ITEM 2.02. Results of Operations and Financial Condition

On August 18, 2009, Perrigo Company (Company) released earnings for the fourth quarter and fiscal year 2009.

The earnings release contains non-GAAP measures which are defined as a financial measure of the Company's performance that excludes or includes amounts thereby differentiating it from the most directly comparable measure presented in the financial statements that are calculated and presented in accordance with U.S. Generally Accepted Accounting Principles (GAAP). Pursuant to the requirements of Regulation G, the Company has provided a reconciliation for gross profit, cost of sales, operating expenses, operating income, income from continuing operations and earnings per share from continuing operations within its earnings release to the most directly comparable U.S. GAAP measure for these non-GAAP measures.

The Company excludes the items listed below in the applicable period when monitoring and evaluating the on-going financial results and trends of its business due to the unusual nature of these items. The Company believes that presenting operating results excluding these items is also useful for investors since it provides important insight into the Company's on-going core business operations on a normalized basis.

Items excluded from reported results:
