The Value Line Fund, Inc.

To Our Value Line

To Our Shareholders (unaudited):

Enclosed is your annual report for the six-month period ended June 30, 2011. I encourage you to carefully review this report, which includes economic highlights, your Fund's performance data and highlights, schedule of investments, and financial statements.

We are pleased to report that The Value Line Fund, Inc. (the "Fund") earned a total return of 14.04% for the six months ending June 30, 2011. That compared with a total return of 6.02% for the benchmark index, the Standard & Poor's 500 Index(1). Contributing to the superior performance in the period was good stock selection in the Computer Software, Consumer Services and Process Industries sectors, plus avoidance of the weak Financial Services sector. In addition, the Fund's largest holding, Green Mountain Coffee Roasters, rose 172% in the six months.

Eighteen months ago, we outlined for you the changes we had undertaken to improve the performance of your Fund. Those changes continue to pay off. First, we broadened the Fund's stock selection universe. Rather than mechanically invest only in the weekly list of one hundred Rank 1s of the Value Line Timeliness Ranking System, the portfolio manager now selects investments from among the 1,200 or so stocks in the top three Ranks. This allows greater diversification of the portfolio, while also reducing portfolio turnover and hence trading expenses. Second, we appointed senior portfolio manager Stephen Grant to actively manage the Fund. In his 20 years with the Value Line funds, Mr. Grant has demonstrated widely recognized success managing other equity portfolios in our fund family.

The Fund's expanded stock selection criteria allow us to implement our disciplined investment strategy to full advantage. We invest in proven winners---those companies that have established five to ten year records of superior relative earnings growth and stock price growth. This is truly a portfolio of growth stocks. We also look for companies demonstrating strong short-term, quarter to quarter, relative earnings momentum and stock price momentum. If a holding later falters on these measures, we do not hesitate to replace it with a stock showing superior strength.

The Fund invests in companies of all sizes. Its approximately 150 holdings are well-diversified in that respect, comprised of about one third large capitalization companies, one third mid-cap and one third small-cap.

Thank you for investing with us.

Sincerely,

/s/ Mitchell Appel
Mitchell Appel, President

/s/ Stephen E. Grant
Stephen E. Grant, Portfolio Manager

(1) The Standard & Poor's 500 Index consists of 500 stocks which are traded on the New York Stock Exchange, American Stock Exchange and the NASDAQ National Market System and is representative of the broad stock market. This is an unmanaged index and does not reflect charges, expenses or taxes. It is not possible to directly invest in this index.

Economic Highlights (unaudited)

The first half of 2011 saw the broad US stock market rising on the heels of strengthening corporate profits. The S&P 500 returned 6% for the first six months of the year despite significant global economic concerns. Several members of the European Union continued to face a serious debt crisis including Greece, Portugal, Ireland, and Spain. Further, the nuclear disaster in Japan and the geopolitical upheaval in commodity markets added to investor concerns. At home, disappointing job growth in the United States kept the national unemployment rate firmly above 9% for the second quarter.

By mid-year there was mounting evidence that the US recovery had slowed to a crawl. Consumer spending, which accounts for roughly 70% of economic activity, declined in June for the first time in 2 years. First quarter GDP was up by only 0.4%, and second quarter GDP growth was only modestly better at 1.3%. Employment growth in July lagged June numbers, and it was reported that the level of new factory orders decreased. By August, only 58% of the population was working, the lowest level in nearly 3 decades. Housing prices remained almost uniformly weak.

Much of the summer was consumed by the drama of the U.S. debt ceiling negotiations, resulting in an 11th hour deal that appears to satisfy few constituents. It surely did not satisfy Standard & Poors who felt that the \$2.1 trillion deficit reduction over 10 years was insufficient to solve the country's debt problem. The rating agency proceeded to downgrade U.S. Treasury debt from AAA to AA+. This downgrade did not affect short-term Treasuries. Within a few days the rating agency imposed the same rating cut on the long-term debt of several U.S. Agencies including Fannie Mae and Freddie Mac. The other major rating agencies, Moody's and Fitch, maintained AAA ratings for U.S. Treasury debt as well as for the U.S. Agencies. Investor confidence plunged on the heels of the debt ceiling debacle and the US Treasury debt downgrade. Returns for the S&P 500 turned negative in August giving up its returns for the year.

The bond market rallied as stocks took a dive. Yields fell and prices rose across fixed income markets as investors looked for safer havens. Despite the rating downgrade, investor demand for Treasuries soared, pushing interest rates down to the lowest levels in 2 years.

FUND EXPENSES (unaudited):

Example

As a shareholder of the Fund, you incur ongoing costs, including management fees, distribution and service (12b-1) fees, and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (January 1, 2011 through June 30, 2011).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. In addition, if transactional costs were included, your costs would have been higher.

	Beginning account value 1/1/11	Ending account value 6/30/11	Expenses paid during period 1/1/11 thru 6/30/11*
Actual	\$1,000.00	\$1,140.40	\$4.62
Hypothetical (5% return before expenses)	\$1,000.00	\$1,020.48	\$4.36

* Expenses are equal to the Fund’s annualized expense ratio of 0.87% multiplied by the average account value over the period, multiplied by 181/365 to reflect the one-half year period. This expense ratio

may differ from the expense ratio shown in the Financial Highlights.

Notes to Financial Statements (unaudited)

1. Significant Accounting Policies

The Value Line Fund, Inc., (the “Fund”) is registered under the Investment Company Act of 1940, as amended, as a diversified, open-end management investment company whose primary investment objective is long term-growth of capital.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements.

(A) Security Valuation: Securities listed on a securities exchange are valued at the closing sales prices on the date as of which the net asset value is being determined. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ Official Closing Price. In the absence of closing sales prices for such securities and for securities traded in the over-the-counter market, the security is valued at the midpoint between the latest available and representative asked and bid prices. Short-term instruments with maturities 60 days or less at the date of purchase are valued at amortized cost, which approximates market value. Short-term instruments with maturities greater than 60 days at the date of purchase are valued at the midpoint between the latest available and representative asked and bid prices, and commencing 60 days prior to maturity such securities are valued at amortized cost. Securities for which market quotations are not readily available or that are not readily marketable and all other assets of the Fund are valued at fair value as the Board of Directors may determine in good faith. In addition, the Fund may use the fair value of a security when the closing market price on the primary exchange where the security is traded no longer accurately reflects the value of a security due to factors affecting one or more relevant securities markets or the specific issuer.

(B) Fair Value Measurements: The Fund follows fair valuation accounting standards (FASB ASC 820-10) which establish a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

- Level 1 — Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access at the measurement date;
- Level 2 — Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active;
- Level 3 — Inputs that are unobservable.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment’s valuation changes. The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following table summarizes the inputs used to value the Fund’s investments in securities as of June 30, 2011:

Investments in Securities:	Level 1	Level 2	Level 3	Total
----------------------------	---------	---------	---------	-------

Edgar Filing: VALUE LINE FUND INC - Form N-CSRS

Total Investments in Securities	\$ 138,240,391	\$ 2,300,000	\$ 0	\$ 140,540,391

The Value Line Fund, Inc.

June 30, 2011

The Fund follows the updated provisions surrounding fair value measurements and disclosures on transfers in and out of all levels of the fair value hierarchy on a gross basis and the reasons for the transfers as well as to disclosures about the valuation techniques and inputs used to measure fair value for investments that fall in either Level 2 or Level 3 fair value hierarchy.

For the six months ended June 30, 2011, there was no significant transfer activity between Level 1 and Level 2.

For the six months ended June 30, 2011, there were no Level 3 investments. The Schedule of Investments includes a breakdown of the Schedule's investments by category.

(C) Repurchase Agreements: In connection with transactions in repurchase agreements, the Fund's custodian takes possession of the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, it is the Fund's policy to mark-to-market on a daily basis to ensure the adequacy of the collateral. In the event of default of the obligation to repurchase, the Fund has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. Under certain circumstances, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral or proceeds may be subject to legal proceedings.

(D) Federal Income Taxes: It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies, including the distribution requirements of the Tax Reform Act of 1986, and to distribute all of its taxable income and capital gains to its shareholders. Therefore, no federal income tax provision is required.

(E) Security Transactions and Distributions: Security transactions are accounted for on the date the securities are purchased or sold. Interest income is accrued as earned. Realized gains and losses on sales of securities are calculated for financial accounting and federal income tax purposes on the identified cost basis. Dividend income and distributions to shareholders are recorded on the ex-dividend date. Distributions are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles.

(F) Foreign Currency Translation: The books and records of the Fund are maintained in U.S. dollars. Assets and liabilities which are denominated in foreign currencies are translated to U.S. dollars at the prevailing rates of exchange. The Fund does not isolate changes in the value of investments caused by foreign exchange rate differences from the changes due to other circumstances.

Income and expenses are translated to U.S. dollars based upon the rates of exchange on the respective dates of such transactions.

Net realized foreign exchange gains or losses arise from currency fluctuations realized between the trade and settlement dates on securities transactions, the differences between the U.S. dollar amounts of dividends, interest, and foreign withholding taxes recorded by the Fund, and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, other than investments, at the end of the fiscal period, resulting from changes in the exchange rates. The effect of the change in foreign exchange rates on the value of investments is included in realized gain/loss on investments and change in net unrealized appreciation/depreciation on investments.

(G) Representations and Indemnifications: In the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote.

The Value Line Fund, Inc.

Notes to Financial Statements (unaudited)

(H) Foreign Taxes: The Fund may be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

(I) Subsequent Events: Management has evaluated all subsequent transactions and events through the date on which these financial statements were issued, and except as already included in the notes to these financial statements, has determined that no additional items require disclosure.

2. Capital Share Transactions, Dividends and Distributions to Shareholders

Investment Securities	\$ 7,253,402

4. Income Taxes

At June 30, 2011, information on the tax components of capital is as follows:

Cost of investments for tax purposes	\$ 94,286,386
Gross tax unrealized appreciation	\$ 46,833,679
Gross tax unrealized depreciation	(\$579,674)
Net tax unrealized appreciation on investments	\$ 46,254,005

5. Investment Advisory Fee, Service and Distribution Fees and Transactions With Affiliates

An advisory fee of \$390,384 was paid or payable to EULAV Asset Management (the "Adviser") for the six months ended June 30, 2011. This was computed at an annual rate of 0.70% of the first \$100 million of the Fund's average daily net assets plus 0.65% of the excess thereof, and paid monthly. The Adviser provides research, investment programs, supervision of the investment portfolio and pays costs of administrative services, office space, equipment

and compensation of administrative, bookkeeping, and clerical personnel necessary for managing the affairs of the Fund. The Adviser also provides persons, satisfactory to the Fund's Board of Directors, to act as officers and employees of the Fund and pays their salaries. Effective May 1, 2009 through April 30, 2012, the Adviser contractually reduced the advisory fee by 0.10% of the first \$100 million of the Fund's average daily net assets and 0.15% on the excess there of for a one year period. The fees waived amounted to \$59,567 for the six months ended June 30, 2011. The Adviser has no right to recoup previously waived amounts.

June 30, 2011

The Fund has a Service and Distribution Plan (the “Plan”), adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, which compensates EULAV Securities LLC (the “Distributor”) for advertising, marketing and distributing the Fund’s shares and for servicing the Fund’s shareholders at an annual rate of 0.25% of the Fund’s average daily net assets. For the six months ended June 30, 2011, fees amounting to \$140,611 before fee waivers were accrued under the Plan. Effective May 1, 2007 through April 30, 2012, the Distributor contractually agreed to waive the Fund’s 12b-1 fee for one year periods. For the six months ended June 30, 2011 the fees waived amounted to \$140,611. The Distributor has no right to recoup prior waivers.

For the six months ended June 30, 2011, the Fund’s expenses were reduced by \$78 under a custody credit arrangement with the custodian.

Direct expenses of the Fund are charged to the Fund while common expenses of the Value Line Funds are allocated proportionately based upon the Funds’ respective net assets. The Fund bears all other costs and expenses.

Certain officers and a Trustee of the Adviser are also officers and a director of the Fund. At June 30, 2011, the officers and directors as a group owned 729 shares of the Fund, representing less than 1% of the outstanding shares.
