## **Nova Celebrates Installation of 100<sup>th</sup> Metrology System in South Korea**

*Market-leading technology widely accepted with more than 650 300mm systems installed worldwide*

**REHOVOT, Israel, April 28, 2008** - Nova Measuring Instruments Ltd. (NASDAQ: NVMI) provider of leading edge stand-alone metrology and the market leader of integrated metrology solutions to the semiconductor process control market, is celebrating the installation of its 100<sup>th</sup> NovaScan Optical Metrology system in South Korea. According to analyst company Gartner Inc, the semiconductor equipment market in South Korea is the second largest in Asia Pacific after Taiwan. Following this latest installation, more than 650 NovaScan 300mm Optical CD and thin film metrology systems are now installed worldwide, bringing the total number of NovaScan installations to over 1600 systems.

The NovaScan systems were chosen by our Korean customers after demonstrating benchmark precision and fleet matching. Once installed, outstanding reliability of more than 224,000 wafers between failures was achieved said Buck Kim, President of Nova's Asia Pacific subsidiary. The success in the South Korean market is a milestone for Nova, as Korean customers are highly demanding. We believe that we are in a good position to continue leveraging our installed base in this key market and further extend our penetration added Mr. Kim.

**About Nova:** Nova Measuring Instruments Ltd. develops, produces and markets advanced integrated and stand alone metrology solutions for the semiconductor manufacturing industry. Nova is traded on the NASDAQ & TASE under the symbol NVMI. The Company's website is [www.nova.co.il](http://www.nova.co.il).

*This press release contains forward-looking statements within the meaning of safe harbor provisions of the Private Securities Litigation Reform Act of 1995 relating to future events or our future performance, such as statements regarding trends, demand for our products, expected deliveries, transaction, expected revenues, operating results, earnings and profitability. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied in those forward-looking statements. These risks and other factors include but are not limited to: our dependency on a single integrated process control product line; the highly cyclical nature of the markets we target; our inability to reduce spending during a slowdown in the semiconductor industry; our ability to respond effectively on a timely basis to rapid technological changes; risks associated with our dependence on a single manufacturing facility; our ability to expand our manufacturing capacity or marketing efforts to support our future growth; our dependency on a small number of large customers and small number of suppliers; risks related to our intellectual property; changes in customer demands for our products; new product offerings from our competitors; changes in or an inability to execute our business strategy; unanticipated manufacturing or supply problems; changes in tax requirements; changes in customer demand for our products and risks related to our operations in Israel. We cannot guarantee future results, levels of activity, performance or achievements. The matters discussed in this press release also involve risks and uncertainties summarized under the heading "Risk Factors" in Nova's Annual Report on Form 20-F for the year ended December 31, 2007 filed with the Securities and Exchange Commission on March 28, 2008. These factors are updated from time to time through the filing of reports and*

Edgar Filing: NOVA MEASURING INSTRUMENTS LTD - Form 6-K

*registration statements with the Securities and Exchange Commission. Nova Measuring Instruments Ltd. does not assume any obligation to update the forward-looking information contained in this press release.*
