Southeastern Banking Corporation

Notes to Consolidated Financial Statements

(Unaudited)

1. Accounting and Reporting Policy for Interim Periods

The accompanying unaudited consolidated financial statements of Southeastern Banking Corporation (the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. These statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statement presentation. In the opinion of management, all adjustments necessary for a fair presentation have been made. These adjustments, consisting of normal, recurring accruals, include estimates for various fringe benefits and other transactions normally determined or settled at year-end. Operating results for the quarter and nine months ended September 30, 2003 are not necessarily indicative of trends or results to be expected for the full year 2003. For further information, refer to the consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2002.

2. Reclassifications

Certain prior year amounts have been restated to conform with the current year financial statement presentation.

3. Recent Accounting Standards

Accounting for Costs Associated with Exit or Disposal Activities

In June 2002, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 146, Accounting for Costs Associated with Exit or Disposal Activities. This statement provides guidance on the recognition and measurement of liabilities for costs associated with exit or disposal activities. Generally, SFAS No. 146 stipulates that defined exit costs, including restructuring and employee termination costs, are to be recorded on an incurred rather than commitment basis. The Company adopted SFAS 146 effective January 1, 2003. SFAS 146 did not have a material impact on the consolidated financial statements.

Guarantor's Accounting and Disclosure Requirements for Guarantees, including Indirect Guarantees of Indebtedness of Others

In November 2002, the FASB issued Interpretation (FIN) No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, including Indirect Guarantees of Indebtedness of Others. This interpretation clarifies that a guarantor is required to recognize, at the inception of certain guarantees, a liability for the fair value of the obligation undertaken in issuing the guarantee. The Company has identified standby letters

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

of credit as guarantees under FIN No. 45 and adopted FIN 45, in entirety, effective January 1, 2003. Adoption of FIN No. 45 did not have a material impact on the Company's financial position or results of operations.

Amendment of Statement 133 on Derivative Instruments and Hedging Activities

In April 2003, the FASB issued SFAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities. SFAS No. 149 amends and clarifies financial accounting and

Table of Contents

Southeastern Banking Corporation

Notes to Consolidated Financial Statements

(Unaudited)

reporting for derivative instruments, including certain derivative instruments embedded in other contracts, and hedging activities under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities. The adoption of SFAS No. 149 did not have a current impact on the Company's consolidated financial statements.

Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity

SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity, was issued in May 2003. This statement establishes guidelines on how instruments sharing characteristics of both liabilities and equity should be classified and measured. Certain obligations that require a transfer of assets and meet the definition of liabilities in FASB Concepts Statement No. 6, Elements of Financial Statements and other recognition criteria in FASB Concepts Statement No. 5, Recognition and Measurement in Financial Statements of Business Enterprises, are to be reported as liabilities. Additionally, certain obligations that could be settled by issuance of an entity's equity but lack other characteristics of equity are to be reported as liabilities even though the obligation does not meet the definition of liabilities in Concepts Statement No. 6. The Company adopted SFAS No. 150, in entirety, effective July 1, 2003. SFAS No. 150 did not have a current impact on the consolidated financial statements.

Accounting for Loans or Certain Debt Securities Acquired in a Transfer

In October 2003, the American Institute of Certified Public Accountants issued Statement of Position (SOP) 03-3, Accounting for Loans or Certain Debt Securities Acquired in a Transfer. This statement addresses accounting for differences arising between contractual cash flows and cash flows expected to be collected from an investor's initial investment in loans or debt securities acquired in a transfer, if those differences relate to credit quality. SOP 03-3 also prohibits the carry over or creation of a valuation allowance in the initial accounting for loans acquired in a transfer. The scope of SOP 03-3 includes loans acquired in purchase business combinations but not loans originated by the entity. This statement is effective for loans acquired in fiscal years beginning after December 15, 2004. Adoption of SOP 03-3 is not expected to have a significant impact on the consolidated financial statements.

4. Acquisition

On January 31, 2002, the Company acquired the Richmond Hill office of Valdosta, Georgia-based Park Avenue Bank. The Company received certain loans, property and equipment, and other assets with fair values of approximately \$12,201,000, while assuming deposits and other liabilities totaling approximately \$4,270,000. Cash balances applied towards the purchase approximated \$8,000,000. A deposit premium of \$100,000 was recorded in conjunction with the transaction.

5. Treasury Stock

In March 2000, the Board of Directors authorized the purchase of up to \$7,000,000 in Company common stock. From 2000 - 2002, the Company purchased 247,658 shares on the open market and through private transactions at an average price of \$16.65 per share. During the first nine months of 2003, the Company purchased an additional 2,600 shares at a purchase price of \$21.50. Subsequent

Southeastern Banking Corporation

Notes to Consolidated Financial Statements

(Unaudited)

to September 30, 2003, the Company purchased another 15,000 shares at an aggregate price of \$345,004, or \$23.00 per share. The maximum consideration available for additional treasury purchases, at prices to be determined in the future, is \$2,474,834. Any acquisition of additional shares will be dictated by market conditions.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This Analysis should be read in conjunction with the 2002 Annual Report on Form 10-K and the consolidated financial statements & related notes on pages 3 - 9 of this quarterly filing. The Company's accounting policies, which are described in detail in Form 10-K, are integral to understanding the results reported. The Company's accounting policies require management's judgment in valuing assets, liabilities, commitments, and contingencies. A variety of factors could affect the ultimate value that is obtained when earning income, recognizing an expense, recovering an asset, or relieving a liability. This Analysis contains forward-looking statements with respect to business and financial matters. Actual results may vary from those contained in these forward-looking statements. See the section entitled Forward-Looking Statements within this Analysis.

Description of Business

Southeastern Banking Corporation (the Company), with assets exceeding \$359,600,000, is a financial services company with operations in southeast Georgia and northeast Florida. Southeastern Bank (SEB), the Company's principal subsidiary, offers a full line of commercial and retail services to meet the financial needs of its customer base through its fifteen branch locations, loan production office in Brunswick, Georgia, and ATM network. Services offered include traditional deposit and credit services, long-term mortgage originations, and credit cards. SEB also offers 24-hour delivery channels, including internet and telephone banking, and through an affiliation with Raymond James Financial Services, provides insurance agent and investment brokerage services.

Acquisition

On January 31, 2002, the Company acquired the Richmond Hill office of Valdosta, Georgia-based Park Avenue Bank. The Company received certain loans, property and equipment, and other assets with fair values of approximately \$12,201,000, while assuming deposits and other liabilities totaling \$4,270,000. Cash balances applied towards the purchase approximated \$8,000,000. A deposit premium of \$100,000 was recorded in conjunction with the transaction. Operating results for Richmond Hill are included from the date of acquisition.

Financial Condition

Consolidated assets totaled \$359,600,400 at September 30, 2003, down \$18,539,229 or 4.90% from year-end 2002 and \$11,431,378 or 3.08% from September 30, 2002. A \$16,493,049 reduction in deposits, particularly interest-bearing balances, and shifts in earning assets were the major factors in the 2003 results. Within earning assets, federal funds sold declined \$22,811,000 and investment securities, \$20,347,300; loans grew \$26,312,726. Loans comprised 60%, investment securities, 40%, and federal funds sold, 0%, of earning assets at September 30, 2003 versus 49%, 44%, and 7% at December 31, 2002. Overall, earning assets continued to approximate 92% of total assets at September 30, 2003. During the year-earlier period, total assets increased \$15,816,963 or 4.45%. The acquisition of the Richmond Hill branch and deposit growth at other SEB locations were the primary factors in the 2002 increase. Refer to the Liquidity section of this Analysis for additional details on deposits and other funding sources.

Investment Securities

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

The securities portfolio decreased in size, largely in the third quarter, as cash flows were utilized in the loan portfolio. Specifically, investment securities declined \$20,347,300 or 13.27% in 2003 year-to-date. Purchases of securities during the nine-month period approximated \$53,118,000, and redemptions, \$71,093,000. Approximately 85% of securities transactions year-to-date were attributable to various issuers exercise of call options and other prepayments as a result of the current low-rate interest

Table of Contents

environment. The effective repricing of securities at lower rates impacts current and future earnings results; refer to the Interest Rate and Market Risk/Interest Rate Sensitivity and Operations sections of this Analysis for more details. In conjunction with asset/liability management, the Company continues to increase its proportionate holdings of mortgage-backed securities, corporates, and municipals when feasible to reduce its exposure to Agency securities with call features. At September 30, 2003, mortgage-backed securities, corporates, and municipals comprised 25%, 13%, and 27% of the portfolio. Overall, securities comprised 40% of earning assets at September 30, 2003, down 400 basis points from year-end 2002. The portfolio yield decreased from 5.73% in 2002 to 4.85% in 2003 year-to-date, primarily from reinvesting accelerated prepayments and maturities at lower market rates.

Management believes the credit quality of the investment portfolio remains sound, with 59.27% of the carrying value of debt securities being backed by the U.S. Treasury or other U.S. Government-sponsored agencies at September 30, 2003. All of the Company's corporate bonds were rated A or higher by at least one nationally recognized rating agency at September 30, 2003. The weighted average life of the portfolio was less than 4.0 years at September 30, 2003. The amortized cost and estimated fair value of investment securities are delineated in the table below:

<i>Investment Securities by Category</i>	<i>Amortized</i>	<i>Unrealized</i>	<i>Unrealized</i>	<i>Fair</i>

The market value of the portfolio declined \$1,566,519 at September 30, 2003 compared to December 31, 2002; refer to the Capital Adequacy section of this Analysis for more details on investment securities and related fair value. The Company does not have a concentration in the obligations of any issuer other than the U.S. Government and its agencies.

Loans

Loans, net of unearned income, grew 15.11% or \$26,444,843 since year-end 2002. The net loans to deposits ratio aggregated 66.84% at September 30, 2003 versus 59.22% at mid-year 2003, 55.05% at December 31, 2002, and 54.81% a year ago. Approximately 55% of the 2003 improvement was attributable to the Brunswick loan production office opened in February; the Brunswick loan production office provides the Company with a foothold in one of the fastest-growing and more populous markets in southeast Georgia, and management is optimistic about its long-term potential. The remaining increase resulted from loan origination at other SEB locations. By sector, growth year-to-date was concentrated in the real estate-construction and commercial portfolios. Since December 31, 2002, real estate-construction loans grew 117.36% or \$20,385,647. The majority of the growth within the construction portfolio was residential in nature. Most of the loans in the real estate-construction portfolio are preparatory to customers' attainment of permanent financing or developer's sale and are, by nature, short-term and somewhat cyclical; swings in these account balances are normal and to be expected. Although the Company, like peer institutions of similar size, originates permanent mortgages for new construction, it traditionally does not hold or service long-term mortgage loans for its own portfolio. Rather, permanent mortgages are typically brokered through a mortgage underwriter or government agency. The Company receives

mortgage origination fees for its participation in these origination

Table of Contents

transactions; refer to the disclosures provided under Results of Operations for more details. Continuing 2002 gains, commercial loans increased \$11,551,038 or 14.87% at September 30, 2003 compared to December 31, 2002. Nonfarm real estate, agricultural, and other commercial/industrial loans within the commercial portfolio grew \$7,363,559, \$1,800,568, and \$3,630,912; governmental loans fell \$1,244,001. Consumer loans declined \$3,190,491 or 12.94% at September 30, 2003 compared to year-end 2002; real estate mortgage loans also fell \$2,411,908 or 4.34%. Reduced demand was the chief element in the 2003 results.

Despite economic uncertainties within the Company's markets, management is optimistic that overall loan volumes will remain higher in 2003 than 2002. Strategies implemented by management to increase loan production include continuing competitive pricing on loan products, development of additional loan relationships, and purchase of loan participations from correspondent banks, all without compromising portfolio quality. Additionally, the Brunswick loan production office is expected to continue its strong origination volume. During the same period last year, net loans grew 4.52% or \$7,382,934. Virtually all of the 2002 improvement resulted from the Richmond Hill acquisition. Loans outstanding are presented by type in the table below:

<i>Loans by Category</i>	September 30, 2003	December 31, 2002	September 30, 2002
<i>(In thousands)</i>			
Commercial, financial, and agricultural ¹	\$ 89,231	\$ 77,680	\$ 77,541
Real estate construction	37,756	17,371	10,193
Real estate residential mortgage ²	53,202	55,614	58,417
Consumer, including credit cards	21,459	24,649	24,991
Loans, gross	201,648	175,314	171,142
Unearned income	222	333	410
Loans, net	\$ 201,426	\$ 174,981	\$ 170,732

¹Includes obligations of states and political subdivisions.

²Typically have final maturities of 15 years or less.

The Company had no concentration of loans to borrowers engaged in any single industry that exceeded 10% of total loans for any of the periods presented. Although the Company's loan portfolio is diversified, significant portions of its loans are collateralized by real estate. At September 30, 2003, the Company had approximately \$150,271,000 in real estate loans, and an additional \$19,140,000 commitment to extend credit on such loans. As required by policy, real estate loans are collateralized based on certain loan-to-appraised value ratios. A geographic concentration in loans arises given the Company's operations within a regional area of southeast Georgia and northeast Florida. On an aggregate basis, commitments to extend credit and standby letters of credit approximated \$31,368,000 at September 30, 2003; because a substantial amount of these contracts expire without being drawn upon, total contractual amounts do not represent future credit exposure or liquidity requirements.

Nonperforming Assets

Nonperforming assets consist of nonaccrual loans, restructured loans, and foreclosed real estate and other assets. Overall, nonperforming assets approximated \$2,052,000 at September 30, 2003, down \$342,000 or 14.29% from year-end 2002 and 0.77% from September 30, 2002. As a percent of total assets, nonperforming assets totaled 0.57% at September 30, 2003 versus 0.63% at year-end 2002 and 0.55% a year ago. The fluctuation in nonperforming asset balances year-to-date resulted predominantly from agricultural-based loans. Specifically, nonaccrual balances

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

in 2002 included approximately \$600,000 pertaining to an impaired agricultural loan secured by timber and farmlands. In March 2003, this loan was paid-off; interest income recognized upon settlement totaled \$112,000. Conversely, due to the decline in the shrimping industry, multiple loans to commercial fishermen totaling approximately

Table of Contents

\$361,000 were converted to nonaccrual status since year-end 2002. Collateral held varies but includes real estate and commercial fishing vessels. Approximately 28% of nonaccrual balances at September 30, 2003 pertained to the shrimping industry; however, management considers the allowance sufficient to absorb any losses that may result from these loans.

At September 30, 2003, nonaccrual balances also included loans to three other borrowers averaging \$176,000 each; charge-offs on these loans approximated \$67,000 during 2003 to-date. Due to the underlying collateral coverage, no other significant losses are expected on these three credits. Refer to the subsection entitled Policy Note for criteria used by management in classifying loans as nonaccrual. The allowance for loan losses approximated 2.17X the nonperforming loans balance at September 30, 2003 versus 1.77X at year-end 2002 and 1.94X a year ago. The modest increase in foreclosed real estate was due to normal foreclosure and sales activity. Management is unaware of any other material developments in nonperforming assets at September 30, 2003 that should be presented or otherwise discussed.

Loans past due 90 days or more approximated \$945,000, or less than 1% of net loans, at September 30, 2003. Management is unaware of any material concentrations within these past due balances. The table below provides further information about nonperforming assets and loans past due 90 plus days:

Nonperforming Assets	September 30, 2003	December 31, 2002	September 30, 2002
<i>(In thousands)</i>			
Nonaccrual loans:			
Commercial, financial, and agricultural	\$ 791	\$ 1,417	\$ 1,218

Nonperforming assets to net loans plus foreclosed/repossessed assets	1.02%	1.37%	1.21%
Accruing loans past due 90 days or more	\$ 945	\$ 1,448	\$ 1,465

¹Does not include restructured loans that yield a market rate.

²Includes only other real estate acquired through foreclosure or in settlement of debts previously contracted.

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

Policy Note. Loans classified as nonaccrual have been placed in nonperforming, or impaired, status because the borrower's ability to make future principal and/or interest payments has become uncertain. The Company considers a loan to be nonaccrual with the occurrence of any one of the following events: a) interest or principal has been in default 90 days or more, unless the loan is well-secured and in the process of collection; b) collection of recorded interest or principal is not anticipated; or c) the income on the loan is recognized on a cash basis due to deterioration in the financial condition of the borrower. Smaller balance consumer loans are generally not subject to the above-referenced guidelines and are normally placed on nonaccrual status or else charged-off when payments have been in default 90 days or more. Nonaccrual loans are reduced to the lower of the principal balance of the loan or the market value of the underlying real estate or other collateral net of selling costs. Any impairment in the principal

Table of Contents

balance is charged against the allowance for loan losses. Accrued interest on any loan switched to nonaccrual status is reversed. Interest income on nonaccrual loans, if subsequently recognized, is recorded on a cash basis. No interest is subsequently recognized on nonaccrual (or former nonaccrual) loans until all principal has been collected. Loans are classified as restructured when either interest or principal has been reduced or deferred because of deterioration in the borrower's financial position. Foreclosed real estate represents real property acquired by foreclosure or directly by title or deed transfer in settlement of debt. Provisions for subsequent devaluations of foreclosed real estate are charged to operations, while costs associated with improving the properties are generally capitalized.

Allowance for Loan Losses

The Company maintains an allowance for loan losses available to absorb inherent losses in the loan portfolio. At September 30, 2003, the Company's allowance totaled \$3,732,950, or 1.85% of period-end loans. Net charge-offs totaled \$552,383, up \$187,983 from 2002's \$364,400, which was down 66.76% or \$731,920 from 2001. Approximately 27% of the high charge-offs at September 30, 2001 were attributable to a single loan included in nonperforming balances from December 2000 through August 2001; refer to the 2002 Form 10-K for more details on this particular loan. Long-term strategies implemented by management the last several years to reduce and minimize charge-off levels include: a) a revised loan grading system, b) periodic external loan review, c) formation of a full-time collection department, and d) managerial and staff changes at various locations. The adequacy of the allowance is further discussed in the next subsection of this Analysis. The nine-month provision from income totaled \$684,500 at September 30, 2003. Activity in the allowance is presented in the table below:

Allowance for Loan Losses

<i>Nine Months Ended September 30,</i>	2003	2002	2001

¹ Net of unearned income			

Table of Contents

The Company prepares a comprehensive analysis of the allowance for loan losses at least quarterly. SEB's Board of Directors is responsible for affirming the allowance methodology and assessing the general and specific allowance factors in relation to estimated and actual net charge-off trends. The allowance for loan losses consists of three elements: a) specific allowances for individual loans; b) general allowances for loan pools based on historical loan loss experience and current trends; and c) allowances based on economic conditions and other risk factors in the Company's markets. The specific allowance is based on a regular analysis of classified loans where the internal risk ratings are below a predetermined classification. The specific allowance established for these classified loans is based on a careful analysis of probable and potential sources of repayment, including cash flow, collateral value, and guarantor capacity. The general allowance is determined by the mix of loan products within the portfolio, an internal loan grading process, and associated allowance factors. These general allowance factors are updated at least annually and are based on a statistical loss migration analysis and current loan charge-off trends. The loss migration analysis examines loss experience for loan portfolio segments in relation to internal loan grades. Charge-off trends are analyzed for homogeneous loan categories (e.g., residential real estate, consumer loans, etc.). While formal loss migration and charge-off trend analyses are conducted annually, the Company continually monitors credit quality in all portfolio segments and revises the general allowance factors whenever necessary in order to address improving or deteriorating credit quality trends or specific risks associated with a given loan category. The third element, comprised of economic conditions, concentrations, and other risk factors, is based on marketplace conditions and/or events that may affect loan repayment in the near-term. This element requires a high degree of managerial judgment to anticipate the impact that economic trends, legislative or governmental actions, or other unique market and/or portfolio issues will have on credit losses. Consideration of other risk factors typically includes such issues as recent loss experience in specific portfolio segments, trends in loan quality, changes in market focus, and concentrations of credit. These factors are based on the influence of current external variables on portfolio risk, so there will typically be some movement between this element and the specific allowance component during various stages of the economic cycle. Because of their subjective nature, these risk factors are carefully reviewed by management and revised as conditions indicate. Based on its analyses, management believes the allowance was adequate at September 30, 2003. The Richmond Hill acquisition did not materially affect the allowance for loan losses.

Other Commitments

Other than construction of a future branch site in Brunswick, Georgia, and renovation of other SEB offices, the Company had no material plans or commitments for capital expenditures as of September 30, 2003. The Company purchased the underlying real estate for the Brunswick branch site in July 2003; once engineering and other infrastructure work is complete, the Company expects to subdivide and sell the majority of the 9.54 acre tract to third parties.

Liquidity

Liquidity is managed to ensure sufficient cash flow to satisfy demands for credit, deposit withdrawals, and other corporate needs. The Company's sources of funds include a large, stable deposit base and secured advances from the Federal Home Loan Bank. Additional liquidity is provided by payments and maturities, including both principal and interest, of the loan and investment securities portfolios. At September 30, 2003, loans¹ and investment securities with carrying values exceeding \$80,849,000 and \$10,570,000 were scheduled to mature in one year or less. The investment portfolio has also been structured to meet liquidity needs prior to asset maturity when necessary. The Company's liquidity position is further strengthened by its access, on both a short- and long-term basis, to other local and regional funding sources.

Table of Contents

Funding sources primarily comprise customer-based core deposits but also include borrowed funds and cash flows from operations. Customer-based core deposits, the Company's largest and most cost-effective source of funding, comprised 91% of the funding base at September 30, 2003, virtually unchanged from 2002 levels. Borrowed funds, which variously encompass U.S. Treasury demand notes, federal funds purchased, and FHLB advances, totaled \$7,037,784 at September 30, 2003 versus \$8,028,187 at year-end 2002. More specifically, the maximum amount of U.S. Treasury demand notes available to the Company at September 30, 2003 totaled \$3,000,000, of which \$860,784 was outstanding. Unused borrowings under unsecured federal funds lines of credit from other banks, each with varying terms and expiration dates, totaled \$20,823,000. Additionally, under a credit facility with the FHLB, the Company can borrow up to 16% of SEB's total assets; at September 30, 2003, unused borrowings approximated \$52,000,000. Refer to the subsection entitled FHLB Advances for details on the Company's outstanding balance with the FHLB. Cash flows from operations also constitute a significant source of liquidity. Net cash from operations derives primarily from net income adjusted for noncash items such as depreciation and amortization, accretion, and the provision for loan losses.

Management believes the Company has the funding capacity, from operating activities or otherwise, to meet its financial commitments in 2003. Refer to the Capital Adequacy section of this Analysis for details on treasury stock purchases and intercompany dividend policy.

¹No cash flow assumptions other than final contractual maturities have been made for installment loans. Nonaccrual loans are excluded.

Deposits

Deposits declined \$16,493,049 or 5.19% since year-end 2002. Interest-bearing deposits fell \$19,002,663 or 7.30%, while noninterest-bearing deposits grew \$2,509,614 or 4.35%. The majority, or 69%, of the deposits decline at September 30 was due to seasonal variation in local government balances. Notably, customers continue to utilize savings as an alternative to time certificates in the current low-rate environment; savings balances aggregated 40.43% of interest-bearing balances at September 30, 2003 versus 37.22% at December 31, 2002 and 38.84% at September 30, 2002. Overall, interest-bearing deposits comprised 80.02%, and noninterest-bearing deposits, 19.98%, of total deposits at September 30, 2003. The distribution of interest-bearing balances at September 30, 2003 and certain comparable quarter-end dates is shown in the table below:

	September 30, 2003		December 31, 2002		September 30, 2002	
	Balances	Percent of Total	Balances	Percent of Total	Balances	Percent of Total
Deposits						
<i>(Dollars in thousands)</i>

¹NOW and money market accounts.

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

Approximately 84% of time certificates at September 30, 2003 were scheduled to mature within the next twelve months. The composition of average deposits and the fluctuations therein at September 30 for the last two years is shown in the Average Balances table included in the Operations section of this Analysis.

Table of Contents

FHLB Advances

Advances outstanding with the FHLB totaled \$5,000,000 at September 30, 2003, unchanged from year-end 2002. The outstanding advance, which matures March 17, 2010, accrues interest at an effective rate of 6.00%, payable quarterly. The advance is convertible into a three-month Libor-based floating rate anytime at the option of the FHLB. Year-to-date, interest expense on the advance approximated \$224,000. Mortgage-backed securities with aggregate carrying values of approximately \$6,029,000 were pledged to collateralize current and future advances under this line of credit.

Interest Rate and Market Risk/Interest Rate Sensitivity

The normal course of business activity exposes the Company to interest rate risk. Fluctuations in interest rates may result in changes in the fair market value of the Company's financial instruments, cash flows, and net interest income. The asset/liability committee regularly reviews the Company's exposure to interest rate risk and formulates strategy based on acceptable levels of interest rate risk. The overall objective of this process is to optimize the Company's financial position, liquidity, and net interest income, while limiting volatility to net interest income from changes in interest rates. The Company uses gap analysis and simulation modeling to measure and manage interest rate sensitivity.

An indicator of interest rate sensitivity is the difference between interest rate sensitive assets and interest rate sensitive liabilities; this difference is known as the interest rate sensitivity gap. In an asset sensitive, or positive, gap position, the amount of interest-earning assets maturing or repricing within a given period exceeds the amount of interest-bearing liabilities maturing or repricing within that same period. Conversely, in a liability sensitive, or negative, gap position, the amount of interest-bearing liabilities maturing or repricing within a given period exceeds the amount of interest-earning assets maturing or repricing within that time period. During a period of rising rates, a negative gap would tend to affect net interest income adversely, while a positive gap would theoretically result in increased net interest income. In a falling rate environment, a negative gap would tend to result in increased net interest income, while a positive gap would affect net interest income adversely. The gap analysis on the next page provides a snapshot of the Company's interest rate sensitivity position at September 30, 2003.

[Remainder of Page Intentionally Left Blank.]

¹Distribution of maturities for available-for sale-securities is based on amortized cost. Additionally, distribution of maturities for mortgage-backed securities is based on expected average lives which may be different from the contractual terms. Equity securities, if any, are excluded.

²No cash flow assumptions other than final contractual maturities have been made for installment loans with fixed rates. Nonaccrual loans are excluded.

³NOW, money market, and savings account balances are included in the 0-3 months repricing category.

As shown in the table above, the Company's gap position remained negative through the short-term repricing intervals at September 30, 2003, totaling \$(66,145) at three months and \$(89,671) through one-year. Excluding traditionally nonvolatile NOW and savings balances from the gap calculation, the cumulative gap at September 30, 2003 totaled \$67,707 at three months and \$44,181 at twelve months. The narrowing of the short-term gap position at September 30, 2003 versus year-end 2002 was due primarily to a reduction in interest-bearing deposit balances. Additionally, the impact of the \$22,811,000 drop in federal funds sold balances was largely offset by increases in variable rate loans tied to prime. The gap position is expected to widen moderately during the fourth quarter as seasonal deposits increase. Shortcomings are inherent in any gap analysis since certain assets and liabilities may not move proportionally as rates change. For example, the gap analysis presumes that all

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

loans² and securities¹ will perform according to their contractual maturities when, in many cases, actual loan terms are much shorter than the original terms and securities are subject to early redemption.

In addition to gap analysis, the Company uses simulation modeling to test the interest rate sensitivity of net interest income and the balance sheet. Contractual maturity and repricing characteristics of loans are incorporated into the model, as are prepayment assumptions, maturity data, and call options within the investment portfolio. Non-maturity deposit accounts are modeled based on past experience. Simulation

Table of Contents

results quantify interest rate risks under various interest rate scenarios. Based on the Company's latest analysis, the simulation model estimates that a gradual 200 basis points rise or decline in rates over the next twelve months would have an adverse impact of 7.50% or less on its net interest income for the period. In estimating the impact of these rate movements on the Company's net interest income, the following general assumptions were made: a) Spreads on all loans, investment securities, and deposit products remain constant; b) Interest rate movements occur gradually over an extended period versus rapidly; and c) Loans and deposits are projected to grow at constant speeds. Limitations inherent with these assumptions include: a) Certain deposit accounts, in particular, interest-bearing demand deposits, infrequently reprice and historically, have had limited impact on net interest income from a rate perspective; b) In a down rate environment, competitive and other factors constrain timing of rate cuts on other deposit products whereas loans tied to prime and other variable indexes reprice instantaneously and, as amply demonstrated the last few years, securities with call or other prepayment features are likely to be redeemed prior to stated maturity and replaced at lower rates (lag effect); c) Changes in balance sheet mix, for example, unscheduled pay-offs of large commercial loans, are oftentimes difficult to forecast; and d) Rapid and aggressive rate movements by the Federal Reserve, as in 2001 and, to a lesser extent, in 2002, can materially impact estimated results. Management is optimistic that initiatives taken to improve loan production and diversify the securities portfolio will gradually reduce the interest rate sensitivity of net interest income and the balance sheet.

The Company has not in the past, but may in the future, utilize interest rate swaps, financial options, financial futures contracts, or other rate protection instruments to reduce interest rate and market risks.

Impact of Inflation

The effects of inflation on the local economy and the Company's operating results have been relatively modest the last several years. Because substantially all the Company's assets and liabilities, including cash, securities, loans, and deposits, are monetary in nature, their values are less sensitive to the effects of inflation than to changing interest rates. As discussed in the preceding section, the Company attempts to control the impact of interest rate fluctuations by managing the relationship between its interest sensitive assets and liabilities.

Capital Adequacy

Federal banking regulators have established certain capital adequacy standards required to be maintained by banks and bank holding companies. These regulations define capital as either Tier 1 (primarily shareholders' equity) or Tier 2 (certain debt instruments and a portion of the allowance for loan losses). The Company and SEB are subject to a minimum Tier 1 capital ratio (Tier 1 capital to risk-weighted assets) of 4%, total capital ratio (Tier 1 plus Tier 2 to risk-weighted assets) of 8%, and Tier 1 leverage ratio (Tier 1 to average quarterly assets) of 4%. To be considered a well-capitalized institution, the Tier 1 capital, total capital, and Tier 1 leverage ratios must equal or exceed 6%, 10%, and 5%, respectively. Banks and bank holding companies are prohibited from including unrealized gains and losses on debt securities in the calculation of risk-based capital but are permitted to include up to 45 percent of net unrealized pre-tax holding gains on equity securities in Tier 2 capital. The Company did not have any unrealized gains on equity securities includible in the risk-based capital calculations for any of the periods presented. The Company is committed to maintaining its well-capitalized status.

The Company's capital ratios for the most recent periods are presented in the table on the next page.

Table of Contents

	September 30, 2003	December 31, 2002	September 30, 2002
Capital Ratios			
<i>(Dollars in thousands)</i>

Tier 1 leverage ratio	13.13%	12.14%	12.51%
Realized shareholders' equity to assets	13.33%	12.06%	12.56%

Book value per share grew \$0.78 or 5.75% during the first nine months of 2003 to \$14.34 at September 30, 2003. Dividends declared totaled \$0.36, up 4.35% or \$0.015 from 2002, which was up 4.55% from 2001. For more specifics on the Company's dividend policy, refer to the subsection immediately following. Accumulated other comprehensive income, which measures net fluctuations in the fair values of investment securities, declined \$1,033,903 at September 30, 2003 compared to year-end 2002. Movement in interest rates remained a dominant factor in the fair value results. Further details on investment securities and associated fair values are contained in the Financial Condition section of this Analysis.

On March 14, 2000, the Board of Directors authorized the purchase of up to \$7,000,000 in Company common stock. From 2000 - 2002, the Company purchased 247,658 shares on the open market and through private transactions at an average price of \$16.65 per share. During the first nine months of 2003, the Company purchased an additional 2,600 shares at a purchase price of \$21.50 per share and subsequent to September 30, 2003, another 15,000 shares at an aggregate price of \$345,004, or \$23.00 per share. Cumulatively, the treasury stock program has reduced the Company's outstanding stock by 7.41%. The maximum consideration available for additional treasury purchases, at prices to be determined in the future, is \$2,474,834. Any acquisition of additional shares will be dictated by market conditions. In accordance with generally accepted accounting principles, no prior period amounts have been restated to reflect the treasury stock purchases.

Refer to the Financial Condition and Liquidity sections of this Analysis for details on planned capital expenditures.

Dividend Policy

The Parent Company is a legal entity separate and distinct from its subsidiaries, and its revenues and liquidity position depend primarily on the payment of dividends from its subsidiaries. State banking regulations limit the amount of dividends SEB may pay without prior approval of the regulatory agencies. Year-to-date, SEB has paid 75% or \$1,788,000 of the \$2,384,000 in cash dividends available to the Company in 2003 without such prior approval. The Company uses regular dividends paid by SEB in order to pay quarterly dividends to its own shareholders. Management anticipates that the Company will continue to pay cash dividends on a recurring basis.

Table of Contents

Results of Operations

Net income for the 2003 third quarter totaled \$1,360,321 or \$0.41 per share, up \$121,785 or 9.83% from September 30, 2002 and up 9.72% from June 30, 2003. Year-to-date, net income grew \$296,086 or 8.40% to \$3,821,492 at September 30, 2003 from \$3,525,406 in 2002. On a per share basis, earnings for the nine-month period improved \$0.10 to \$1.15 at September 30, 2003 from \$1.05 in 2002. Likewise, the return on beginning equity increased 74 basis points to 11.27% at September 30, 2003 from 10.53% a year ago. Variations in operating results are further discussed within the next two subsections of this Analysis.

Net Interest Income

Net interest income increased \$357,139 or 9.28% during the third quarter of 2003 compared to 2002. For the nine-month period, net interest income grew \$664,949 or 5.78% from 2002. The net interest margin approximated 5.01% at September 30, 2003 versus 4.74% a year ago; the interest rate spread, 4.56% versus 3.99%. Reductions in interest expense fueled the 2003 results, because interest income on all earning assets other than tax-exempt securities declined from 2002 results. Specifically, interest earnings on loans, taxable securities, federal funds sold, and other earning assets declined \$348,406, \$1,143,694, \$119,387, and \$10,690 from same period results in 2002 while earnings on tax-exempt securities increased \$19,058 or 1.64%. Overall declines in asset yields and, to a lesser extent, shifts in earning assets precipitated the 2003 results. On average, asset yields totaled 6.41% at September 30, 2003, down 61 basis points from 2002. Interest expense on deposits and other borrowed funds fell \$902,764 during the 2003 third quarter versus 2002 and \$2,268,068 year-to-date. Cost of funds dropped 118 basis points from 2002 levels, totaling 1.85% at September 30, 2003 versus 3.03% at September 30, 2002. Expected declines in yields on investment securities, as discussed in the Financial Condition section of this Analysis, will exert pressure on net interest results in 2003. Continued reallocation of federal funds sold balances to other earning assets and anticipated loan growth in Brunswick and other markets are expected to alleviate declines in securities yields.

The intense competition for loans and deposits continues in 2003 and shows no sign of abating. The high number of new and existing financial institutions in the Company's market areas essentially guarantees downward pressure on net interest spreads and margins as all participants struggle to amass and grow market share. Volume of assets and deposits will become even more important as margins decline. Strategies implemented by management to increase average loans outstanding emphasize competitive pricing on loan products and development of additional loan relationships, all without compromising portfolio quality. Management's strategy for deposits is to reduce costs of funds and employ alternative sources of financing when feasible. Comparative details about average balances, income/expense, and average yields earned and rates paid on interest-earning assets and liabilities for the last two years are provided in the table on the next page.

¹Average loans are shown net of unearned income. Nonperforming loans are included.

²Includes loan fees.

³Securities are presented on an amortized cost basis. Investment securities with original maturities of three months or less are included, as applicable.

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

⁴Interest income on tax-exempt loans and securities is presented on a taxable-equivalent basis, using a federal income tax rate of 34%. No adjustment has been made for any state tax benefits.

⁵NOW and money market accounts.

⁶Averages presented generally represent average daily balances.

Table of Contents

Noninterest Income and Expense

Noninterest income declined \$21,558 or 2.15% during the third quarter of 2003 compared to 2002 but grew \$134,091 year-to-date. An \$11,834 or 1.73% decline in service charges on deposit accounts was the main factor in the quarterly results. Year-to-date, a 4.97% or \$93,669 improvement in service charges on deposits accounts, aided by a 4.19% increase in other operating income, was the primary factor. Mortgage origination fees led the improvement in other operating income, growing \$74,152 year-to-date. By type and amount, the chief components of other operating income at September 30, 2003 were mortgage origination fees, \$407,522; commissions on the sale of credit life insurance, \$101,302; surcharge fees - ATM, \$102,458; safe deposit box rentals, \$64,664; and income on sale of check products, \$78,559. Together, these five income items comprised 77.66% of other operating income at September 30, 2003. In 2002, these same five income components comprised 87.79% of other operating income. Overall, noninterest expense increased \$422,751 or 4.94% in 2003 year-to-date. Salaries and employee benefits increased \$312,871 or 6.51% at September 30, 2003 compared to 2002. The vast majority, or 82%, of employee expenses remained concentrated in salaries and other direct compensation, including related payroll taxes, at September 30, 2003. Profit-sharing accruals and other fringe benefits constituted the remaining 7% and 11% of employee expenses. The division of employee expenses between compensation, profit-sharing, and other fringe benefits remained consistent with historical norms in 2003. When compared to the prior year, net occupancy and equipment expense increased 6.59% or \$114,545 during 2003 year-to-date compared to 2002. The 2003 increase resulted largely from operating costs and depreciation associated with technology programs. Other operating expenses fell a negligible \$4,665 or 0.23% at September 30, 2003 compared to 2002. Besides advertising expense, which approximated \$212,000 in 2003 and \$192,000 in 2002, no individual component of other operating expenses aggregated or exceeded 10% of the total in 2003 or 2002. Costs associated with the Company's new loan production office, Sarbanes-Oxley compliance, and enhanced data transmission between SEB locations are expected to increase noninterest expense approximately \$250,000 in 2003 compared to 2002.

Recent Accounting Pronouncements

Recent accounting pronouncements affecting the Company are discussed in Note 3 to the consolidated financial statements and, further, in the 2002 Form 10-K previously filed with the Securities and Exchange Commission.

Various other accounting proposals affecting the banking industry are pending with the Financial Accounting Standards Board. Given the inherent uncertainty of the proposal process, the Company cannot assess the impact of any such proposals on its financial condition or results of operations.

Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 (the Act) provides a safe harbor for forward-looking statements made by or on behalf of the Company. The Company and its representatives have made, and may continue to make, various written or oral forward-looking statements with respect to business and financial matters, including statements contained in this report, filings with the Securities and Exchange Commission, and press releases. Generally, the words believe, expect, intend, estimate, anticipate, project, will, should, and similar identify forward-looking statements. All statements which address operating performance, events or developments that we expect or anticipate will occur in the future, including statements related to loan growth, deposit growth, per share growth, and statements expressing general sentiment about future operating results and non-historical information, are forward-looking statements within the meaning of the Act. The forward-

Table of Contents

looking statements are and will be based on management's then current views and assumptions regarding future events and operating performance. The Company undertakes no obligation to publicly update or revise any forward-looking statements in light of new information or future events.

Forward-looking statements involve inherent risks and uncertainties. Certain factors that could cause actual results to differ materially from estimates contained in or underlying forward-looking statements include:

Competitive pressures between depository and other financial institutions may increase significantly.

Changes in the interest rate environment may reduce margins.

General economic or business conditions in the geographic regions and industry in which the Company operates may lead to a deterioration in credit quality or a reduced demand for credit.

Legislative or regulatory changes, including changes in accounting standards, monetary policies, and taxation requirements, may adversely affect the Company's business.

Other factors include:

Changes in consumer spending and saving habits as well as real estate markets.

Management of costs associated with expansion of existing and development of new distribution channels, and ability to realize increased revenues from these distribution channels.

The outcome of litigation which depends on judicial interpretations of law and findings of juries.

The effect of mergers, acquisitions, and/or dispositions and their integration into the Company.

Other risks and uncertainties as detailed from time to time in Company filings with the Securities and Exchange Commission.

The foregoing list of factors is not exclusive. Many of the factors that will determine actual financial performance and values are beyond the Company's ability to predict or control. This Analysis should be read in conjunction with the consolidated financial statements and related notes.

Item 3. Quantitative and Qualitative Disclosure about Market Risk.

The discussion on market risk is included in the Interest Rate and Market Risk/Interest Rate Sensitivity section of Part I, Item 2.

Item 4. Controls and Procedures.

A review and evaluation was performed by the Company's management, including the Company's Chief Executive Officer (the CEO) and Chief Financial Officer (the CFO), of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) or 15(d)-15(e)) as of the end of the period covered by this quarterly report. Based on that review and evaluation, the CEO and CFO have concluded that the Company's current disclosure controls and procedures, as designed and implemented, were effective.
