address the issue of employment contracts with our key officers in 2007. Support and general staff have employment contracts appropriate to their particular locale and the type of services they provide. Our success also depends on our ability to attract and retain additional qualified employees. Competition for qualified personnel in all of our locations is intense and there are a limited number of persons with the knowledge and experience in our industry. There can be no assurance that we will be able to attract and retain key personnel in our key initial recruitment areas of Malta and Wellington, New Zealand.

***We expect high variability and uncertainty as to our future operations and financial results.***

We expect high variability and uncertainty as to our future operations and financial results. As we continue to develop and market our business, our quarterly operating results may fluctuate as a result of a variety of factors. Many of these factors are outside our control, including demand for the development and introduction of new products and services by our competitors, price competition or pricing changes in the industry, technical difficulties or system downtime, general economic conditions, and economic conditions specific to the Internet and related media. Due to these factors, among others, our operating results may fall below our expectations and the expectations of investors.

***Our IT support services may not be accepted by the industries that require IT support.***

Our future success depends on our ability to create and deliver sophisticated tools to support our new IT support business in order to be attractive to a sufficient number of users to generate significant revenues. We need to develop, attract, retain, and expand a loyal customer base for our new services, so that the results of our operations and financial condition will materially improve over the next twelve months.

***Our success depends on our ability to develop services that meet our customers' requirements and to keep pace with technology trends in an ever evolving IT sectors.***

Our success depends on our ability to develop and provide new services that meet our customers' changing requirements. The IT sector and the Internet are characterized by rapidly changing technology, evolving industry standards, changes in customer needs and frequent new service and product innovations. Our success will depend, in part, on our ability to assess and effectively use unproven technologies and unproven standards. We must evaluate and utilize technical standards developed by industry committees and continue to develop our technological expertise, enhance our current services, develop new services that meet changing customer needs, and influence and respond to emerging industry standards and other technological changes on a timely and cost-effective basis. If we fail to adequately assess or utilize these standards or proprietary technologies at the appropriate time in the marketplace, the competitive advantages of our products and services and our business, financial condition, and operating results could be materially adversely affected.

7

---

***Increasing governmental regulation on electronic commerce and legal uncertainties could limit our growth.***

The adoption of new laws or the adaptation of existing laws to the Internet may limit use of the Internet, which could in turn limit or decrease the demand for our services, increase our cost of doing business or otherwise harm our business. Federal, state, local and foreign governments are considering a number of legislative and regulatory proposals related to Internet commerce.

A number of laws and regulations may be adopted related to Internet user privacy, Internet security, taxation, pricing, quality of products and services on the Internet, and intellectual property ownership. The application of existing laws to the Internet, in areas such as property ownership, copyrights, trademarks and trade secrets could have an effect on our business.

***Capacity constraints and system disruptions could substantially reduce the products we sell and undermine our reputation for reliability among our customers and potential customers.***

The satisfactory performance, reliability and availability of our data centers and our network infrastructure are critical to attracting and maintaining relationships with customers. While the primary data center has back-up measures built into it, and we have some duplication and back-up in our Malta and Wellington offices, any system interruptions that result in the unavailability of our data center and slower response times over the Internet for users could reduce the attractiveness of our services to our customers. Any disruption of our services would materially adversely affect our business, financial condition and results of operations.

Our primary data center is now located in Seattle, Washington. While this area is not seismically active, with our operations centralized in a single facility, a natural disaster, such as an earthquake, fire, or flood, could substantially disrupt our operations or destroy our facilities. This could cause delays and cause us to incur additional expenses and adversely affect our reputation with our customers if we suffer a catastrophic loss from a natural disaster.

As resources allow and growth develops, it is intended that a second data center will be established so that we can continue operating following a natural or other disaster in one of our locations. Until this second data center is established some duplicate files are being kept on the local systems in Malta and New Zealand.

We do have an insurance policy that partially alleviates some of the financial losses that could be incurred, but this does not compensate for reputation loss.

***There may be conflicts of interest among our officers, directors and stockholders.***

Our executive officers and directors and their affiliates may engage in other activities and have interests in other entities on their own behalf or on behalf of other persons. Neither we nor any of our stockholders will have any rights in these ventures or their income or profits. In particular:

- Our executive officers or directors or their affiliates may have an economic interest in, or other business relationship with, partner companies that invest in us; and
- Our executive officers or directors or their affiliates may have interests in entities that provide products or services to us.

In any of these cases:

- Our executive officers or directors may have a conflict between our current interests and their personal financial and other interests in another business venture;

- Our executive officers or directors may have conflicting fiduciary duties to us and the other entity; and
- The terms of transactions with the other entity may not be subject to arm's length negotiations and therefore may be on terms less favorable to us than those that could be procured through arm's length negotiations.

***We may be unable to protect our intellectual property rights, or we may infringe the intellectual property rights of others, which may result in lawsuits and prevent us from selling our products.***

We rely on copyright, patent, and trade secret laws to protect our trademarks, content, and proprietary technologies and information. There can be no assurance that such laws will provide sufficient protection to us, other parties will not develop technologies that are similar or superior to ours, or, given the availability of our products' source-code, other parties will not copy or otherwise obtain and use our content or technologies without authorization.

Effective trademark, copyright, and other intellectual property protection may not be available in every country in which our technology is distributed or made available through the Internet. There can be no assurance that our means of protecting our proprietary rights in the United States or abroad will be adequate or that competitors will not independently develop similar technology.

There are no pending lawsuits against us regarding infringement of any existing patents or other intellectual property rights or any material notices that we are infringing the intellectual property rights of others. However, there can be no assurance that third parties will not assert infringement claims in the future. If any claims are asserted and determined to be valid, there can be no assurance that we will be able to obtain licenses of the intellectual property rights in question or obtain licenses on commercially reasonable terms.

Our involvement in any patent dispute or other intellectual property dispute or action to protect proprietary rights may have a material adverse effect on our business, operating results, and financial condition. Adverse determinations in any litigation may subject us to liabilities, require us to seek licenses from third parties, and prevent us from marketing and selling our products. Any of these situations can have a material adverse effect on our business, operating results, and financial condition.

***We might require additional capital to support business growth, and this capital might not be available.***

We intend to continue to make investments to support our business growth and may require additional funds to respond to business challenges or opportunities, including the need to develop new services or enhance our existing service, enhance our operating infrastructure, or acquire complementary businesses and technologies. Accordingly, we may need to engage in equity or debt financings to secure additional funds. In addition, if we raise additional funds through further issuances of equity or securities, our existing stockholders would suffer dilution.

***We are susceptible to parties who may compromise our security measures, which could cause us to expend capital and materially adversely affect our financial condition and results of operations.***

Hackers may be able to circumvent our security measures and could misappropriate proprietary information or cause interruptions in our Internet operations. In the past, computer viruses or software programs that disable or impair computers have been distributed and have rapidly spread over the Internet. Computer viruses could be introduced into our systems or those of our users, which could disrupt our network or make our systems inaccessible to users. Any of these events could damage our reputation among our customers and potential customers and substantially harm our business. We may be required to expend capital and resources to protect against the threat of security breaches or to alleviate problems caused by these breaches. Consumer concern over Internet security has been, and could continue to be, a barrier to commercial activities requiring consumers to send their credit card information over the Internet.

Computer viruses, break-ins, or other security problems could lead to misappropriation of proprietary information and interruptions, delays or cessation in service to our customers. Moreover, until more comprehensive security technologies are developed, the security and privacy concerns of existing and potential customers may inhibit the growth of the Internet as a merchandising medium. Further, our business is subject to the effects of war and acts of terrorism.

**The following risk factors apply to the securities markets and investments in our Common Stock:**

*Our stock price is volatile and a stockholder's investment in our common stock could suffer a decline in value.*

The trading price of our Common Stock has fluctuated significantly in the past. The future trading price of our common stock may continue experiencing wide price fluctuations in response to a number of factors, some of which are beyond our control, such as:

- actual or anticipated fluctuations in revenue or operating results;
- changes in market valuation of companies in our industry generally;
- announcements of research activities and technology innovations or new products or services by us or our competitors;
- failure to meet expectations of performance;
- developments in or disputes regarding copyrights, trademarks, patents and other proprietary rights; and
- general economic conditions.

As a result of the registration statement of which this prospectus is a part, a significant number of restricted shares will have been registered and made available for sale. Sales of a substantial number of shares of our Common Stock in the public market (including the shares offered under this prospectus, under other registration statements and shares available for resale under Rule 144 under the Securities Act) or the perception that such sales could occur, could significantly depress the prevailing market price of our Common Stock.

*We expect quarterly revenue and operating results to vary in future periods, which could cause our stock price to fluctuate.*

Our limited operating results have varied widely in the past, and we expect they will continue to vary from quarter to quarter as we attempt to commercialize our product and develop the new IT support business. Our quarterly results may fluctuate for many reasons, including a limited operating history and dependence on a limited number of customers for a significant portion of our revenue.

As a result of these fluctuations and uncertainties in our operating results, we believe quarter-to-quarter or annual comparisons of our operating results are not a good indication of our future performance. In addition, at some point in the future, these fluctuations may likely cause us to perform below the expectations of public market analysts or investors. If our results fall below market expectations, the price of our Common Stock will be adversely affected.

In addition we believe that various other factors may cause the market price of our Common Stock to fluctuate, including announcements of:

- New services being offered by our competitors;
- Developments or disputes concerning intellectual property proprietary rights;
- Our failing to achieve our operational milestones; and
- Changes in our financial conditions or securities or analysts' recommendations.

The stock markets, in general, and the shares of IT companies, in particular, have experienced extreme price fluctuations. These broad market and industry fluctuations may cause the market price of our Common Stock to decline. In addition, the low trading volume of our stock will accentuate price swings of our stock.

***The market for our stock has not been liquid.***

Our Common Stock is currently quoted for trading on the OTC Bulletin Board. As a result, the liquidity of our common stock is limited, not only in the number of shares that are bought and sold, but also through delays in the timing of transactions, and the lack of coverage by security analysts and the news media of the Company. The average daily trading volume for our Common Stock during the three months prior to the date of this prospectus was approximately 2,000 shares per day. Therefore, holders of our Common Stock may have difficulty selling their shares in the public markets.

***Future sales of shares by existing stockholders, or perceptions of these sales, could cause the stock price to decline.***

If existing stockholders sell, or indicate an intention to sell, substantial amounts of the Common Stock in the public market, the trading price of the Common Stock could decline. Following effectiveness of the initial resale registration statement related to this offering, or if necessary a secondary or tertiary resale registration statement, approximately 8,214,000 shares of Common Stock, and up to 6,842,000 additional shares of Common Stock issuable upon exercise of the warrants, will be eligible for sale in the public market. If any of these additional shares are sold, or if it is perceived that they will be sold, in the public market, the trading price of the Common Stock could decline.

***Our ability to issue additional securities without stockholder approval could have substantial dilutive and other adverse effects on existing stockholders and investors in this offering.***

We have the authority to issue additional shares of Common Stock and to issue options and warrants to purchase shares of our Common Stock without stockholder approval. Future issuance of Common Stock could be at values substantially below the offered price of the Common Stock, and therefore could represent further substantial dilution. As of November 6, 2007, we had outstanding options exercisable to purchase up to 134,084 shares of Common Stock and outstanding warrants exercisable to purchase up to 8,639,019 shares of Common Stock. Exercise of these warrants and options could have a further dilutive effect on existing stockholders and you as an investor.

***Issuances of additional equity securities in the future, including through the exercise of any of our outstanding warrants or options could significantly dilute the holdings of our stockholders.***

In connection with our equity and debt financing with West Coast Opportunity Fund, LLC (“WCOF”), we issued warrants to purchase 6,500,000 shares of Common Stock exercisable for 5 years at an exercise price of \$2.60 per share with expiration dates of June 15, 2012 and July 11, 2012, and in addition we have further issued additional warrants to other investors purchase up to 2,618,019 shares of Common Stock with varying expiration dates from December 29, 2007 to June 15, 2012 and exercise prices from \$1.00 to \$2.60.

As we issue stock or convertible securities in the future, including for any future equity financing or upon exercise of any of the outstanding stock purchase warrants and stock options, those issuances would dilute our stockholders. If any of these additional shares are issued and are sold into the market, it could decrease the market price of our Common Stock and could also encourage short sales. Short sales and other hedging transactions could place further downward pressure on the price of our Common Stock.

## SPECIAL NOTE REGARDING FORWARD LOOKING STATEMENTS

In addition to historical information, the following discussion contains statements that plan for or anticipate the future; “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Exchange Act, that are subject to risks and uncertainties. These forward-looking statements include statements about our future business plans and strategies, future actions, future performance, costs and expenses, interest rates, outcome of contingencies, financial condition, results of operations, liquidity, objectives of management, and other such matters, as well as certain projections and business trends, and most other statements that are not historical in nature, that are “forward-looking” within the meaning of the Private Securities Litigation Reform Act of 1995.

The Private Securities Litigation Reform Act of 1995 provides a “safe harbor” for forward-looking information to encourage companies to provide prospective information about themselves without fear of litigation so long as that information is identified as forward-looking and is accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those projected in the information. Forward-looking information may be included in this Registration Statement or may be incorporated by reference from other documents we have filed with the Securities and Exchange Commission (the “SEC”). You can identify these forward-looking statements by the use of words like “may,” “will,” “could,” “should,” “project,” “believe,” “anticipate,” “expect,” “estimate,” “forecast,” “potential,” “intend,” “continue” and variations of these words or comparable words. Forward-looking statements do not guarantee future performance, and because forward-looking statements involve future risks and uncertainties, there are factors that could cause actual results to differ materially from those expressed or implied. These risks and uncertainties include, without limitation, those detailed from time to time in our filings with the SEC.

We have based the forward-looking statements relating to our operations on management's current beliefs, expectations, estimates, and projections about us and the industry in which we operate, as well as assumptions and information currently available to us. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that we cannot predict. In particular, we have based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Because forward-looking statements involve future risks and uncertainties, there are several important factors that could cause actual results to differ materially from historical results and percentages and from the results anticipated by these forward-looking statements.

For example, a few of the uncertainties that could affect the accuracy of forward-looking statements include, without limitation:

Whether or not our products are accepted by the marketplace and the pace of any such acceptance;

Our ability to continue to grow our Tools and Enterprise businesses;

Improvements in the technologies of our competitors;

Changing economic conditions; and

Other factors, some of which will be outside of our control.

Our business model is primarily focused on delivering IT support services. We are leveraging the recent advances in software, IT monitoring systems, and communications, to build a new, leading edge, global support infrastructure, providing 24x7 software support to large and medium sized companies. The new application onboarding and monitoring processes that we have developed should allow for cost savings over existing IT service providers. We believe the IT support offerings offered using our software, systems and processes will provide a quality product to a wide range of business enterprises and provide a maximum return on our investment.

**USE OF PROCEEDS**

We will not receive any proceeds from the sale of shares by the selling stockholders.

13

---

## **MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS**

### **Results of Operations**

We experienced a net operating loss (EBIT) of \$1,398,576 for the six months ended June 30, 2007 compared to a net operating loss of \$794,991 for the same six months in 2006.

2006 was a transitional year for us with the acquisition of AtlasTG on January 20, 2006 and the sale of our previous business, operated from within TDC, on September 14, 2006. We incurred an overall net operating loss from continuing operations of \$1,780,896 for the year ended December 31, 2006 compared to a net operating loss for continuing operations for the year ended December 31, 2005 of \$194,896. This change is attributed to the sale of certain of our TDC product lines that generated revenue in 2005.

On January 26, 2007 the Company acquired all of the assets (but not the liabilities) and 700 customers of BLive Networks, Inc., for a consideration of 1,150,000 shares of common stock of the Company. Included with these assets was 49% of a Canadian company called InfoBuild Networks (Canada) Inc. (since increased to 100% by way of the exercise of an option over the other 51%) and the assets acquired from BLive have been injected into this company and the name of it has been changed to BLive Networks Inc. and the business has continued to trade through this company. The assets acquired have been consolidated into these financial statements and the results of BLive from January 26, 2007 have been included after making adjustments for certain pre-acquisition and post-acquisition events. For the period to June 30, 2007, BLive incurred a small loss from operations before amortization and is expected to make a profit for the 2008 year, before amortization, as it is integrated into the overall business.

### **Revenues**

Because 2006 was a transitional and development year, revenue was limited to \$39,706 from consulting activities performed during the third and four quarters of fiscal year 2006. Our revenue for the year ended December 31, 2006 came from these consulting services, which were an adjunct to our new main business focus. This figure is substantially lower than our December 31, 2005 revenue of \$593,595 when we had the TDC product lines. The TDC business was sold to the former management on September 14, 2006 and the TDC revenue and expenses have been treated as discontinued operations in the attached financial statements for the year ended December 31, 2006: TDC earned 73% of total revenues in 2005 from developing customized multimedia authoring tools or multimedia applications or presentations for three large multi-national corporations and the balance of its revenue came from sales of its proprietary iShell® or iShell Mobile products.

Total revenues for the first six months ended June 30, 2007 were \$281,716, split as to \$175,903 for the three months ended June 30, 2007 and \$105,813 for the three months ended March 31, 2007. There are no relevant comparative revenues for the six months ended June 30, 2007.

The revenue of \$281,716 can be split into three categories: a) revenue from consulting services and placing consultants with third parties of \$143,553; b) sales support services software through our BLive operations of \$59,924 for the five months following the acquisition of BLive; and c) \$78,239 of onboarding and support sales, which is the first revenue generated by our new mainstream business. The consulting services are being provided to potential software support customers from our Redmond office and the provision of consultants is through a joint venture with Breard LLC where we are operating a staff augmentation consulting service for potential support customers as a first step in developing a relationship with these potential customers.

While the revenue in the first quarter came from the provision of consulting services and from our new BLive operation, the bulk of the increase in our revenue for the second quarter came primarily from our first IT support

customers that we began providing services to in March 2007. We completed the onboarding to our first customer, Mobile Content Networks, Inc. ("MCN"), in Palo Alto, California in March 2007. MCN provides real-time mobile search solutions to 3GSM mobile telephone networks such as D2 of Japan and Total Access Communications Plc ("DTAC") of Thailand. At the end of 2006, D2 Communications, the largest mobile advertising agency in the world, released its FM Radio Search service to DoCoMo handset users providing listeners of FM radio with one click access to ringtones, music downloads, CDs and DVDs through MCN's MobileSearch.net platform. MCN is currently working with over twenty partners in ten countries who are developing solutions based on its platform.

We are currently onboarding our second IT application support customer, Viewpath.com (“Viewpath”) and we expected to start generating revenue from this customer before the end of the third quarter. We have entered into an agreement with Viewpath that calls for us to provide 24x7 support to Viewpath's customers and to monitor its highly sophisticated .NET application.

We are also in discussions with a major international IT company to provide our application support services and will hopefully enter into a preliminary agreement with this company by the end of the fourth quarter and it is this contract that unlocks the WCOF escrow deposit.

We anticipate that revenue from our new IT support services will increase during the year as new customers are recruited and onboarded by our newly appointed sales and onboarding partners. To date, we have appointed Universal Information Technology Group, Ltd. (“UniTech”) and PA Consulting from the UK and the Italian IT consulting company Bizmatica Sistemi s.r.l., as onboarding partners for our software services and IT support. We are currently negotiating with another party in Europe and are close to finalizing an agreement with a large international consulting firm to also become our onboarding partner in the United States.

With the acquisition of the business of BLive in January 2007, we acquired 700 customers and an established annual revenue base of approximately \$250,000. We are planning to integrate the BLive business and proprietary support tools to strengthen our remote technical support and sales, both externally, and for our internal corporate Helpdesk support departments. BLive targets users within the worldwide Helpdesk support market, which diversifies our revenue base.

### **Cost of Sales**

Our cost of sales for the year ended December 31, 2006 was \$68,000, which includes an allocation of salary costs related to the consulting work performed and engagement fees. Some of these costs are expected to be recovered from revenue expected to be generated in 2007. For the year ended December 31, 2005, the cost of sales, from the now discontinued TDC business, included royalties paid to third parties for licensed technology, costs associated with order fulfillment, credit card fees, web hosting fees, and costs associated with consulting services, including salaries, subcontractor fees, and out-of-pocket expenses. Our cost of sales were \$214,606 for the year ended December 31, 2005. Because these operations were discontinued, our cost of sales were significantly decreased in 2006.

Our cost of sales for the first half of 2007 was \$193,691 compared to \$83,711 in the first three months to March 31, 2007. This includes an allocation of salary costs related to the consulting work performed and BLive support services provided, as well as the salaries and engagement fees for the consultants provided and the share of income for our joint venture partner. The salary costs for our mainstream support services are included under operating expenses with the IT software development and support line. There are no comparable cost of sales for the first half of 2006 as AtlasTG was still developing its software tools and BLive was acquired in January 2007.

### **Operating Expenses**

During 2006, we have been developing our new software tools for onboarding and monitoring of our customer's software applications. In the past we have expensed all of our software development costs in the period the costs were incurred. With the new software purchased and developed through our AtlasTG line of business reaching the live beta and production testing stages, and by year end the production implementation stage, our board of directors adopted Statement of Financial Accounting Standards No. 86, “Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed” (“SFAS 86”) and capitalized certain software development costs that meet the requirements of SFAS No. 86. There are no 2005 comparative figures as AtlasTG was acquired on January 20, 2006 and the expenses from the TDC line of business have been treated as discontinued operations.

As a result of the adoption of SFAS No. 86, \$454,942 of software development costs were capitalized during the year ended December 31, 2006, which were in addition to the \$835,192 of IT software costs we acquired with AtlasTG on January 20, 2006. These capitalized costs will be amortized over three years from the date on which the new AtlasTG business goes into full commercialization. However, not all of the software development costs for the year met the requirements of SFAS No. 86, and \$859,780 of software development costs have been expensed in the year ended December 31, 2006.

In the first half of 2007, \$193,676 was capitalized (compared to \$407,572 in the first half of 2006) with \$642,377 of IT development and support costs being expensed compared to \$374,096 in the first half of 2006. In the second quarter of 2007 a net \$406,959 was expensed compared to \$270,117 in the second quarter of 2006.

With our software now going into production with real-time customers the amount being capitalized in future periods will substantially reduce and in future periods more of our costs will be directed at our support functions rather than development functions.

Also during 2007 and more particularly in the second quarter of 2007 as the value of the US dollar has fallen against both the Euro and the New Zealand dollar, the cost of our operations in both Malta and New Zealand have increased in US dollar terms even though the local costs have not increased substantially.

Sales and marketing expenses for the period ended December 31, 2006 were \$136,260 and consist primarily of compensation and benefits, plus advertising expenses which are primarily the costs incurred in the design, development, and printing of our literature and marketing materials including website design. We expense all advertising expenditures as incurred. Sales and marketing expenses for the previous business for the year ended December 31, 2005, were \$132,262. These expenses have been reclassified as discontinued operations.

Sales and marketing expenses for the six months ended June 30, 2007 were \$131,931 (which is in line with the level of expenditure in the first quarter of 2007) compared to \$44,524 for the six months ended June 30, 2006. Sales and marketing expenses for the quarter ended June 30, 2007 were \$65,616 compared to \$32,292 for the quarter ended June 30, 2006. Sales and marketing expense consists primarily of compensation and benefits for our sales and marketing team, plus advertising expenses which are primarily the costs incurred in the design, development, and printing of our literature and marketing materials. Sales and marketing expenses will continue to grow as we move into the growth stage and as we continue to expand our market presence in 2007.

With the acquisition of AtlasTG we acquired a substantial amount of computer equipment, as well as office furniture and fittings in the various offices. As a result we incurred depreciation expense for the year ended December 31, 2006 of \$106,326.

Depreciation and amortization expense increased substantially in the second quarter ended June 30, 2007 to \$111,956. \$88,137 of this was amortization of the IT technology and customer lists that we purchased as part of the BLive assets, which are being amortized over the next three years. When this is deducted the remaining depreciation charge for the six months ended June 30, 2007 at \$23,819 is in line with the depreciation charge of \$22,522 incurred in the first quarter of 2007. There are no relevant comparables for 2006 as the business and software were in the development phase. As we move into the full support phase in the coming months, the amortization of the capitalized software over three years will begin and this will also become a significant expense in future periods, which will offset the increase in revenue from our application support operations.

General and administrative expenses consist primarily of compensation and benefits, fees for professional services, and overhead. General and administrative expenses were \$650,236 for the year ended December 31, 2006, while the general and administrative expenses for the year ended December 31, 2005 were \$359,050. \$194,896 of this figure for 2005 is attributed to the ongoing business with the rest reclassified as part of discontinued operations. The difference

between 2005 and 2006 is attributed to the increase in employees and additional operating locations in 2006. With the acquisition of AtlasTG, we also incurred additional overhead expenses with the addition of a new group operating head office in Malta, the addition of a subsidiary office in New Zealand and a subsidiary office in Redmond, Washington. Following the sale of TDC we closed the previous operating head office in San Francisco.

General and administrative expenses were \$577,856 for the six months ended June 30, 2007 compared to \$376,371 for the six months ended June 30, 2006. General and administrative expenses were \$266,877 for the quarter ended June 30, 2007 compared to \$227,297 for the quarter ended June 30, 2006. The differences between the two years is attributed to an increase in administrative costs associated with an increasing number of executives; additional costs that are attributed to an increase in employees and rental expenses associated with our additional operating location we added in Redmond, Washington in the middle of 2006. In addition, three members of the executive team worked without compensation in the first quarter of 2006. It is expected that general and administrative costs will be maintained at the present level during the remainder of 2007.

### **Interest Income, Expense and Other Financing Charges**

Interest expense and financing charges for the year ended December 31, 2006 were \$36,209 and arose primarily from an advance received from a third party during the year which is repayable on March 30, 2007 (subsequently extended to September 30, 2007) and evidenced by a Note Payable.

There was also interest earned of \$468 on credit bank balances during the year ended December 31, 2006. In the year ended December 31, 2005 we accrued \$22,667 of interest income on the advances made to AtlasTG in the 2<sup>nd</sup> half of 2005. With the acquisition of AtlasTG in January 2006, this interest income was eliminated as a consolidation entry.

Interest expense was \$30,862 for the six months ended June 30, 2007 and \$19,569 for the quarter ended June 30, 2007. For the six months ended June 30, 2006 interest was a net income of \$2,288. The increase in the second quarter of 2007 is attributable to the accrual of interest on the \$2,500,000 borrowed from WCOF as detailed in Note 5 to the financial statements. Interest expense will be an increasing cost for the remainder of 2007 and through 2008 as interest expense is accrued and paid on the full WCOF facility of \$5 million at an interest rate of 5%. Some of this expense will be offset by interest income on the escrow deposit which accounted for the bulk of the interest income in the period.

Following the issuance to WCOF of 3,250,000 shares of Common Stock in the form of “yield enhancement shares” and a warrant exercisable for five years to purchase 3,250,000 shares of Common Stock at an exercise price of \$2.60 per share (see Note 5 to the financial statements) and other associated transactions, we have been required to carry out a series of Black-Scholes valuations to fair value the various securities that have been issued and then to account for them as additional paid in capital that has then been either expensed as the \$1,415,181 of other financing charges in the quarter ended June 30, 2007, or accounted for as unamortized debt discounts of \$2,429,775. These debt discounts will be then be amortized over the 17 months to the repayment date of the debt on November 30, 2008 along with a similar level of financing charges from the second tranche of \$2,500,000 drawn down on July 11, 2007 and placed in escrow until the terms of release are met.

The offering of these unregistered securities were exempt from registration pursuant to Rule 506 promulgated under the Securities Act of 1933. WCOF represented to us, in writing, that it was an “accredited investor” as that term is defined in Rule 501(a) of Regulation D promulgated under the Securities Act of 1933. The proceeds from these unregistered sales of securities are being used for general working capital purposes.

### **Discontinued Operations**

The sale of our TDC line of business, in early 2006, resulted in income of \$173,853 (after taxes) from discontinued operations compared with income of \$23,730 for the year ended December 31, 2005. This sale of assets offsets some of the losses we experienced in 2006 and 2005 from the TDC business.

### **Provision for Income Taxes**

\$1,914 of income tax provision was recorded for the year ended December 31, 2006, which related to the taxes due for the 2005 year. Income taxes in the amount of \$3,882 were reported in the year ended December 31, 2005, which related to taxes for the years 2003 and 2004. The 2003 tax return had not been prepared when the 2004 financial statements were completed and therefore there was no tax provided in the 2004 financial statements.

Income taxes for the six months ended June 30, 2007 were \$25 (being withholding taxes deducted from interest income) which is the same as in the six months ended June 30, 2006.

### **Foreign Exchange Translation**

There was also \$784 of foreign exchange gains for the year ended December 31, 2006. We had no loss or gain for the year ended December 31, 2005. This contrasted with \$146,074 of unrealized exchange losses for the first six months end June 30, 2007, when there were a number of countervailing movements in both the US Dollar, the Euro and the New Zealand Dollar.

The Company reports in United States Dollars (“USD”) but through its subsidiaries does business in the United States, Malta, and New Zealand. BLive does business both in US and Canadian dollars, but primarily in USD. The Company seeks to borrow in USD to match with the reporting currency, but business units outside of the US receive some revenue and incur expenses and credit in foreign currencies.

Transactions denominated in foreign currencies are translated at the rates of exchange ruling on the dates of the transactions. Monetary assets and liabilities expressed in foreign currencies are translated at the rates of exchange prevailing at the end-of-period exchange rates and the translation differences are reported as other comprehensive income.

### **Comprehensive Net Income (Loss)**

The comprehensive net loss for the year ended December 31, 2006 was \$1,817,767. We incurred an operating loss of \$1,991,620 from continuing operations which was offset by the recovery of \$173,853 (after taxes) on the sale of the assets associated with the TDC business. The net loss for the year ended December 31, 2005 was \$175,791. The 2005 net loss consists of a loss of \$199,521 for the parent company, and a profit of \$23,730 from discontinued TDC operations sold in September 2006.

We experienced a net operating loss (EBIT) of \$1,398,576 for the six months ended June 30, 2007 compared to a net operating loss of \$794,991 for the first six months of 2006. The net operating loss for the quarter ended June 30, 2007 was \$785,485 compared with a net loss of \$529,706 for the quarter ended June 30, 2006.

When our net operating loss of \$1,398,576 is added to our net interest and other financing charges of \$1,443,977, taxes of \$25 and foreign exchange translation losses of \$146,074, our comprehensive loss for the six months ended June 30, 2007 is \$2,988,652 compared to a comprehensive loss of \$836,236 for the six months ended June 30, 2006. The comprehensive net loss for the quarter ended June 30, 2007 was \$2,205,846 compared with a comprehensive loss of \$543,221 for the quarter ended June 30, 2006.

We do not expect to be profitable during 2007, but we expect our level of operating losses to reduce as we gain new application support customers and increase our revenue throughout the year.

### **Liquidity and Capital Resources**

On December 31, 2006, we had cash on hand of \$130,991 compared to \$52,344 at December 31, 2005. During the year ended December 31, 2006 we raised \$2,439,753 through the sale of new equity securities (before costs) to finance the development of the new AtlasTG business compared to \$1,069,755 raised in the year ended December 31, 2005. Sales of equity have historically been our primary source of funding. We will need to continue to successfully raise additional capital through the sale of our equity securities throughout 2007 to finish the development phase of our software, hire and train staff and successfully bring in new customers to achieve our revenue targets.

The capital raised during both 2006 and 2005 has been used to develop the IT support tools and platform for our new business line. The net loss for 2006 was funded out of our new equity issuances.

At June 30, 2007 we had total cash resources of \$581,470 compared to \$214,766 at March 31, 2007 and \$130,991 at December 31, 2006. At June 30, 2007, the Company also had \$1,500,000 of restricted cash in a restricted escrow account at Wells Fargo N.A.,

During the second quarter of 2007 we arranged a further \$475,000 of short-term loans from a stockholder in the early part of the quarter, which were subsequently converted to equity following the completion of the closing of the first tranche of the Securities Purchase Agreement with WCOF. The WCOF facility yielded us a medium term loan in the amount of \$5,000,000 (\$2,500,000 made on June 15, 2007 and \$2,500,000 made on July 11, 2007), which is repayable on November 30, 2008. \$1,500,000 of the first tranche of the loan was placed into an escrow account with Wells Fargo Bank, N.A. ("Wells Fargo") as shown in the consolidated balance sheet. Pursuant to the terms of an Escrow Agreement, dated June 15, 2007, between the Company, WCOF and Wells Fargo, the amount of \$1,500,000 will not be released from escrow, unless one of our subsidiaries enters into contracts with certain customer entities, totaling \$1,000,000 in annual, non-contingent future revenues prior to 5:00 p.m. on December 31, 2007.

The escrow account for the second tranche of \$2,500,000 made on July 11, 2007 will not be released from escrow, unless Atlas US, the Company or any of its subsidiaries enters into contracts with certain customer entities, totaling \$5,000,000 in non-contingent future revenues prior to 5:00 p.m. on December 31, 2007.

### **Critical Accounting Policies**

***Our critical accounting policies are described in Note 2 to the accompanying financial statements - Basis of Presentation and Summary of Significant Accounting Policies of the Notes to our financial statements.***

Our discussion and analysis of financial conditions and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of the financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate the estimates that we have made. These estimates have been based upon historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

#### ***Allowance for Doubtful Accounts.***

We regularly review our accounts receivable and where necessary, set up and maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments, which is included in our bad debt expense. Management determines the adequacy of this allowance by regularly reviewing our accounts receivable aging and evaluating individual customer receivables, considering customers' financial condition, credit history and current economic conditions. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

#### ***Revenue Recognition.***

Revenue is generally recognized when all the following criteria are met: (a) persuasive evidence that contractual agreement exists, (b) delivery has occurred and (c) the fee is fixed or determinable and collection is probable. If all aspects but the last have been met or if post contract customer support could be material, revenue is recognized with payments from customers are received. Any losses on contracts are recognized immediately.

#### ***Income Taxes.***

We account for income taxes in accordance with SFAS No. 109, "Accounting for Income Taxes." Significant judgment is required in determining our provision for income taxes. We assess the likelihood that our deferred tax asset will be recovered from future taxable income, and to the extent we believe that recovery is not likely, we establish a valuation allowance. We consider future taxable income projections, historical results and ongoing tax planning strategies in assessing the recoverability of deferred tax assets. However, adjustments could be required in the future if we determine that the amount to be realized is less or greater than the amount that we recorded. Such adjustments, if any, could have a material impact on our results of our operations.

**Off-Balance Sheet Arrangements**

We have no off-balance sheet arrangements.

## BUSINESS

### Overview

We are currently a reporting company under Section 12(g) of the Exchange Act and our Common Stock is quoted on the OTC Bulletin Board. At the annual general meeting of the Company on July 12, 2007, the Certificate of Incorporation of the Company was amended to change the name of the Company from Tribeworks, Inc. to Atlas Technology Group, Inc. As of August 16, 2007, the Company's Common Stock now trades under the ticker symbol ATYG.OB with the new CUSIP number of 049432 107 and new ISIN number of US0494321070.

We were incorporated in August 1998 as Tribeworks, Inc., a California corporation (previously defined as "California Tribeworks"). On November 2, 1999, we entered into a transaction with Pan World, whereby Pan World agreed to provide financing in connection with the merger of a newly formed subsidiary of Pan World into California Tribeworks (the "Recapitalization"). Prior to the Recapitalization, Pan World never had any material operations. As a result of the Recapitalization, shareholders of California Tribeworks exchanged all of their shares of California Tribeworks for Pan World common stock. Subsequent to the Recapitalization, we were reincorporated in Delaware as Tribeworks, Inc. We opened a wholly-owned subsidiary in Japan, Tribeworks Japan, in August 2000, which engaged in sales and professional services activities primarily in our Enterprise application development business, until it was closed during the third quarter of 2004.

Beginning in 2003, we partnered with Kinoma to create new products for the mobile software market, specifically targeting Palm OS devices. Kinoma makes Kinoma Player, which is a high-resolution, interactive movie player for handhelds running the Palm OS. We developed two products in partnership with Kinoma that create Kinoma Player content, iShell Mobile, an iShell-based application development tool, launched in October 2003, and Kinoma Media Album, a consumer multimedia management tool, launched in May of 2004.

During 2005, the previous business lines of Tribeworks were separated into a wholly owned subsidiary named Tribeworks Development Corporation (previously defined as "TDC"). The TDC business was primarily built around the sale of software through two main distribution channels: the graphics software tools business and proprietary products called iShell® or iShell Mobile and an enterprise application development business. TDC was sold to its former management on September 14, 2006. Until approximately the middle part of 2006, the iShell line of products and an enterprise application development business were our primary product offering and business. The former assets, liabilities and business operations of TDC were reclassified as discontinued operations in the financial statements in annual report for the year ended December 31, 2006 on Form 10-KSB.

On January 20, 2006, the Company acquired 100 percent of the issued capital of TakeCareofIT Holdings Limited (now renamed Atlas Technology Group Holdings Limited), a Malta corporation, and its subsidiaries, who have been collectively doing business as Atlas Technology Group for \$37,235 in cash and assumed \$1,143,780 of current liabilities (of which \$1,073,744 plus interest was due to Tribeworks). Atlas Technology Group Holdings Limited was established in September 2004 to provide external IT application support services for organizations with large IT functions. The new Atlas Technology Group line of business acquired, together with all related developments in this regard since the acquisition are hereinafter collectively described as "AtlasTG".

The results of the AtlasTG operations, from the date of acquisition, January 20, 2006, are included in the December 31, 2006 financial statements as presented in this document.

TakeCareofIT Holdings Ltd., was established in September 2004 to provide external IT application support services for organizations with large IT functions. The AtlasTG IT support business will be our primary business focus going forward. We plan to become a leading IT outsourcing support company for custom software applications worldwide. After extensive beta testing, the AtlasTG business line is now at the revenue launch stage with the first support

customers being signed on in February 2007. Our in-house developed tools and processes needed to onboard IT applications and provide remote IT application support are now ready to meet the needs of our customers.

On January 26, 2007 the Company acquired all of the assets (but not the liabilities) including its IT technology, trademarks and 700 customers of BLive Networks Inc., in exchange for the issuance of 1,150,000 shares of restricted Common Stock of the Company. 150,000 of these shares of Common Stock were for an M&A Advisory Fee. Additionally, in consideration of the payment by Petroleum Corporation of Canada Limited ("Petroleum Corp.") of \$100,010, the Company agreed to issue to Petroleum Corp. 100,000 fully paid shares of Common Stock and a warrant to purchase 300,000 shares of Common Stock exercisable for a period of two years at a strike price of \$1.25 per share.

Included in the assets was 49% of a Canadian company called InfoBuild Networks (Canada) Inc., and subsequent to the initial acquisition an option to purchase the remaining 51% of InfoBuild Networks (Canada) Inc was exercised. The assets acquired have been transferred into InfoBuild Networks (Canada) Inc. and the name of that company has been changed to BLive Networks Inc. and hereon this business is referred to as (“BLive”). The assets acquired have been consolidated into the financial statements presented herein along with the results of BLive from January 26, 2007.

### **Operation of Business**

Our primary service is remotely supporting custom and complex software applications for customers who want to outsource non-core business processes and focus on their core competencies, through the use of proprietary processes and monitoring systems.

Our initial support centers are based in Malta and Wellington, New Zealand, with technical support from a small staff in Redmond, Washington, creating “follow-the-sun” 24 hour coverage. As business grows, additional locations will be added to increase capacity, as needed.

The Company continues to test and harden its new software tools and is now beginning to implement its plan of selling software support services, and is pursuing sales in the western United States (“US”), the European Union (“EU”), specifically the United Kingdom and Italy. The Company now has support contracts with three customers in the US. The Company will continue to target customers in Italy, the UK and the west coast of the US before it later expands its sales efforts worldwide.

The Company is initially marketing to four targeted groups of potential clients:

- 1) Directly to initial pilot customers, who will serve as final beta test opportunities for the Company’s systems, software monitoring and incident management systems;
- 2) Agent companies, who are strategic partners and will represent the Company in specific regions in defining strategic reseller and onboarding partners;
- 3) Onboarding partners who have the internal capabilities to select and technically audit, harden, stress-test, and document complex software systems; and
- 4) Reseller channel partners who will be the backbone of the Company’s sales strategy. With existing large customer bases of large and complex software systems, resellers will be provided the advanced AtlasTG tools and systems to monitor and support highly complex software systems on an ongoing basis.

The acquisition of BLive has further expanded the Company’s capability of delivering high quality outsourced support into the IT Support market. Prior to our acquisition of BLive, BLive developed and operated interactive support tools for companies providing IT support worldwide. Utilizing proprietary technology, BLive’s systems are used by companies for remote technical support and sales, both externally, and for internal corporate ‘Helpdesk’ support departments. This technology enables service providers to deliver faster response times and a personal connection with users and is complimentary to the tools developed by AtlasTG .

We currently have 28 employees and 3 working executive directors. Our primary service of remotely supporting custom and complex software applications for customers who want to outsource non-core business processes and focus on their core competencies, through the use of proprietary processes and monitoring systems, is maintained by our state-of-the-art data centers in Seattle and Malta, and 24x7 “follow the sun” support centers in Malta,

Redmond/Seattle, and Wellington.

22

---

## **Products and Services**

We are in the business of providing custom, outsourced, application software support services to our customers. These services range from supporting specialized networks and single applications to providing the entire IT infrastructure management for customers who want to outsource IT application support and focus on their core business competencies. Through partnerships with other IT development consultants, fully outsourced IT services can be provided, with hard performance metrics and predictable costs.

With more than thirty years of combined experience in IT support, our management team brings a significant level of knowledge and experience in outsourced application support. Our management team's experience includes worldwide application support for companies such as JP Morgan, Microsoft, and Avande.

We have spent two years developing our own proprietary software tools and processes. We are currently leveraging the recent advances in software, monitoring systems, and communications, to build a new, leading edge, global support infrastructure that provides 24x7 software support to large and medium sized companies. These new application on-boarding and monitoring processes should allow for dramatic cost savings over existing legacy IT service providers.

We intend to offer our services worldwide, with the majority of our targeted customers having multi-national operations. Our operations are designed to be a highly distributable venture, with the ability to place people in the best possible locations so that we can provide a seamless service offering across the world. The worldwide IT market is approximately one trillion dollars in size including hardware, software and communications. (Source: Gartner available at <http://www3.gartner.com/Init>)

The latest trend in outsourcing toward outsourcing application support is dramatic. According to Forrester, Tier 2 application support and business outsourcing is forecast to represent a \$220 billion market by 2006 with additional growth averaging 10% annually. According to Forrester the percentage of IT budgets spent on maintaining existing applications was 73% in 2004 and 76% in 2005, and the trend is expected to continue. (Source: Forrester Research, Inc. "2005 Enterprise IT Outlook: Business Technographics North America").

To many industry leaders, managed services represent an important change to how technology is delivered and consumed. The managed services market has expanded rapidly over the past several years, particularly in the under-served S-MMB market. The S-MMB IT services market estimated to be worth \$220 is expected to grow at a CAGR of 7.6% from 2004 to 2008. RMM is the hottest growing segment expected to grow at 36% CAGR through 2008 in North America. A recent study by Forrester cited the S-MMB market at 48% of overall U.S. IT spending, stating that it will surpass enterprise IT spending by 2007. (Source: Gartner - Forecast IT Service, Worldwide, November 2005).

Through our BLive subsidiary we also provide our proprietary interactive support tools for both smaller and S-MMB companies via systems that can be used by companies for remote technical support and sales, both externally, and for internal corporate "Helpdesk" support departments. This technology enables our service providers to deliver faster response times and a personal connection with users.

## **Technical Support and Education**

We provide both technical support and training to our customers as well as in-house and external training to our staff. Successful training of our technical support staff is key to our success. During 2006, all of our technical staff received training for various Microsoft technical qualifications. During 2007, we anticipate becoming a Microsoft "Gold Partner" with advanced infrastructure and learning solutions specializations. We believe that by becoming a Microsoft "Gold Partner" this will provide us with additional recognition and therefore revenue opportunities.

## Competition

IT software application support is one of the last available outsourcing opportunities in the IT field. While many other IT functions have been outsourced, software application support has traditionally been kept in-house so that management is able to maintain control of this function. In recent years, a number of companies have outsourced all of their IT needs to large IT companies.

There are a large number of traditional consultant competitors competing in the same businesses as us, including IBM, HP, EDS, and Accenture as well as a number of smaller companies. The industry is broken down into three segments: (i) the hardware manufacturers that provide additional IT services; (ii) the large pure-play IT service providers targeting Fortune 500 companies, and (iii) smaller independent companies that generally specialize in specific local markets.

The largest firms that we compete with in terms of 2006 revenue are HP with total revenue of \$91.7 billion, of which approximately \$15.6 billion is services including IT outsourcing. Source: HP.com.

IBM with total sales of \$91.4 billion, of which approximately half, or \$49 billion, represents services, and of this amount approximately \$17.0 billion is strategic outsourcing services. Strategic outsourcing services is one of IBM's fastest growing business segments and is growing at 3.2% annually, almost twice as fast as IBM Global Services total revenue. Source: IBM.com.

The pure-play IT service providers, with the majority of their fiscal year ended 2006 revenues coming from IT support services include EDS, with \$21.3 billion in revenue (Source: EDS.com), Computer Sciences Corporation with \$14.6 billion (Source: CSC.com), Accenture with \$18.2 billion (Source: Accenture.com), and BearingPoint Inc. with \$3.4 billion in 2006 revenue. (Source: Bearingpoint.com) Our advantage over our larger competitors is that IT support is our main business focus and is not an ancillary service.

Other competitors of ours that provide support services and call centers, especially in India, include Wipro and Infosys. TCS is another of our primary competitors that competes with us globally. Many hosting providers are also attempting to offer ASP services as an add-on. There are other regional players, such as Wavex and Motive that are also targeting the S-MMB market.

The principal advantage of what we offer is the ability to access the computers of our customers remotely. This allows our customers to maintain physical possession of their computers and continue their daily operations. We also compete against our competitors by establishing ourselves as a service provider with deep industry expertise in our sector, which enables us to respond rapidly to market trends and the evolving needs of our clients in our sector. IT support is our sole business focus, unlike many of our competitors who offer IT support as an adjunct to their existing hardware or software sales.

In addition to the small and large competitors described above, we believe that our single biggest competitive factor is existing in-house support groups. We believe that in-house support groups are currently providing over 90% of IT support services.

## Proprietary Rights

We rely on a combination of copyright laws, trademark laws, contract laws, and other intellectual property protection methods (such as signing confidentiality and non-disclosure agreements with potential clients) to protect our technology, names and logos in the United States and other countries. Tribeworks' patented and trademarked "iShell" product and logo, which until mid 2006 was our lead product, were sold during 2006 to a former staff member of ours.

The acquisition of AtlasTG resulted in additional proprietary rights such as AtlasTG's unique OnBoarding processes as well as a range of trade secrets relating to its IT support technologies. We are now in the process of applying for a number of patents and trademarks for these systems, processes and their unique names as part of securing our proprietary products and establishing our marketing and branding.

### **Service Deployment Schedule and Capital Requirements**

We have spent the past two years developing our own proprietary software tools and processes and are now beginning to implement our plan of selling IT software support services, and is pursuing sales in the western US and the European Union, specifically the United Kingdom and Italy.

With initial support centers are based in Malta and Wellington, New Zealand, and with technical support from a small staff in Redmond, Washington, we have created “follow-the-sun” 24 hour coverage to offer to our software application support customers. As business grows, additional locations will be added to increase capacity, as needed.

We recently raised \$5 million of medium term funds from WCOF, who are now our largest stockholder, and these funds will be used to implement our sales and marketing program and finance our operations as we develop revenue to a breakeven point over the next 12-18 months.

We will need to raise additional equity in mid 2008 to repay the \$5 million of medium term debt we have raised from WCOF. The ability to raise this new equity will depend upon our sales and marketing performance over the forthcoming twelve months.

The Company now has support contracts with four customers in the US and is currently negotiating with two more potential US customers, with the aim of concluding at least one of these contracts by the end of the fourth quarter of 2007.

In March 2007 we completed the onboarding of our first IT application support customer, Mobile Content Networks, Inc. (“MCN”), in Palo Alto, California. MCN provides real-time mobile search solutions to 3GSM mobile telephone networks such as D2 of Japan and Total Access Communications Plc (“DTAC”) of Thailand. At the end of 2006, D2 Communications, the largest mobile advertising agency in the world, released its FM Radio Search service to DoCoMo handset users providing listeners of FM radio with one click access to ringtones, music downloads, CDs and DVDs through MCN’s MobileSearch.net platform. MCN is currently working with over twenty partners in ten countries who are developing solutions based on its platform and we aim to support all of their software applications as they grow their business.

We are currently onboarding our second IT application support customer, Viewpath.com (“Viewpath”) and we expected to start generating revenue from this customer before the end of the fourth quarter. We have entered into an agreement with Viewpath that calls for us to provide 24x7 support to Viewpath's customers and to monitor its highly sophisticated .NET application.

We have recently concluded a third IT application support contract with Shoe Pavillion Inc. (Sherman Oaks, CA) and this customer is currently being onboarded with full support services commencing during the fourth quarter of 2007.

We are also in discussions with a major international IT company to provide our IT application support services and we will hopefully enter into a preliminary agreement with this company by the end of the fourth quarter of 2007 and it is this contract that unlocks the WCOF escrow deposit described in more detail elsewhere in this document.

The aim is close one new IT application support contract per month over the next twelve months.

Our BLive business which sells its support service software over the internet, has recently increased its marketing spend and is planning to shortly release an upgraded version of its software. The plan is to further revise the BLive software and to develop an enterprise version that will achieve some degree of crossover between the two arms of our IT application support businesses.

While our primary focus is IT application support we also have a joint venture with Breard LLC in Redmond, where we are operating a staff augmentation consulting service for potential IT support customers as a first step in developing a relationship with these potential customers with a view to them becoming an IT support customer over time. It is also a profitable supplement to our mainstream business.

25

---

### **Strategic Partnerships**

The marketing plan is to start by targeting customers on the west coast of the US as well as in Italy and the UK, before it later expands its sales efforts worldwide.

The Company is initially marketing to four targeted groups of potential clients:

- 1) Directly to initial pilot customers, who will serve as final beta test opportunities for the Company's systems, software monitoring and incident management systems;
- 2) Agent companies, who are strategic partners and will represent the Company in specific regions in defining strategic reseller and onboarding partners;
- 3) Onboarding partners who have the internal capabilities to select and technically audit, harden, stress-test, and document complex software systems; and
- 4) Reseller channel partners who will be the backbone of the Company's sales strategy. With existing large customer bases of large and complex software systems, resellers will be provided the advanced AtlasTG tools and systems to monitor and support highly complex software systems on an ongoing basis.

While our initial sales have been made by our internal marketing team, we anticipate that revenue from our new IT support services will increase during the 2008 year as new customers are recruited and onboarded by our newly appointed sales and onboarding partners.

To date, we have appointed UniTech and PA Consulting from the UK and the Italian IT consulting company Bizmatica Sistemi s.r.l., as onboarding partners for our software services and IT support. We are currently negotiating with another party in Europe and are close to finalizing an agreement with a large international consulting firm to also become our onboarding partner in the United States.

### **Staff and Staff Development**

We currently have 28 employees and 3 working executive directors operating from our initial support centers based in Malta and Wellington, New Zealand, and with technical support from a small staff in Redmond, Washington. Through these three locations we have created "follow-the-sun" 24 hour coverage to offer to our IT application support customers.

We actively recruit staff with the appropriate technical qualifications and then train them in the operation of our proprietary software and tools. Over the past twelve months we have provided technical training to our staff through both in-house and external training. Successful training of our technical support staff is key to our success. During 2006, all of our technical staff received training for various Microsoft technical qualifications. During 2007, we anticipate becoming a Microsoft "Gold Partner" with advanced infrastructure and learning solutions specializations. We believe that by becoming a Microsoft "Gold Partner" this will provide us with additional recognition and therefore revenue opportunities.

We pay competitive salaries in relative local market and also operate a performance related bonus and incentive program which is payable both in cash and staff options and stock, so as to retain those individuals capable of achieving challenging our performance standards

### **Litigation**

We are currently unaware of any currently pending or threatened material litigation against us.

26

---

**Independent Accountants**

Our annual financial statements are audited by Williams & Webster, P.S., an independent registered public accounting firm located in Spokane, Washington.

27

---

### **DESCRIPTION OF PROPERTY**

Our subsidiary in Malta, has a six (6) year office lease covering approximately 471 square meters located at Level 3, 9 Empire Stadium Street, Gzira GZR04, Malta, expiring on August 14, 2010 at a base annual rent of MTL16,000 (approx US\$51,000), which escalates by MTL2,000 per annum (approx US\$6,000) until the final year.

Our New Zealand subsidiary, has a four year office lease of the second floor of 139-141 Featherston Street in Wellington, New Zealand expiring on July 31, 2009. The office comprises approximately 300 sq meters with a base annual rental of NZ\$55,500 per annum (approx US\$38,500) plus 12.5% Goods and Services Tax ("GST") which is claimable against GST revenue tax payable or is refundable, with two year rent reviews. The annual rental on this lease has just been reviewed to NZ\$66,000 (approx. US\$46,200).

Our US subsidiary, has a three year office lease of Suite 2001 at the Limited Edition Office Park, 2001 152<sup>nd</sup> Avenue NE, Redmond, Washington, expiring on July 31, 2009. The office comprises 3,825 rentable square feet at a base annual rental of US\$61,200 in the first year, escalating to \$68,850 in the 2<sup>nd</sup> year and \$76,500 in the 3<sup>rd</sup> year.

All of the aforementioned leased facilities are adequate for our current needs.

**DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS AND CONTROL PERSONS**

Set forth below is the name, age, years of service and positions of our executive officers and directors of the Company as of November 6, 2007.

<b>Name</b>	<b>Age</b>	<b>Position</b>	<b>Officer/Director Since</b>
Robert E. Altinger	45	Director and Chairman of the Board	August, 2005
Andrew J E Berger	46	Director	June 2006
W. Gordon Blankstein	57	Director	August, 2005
Robert C. Gardner	66	Director	August, 2005
Peter B. Jacobson	49	Director and CEO	June, 2005 CEO since August 2005
B.S.P. (Paddy) Marra	61	Director and CFO	December 2005 CFO since Sept. 2005
Michael T. Murphy	39	Chief Operating Officer	July 2006

The directors serve until their successors are elected by the stockholders. Vacancies on the Board of Directors may be filled by appointment of the majority of the continuing directors. The executive officers serve at the discretion of the Board of Directors. The directors named above will serve until our next annual general meeting of stockholders in 2008. Directors will be elected for one-year terms at the annual general meeting. All officers and directors listed above will remain in office until the next annual general meeting of our stockholders, and until their successors have been duly elected and qualified.

There are no agreements with respect to the election of directors. During 2007, we have not compensated our directors for service on our Board of Directors, any committee thereof, but they have been reimbursed for expenses incurred for attendance at meetings of our Board of Directors and/or any committee of our Board of Directors. Officers are appointed annually by our Board of Directors and each executive officer serves at the discretion of our Board of Directors. We do not have any standing committees. Our Board of Directors may in the future determine to pay directors' fees.

None of our officers and/or directors have ever filed any bankruptcy petition, been convicted of or been the subject of any criminal proceedings or the subject of any order, judgment or decree involving the violation of any state or federal securities laws.

**Biographical Information of Executive Officers and Directors***Robert Altinger, 45 - Director*

Prior to founding Atlas Technology Group, a Malta company ("Atlas Malta"), Robert Altinger was Principal Consultant of WebConsult, Inc, a Microsoft- approved vendor of IT consulting services since September 2001. Prior to joining WebConsult, Inc., Mr. Altinger had over 20 years of IT experience, including serving as Director of Worldwide IT Operations for Avanade Corp, in various capacities at Microsoft, including Director of Product Group IT Services,

and prior to that at JP Morgan. Mr Altinger obtained a B.Sc. (Eng.) from Exeter University in the United Kingdom in 1986.

29

---

*Andrew Berger, 46 - Director*

Andrew Berger recently retired from the position of Vice President of Alien Technology Europe, a world leader in RFID technologies. Mr. Berger was responsible for all European activity. Prior to joining Alien Technology, Mr. Berger was an equity partner and founding member of Accenture's strategy practice. He also led Accenture's Northern European supply chain practice and global Supply Chain Innovation team. Prior to joining Accenture, he served as an operational Intelligence Officer with the Airborne and Special Forces divisions of the British Army. He has a Bachelor's of Science from Bristol University and an MBA with Distinction from London Business School.

*W. Gordon Blankstein, 57 - Director*

Gordon Blankstein is currently a member of the board of directors of Genco Resources, Ltd., a publicly-traded mining company and has been since 2002. He is also a director of Digifonica (International) Limited. From 1997 through 2002, Mr. Blankstein was Chairman and Chief Executive Officer of Global Light Telecommunications, Inc., an American Stock Exchange-listed company. Mr. Blankstein obtained a B.Sc. (Agri.) from the University of British Columbia in 1973 and an MBA from the University of British Columbia in 1976.

*Robert C. Gardner, 66 - Director*

Robert Gardner is currently Chairman of the Board of Genco Resources Ltd. and a partner in the law firm of Gardner & Associates in Vancouver, BC, Canada. He is also a Director of Kootenay Gold Inc. and United Bolero. Mr. Gardner is a corporate lawyer and has practiced law there since 1989. Mr. Gardner and obtained a M.A. from Cambridge University in Cambridge, United Kingdom in 1961 and a L.L.M. degree from Cambridge University in 1962.

*Peter B. Jacobson, 46 - Director and CEO*

Prior to joining Atlas and Tribeworks, Peter Jacobson was founder and President of Monitor Technologies, Inc., an IT network and support company to Fortune 1000 firms from 1985 to 1995, a partner and Marketing Director of OceanPC, Inc., a leader in computer-based marine GPS navigation systems from 1995 to 2002, and subsequently, was President of First Call Wireless, LLC., a worldwide cellular distribution company, from 2002 until 2005. Peter Jacobson has served on numerous boards of directors, including The Seattle Center, Northwest Children's Fund, Lakeside Technology Foundation and Creditnet.com. He is a past President of the Washington Young Entrepreneurs Organization. Mr. Jacobson obtained a B.A. from the University of Washington in 1985.

*Byran S.P. (Paddy) Marra, 61 - Director and CFO*

Paddy Marra has over 30 years of corporate finance experience, including, recently with FreshXtend Technologies Corp. (Canada) (CEO and now Deputy Chairman) a TSX-V listed company, CFO of the Brierley Investments Limited group (New Zealand), and Chairman and CEO of Chamundi Power Corporation Ltd. (India). Paddy Marra has degrees in both Accounting and Finance (BCA) and in Economics and Economic History (BA) from Victoria University of Wellington, New Zealand. He is also a Fellow (FCA) of the Institute of Chartered Accountants of New Zealand and is a former member of the Financial Reporting Standards Board in New Zealand and numerous other Boards and Directorships of publicly traded companies. Mr. Marra also acts as Corporate Secretary to the Board of Directors.

*Michael Murphy, 39 - Chief Operating Officer*

Mike Murphy joined us after a 15 year career at Microsoft Corporation where he was most recently the Senior Director leading the Business Group IT organization. At Microsoft, Mr. Murphy was responsible for critical aspects of Microsoft's business, including source code management and product localization. His experience includes leading

teams throughout the US, Europe, Eastern Asia, and India. Mr. Murphy holds a B.A. in Information Systems from Washington State University.

30

---

## **CORPORATE GOVERNANCE**

### **Code of Business Conduct and Ethics**

We have not yet adopted a code of ethics for our officers, directors or employees but intend to do so during 2007.

### **Director Independence**

The Board of Directors currently has three independent directors, Messrs. Gardner, Blankstein and Berger.

### **Board of Directors Composition and Director Qualifications**

As of the date of this prospectus, the Board of Directors has not appointed members to a Nominating Committee and is therefore responsible for those matters that a Nominating Committee might otherwise assume. Currently, the Board of Directors has no formal procedures in place for assessing the composition of the Board of Directors or the qualifications of the directors. However, we believe that the individuals currently serving on our Board of Directors are a qualified and diverse group of individuals that possess broad experience at the policy-making level, are committed to enhancing stockholder value and have sufficient time to carry out their duties and to provide insight and practical wisdom based on their experience.

### **Director Recommendations by Stockholders**

The Board of Directors has not established a formal process for consideration of director recommendations from stockholders. The Board of Directors will, however, consider recommendations, if received, in ample time before the preparation and release of the Company's annual proxy materials. For consideration, a recommendation would typically be submitted to our corporate secretary by the January 1<sup>st</sup> immediately preceding the annual meeting.

### **Communications with the Board of Directors**

Stockholders may communicate with the Board of Directors, non-management directors as a group, and individual directors by submitting their communications in writing to the Company's Chief Executive Officer. All communications must identify the author, state that the author is a stockholder of the Company, and be forwarded by certified mail to the following address:

Atlas Technology Group, Inc.  
2001 152<sup>nd</sup> Avenue NE  
Redmond, Washington 98052  
Attn: Chief Executive Officer

### **Board of Directors Meetings**

Our Board of Directors held one meeting during 2006. The Board of Directors acted by unanimous written consent on sixteen occasions in 2006.

### **Certain Legal Proceedings**

No director, nominee for director, or executive officer of ours has appeared as a party in any legal proceeding that would be indicative of his ability or integrity during the past five years.

### **Board of Directors Committees**

As of the date of this prospectus, the Board of Directors has not formed any committees, but has plans to form committees of the Board of Directors. Therefore, the roles of an Audit, Compensation and Nominating Committee have been conducted by the entire Board of Directors.

### ***Audit Committee***

As stated above we do not have an Audit Committee. When choosing the board's Audit Committee members, the Board of Directors will consider a number of factors, including the business experience and financial expertise of proposed Audit Committee members such that each satisfies the Securities and Exchange Commission's definition of "audit committee financial expert".

We do not have an Audit Committee or an "audit committee financial expert" within the meaning of such phrase under applicable regulations of the SEC. Our Board of Directors believes that each of its directors is financially literate and experienced in business matters, and that one or more directors are capable of:

- Understanding generally accepted accounting principles, or GAAP, and financial statements;
- Assessing the general application of GAAP principles in connection with our accounting for estimates, accruals and reserves;
- Analyzing and evaluating our financial statements; and
- Understanding our internal controls and procedures for financial reporting;

all of which are attributes of an audit committee financial expert. However, the Board of Directors believes that our directors have not obtained these attributes through the experience specified in the SEC's definition of "audit committee financial expert."

### ***Nominating Committee***

As of the date of this prospectus, the Board of Directors has not appointed members to a Nominating Committee and is therefore responsible for those matters that a Nominating Committee might otherwise assume. Currently, the Board of Directors has no formal procedures for assessing the composition of the Board of Directors or the qualifications of our directors. However, we believe that the individuals currently serving on our Board of Directors are a qualified and diverse group of individuals that possess broad experience at the policy-making level, are committed to enhancing stockholder value and have sufficient time to carry out their duties and to provide insight and practical wisdom based on their experience.

### ***Compensation Committee***

We do not currently have a Compensation Committee. Compensation decisions are made by our Board of Directors. Our Board of Directors places high value on attracting and retaining our executives since it is their talent and performance that is responsible for our success. Therefore, our compensation philosophy is to create a performance-based culture that attracts and retains a superior team. We aim to achieve this goal by designing a competitive and fiscally responsible compensation program to:

- Attract the highest caliber of talent required for the success of our business;
- Retain those individuals capable of achieving challenging performance standards;
- Incent our executives to strive for superior company wide and individual performance;  
and
- Align management and stockholder interests over both the short and long-term.

**EXECUTIVE COMPENSATION**

The following table provides certain summary information concerning compensation of our executives for the year ended December 31, 2006. No executive officer, other than as listed below, received total compensation from us in excess of \$100,000 during 2005.

**Summary Compensation Table**

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Non- Equity Incentive Plan Compen- sation (\$)	Change in		All other Compen- sation (\$)	Total (\$)
							Non- Pension Value and Deferred Compensation Earnings	Pension Value and Deferred Compensation Earnings		
Peter B. Jacobson, Chief Executive Officer, President and Director	2006	\$ 100,000(1)	-0-	-0-	-0-	-0-	-0-	-0-	-0-	\$ 100,000
Robert Altinger, Executive Chairman	2006	\$ 145,000(1)	-0-	-0-	-0-	-0-	-0-	-0-	-0-	\$ 145,000
B.S.P. (Paddy) Marra, Chief Financial Officer and Director	2006	\$ 100,000(1)	-0-	-0-	-0-	-0-	-0-	-0-	-0-	\$ 100,000

(1) Messrs. Altinger and Marra are not direct employees, but are engaged through consulting companies who are responsible for paying their salaries, taxes and benefits. Mr. Jacobson receives his salary on an independent contractor basis.

**Outstanding Equity Awards at Fiscal Year-End Table**

No options or stock awards have been granted to any of our executive officers or directors in the form of equity awards. Pursuant to Item 402(a)(4) of Regulation S-B, the Outstanding Equity Awards at Fiscal Year-End Table is omitted because there has been no compensation awarded to, earned by, or paid to any of the named executive officers or directors required to be reported in that table.

**Employment Agreements and Change of Control Agreements**

We have not entered into written employment agreements with any of our executive officers named in the Summary Compensation Table above. There are no compensatory plans or arrangements, including payments to be received from us, with respect to a named executive officer, if such plan or arrangement would result from the resignation, retirement or any other termination of such executive officer's employment with us or form a change-in-control of us or a change in the named executive officer's responsibilities following a change-in-control. We may enter into written employment agreements in 2007 with Messrs. Jacobson, Altinger, Marra and our other executive officers.

***Option Grants in Last Fiscal Year***

We do not currently have any outstanding stock appreciation rights (SARs). No options or warrants were granted in 2006 to any executive officers.

***Aggregated Option Exercises in Last Fiscal Year and Fiscal Year End Option Values***

No options were exercised in 2006 by any executive officers.

***Director Compensation***

Directors do not receive any compensation for their services as members of the Board of Directors during 2006, although this could be subject to change during 2007. Directors are reimbursed for expenses in connection with attendance at Board of Directors and committee meetings. Directors are eligible to participate as optionees under our compensatory equity plans.

**SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT**

The following table sets forth as of November 6, 2007, certain information regarding the beneficial ownership of our Common Stock by (i) all person known to the Company who own more than 5% of the outstanding Common Stock, (ii) each director, (iii) each of our executive officers, and (iv) all executive officers and directors as a group. Unless otherwise indicated, the persons named in the table below have sole voting and investment power with respect to all shares of Common Stock shown as beneficially owned by them.

Name and Address of Beneficial Owner	Shares Beneficially Owned (1)	Percent of Class (2)
<b>Directors and Officers:</b>		
Michael T. Murphy 2812 West Lake Sammamish Pkwy NE Redmond, WA 98052	4,338,636(3)	12.8%
Robert Altinger The Ridge 31 <sup>st</sup> March Street Gharghur, Malta	1,575,000(4)	4.7%
Peter Jacobson 111 Via Quito Newport Beach, CA 92663-5503	1,575,000(5)	4.7%
W. Gordon Blankstein 8011 240 St. Vancouver, B.C., Canada	600,000(6)	1.8%
Robert C. Gardner 2153, 349 West Georgia St. Vancouver, B.C., Canada	500,000	1.5%
Officers and Directors as a group (7 persons)	6,638,636(7)	19.6%
<b>5% Shareholders:</b>		
West Coast Opportunity Fund, LLC 2151 Alessandro Drive, Suite 100 Ventura, CA 93001	13,000,000(8)	32.2%
Robert Blankstein 8032 Government Rd. Burnaby, B.C., Canada	4,017,750(9)	11.6%
WebConsult Limited Bankhaus Carl Spangler Schwatzstr 17 A 5030, Austria	2,202,274	6.5%

Pharaoh Properties Corporation Alves De Souza Houman Colart 6 Cours De Rive 1204 Geneva, Switzerland	2,002,272	5.9%
---	-----------	------

(1) Includes all shares of our Common Stock with respect to which each holder directly, through any contract, arrangement, understanding, relationship or otherwise has or shares the power to vote or direct voting of such shares or to dispose or direct the disposition of such shares.

(2) Based upon 33,856,805 shares of our Common Stock issued and outstanding as of November 6, 2007.

(3) Includes 975,000 shares held by AMJ Holdings. We anticipate that the shares held by AMJ Holdings will be granted in the form of stock options to our employees in the future. Mr. Murphy, Mr. Altinger and Mr. Jacobson serve as co-trustees of shares held by AMJ Holdings.

(4) Includes 975,000 shares held by AMJ Holdings. We anticipate that the shares held by AMJ Holdings will be granted in the form of stock options to our employees in the future. Mr. Murphy, Mr. Altinger and Mr. Jacobson serve as co-trustees of shares held by AMJ Holdings.

(5) Mr. Jacobson personally owns 600,000 shares of our Common Stock. Includes 975,000 shares held by AMJ Holdings. We anticipate that the shares held by AMJ Holdings will be granted in the form of stock options to our employees in the future. Mr. Murphy, Mr. Altinger and Mr. Jacobson serve as co-trustees of shares held by AMJ Holdings. Mr. Jacobson's wife, Georgina Jacobson, owns 40,000 shares of our Common Stock and a warrant to purchase 20,000 shares of our Common Stock. Mr. Jacobson expressly disclaims beneficial ownership of shares owned by his wife.

(6) Mr. Blankstein personally owns 600,000 shares of our Common Stock. Yvonne Blankstein, the wife of Gordon Blankstein, owns 530,083 shares of our Common Stock and holds 500,000 shares of Common Stock in trust for Shelby Blankstein. Mr. Blankstein expressly disclaims beneficial ownership of shares owned by his wife and shares that his wife holds in trust for Shelby Blankstein.

(7) This group includes 7 people, 5 of whom are listed on the accompanying table. Paddy Marra, an officer and director, and Andrew Berger, a director, are not listed on the accompanying table and do not currently own any of our Common Stock. To avoid double-counting: the 975,000 shares of Common Stock held by AMJ Holdings and deemed to be beneficially owned by Robert Altinger, Peter Jacobson and Michael Murphy as a result of their position as co-trustees of AMJ Holdings have only been included once in the total (see Note (3), (4) and (5) above).

(8) Includes 6,500,000 shares of Common Stock and warrants to purchase up to 6,500,000 shares of Common Stock. The shares of Common Stock and warrants are owned directly by West Coast Opportunity Fund, LLC. West Coast Asset Management, Inc. is the managing member of West Coast Opportunity Fund, LLC. Paul J. Orfalea, Lance W. Helfert and R. Atticus Lowe, the members of the Investment Committee of West Coast Asset Management, Inc. exercise shared voting and investment power over the shares of Common Stock and warrants. Each of West Coast Asset Management, Inc. and Messrs. Orfalea, Helfert and Lowe disclaims beneficial ownership of the shares and warrants except to the extent of his or its pecuniary interest therein.

(9) Mr. Blankstein personally owns 2,581,500 shares of Common Stock and indirectly owns 575,000 shares of Common Stock as trustee for Charles Blankstein, the Mr. Blankstein's minor son. Mr. Blankstein also owns warrants to purchase up to 861,250 shares of our Common Stock.

## **DIVIDEND POLICY**

The payment of dividends is within the discretion of the Company's Board of Directors. The Company presently intends to retain all earnings, if any, for use in the Company's business operations and accordingly, the Board of Directors does not anticipate declaring any dividends in the foreseeable future.

We have not previously declared or paid any cash dividends on our Common Stock and presently intend to retain our future earnings, if any, to fund the development and growth of our business and, therefore, do not anticipate paying any cash dividends in the foreseeable future. We have accrued \$5,880 of dividends owed to holders of our Series "B" Convertible Preferred Stock ("Series B Preferred Stock"). The Series B Preferred Stock was converted into Common Stock on December 29, 2006.

**MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS**

**Price Range of Our Common Stock**

Our Common Stock is currently quoted on the OTC Bulletin Board under the trading symbol ATYG.OB (formerly TWKS.OB). The following table sets forth the range of closing high and low bid quotes for each period indicated as reported by stockwatch.com and reflects all stock splits effected by us:

<b>2007</b>	<b>2007</b>	<b>2006</b>	<b>2006</b>	<b>2005</b>	<b>2005</b>
-------------	-------------	-------------	-------------	-------------	-------------
