LLOYDS TSB - TRADING UPDATE

Lloyds TSB Group plc will shortly be meeting analysts ahead of its close period for the half-year ending 30 June 2005. This announcement sets out the information that will be provided at those meetings.

On a comparable basis under International Financial Reporting Standards*, Lloyds TSB expects to deliver a satisfactory trading performance for the first half of 2005 and continues to deliver good earnings growth, demonstrating further progress in its key strategic priorities.

The Retail Bank has continued to make progress in quality customer recruitment and profitable franchise development, and is expected to achieve satisfactory levels of customer lending and deposit balance growth during the half-year, against a backdrop of slowing consumer spending. The rate of consumer lending growth in the first half of 2005 is however expected to be slightly lower than the double digit growth rates experienced in recent years.

Scottish Widows has continued to benefit from its focus on product and capital efficiency. The launch, in the second half of 2004, of a new range of products more tailored to the branch network distribution channel has delivered an uplift in unit trust/OEIC sales during the first quarter of 2005. In addition, strong progress continues to be made in the distribution of life, pensions and long-term savings products through the Independent Financial Advisor distribution channel.

In Wholesale and International Banking, strong progress continues in developing and deepening our franchises. In Business Banking and Corporate Markets, in particular, we are registering meaningful gains which reflect both our emphasis on product and relationship cross-sell, and new customer acquisition. All main businesses within the division continue to perform well and we are achieving good levels of profitable new business.

The Group's strong cost performance in recent years has continued into the first half of 2005 and we have made further improvements in processing quality. The Group continues to expect to deliver revenue growth in excess of cost growth, on an IFRS comparable basis*, in the first half of 2005.

Our focus on lending to existing customers, in a slowing consumer environment, has resulted in overall asset quality remaining satisfactory. On an IFRS comparable basis*, the Group's impairment charge for loan losses from its continuing operations, as an annualised percentage of average lending, is expected to be broadly consistent with the provisions charge in the first half of 2004. A higher charge in retail banking, reflecting an increase in the number of customers experiencing repayment difficulties, is expected to be offset by a lower charge in the Group's corporate lending portfolios.

Current indications remain that the overall impact of the full implementation of IFRS, excluding the volatility introduced by the requirements of IFRS and FRS 27, will be to reduce the Group's full year reported earnings per share, compared with those that would have been reported under UK GAAP, by approximately 6 per cent. Profit before tax (before volatility) is expected to be approximately 8 per cent lower. This likely reduction in earnings in 2005 is almost entirely due to changes in the timing of income and expense recognition in the Group's financial statements, in particular with regard to the application of effective interest rates, the reclassification of certain securities from equity to debt, and the impact of discounting on levels of loan loss impairment. The Group will endeavour to ensure that comparable underlying business performance and trends, which exclude the impact of prospective accounting changes relating to the implementation of IFRS, are clearly identified on an ongoing basis.

Eric Daniels, Group Chief Executive, said "We are continuing to make progress against our objective to deliver sustained earnings growth, despite signs of a slowing consumer environment in the UK, and the Group is on track to deliver a satisfactory trading performance for the first half of 2005."

* excluding the impact of prospective accounting changes relating to the implementation of IFRS
