NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(in thousands, except per share amounts)

1. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements for the three and six months ended October 31, 2006 and 2005 include the accounts of Korn/Ferry International and all of its wholly and majority owned/controlled domestic and international subsidiaries (collectively, the Company). The consolidated financial statements are unaudited, but include all adjustments, consisting of normal recurring accruals and any other adjustments that management considers necessary for a fair presentation of the results for these periods. These financial statements have been prepared consistently with the accounting policies described in the Company's Annual Report on Form 10-K for the fiscal year ended April 30, 2006 (the Annual Report) and should be read together with the Annual Report.

Critical Accounting Policies and Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. As a result, actual results could differ from these estimates. The most significant areas that require management judgment are revenue recognition, deferred compensation and the carrying values of goodwill and deferred income taxes.

Cash and Cash Equivalents

The Company considers cash equivalents to be only those investments which are highly liquid, readily convertible and mature within three months from the date of purchase.

Available for Sale Securities

The Company considers its marketable securities as available-for-sale as defined in SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. These investments are recorded at fair value and are classified as marketable securities in the accompanying condensed consolidated balance sheets as of October 31, 2006 and April 30, 2006. The changes in fair values, net of applicable taxes, are recorded as unrealized gains (losses) as a component of accumulated other comprehensive income in stockholders' equity. Investments are made based on the Company's investment policy which restricts the types of investments that can be made.

Stock-Based Compensation

The Company has employee compensation plans under which various types of stock-based instruments are granted. These instruments, as more fully described below, principally include stock options, stock appreciation rights (SARs), restricted stock, and an Employee Stock Purchase Plan (ESPP).

Prior to May 1, 2006, the Company accounted for employee stock-based compensation under the recognition and measurement principles of Accounting Principles Board Opinion (APB) No. 25, Accounting for Stock Issued to Employees, (APB No. 25), and related Interpretations, as permitted by Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation (SFAS No. 123). Under the recognition principles of APB No. 25, compensation expense related to restricted stock and SARs was recognized in the Company's consolidated financial statements. However, APB No. 25 generally did not require the recognition of compensation expense for stock options because the exercise price of these instruments was generally equal to the market value of the underlying common stock on the date of grant, and the related number of shares granted were fixed at that point in time. Compensation expense for the ESPP was not recognized since the ESPP was considered non-compensatory under APB No. 25.

Table of Contents**KORN/FERRY INTERNATIONAL AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)****(in thousands, except per share amounts)**

Effective May 1, 2006, the Company adopted the fair value recognition provisions of SFAS No. 123(R), Share-Based Payment (SFAS No. 123 (R)). In addition to recognizing compensation expense related to restricted stock and SARs, SFAS No. 123(R) also requires the Company to recognize compensation expense related to the estimated fair value of stock options and for purchases under the ESPP. The Company adopted SFAS No. 123(R) using the modified-prospective-transition method. Under that transition method, compensation expense recognized subsequent to adoption includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of May 1, 2006, based on the values estimated in accordance with the original provisions of SFAS No. 123, and (b) compensation cost for all share-based payments granted subsequent to May 1, 2006, based on the grant-date fair values estimated in accordance with the provisions of SFAS No. 123(R). Consistent with the modified-prospective-transition method, the Company's results of operations for prior periods have not been adjusted to reflect the adoption of SFAS No. 123(R).

As a result of recognizing compensation expense for stock options and the ESPP pursuant to the provisions of SFAS No. 123(R), the Company's income before income taxes and net income for the three months ended October 31, 2006, were \$1,410 and \$880 lower, respectively, than if the Company had continued to account for the stock-based compensation under APB No. 25. For the six months ended October 31, 2006, the Company's income before income taxes and net income were \$3,292 and \$2,054 lower, respectively. In addition, basic and diluted earnings per share (EPS) for the three months ended October 31, 2006 were \$0.02 and \$0.02 lower, respectively, than if the Company had continued to account for the stock-based compensation under APB No.25. For the six months ended October 31, 2006, the Company's basic and diluted EPS were \$0.05 and \$0.04 lower, respectively.

The following table reflects the components of stock-based compensation expense recognized in the Company's condensed consolidated statements of income for the three and six months ended October 31, 2006 and 2005:

	Three Months Ended		Six Months Ended	
	October 31, 2006	2005	October 31, 2006	2005

Total stock-based compensation expense, net of tax	\$ 2,315	\$ 610	\$ 4,053	\$ 1,578

The above table does not reflect any stock option or ESPP compensation for the three and six months ended October 31, 2005 as the Company generally did not record stock option or ESPP expense under APB No. 25, as previously discussed.

The Company uses the Black-Scholes option valuation model to estimate the grant date fair value of employee stock options. The expected volatility reflects the consideration of the historical volatility in the Company's publicly traded instruments during the period the option is granted. The Company believes historical volatility in these instruments is more indicative of expected future volatility than the implied volatility in the price of the Company's common stock. The expected life of the option is estimated using historical data to estimate the expected life of the options. The risk-free interest rate is based on the U.S. Treasury zero-coupon issue with a remaining term approximating the expected term of the options. Upon adoption of SFAS No. 123(R), the Company began using historical data to estimate forfeiture rates applied to the gross amount of expense determined using the option valuation model. Prior to adoption of SFAS No. 123(R), the Company recognized forfeitures as they occurred. There was no material impact upon adoption of SFAS No. 123(R) between these methods of accounting for forfeitures. The assumptions used to estimate the fair value of the stock options using the Black-Scholes option valuation model were as follows for the six months ended October 31:

	Six Months Ended	
	October 31,	October 31,
	2006	2005
Expected volatility	48.05%	50.00%

Edgar Filing: KORN FERRY INTERNATIONAL - Form 10-Q

Risk-free interest rate	4.95%	3.83%
Expected option life (in years)	4.00	4.50
Expected dividend yield	0.0%	0.0%

The Black-Scholes option pricing model was developed for use in estimating the fair value of traded options. The assumptions used in option valuation models are highly subjective, particularly the expected stock price volatility of the underlying stock. For purposes of pro forma disclosures, the estimated fair values of the options are amortized over the options' vesting periods.

Table of Contents**KORN/FERRY INTERNATIONAL AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)****(in thousands, except per share amounts)***Stock Option Plans*

The Company's employee stock option plans provide for option grants designated as either nonqualified, incentive stock options or SARs. Options granted to officers, non-employee directors and other key employees generally vest over a three to five year period, and generally expire ten years from the date of grant. Key employees are eligible to receive a grant of stock options annually with the number of options determined by the employee's performance level. In addition, certain key management personnel typically receive stock option or restricted stock grants upon commencement of employment.

Stock option and SARs information during the six months ended October 31, 2006 is as follows:

	Options (in thousands)	Weighted- average exercise price	Weighted- average remaining contractual life (Yrs)	Aggregate intrinsic value
Outstanding at April 30, 2006	6,743	\$ 13.42

Exercisable at October 31, 2006	4,668	\$ 13.28	5.6	\$ 42,229

Included in the table above are 72 SARs outstanding at October 31, 2006 with a weighted-average exercise price of \$11.74, and 71 SARs exercisable at October 31, 2006 with a weighted-average exercise price of \$11.69. As of October 31, 2006, there was \$6,227 of total unrecognized compensation cost related to nonvested awards of stock options and SARs. That cost is expected to be recognized over a weighted-average period of one year. For stock option awards subject to graded vesting that were issued after May 1, 2006, we recognize the total compensation cost on a straight-line basis over the service period for the entire award.

Restricted Stock

The Company grants restricted stock to executive officers and other senior employees generally vesting over a three to four year period. Restricted stock is granted at a price equal to the fair market value of the common stock on the date of grant. Employees may receive restricted

stock annually in conjunction with the Company's performance

review as well as throughout the year upon commencement of employment. The fair values of restricted stock shares are determined based on the closing price of the Company's common stock on the grant dates.

Information regarding our restricted stock during the six months ended October 31, 2006 is as follows:

	Shares (in thousands)	Weighted- average grant date fair value
Nonvested shares		
Nonvested at April 30, 2006	687	\$ 16.63
Granted	1,041	19.20
Vested	(294)	15.29
Forfeited	(60)	18.79
Nonvested at October 31, 2006	1,374	\$ 18.77

As of October 31, 2006, there was \$10,620 of total unrecognized compensation cost related to nonvested awards of shares of restricted stock. That cost is expected to be recognized over a weighted-average period of 1.7 years. For restricted stock awards subject to graded vesting that were issued after May 1, 2006, the Company recognizes the total compensation cost on a straight-line basis over the service period for the entire award. In the three and six months ended October 31, 2006, two and 70 restricted stock shares totaling \$53 and \$1,381, respectively, were repurchased by the Company at the option of the employee to pay for taxes on restricted stock shares vesting in the periods.

Employee Stock Purchase Plan

In October 2003, the Company implemented an ESPP that, in accordance with Section 423 of the Internal Revenue code, allows eligible employees to authorize payroll deductions of up to 15% of their salary to purchase shares of the Company's common stock at 85% of the fair market price of the common stock on the last day of the enrollment period. The maximum number of shares of common stock reserved for ESPP issuance is 1.5 million, subject to adjustment for certain changes in the Company's capital structure and other extraordinary events. During the six months ended October 31, 2006 and 2005, employees purchased 85 shares at \$16.65 per share, and 106 shares at \$15.09 per share, respectively. Employees did not purchase any shares in the three months ended October 31, 2006 and 2005. At October 31, 2006, the plan had approximately 1.0 million shares available for future issuance.

Common Stock

The Company issued approximately 729 and 1,095 common shares as a result of the exercise of stock options and 85 common shares in conjunction with the Company's ESPP in the three and six months ended October 31, 2006, respectively. The Company issued approximately 293 and 718 common shares relating to the exercise of stock options and 106 common shares in conjunction with the Company's ESPP in the three and six months ended October 31, 2005, respectively.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation.

New Accounting Standards

Edgar Filing: KORN FERRY INTERNATIONAL - Form 10-Q

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). Among other things, FIN 48 creates a model to address uncertainty in tax positions and clarifies the accounting for income taxes by prescribing a minimum recognition threshold which all income tax positions must achieve to meet

Table of Contents**KORN/FERRY INTERNATIONAL AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)**

(in thousands, except per share amounts)

before being recognized in the financial statements. In addition, FIN 48 requires expanded annual disclosures, including a tabular rollforward of the beginning and ending aggregate unrecognized tax benefits as well as specific detail related to tax uncertainties for which it is reasonably possible the amount of unrecognized tax benefit will significantly increase or decrease within 12 months. FIN 48 is effective for the Company on May 1, 2007. Any differences between the amounts recognized in the statement of financial position prior to the adoption of FIN 48 and the amounts reported after adoption are generally accounted for as a cumulative-effect adjustment recorded to the beginning balance of retained earnings. The Company is currently evaluating the impact of FIN 48; however, it is not expected to have a material impact on the Company's consolidated financial position and results of operations.

2. Basic and Diluted Earnings Per Share

Basic earnings per common share (basic EPS) was computed by dividing net income by the weighted average number of common shares outstanding. Diluted earnings per common share (diluted EPS) reflects the potential dilution that would occur if all in-the-money outstanding options or other contracts to issue common stock were exercised or converted and was computed by dividing adjusted net income, after assumed conversion of subordinated notes and preferred stock, by the weighted average number of common shares outstanding plus dilutive common equivalent shares. The following is a reconciliation of the numerator and denominator (shares in thousands) used in the computation of basic and diluted EPS:

Executive Summary

Korn/Ferry International and all of its wholly and majority owned/controlled domestic and international subsidiaries (collectively, the Company, or in the first person, we, us and our) are a leading provider of talent management solutions with the broadest global presence in the executive recruitment segment of the industry. Our services include executive recruitment, middle-management and outsourced recruitment through Futurestep, leadership development solutions and executive coaching. Over half of the executive recruitment searches we performed in fiscal 2006 were for board level, chief executive and other senior executive positions. Our 4,373 clients in fiscal 2006 included approximately 44% of the Fortune 500 companies. We have established strong client loyalty; more than 83% of the executive recruitment assignments we performed in fiscal 2006 were on behalf of clients for whom we had conducted assignments in the previous three fiscal years.

In an effort to achieve our long-term vision of being the leading provider of executive search, outsourced recruiting and leadership development solutions, our strategic focus for fiscal 2007 is centered upon increasing market share and further increasing the cross-selling and utilization of our multi-product strategy. We continue to explore new products and services, enhance our technology and aggressively leverage our brand through thought leadership and intellectual capital projects as a means of delivering world-class service to our clients.

Fee revenue increased 24% in the second quarter of fiscal 2007 to \$155.7 million compared to prior year second quarter primarily due to a 14% increase in the number of engagements billed in the executive search segment, resulting from an increase in the number of engagements opened as well as higher average fees in engagements billed. Fee revenue was also impacted by our acquisition of the Lominger Entities on August 8, 2006. The North American region experienced the largest dollar increase in fee revenue in executive recruitment, as revenue increased \$17.2 million, or 27%, due to a 9% increase in the number of engagements billed in the quarter combined with an increase in average fees in engagement. Futurestep experienced a 22% increase in fee revenue over the prior year's quarter as engagements billed in the period increased versus the prior year quarter. In the second quarter of fiscal 2007, we earned operating income of \$21.1 million, with operating income of \$26.6 million and \$1.8 million from executive recruitment and Futurestep, respectively, offset by corporate expenses of \$7.3 million.

Table of Contents

Critical Accounting Policies

The following discussion and analysis of our financial condition and operating results are based on our unaudited condensed consolidated financial statements. Preparation of this quarterly report on Form 10-Q requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of our financial statements, and the reported amounts of revenue and expenses during the reporting periods. Actual results may differ from those estimates and assumptions. In preparing our interim financial statements and accounting for the underlying transactions and balances, we apply our accounting policies as disclosed in our Notes to Unaudited Condensed Consolidated Financial Statements. We consider the policies related to revenue recognition, deferred compensation and the carrying values of goodwill and deferred income taxes as critical to an understanding of our interim consolidated financial statements because their application places the most significant demands on management's judgment. Specific risks for these critical accounting policies are described in our Fiscal 2006 Annual Report on Form 10-K.

Emerging economies as well as expanding industries in various regions also factored in the overall growth in fee revenue.

North America fee revenue increased \$17.2 million, or 27%, to \$80.0 million in the current quarter primarily due to an 9% increase in the number of engagements billed and an increase in average fees in engagement billed. Growth in all sectors was noted, with more significant increases derived from the financial services and industrial sectors, along with strong performance from the advanced technology sector.

Europe reported an increase in fee revenue of \$4.9 million or 18%, to \$32.8 million from \$27.9 million in the same period last year, primarily due to a 21% increase in engagements billed and an increase in average fees in engagements billed. Business in the European market continues to expand in the newer offices established and office relocations occurring in the latter part of the prior fiscal year, including in the Czech Republic and in Germany. Exchange rates favorably impacted European fee revenue by \$2.1 million in the current quarter as compared to last year.

Asia Pacific fee revenue increased \$3.6 million, or 24%, to \$18.3 million compared to the same period last year due to a 17% increase in the number of engagements billed as well as an increase in average fees in engagements billed. Exchange rates favorably impacted fee revenue by \$0.1 million in the current quarter.

Table of Contents

Futurestep - Fee revenue increased \$3.8 million, or 22%, to \$20.6 million in the three months ended October 31, 2006 compared to \$16.8 million in the three months ended October 31, 2005. The improvement in fee revenue, reflected across all regions, is due to an increase in the number of new engagements billed. Of the total increase in fee revenue, Europe experienced the largest increases of \$1.5 million. Fee revenue continued to increase from revenue streams such as Recruitment Process Outsourcing (RPO) and Interim Solutions along with continued movement towards performance of larger engagements. Exchange rates favorably impacted fee revenue by \$0.3 million in the current quarter.

Compensation and Benefits. Compensation and benefits expense increased \$20.9 million, or 26%, to \$102.1 million in the three months ended October 31, 2006 compared to \$81.2 million in the three months ended October 31, 2005. The increase in compensation and benefits expense reflects the hiring of new consultants globally, along with performance increases and internal promotions effective at the beginning of this fiscal year, as well as the continued development of internal resources in response to increasing demand for the Company's services. An increase of \$1.4 million is attributable to the addition of the Lominger Entities. Additionally, a \$1.4 million increase was noted due to the stock-based compensation expense recorded in the current quarter in relation to the adoption of SFAS 123(R). The Company's average consultant count for the three months ended October 31, 2006 was 568 globally, which was an increase of 88 consultants or 18% versus the three months ended October 31, 2005.

Executive recruitment compensation and benefits expenses of \$84.1 million increased by 28%, or \$18.4 million, as compared to \$65.7 million recorded in same period last year due to increased variable compensation based rewards as well as new consultants joining the Company. Additionally, stock-based compensation expense accounted for an additional \$1.3 million in total expense in the current quarter, which was not present last year. Executive recruitment compensation and benefits expense, as a percentage of fee revenue increased to 62%, as compared to 60% in the prior year quarter due to increased profitability and SFAS 123(R) stock-based compensation expense. The average number of consultants in executive recruitment increased to 483, a 13% increase or 57 consultants over the prior year quarter. Exchange rates impacted compensation and benefits expense by \$1.6 million in the current year.

Futurestep compensation and benefits expense increased \$2.2 million, or 19%, to \$13.5 million from \$11.3 million in the prior year due to internal resource development as well as continuing investment in our people. Corporate compensation and benefits expense increased \$0.2 million to \$4.5 million in the current quarter, reflective of a slight increase in headcount.

General and Administrative Expenses. General and administrative expenses increased \$4.3 million, or 18%, to \$28.3 million in the three months ended October 31, 2006 compared to \$24.0 million in the same period last year. Increases to general and administrative expenses related to a \$2.0 million increase in premise and office expense along with a \$2.0 million increase in other types of general expenses including meeting and travel expense. Increased office expense is consistent with the office openings and relocations in the latter part of the previous fiscal year. The Lominger Entities contributed \$0.5 million to the increase. Exchange rates impacted general and administrative expenses unfavorably by \$0.1 million in the current quarter.

In executive recruitment, general and administrative expenses increased \$3.6 million. The majority of the fluctuation related to a \$1.3 million increase in premise and office expense, which increased across all four regions. Table of Contents

Futurestep general and administrative expense increased \$1.1 million, or 33%, to \$4.4 million, primarily due to increased premise and office expense of \$0.6. Futurestep general and administrative expenses, as a percentage of fee revenue, increased to 21% from 19% in the prior year.

Corporate general and administrative expenses decreased \$0.4 million, or 16%, over the prior year due to decreased administrative expenses of \$1.1 million including travel and meeting expenses offset by an increase in business development and premises expense.

Out-of-Pocket Engagement Expenses. Out-of-pocket engagement expenses are comprised of expenses incurred by candidates and our consultants that are generally billed to clients. Out-of-pocket engagement expenses of \$10.9 million increased \$3.5 million, or 47%, over the prior year as a result of a 14% increase in executive recruitment engagements in the period. As a percentage of fee revenue, out-of-pocket engagement expense was 7% in the three months ended October 31, 2006 versus 6% in the prior year.

Depreciation and Amortization Expenses. Depreciation and amortization expense was \$2.4 million in the three months ended October 31, 2006, an increase of \$0.2 million as compared to \$2.2 million last year. The primary reason for the slight increase in depreciation expense over last year is due to the additional expense derived from computer software and hardware added at various times last year.

Operating Income. Operating income increased \$3.0 million, or 17%, to \$21.1 million in the current quarter compared to \$18.1 million in the prior year, resulting from increased total revenue of \$31.9 million offset by a \$28.8 million increase in operating expenses, primarily related to compensation and benefits expense. Expenses of \$1.4 million related to SFAS 123(R) stock compensation expense contributed to increased compensation and benefit expense in the current quarter. Operating income as a percentage of fee revenue was 14% in both periods.

Additionally, we invested \$5.6 million in marketable securities in conjunction with our ECAP program, a decrease of \$2.0 million over the prior year period, mainly due to the timing and amounts of the ECAP employer contribution in the previous fiscal year. Capital expenditures for the six months ended October 31, 2006 and October 31, 2005 totaled \$6.0 million and \$5.4 million, respectively, a slight increase of \$0.6 million. to meet certain financial condition covenants on a quarterly basis. As of October 31, 2006, we had no outstanding borrowings on our credit facility.

We believe that cash on hand, borrowings available under our credit facility and funds from operations will be sufficient to meet our anticipated working capital, debt service requirements, capital expenditures and general corporate requirements. However, adverse changes in our revenue could require us to cut costs or obtain financing to meet our cash needs.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements and have not entered into any transactions involving unconsolidated, limited purpose entities.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

As a result of our global operating activities, we are exposed to certain market risks, including foreign currency exchange fluctuations and fluctuations in interest rates. We manage our exposure to these risks in the normal course of our business as described below. We have not utilized financial instruments for trading or other speculative purposes, nor do we trade in derivative financial instruments.

Foreign Currency Risk

Substantially all our foreign subsidiaries' operations are measured in their local currencies. Assets and liabilities are translated into U.S. dollars at the rates of exchange in effect at the end of each reporting period and revenue and expenses are translated at average rates of exchange during the year. Resulting translation adjustments are reported as a component of comprehensive income in our Statement of Stockholders' Equity.

Transactions denominated in a currency other than the reporting entity's functional currency may give rise to transaction gains and losses that impact our results of operations. In the six months ended October 31, 2006, we recognized foreign currency gains of \$0.1 million globally.

Our primary exposure to exchange losses is based on outstanding inter-company loan balances denominated in U.S. dollars. If the U.S. dollar strengthened 15%, 25% and 35% against Pounds Sterling, the Euro, the Canadian dollar, the Australian dollar and the Yen, the Company's exchange loss would have been \$1.6 million, \$2.7 million and \$3.7 million, respectively, based on outstanding balances at October 31, 2006. If the U.S. dollar weakened by the same increments against Pounds Sterling, the Euro, the Canadian dollar, the Australian dollar and the Yen, the Company's exchange gain would have been \$1.6 million, \$2.7 million and \$3.7 million, respectively, based on outstanding balances at October 31, 2006.

Interest Rate Risk

As of October 31, 2006, we had no outstanding balance on our credit facility. We have \$58.6 million of borrowings against the cash surrender value of COLI contracts as of October 31, 2006 bearing interest primarily at variable rates. The risk of fluctuations in these variable rates is minimized by the fact that we receive a corresponding adjustment to our borrowed funds crediting rate on the cash surrender value on our COLI contracts.

As of October 31, 2006, we have approximately \$45.3 million of 7.5% Convertible Debt and \$11.4 million liquidation value of 7.5% Convertible Preferred Stock that is mandatorily redeemable by us if still outstanding on June 13, 2010.
