Financial review for the third quarter and nine months ended 31 March 2009

Quarter at a glance

- \* Continue to be safety conscious
- \* Achieved zero net debt
- \* Headline earnings up by 5%
- \* Strong cash flow, with cash operating profit at R1.2 billion
- \* Five years of accumulated losses reversed
- \* Capital expenditure reduced, as predicted
- \* Elandsrand: both production and cash operating cost (R/kg) results have improved
- \* Target: improved production and cash operating cost (R/kg) results
- \* 3% decline in total gold production
- \* 2% increase in cash operating costs (R/kg)

Financial summary for the third quarter ended 31 March 2009

		Quarter	Quarter		Quarter

Harmony s Annual Report, Notice of Meeting, Sustainable Development Report and its Annual Report filed on a Form 20F with the United States Securities and Exchange Commission for the year ended 30 June 2008 are available on our website at www.harmony.co.za.

Chief Executive Officer s Review

Harmony is financially healthy. We have delivered on our promise to reduce our debt, preserve cash and position the company to become net debt-free. Our shareholders have invested in an uncomplicated, safety-conscious company with a strong cash flow, growing pipeline, a steady margin, completely unhedged and geared for gold bulls. Graham Briggs, Chief Executive Officer

Overview

A number of initiatives have been implemented to address safety, throughput,

#### **Table of Contents**

grade, production, costs and Harmony s financial position.

We have made excellent progress with safety, achieving improved safety rates and receiving safety awards. We continue to drive our behaviour-based safety programme, which is aimed at changing the attitudes and mindsets of all within the company on and off the mines.

We have taken cognisance of the Presidential Mine Safety Audit report that was released in February 2009 and will continue to address safety in a pro-active manner. Only safe production within Harmony is rewarded.

Strategic planning for the financial year 2009/2010 began during the past quarter. Harmony s executive management met in February 2009 to address how to further improve safety, how production targets would be achieved and maintained, and how sustainable profits would be generated. Planning parameters have been agreed and shaft strategic plans will be signed off in July 2009. Our planning has been done at a gold price of R225 000/kg, leaving Harmony with a reasonably strong margin.

Safety

We are deeply saddened by the deaths of three of our colleagues. We extend our heartfelt condolences to their families, friends and team members.

Those who died were: Mziwabantu Bondlani, a driller at Elandsrand; Zolane Maboza, a miner at Tshepong, and Patrick Mabitsoa, a loco driver at Masimong.

Year on year, the Fatality Injury Frequency Rate (FIFR) deteriorated by 30% quarter on quarter (from 0.10 to 0.13) as a result of the three fatalities. Despite the deterioration, all our other rates have improved and we have seen significant safety achievements from most of our operations. Quarter on quarter the Lost Time Injury Frequency Rate (LTIFR) and the Reportable Injury Frequency Rate improved.

The aforementioned deterioration in our FIFR is, of course, a cause of considerable concern to us. Detailed investigation of recent fatalities indicates that falls of ground (FOG) - both gravity and seismicity induced - and trucks and tramming are the primary causes.

This finding has prompted a number of interventions. A safety workshop on 2 April 2009 focused on FOG prevention and on safer trucks and tramming operations, amongst other safety- and health- related matters.

In respect of FOG prevention, it has been decided to: adopt the Mine Occupational Safety and Health entry examination process in terms of which entire crews sign safe work declarations; introduce FOG committees at all operations; investigate the use of netting and/or mesh in development ends; enforce effective use of rock bolting; and investigate mechanisation prospects - specifically remote drilling - to remove workers from potential hazard situations.

To effect safer trucks and tramming operations, we are: investigating the implementation an anti-collision warning system; completing and implementing the Department of Minerals and Energy s Rail-bound Equipment Code of Practice.

Production and costs

In the past quarter, most of the shafts experienced a slow start-up after the Christmas break. While underground volumes decreased, grade remained static, resulting in a marginal decrease in gold production.

#### **Table of Contents**

Quality training, development programmes, a motivating climate, disciplined mining, team-building initiatives to improve team work, pro- active human resources policies and practices, and improved logistics have all been implemented to address productivity. We believe that improved productivity will result in increased production and lower costs. Some mines have already shown improvement, but it will take some time before all our mines are performing at the desired levels.

Harmony s operating costs for the quarter declined due mainly to lower production and, to a limited extent, the drop in prices of consumables. The R/kg costs were slightly higher due to lower production. Gold market

The past quarter saw the gold price at record highs, at levels above R300 000/kg and US\$900/oz. Gold has become a currency rather than a commodity a - good reason for us to remain bullish about the gold price. We believe that the uncertainty in world-wide markets will support a stronger gold price. Gold remains a safe investment, as can be seen with ETF funds continuing to increase their gold stockpile and from China s recent announcement that it has increased its gold reserves by 75%.

We have been a gold producer for the past 60 years and we believe that we have the correct mix of assets to benefit from stronger gold prices. Harmony is well-leveraged against the gold price with no hedging and an uncomplicated structure, and we are working towards increasing gold production to benefit from the higher gold prices. Debt position

Harmony sold 60% of certain uranium and gold assets of Randfontein Estates Limited (a wholly-owned subsidiary of Harmony) to Pamodzi Resources Fund 1 LLP ( PRF ). The uranium and gold assets were sold into a company, Rand Uranium (Proprietary) Limited ( Rand Uranium ), for a purchase consideration of US\$348 million. Harmony retains 40% of Rand Uranium s shareholding and in exchange for 60% of the issued share capital of Rand Uranium, Harmony would receive US\$209 million. PRF paid the first tranche of US\$40 million in November 2008. The second tranche of US\$169 million, plus interest thereon at 5% per annum, was payable in April 2009. Shareholders attention is drawn to various announcements made relating to the transaction on 19 December 2007, 24 October 2008 and 21 November 2008.

On 20 April 2009 PRF paid approximately US\$172 million to Harmony as final payment in terms of the Rand Uranium transaction. We are excited about the future of Rand Uranium and look forward to sharing in Rand Uranium s success, together with PRF and its investors, First Reserve Corporation and AMCI Capital.

We have completed our planned capital raising, exploiting favourable market conditions by issuing a second tranche of shares for cash in the open market, pursuant to our mandate given by shareholders at the Annual General Meeting. In the capital raising, 7 540 646 shares were placed between 10 February 2009 and 6 March 2009 at an average subscription price of R124.45, raising R938 million before costs. The average issue price compares favourably with the weighted average share price on the JSE over the same period of R122.75 per share. The number of shares issued is equivalent to 1,9% of Harmony s issued share capital as at 30 September 2008. Combined with the share issue announced in December 2008, the cumulative shares issued amounts to R1.9 billion or 4,5% of the issued share capital. To date, the total number of shares in issue is 425 763 329. The cost of the second placement was approximately R15 million or

#### **Table of Contents**

1.6% of the value of the shares issued.

JP Morgan Equities Limited acted as transaction advisor.

The combined effect of the above is that Harmony is net debt free.

The proceeds from the capital raising and the Rand Uranium transaction, totalling R2.7 billion, will be used to repay Harmony s convertible bond due in May 2009 and its short-term debt, leaving a positive cash balance of approximately R1.6 billion.

Class action

During January 2009, the Plaintiff filed with the Court an Amended Complaint. The company has filed a Motion to Dismiss that Amended Complaint, and the Plaintiff has filed an opposition to that Motion. The company will be filing a Reply Memorandum in further support of its Motion. It is not possible to predict with certainty when the Court will rule on the Motion, but we would estimate that such a decision will be made within the next six months.

Mergers and acquisitions

We continue conducting due diligences but have not identified available assets which could potentially increase the quality of our own asset base.

Royalty payment delayed

In February 2009 the National Treasury announced that the implementation of a mining royalty would be delayed by 10 months, taking into account the potential impact of the economic slowdown on the mining industry.

Looking forward

Harmony is in excellent financial health with a strong balance sheet, reflecting the benefits of the various remedial measures taken in the past 18 months.

Our strategic plans support our target of achieving 2.2 million ounces in 2012. Phakisa, Doornkop and Elandsrand will be in full production in 2012 and higher grades from the Tshepong Decline, the Bambanani shaft pillar and the Evander 8 Decline are expected. We continue to focus on creating a better understanding of Harmony s orebodies through exploration drilling and development, our interpretation of the geology, building credible geological models and formulating clear development strategies.

Construction of the Hidden Valley gold mine in Papua New Guinea has progressed well and the mine will be commissioned mid-2009. Final commissioning of the overland conveyor in September 2009 will mean that both Hidden Valley ore and ore from the Hamata pit will be processed through the metallurgical plant, adding to production volumes.

The Evander South project and the St Helena tailings project in the Free State provide us with exciting organic growth opportunities to take us to greater levels of production post-2012.

We have positioned the company in such a way that we are able to deliver on our promise of paying a dividend in future. Our focus now remains on achieving our overall targets and delivering consistent results.

Chief Executive Officer
