Management Policy

Under the corporate philosophy of *kyosei* – living and working together for the common good – Canon’s basic management policy is to contribute to the prosperity and well-being of the world while endeavoring to become a truly excellent global corporate group targeting continued growth and development.

Management objectives

Aiming to increase corporate value, Canon Inc. launched Phase II of its Excellent Global Corporation Plan in 2001. This five-year management initiative, which will conclude in 2005, targets the fulfillment of the following four conditions with the aim of completing Canon’s transition to a truly excellent global corporation:

- 1) Securing the No. 1 position worldwide in all core business areas
- 2) Building up R&D strength capable of continually creating new businesses
- 3) Achieving a strong financial position
- 4) Fostering a corporate culture whereby all employees work ardently to achieve the company’s goals

Mid- to long-term management strategies

In order to achieve the objectives above, we have implemented the following mid- to long-term management strategies:

1) Becoming No.1 in core businesses

Among our core businesses, we are already No. 1 worldwide in the areas of copying machines and laser beam printers. We intend, however, to create new business opportunities while also leading the way in expanding the color market through the active introduction of color copiers and color laser beam printers, developing the print-on-demand market with high-speed copiers, and promoting service businesses that offer document solutions.

With regard to digital cameras, we have leveraged our expertise in optical and image-processing technologies to continuously launch competitive products, which has allowed us to become a top market-share holder. In the second half of last year, we launched a popularly priced digital SLR model that was well received by the market. By further strengthening our digital SLR lineup, we aim to further expand our market share and profits going forward.

In the field of inkjet printers, we will continue to promote high image quality and improved printing speeds. We will also strengthen our lineup of multifunction devices amid the rapidly growing demand for these products. In addition, by enhancing such products as photo-print software and print media, we will work to expand the home photo-printing market.

Canon is uniquely positioned as one of the few companies to possess world-leading technology for both cameras and photo-quality color printers. Fully utilizing this technological advantage and Canon’s high brand recognition, we are focusing our efforts on becoming No.1 in the home photo-printing market.

In the area of semiconductor production equipment, in 2003 we introduced new products based on a new platform and aim to pursue the No. 1 position in the industry by continuously launching new products ahead of our competitors. Furthermore, in the aligner market for large LCD panels, where we maintain the No. 1 spot, we will further strengthen our position by focusing on the development of next-generation equipment.

2) Strengthening R&D

To become No. 1 in our core businesses and create new areas of business, we will further concentrate our efforts on strengthening the company's R&D capabilities. In addition to bolstering product engine and platform technologies, we will also thoroughly enhance our common base technologies.

In order to accelerate product development and curtail costs, we aim to realize prototype-less design through the effective utilization of 3D-CAD systems, eliminating, to the extent possible, physical prototypes from the design process. Moreover, in order to strengthen our R&D structure and production technology, we will work to build new facilities and improve our infrastructure.

3) Achieving a strong financial position

- 2 -

Table of Contents

We believe that the establishment of a healthy financial constitution is essential for the realization of continued corporate growth. While Canon Inc. has been actively strengthening its financial position, we will continue to promote cash-flow management to achieve financial strength befitting a truly excellent global company.

In addition to the management strategies outlined above, we will continue working to establish the Three Regional Headquarters System by enhancing the headquarters functions of Canon's regional marketing headquarters in Europe and the Americas. We have also been actively reorganizing the Canon Group in Japan to achieve an optimal organization structure and bolster the competitive strength of each company, and will continue these initiatives. Overseas, we have strengthened our direct sales network in order to support our solutions business and adopted a new streamlined sales organization in the EU that better accommodates market integration in the region. We are also keeping a close eye on the expanding Chinese market and plan to further strengthen our sales structure there as well.

Other measures being undertaken to improve profitability for the Group include: increasing the penetration and scale of worldwide production reform activities; developing innovative tools for factory automation; and strengthening supply-chain management in order to reduce inventories, shorten production lead times and accelerate the in-house production of key components. Through these activities we will target growth for the Canon Group and seek to heighten Canon's corporate value as represented by such financial indicators as ROA (Return on Assets) and ROE (Return on Equity).

Business challenges and countermeasures

One of the challenges that Canon faces is the establishment of stable business management that offers resilience against the influence of exchange rate fluctuations. With an overseas sales ratio of more than 70%, we are heavily exposed to this risk. For the short term, we will work to mitigate the impact of changes in exchange rates by increasing product development speed, which will facilitate the introduction of new products priced to reflect the latest foreign exchange levels, and further reducing costs through such reform activities as integrating development and production activities.

For the long term, we will establish product development operations in the United States and Europe, enabling each region Japan, the Americas and Europe to develop, produce and export its own products all over the world. Through the realization of international diversification across our production and marketing operations, we believe that the impact of exchange rate fluctuations can be minimized.

We also view environmental concerns as a management issue of extreme importance. From the product development stage through production, sales, use, recovery and recycling, we focus our efforts on creating environmentally conscious products designed with energy savings, resource conservation, and the elimination of harmful substances in mind. In addition to the development of recycling systems and the expansion of green procurement, we actively disclose environmental information and support local environmental activities.

Corporate governance policies and implementation of related measures

Canon, recognizing the extreme importance of bolstering management supervision functions aimed at increasing management transparency and achieving management objectives, has been implementing various measures to improve its corporate governance. In this manner, we are striving to continuously elevate Canon's corporate value.

1) Implementation of corporate governance measures

In addition to our board of directors and corporate auditors, Canon Inc. has also created an original internal auditing system for the further development of its corporate governance.

There are currently 27 directors on the company's board. In order to realize a more streamlined and efficient management decision-making process, Canon does not adopt the outside director system. Under the current system, as a general rule, all matters of importance are decided at board and management meetings attended by all directors. Moreover, various cross-company management advisory committees have been established to address important management themes. Each committee serves to accelerate and rationalize the decision-making process while supplementing the business-division system and performing a checking function.

Canon's Board of Corporate Auditors consists of four members, two of whom are outside corporate auditors. In accordance with the Board of Corporate Auditors' auditing policies and their assigned duties, the auditors attend board, management, and various committee meetings, listen to business reports from the directors and others, carefully examine documents related to important decisions, and conduct strict audits of the company's business and its assets.

Table of Contents

Furthermore, the Corporate Audit Center, which serves as an internal auditing division, conducts inspections covering such areas as compliance, risk management and internal control systems, and then provides assessments and proposals. The various relevant administrative divisions also work very closely with the Corporate Audit Center to inspect such areas as quality, environment issues, information security and physical security.

The company has also established a code of conduct, which calls on all Canon Group employees to strictly observe all laws as well as company rules and regulations. The Canon Code of Conduct Handbook, which is available in nine different languages, has been distributed to all employees to further raise awareness of compliance throughout the entire Canon Group. A special administrative division has also been established to raise the effectiveness of these efforts.

Canon has made a practice of keeping shareholders and other investors abreast of management conditions through corporate policy briefings, quarterly announcements of operating results, and the company's Web site, and will continue to actively promote accurate and timely disclosure of information.

Through these measures, Canon will continue to strengthen its corporate governance practices, based on management's strong sense of mission and ethics.

- 2) Overview of relationship between the company and outside corporate auditors in regard to personal, capital, business relationships and other stakeholders.

Currently, there are no special interests between the company and its two outside corporate auditors.

- 3) Measures implemented over the past year aimed at improving and enhancing corporate governance

To realize a management structure capable of responding rapidly to changes in the business climate, Canon reduced the term of office for company directors from two years to one.

In order to meet calls to reinforce the independence of the accounting firms, internal regulations related to prior approval policies and procedures for both auditing and non-auditing services were established in May of 2003. Under the system introduced, the board of corporate auditors must approve the content and related amount of contracts between the accounting firms and the company before they are entered into.

Furthermore, in January 2004 we established standing committees, namely the Corporate Ethics and Compliance Committee and the Internal Control Committee, each with the CEO serving as the committee chairman. The purpose of the Corporate Ethics and Compliance Committee is to examine, from various viewpoints, Canon's social responsibilities and to convey the findings to the company with the intention of raising compliance and ethical awareness. The Internal Control Committee began activities aimed at building a first-rate internal control structure unique to the Canon Group. It also seeks to evaluate the true effectiveness and efficiency of our business and ensure compliance with related laws and regulations beyond only ensuring reliability with regard to financial disclosure.

Basic policy regarding profit distribution

With regard to profit distribution, Canon recognizes its dividend policy as one of the company's most important management issues. In light of our strong business performance last year, Canon raised its dividend per share from 30 yen in 2002 to 50 yen in 2003. As for future dividends, we intend to maintain a stable dividend payment policy that, to the extent possible, reflects our performance on a consolidated basis, contingent upon the company's capital requirements to fund future business expansion and improve profitability.

As for internal reserves, such funds will be used to support investment in current business expansion and new business cultivation, and to repay debt in order to strengthen the company's financial structure.

Basic policy regarding share trading unit

Canon maintains a basic policy of periodically reviewing its share-trading unit from the standpoint of enhancing liquidity and stimulating broader investor participation.

Until now, Canon opted not to reduce the number of shares constituting a trading unit, as the company's stock enjoyed adequate levels of liquidity. Owing to an increase in the total investment amount required to realize one trading unit, however, the proportion of ownership by individual investors in recent years has decreased.

As such, the company changed the number of shares that constitute one trading unit from 1,000 to 100, effective May 6, 2004. This is an important measure aimed at offering a wider range of investors, including individuals, an opportunity to invest in the company.

Table of Contents

Operating Results and Financial Conditions

2004 First Half in Review

Looking back at the global economy in the first half of 2004, the U.S. economy maintained a high rate of growth, supported by continued healthy consumer spending driven by tax cuts introduced in the first quarter, along with boosted private-sector capital investment following the increased rate of capacity utilization resulting from stepped up production. The economies of Europe showed a moderate recovery through most of the first half of 2004, sustained by increased export sales and steady consumer spending accompanying the upturn in the U.S. economy. In Asia, while China continued to record high economic growth, driven by strong consumer spending and increased capital investment in line with expanded production, other Asian economies were also in recovery mode. In Japan, the economy continued to recover gradually amid increased export sales accompanying the upturn in the world economy and capital investment, along with improvements in consumer spending, employment conditions and consumer confidence.

As for the markets in which the Canon Group operates, although sales of digital cameras slowed in the domestic Japanese market, demand overseas continued to grow significantly during the term. While demand for network digital multifunction devices (MFDs) remained strong as the office market moves toward multifunctionality and color, computer peripherals, including printers, struggled amid severe price competition and the shift toward demand for lower priced models offering improved functionality. In the field of optical equipment, capital spending for semiconductor-production equipment recovered strongly owing to such factors as the high rate of capacity utilization by semiconductor manufacturers, and the sustained high price of memory devices resulting from replacement demand for personal computers and the significant growth in demand for digital electrical appliances. Moreover, increased demand for liquid crystal display (LCD) televisions fueled growth in the market for projection aligners, which are used in the production of LCDs. The average value of the yen for the first half was ¥108.59 to the U.S. dollar and ¥133.11 to the euro, representing a year-on-year increase of 9% against the U.S. dollar, and a decrease of 1% against the euro.

Amid these conditions, Canon's consolidated net sales for the first half increased by 7.3% from the year-ago period to ¥1,648.4 billion (U.S.\$15,263 million), boosted by a significant rise in sales of digital cameras and color network MFDs, along with a substantial increase in sales of semiconductor-production equipment and projection aligners used in the production of LCDs. Net income for the first half recorded an all-time high of ¥160.8 billion (U.S.\$1,489 million), a year-on-year increase of 25.8%. Despite the appreciation of the yen against the U.S. dollar, a high gross profit ratio of more than 50% was maintained, mainly due to ongoing production-reform efforts during the term along with R&D reform activities that made possible the timely launch of competitive new products. Selling, general and administrative expenses for the first half rose 2.2% year on year, which was less than the growth rate of net sales during the same period; although R&D expenditures grew by ¥6.7 billion (U.S.\$61 million) to ¥132.4 billion (U.S.\$1,226 million) along with increased advertising and sales-promotion spending, other selling, general and administrative expenses remained at the same level as the year-ago period. Consequently, operating profit in the first half totaled ¥253.4 billion (U.S.\$2,346 million), a substantial year-on-year increase of 17.3%. Other income (deductions) improved by ¥7.1 billion (U.S.\$65 million), attributable to improved equity gains (losses) of affiliated companies and gains on the disposal of marketable securities. As a result, income before income taxes in the first half totaled ¥260.0 billion (U.S.\$2,407 million), a year-on-year increase of 20.6%. With an effective tax rate during the first half that was 2.7% lower compared with the year before, net income for the first six months of 2004 totaled ¥160.8 billion (U.S.\$1,489 million).

Basic earnings per share for the first half was ¥181.84 (U.S.\$1.68), a year-on-year increase of ¥36.29 (U.S.\$0.34).

Table of Contents**Results by Product Segment**

In the business machine segment, demand for network digital MFDs, which are grouped in the office imaging products sub-segment, indicates a shift from monochrome machines to color models, as well as a trend toward higher-end features. Additionally, the Color imageRUNNER C3200/iR C3200N, Canon's first color offering in the powerful imageRUNNER-series lineup, continued to sell well in both the domestic Japanese and overseas markets. The iR C3100 and the high-end model iR C6800, introduced in Japan in the second half of 2003, were also launched in Europe and the United States and have been well received in these markets as well. Among monochrome network digital MFDs, such low-end models as the iR1600/2000 series recorded considerable sales increases, while mid-level and high-end models such as the iR2200 series and iR5000 series, respectively, also achieved strong sales. Overall, sales of office imaging products for the half realized a year-on-year increase of 2.8%. In the field of computer peripherals, laser beam printers enjoyed a year-on-year increase in unit sales of nearly 20%, with color models showing a gradual improvement and monochrome systems, particularly personal-use models, also demonstrating growth. Although laser beam printer sales increased on a unit basis, the sales value decreased slightly as a result of the appreciation of the yen against the U.S. dollar and a shift in demand toward lower priced models. Inkjet printers recorded an increase in unit sales of approximately 30% as well as increased sales in value terms, with the i560 and i860 models selling briskly, especially in Japan and Europe, and the MultiPASS MP700/MP730 high-speed multifunction systems contributing to a dramatic increase in unit sales. As a result, with the effect of appreciation of the yen against US dollar, sales of computer peripherals in the first half decreased by 0.1%. Sales of business information products, including computers, micrographics and calculators, decreased by 10.5% due to the intentional curtailing of personal computer sales in the domestic market. Collectively, sales of business machines in the first half totaled ¥1,142.3 billion (U.S.\$10,576 million), a year-on-year increase of 0.7%. Despite the effect of appreciation of the yen, the gross profit ratio for the business machine segment remained at the year-ago level, supported by cost reduction effect. As a result, with the effect of a decline in the sales-to-expense ratio, operating profit for the first half was ¥248.8 billion (U.S.\$2,303 million), a year-on-year increase of 5.2%. From 1st quarter, Canon has reclassified information-systems-related sales by subsidiaries to better reflect the product relationship. These sales, which had been grouped with optical and other products, are now included in the office imaging products segment. Accordingly, previous-year sales for each category have been reclassified in line with the change.

Within the camera segment, amid the continued strong demand for digital models worldwide, sales of compact digital cameras showed significant growth, mainly led by eight new PowerShot-series models released in the first half. Among the new models, PowerShot Pro1 and PowerShot S500 DIGITAL ELPH have been particularly well received in the market. Canon's digital SLR cameras also continued to enjoy robust growth, bolstered by the EOS Digital Rebel, launched last September. As a result, unit sales of digital cameras grew over 70% compared with the year-ago period. In the field of digital video camcorders, new models such as the ELURA70/65/60 and OPTURA 40/30 models achieved favorable sales during the first half. As a result, camera sales overall continued to enjoy double-digit growth of 22.4%, achieving total sales of ¥347.3 billion (U.S.\$3,216 million). Operating profit for the camera segment appreciably advanced 23.4% to ¥61.4 billion (U.S.\$569 million), attributable to the decrease in the sales-to-expense ratio, which resulted in a slight year-on-year increase in the operating profit ratio for the period, while the gross profit ratio decreased slightly owing to the appreciation of the yen and price competition.

In the optical and other products segment, sales of aligners for the production of LCDs realized notable growth as the PC monitor industry continued shifting from CRT to LCD computer displays, and the LCD television market continued to expand. Sales of steppers, used for the production of semiconductors, also increased as investment in semiconductor-production equipment showed a recovery owing to the improved conditions in the semiconductor-device market. As a result, sales for the segment increased by 35.4% to ¥158.8 billion (U.S.\$1,471 million). The operating profit ratio for the segment improved substantially due to the significant growth in sales, enabling optical and other products to record an operating profit of ¥15.2 billion (U.S.\$140 million), compared with an operating loss of ¥0.2 billion for the same period of the previous year.

Cash Flow

In the first half of 2004, Canon maintained cash flow from operating activities of ¥297.8 billion (U.S.\$2,758 million), a year-on-year increase of ¥69.5 billion (U.S.\$644 million), reflecting the substantial growth in sales and increased cash proceeds from sales, combined with an increase in net income. Capital expenditure totaled ¥133.8 billion (U.S.\$1,238 million), which was used mainly to expand production capabilities in both domestic and overseas regions, as well as for development of R&D related infrastructure. Cash flow from investing

- 6 -

Table of Contents

activities totaled ¥109.9 billion (U.S.\$1,018 million). As a result, free cash flow, or cash flow from operating activities minus cash flow from investing activities, totaled positive ¥187.9 billion (U.S.\$1,740 million).

Cash flow from financing activities recorded an outlay of ¥64.3 billion (U.S.\$596 million), mainly resulting from active efforts to repay loans toward the goal of improving the company's financial position and an increase in the dividend payout. Consequently, cash and cash equivalents, which totaled ¥811.2 billion (U.S.\$7,511 million), representing a ¥120.9 billion (U.S.\$1,120 million) increase from the end of the previous year, remained at a high level.

Non-consolidated Results and Dividend

Canon Inc.'s non-consolidated net sales during the first half increased year on year by 13.9% to ¥1,078.6 billion (US\$9,987 million), and ordinary profit also grew by 20.3% to ¥197.7 billion (US\$1,830 million). Non-consolidated net income decreased 1.4% to ¥127.0 billion (US\$1,176 million) owing to a temporary gain realized in same period of previous year through exemption from the obligation to pay benefits for future employee services related to the substitutional portion of the Employees' Pension Fund.

The Board of Directors is planning to increase the interim dividend by ¥10.00 (US\$0.09) on a year-on-year basis to ¥25.00 (US\$0.23) per share.

Outlook

Regarding the outlook for the global economy in the third quarter and thereafter, although global economic prospects remain uncertain due to concern over prolonged confusion in Iraq and the threat of future terrorist attacks, which could adversely affect consumer spending, oil prices and exchange rate trends, the global economy is likely to continue its course toward recovery.

In the businesses in which Canon is involved, the digital camera market is expected to continue enjoying rapid growth. A shortage of key parts from suppliers, however, could have a restraining effect on market growth. As for network digital MFDs and laser beam printers, while stable demand is projected for both monochrome and full-color models, severe price competition and shifting demand toward lower priced models is expected to adversely affect sales. Within the semiconductor-production equipment market, while a recovery in capital investment by semiconductor manufacturers is likely to continue, the pace will probably slow down in the latter half of the year. In the market for projection aligners used in the production of LCDs, although demand for LCD production equipment is expected to show continued growth, improved process yields could negatively affect demand, resulting in the sale of fewer additional units than initially projected.

Although uncertainty surrounds several factors that could affect currency exchange rates, significant changes in rates are not anticipated. The yen is expected to be stronger against the U.S. dollar and slightly weaker against euro compared with the previous year.

Upon considering the current market and currency exchange environments, the company has revised upward its forecasts for the 2004 fiscal year and now anticipates consolidated net sales of ¥3,470.0 billion (U.S.\$32,130 million), consolidated income before income taxes of ¥520.0 billion (U.S.\$4,815 million), and consolidated net income of ¥320.0 billion (U.S.\$2,963 million). The company also projects non-consolidated net sales of ¥2,318.0 billion (U.S.\$21,463 million), non-consolidated ordinary profit of ¥380.0 billion (U.S.\$3,519 million), and non-consolidated net income of ¥238.0 billion (U.S.\$2,204 million). These forecasts assume currency exchange rates of ¥108.00 to the U.S. dollar and ¥132.00 to the euro for the remainder of 2004.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements,

including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

Note: Beginning first quarter of 2004, Canon has changed classification of product categories with regards to information system business, which had been classified in Optical and other products, to Business machines (Office imaging products) in order to better reflect current relation with those products. Accordingly, information for previous fiscal years has been reclassified to conform with the current classification.

1. The primary products included in each of the product segments are as follows:

Business machines:

Office imaging products: Office network digital multifunction devices (MFDs) / Color network digital MFDs /

Office copying machines / Personal-use copying machines / Full-color copying machines / etc.

Computer peripherals : Laser beam printers / Single function inkjet printers / Inkjet multifunction peripherals / Image scanners / etc.

Business information products : Computer information systems / Micrographic equipment / Personal information products / etc.

Cameras : SLR cameras / Compact cameras / Digital cameras / Digital video camcorders / etc.

Optical and other products : Semiconductor production equipment / Mirror projection mask aligners for LCD panels /

Broadcasting equipment / Medical equipment / Components / etc.

2. The principal countries and regions included in each regional category are as follows:

Americas: United States of America, Canada, Latin America / Europe: England, Germany, France, Netherlands /

Other Areas: Asian regions, China, Oceania

8. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

(1) CHANGES IN GROUP OF ENTITIES

Subsidiaries

Addition: 6 companies

Removal: 4 companies

Affiliates (Carried at Equity Basis)

Addition: None

Removal: None

(2) SIGNIFICANT ACCOUNTING POLICIES

The accompanying consolidated financial statements reflect the adjustments which management believes are necessary to conform them with accounting principles generally accepted in the United States of America, except for the segment information, as required by Statement of Financial Accounting Standards No.131, Disclosures about Segments of an Enterprise and Related Information.

1. Marketable Securities and Investments

Canon's consolidated financial statements are based on Statement of Financial Accounting Standards No.115 (SFAS 115), Accounting for Certain Investments in Debt and Equity Securities. Under SFAS 115, certain investments in debt and equity securities should be classified as trading, available-for-sale or held-to-maturity. Canon's marketable securities and investments consist of available-for-sale securities. Unrealized holding gains and losses, net of the related tax effect, on available-for-sale securities are excluded from earnings and are reported as a separate component of other comprehensive income (loss) until realized.

2. Inventories

Inventories are stated at the lower of cost or market. Cost is determined principally by the average method for domestic inventories and the first-in, first-out method for overseas inventories.

3. Depreciation

Depreciation is calculated principally by the declining-balance method over the estimated useful lives of assets.

4. Employee Retirement and Severance Benefits

Canon has been adopting Statement of Financial Accounting Standards No.87, Employer's Accounting for Pensions.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

(Note)

From the 1st quarter of 2004, Canon changed the classification of product categories with regard to its information system business, which had been classified in *Optical and other products*, to *Business machines (Office imaging products)* in order to better reflect current relation with those products. Accordingly, information for the year 2003 has been reclassified to conform with the current classification.
