Report of independent accountants on special review

(A translation of the original report in Portuguese as filed with the Brazilian Securities Commission (CVM) containing quarterly financial information prepared in accordance with accounting practices adopted in Brazil)

The Shareholders and Board of Directors
Brasil Telecom S.A.
Brasília - DF

We have reviewed the quarterly financial information of Brasil Telecom S.A. for the quarter ended March 31, 2004, comprising the balance sheet and the consolidated balance sheet of the Company and its subsidiaries, the statement of income and the consolidated statement of income, the management report and other relevant information, prepared in accordance with accounting practices adopted in Brazil.

Our review was performed in accordance with auditing standards established by the Brazilian Institute of Accountants (IBRACON) and the Federal Accounting Council, which included: (a) inquiries and discussion with management responsible for the accounting, financial and operational areas of the Company regarding the criteria adopted in the preparation of the quarterly information; and (b) review of post-balance sheet information and events, which may have a material effect on the financial and operational position of the Company and its subsidiaries.

Based on our special review, we are not aware of any material changes that should be made to the aforementioned quarterly information for it to be in accordance with accounting practices adopted in Brazil and the regulations issued by the Brazilian Securities Commission, specifically applicable to the mandatory quarterly financial information.

Our review was performed for the purpose of issuing a special review report on the mandatory quarterly financial information. The statement of cash flow represents supplementary information to those statements and is presented to provide additional analysis. This supplementary information was submitted to the same review procedures applied to the quarterly financial information, and, based on our special review, is adequately presented in all material respects, in relation to the quarterly financial information taken as a whole.

1. OPERATIONS

BRASIL TELECOM S.A. (Company) is the concessionaire responsible for the Switched Fixed Telephone Service (STFC) and operates in Region II of the General Concessions Plan, covering the Brazilian states of Acre, Rondônia, Mato Grosso, Mato Grosso do Sul, Tocantins, Goiás, Paraná, Santa Catarina and Rio Grande do Sul and the Federal District. In this area of 2,859,375 square kilometers, corresponding to 34% of the Brazilian territory, the Company renders from July of 1998 local and local intra-region long distance STFC.

With the recognition of the fulfillment in advance of the obligations for universalization stated in the General Plan of Universalization Goals (PGMU), forecast for December 31, 2003, in accordance with the acts published in the Diário Oficial da União (Official Daily Government Newspaper (DOU) on January 19, 2004, the restriction of providing other telecommunications services ceased to exist, permitting the Company, its parent companies, its subsidiaries and associated companies to obtain new authorizations. On the same date ANATEL issued authorizations for the Company to provide STFC in the following service modalities: (i) Local and Domestic Long Distance calls in Regions I and III and Sectors 20, 22 and 25 of Region II of the General Concession Plan (PGO); and (ii) International Long Distance calls in Regions I, II of III of PGO. As a result of these authorizations the Company began to provide the Domestic and International Long Distance services in the new regions, starting on January 22, 2004. In the case of the Local Service, to be provided in regions I and III, as established in the regulations, the Company has a period of 12 months to begin operations as from the date of the aforementioned authorization.

The Company is a subsidiary of Brasil Telecom Participações S.A. (BTP), incorporated on May 22, 1998 as a result of the privatization of the Telebrás System.

The Company's business, together with the services that it offers and the tariffs charged, are regulated by the National Telecommunications Agency ANATEL.

Information related with the quality and universal service targets of the Fixed Switched Telephone Service are available to interested parties on the homepage of ANATEL, on the site www.anatel.gov.br.

The Company is registered with the Brazilian Securities Commission (CVM) and the Securities and Exchange Commission (SEC) in the USA, and its shares are traded on the main stock exchanges in Brazil and its ADR on the New York Stock Exchange (NYSE). The Company is also part of level 1 of Corporate Governance at São Paulo Stock Exchange BOVESPA.

Company Subsidiaries

Brasil Telecom Celular S.A. (BrT Celular): Wholly owned subsidiary formed in December 2002 to operate the Mobile Personal Service (SMP), holding a license to serve the same coverage area where the Company operates STFC. At the balance sheet date, BrT Celular was in the pre-operating phase. The beginning of its activities is forecasted for the first semester of 2004.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

BrT Serviços de Internet S.A. (BrTI): Wholly owned subsidiary formed in October 2001, engaged in the provision of internet services and related activities. It started its activities in 2002.

During the second quarter of 2003, BrTI invested, as shareholder or quotaholder, and started to have the control of the following companies:

(i) BrT Cabos Submarinos (formerly known as GlobeNet) Group

This group of companies operates through a system of submarine fiber optics cables, with points of connection in the United States, Bermuda Islands, Venezuela and Brazil, allowing the traffic of data through packages of integrated services, offered to local and international corporate customers. It is comprised by the following companies:

- **Brasil Telecom Cabos Submarinos do Brasil (Holding) Ltda. (BrT CSH)**: company acquired on June 11, 2003, as part of the purchasing program of the GlobeNet Group, an acquisition previously disclosed on November 19, 2002, through a relevant fact.
- **Brasil Telecom Cabos Submarinos do Brasil Ltda. (BrT CS Ltda.)**: company acquired on June 11, 2003, in which BrTI has direct control and the full control jointly with BrT CSH, being also part of the purchasing program of the GlobeNet Group.
- **Brasil Telecom Subsea Cable Systems (Bermuda) Ltd. (BrT SCS Bermuda)**: company incorporated under the laws of the Bermudas, for which the transfer of resources by BrTI for payment of subscribed capital occurred on May 30, 2003. It is also part of the purchasing program of the GlobeNet Group. BrT SCS Bermuda holds the total shares of Brazil Telecom of America Inc. and of Brasil Telecom de Venezuela S.A.

(ii) iBest Group

BrTI has held since February 2002, a minority interest in the iBest Holding Corporation (IHC), a company incorporated in the Caiman Islands. In June 2003, as a result of several statutory acts in IHC and in its subsidiaries, BrTI started to control the iBest Group, which the main companies are: (i) iBest Holding Corporation; (ii) iBest S.A.; (iii) Febraio S.A.; and (iv) Freelance S.A.

iBest was incorporated in January 1999, with the objective of organizing the iBest Prize , trading advertising space for the event. In December 2001 it extended its activities, when it started to offer and to concentrate its operations on providing dialed access to the Internet.

2. PRESENTATION OF FINANCIAL STATEMENTS

Preparation Criteria

The financial statements were prepared in accordance with accounting practices emanating from Brazilian corporate law, standards of the Brazilian Securities Commission CVM and standards applicable to Switched Fixed Telecommunications Services STFC concessionaires.

As the Company is filed with the Securities and Exchange Commission SEC, it is subject to its standards, and should prepare financial statements and other information by using criteria that comply with that entity s requirements. For complying with these requirements and aiming at meeting the market s information needs, the Company adopts, as a principle, the practice of simultaneously publishing information in both markets in their respective languages.

The notes to the financial statements are presented in thousands of reais, unless stated otherwise in each notes. According to each situation, the notes to the financial statement present information related with the Company and the consolidated statements, identified as PARENT COMPANY and CONSOLIDATED respectively. When the information is common to both situations, it is indicated as PARENT COMPANY AND CONSOLIDATED .

The accounting estimates were based on objective and subjective factors, based on the judgment of the management for determining the appropriate amount to be recorded in the financial statements. Significant elements subject to these estimates and assumptions include the residual amount of the fixed assets, provision for doubtful accounts, inventories and deferred income tax assets, provision for contingencies, valuation of derivative instruments, and assets and liabilities related to benefits for employees. The settlement of transactions involving these estimates may result in significant different amounts due to the inherent imprecision to the process of their determination. The Company reviews the estimates and assumptions at least quarterly.

Consolidated Financial Statements

The consolidation was made in accordance with CVM Instruction 247/96 and includes the companies listed in Note 1.

Some of the main consolidation procedures are:

- Elimination of intercompany balances, as well as revenue and expenses of transactions among them;
- Elimination of the investor's shareholdings, reserves and accumulated results in the investees;
- Segregation of the portions of shareholders' equity and income of minority shareholders, presented in specific items.

In addition the Company presents, in the note 17, the statement of cash flows, prepared under the indirect method, in accordance with Accounting Rules and Procedures - NPC Nr. 20 of Brazilian Institute of Accountants (IBRACON).

3. SUMMARY OF SIGNIFICANT ACCOUNTING PRACTICES

The criteria mentioned in this note refers to the practices adopted by the Company and its subsidiaries that are included in the consolidated balance sheet.

a. Cash and cash equivalents: Cash equivalents are short-term, high-liquidity investments, with immediate maturity. They are recorded at cost, plus income earned to the end of the quarter, not exceeding market value.

b. Trade accounts receivable: Receivables from users of telecommunications services are recorded at the amount of the tariff in effect on the date the service is rendered. Unbilled services provided to customers at the balance sheet date are also included in trade accounts receivable. The criterion adopted for making the provision for doubtful accounts takes into account the calculation of the actual percentage losses incurred on each range of accounts receivable. The historic percentages are applied to the current ranges of accounts receivable, also including accounts coming due and the portion yet to be billed, thus composing the amount that could become a future loss, which is recorded as a provision.

c. Inventories: Stated at average acquisition cost, not exceeding replacement cost. Inventories are segregated into inventories for plant expansion and those for maintenance. The inventories to be used in expansion are classified in property, plant and equipment (construction in progress) and inventories to be used in maintenance are classified as current and noncurrent assets. Obsolete items are recorded as Allowance for losses.

d. Investments: Investments in subsidiaries were valued by the equity method. The goodwill was calculated based on the expectation of future results and its amortization is related to the volume and of timing forecasted over a period of not more than ten years. Other investments are recorded at acquisition cost, less a provision for losses, when applicable. The investments derived from income tax incentives are recognized at the date of the investment, and result in shares of companies with tax incentives or quotas of investment funds. In the period between the investment date and receipt of shares or quotas, they are classified in the Noncurrent assets. The Company adopts the criteria of using the maximum percentage of tax allocation. These investments are carried at cost or market prices and periodically valued and, when the latter is lower, provision for losses is recorded.

e. Property, plant and equipment: Stated at cost of acquisition and/or construction, less accumulated depreciation. Financial charges for financing assets and construction in progress are capitalized.

Maintenance and repair costs, when they represent improvements (increase in installed capacity or useful life) are capitalized, while other costs are charged to the profit and losses accounts, on an accrual basis.

Depreciation is calculated under the straight-line method. Depreciation rates used are based on expected useful lives of the assets and in accordance with the standards of the Public Telecommunications Service. The main rates used are set forth in Note 24.

f. Deferred charges: Segregated between deferred charges on amortization and on formation. Their breakdown is shown in Note 25. Amortization is calculated using the straight-line method, for the period of five years, in accordance with the legislation in force. When the asset no longer generates benefits, it is written off against non-operating income.

g. Income and Social Contribution Taxes: Income and social contribution taxes are accounted for on an accrual basis. These taxes levied on temporary differences, tax losses and the negative social contribution base are recorded under assets or liabilities, as the case may be, according

Edgar Filing: BRASIL TELECOM SA - Form 6-K

to the assumption of realization or future demand, within the parameters established in the CVM Instruction 371/02.

h. Loans and Financing: Updated monetarily by the exchange variations and interest incurred up to the balance sheet date. Equal restatement is applied to the guarantee contracts hedging the debt.

i. Provision for Contingencies: Recognized based on its risk assessment evaluation and quantified on economic grounds and legal the counselors' opinions on the lawsuits and other contingency factors known as of the balance sheet date. The basis and nature of the provisions are described in Note 7.

j. Recognition of Revenues: Revenues from services rendered are recognized on accrual basis. Local calls are charged based on time measured according to the legislation in force. Revenues from sales of payphone cards-prepaid services are recorded upon sale.

k. Recognition of Expenses: Expenses are recognized on accrual basis, considering their relationship with realization of revenues. Expenses related to other periods are deferred.

l. Financial Income (Expense), Net: Financial income comprises interest earned on accounts receivable settled after their due date, and gains on financial investments and hedges, when incurred. Financial expenses comprises interest incurred and other charges on loans, financing and other financial transactions.

Credited interest on shareholders' equity is included in the financial expenses balance, and for financial statement presentation purposes, the recognized amounts are reversed to profit and loss accounts and reclassified as a deduction of the retained earnings, in the shareholders' equity.

m. Research and Development: Costs for research and development are recorded as expenses when incurred, except for expenses with projects linked to the generation of future revenue, which are recorded under deferred assets and amortized over a five-year period after the start-up of operations.

n. Benefits to Employees: Private pension plans and other retirement benefits sponsored by the Company and its Subsidiaries for their employees are managed by SISTEL and Fundação CRT. Contributions are determined on an actuarial basis, when applicable, and recognized on an accrual basis. As of December 31, 2001, to comply with CVM Instruction 371/00, the Company recorded the actuarial deficit on the balance sheet date against shareholders' equity, excluding the corresponding tax effects. As from 2002, as new actuarial revaluations determine the need for adjustments to the provision, these are recognized in the profit and loss accounts, in accordance with the CVM deliberation above. Complementary information on private pension plans is described in Note 6.

o. Employees and Management Profit Sharing: The provisions for employee and directors profit sharing are recognized according to the accrual basis. The calculation of the amount, which is paid in the year after recognition of the provision takes into consideration the program of targets established with the labor union, in accordance with Law 10,101/00 and the Company's bylaws.

p. Earnings per thousand shares: Calculated based on the number of shares outstanding at the balance sheet date, which comprises the total number of shares issued net of treasury stock.

4. RELATED-PARTY TRANSACTIONS

Related party transactions refer to existing operations with Brasil Telecom Participações S.A., the parent company, with the subsidiaries described in Note 1 and with Vant Telecomunicações S.A., in which the Company has a minority investment.

Operations between the Company and related parties are carried out under normal market prices and conditions. The principal transactions are as follows:

Brasil Telecom Participações S.A.

Dividends/Interest on Shareholders' Equity: the Interest on Shareholders' Equity credited in the quarter allocated an amount of R\$157,322 (R\$162,425 in 2003) to the Parent Company. The balance of this liability, the net part of the withholding tax, is R\$271,785 (R\$138,062 on 12/31/03).

Loans with Parent Company: The liabilities balance arises from the spin-off of Telebrás and is indexed to exchange variation, plus interest of 1.75% per year, amounting to R\$85,583 (R\$89,653 as of December 12/31/03). The financial expense recognized as income in this quarter was of

Edgar Filing: BRASIL TELECOM SA - Form 6-K

Debentures: On January 27, 2001, the Company issued 1,300 private debentures, which are not convertible or exchangeable for any type of share, at the unit price of R\$1,000, totaling R\$1,300,000, for the purpose of financing part of its investment program. All these debentures were acquired by Brasil Telecom Participações S.A. The nominal value of these debentures will be amortized in three installments equivalent to 30%, 30% and 40% falling due on July 27, 2004, 2005 and 2006, respectively. The debenture remuneration is equivalent to 100% of CDI, received semiannually. The balance of this liability is R\$1,334,489 (R\$1,408,190 on 12/31/03) and charges recognized in the income for the quarter represents R\$49,698 (R\$74,499 in 2003).

Revenues, Expenses and Accounts Receivable and Payable: Arising from transactions related to the use of installations and logistic support. The balance receivable is R\$41 (R\$157 payable on 12/31/03) and the amounts recorded in the income for the quarter are comprising of Operating Income of R\$667 (R\$566 in 2003).

iBest S.A.

Revenues, Expenses and Accounts Payable: they result from transactions related to the use of installations and logistic support. The balance payable is R\$182 and the amounts recorded against the profit and loss accounts in the quarter represented R\$540 of operating expense (R\$566 in 2003).

5. MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS

The Company and its subsidiaries assessed the book value of its assets and liabilities as compared to the market or realizable values (fair value), based on information available and valuation methodologies adequate for each situation. The interpretation of market data regarding the choice of methodologies requires considerable judgment and determination of estimates to achieve an amount considered adequate for each situation. As a result the estimates presented may not necessarily indicate the amounts that may be obtained in the current market. The use of different assumptions for calculation of market value or fair value may have a material effect on the amounts obtained. The selection of assets and liabilities presented in this Note was made based on their materiality. Those instruments, the value of which approximates fair value and risk assessment is not significant, are not mentioned.

In accordance with their natures, the financial instruments may involve known or unknown risks; the potential of such risks is important for the best judgment. Thus, there may be risks with or without guarantees, depending on circumstantial or legal aspects. Among the principal market risk factors that can affect the Company's business are the following:

a. Credit Risk

Most services provided by the Company are related to the Concession Contract and a significant portion of these services is subject to the determination of tariffs by the regulatory agency. The credit policy, in case of public telecommunications services, is subject to legal rules established by the concession authority. The risk exists since the Company may incur losses arising from the difficulty in receiving amounts billed to its customers. In the quarter, the Company's default was 3.01% of the gross revenue (2.60% for the same period last year). By means of internal controls, the level of accounts receivable is constantly monitored by the Company, thus limiting the risk of past due accounts by cutting off access to the service (outgoing calls) if the bill is overdue for over 30 days. Exceptions are made for telephone services which should be maintained for national security or defense.

b. Exchange Rate Risk

The Company has loans and financing contracted in foreign currency. The risk related to these liabilities arises from possible exchange rate fluctuations, which may increase these liabilities balances. Loans subject to this risk represent approximately 16% of the total liabilities (5.1% on December 31, 2003). To minimize this type of risk, the Company enters into swap agreements with financial institutions to hedge foreign exchange exposures. 7.5% of the debt portion in foreign currency is covered by hedge agreements (30% on December 31, 2003). Unrealized positive or negative effects of these operations are recorded in the profit and loss as gain or loss. To the quarter, consolidated net losses totaled R\$1,082 (losses of R\$20,542 for the same period last year).

Net exposure as per book and market values, at the risk of the exchange rate prevailing on the balance sheet date, is as follows:

	PARENT COMPANY			
	03/31/04		12/31/03	
	Book Value	Market Value	Book Value	Market Value
LIABILITIES				
Loans and financing	809,027	804,129	235,784	229,596
Hedge Contracts	7,693	(7,132)	9,809	(8,158)
TOTAL	816,720	796,997	245,593	221,438
CURRENT	55,131	53,799	52,412	35,521
NONCURRENT	761,589	743,198	193,181	185,917

The method used for calculation of market value (fair value) of loans and financing in foreign currency and hedge instruments was the discounted cash flow at the market rates prevailing at the balance sheet date.

c. Interest Rate RiskAssets

The Company has loans resulting from products of telephone directories and from the sale of fixed assets to other telephone companies. In the consolidated statements it is included a loan granted by iBest S.A.

These assets are represented as follows:

PARENT COMPANY

CONSOLIDATE

Edgar Filing: BRASIL TELECOM SA - Form 6-K

	Book and Market Value		Book and Market Value	
	03/31/04	12/31/03	03/31/04	12/31/03
ASSETS				
Loans tied to the IGP-DI	7,039	6,832	7,039	6,832
Debentures linked to CDI	829	799	-	-
Loans tied to the IPA-OG Column 27 (FGV)	1,781	1,845	1,781	1,845
Loans tied to the IGP-M	-	-	1,324	1,282
TOTAL	9,649	9,476	10,144	9,959
CURRENT	1,944	1,963	2,439	2,446
NONCURRENT ASSETS	7,705	7,513	7,705	7,513

The carrying values are equal to market values, since the current contracting conditions for this type of financial instrument are similar to the original conditions.

Liabilities

The Company has loans and financing contracted in local currency subject to interest rates linked to TJLP, UMBNDES, CDI (Rate DI - CETIP). The risk inherent in these liabilities arises from possible variations in these rates. The Company has contracted derivative contracts to hedge 78% (79% in 12/31/03) of the liabilities subject to the UMBNDES rate, using exchange rate swap contracts, considering the influence of the dollar on the interest rate (basket of currencies) of these liabilities. However the other market rates are continually monitored to evaluate the need to contract derivatives to protect against the risk of volatility of these rates.

In addition to the loans and financing, the Company issued non-convertible private and public debentures. These liabilities were contracted at interest rates tied to the CDI and the risk linked with this liability is due to a possible increase in the rate.

The aforementioned liabilities at the balance sheet date are as follows:

	PARENT COMPANY	
	Book Value	
	03/31/04	12/31/03
LIABILITIES		
Debentures - CDI	2,292,216	2,328,137
Loans linked to TJLP	1,676,347	1,766,025
Loans linked to UMBNDES	197,291	209,011
Hedge on loans - UMBNDES	39,180	44,895
Loans linked to IGP-M	19,875	21,739
Other loans	19,377	20,439
TOTAL	4,244,286	4,390,246
CURRENT	1,901,435	1,937,864
LONG-TERM	2,342,851	2,452,382

Book Value are equivalent to market values because the current contractual conditions for these types of financial instruments are similar to those in which they were originated. In case of a hypothetical variation of 1% in the aforementioned rates, unfavorable to the Company, the annual negative impact on income would be approximately R\$6,467.

d. Risk of Not Linking Monetary Restatement Indexes to Accounts Receivable

Loan and financing rates contracted by Company are not correlated to amounts of accounts receivable. Telephony tariff adjustments do not necessarily follow increases in local interest rates, which affect the Company's debts. Consequently, a risk arises from this lack of correlation.

e. Contingency Risks

Contingency risks are assessed according to loss hypotheses, as probable, possible or remote. Contingencies considered as probable risk are recorded as liabilities. Details of these risks are presented in Note 7.

f. Risks Related to Investments

Edgar Filing: BRASIL TELECOM SA - Form 6-K

The Company has investments valued by the equity method and stated at cost of acquisition. BrT Serviços de Internet S.A. and Brasil Telecom Celular S.A. are the only wholly-owned subsidiaries whose investments are valued using the equity method, but only the former is in operation. There is no market value applicable to value the investments in the wholly-owned subsidiaries since they are private companies. The future cash flows expected from the investments, both directly and indirectly, do not lead to the expectation of losses that can require the recognition of provisions. This is also the case with the investments related to the iBest and BrT Cabos Submarinos.

The investments valued at cost are immaterial in relation to total assets. The risks related to them would not cause significant impacts to the Company if losses were to occur on these investments.

g. Cash Investment Risks

The company has temporary cash investments in exclusive financial investment funds (FIFs), whose assets are constituted by post fixed federal securities, pre fixed and exchange linked CDI, through future indexed to the exchange rate of the Futures and Commodities Exchange - BM&F and in an investment fund in foreign currency, with no credit risks in such operations. The Company maintains cash investments in the value of R\$1,985,138 (R\$1,269,449 in 12/31/03). Income earned to the balance sheet date is recorded in financial income and amounts to R\$49,639 (R\$50,450 in 2003). Amounts in the consolidated financial statements, are of R\$2,033,933 (R\$1,315,096 on 12/31/03) related to investments and R\$51,382 (R\$53,154 in 2003) income earned.

6. BENEFITS TO EMPLOYEES

a. Private Pension Plan

The Company sponsors private pension schemes related with retirement for its employees and assisted members, and in the case of the latter, medical assistance in some cases. These plans are administered by two foundations, which are Fundação de Seguridade Social (SISTEL), which originated from certain companies of the former Telebrás System and Fundação dos Empregados da Companhia Riograndense de Telecomunicações (FCRT), which manages the benefit plans of CRT, a company merged on December 28, 2000.

The Company bylaws stipulate approval of the supplementary pension policy and the joint liability attributed to the defined benefit plans is linked to the acts signed with the foundations, with the agreement of the Supplementary Pensions Department - SPC, where applicable to the specific plans.

The plans sponsored are valued by independent actuaries on the balance sheet date and in the case of the defined benefit plans described in this explanatory note, immediate recognition of the actuarial gains and losses is adopted. The full liabilities are provided for plans showing deficits. This measure has been applied since the 2001 financial year, when the regulations of CVM Ruling 371/00 were adopted. In cases that show positive actuarial situations, no assets are recorded due to the legal impossibility of reimbursing the surpluses.

The characteristics of the supplementary pension plans sponsored are described below:

FUNDAÇÃO SISTEL DE SEGURIDADE SOCIAL (SISTEL)

Plans

TCSPREV (Defined Contribution, Settled Benefit, Defined Benefit)

This defined contribution and settled benefit plan was introduced on February 28, 2000, with the adherence of around 80% of the employees at that time. On December 31, 2001, all the pension plans sponsored by the Company with SISTEL were merged, being exceptionally and provisionally approved by the Supplementary Pensions Department - SPC, due to the need for adjustments to the regulations. They were subsequently transformed into defined contribution groups with settled and defined benefits. The plans that were merged into the TCSPREV were the PBS-TCS, PBT-BrT, Convênio de Administração BrT and the Termo de Relação Contratual Atípica, the conditions established in the original plans being maintained. In March 2003, this plan was suspended to the employees who want to be included in the supplementary pension plans sponsored by the Company. TCSPREV currently attends to around 69.9% of the staff.

PBS-A (Defined Benefit)

Maintained jointly with other sponsors linked to the provision of telecommunications services and destined for participants that had the status of beneficiaries on 01/31/00.

5. MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS

Edgar Filing: BRASIL TELECOM SA - Form 6-K

PAMA - Health Care Plan for Retired Employees (Defined Contribution)

Maintained jointly with other sponsors linked to the provision of telecommunications services and destined for participants that had the status of beneficiaries on 01/31/00, and also for the beneficiaries of the PBS-TCS Group, incorporated into the TCSPREV on 12/31/01. According to a legal/actuarial appraisal, the Company's liability is exclusively limited to future contributions.

PAMEC-BrT (Health-care Plan for Supplementary Pension Beneficiaries)

Medical assistance for retirees and pensioners linked with the PBT-BrT Group, which was incorporated into the TCSPREV on 12/31/01.

Contributions Established for the Plans

TCSPREV

Contributions to this plan were maintained on the same basis as the original plans incorporated in 2001 for each group of participants, and were established based on actuarial studies prepared by independent actuaries according to regulations in force in Brazil, using the capitalization system to determine the costs. Currently contributions are made by the participants and the sponsor only for the internal groups PBS-TCS (defined benefit) and TCSPREV. In the TCSPREV group, the contributions are credited in individual accounts of each participant, equally by the employee and the Company, and the basic contribution percentages vary between 3% and 8% of the participant's salary, according to age. Participants have the option to contribute voluntarily or sporadically to the plan above the basic contribution, but without equal payments from the Company. In the case of the PBS-TCS group, the sponsor's contribution in the quarter was 12% of the payroll of the participants, whilst the employees' contribution varies according to the age, service time and salary. An entry fee may also be payable depending on the age of entering the plan. The sponsors are responsible for the cost of all administrative expenses and risk benefits. To the quarter, contributions by the sponsor to the TCSPREV group represented on average 6.51% of the payroll of the plan participants. To the employees, the average was 5.88%.

The Company's contributions were R\$3,732 in the quarter (R\$3,619 in 2003).

PBS-A

Contributions may occur in case of accumulated deficit. In 12/31/02, the plan presented surplus.

PAMA

This plan is sponsored with contributions of 1.5% on payroll of active participants linked to PBS plans, segregated and sponsored by several SISTEL sponsors. In the case of Brasil Telecom, the PBS-TCS was incorporated into the TCSPREV plan on 12/31/01, and became an internal group of the plan.

The company's contributions for this plan, that are exclusively the responsibility of the sponsors, were R\$29 in the quarter (R\$31 in 2003).

PAMEC-BrT

Contributions for this plan were fully paid in July 1998, through a single allotment. New contributions will be limited to the future necessity to cover expenses, if that occurs.

FUNDAÇÃO DOS EMPREGADOS DA CIA. RIOGRANDENSE DE TELECOMUNICAÇÕES -FCRT

The main purpose of the Company sponsoring FCRT is to maintain the supplementary retirement, pension and other provisions in addition to those provided by the official social security system to participants. The actuarial system for determining the plan's cost and contributions is collective capitalization, valued annually by an independent actuary.

Plans

BrTPREV

A defined contribution and settled benefits plan, introduced in October 2002, to provide supplementary social security benefits in addition to those of the official social security system, that initially only took care of the employees linked to the Rio Grande do Sul Branch. In March 2003, this plan was also opened to the new employees of the Company and its subsidiaries who wanted to participate in the sponsored complementary social security plans. BrTPREV attends around 24,9% of the employee staff.

Fundador - Brasil Telecom and Alternative - Brasil Telecom

Defined benefits plans to provide supplementary social security benefits in addition to those of the official social security system, now closed to the entry of new participants. Nowadays, those plans attend around 1.8% of the employees staff.

Contributions Established for the Plans

Edgar Filing: BRASIL TELECOM SA - Form 6-K

BrTPREV

The contributions to this plan are established based on actuarial studies prepared by independent actuaries according to the regulations in force in Brazil, using the capitalization system to determine the costs. Contributions are credited in individual accounts of each participant, the employee's and Company's contributions being equal, the basic percentage contribution varying between 3% and 8% of the participation salary, according to the participant's age. Participants have the option to contribute voluntarily or sporadically to the plan above the basic contribution, but without equal payments from the sponsor. The sponsor is responsible for the cost of administrative expenses on the basic contributions from employees and normal contributions of the Company and risk benefits. In the quarter contributions by the sponsor represented on average 5.96% of the payroll of the plan participants, whilst the average employee contribution was 5.21%.

In the quarter the Company's contributions were R\$1,175 (R\$498 in 2003).

Fundador - Brasil Telecom and Alternative - Brasil Telecom

The regular contribution by the sponsor in the quarter was an average of 1.92% on the payroll of the participants in the plan, who contributed at variable rates according to the age, time of service and salary, the average rate was 2.96%. In Alternative Plan - Brasil Telecom, the participants also pay an entrance fee, depending on the age when joining the plan.

The usual contributions of the Company, in the quarter, were R\$5 (R\$125 in December 31, 2003).

The technical reserve corresponding to the current value of the Company's supplementary contribution, due to the actuarial deficiency of the plans managed by FCRT, must be amortized within the maximum established period of 20 years as from January 2000, in accordance with Circular 66/SPC/GAB/COA of the Supplementary Pensions Department dated January 25, 2002. Of the maximum period established, 17 years and nine months still remain for complete settlement. The amortizing contributions in the quarter were R\$25,200 (R\$7,451 in 2003).

b. Stock Option Plan for Officers and Employees

The Extraordinary Shareholders' Meeting held on April 28, 2000 approved the general plan to grant stock purchase options to officers and employees of the Company and its subsidiaries. The plan authorizes a maximum limit of 10% of the shares of each kind of Company stock. Shares derived from exercising options guarantee the beneficiaries the same rights granted to other Company shareholders. The administration of this plan was entrusted to a management committee appointed by the Board of Directors, which decided only to grant preferred stock options. The plan is divided into two separate programs:

Program A

This program is granted as an extension of the performance objectives of the Company established by the Board of Directors for a five-year period. Up to March 31, 2004, no stock had been granted.

Program B

The price of exercising is established by the management committee based on the market price of 1000 shares at the date of the grant and will be monetarily restated by the IGP-M between the date of signing the contracts and the payment date.

The right to exercise the option is given in the following way and within the following periods:

	First Grant		Second Grant	
	From	End of period	From	End of period
33%	01/01/04	12/31/08	12/19/05	12/31/10
33%	01/01/05	12/31/08	12/19/06	12/31/10
34%	01/01/06	12/31/08	12/19/07	12/31/10

The acquisition periods can be anticipated as a result of the occurrence of events or special conditions established in the option contract.

The information related with the general plan to grant stock options is summarized below:

	Preferred stock options (thousand)	Average exercise price R\$
Balance as of 12/31/2003	907,469	11.73
Balance as of 03/31/2004	907,469	11.73

There has been no grant of options for purchase of stocks exercised in the quarter and the representativeness of the balance of the options before the total outstanding stocks is 0.17% (0.17% in December 31, 2003).

5. MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS

Edgar Filing: BRASIL TELECOM SA - Form 6-K

Considering the hypothesis that the options will be fully exercised, the opportunity cost of the premiums of the respective options, calculated by the Black&Scholes method, for the Company would be R\$311 (R\$204 in 2003).

c. Other Benefits to Employees

Other benefits are granted to employees, such as: health care/dental care, meal allowance, group life insurance, occupational accident benefit, sickness benefit, transport allowance, and others.

7. PROVISIONS FOR CONTINGENCIES

The Company and its subsidiaries periodically perform an assessment for contingencies risks, and also review lawsuits taking into consideration the legal, economic, taxes and accounting aspects. The assessment of these risks aims at classifying them according to the chances of an unfavorable outcome between the alternatives of probable, possible or remote, taking into account, according to the circumstances, the opinion of its legal counselors.

Provisions are recognized for those contingencies where the risks are classified as probable. Contingencies classified as possible or remote are discussed in this Note. In certain situations, due to legal requirements or precautionary measures, judicial deposits are made to guarantee the continuity of the cases in litigation. These lawsuits are in progress in various courts, including administrative, lower, and higher courts.

Labor Claims

The provision for labor claims includes an estimate by the Company's management, supported by the opinion of its legal counselors, of the probable losses related to lawsuits filed by former employees of the Company and of service providers.

Tax Suits

The provision for tax contingencies refers mainly to matters related to tax collections due to differences in interpretation of the tax legislation by the Company's legal counsel and the tax authorities.

Civil Suits

The provision for civil contingencies refers to cases related to contractual adjustments arising from Federal Government economic plans and other cases related to community telephony plans.

Classification by Degree of Risk

Contingencies with a Probable Risk

Contingencies classified as having a probable risk of loss, for which provisions are recorded under liabilities, have the following balances:

NATURE	PARENT COMPANY		CONSOLIDATED	
	03/31/04	12/31/03	03/31/04	12/31/03

Guarantees

The company has guarantees signed with financial institutions, as complementary guarantees for judicial proceedings in provisional execution, in the amount of R\$120.561. The major part of these contracts, representing 83%, has terms ending during the next twelve months and the rest for indeterminate periods. The remuneration of these contracts varies from 0.75% p.a. to 4.00% p.a., representing an average rate of 0.96% p.a.

The judicial deposits related to contingencies and contested taxes (suspended liability) are shown in note 21.

8. SHAREHOLDERS EQUITY

a. Capital

The Company is authorized to increase its capital through decisions of the Board of Directors up to a total limit of 560,000,000,000 (five hundred and sixty billion) common or preferred shares, observing the legal limit of 2/3 (two thirds) for the issue of preferred shares without voting rights.

By a resolution of the General Shareholders Meeting or the Board of Directors, the Company's capital can be increased by the capitalization of retained earnings or prior to it by reserves allocated by the General Shareholders Meeting. Under these conditions the capitalization can be made without changing the number of shares.

The capital is represented by common and preferred shares, with no par value, and the maintenance of the proportion between the shares in the case of capital increases, is not mandatory.

By a resolution of the General Shareholders Meeting or the Board of Directors, preference rights can be excluded for the issuance of shares, subscription bonuses or debentures convertible into shares in the cases described in article 172 of the Corporation Law.

The preferred shares do not have voting rights, except in the cases specified from the 1st to 3rd paragraphs of article 12 of the bylaws, but are assured priority in receiving the minimum, non-cumulative dividend of 6% per annum, calculated on the amount resulting from dividing the capital by the total number of the Company's shares, or 3% per annum calculated on the amount resulting from dividing the net book shareholders equity by the total number of Company's shares, whichever is greater.

Subscribed and paid-up capital as of the balance sheet date is R\$3,401,245 (R\$3,373,097 as of December 31, 2003) represented by shares without par value as follows:

The recoverable amount foreseen after the year 2013 is a result of a provision to cover an actuarial insufficiency of the pension plan, the liability for which is being settled according to the maximum period established by the Supplementary Pensions Department (SPC), which is 17 years and 9 months. Despite the time limit stipulated by the SPC and according to the estimated future taxable income, the company presents conditions to fully offset the deferred taxes in a period lower than ten years, if it opts to fully anticipate the payment of the debt. Tax credits in the amount of R\$47,902, attributed to the Consolidation were not recorded, due to the uncertainties of taxable income in the next ten years in BrT CS Ltda. and in Freelance S.A., indirect subsidiaries.

Other Tax Recoverable

It is comprised by federal withholding taxes and payments made, calculated based on legal estimates, which will be offset against future tax obligations. The ICMS recoverable arises, for the most part, from credits recorded in the acquisition of fixed assets, whose compensation with ICMS payable may occur in up to 48 months, according to Complementary Law Nr. 102/00.

In 2004, considering the current technological stage of the telecommunications equipment, the Company, based on technical report issued by Instituto Nacional de Tecnologia, in January 12, 2004, decided to changed the depreciation rates of some equipment, covering underground systems, and metallic, coaxial and optic cables. This change generated a reduction in income, net of taxes, in the amount of R\$72,088.

According to the STFC concession contracts, the Company assets that are indispensable to providing the service and qualified as reversible assets at the time of expiry of the concession will automatically revert to ANATEL, the Company being entitled to the right to the compensation stipulated in the legislation and the corresponding contracts.

Rent Expenses

The Company rents properties, posts, access through third-party land areas (roads), equipment and connection means, formalized through several contracts, which mature on different dates. Some of these contracts are intrinsically related to the provision of services and are long-term agreements. Total rent expenses related to such contracts amount to R\$48,727 (R\$45,278 in 2003) and R\$49,526 (R\$45,233 in 2003) for the consolidated.

Leasing

The Company has lease contracts for information technology equipment. This type of leasing is also used for aircraft to be used in consortium with other companies. The Company has a 54.4% interest in the consortium. Leasing expenses amounted to R\$2,364 (R\$2,193 in 12/31/03) and R\$2,407 (R\$2,193 in 12/31/03) for the consolidation.

Insurance

The Company has insurance policies covering reversible assets, loss of profits and performance bonds, as established in the Concession Contract with the government. Insurance expenses were R\$2,364 (R\$2,193 in 12/31/03) and R\$2,407 (R\$2,193 in 12/31/03) for the consolidation.

The assets, responsibilities and interests covered by insurance are the following:

Type	Cover	Amount insured	
		03/31/04	12/31/03
Operating risks	Buildings, machinery and equipment, installations, call centers, towers, infrastructure and information technology equipment	11,526,140	9,910,135
Loss of profit	Fixed expenses and net income	7,370,615	6,789,697
Performance bonds	Compliance with contractual obligations	120,870	165,490

The Company also contracted insurance related to the civil liability of administrators, with the amount insured being the equivalent of US\$15,000,000.00 (fifteen million US dollars).

There is no contractual civil liability insurance to cover clients in the case of claims or judicial suits, or optional third party liability for third party claims involving Company vehicles.

In 2003 the Company paid PIS and COFINS taxes in installments, previously settled through offsetting tax credits, the ratification of which was refused by the Federal Revenue department, at the administrative level. The payment in installments was included in the Program for Tax Recovery (REFIS) and Special Payment in Installments (PAES). The amount divided into installments through REFIS totaled R\$14,753, with the period for amortization established at 17 monthly payments, and the Company still needs to pay R\$10,921 (R\$13,489 in December 31, 2003) for the remaining 12 months. With respect to PAES, the total amount divided into installments was R\$42,909 and the period for amortization was established as 120 monthly payments, with the Company still needing to pay R\$43,395 (R\$43,529 in December 31, 2003) for the remaining 111 months. The balances payable for both programs are charged interest at the long-term interest rate (TJLP).

With respect to the tax credits that were refused, the Company has lodged appeals at the judicial level for restitution or future compensation.

The principal long-term portion refers to ICMS on the 69/98 Agreement, which is being challenged in court and is being deposited in escrow. It also includes the ICMS deferral, based on incentives by the government of the State of Paraná.

Self-financing Funds - Rio Grande do Sul Branch

They correspond to the credits of financial participation, paid by engaged subscribers, for acquisition of the right of use of switched fixed phone service, still under the elapsed self-financing modality. It happened that, as the shareholders of the Company - Rio Grande do Sul Branch (formerly CRT) had fully subscribed the capital increase made to repay in shares the credits for financial participation, no shares remained to be delivered to the engaged subscribers. Part of these engaged subscribers, who did not accept the Public Offer by the Company for devolution of the referred credits in money, as established in art. 171, paragraph 2, of Law Nr. 6,404/76, are awaiting resolution of the ongoing lawsuit, filed by the Public Prosecution Service and Others, aiming at reimbursement in shares.

Self-Financing Installment Reimbursement - PCT

Refers to the payment in cash or as compensation in installments in invoices for services, to engaged subscribers of the Community Telephony Plan - PCT, to compensate the original obligation of repayment in shares. For these cases settlements were agreed or there are judicial rulings.

36. FUNDS FOR CAPITALIZATION

The expansion plans (self-financing) were the means by which the telecommunications companies financed network investments. With the issue of Administrative Rule 261/97 by the Ministry of Communications, this mechanism for raising funds was eliminated, and the existing consolidated amount of R\$7,974 (R\$7,974 in 12/31/03) is derived from plans sold prior to the issue of the administrative rule, the corresponding assets to which are already incorporated in the Company's fixed assets through the Community Telephone Plant - PCT. For reimbursement in shares, it is necessary to await the judicial ruling on the suits brought by the interested parties.

38. COMMITMENTS

Services Rendered due to Acquisition of Assets

BrT SCS Bermuda acquired fixed assets from an already existing company. Together with the assets of underwater cables acquired, it assumed the obligation of providing data traffic services, initially contracted with the company that sold the assets, which was a beneficiary of the financial resources of the respective advances. The time remaining for the providing of such assumed services is around twenty years.

Contracting of financing

Edgar Filing: BRASIL TELECOM SA - Form 6-K

On March 24 2004, the Company signed a contract for financing with a syndicate of Japanese banks led by Sumitomo Mitsui Banking Corporation - SMBC, with guarantees from the Japan Bank for International Cooperation - JBIC. The effects of this contracting was entered in the accounting records after the closing of the quarter, and coincided with the receipt of the funds on April 30 and May 3, 2004. The contracted amount, destined for financing the Company's investments, was ¥ 21,572,000,000.00 (Twenty-one billion, five hundred and seventy-two million Japanese yen), corresponding to the credited amount of R\$577,240. The grace period is for two years and amortization will occur in 10 consecutive, half-yearly payments, with the first payment falling due on September 24, 2006 and the last on March 24, 2011. Remuneration is the Iene six-month LIBOR plus interest at 1.92% p.a. Payment of interest is six-monthly, always falling due on September 24 and March 24 of each year.

39. SUBSEQUENT EVENT

Acquisition of MTH do Brasil Ltda. and of Vant Telecomunicações S.A.

On January 20, 2004, the company manifested before the MetroRED Telecommunications Group Ltd. and FTT Ventures, Limited (FTT), and also before Aescom Sul Ltda., its intention to exercise its options to purchase the remaining capital, respectively, of MTH do Brasil Ltda. (MTH), the titleholder of 99.9% of the capital of MetroRED Telecomunicações Ltda. (MetroRED Brasil) and of Vant Telecomunicações S.A. (Vant), companies in which the company had already acquired 19.9% of the capital.

The transfers of control of MetroRED Brasil and of Vant to Companhia were approved respectively in meetings of the Council of Directors of ANATEL, held on April 28 and May 5, 2004.

Thus, MetroRED and FTT, through the signing of the competent instruments, transferred to the company on May 13, 2004, the quotas representing 80.1% of the capital of MTH and 01 (one) quota of MetroRED Brasil, receiving in consideration thereof the price of US\$51,000,000.00 (fifty-one million US dollars). Similarly, Aescom, through the signing of the competent instruments, transferred to the Company on May 13, 2004, the shares representing 80.1% of the capital of Vant, receiving in consideration thereof the price of R\$15,575. With the conclusion of these transactions, Brasil Telecom S.A. became, directly and indirectly, the titleholder of the total capital of MTH and, consequently, of MetroRED Brasil, and also of the total capital of Vant.

MetroRED Brasil is a provider of services for the private telecommunications network through optical fiber digital networks, with 343 kilometers of local network in São Paulo, Rio de Janeiro and Belo Horizonte and 1,485 kilometers of long distance network connecting these major cosmopolitan commercial centers. It also owns an Internet Solutions Center, which offers co-location, hosting and added-value services.

Vant is a service provider company for corporate networks, founded in 1999. Initially focused on a TCP/IP network, Vant started in Brazil with a network 100% based on this technology. Vant operates throughout Brazil, and is present in the main Brazilian state capitals, offering a broad portfolio of voice and data products.

The above mentioned acquisitions are founded on the strategy for expansion by Brasil Telecom S.A. outside Region II, due to its positioning in the corporate market, its focus on data transmission services and on the complementation of its networks with the Brasil Telecom S.A.

ADSL Lines in Service (Thousand)	325	282	15.3

Lines Installed In the 1Q04, Brasil Telecom installed 14.2 thousand lines, ending the quarter with 10.7 million terminals. In relation to 1Q03, the plant registered an increase of 92.5 thousand lines.

Lines in Service Plant in service totaled 9.7 million lines in the 1Q04. In this quarter, the Company started a process of delinquent line detailing, disconnecting 150 thousand lines which have no prospect of returning to the active base in the medium term. Therefore, the utilization rate was reduced to 90.9%. This process will remain strictly operative throughout the next quarters.

ADSL Brasil Telecom practically doubled its ADSL accesses in service in just a year, reaching 324.9 thousand accesses at the end of 1Q04.

Goals

Quality Goals On February and March 2004, Brasil Telecom accomplished all of the quality goals predicted in the General Plan of Quality Targets established by Anatel in relation to the offering of switched fixed telephony service, in long-distance and local segments.

During January 2004, Brasil Telecom did not reach two quality targets due to problems in the network routes of some mobile carriers, causing a loss of calls due to traffic jams, which contributed to the failure in meeting the call completion target.

Universalization Goals

At a meeting held by Anatel's Board of Directors on January 14 and 15, 2004, Brasil Telecom received approval for the achievement of the universalization targets.

Following the approval, Brasil Telecom started to offer inter-regional and international long-distance services on January 22, 2004. In relation to the Personal Communication Service (PCS), Anatel authorized Brasil Telecom to use the radio-frequency for its mobile operation.

Traffic

OPERATING DATA	1Q04	4Q03	1Q04/4Q03 (%)
Exceeding Local Pulses (Million)	2,586	2,927	(11.7)
Domestic Long Distance Minutes (Million)	1,534	1,559	(1.7)
Fixed-Mobile Minutes (Million)	1,037	991	4.7
Exceeding Pulses/ Average LIS/Month	88.1	99.3	(11.3)
DLD Minutes/Average LIS/Month	52.2	52.9	(1.2)
Fixed-Mobile Minutes/Average LIS/Month	35.3	33.6	5.1

Exceeding Local Pulses Due to the typical seasonal effect in the first quarter of every year, the local traffic dropped 11.7, influenced by:

The fewer business days in the quarter (62 days in the 1Q04 against 65 days in the 4Q03);

The economic slowdown noted in the period, which affects the purchase power and the level of confidence of the consumers;

The effects of aggressive promotions to sell pre-paid phones during Christmas time.

It is worth noting that, as those credits end, the negative impact on local traffic decreased. Starting in March, this effect was no longer noted.

DLD Traffic

In the 1Q04, Long-Distance Traffic (LD) decreased 1.7% in comparison with the previous quarter. Even though the volume of traffic is lower, as a result of the seasonal effect and economic slowdown, **Brasil Telecom increased its share in the long-distance market. This increase was leveraged by the launch of the inter-regional and international long-distance service operation.**

DLD Market Share

In just two months of operation, Brasil Telecom gained a 26.5% market share in the inter-regional segment and a 15,0% market share in the international segment.

Leveraged by the success of the campaigns developed for the inter-regional and international service operation, **the LD market share of Brasil Telecom increased by 1.8 p.p. in intra-regional and 0.4 p.p. in the intra-sector segment.** In the intra-sector segment, market share reached 89.9% in the 1Q04, while in the intra-regional segment, Brasil Telecom reached 77.8%.

Traffic Inter-Networks

Inter-networks traffic grew 4.7% in the 1Q04, mainly due to the increase of 7.4% in mobile plant of Region II.

Of the total inter-network traffic, 84.7% refers to VC-1 calls, 12.1% to VC-2 calls and 3.2% to VC-3 calls. **There was an increase of VC-2 traffic, which rose its share from 6.7% in the 4Q03 to 12.1% in the 1Q04, while the VC-3 rose its share from 1.6% in the 4Q03 to 3.2% in the 1Q04, resulting from the increase of mobile long-distance calls with CSC 14.**

Tariffs

Edgar Filing: BRASIL TELECOM SA - Form 6-K

Higher Justice Court Decision keeps IPCA Adjustment The last decision of Higher Justice Court in relation to the rate readjustment did not alter the current situation in relation to the percentages granted and applied on June 29, 2003. It is worth mentioning that the merit of the question has not yet been judged.

Inter-network Adjustment Anatel authorized, on February 9, 2004, the fixed-mobile tariff adjustments. **The average adjustments were 6.99% and 9.17% for VC and VU-M tariffs, respectively.**

Subsidiaries

Brasil Telecom Celular The Board of Anatel approved, at a meeting held on January 14, 2004, the accomplishment of the universalization targets of Brasil Telecom. Thus, **Brasil Telecom Celular was authorized to operate is PCS license.** . This authorization was published in the Federal Official Journal on January 19, 2004

The coverage was scaled giving priority to the regions with higher GDP and it will be expanded to the other locations over the next months. By exceeding the targets specified by Anatel, in December 2003, Brasil Telecom Celular already covered at least 50% of the metropolitan area of all 10 capital cities within Region II, with 146 installed BTSs. **Brasil Telecom Celular estimates to cover, by the beginning of the second half of 2004, at least 345 locations, by offering top quality mobile telephony to these locations.**

At the completion of this project, Brasil Telecom Celular will offer to its future subscribers a coverage which is broader than that of Band B in certain regions, becoming the largest GSM coverage in Region II.

In order to reach these objectives, R\$54.4 million were invested in the 1Q04, totaling R\$163.6 million in investments since the beginning of the project.

Nowadays, Brasil Telecom Celular counts on approximately 16 thousand clients, which resulted from the Our Cellphone (*Nosso Celular*) project, when Brasil Telecom's employees, their families and friends were able to acquire cell phones in special financing conditions.

The main platforms that will be used to provide the mobile service (prepaid service, voice mail, short messages - SMS, multimedia messages - MMS, other data service platforms - WAP, OTA, Middleware and anti-fraud) are already being implemented and integrated into the other systems and platforms of Brasil Telecom.

Financial performance

Revenues

Local Service **Gross revenue from local service, not including VC-1, hit R\$1,116.9 million in the 1Q04, 5.0% higher than the amount registered in 1Q03.**

Gross revenue from activation fee totaled R\$9.1 million in the 1Q04, This performance is a result of the 404.8 thousand lines activated in the quarter.

Gross revenue from basic subscription reached R\$747.1 million in the quarter, a reduction of 0.2% in relation to R\$748.6 million registered in the 4Q03. This variation is explained mainly by the reduction of 0.4% in the average lines in service.

Gross revenue from measured service totaled R\$336.4 million in the 1Q04, a reduction of 11.2% in relation to 4Q03, basically due to the reduction of 0.4% in the average lines in service and to the drop of 11.7% in local traffic.

Public Telephony **Gross revenue from public telephony reached R\$108.2 million in the 1Q04**, a 6.3% reduction in comparison with 4Q03.

Domestic Long Distance **Gross revenue from long-distance calls, not including VC-2 and VC-3, reached R\$382.2 million in the 1Q04**, representing an 1.3% increase in comparison to 4Q03 due to the beginning of CSC 14 use in inter-regionals and international calls.

In the 1Q04, revenue from inter-regional DLD hit R\$21.3 million, while the revenue from ILD totaled R\$5.7 million.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

Inter-Network	<p>Gross revenue from inter-network (VC-1, VC-2 and VC-3) calls reached R\$702.1 million in the 1Q04, a 14.4% increase in relation to 4Q03, reflecting the increase of mobile long-distance calls using the CSC 14 and the increase of mobile plant in Region II.</p> <p>The operation of CSC 14 in the calls originated from cell phones contributed with revenue of R\$78.5 million in the 1Q04, against R\$37.4 million in the 4Q03.</p>
Interconnection	<p>In the 1Q04, gross revenue from interconnection dropped 11.4% in comparison with 4Q03. This variation is explained by the increase of Brasil Telecom market share in the long-distance segments.</p>
Lease of Means	<p>In the 1Q04, gross revenue from lease means reached R\$55.1 million, 9.6% inferior than the R\$60,9 million registered in the 4Q03.</p>
Data Communication	<p>In the 1Q04, gross revenue from data communication reached R\$220.5 million, stable in relation to the previous quarter.</p> <p>Data communication revenues increased 2% in the 1Q04, excluding internet dial-in traffic, considering the negative effect of the seasonality in the internet utilization during the two first months of the year.</p> <p>A year ago, gross revenue from data communication represented 5.4% of total revenue, while in the 1Q04 this segment represented 7.6% of total gross revenue.</p>
Supplementary and Value-Added Services	<p>Gross revenue from supplementary and value-added services increased 6.0% in the 1Q04, in comparison with the previous quarter, totaling R\$96.5 million.</p> <p>In March 2004 there was 6.0 million activated intelligent services, against 5.7 million in December 2003.</p>
Other Revenues	<p>In the 1Q04, other revenues reached R\$36.3 million, representing a reduction of 8.3% in relation with the 4Q03, wich was R\$39.6.</p>
