AMPEX CORPORATION

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Ampex Corporation

Ampex Corporation (Ampex or the Company) is a leading innovator and licensor of visual information technology. During its 62-year history, the Company has developed substantial proprietary technology relating to the electronic storage, processing and retrieval of data, particularly images. The Company currently holds patents and patent applications covering digital image-processing, data compression and recording technologies. The Company leverages its investment in technology through its corporate licensing division, which licenses its patents to manufacturers of consumer electronics products. Through its wholly-owned subsidiary, Ampex Data Systems Corporation (Data Systems), the Company incorporates this technology in the design and manufacture of very high performance data storage products, principally used in defense applications to gather digital images and other data from aircraft, satellites and submarines. These products are also used in flight and sensor test applications.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements include the accounts of the Company and its subsidiaries. Intercompany accounts and transactions have been eliminated. Interim information included herein has been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission for reporting on Form 10-Q. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In addition, certain reclassifications have been made to the prior period financial statements to conform to the current period's presentation. The statements should be read in conjunction with the Company's report on Form 10-K for the year ended December 31, 2006 and the Audited Consolidated Financial Statements included therein.

In the opinion of management, the financial statements reflect all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation of financial position, results of operations and cash flows for the interim periods presented. The results of operations for the three and nine-month periods ended September 30, 2007 are not necessarily indicative of the results to be expected for the full year. The financial statements presented in this Form 10-Q do not include any adjustments to the carrying values of assets or liabilities or to the classification of debt that might result from any debt restructuring or plan of reorganization that might ultimately be approved by the Company and its lenders as more fully described in Note 13.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of net revenue and expenses during the reporting period. Actual results could differ from those estimates. Management's more significant judgments and estimates used in the preparation of its consolidated financial statements include revenue recognition, accounts receivable, inventories, deferred taxes, warranty reserves, pension liabilities, valuation of long-lived assets and investments, contingencies and environmental liabilities.

Cash Equivalents and Short-term Investments

Highly liquid investments with original maturities of three months or less are classified as cash equivalents. Highly liquid investments with maturities greater than three months and less than one year are classified as short-term investments. Management determines the appropriate classification of its investments in debt and marketable equity securities at the time of purchase and reevaluates such designation as of each balance sheet date. The Company's debt and marketable equity securities have been classified and accounted for as available-for-sale. These securities are carried at fair value, with the unrealized gains and losses, net of taxes, reported as a component of shareholders' deficit. The cost of securities sold is based upon the specific identification method.

Table of Contents

AMPEX CORPORATION

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Long-Term Investments

The Company owns a 1.5% minority equity investment in a private company that is carried on the cost method. The company conducts research and development and performs contract engineering services for the U.S. Department of Defense and high technology industries. The carrying value of this investment amounted to \$225,000 at September 30, 2007 and December 31, 2006 and is included in other long-term assets. This investment is inherently risky because the products and technologies in development are not fully commercialized. The Company monitors its investment for impairment on a periodic basis. In the event that the carrying value of an investment exceeds its fair value and the decline in value is determined to be other-than-temporary, the Company records an impairment charge and establishes a new cost basis for the investment at its current fair value. In order to determine whether a decline in value is other-than-temporary, the Company evaluates the duration and extent to which the fair value has been less than the carrying value, the financial condition of and business outlook for the company and the Company's intent and ability to retain the investment for a period of time sufficient to allow for any anticipated recovery in fair value.

Inventories

Inventories are stated at the lower of cost or market. Cost is determined on a standard cost basis, which approximates actual cost under the first in, first out method. Abnormal amounts of facility expense, freight, handling costs and scrap material are excluded from inventory cost and expensed during the period in which they are incurred. Appropriate consideration is given to obsolescence, excessive levels, deterioration and other factors in evaluating net realizable value.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost and stated net of accumulated depreciation. Depreciation is computed on a straight-line basis over the estimated useful lives of the assets ranging from three to nine years for furniture, fixtures and equipment, two to ten years for leasehold improvements, which represents the shorter of the lease term or the estimated useful lives. When assets are disposed of, the cost and related accumulated depreciation are removed from the accounts and the resulting gains or losses are included in the results of operations.

Warranty

Products sold are generally covered by a warranty for periods ranging from 90 days to one year. The Company accrues a warranty reserve at the time of sale for estimated costs to provide warranty services. The Company's estimate of costs to service its warranty obligation is based on historical experience and expectation of future conditions. To the extent the Company experiences increased warranty claim activity or increased costs associated with servicing those claims, its warranty accrual will increase, resulting in decreased gross profit.

Environmental Liabilities

The Company's facilities and business practices are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. Also, the Company may have continuing liability with respect to environmental contamination related to the facilities and disposal activities of its former subsidiary Media (Media). The Company recognizes a liability for any contingency that is probable of occurrence and reasonably estimable in accordance with American Institute of Certified Public Accountants (the AICPA) Statement of Position No. 96-1, Environmental Remediation Liabilities. The Company continually assesses these contingencies based on a careful analysis of each matter with the assistance of outside legal counsel and, if applicable, other experts. Such analysis includes making judgments concerning matters such as the extent of environmental damage and the Company's pro rata participation, if applicable, the most desirable remediation techniques and the time period during which the cleanup costs may be incurred. Because most contingencies are resolved over long periods of time, liabilities may change in the future due to new developments or other changes. Given the uncertainties regarding the status of laws, regulations, enforcement policies, the impact of other potentially responsible parties, technology and information related to individual sites, the Company does not believe it is possible to develop an estimate of the range of reasonably possible environmental loss in excess of its accruals.

Table of Contents

AMPEX CORPORATION

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Foreign Currency Translation

Assets and liabilities of subsidiaries located outside the United States have been translated at rates in effect at the end of the reporting period. Revenues and expenses are translated at average rates during the period. Local currencies are considered to be the functional currencies for all of the Company's foreign subsidiaries. Accordingly, the effects of translating the financial statements of foreign subsidiaries into U.S. dollars are reported in the cumulative translation adjustment, a separate component of stockholders' deficit and comprehensive income (loss). Foreign currency transaction gains and losses, which are included in other expense, were not material in the periods reported.

Revenue Recognition

The Company recognizes revenue in accordance with applicable accounting standards including Staff Accounting Bulletin (SAB) No. 104, Revenue Recognition and the AICPA Statement of Position No. 97-2, Software Revenue Recognition, as amended. Revenue is recognized when (1) persuasive evidence of an arrangement exists, (2) delivery and, where applicable, acceptance has occurred or services have been rendered, (3) the fee is fixed or determinable, and (4) collection is reasonably assured. The Company derives its revenue from two principal sources: license fees (including royalties) through its Licensing segment, and product and parts sales and service contracts through its Recorders segment.

Determination of criteria (3) and (4) are based on Management's judgments regarding the fixed nature of the fee charged for services rendered and products delivered and the collectibility of those fees. Should changes in conditions cause Management to determine these criteria are not met for certain future transactions, revenue recognized for any reporting period could be adversely affected.

The Company's revenue recognition policy with respect to royalty income is as follows: when the Company enters into an agreement with a new licensee for use of its patents, the Company may receive settlement of past due royalties. This is a negotiated amount and is typically paid by the licensee within 30 days of signing the license agreement. Past due royalties cover the licensee's product shipments from the period when they were first notified of infringement up through the effective date of the license. The Company may also negotiate a prepayment of royalties that would otherwise be due up to a specific future date. The dollar amounts due under a negotiated agreement for both past due royalties and for prepayment of royalties are non-refundable and non-forfeitable. The Company recognizes both past due and prepayment amounts as revenue in the period when the agreement has been executed by both parties, which is when there is persuasive evidence of an arrangement, fees become fixed or determinable and collection becomes probable, as the Company has no future obligations with respect to these agreements and delivery has occurred. Alternatively, the Company's licensing agreement may include a running royalty which covers products shipped by the licensee after the date that the license agreement has been entered into and until the patent has expired or when the patent is no longer contractually available to the licensee, if shorter. The Company's running royalties are computed as a percentage of the selling price of the licensee's products and are paid quarterly in arrears and recognized as revenue at the time the amount of the quarterly royalty payment becomes determinable, generally upon receipt of the licensee's sales report upon which royalties are determined, and collection is reasonably assured.

Revenue on product sales and services is recorded when all of the following have occurred: an agreement of sale exists, product delivery (principally FOB Ampex Factory) and acceptance has occurred or services have been rendered, pricing is fixed or determinable, and collection is reasonably assured. Prepaid service revenue is recognized ratably over the life of the service contract.

Table of Contents

AMPEX CORPORATION

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Pension and Other Post-Retirement Benefits/Obligations

The Company adopted Statement of Financial Accounting Standards (SFAS) No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of Financial Accounting Standards Board (FASB) Statements No. 87, 88, 106 and 132(R), as of December 31, 2006. Under SFAS No. 158, the funded status of each pension and other postretirement benefit plan is required to be reported as an asset (for overfunded plans) or a liability (for underfunded plans) at December 31, 2006. The Company's net pension obligation (liability) reflected in the Consolidated Balance Sheets under SFAS No. 87 was equal to the unfunded projected benefit obligation determined under SFAS No. 158; accordingly, the implementation of SFAS No. 158 had no impact on the Company's Consolidated Balance Sheets or Statements of Operations and Comprehensive Income (Loss). The determination of the Company's obligation and expense for pension and other postretirement benefits payable to Ampex's and Media's employees and retirees is dependent on the Company's selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions include, among others, the discount rate, expected long-term rate of return on plan assets and mortality assumptions for the plan participants. In accordance with SFAS No. 158, the underfunded status of the defined benefit plans is recorded as a net liability with a corresponding adjustment to accumulated other comprehensive income (AOCI) in shareholders' equity. Amounts recognized in AOCI represent unrecognized gains and losses that are expected to be amortized to pension cost over future periods.

While the Company believes that its assumptions are appropriate, significant differences in its actual experience or significant changes in the Company's assumptions that may be required under new legislation or otherwise may materially affect its pension and other postretirement obligations and its future expense as well as amounts that may ultimately be required to be paid to fund the Company's and Media pension plans.

Research, Development and Engineering

Research and development costs are expensed as incurred and amounted to \$3.6 million and \$3.0 million in the nine months ended September 30, 2007 and 2006, respectively. Other engineering costs, principally incurred in connection with product introductions and process enhancements, amounted to \$0.1 million and \$0.2 million in the nine months ended September 30, 2007 and 2006, respectively.

Restructuring Charges

The Company accounts for severance and benefit termination costs and other costs associated with an exit or disposal activity initiated after January 1, 2003 in accordance with SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. SFAS No. 146 requires that a liability for a cost associated with an exit or disposal activity be recognized and measured initially at fair value only when the liability is incurred, as opposed to when management commits to an exit plan. SFAS No. 146 also establishes that the liability should initially be measured and recorded at fair value, and subsequent adjustments to the liability shall be measured using the credit-adjusted risk-free rate that was used to measure the liability initially.

Income Taxes

The Company follows SFAS No. 109, Accounting for Income Taxes. Under this method, deferred income taxes are recognized for temporary differences by applying enacted statutory rates applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. See Note 19.

Foreign withholding taxes have been provided on the undistributed earnings of foreign subsidiaries, giving recognition to applicable tax rates.

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Concentrations of Credit Risk***

Financial instruments that potentially subject the Company to concentrations of risk consist principally of short-term and long-term investments and trade receivables. The Company invests its temporary cash balances in U.S. treasury obligations and U.S. corporate securities and, by policy, limits the investment maturity and the amount of credit exposure to any one financial institution or type of investment. The Company performs ongoing credit evaluations on its customers, and collateral is generally not required for trade receivables.

Comprehensive Income (Loss)

Comprehensive income (loss) consists of two components, undistributed income applicable to common stockholders and other comprehensive income (loss), net of tax. Other comprehensive income (loss) refers to revenue, expenses, gains and losses that under generally accepted accounting principles are recorded as an element of total shareholders' deficit but are excluded from net income (loss). Accumulated other comprehensive income (loss), as presented on the accompanying Consolidated Balance Sheets, consists of foreign currency translation adjustments and accumulated unrecognized gains and losses under the Company's defined benefit plans.

Segment Information

The Company reports segment information based on the management approach. The management approach designates the internal reporting used by management for making decisions and assessing performance as the source of the Company's reportable segments. See Note 20.

Basic and Diluted Income (Loss) Per Share

Basic income (loss) per share is computed by dividing net income (loss) available to common shareholders by the weighted average number of basic common shares outstanding during the period. Diluted income (loss) per share is computed by dividing net income (loss) available to common shareholders by the weighted average number of basic common shares outstanding during the period increased to include the number of additional shares of common stock that would have been outstanding if the dilutive potential shares of common stock had been issued. The dilutive effect of outstanding options and restricted stock is reflected in diluted income per share by application of the treasury stock method. Under the treasury stock method, an increase in the fair market value of the Company's common stock can result in a greater dilutive effect from outstanding options and restricted stock. Additionally, the exercise of employee stock options and the vesting of restricted stock can result in a greater dilutive effect on income per share.

Stock-Based Compensation

Effective January 1, 2006, the Company adopted SFAS No. 123 (revised 2004) (SFAS No. 123R), Share-Based Payment, which addresses the accounting for stock-based payment transactions in which an enterprise receives employee services in exchange for (a) equity instruments of the enterprise or (b) liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments. In January 2005, the SEC issued SAB No. 107, which provides supplemental implementation guidance for SFAS No. 123R. SFAS No. 123R eliminates the ability to account for stock-based compensation transactions using the intrinsic value method under Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and instead generally requires that such transactions be accounted for using a fair-value-based method. The Company uses the Black-Scholes-Merton (BSM) option-pricing model to determine the fair-value of stock-based awards under SFAS No. 123R, consistent with that used for pro forma disclosures provided under SFAS No. 123, Accounting for Stock-Based Compensation. The Company has elected the modified prospective transition method as permitted by SFAS No. 123R and, accordingly, prior periods have not been restated to reflect the impact of SFAS No. 123R. The modified prospective transition method requires that stock-based compensation expense be recorded for all new and unvested stock options and restricted stock that are ultimately expected to vest as the requisite service is rendered beginning on January 1, 2006. Stock-based compensation expense for awards granted prior to January 1, 2006 is based on the grant date fair-value as determined under the pro forma provisions of SFAS No. 123. The Company has recorded incremental stock-based compensation expense of \$292 thousand and \$308 thousand, included in selling and administrative expenses, during the nine months ended September 30, 2007 and 2006, respectively, as a result of the adoption of SFAS No. 123R. In accordance with SFAS No. 123R, beginning in the first quarter of 2006 the Company has not recognized excess tax benefits realized from the exercise of stock-based compensation awards as a financing activity in the Consolidated Statements of Cash Flows due to its

net operating loss position.

Table of Contents

AMPEX CORPORATION

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

No stock-based compensation costs were capitalized as part of the cost of an asset as of September 30, 2007. Deferred tax assets recorded in connection with stock-based compensation expenses for financial statement purposes have been offset by a corresponding valuation reserve. As of September 30, 2007, \$541 thousand of total unrecognized compensation cost related to unvested outstanding stock options and restricted stock is expected to be recognized over the next nine quarters.

Prior to the adoption of SFAS No. 123R, the Company measured compensation expense for its employee stock-based compensation plans using the intrinsic value method prescribed by APB Opinion No. 25. The Company applied the disclosure provisions of SFAS No. 123 as amended by SFAS No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure as if the fair-value-based method had been applied in measuring compensation expense. Under APB Opinion No. 25, when the exercise price of the Company's employee stock options was equal to the market price of the underlying stock on the date of the grant, no compensation expense was recognized.

Fair Value of Financial Instruments

For certain instruments that are short-term in nature, such as cash and cash equivalents, short-term investments and working capital facilities, carrying value approximates fair value. The Company's Senior Notes have been valued at approximately par value at September 30, 2007 and December 31, 2006 by the Company; however no securities have traded recently in the secondary market. Management has determined that it is not practical to estimate the fair value of the Hillside Notes and note payable-other, as no market for such instruments currently exists. See Note 13.

Note 3 - Stock Options and Awards

The Company's 1992 Stock Incentive Plan, as amended (the Stock Incentive Plan), for officers, employees, directors, consultants, advisors and service providers, provides for the granting of nonqualified stock options and incentive stock options to acquire Common Stock and/or the granting of stock appreciation rights to obtain, in shares of Common Stock, the benefit of the appreciation of the value of shares of Common Stock after the grant date.

The Company is authorized to issue up to 712,500 shares of Common Stock under the Stock Incentive Plan, of which 311,490 shares were available for grant as of September 30, 2007.

The Company's 2000 Stock Bonus Plan (the Stock Bonus Plan), as amended, provides for the issuance of up to 125,000 shares of Class A Common Stock, par value \$0.01 per share, to directors, officers and employees as well as certain consultants and advisors to the Company and to its subsidiaries. Stock awards that are unvested at the time of grant are subject to vesting at such later date as specified in the terms of the particular award.

On February 16, 2007, the Board of Directors elected D. Gordon Strickland as the Company's Chief Executive Officer, President and a director, and pursuant to an employment agreement granted to Mr. Strickland stock options under the Company's Stock Incentive Plan to purchase 25,000 shares of Common Stock. The options are exercisable at \$19.63 per share, which was the fair market value on the date of grant. The options are exercisable as to 12,500 of the underlying shares on each of February 16, 2008 and February 16, 2009 and will expire as to all such shares on February 16, 2010. No stock options were granted during the three and nine-month periods ended September 30, 2006.

At September 30, 2007, there were 33,135 options outstanding under the Stock Incentive Plan, including 8,135 vested options. The exercise prices range from \$19.63 to \$21.25 per share and vesting schedules vary from a one to two year period. The contractual term of stock options is three years or ten years. In the nine months ended September 30, 2007, no stock options vested during the period. In the nine months ended September 30, 2006, 15,500 stock options vested during the period.

	Shares Available for Grant	Number of Options	Price per Share	Aggregate Exercise Price	Weighted Average Exercise Price
Balances, December 31, 2006	311,292	106,366	\$ 1.15 - 38.25	\$ 1,328,614	\$ 12.49
Granted	(25,000)	25,000	19.63	490,750	\$ 19.63
Exercised		(70,033)	1.15	(80,538)	1.15
Cancellations	28,198	(28,198)	21.25 - 38.25	(1,075,208)	38.13
Balances, September 30, 2007	314,490	33,135	\$19.63 - 21.25	\$ 663,619	\$ 20.03

The options outstanding and currently exercisable by exercise price at September 30, 2007 are as follows:

Exercise Prices	Options Outstanding			Options Currently Exercisable		
	Number Outstanding	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price	
\$ 19.63	25,000	2.38	\$ 19.63			
\$ 21.25	8,135	1.10	21.25	8,135	21.25	
	33,135	2.07	\$ 20.03	8,135	\$ 21.25	

There was no aggregate intrinsic value of options outstanding or options exercisable at September 30, 2007. Aggregate intrinsic value represents the difference between the Company's closing stock price on the last trading day of the fiscal period, which was \$8.60 as of September 30, 2007, and the exercise price multiplied by the number of options outstanding. The total intrinsic value of options exercised was \$1.2 million and \$0.9 million for the nine-month periods ended September 30, 2007 and September 30, 2006, respectively.

In 2007, the Company issued 35,000 shares of unvested restricted Common Stock under the Stock Bonus Plan, which had a total grant date fair value of \$521 thousand. The Company issued 1,000 shares of unvested restricted Common Stock to each of its five outside directors, 16,000 shares to executive officers and the remaining 14,000 shares to certain employees. The shares for the outside directors vest on the date of the 2008 Annual Meeting of Stockholders and the other shares issued vest as to half on January 18, 2009 and half on January 18, 2010 under condition of continuing employment. 1,000 employee shares have been cancelled and the remaining 34,000 shares issued remain unvested as of September 30, 2007. The Company issued 1,000 shares of unvested restricted Common Shares under the Stock Bonus Plan to each of its three outside directors in June 2006, which had a total grant date fair value of \$34 thousand. The shares vested in May 2007 on the date of the 2007 Annual Meeting of Stockholders. In the three and nine months ended September 30, 2007, total compensation cost recognized related to unvested restricted stock was \$72 thousand and \$119 thousand, respectively. For the three and nine months ended September 30, 2006, total compensation cost recognized related to unvested restricted stock was \$9 thousand and \$10 thousand, respectively.

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The weighted average assumptions used for restricted stock granted for the three and nine-month periods ended September 30, 2007 and 2006 are set forth in the following table:

	Three Months Ended		Nine Months Ended	
	Sept. 30, 2007	Sept. 30, 2006	Sept. 30, 2007	Sept. 30, 2006
Expected life (years) of restricted stock	0.8		2.9	1.0

Note 4 - Recent Pronouncements

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes by prescribing the recognition threshold a tax position is required to meet before being recognized in the financial statements. It also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006 and was adopted by the Company on a prospective basis in the first quarter ended March 31, 2007. The adoption of FIN 48 did not have any effect on its financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 provides guidance for using fair value to measure assets and liabilities. It also responds to investors' requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. SFAS 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value, and does not expand the use of fair value in any new circumstances. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and is required to be adopted by the Company in the quarter ended March 31, 2008. The Company is currently evaluating the effect that the adoption of SFAS 157 will have on its consolidated results of operations and financial condition and is not yet in a position to determine such effects.

In September 2006, the FASB issued SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - An Amendment of FASB No. 87, 88, 106 and 132(R) (SFAS 158). SFAS 158 requires that the funded status of defined benefit postretirement plans be recognized on the company's balance sheet and changes in the funded status be reflected in comprehensive income, effective for fiscal years ending after December 15, 2006, which the Company adopted effective December 31, 2006. SFAS 158 also requires companies to measure the funded status of the plan as of the date of their fiscal year end, effective for fiscal years ending after December 15, 2008. The adoption of SFAS 158 did not have a material impact on the financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities - Including an amendment of FASB Statement No. 115 (SFAS 159). SFAS 159 expands the use of fair value accounting but does not affect existing standards which require assets or liabilities to be carried at fair value. Under SFAS 159, a company may elect to use fair value to measure accounts and loans receivable, available-for-sale and held-to-maturity securities, equity method investments, accounts payable, guarantees and issued debt. Other eligible items include firm commitments for financial instruments that otherwise would not be recognized at inception and non-cash warranty obligations where a warrantor is permitted to pay a third party to provide the warranty goods or services. If the use of fair value is elected, any upfront costs and fees related to the item must be recognized in earnings and cannot be deferred, e.g., debt issue costs. The fair value election is irrevocable and generally made on an instrument-by-instrument basis, even if a company has similar instruments that it elects not to measure based on fair value. At the adoption date, unrealized gains and losses on existing items for which fair value has been elected are reported as a cumulative adjustment to beginning retained earnings. Subsequent to the adoption of SFAS 159, changes in fair value are recognized in earnings. SFAS 159 is effective for fiscal years beginning after November 15, 2007 and is required to be adopted by the Company in the first quarter of fiscal 2008. The Company is currently determining whether fair value accounting is appropriate for any of its eligible items and cannot estimate the impact, if any, that SFAS 159 will have on its consolidated results of operations and financial condition.

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 5 - Computation of Basic and Diluted Income (Loss) per Share**

In accordance with the disclosure requirements of SFAS 128, a reconciliation of the numerator and denominator of basic and diluted income (loss) per common share is provided as follows:

	Three Months Ended		Nine Months Ended	
	Sept. 30, 2007	Sept. 30, 2006	Sept. 30, 2007	Sept. 30, 2006
	(in thousands, except share and per share amounts)			
Numerator				
Income (loss) from continuing operations	\$ (450)	\$ 1,839	\$ 1,264	\$ (2,990)
Net income (loss)	\$ (540)	\$ 1,839	\$ 1,174	\$ (3,185)
Denominator				
Weighted average number of basic common shares outstanding	3,890,506	3,819,268	3,871,689	3,816,547
Effect of dilutive stock options and restricted stock		56,237	5,017	
Weighted average number of diluted common shares outstanding	3,890,506	3,875,505	3,876,706	3,816,547
Basic income (loss) per share from continuing operations	\$ (0.12)	\$ 0.48	\$ 0.33	\$ (0.78)
Basic income (loss) per share	\$ (0.14)	\$ 0.48	\$ 0.30	\$ (0.83)
Diluted income (loss) per share from continuing operations	\$ (0.12)	\$ 0.47	\$ 0.33	\$ (0.78)
Diluted income (loss) per share	\$ (0.14)	\$ 0.47	\$ 0.30	\$ (0.83)

Stock options and restricted stock are not included in the calculation of weighted average number of diluted common shares outstanding if they are anti-dilutive. Stock options are included in the calculation of weighted average number of diluted common shares outstanding, if the exercise price is lower than the average market value of common shares during the period. The number of stock options and restricted shares outstanding, the range of exercise prices of stock options outstanding and the number of common shares included in the calculation of the weighted average number of diluted common shares outstanding during the period were as follows:

	Nine Months Ended			
	September 30,		2006	
	2007	2006	2007	2006
Stock options outstanding	33,135	106,366

Total	\$ 639	\$ 923

Note 10 - Discontinued Operations

The Company disposed of the Media subsidiary in 1995. However, the Company has a continuing liability with respect to environmental matters pertaining to Media's sites and activities. The measurement of its obligation and recognition of expense for environmental matters directly related to Media's operations is accounted for under SFAS No. 5, Accounting for Contingencies. On January 10, 2005, Media filed under Chapter 11 of

Edgar Filing: AMPEX CORP /DE/ - Form 10-Q

the Bankruptcy Code. Based on the Company's assessment of Media's financial condition and understanding of its environmental remediation obligations, the Company recorded an estimate of amounts probable of incurrence by the Company for future clean up costs of \$2.5 million at December 31, 2004. During the nine months ended September 30, 2007 and 2006, the Company paid \$0.2 million and \$0.2 million, respectively, against the net liabilities of these discontinued operations. The unamortized balance in the net liabilities of discontinued operations pertaining to the environmental matters of the former Media subsidiary totaled \$2.0 million at September 30, 2007. The Company expects to be assessed in 2008 its pro rata share of the remediation costs totaling \$0.8 million with the balance to be paid out over the next ten years. This obligation has not been discounted to present value.

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In 2001, the Company closed its Internet video operations. During the nine months ended September 30, 2007 and 2006, the Company paid \$0.2 million and \$0.4 million, respectively, against the net liabilities of these discontinued operations. The unamortized balance in the net liabilities of discontinued operations pertaining to the former Internet video operations totaled \$0.3 million at September 30, 2007. The Company expects to make payments on office leases and to receive sublet income as it relates to this discontinued operation through 2008. The Company evaluates the amount of net liabilities for discontinued operations, including projected sublet income, on a quarterly basis, and it may make additional adjustments in future periods if the Company determines that its actual obligations will differ significantly from remaining amounts accrued.

A reconciliation of the changes in the net liabilities of the above-discussed discontinued operations for the nine months ended September 30, 2007 and 2006 is as follows:

	2007	2006
	(in thousands)	
Balance at January 1	\$ 2,654	\$ 3,092
Additional provision	90	195
Net payments made during the period	(401)	(559)
Balance at September 30	\$ 2,343	\$ 2,728

Note 11 - Restructuring Charges (Credits)

Data Systems vacated certain administrative offices in Redwood City, CA in 2001 and 2002 to consolidate operations in order to lower continuing operating expenses, and recorded a net restructuring charge of \$4.2 million. In 2003, the Company established an additional reserve of \$3.1 million to reflect the inability to sublease the premises due to the continued depressed real estate market. In 2004, the Company decided to seek a buyer for its Colorado Springs manufacturing facility and reutilize, in part, the Redwood City leased facilities that had been charged to restructuring in prior periods. As a result, the Company recognized a restructuring credit of \$1.4 million. The Company remeasured the restructuring accrual pursuant to SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. Lease costs associated with the manufacturing activities in Redwood City are charged as incurred to the Cost of product sales of Data Systems. During the nine months ended September 30, 2007 and 2006, the Company paid and charged the restructuring accrual \$0.4 million and \$0.5 million, respectively, related to costs associated with the vacated portion of the facilities. The Company has paid and charged the restructuring accrual \$5.3 million since the inception of the 2001-2002 restructuring program. The remaining balance in accrued restructuring totaled \$0.6 million at September 30, 2007. This obligation has been discounted at 5.5% per annum. The Company expects to make payments as it relates to the remaining balance of accrued restructuring through 2008. The Company evaluates the amount of accrued restructuring costs, including projected sublet income, on a quarterly basis, and it may make additional adjustments in future periods if the Company determines that its actual obligations will differ significantly from remaining amounts accrued.

A reconciliation of the changes in the restructuring liability accounts for the six months ended September 30, 2007 and 2006 is as follows:

	2007	2006
	(in thousands)	
Balance at January 1	\$ 1,030	\$ 1,640
Payments made during the period	(448)	(460)
Balance at September 30	\$ 582	\$ 1,180

The note is a non-interest-bearing demand promissory note held by NH Holding Incorporated, the Company's former parent. The outstanding balance at September 30, 2007 is expected to be paid or converted into shares of Common Stock.

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Hillside Notes***

In 1994, the Company, the Pension Benefit Guaranty Corporation (the PBGC) and certain affiliates, including Hillside Capital Incorporated (Hillside), who were members of a group under common control for purposes of the Employee Retirement Income Security Act (ERISA) entered into a Joint Settlement Agreement (Agreement) in connection with the 1994 reorganization of the Company's former parent, NH Holding Incorporated (NHI). The Agreement relates to the pension plans of the Company (the Ampex pension plan) and of its former Media subsidiaries (the Media pension plan), which are substantially underfunded. Under the terms of the Agreement, the Company and Hillside are held jointly and severally liable to the PBGC to fund the required contributions under the Ampex and Media pension plans. Pursuant to this Agreement, Hillside is obligated to advance pension contributions for the Ampex and Media pension plans in the event the Company is unable to make the required contributions necessary in order to satisfy the minimum funding standard. Failure by Hillside to advance funds as may be required would enable the PBGC to terminate the plans and seek recovery of termination benefits from Hillside and Ampex.

Through September 30, 2007, Hillside made pension contributions totaling \$46.6 million pertaining to the Ampex pension plan and the Media pension plan. The Company has issued notes to Hillside (Hillside Notes) in the amount of these pension contributions. The Company requested Hillside to fund the remaining contributions due in 2007, which are estimated to total an additional \$2.5 million, and may do likewise in future years based on the Company's liquidity. Hillside satisfied its obligations to fund scheduled contributions through October 2007.

If Hillside makes all or a portion of the above pension contributions, the Company will issue additional Hillside Notes. Under the terms of the Hillside Notes, \$150,000 of principal is due on the first anniversary of each of the notes with the remaining principal due on the fourth anniversary of the Notes. Pursuant to amendments to the senior debt agreements, all principal payments on the Hillside Notes were deferred until after December 31, 2006. In the three and nine months ended September 30, 2007, principal of \$0.8 million and \$1.1 million was due and paid by the Company under the Hillside Ampex/Sherborne Agreement dated December 1, 1994 (Hillside Agreement). There were no principal payments due in the three and nine months ended September 30, 2006. The Hillside debt payments as of September 30, 2007, before giving effect to any restructuring, are reflected in the Maturities of Debt table. The Hillside Notes provide for interest paid quarterly at 1 percent plus 175% of the applicable mid-term federal rate (effective rate of 9.20% at September 30, 2007). The Company granted to Hillside a security interest in Data Systems inventory as collateral for notes issued to Hillside. The Hillside Notes contain certain restrictive covenants which, among other things, restrict the Company's ability to declare dividends, sell all or substantially all of its assets or commence liquidation, or engage in specified transactions with certain related parties, breach of which could result in acceleration of the Company's potential termination liabilities.

On July 13, 2007, the Company received notice from Hillside alleging that Ampex had breached the Hillside Agreement, and further alleging that if this breach was not cured by July 23, 2007, it would constitute an event of default under the Hillside Agreement, which would entitle Hillside to declare approximately \$45 million of Hillside Notes immediately due and payable. The Company does not agree that any breach had occurred, or that there was any basis for declaring a default under the Hillside Agreement or accelerating the Hillside Notes, and the Company notified Hillside of its position. Any acceleration of the Hillside Notes, unless waived or rescinded, could result in the occurrence of an event of default under certain of the Company's other obligations, including approximately \$6.5 million of its Senior Notes due August 2008, which would entitle holders of the Senior Notes to accelerate the maturity of those obligations.

On September 12, 2007, the Company entered into a standstill agreement with Hillside that currently is scheduled to expire on November 15, 2007, subject to further extension or earlier termination in certain circumstances, for the parties to complete documentation that will restructure the Hillside Notes and clarify how future pension contributions will be funded. The restructuring plan was conditioned upon raising a minimum of \$15 million of equity. Proceeds of the offering were to be used to repay Senior Notes which totaled \$6.5 million at September 30, 2007, to pay scheduled principal and interest due on the Hillside Notes during the standstill period totaling approximately \$1.0 million, and the balance would be available to fund other general corporate initiatives. During the standstill period Hillside has agreed not to accelerate the maturity of their indebtedness or commence legal action against the Company.

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Recent efforts to raise new equity have been unsuccessful and presently the Company does not envision being able to satisfy that condition in the standstill agreement. The Company has informed Hillside that it wishes to extend the standstill period and to enter into further negotiations to develop a mutually acceptable plan that provides sufficient resources for the Company to remain a going concern. Hillside has indicated their willingness to extend the standstill period on terms to be negotiated.

Based on the Company's projected operations, it believes that it will not have sufficient financial resources or be able to generate cash flow to service all of its obligations, including scheduled indebtedness, within the next 12 months and beyond. In order for the Company to remain a going concern it will be required to substantially modify the repayment terms of its Senior Notes as well as the Hillside Notes. Alternatively, the Company may be required to issue new equity to holders of all or most of its outstanding debt securities, as well as for debt that will be issued in connection with future pension plan contributions. Any such issuance of equity for debt would result in current stockholders' ownership interest being significantly diluted and potentially cause a substantial decline in the price of the Company's Common Stock. The Company cannot assure you that it will be successful in restructuring its indebtedness. If Hillside were to declare the Hillside Notes due and payable and/or the Company is unable to restructure its indebtedness or unable to otherwise service its indebtedness, the Company might be forced to reorganize under federal bankruptcy laws, which could negatively affect its revenues and the price of its Common Stock. The financial statements presented in this Form 10-Q do not include any adjustments to the carrying value of assets or liabilities or the classification of debt that might result from any debt restructuring or plan of reorganization that might be ultimately approved by the Company and its lenders.

Hillside is legally obligated to comply with the terms of the Joint Settlement Agreement, and they have represented that they have sufficient assets to fund pension contributions scheduled in future years. Ampex has no direct or indirect financial ownership interest in Hillside and, accordingly, has no ability to control Hillside or to mandate its compliance with the terms of the Agreement. Accordingly, except for the provisions of the Agreement, Ampex's ability to borrow pension contributions from Hillside is beyond its control.

Senior Notes

Accrued interest, interest expense and principal transactions for the Senior Notes are as follows:

Senior Notes	Nine Months Ended September 30,	
	2007	2006
	(in thousands)	
Accrued interest, beginning of the period	\$ 283	\$ 252
Interest expense	593	534
Cash payments applied to interest	(403)	
Issuance of Notes in lieu of cash payment of interest	(377)	(692)
Accrued interest, end of period	\$ 96	\$ 94
Cash payments applied to principal	\$ 251	\$

The indenture under which the Senior Notes were issued contains customary affirmative and negative restrictive covenants that limit the payment of dividends, the incurrence of additional indebtedness or liens, certain sales of assets and other actions by the Company and its restricted subsidiaries. The Company is in compliance at September 30, 2007 with the indenture covenants. In the event of default, the holders of the Notes would be entitled to enforce the liens granted by the Company on its future patent royalty stream and to apply amounts collected to repayment of the Notes. The Senior Noteholders may be entitled to accelerate their indebtedness if Hillside elects to accelerate the Hillside Notes.

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Maturities of Debt***

The following table summarizes the scheduled maturities of the Company's debt as of September 30, 2007, before giving effect to any potential restructuring of the Hillside Notes:

Year	(in thousands)
Remainder of 2007	\$ 644
2008	10,149
2009	1,050
2010	9,850
2011	21,179
2012	8,418
Total	\$ 51,290

Note 14 - Other Liabilities

	September 30, 2007	December 31, 2006
	(in thousands)	
Other postemployment benefits	\$ 152	\$ 170
Environmental	90	90
Other, principally due NHI, the former parent	541	582
Total	\$ 783	\$ 842

Note 15 - Commitments and Contingencies***Legal Proceedings and Foreign Tax Assessments***

In October 2004, the Company initiated litigation against Eastman Kodak Company (Kodak) for their infringement of one of its patents, the 121 patent, in the International Trade Commission (ITC) and also, at the same time, in U.S. District Court in Delaware (District Court). The ITC case was subsequently withdrawn to enable the District Court case to proceed.

On November 21, 2006, the District Court granted final judgment in favor of Kodak. The Company has appealed this decision to the Court of Appeals for the Federal Circuit. Since the 121 patent expired on April 11, 2006, the Court's decision will not affect past or future licensing revenues from existing licensees. Kodak has claimed that Ampex committed inequitable conduct in connection with the 121 patent. This claim has been stayed pending resolution of the appeal. If Kodak's claim is proven, the District Court has the prerogative to grant Kodak recovery of some or all its legal fees which we believe could be significant. If the Court of Appeals reverses the decisions of the District Court in favor of Ampex, the Company would intend to finance the cost of a new trial with one or more investment firms who would share in awards, if any, ultimately received by Ampex.

Also, the Company is currently a defendant in lawsuits that have arisen in the ordinary course of its business. Management does not believe that any such lawsuits, assessments or unasserted claims will have a material adverse effect on the Company's financial position, results of operations or cash flows.

AMPEX CORPORATION

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Environmental Matters

Ampex's facilities are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. Also, the Company has continuing liability with respect to environmental contamination related to the facilities and disposal activities of its former Media subsidiary. The Company is also subject to the federal Occupational Safety and Health Act and other laws and regulations affecting the safety and health of employees in its facilities. Management believes that the Company is generally in compliance in all material respects with all applicable environmental and occupational safety laws and regulations or has plans to bring operations into compliance. Management does not anticipate that capital expenditures for pollution control equipment for fiscal 2007 will be material.

Owners and occupiers of sites containing hazardous substances, as well as generators and transporters of hazardous substances, are subject to broad liability under various federal and state environmental laws and regulations, including liability for investigative and cleanup costs and damages arising out of past disposal activities. The Company has four environmental investigations, remediation and/or monitoring activities outstanding at September 30, 2007. Three sites are associated with the operations of Media while the fourth relates directly to a disposal activity of the Company. Some of these activities involve the participation of state and local government agencies. Although the Company disposed of Media in November 1995, it remains liable with respect to environmental contamination at these sites if Media fails to discharge its responsibilities with respect to such sites. On January 10, 2005, Media filed under Chapter 11 of the Bankruptcy Code. Subsequently Media's assets were sold for nominal consideration to an investor group who Ampex understands is performing mandated clean up activities at the manufacturing facility.

With respect to environmental matters involving site contamination, the Company continually conducts studies, individually or jointly with other responsible parties, to determine the feasibility of various remedial techniques to address environmental matters. It is the Company's policy to record appropriate liabilities for environmental matters when remedial efforts or damage claim payments are probable and the costs can be reasonably estimated. Such liabilities are based on the Company's best estimate of the undiscounted future costs required to complete the remedial work. At September 30, 2007, the Company has recorded a liability of \$0.1 million for pending environmental liabilities associated with activities by the Company and has recorded a liability within discontinued operations of \$2.0 million, of which \$0.8 million is classified as a current liability as it is expected to be paid in 2008, for the estimated expenses it projects it will incur with respect to the three Media sites discussed above. The Company does not currently possess sufficient information to reasonably estimate the range of reasonably possible environmental loss in excess of its accruals. The amounts of additional liabilities that may be recorded upon future completion of studies, litigation or settlements could be material to its consolidated results of operations or operating cash flows in the periods recognized or paid. However, considering the past experience and existing reserves, the Company does not expect that these environmental matters will have a material effect on its consolidated results of operations in the periods recognized. These liabilities have not been discounted, as neither the amount nor timing of future payments are fixed. The recorded liabilities are adjusted periodically as remediation efforts progress or as additional technical or legal information becomes available. The Company expects to fund expenditures for these matters from operating cash flow. The timing of cash expenditures depends on a number of factors, including regulatory approval of cleanup projects, remedial techniques to be utilized and agreements with other parties.

Guarantees

The Company, as permitted under Delaware law and in accordance with its Bylaws, indemnifies its officers and directors for certain events or occurrences, subject to certain limits, while they were serving at its request in such capacity. The maximum amount of potential future indemnification is unlimited; however, the Company has a Director and Officer Insurance Policy that enables the Company to recover a portion of any future amounts paid. As a result of the insurance policy coverage, the Company believes the fair value of these indemnification agreements is minimal.

The Company's sales agreements indemnify its customers for any expenses or liability resulting from claimed infringements of patents, trademarks or copyrights of third parties. The terms of these indemnification agreements are generally perpetual after execution of the agreement. The maximum amount of potential future indemnification is unlimited. However, to date, the Company has not paid any claims nor been required to defend any lawsuits with respect to any claim.

Table of Contents

AMPEX CORPORATION

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company has guaranteed certain lease payments with respect to equipment and real estate of subsidiaries. The Company has recorded accrued restructuring costs or net liabilities of discontinued operations for substantially the full amount of its guarantees, net of the anticipated sublease income expected to be realized. If no sublease income was realized, the Company's additional unreserved exposure would be \$0.2 million.

Products sold are generally covered by a warranty for periods ranging from 90 days to one year. The Company accrues a warranty reserve at the time of sale for estimated costs to provide warranty services over the warranty period. The estimate of costs to service the Company's warranty obligations is based on historical experience and expectation of future conditions. To the extent that the Company experiences increased warranty claim activity or increased costs associated with servicing those claims, the warranty accrual will increase, resulting in decreased gross profit.

Plan Sponsor of Pension and Other Retirement Plans

The Company is the Plan Sponsor of various domestic and foreign non-contributory defined benefit pension plans. In addition, the Company provides supplemental retirement payments to certain former employees of the Company, which were earned under prior corporate ownership. See Note 17.

Note 16 - Related Party Transactions

Equity Investment:

The Company evaluates new investment and income-generating opportunities, subject to restrictions imposed under its debt agreements, and incurred business development costs of \$0.3 million in the nine months ended September 30, 2006. These costs consisted primarily of consulting fees and office rent paid to a British investment advisory company hired to perform research on potential investment opportunities located in the United Kingdom. Effective April 1, 2006, the Company discontinued such payments.

In 2005, Elementis Group plc (Elementis), a UK specialty chemicals company, was identified as a turnaround investment opportunity and a limited liability company (the LLC) was formed to invest in Elementis. Ampex elected not to invest in the LLC. The sole managing member of the LLC is a corporation in which Edward J. Bramson, the Company's former Chairman and CEO through February 2007, and Craig L. McKibben, the Company's CFO, are officers and majority stockholders. Mr. Bramson is also a director of the managing member. The managing member assigned to Ampex all of the incentive fees payable to it by the LLC, based upon gains realized by the LLC upon the sale of its investment in Elementis. Ampex was also entitled to receive reimbursement of its business development expenses. In 2005, as an incentive for Mr. Bramson to maximize the managing member's, and therefore the LLC's, investment performance and the amount of incentive fees payable to Ampex, the Company agreed to permit the managing member to retain one-third of the incentive fees payable by the LLC.

In the first quarter of 2006, the Company realized a reimbursement from the LLC of \$1.5 million of business development expenses incurred during the investment holding period, September 2004 to June 2006, and an incentive fee of \$0.8 million resulting from the sale of approximately two-thirds of the limited partnership's investment in Elementis. An incentive fee of \$2.4 million resulting from the sale of the LLC's remaining investment in Elementis occurred in the third quarter of 2006. The amount of incentive fees retained by the managing member was \$1.6 million.

Mr. Bramson was appointed the non-executive Chairman of the Board of Directors of Elementis on June 6, 2005 and its interim CEO on August 9, 2005. In September 2006, Mr. Bramson became a non-executive Director after the election of a new Chairman for Elementis. On April 26, 2007, Mr. Bramson resigned from the Board of Directors of Elementis.

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Capital Transaction:**

During the period from 1995 to 1998, the Company sold shares of its Class A Common Stock at the then-current fair market value to First Jeffson Corporation (FJC) and to Second Jeffson Corporation (SJC), affiliated corporations controlled by Edward Bramson, the Company's former Chairman and CEO. The purchase price was paid partly in cash and partly with promissory notes. The notes were collateralized by a pledge of the shares of Class A Common Stock that were purchased. For several years, the market value of the pledged shares was substantially less than the principal amount of the notes. In prior years, these companies advised Ampex that there could be no assurance that they would be able to obtain additional funds from Mr. Bramson or others to make future payments of interest or principal on the notes. In 2002, the Company offset the Notes receivable from stockholders against Other additional capital in the Consolidated Balance Sheets, effectively negating the original transactions.

During 2003, FJC failed to make scheduled interest payments amounting to \$205,953 on outstanding notes aggregating \$2,794,050 that were to mature in January 2005 and October 2007. Accordingly, in June 2004, after reviewing the matter with legal advisors, Ampex foreclosed on the FJC notes and caused the 85,000 pledged shares, which had a fair market value of \$153,000, to be registered in the Company's name. In connection with the foreclosure transaction, FJC also transferred to the Company 500 additional shares of Class A Common Stock and \$12,600 in cash, which represented substantially all of FJC's other assets. Similarly, in August 2006, SJC indicated that the Company should foreclose on 20,000 shares of Class A Common Stock, pledged against the SJC notes issued to the Company in the principal amount of \$1,848,000. Accordingly, on August 7, 2006 Ampex foreclosed on the SJC notes and caused the 20,000 pledged shares, which had a market value of \$284,000, to be transferred to Ampex.

The foreclosures did not affect the Company's net assets or results of operations, exclusive of tax benefits that may be realized in future years. The Company has cancelled the shares received from FJC and SJC. Interest and principal paid by FJC and SJC on the notes in prior years totaling \$2.4 million and \$0.7 million, respectively, has been retained by Ampex.

Other Transactions:

In November 2006, the Company entered into an office sharing agreement with Sherborne Investors Management LP (Sherborne LP) permitting Sherborne LP and certain affiliates to use and occupy a portion of the New York office space, in exchange for Sherborne LP's payment to the Company of \$21,000 per month less certain salary and benefit expenses. Sherborne LP is controlled by Sherborne Investors Management GP, LLC, an entity in which Mr. Bramson, the Company's former CEO, is the managing member and Mr. McKibben, the Company's CFO, is a member. Under the agreement, Sherborne LP will pay these amounts to the Company from December 2006 until it discontinues use and occupancy of the premises on lease termination in April 2008. During the nine months ended September 30, 2007, Sherborne LP paid the Company a total of \$189,000 under this agreement, and the Company expects to receive additional payments during the remainder of 2007 and 2008, prior to expiration of the lease, of \$63,000 and \$84,000, respectively, from Sherborne LP.

Note 17 - Pension and Other Retirement Plans

The following is a summary of pension and other retirement plans:

Current Obligations	September 30, 2007	December 31, 2006
	(in thousands)	
Foreign subsidiary plan	\$ 169	\$ 169
Supplemental retirement plan	731	719
Total current pension and other retirement plans	\$ 900	\$ 888

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Long-term Obligations	September 30, 2007	December 31, 2006
	(in thousands)	
Ampex pension plan	\$ 40,701	\$ 54,164
Media pension plan	11,721	14,737
Foreign subsidiary plan	2,899	2,771
Supplemental retirement plan	5,812	6,363
Total long-term pension and other retirement plans	\$ 61,133	\$ 78,035

The remaining pension contributions for the Ampex and Media pension plans due in 2007 and the nine months ended September 30, 2008, which are estimated to total \$15.4 million, have been excluded from current pension and other retirement plans and have been classified as long-term obligations. Payment of these pension contributions are expected to be funded by Hillside pursuant to the terms of the Joint Settlement Agreement whereby long-term notes will be issued to Hillside in the amount of the contributions. The Company may request Hillside to make additional pension contributions due in future years based on the Company's liquidity. Hillside had recently alleged that an event of default had occurred under the Hillside Agreement with which we do not agree. On September 12, 2007, the Company entered into a standstill agreement with Hillside that provides until November 15, 2007, subject to extension or earlier termination in certain circumstances, for the parties to complete documentation that will restructure the Hillside Notes and clarifies how future pension contributions will be funded. To date, Hillside has continued to advance pension contributions as scheduled. See Note 13.

Certain of the Company's domestic employees participate in a qualified noncontributory defined benefit pension plan. Benefits are based on years of service and salary levels during the highest 60 consecutive months of the last 120 consecutive months of service. The Company is also the Plan Sponsor of the pension plan of Media, a former subsidiary that was sold in 1995. In early 1994, the Company amended the plans to terminate benefit service and compensation credit accruals as of February 1, 1994.

The following schedule lists the annual estimated contributions as computed by the plans' actuary for the Ampex pension plan and Media pension plan through 2012. As discussed in Note 13, Hillside paid the Ampex and Media pension contribution, in the amount of \$16.5 million, on January 15, 2007, April 15, 2007, July 15, 2007 and September 15, 2007. The Company issued additional notes to Hillside. The Company has requested Hillside to fund the remaining contributions due in 2007 which are estimated to total \$2.5 million pursuant to the terms of the Joint Settlement Agreement and may do likewise in future years based on the Company's liquidity. Hillside made the October 2007 contributions of \$2.5 million to the Ampex and Media pension plan.

	Estimated Contributions	
	Ampex Pension Plan	Media Pension Plan
	(in thousands)	
Remainder of 2007	\$ 2,369	\$ 108
2008	11,883	3,808
2009	5,736	1,788
2010	7,386	2,288
2011	6,366	1,855
2012	7,337	2,314
Total	\$ 41,077	\$ 12,161

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Certain of the Company's employees employed by a foreign subsidiary are covered by an unfunded pension plan maintained in accordance with local laws. Amounts included as a current and long-term obligation in pension and other retirement plans for the foreign pension plan were \$0.2 million and \$2.9 million, respectively, at September 30, 2007. The Company also remains obligated to make supplemental retirement benefit payments to certain retired employees pursuant to plans that were established under prior ownership. Benefit payments are determined based on a percentage of the employee's compensation and are funded out of cash flow generated by the business. The Company has accrued the actuarial present value of the estimated future payments due under the plans based on the same discount rate and mortality assumption used in the defined benefit plans. Amounts included as a current and long-term obligation in pension and other retirement plans for the supplemental retirement programs were \$0.7 million and \$5.8 million, respectively, at September 30, 2007.

The determination of the obligation and expense for pension benefits is dependent on the selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions include, among others, the discount rate, expected long-term rate of return on plan assets and mortality assumptions for the plan participants.

Note 18 - Accumulated Other Comprehensive Loss

The balances of each classification within accumulated other comprehensive income (loss) are as follows:

	Minimum Pension Liability	Foreign Currency Items (in thousands)	Accumulated Other Comprehensive Loss
December 31, 2006	\$ (100,527)	\$ 600	\$ (99,927)
Current period change	2,347	39	2,386
September 30, 2007	\$ (98,180)	\$ 639	\$ (97,541)

The net periodic pension cost for the Ampex and Media pension plan for the nine months ended September 30, 2007 is reflected as the current period change in minimum pension liability. The net periodic pension cost for 2007, which is charged to the Consolidated Statements of Operations and Comprehensive Income (Loss) ratably over the year to Selling and administrative expenses for the Ampex pension plan and to Media pension costs for the Media pension plan, was determined by the Company's actuary.

Note 19 - Income Taxes

In periods when the Company reports taxable income, its effective tax rate is lower than the statutory rate due to the utilization of net operating loss (NOL) carry forwards and permanent differences. At December 31, 2006, the Company had NOLs for federal income tax purposes of approximately \$189.6 million expiring in the years 2007 through 2024. Of this amount, \$3.8 million pertains to windfall tax deductions from employee stock options, which when realized, will be credited to Other additional capital. If there is a change of control resulting from a plan of reorganization the Company will be limited in the amount of NOL carryforwards that it may be able to offset against future taxable income. The Company has federal capital loss carryforwards totaling \$8.8 million at December 31, 2006, which may be utilized against capital gains, if any, generated in future periods. The provision for income taxes in the nine months ended September 30, 2007 and 2006 also includes foreign withholding taxes on royalty revenue generated in certain Far East locations.

Note 20 - Segment Reporting

The Company has two operating segments, referred to as the Recorders segment and the Licensing segment. The Recorders segment includes the sale and service of data storage systems, instrumentation recorders and professional video products, substantially all of which are made by the manufacturing subsidiary Data Systems. The Licensing segment involves the licensing of Ampex intellectual property through the corporate

licensing division. The accounting policies of the segments are the same as those described in the summary of significant accounting policies.

Table of Contents**AMPEX CORPORATION****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company evaluates segment performance based on return on operating assets employed. Profitability is measured as income (loss) from continuing operations before income taxes, excluding restructuring charges (credits), corporate administrative costs and elimination entries. Corporate administrative costs are not allocated to either business segment.

There were no intersegment sales or transfers.

	Three Months Ended September 30, 2007			Totals

Forward-Looking Statements

This Form 10-Q contains predictions, projections and other statements about the future that are intended to be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause our actual results, performance or achievements, or industry results, to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Such risks, uncertainties and other important factors include, among others, those described under Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2006 (2006 Form 10-K) and in Item 1A. Risk Factors of Part II Other Information of this Form 10-Q. These forward-looking statements speak only as of the date of this Report. We disclaim any obligation or undertaking to disseminate updates or revisions of any expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. IN ASSESSING FORWARD-LOOKING STATEMENTS CONTAINED IN THIS FORM 10-Q, READERS ARE URGED TO READ CAREFULLY ALL SUCH CAUTIONARY STATEMENTS.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
Overview

Our continuing operations include the results of our Licensing and Recorders segments. Our licensing segment generates revenues from licenses we grant to companies covering a variety of technologies that we developed in prior years when we designed and manufactured digital video tape recorders and special effects products used in the professional television broadcast and post production industries. Historically, our licensees included other competitive manufacturers of professional products as well as manufacturers of consumer products where we did not compete but where our technology was relevant to their products' functionality. Licensing our intellectual property has been a significant business segment since 1968.

In recent years, we received substantial royalties from manufacturers of digital still cameras who licensed our rapid image retrieval (121) patent. This patent expired in April 2006. Today, the majority of our licensing revenue is derived from manufacturers of digital camcorders who we believe use several of our digital compression and image processing patents. These patents expire from 2012 to 2014.

We believe that many of these same patents are also used, or may be used in the future as improved image quality is desired, by manufacturers of digital still cameras, camera-equipped cellular phones and cable set top boxes. These are very large markets and, if we are successful in executing license agreements with the major manufacturers of these products, we would realize a substantial increase in revenues and profitability. Over the last two years we have had technical and business discussions with several manufacturers of these products and issued claim charts to various manufacturers of digital cameras and camera-equipped cellular phones alleging infringement of certain of our patents that our research suggests are being used in several of their products. To date, these meetings have not resulted in new licensing agreements or continued payments under existing license agreements with digital still camera manufacturers, and we cannot assure you that we will be able to achieve either of these goals.

In prior years, if we exhausted our licensing negotiations, we would initiate litigation against alleged infringing manufacturers, at the International Trade Commission (ITC) and/or in U.S. District Court. Recently, the licensing environment in which we operate has changed, making litigation more costly and more uncertain for small companies attempting to license their intellectual property. Accordingly, we are evaluating alternative approaches to intellectual property monetization, including arrangements with third parties to mitigate our exposure to costly litigation.

Table of Contents

During 2007 we have met with a number of firms and individuals that believe they can assist us to monetize our intellectual property. Certain of these firms provide the financial, technical and legal resources necessary to bring litigation against manufacturers of consumer and industrial products that are believed to infringe our intellectual property in exchange for a share of future licensing revenues or legal settlement awards. Others believe that they can persuade manufacturers that their licensing revenues will be enhanced by combining their existing patent portfolio with certain Ampex patents and the parties would share the expanded licensing revenue stream a non-litigation approach to patent monetization. We recently have engaged Commercial Strategy, LLC to assist us in identifying companies with whom we might partner, to enhance our licensing program. The M-CAM, Inc. agreement will expire in January 2008, in accordance with its terms.

Over the next several months, we intend to identify specific licensing strategies for our major patent/product groups. For example, we may seek to partner with existing companies that broadly license patents to manufacturers of cellular telephones, digital still cameras and certain industrial products that may utilize our proprietary technology for a share of expanded future licensing revenues.

Additional internal or external resources will be required to pursue patent monetization opportunities. Recent efforts to raise new equity have been unsuccessful and we have not yet entered into any agreements with outside sources capable of financing any patent monetization strategies. There can be no assurance that we will be able to raise sufficient funding, or that any of the patent monetization opportunities identified and pursued by us will result in increased licensing revenues.

Over the past few years, we have incurred significant external litigation costs to enforce our patents, primarily in regards to litigation we initiated against Eastman Kodak Company (Kodak) for infringement of our rapid image retrieval patent (121 patent) in their digital still cameras. On November 21, 2006, the U.S. District Court of Delaware (District Court) granted final judgment in favor of Kodak. We have appealed this decision to the Court of Appeals for the Federal Circuit. Kodak has claimed that Ampex committed inequitable conduct in connection with the 121 patent. This claim has been stayed pending resolution of the appeal. If Kodak's claim is proven, the District Court has the prerogative to grant Kodak recovery of some or all its legal fees which we believe could be significant. We have been advised that oral argument could occur during the first quarter of 2008 and a final decision should be expected during mid-2008. Since the 121 patent expired in April 2006, the Court's decision will not affect past or future licensing revenues from existing licensees. If the Court of Appeals reverses the decisions of the District Court in our favor, we would intend to finance the cost of a new trial with one or more investment firms who would share in awards, if any, ultimately received by us.

In recent years, we have focused product development activities of our Recorders segment on data acquisition and instrumentation recorders which are used in defense applications and in airframe and sensor test applications. Our DDRs and DSRs disk- and solid state-based data acquisition recorders are intended to replace over several years the large installed base of tape-based data recorders and, if successful, should generate increased sales and profits for the Recorders segment. In addition, we have recently introduced several new multiplexer modules, devices that permit various signals to be recorded simultaneously from different sources, for use with our instrumentation recorders, a new miniature recorder for use in applications where space is especially constrained, and the new high definition video recorder.

Table of Contents

We are obligated to make significant debt service payments over the next several years. A significant amount of our debt results from borrowings from Hillside, which, together with us, is obligated to make pension contributions to our underfunded defined benefit pension plans under a Joint Settlement Agreement with the Pension Benefit Guaranty Corporation (PBGC). Significant additional pension contributions are also scheduled to be paid over the next several years to these plans, which we expect to fund by additional borrowings from Hillside, depending on our liquidity.

On July 13, 2007, we received notice from Hillside alleging that we had breached the Hillside-Ampex/Sherborne Agreement dated December 1, 1994 (the Hillside Agreement), and further alleging that if this breach was not cured by July 23, 2007, it would constitute an event of default under the Hillside Agreement, which would entitle Hillside to declare approximately \$45 million of notes from Hillside (Hillside Notes) immediately due and payable. We do not agree that any breach had occurred, or that there was any basis for declaring a default under the Hillside Agreement or accelerating the Hillside Notes, and we notified Hillside of our position. Any acceleration of the Hillside Notes, unless waived or rescinded, could result in the occurrence of an event of default under certain of our other obligations, including approximately \$6.5 million of our Senior Notes due August 2008, which would entitle holders of the Senior Notes to accelerate the maturity of those obligations.

On September 12, 2007, we entered into a standstill agreement with Hillside that currently is scheduled to expire on November 15, 2007, subject to extension or earlier termination in certain circumstances, for the parties to complete documentation that will restructure the Hillside Notes and to clarify how future pension contributions will be funded. The restructuring plan was conditioned upon raising a minimum of \$15 million of equity. Proceeds of the offering were to be used to repay Senior Notes which totaled \$6.5 million at September 30, 2007, scheduled principal and interest due on the Hillside Notes during the standstill period of approximately \$1.0 million, and the balance would be available to fund other general corporate initiatives. During the standstill period Hillside agreed not to accelerate the maturity of their indebtedness or commence legal action against us.

Recent efforts to raise new equity have been unsuccessful and presently we do not envision being able to satisfy that condition in the standstill agreement. We have informed Hillside that we wish to extend the standstill period and to enter into further negotiations to develop a mutually acceptable plan that provides sufficient resources for us to remain a going concern. Hillside has indicated their willingness to extend the standstill period on terms to be negotiated.

Based on our projected operations, we believe that we will not have sufficient financial resources or be able to generate cash flow to service all of our obligations, including scheduled indebtedness, within the next 12 months and beyond. In order for us to remain a going concern, we will be required to substantially modify the repayment terms of our Senior Notes as well as the Hillside Notes. Alternatively, we may be required to issue new equity to holders of all or most of our outstanding debt securities, as well as for debt that will be issued in connection with future pension plan contributions. Any such issuance of equity for debt would result in current stockholders' ownership interests being significantly diluted, and potentially cause a substantial decline in the price of our Common Stock.

We cannot assure you that we will be successful in restructuring our indebtedness. If Hillside were to declare the Hillside Notes due and payable and/or we are unable to restructure our indebtedness or unable to otherwise service our indebtedness, we might be forced to reorganize under federal bankruptcy laws, which could negatively affect our revenues and the price of our Common Stock. The financial statements presented in this Form 10-Q do not include any adjustments to the carrying value of assets or liabilities or the classification of debt that might result from any debt restructuring or plan of reorganization that might be ultimately approved by us and our lenders.

Table of Contents

We are assessed foreign withholding taxes on royalty income generated in certain Far East locations. Our effective tax rate was lower than the statutory rate due to the utilization of federal and state net operating loss (NOL) carryforwards. At December 31, 2006, the amount of unused NOL carryforwards available to offset future federal taxable income totaled approximately \$189.6 million. If there is a change of control resulting from a plan of reorganization, we will be limited in the amount of NOLs that we will be able to offset against future taxable income. In recent years, we have provided a 100% valuation reserve against our NOL carryforwards and net deferred tax assets. We have adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (FIN 48), effective January 1, 2007.

Periodically, we are required to adjust reserves established in prior years for restructured activities due to subsequent favorable or unfavorable developments. In the three and nine months ended September 30, 2007 and 2006, there were no adjustments recorded.

We are also required periodically to adjust reserves established in prior years for discontinued operations for subsequent favorable or unfavorable developments that are directly related to the operations of the discontinued businesses. In the three and nine months ended September 30, 2007, reserves were increased by \$0.1 million. In the nine months ended September 30, 2006, reserves were increased by \$0.2 million.

In addition to foreign currency translation adjustments, which are typically minor in amount, at the end of each year we include in Other comprehensive income (loss), net of tax, a minimum pension adjustment reflecting an actuarially computed increase or decrease in accumulated benefit obligations over pension plan assets of the Ampex and Media pension plans. Historically, such annual pension adjustments have fluctuated widely.

The following discussion and analysis of the financial condition and results of operations of the Company and its subsidiaries should be read in conjunction with the unaudited Consolidated Financial Statements and the Notes thereto, included elsewhere in this Report.

Recent Pronouncements

In July 2006, the FASB issued FIN 48. FIN 48 clarifies the accounting for uncertainty in income taxes by prescribing the recognition threshold a tax position is required to meet before being recognized in the financial statements. It also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006 and was adopted by us on a prospective basis in the first quarter ended March 31, 2007. The adoption of FIN 48 did not have any effect on our financial statements.

In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS 157). SFAS 157 provides guidance for using fair value to measure assets and liabilities. It also responds to investors' requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. SFAS 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value, and does not expand the use of fair value in any new circumstances. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and is required to be adopted by us in the quarter ended March 31, 2008. We are currently evaluating the effect that the adoption of SFAS 157 will have on our consolidated results of operations and financial condition and are not yet in a position to determine such effects.

Table of Contents

In September 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - An Amendment of FASB No. 87, 88, 106 and 132(R)* (SFAS 158). SFAS 158 requires that the funded status of defined benefit postretirement plans be recognized on our balance sheet and changes in the funded status be reflected in comprehensive income, effective for fiscal years ending after December 15, 2006, which we adopted effective December 31, 2006. SFAS 158 also requires companies to measure the funded status of the plan as of the date of their fiscal year end, effective for fiscal years ending after December 15, 2008. The adoption of SFAS 158 did not have a material impact on our financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities - Including an amendment of FASB Statement No. 115* (SFAS 159). SFAS 159 expands the use of fair value accounting but does not affect existing standards which require assets or liabilities to be carried at fair value. Under SFAS 159, a company may elect to use fair value to measure accounts and loans receivable, available-for-sale and held-to-maturity securities, equity method investments, accounts payable, guarantees and issued debt. Other eligible items include firm commitments for financial instruments that otherwise would not be recognized at inception and non-cash warranty obligations where a warrantor is permitted to pay a third party to provide the warranty goods or services. If the use of fair value is elected, any upfront costs and fees related to the item must be recognized in earnings and cannot be deferred, e.g., debt issue costs. The fair value election is irrevocable and generally made on an instrument-by-instrument basis, even if a company has similar instruments that it elects not to measure based on fair value. At the adoption date, unrealized gains and losses on existing items for which fair value has been elected are reported as a cumulative adjustment to beginning retained earnings. Subsequent to the adoption of SFAS 159, changes in fair value are recognized in earnings. SFAS 159 is effective for fiscal years beginning after November 15, 2007 and is required to be adopted by us in the first quarter of fiscal 2008. We are currently determining whether fair value accounting is appropriate for any of our eligible items and cannot estimate the impact, if any, that SFAS 159 will have on our consolidated results of operations and financial condition.

Critical Accounting Policies and Estimates

General

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our most significant estimates and assumptions, including those related to revenue recognition, bad debts, warranty obligations, inventories, pension costs and unfunded accumulated benefit obligations, litigation expense and environmental obligations. We base our estimates on historical experience and on various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ significantly from these estimates.

We believe the following critical accounting policies affect our more significant estimates used in the preparation of our consolidated financial statements.

Table of Contents

Revenue Recognition

We recognize revenue in accordance with applicable accounting standards including Staff Accounting Bulletin (SAB) No. 104, Revenue Recognition and American Institute of Certified Public Accountants (the AICPA) Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended. Revenue is recognized when (1) persuasive evidence of an arrangement exists, (2) delivery and acceptance has occurred or services have been rendered, (3) the fee is fixed or determinable, and (4) collection is reasonably assured. We derive our revenues from two principal sources: license fees (including royalties) through our Licensing segment, and product and parts sales and service contracts through our Recorders segment.

Determination of criteria (3) and (4) are based on Management's judgments regarding the fixed nature of the fee charged for services rendered and products delivered and the collectibility of those fees. Should changes in conditions cause Management to determine these criteria are not met for certain future transactions, revenue recognized for any reporting period could be adversely affected.

Our revenue recognition policy with respect to royalty income is as follows: when we enter into an agreement with a new licensee for use of our patents, we may receive settlement of past due royalties. This is a negotiated amount and is typically paid by the licensee within 30 days of signing the license agreement. Past due royalties cover the licensee's product shipments from the period when they were first notified of infringement up through the effective date of the license. We may also negotiate a prepayment of royalties that would otherwise be due up to a specific future date. The amounts due under our negotiated agreements for both past due royalties and prepayment of royalties are non-refundable and non-forfeitable. We recognize both past due and prepayment amounts as revenue in the period when the agreement has been executed by both parties, which is when there is persuasive evidence of an arrangement, fees become fixed or determinable and collection becomes probable, as we have no future obligations with respect to these agreements and delivery has occurred. Alternatively, our licensing agreement may include a running royalty which covers products shipped by the licensee in the current period after the date that the license agreement has been entered into and until the patent has expired or when the patent is no longer contractually available to the licensee, if shorter. Our running royalties are computed as a percentage of the selling price of the licensee's products and are paid quarterly in arrears and recognized as revenue at the time the amount of the quarterly royalty payment becomes determinable, generally upon receipt of the licensee's sales report upon which royalties are determined, and collection is reasonably assured.

Revenue on product sales and services is recorded when all of the following have occurred: an agreement of sale exists, product delivery (principally FOB Ampex Factory) and, where applicable, acceptance has occurred or services have been rendered, pricing is fixed or determinable, and collection is reasonably assured. Service revenue is recognized ratably over the life of the service contract.

Accounts Receivable

We perform ongoing credit evaluations of our customers and adjust credit limits based upon payment history and the customer's current credit worthiness, as determined by our review of their current credit information. We continuously monitor collections and payments from our customers and maintain a provision for estimated credit losses based upon our historical experience and any specific customer collection issues that we have identified. While such credit losses have historically been within our expectations and the provisions established, we cannot guarantee that we will continue to experience the same credit loss rates that we have in the past. Since our accounts receivable are concentrated in a relatively few number of customers, a significant change in the liquidity or financial position of any one of these customers could have a material adverse impact on the collectibility of our accounts receivable and our future operating results.

Table of Contents

Inventories

We value our inventory at the lower of the actual cost to purchase and/or manufacture the inventory or the current estimated market value of the inventory. Abnormal amounts of facility expense, freight, handling costs and scrap material are excluded from inventory cost and expensed during the period in which they are incurred. We regularly review inventory quantities on hand and record a provision for excess and obsolete inventory based primarily on our estimated forecast of product demand and production requirements for the next eighteen months. A significant increase in the demand for our products could result in a short-term increase in the cost of inventory purchases while a significant decrease in demand could result in an increase in the amount of excess inventory quantities on hand. We also maintain an inventory of tape and spare parts to service our customers' products after the date of sale. We amortize tape and spare parts inventories over the expected number of years we expect to support such products but not in excess of 30 months. If actual market conditions are less favorable than those projected by Management, additional inventory write-downs may be required. Additionally, our estimates of future product demand may prove to be inaccurate, in which case we may have understated or overstated the provision required for excess and obsolete inventory. If our inventory were determined to be overvalued, we would be required to recognize such costs in our cost of goods sold at the time of such determination. We make every effort to ensure the accuracy of our forecasts of future product demand, however, any significant unanticipated change in demand or technological development could have a significant impact on the value of our inventory and our reported operating results.

Deferred Taxes

We must make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments occur in the calculation of certain deferred tax assets and liabilities, which arise from differences in the timing of recognition of revenue and expense for tax and financial statement purposes.

We must assess the likelihood that we will be able to recover our deferred tax assets and net operating loss carryforwards. We must increase our provision for taxes by recording a valuation allowance against the deferred tax assets and net operating loss carryforwards that we estimate will more likely than not ultimately not be recoverable. Although we reported net income in 2005 and the nine months ended September 30, 2007, we have reported losses in recent years and during 2006. Accordingly, we cannot determine that it is more likely than not that we will recover our deferred tax assets and net operating loss carryforwards, and therefore have established a valuation allowance equal to such assets. If we recognize and/or realize deferred tax assets or net operating loss carryforwards in subsequent years, through absorption of taxable income or reversal of deferred tax asset reserves, our tax provision in that period will be less than the statutory tax rate.

In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations. We recognize liabilities for anticipated tax audit issues in the U.S. and other tax jurisdictions based on our estimate of whether, and the extent to which, additional taxes will be due. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognize a tax benefit during the period in which we determine that the liability is no longer necessary. We record an additional charge in our provision for taxes in the period in which we determine that the recorded tax liability is less than we expect the ultimate assessment to be.

Warranty

Products sold are generally covered by a warranty for periods ranging from 90 days to one year. We accrue a warranty reserve at the time of sale for estimated costs to provide warranty services. Our estimate of costs to service our warranty obligations is based on historical experience and expectation of future conditions. To the extent we experience increased warranty claim activity or increased costs associated with servicing those claims, our warranty accrual will increase, resulting in decreased gross profit.

Table of Contents

Pension and Other Postretirement Benefits/ Obligations

We adopted SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, an amendment of FASB Statements No. 87, 88, 106 and 132(R), as of December 31, 2006. Under SFAS No. 158, the funded status of each pension and other postretirement benefit plan is required to be reported as an asset (for overfunded plans) or a liability (for underfunded plans) at December 31, 2006. The implementation of SFAS No. 158 had no impact on our Consolidated Balance Sheets or Statement of Operations and Comprehensive Income (Loss). The determination of our obligation and expense for pension and other postretirement benefits payable to Ampex's and Media's employees and retirees is dependent on our selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions include, among others, the discount rate, expected long-term rate of return on plan assets and mortality assumptions for the plan participants. In accordance with SFAS No. 158, actual results that differ from our assumptions are accumulated and amortized over future periods and, therefore, generally affect our recognized expense and recorded obligation in such future periods.

While we believe that our assumptions are appropriate, significant differences in our actual experience or significant changes in our assumptions that may be required under new legislation or otherwise may materially affect our pension and other postretirement obligations and our future expense as well as amounts that may ultimately be required to be paid to fund the plans.

Valuation of Long-Lived Assets and Investments

We periodically review the carrying value of our long-lived assets and investments for continued appropriateness. This review is based upon our projections of anticipated future cash flows or other methods used to determine fair value. While we believe that our estimates of fair value are reasonable, different assumptions could materially affect our evaluations. We record an impairment provision to reduce the carrying value of minority equity investments carried on the cost method if our estimate of their fair value is below their original cost and the impairment is other than temporary.

Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with SFAS No. 123 (revised 2004) (*SFAS No. 123R*), *Share-Based Payment*. Under the provisions of SFAS No. 123R, stock-based compensation cost is estimated at the grant date based on the award's fair-value as calculated by the Black-Scholes-Merton (*BSM*) option-pricing model and is recognized as expense ratably over the requisite service period. The BSM model requires various highly judgmental assumptions including volatility, forfeiture rates, and expected option life. If any of the assumptions used in the BSM model change significantly, stock-based compensation expense may differ materially in the future from that recorded in the current period. Prior to 2006, we accounted for stock-based compensation under the intrinsic method prescribed by Accounting Principles Board (*APB*) Opinion No. 25, *Accounting for Stock Issued to Employees*, which historically did not result in a charge to operations.

Contingencies

We account for contingencies in accordance with SFAS No. 5, *Accounting for Contingencies*. SFAS No. 5 requires that we record an estimated loss from a loss contingency when information available prior to issuance of our financial statements indicates that it is probable that an asset has been impaired or a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. Accounting for contingencies such as our obligations to fund Media's environmental remediation costs, as well as obligations involving legal, income tax and other matters, requires us to use our judgment. While we believe that our accruals for these matters are adequate, if the actual loss from a loss contingency is significantly different than the estimated loss, our results of operations may be over- or understated.

Table of Contents

Environmental Liabilities

Our facilities and business practices are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. Also, we have continuing liability with respect to environmental contamination related to the facilities and disposal activities of our former Media subsidiary. We are engaged in a number of environmental investigations, remediation and/or monitoring activities, some of which involve the participation of state and local government agencies. We recognize a liability for any contingency that is probable of occurrence and reasonably estimable in accordance with AICPA Statement of Position No. 96-1: Environmental Remediation Liabilities. We continually assess these contingencies based on a careful analysis of each matter with the assistance of outside legal counsel and, if applicable, other experts. Such analysis includes making judgments concerning matters such as the extent of environmental damage and our pro rata participation, if applicable, the most desirable remediation techniques and the time period during which the cleanup costs may be incurred. Because most contingencies are resolved over long periods of time, liabilities may change in the future due to new developments or other changes. For a discussion of our contingencies related to environmental matters, including management's judgment applied in the recognition and measurement of specific liabilities, see Note 15 of Notes to Unaudited Consolidated Financial Statements.

The following discussion and analysis of the financial condition and results of operations of the Company and its subsidiaries should be read in conjunction with the unaudited Consolidated Financial Statements and the Notes thereto, included elsewhere in this Report.

Business Segments

We have two business segments, which we refer to as our Recorders segment and our Licensing segment. Our Recorders segment involves the sale and service of instrumentation recorders and mass data storage systems, all of which are made by Data Systems. Our Licensing segment involves the licensing of our intellectual property to manufacturers of consumer digital imaging products through our corporate licensing division. For information regarding revenues, income or loss, assets and other financial data for each business segment, see Note 20 of the Notes to Unaudited Consolidated Financial Statements.

Our Recorders segment includes Data Systems' three principal product groups and its service revenue, which are described more fully below. Data Systems also conducts an aftermarket operation consisting primarily of the supply of spare parts for certain products.

Instrumentation recorders, including Data Systems' data acquisition and instrumentation products (including disk-based DDRs instrumentation recorders, solid state memory-based DSRs instrumentation recorders and tape-based DCRsi instrumentation recorders) and related tape and aftermarket parts;

Mass data storage systems, including Data Systems' 19-millimeter scanning recorders and library systems (DST and DIS products) and related tape and aftermarket parts;

Professional video products, consisting principally of television aftermarket products that Data Systems continues to support but no longer manufactures; and

Table of Contents

Service revenue, consisting principally of maintenance contracts on Data Systems products. AMPEX, DST, DIS, DCRsi, DDRs and DSRs are trademarks of Ampex Corporation.

Our Licensing segment generates revenue from licenses granted to companies that manufacture consumer imaging products (digital video camcorders, digital still cameras, camera-equipped cellular phones, and DVD recorders). We also license our patents to certain manufacturers of professional videotape recorders and image processing devices such as digital special effects processors.

The following table shows (i) licensing revenue generated by our Licensing segment, (ii) revenue generated by our Recorders segment through sales of Data Systems products by product group and (iii) service revenue generated by our Recorders segment for the three and nine months ended September 30, 2007 and 2006.

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2007	2006	(in millions)	
	2007	2006	2007	2006
Licensing Segment				
Running licensing revenues	\$ 2.7	\$ 3.2	\$ 8.0	\$ 7.4
Prior period and prepaid licensing revenues			1.9	
Total licensing revenues	\$ 2.7	\$ 3.2	\$ 9.9	\$ 7.4
Recorders Segment				
Data acquisition and instrumentation recorders	\$ 3.7	\$ 2.1	\$ 10.6	\$ 6.3
Mass data storage tape drives and library systems	0.9	0.8	2.8	3.5
Service revenue	1.8	2.2	5.4	6.3
Other (including professional video products)	0.3	0.3	1.3	1.1
Total net product and service revenue	\$ 6.7	\$ 5.4	\$ 20.1	\$ 17.2

Results of Operations for the Three and Nine Months Ended September 30, 2007 and 2006

Licensing Revenue. Licensing revenue was \$2.7 million and \$9.9 million in the three and nine months ended September 30, 2007 compared to \$3.2 million and \$7.4 million in the three and nine months ended September 30, 2006. Licensing revenue is derived from royalties that we receive from licensing our patents.

Running royalties are based on quarterly sales by the licensees reported to the Company within 60 days after the end of the respective quarter. We earned running royalties of \$8.0 million in the nine months ended September 30, 2007, substantially all of which was earned from manufacturers of digital camcorders. We earned

Table of Contents

running royalties of \$4.6 million from manufacturers of digital camcorders and \$2.8 million from manufacturers of digital still cameras and other products in the nine months ended September 30, 2006. The increase in running royalties on camcorders in 2007 results from royalties paid by Sony Corporation (Sony) on their digital camcorder sales subject to an agreement which commenced on April 12, 2006. This offset the decline in digital still camera running royalties due to the expiration of the 121 patent on April 11, 2006. The increase in total licensing revenue resulted largely from the recognition in the first quarter of 2007 of a non-recurring lump sum royalty prepayment with a manufacturer of camcorders that covers the manufacturer's obligation to pay royalties on product shipments through August 2011. There were no one-time royalty settlements or prepayments in the nine months ended September 30, 2006. Due to one-time royalty settlements covering prior and future periods, the expiration of certain patents and the terms and periods covered by licensing agreements, licensing revenues are not comparable between the periods presented and are not indicative of licensing revenues to be received in future periods.

During 2007 we have met with a number of firms and individuals that believe they can assist us to monetize our intellectual property. Certain of these firms provide the financial, technical and legal resources necessary to bring litigation against manufacturers of consumer and industrial products that are believed to infringe our intellectual property in exchange for a share of future licensing revenues or legal settlement awards. Others believe that they can persuade manufacturers that their licensing revenues will be enhanced by combining their existing patent portfolio with certain Ampex patents and the parties would share the expanded licensing revenue stream a non-litigation approach to patent monetization. We recently have engaged Commercial Strategy, LLC to assist us in identifying companies with whom we might partner, to enhance our licensing program. The M-CAM, Inc. agreement will expire in January 2008, in accordance with its terms.

Over the next several months, we intend to identify specific licensing strategies for our major patent/product groups. For example, we may seek to partner with existing companies that broadly license patents to manufacturers of cellular telephones, digital still cameras and certain industrial products that may utilize our proprietary technology for a share of expanded future licensing revenues. Compensation of external advisors who assist us in identifying and/or implementing these strategies may include a share of future licensing revenues resulting from their efforts. Our ability to pursue new patent monetization initiatives will be dependent upon successfully restructuring our indebtedness, of which there can be no assurance.

Our relevant digital imaging patents were developed when we manufactured still stores, video special effects products and digital videotape recorders, which we sold into the professional broadcast and postproduction markets in prior years. As discussed above, these patents have expiration dates through 2014. After they expire, our future licensing revenues are expected to decline materially.

Product Revenue. Product revenue generated by our Recorders segment increased to \$4.9 million and \$14.7 million in the three and nine months ended September 30, 2007 from \$3.2 million and \$10.9 million in the three and nine months ended September 30, 2006. Government agencies and defense contractors and commercial airframe manufacturers are currently our principal customers for the Recorders segment. Government agencies and defense contractors have historically experienced significant pressure to reduce spending and we expect them to experience such pressure in the future, which may lead to sales declines. In 2004, we introduced our DDRs and DSRs instrumentation recorders, which are disk-based and solid state memory-based data acquisition recorders used in intelligence gathering activities and airframe flight certification. Revenues in the nine months ended September 30, 2007 from these new data acquisition recorders increased to \$10.0 million from \$4.8 million in the nine months ended September 30, 2006. These products are intended to replace, over several years, a large installed base of our DCRsi tape-based data acquisition recorders. These new products could lead to a further increase of product revenues over current levels. While we have recently been awarded significant multi-year contracts for our disk- and solid state-based instrumentation recorders, there can be no assurance that these new products will attain the same level of market penetration that our earlier products achieved.

Table of Contents

Our backlog of firm orders was \$4.0 million at September 30, 2007 compared to \$5.9 million at December 31, 2006. The decline in backlog results from completing a multi-year contract with The Boeing Company (Boeing) for our new disk- and solid state-based data instrumentation recorders used in the development of the 787 airplane. We have received orders from Boeing and the U.S. Navy, totaling \$9.0 million, which are not included in backlog at September 30, 2007 as they contain cancellation clauses or require receipt of purchase orders against the contract. We have shipped \$2.0 million against these orders. We typically operate with low levels of backlog, requiring us to obtain the majority of each period's orders in the same period that they must be shipped to the customer. Historically, a small number of large orders have significantly impacted sales levels and often orders are received late in the quarter, making it difficult to predict revenue levels in future periods.

Service Revenue. Total service revenue generated by our Recorders segment in the three and nine months ended September 30, 2007 was \$1.8 million and \$5.4 million compared to \$2.2 million and \$6.3 million for the three and nine months ended September 30, 2006. We expect that service revenue will decline over time as older tape-based products, sales of which were accompanied by service contracts generating service revenue, are replaced with non-service revenue generating disk- or solid state memory-based instrumentation recorders

Intellectual Property Costs. Intellectual property costs include external legal costs as well as certain internal costs, described below, pertaining to the enforcement of our patents. Intellectual property costs also include external legal costs incurred in investigating the validity and enforceability of our patents and auditing royalty reports. Intellectual property costs fluctuate widely between periods based primarily on whether or not we are pursuing patent litigation. During the nine months ended September 30, 2007 and 2006, we incurred external legal costs in the amount of \$0.5 million and \$6.8 million, respectively, in connection with our suit against Kodak. Because our suit against Kodak is on appeal, our external litigation costs during 2007 are expected to remain significantly below 2006 amounts.

There is no direct cost of goods sold associated with licensing revenue. We have an internal staff of lawyers and engineers, and employ outside contractors who are principally involved in negotiating and monitoring our licensing agreements. Their compensation, travel expenditures and other direct costs are included as intellectual property costs. We do not allocate any general corporate overhead to our Licensing segment. Compensation includes incentive payments under long-term incentive plans earned by our employees based on amounts collected from our licensees. We also expect to incur additional costs in future years investigating and analyzing whether manufacturers of consumer digital imaging products are utilizing our other digital imaging and data compression technologies as well as to support new patent monetization strategies. There can be no assurance that any of the patent monetization opportunities that we may pursue will result in increased licensing revenues.

Cost of Product Revenue. Cost of product sales includes the cost of materials, labor and overhead incurred in the manufacture of our products. Cost of product sales as a percentage of product revenue was 48.7% and 49.1% in the three and nine months ended September 30, 2007 compared to 60.6% and 53.9% in the three and nine months ended September 30, 2006. Our cost of product sales percentage fluctuates based on a number of factors, including the volume and mix of product shipped in the period. The decrease in the cost of product revenue percentage in 2007 when compared to 2006 was due to the increased sales volume in 2007, which resulted in greater absorption of fixed manufacturing costs. During the nine months ended September 30, 2006, we reduced our retrofit reserve associated with product sold in a prior period by \$0.2 million based on the acknowledgement by the customer that no further liability exists.

Table of Contents

Cost of Service Revenue. Cost of service revenue includes materials and labor used in maintaining and repairing our customers' systems that we provide under service contracts. Cost of service revenue as a percentage of service revenue was 28.7% and 28.7% in the three and nine months ended September 30, 2007 compared to 26.9% and 28.2% in the three and nine months ended September 30, 2006. The cost of service revenue fluctuates based largely on the level of services we provide to repair or replace equipment in a particular period and the cost of material used to repair or replace such equipment.

Research, Development and Engineering Expenses. All of our research, development and engineering expenses relate to our Recorders segment. The increase in research, development and engineering expenditures during the three and nine months ended September 30, 2007 compared to the three and nine months ended September 30, 2006 is due primarily to an increase in engineering personnel coupled with costs incurred to produce peripheral products to enhance the DDRs ruggedized disk- and DSRs solid state memory-based data acquisition recorders. Such costs are expected to continue to increase as we develop new and enhanced products.

Selling and Administrative Expenses. Selling and administrative expenses increased to \$3.9 million in the three months ended September 30, 2007 from \$3.2 million in the three months ended September 30, 2006 and increased to \$11.2 million in the nine months ended September 30, 2007 from \$9.4 million in the nine months ended September 30, 2006. Selling and administrative expenses for the Recorders segment and the unallocated corporate administrative expenses (no corporate administrative expenses are allocated to the Licensing segment) are shown in the following table:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2007	2006	2007	2006
	(in millions)			
Recorders segment	\$ 1.6	\$ 1.4	\$ 4.9	\$ 4.4
Corporate	2.3	1.8	6.3	5.0
Total	\$ 3.9	\$ 3.2	\$ 11.2	\$ 9.4

The principal components of corporate selling and administrative expense are listed below:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2007	2006	2007	2006
	(in millions)			
U.S. and foreign pension expense	\$ 0.7	\$ 0.8	\$ 2.2	\$ 2.5
Legal and accounting fees	0.6	0.2	1.2	1.0
Corporate salaries and benefits	0.3	0.3	1.0	0.8
Stock based compensation expense	0.1	0.1	0.3	0.3
Business development expenses, net of reimbursements				(1.2)

Selling and administrative expenses for the Recorders segment increased in the three and nine months ended September 30, 2007 compared to the three and nine months period ended September 30, 2006 largely as a result of additional sales and marketing expenses incurred for shows, advertising and travel.

Table of Contents

Corporate expenses during the 2007 periods included legal costs incurred in connection with Hillside Note restructuring issues totaling \$0.4 million. We expect to incur additional legal costs to document any debt restructuring or plan of reorganization that we and our lenders ultimately negotiate.

Corporate selling and administrative expenses during 2006 included business development expenses including consulting fees and office rent paid to a British investment advisory company, totaled \$0.3 million in the nine months ended September 30, 2006. We discontinued payments to the investment advisory company on April 1, 2006. In the nine months ended September 30, 2006, we received reimbursement of \$1.5 million of business development expenses incurred from 2004 to 2006 when an investment was sold. See Note 16 Related Party Transactions of the Notes to Unaudited Consolidated Financial Statements.

Beginning in 2006, we began to expense the fair value of stock options and restricted stock awards over the period such options and awards vest. We expensed \$0.3 million and \$0.3 million in the nine months ended September 30, 2007 and 2006, respectively.

Operating Income (Loss). We reported operating income of \$0.6 million and \$4.2 million in the three and nine months ended September 30, 2007, respectively, compared to operating income of \$23 thousand for the three months ended September 30, 2006 and an operating loss of \$4.0 million for the nine months ended September 30, 2006. The operating income (loss) for the Licensing segment, Recorders segment and corporate administrative expenses is shown in the following table:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2007	2006	2007	2006
	(in millions)			
Licensing segment	\$ 2.0	\$ 1.4	\$ 7.7	\$ (0.9)
Recorders segment	0.9	0.4	2.8	1.9
Unallocated corporate	(2.3)	(1.8)	(6.3)	(5.0)
Operating income (loss)	\$ 0.6	\$	\$ 4.2	\$ (4.0)

See corporate selling and administrative expenses discussed above under Selling and Administrative Expenses for a discussion of the major components of Unallocated corporate loss.

Media Pension Costs. We remain the plan sponsor of the pension plan of Media, a former subsidiary that was sold to Quantegy Corporation (Quantegy) in 1995, and we remain obligated to make pension contributions to that plan. Pension costs (credits) are recognized under SFAS No. 87, Employers Accounting for Pensions.

Interest Expense. Interest expense increased to \$1.2 million and \$3.1 million in the three and nine months ended September 30, 2007 compared to \$0.8 million and \$2.1 million in the three and nine months ended September 30, 2006 due to the issuance of additional Hillside Notes in the amount of \$19.1 million over the twelve month period ended September 30, 2007. We made cash payments of interest totaling \$1.2 million and \$2.6 million in the three and nine months ended September 30, 2007 compared to interest totaling \$0.5 million and \$1.4 million in the three and nine months ended September 30, 2006. Interest of \$0.4 million and \$0.5 million not paid in cash in the nine months ended September 30, 2007 and 2006, respectively, was capitalized and added to the principal amount of the related debt obligation.

Table of Contents

Amortization of Debt Financing Costs. Financing costs associated with the original issuance of the 12% Senior Notes are being charged to expense through the maturity date in 2008.

Interest Income. Interest income is earned on cash balances and short-term investments.

Other (Income) Expense, Net. In the three and nine months ended September 30, 2007, we realized \$0.1 million on the collection of a prior period cost plus program with a government subcontractor. In the three and nine months ended September 30, 2006, we realized \$2.4 million and \$3.2 million, respectively, of incentive fees, which were assigned to us by the managing member of an investment limited liability company (LLC) upon the sale of the LLC 's investment in a British specialty chemical company. We credited these incentive fees against other (income) expense, net. See Note 16 Related Party Transactions of Notes to Unaudited Consolidated Financial Statements. We do not expect to receive any additional incentive fees from these entities. In the three and nine months ended September 30, 2006, we realized a non-recurring gain of \$0.3 million from the sale of other securities.

Other income (expense), net, also includes foreign currency translation gains and losses resulting from our foreign operations, which were not significant.

Provision for Income Taxes. The provision for income taxes in the three and nine months ended September 30, 2007 and 2006 included foreign and state income taxes and withholding taxes on royalty revenue generated in certain Far East locations. At December 31, 2006, we had federal NOLs for income tax purposes of approximately \$189.6 million, expiring in the years 2007 through 2024. In addition, we have federal capital loss carryforwards totaling \$8.8 million at December 31, 2006, which may be utilized to offset capital gains, if any, generated in future periods. Accordingly, we have the ability to shelter a substantial amount of future federal taxable income, including future licensing revenue, if any is ultimately realized.

Loss from Discontinued Operations. In the three and nine months ended September 30, 2007, we increased the reserve by \$0.1 million for the amount of net liabilities for discontinued operations to include additional expected costs associated with a facility lease related to our former Internet video operations. In the nine months ended September 30, 2006, we increased the reserve by \$0.2 million for the amount of net liabilities for discontinued operations. See Note 10 of Notes to Unaudited Consolidated Financial Statements.

Net Income (Loss). We reported a net loss of \$0.5 million and net income of \$1.8 million in the three months ended September 30, 2007 and September 30, 2006, respectively, and net income of \$1.2 million and a net loss of \$3.2 million in the nine months ended September 30, 2007 and September 30, 2006 respectively, primarily as a result of the factors discussed above.

Other Comprehensive Income (Loss). Other comprehensive income (loss) includes foreign currency transaction adjustments resulting from our foreign operations.

Inflation and Changing Prices. We do not believe that inflation or changing prices have had any material impact on our product and service revenue, licensing revenue or income from continuing operations for the periods ended September 30, 2007 and 2006.

Table of Contents

Liquidity and Capital Resources

General. Our cash balance at September 30, 2007 totaled \$9.1 million of which our foreign subsidiaries held \$2.5 million. The foreign subsidiaries' cash balances are generally required to fund their working capital requirements and for other obligations and cannot be remitted to the parent company. Substantially all cash generated by our Licensing segment in excess of related operating expenses and certain other expenses, including patent litigation costs, is first required to be applied to reduce debt, which at September 30, 2007 totaled \$51.3 million.

Cash Flow. We used cash from continuing operating activities totaling \$16.9 million and \$13.2 million in the nine months ended September 30, 2007 and 2006, respectively. The use of cash in the nine months ended September 30, 2007 resulted primarily from the payment of Ampex and Media pension contributions of \$16.5 million. The use of cash in the nine months ended September 30, 2006 resulted primarily from the payment of Ampex and Media pension contributions of \$6.8 million and legal costs related to the Kodak litigation. Cash used by discontinued operations totaled \$0.4 million and \$0.6 million in each of the nine months ended September 30, 2007 and 2006, respectively.

Ampex is currently highly leveraged, and we are required to finance significant pension contributions in 2007 and future years, which will require us to incur additional debt. On July 13, 2007, we received notice from Hillside alleging that we had breached the Hillside Agreement, and further alleging that if this breach was not cured by July 23, 2007, it would constitute an event of default under the Hillside Agreement, which would entitle Hillside to declare approximately \$45 million of Hillside Notes immediately due and payable. We do not agree that any breach had occurred, or that there is any basis for declaring a default under the Hillside Agreement or accelerating the Hillside Notes, and we notified Hillside of our position. Any acceleration of the Hillside Notes, unless waived or rescinded, could result in the occurrence of an event of default under certain of our other obligations, including approximately \$6.5 million of our Senior Notes due August 2008, which would entitle holders of the Senior Notes to accelerate the maturity of those obligations.

On September 12, 2007, we entered into a standstill agreement with Hillside that currently is scheduled to expire on November 15, 2007, subject to extension or earlier termination in certain circumstances, which provides for the parties to complete documentation that will restructure the Hillside Notes, and clarifies how future pension contributions will be funded. The restructuring plan was conditioned upon raising a minimum of \$15 million of equity. Proceeds of the offering were to be used to repay Senior Notes which totaled \$6.5 million at September 30, 2007, to pay scheduled principal and interest due on the Hillside Notes during the standstill period totaling approximately \$1.0 million, and the balance would be available to fund other general corporate initiatives. During the standstill period Hillside agreed not to accelerate the maturity of their indebtedness or commence legal action against us.

Recent efforts to raise new equity have been unsuccessful and presently we do not envision being able to satisfy that condition in the standstill agreement. We have informed Hillside that we wish to extend the standstill period and to enter into further negotiations to develop a mutually acceptable plan that provides sufficient resources for us to remain a going concern. Hillside has indicated their willingness to extend the standstill period on terms to be negotiated.

Based on our projected operations, we believe that we will not have sufficient financial resources or be able to generate cash flow to service all of our obligations, including scheduled indebtedness, within the next 12 months and beyond. In order for us to remain a going concern, we will be required to substantially modify the repayment terms of our Senior Notes as well as the Hillside Notes. Alternatively, we may be required to issue new equity to holders of all or most of our outstanding debt securities, as well as for debt that will be issued in connection with future pension plan contributions. Any such issuance of equity for debt would result in current stockholders' ownership interest being significantly diluted and potentially cause a substantial decline in the price of our Common Stock. We cannot assure you that we will be successful in restructuring our indebtedness.

Table of Contents

If Hillside were to declare the Hillside Notes due and payable and/or we are unable to restructure our indebtedness or unable to otherwise service our indebtedness, we might be forced to reorganize under federal bankruptcy laws, which could negatively affect our revenues and the price of our Common Stock. The financial statements presented in this Form 10-Q do not include any adjustments to the carrying value of assets or liabilities or the classification of debt that might result from any debt restructuring or plan of reorganization that might be ultimately approved by us and our lenders.

Senior Debt. As of September 30, 2007 we had outstanding approximately \$51.3 million of total borrowings, which includes approximately \$6.5 million under our 12% Senior Notes due August 2008 and \$44.8 million of Hillside Notes.

The indenture under which the Senior Notes were issued contains customary affirmative and negative restrictive covenants that limit the payment of dividends, the incurrence of additional indebtedness or liens, certain sales of assets and other actions by our restricted subsidiaries and us. In the event of a default, the holders of the Senior Notes would be entitled to enforce the liens granted by us on our future patent royalty stream and to apply amounts collected to repayment of the Senior Notes. The Senior Noteholders may be entitled to accelerate their indebtedness if Hillside elects to accelerate the Hillside Notes. If we are successful in raising new equity which is a condition to restructuring the Hillside Notes, the proceeds are first to be used to repay in full the outstanding Senior Notes.

Pension Contributions and Pension-Related Funding Obligations. We are the Plan Sponsor of the Ampex pension plan and the pension plan of Media. We amended these plans in early 1994 to terminate benefit service and compensation accruals as of February 1, 1994 in order to reduce payments that would otherwise be required. These pension plans remain underfunded and actuaries have forecasted that substantial pension contributions will be required through 2012.

	Estimated Contributions	
	Ampex Pension Plan	Media Pension Plan
	(in thousands)	
Remainder of 2007	\$ 2,369	\$ 108
2008	11,883	3,808
2009	5,736	1,788
2010	7,386	2,288
2011	6,366	1,855
2012	7,337	2,314
Total	\$ 41,077	\$ 12,161

Pension contributions are payable quarterly in April, July and October of the current year, and January and September following the plan year. Pension contributions payable in the remainder of 2007 are estimated as follows:

	Estimated Contributions	
	Ampex Pension Plan	Media Pension Plan
	(in thousands)	
October 2007	\$ 2,369	\$ 108
	\$ 2,369	\$ 108

Table of Contents

In 1994, the Company, the Pension Benefit Guaranty Corporation (the PBGC) and certain affiliates, including Hillside Capital Incorporated (Hillside), who were members of a group under common control for purposes of the Employee Retirement Income Security Act (ERISA), entered into a Joint Settlement Agreement (Agreement) in connection with the 1994 reorganization of our former parent, NH Holding Incorporated (NHI). The Agreement relates to our pension plan (the Ampex pension plan) and the pension plan of our former Media subsidiaries (the Media pension plan), which are substantially underfunded. Under the terms of the Agreement, Ampex and Hillside are held jointly and severally liable to the PBGC to fund the required contributions under the Ampex and Media pension plans. Pursuant to this Agreement, Hillside is obligated to advance pension contributions for the Ampex and Media pension plans in the event we are unable to make the required contributions necessary in order to satisfy the minimum funding standard. Failure by Hillside to advance funds as may be required would enable the PBGC to terminate the plans and seek recovery of termination benefits from Hillside and Ampex. The PBGC has recently contacted the Company seeking additional information on any prospective sale of assets, including the sale of our patents to special purpose vehicles that may be established to monetize our intellectual property, which we have supplied.

Through September 30, 2007, Hillside made pension contributions totaling \$46.6 million pertaining to the Ampex pension plan and the Media pension plan. We issued Hillside Notes, as discussed below, in the amount of the pension contributions and amounts advanced by Hillside in prior years. We have requested Hillside to fund the remaining contributions due in 2007, which are estimated to total \$2.5 million, and we may do likewise in future years based on our liquidity. Hillside satisfied its obligations to fund scheduled contributions through October 2007. However, as a precursor to its July 2007 payment, Hillside alleged that we had failed to make all commercially reasonable efforts to obtain the funds needed from sources other than Hillside to make that payment, which totaled \$4.4 million, and alleged that an event of default under the Hillside Agreement had occurred. If ultimately proven to be correct, all outstanding debt payable by us to Hillside would become due and payable to Hillside. However, we believe that no default had occurred and that we had exercised commercially reasonable efforts as required by the Hillside Agreement, and we intend to vigorously defend our position. During the standstill period, Hillside agreed not to accelerate the maturity of their indebtedness or commence legal action against us.

When Hillside makes all or any portion of a pension contribution under the Ampex and/or Media pension plans, we issue additional Hillside Notes. Under the terms of the Hillside Notes, \$150,000 of principal is due on the first anniversary of each of the notes with the remaining principal due on the fourth anniversary of the notes. Pursuant to amendments to the senior debt agreements, all principal payments on the Hillside Notes were deferred until various dates after December 31, 2006. The Hillside Notes provide for interest paid quarterly at 1 percent plus 175% of the applicable mid-term federal rate (effective rate of 9.20% at September 30, 2007). We granted to Hillside a security interest in Data Systems inventory as collateral for the Hillside Notes. This agreement contains certain restrictive covenants which, among other things, restrict our ability to declare dividends, sell all or substantially all of our assets or commence liquidation, or engage in specified transactions with certain related parties, breach of which could result in acceleration of our potential termination liabilities.

Hillside is legally obligated to comply with the terms of the Agreement, and has represented that it has sufficient assets to fund pension contributions that are scheduled in future years. We have no direct or indirect financial ownership interest in Hillside and, accordingly, have no ability to control Hillside or to mandate its compliance with the terms of the Agreement. Accordingly, our ability to borrow pension contributions from Hillside is beyond our control. Under the terms described in the letter of intent, Hillside has acknowledged that it will fund such contributions if our liquidity is not sufficient to make the payments or if there are any Hillside Notes outstanding.

Table of Contents

Off-Balance Sheet Arrangements. During the nine months ended September 30, 2007 and 2006, we did not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that our Management believes is material to investors.

Contractual Obligations. An aggregate listing of our contractual obligations and commercial commitments as of September 30, 2007, excluding interest, is as follows:

Contractual Obligations	Total	Payments Due by Period			
		Less than 1 Year	1 - 3 Years	4 - 5 Years	After 5 Years
		(in thousands)			
Senior debt (a)	\$ 6,508	\$ 6,508	\$	\$	\$
Other debt (b)	44,782	4,286	10,344	27,817	2,335
Operating leases (c)	4,795	2,753	2,032	10	
Pension and other retirement plans (d)	62,033	16,343	19,456	20,053	6,181

- (a) The maturity date of the Senior Notes is August 2008. Pursuant to the agreement, substantially all Available Cash Flow, as defined in the agreement, is to be applied to the Senior Notes in full repayment of principal and accrued interest. Accordingly, payments due on these obligations could vary from the amounts shown in the table. See Note 13 of the Notes to Unaudited Consolidated Financial Statements. Also, the Senior Noteholders may be entitled to accelerate their Notes in the event that Hillside accelerates their indebtedness.
- (b) Other debt includes the Hillside Notes and Notes payable - other. See Note 13 of the Notes to Unaudited Consolidated Financial Statements. These amounts may be subject to significant increases attributable to additional Hillside Notes that we may issue in the remainder of 2007 and future years in connection with our pension obligations. See footnote (d) below. The scheduled maturities reflected above are before giving effect to any restructuring of the Hillside Notes. See Liquidity and Capital Resources Cash Flow and Pension Contributions and Pension-Related Funding Obligations, above.
- (c) Operating leases include facility rentals of both continuing operations and discontinued operations or abandoned leaseholds related to prior years restructuring activities. Amounts shown above exclude projected sublease rental income, which we have included in establishing reserves for discontinued operations that total \$0.2 million.
- (d) Pension and other retirement plans include estimated pension contributions for the Ampex Plan and the Media Plan based on actuarial assumptions presently in effect and an assumed rate of return on pension assets of 8% per annum. If interest rates decline, if the return on assets is less than projected, or if the actuarial assumptions change, future pension contributions could increase over amounts shown above. Payment of future pension contributions for the Ampex Plan and the Media Plan are expected to be funded pursuant to the terms of the Joint Settlement Agreement. We may request Hillside to make pension contributions due in future years, whereby long-term notes will be issued to Hillside in the amount of the contribution, based on our liquidity. See paragraph (b) above, Note 17 of the

Table of Contents

Notes to Unaudited Consolidated Financial Statements and Item 2. Managements Discussion and Analysis of Financial Condition and Results of Operations Overview. Pension and other retirement plans also include a foreign defined benefit plan and domestic supplementary retirement plans at \$9.6 million.

	Total	Amount of Commitment Expiration per Period			
		Less than 1 Year	1 - 3 Years	4 - 5 Years	After 5 Years
Standby Letters of Credit (a)	\$ 1,522	\$ 1,522	\$	\$	\$

- (a) We have obtained standby letters of credit from a bank to support our obligations under various building leases, which are required to be renewed through the lease term. We have collateralized these standby letters of credit with cash.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There has been no material change to the disclosure made in the 2006 Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES**Evaluation of Disclosure Controls and Procedures**

Based on an evaluation under the supervision and with the participation of our management, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures as defined in rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act), were effective as of September 30, 2007 to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no significant changes in our internal control over financial reporting identified in management s evaluation that occurred during the third quarter of 2007 that have materially affected, or are reasonably likely to materially affect, the Company s internal control over financial reporting.

PART II OTHER INFORMATION**ITEM 1. LEGAL PROCEEDINGS**

We are a party to routine litigation incidental to our business. In the opinion of management, no such current or pending lawsuits, either individually or in the aggregate, is likely to have a material adverse effect on our financial condition, results of operations or cash flows.

Table of Contents

In October 2004, we initiated litigation against Eastman Kodak Company (Kodak) for its infringement of one of our patents, the 121 patent, in the ITC and also, at the same time, in the District Court. In the International Trade Commission (ITC) proceeding, the remedies available would have been to bar Kodak from the importation or sale of digital still cameras or in certain circumstances to require Kodak to post a forfeitable bond on digital still cameras imported into the United States, in each case for the life of the 121 patent which expired in April 2006. In the separate District Court case, we sought monetary damages for infringement of the patent from August 2001 (the date on which we gave notice of infringement) through April 11, 2006, the date the patent expired. The ITC case was withdrawn to enable the District Court case to proceed. On November 21, 2006, the District Court granted final judgment in favor of Kodak. We have appealed this decision to the Court of Appeals for the Federal Circuit. We have been advised that oral argument could occur during the first quarter of 2008 and a final decision should be expected during mid-2008. If the Court of Appeals reverses the decisions of the District Court in our favor, we would intend to finance the cost of a new trial with one or more investment firms who would share in awards, if any, ultimately received by us.

Our facilities are subject to numerous federal, state and local laws and regulations designed to protect the environment from waste emissions and hazardous substances. We are also subject to the federal Occupational Safety and Health Act and other laws and regulations affecting the safety and health of employees in its facilities. Management believes that we are generally in compliance in all material respects with all applicable environmental and occupational safety laws and regulations or have plans to bring operations into compliance. Management does not anticipate that capital expenditures for pollution control equipment for fiscal 2007 will be material.

Owners and occupiers of sites containing hazardous substances, as well as generators and transporters of hazardous substances, are subject to broad liability under various federal and state environmental laws and regulations, including liability for investigative and cleanup costs and damages arising out of past disposal activities. We have four environmental investigations, remediation and/or monitoring activities outstanding at September 30, 2007. Three sites are associated with the operations of Media while the fourth relates directly to a disposal activity of the Company. Some of these activities involve the participation of state and local government agencies. Although we sold Media in November 1995, we have continuing liability with respect to environmental contamination at these sites if Media fails to discharge its responsibilities with respect to such sites. On January 10, 2005, Media filed under Chapter 11 of the Bankruptcy Code. During the nine months ended September 30, 2007 and 2006, we spent a total of approximately \$0.2 million and \$0.2 million, respectively, in connection with environmental investigation, remediation and monitoring activities. We expect to spend \$0.8 million in the next twelve months for such activities, largely pertaining to Media s prior activities.

Because of the inherent uncertainty as to various aspects of environmental matters, including the extent of environmental damage, the most desirable remediation techniques and the time period during which cleanup costs may be incurred, it is not possible for us to estimate with certainty the ultimate costs to be incurred with respect to the currently pending environmental matters referred to above. At September 30, 2007, we had an accrued liability of \$0.1 million for pending environmental liabilities associated with activities by us and \$2.0 million of net liabilities for discontinued operations for the estimated liabilities we may incur with respect to former Media sites discussed above. Although we do not currently possess sufficient information to estimate with certainty the ultimate costs to be incurred upon future completion of studies, litigation or settlements, and neither the timing nor the amount of the ultimate costs associated with environmental matters can be determined, they could be material to our consolidated results of operations or operating cash flows in the periods recognized or paid. However, considering our past experience and existing reserves, we do not expect that these environmental matters will have a material adverse effect on our consolidated financial position. These liabilities have not been discounted.

While we believe that we are generally in compliance with all applicable environmental laws and regulations or have plans to bring operations into compliance, it is possible that we will be named as a potentially responsible party in the future with respect to additional Superfund or other sites. Furthermore,

Table of Contents

because we conduct our business in foreign countries as well as in the U.S., it is not possible to predict the effect that future domestic or foreign regulation could have on our business, operating results or cash flow. There can be no assurance that we will not ultimately incur liability in excess of amounts currently accrued for pending environmental matters or that additional liabilities with respect to environmental matters will not be asserted. In addition, changes in environmental regulations could impose the need for additional capital equipment or other requirements. Such liabilities or regulations could have a material adverse effect on us in the future.

ITEM 1A. RISK FACTORS

Our 2006 Form 10-K contains a detailed discussion of certain risk factors that could materially adversely affect our business, operating results or financial condition. The following risk factors reflect recent events, and should be read in conjunction with the risk factors and information disclosed in the 2006 Form 10-K.

The Company will need to substantially modify the repayment terms of its debt securities or enter into a plan of reorganization in order to remain a going concern; this may result in dilution and a decline in our stock price.

On July 13, 2007, we received notice from Hillside Capital Incorporated (Hillside) alleging that we had breached the Hillside Agreement, and further alleging that if this breach was not cured by July 23, 2007, it would constitute an event of default under the Hillside Agreement, which would entitle Hillside to declare the Hillside Notes immediately due and payable. Such Notes totaled approximately \$45 million at September 30, 2007. We do not agree that any breach had occurred, or that there was any basis for declaring a default under the Hillside Agreement or accelerating the Hillside Notes, and we notified Hillside of our position. However, any acceleration of the Hillside Notes, unless waived or rescinded, could result in the occurrence of an event of default under certain of our other obligations, including approximately \$6.5 million of our Senior Notes due August 2008, which would entitle holders of the Senior Notes to accelerate the maturity of those obligations.

On September 12, 2007, we entered into a standstill agreement with Hillside that currently is scheduled to expire on November 15, 2007, subject to extension or earlier termination in certain circumstances, to complete documentation and meet other conditions that will restructure the Hillside Notes and clarify how future pension contributions will be funded. The restructuring plan was conditioned upon raising a minimum of \$15 million of equity. Recent efforts to raise new equity have been unsuccessful, and presently we do not envision being able to satisfy that condition of the standstill agreement. We have informed Hillside that we wish to extend the standstill period and to enter into further negotiations to develop a mutually acceptable plan that provides sufficient resources for us to remain a going concern. Hillside has indicated their willingness to extend the standstill period on terms to be negotiated. We cannot assure you that we will be successful in restructuring our indebtedness. If Hillside were to declare the Hillside Notes due and payable and/or we are unable to restructure our indebtedness or otherwise unable to service our indebtedness, we might be forced to reorganize under federal bankruptcy laws, which could negatively affect our revenues and the price of our Common Stock.

In order for us to remain a going concern we will be required to substantially modify the repayment terms of our Senior Notes as well as the Hillside Notes. Alternatively, we may be required to issue new equity to holders of all or most of our outstanding debt securities, as well as for debt that will be issued in connection with future pension plan contributions. Any such issuance of equity for debt would result in current stockholders' ownership interest being significantly diluted and potentially cause a substantial decline in the price of our Common Stock.

Table of Contents

Our licensing revenue has been materially and adversely affected due to the expiration of one of our patents in April 2006. Furthermore, if we are unable to protect or monetize our intellectual property adequately, our revenues will be reduced and we may not be able to compete effectively.

In recent years, we received substantial royalties from manufacturers of digital still cameras who licensed our rapid image retrieval (121) patent. This patent expired in April 2006. Today, the majority of our licensing revenue is derived from manufacturers of digital camcorders who we believe use several of our digital compression and image processing patents. These patents expire from 2012 to 2014.

We believe that many of these same patents are also used, or may be used in the future as improved image quality is desired, by manufacturers of digital still cameras, camera-equipped cellular phones and cable set top boxes. The potential royalties from manufacturers of these products could be substantial, and we have engaged in discussions with several such manufacturers. However, our discussions have not yet resulted in any new licensing agreements (or continued payments under existing license agreements), and we cannot assure you that we will be able to enter into any such agreements.

The success of our Licensing and Recorders segments depends, in part, upon our ability to establish and maintain the proprietary nature of our technology through the patent process. There can be no assurance that one or more of our patents will not be successfully challenged, invalidated or circumvented or that we will otherwise be able to rely on such patents for any reason. In addition, our competitors, many of whom have substantial resources and have made substantial investments in competing technologies, may seek to apply for and obtain patents that restrict our ability to make, use and sell our products either in the United States or in foreign markets. Monitoring unauthorized use of our technology is difficult, and we cannot be certain that the steps we have taken will prevent unauthorized use of our technology, particularly in foreign countries where the laws may not protect our proprietary rights as fully as the laws of the United States. If any of our patents are successfully challenged, invalidated or circumvented or our right or ability to manufacture our products becomes restricted, our ability to continue to manufacture and market our products could be adversely affected, which would likely have a material adverse effect upon our business, financial condition and results of operations.

In prior years, if we exhausted our licensing negotiations, we would initiate litigation against alleged infringing manufacturers. Recently, the licensing environment in which we operate has changed, making litigation more costly and more uncertain for small companies attempting to license their intellectual property. Accordingly, we are evaluating alternative approaches to intellectual property monetization in order to minimize our litigation costs. To date, we have met with several parties who may be able to assist us with these strategies, and have recently engaged Commercial Strategy, LLC to assist us in identifying companies with whom we might partner, to enhance our licensing program. Additional internal or external resources may be required to pursue our licensing programs. We cannot assure you that we will be able to obtain these additional resources or that any of these programs will result in increased licensing revenues.

Unless we are able to develop or acquire new patents in the digital imaging field or other fields or identify additional existing patents useful in these fields, our licensing revenues may expire as early as 2014. Moreover, if other companies develop patented proprietary technology similar to ours or competing technologies, our competitive position will be weakened and we may experience reduced license revenues.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

We did not sell any equity securities during the third quarter of 2007 that were not registered under the Securities Act of 1933, as amended.

Table of Contents

There were no purchases of any shares of our common stock made by or on behalf of Ampex or any of our affiliated purchasers (as defined in Rule 10b-18(a)(3) of the Exchange Act) during the second quarter of 2007.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

As previously disclosed in our Current Report on Form 8-K, filed July 19, 2007, we received a notice from Hillside Capital Incorporated (Hillside) on July 13, 2007 alleging that we had breached the Hillside-Ampex/Sherborne Agreement dated December 1, 1994 (the Hillside Agreement), and further alleging that if this breach was not cured within ten days after we received the notice, i.e., by July 23, 2007, it would constitute an event of default under the Hillside Agreement, which would entitle Hillside to declare approximately \$45 million of notes previously issued by us to Hillside under the Hillside Agreement (the Hillside Notes) immediately due and payable. We do not agree that any breach had occurred, or that there was any basis for declaring a default under the Hillside Agreement or accelerating the Hillside Notes, and we notified Hillside of our position. Any acceleration of the Hillside Notes, unless waived or rescinded, could result in the occurrence of an event of default under certain of our other obligations, including approximately \$6.5 million of our Senior Notes due August 2008, which would entitle holders of the Senior Notes to accelerate the maturity of those obligations.

On September 12, 2007, we entered into a standstill agreement with Hillside that currently is scheduled to expire on November 15, 2007, subject to extension or earlier termination in certain circumstances, for the parties to complete documentation that will restructure the Hillside Notes and to clarify how future pension contributions will be funded. The standstill agreement was previously filed with the Securities and Exchange Commission on September 13, 2007 as part of our Form 8-K. The restructuring plan was conditioned upon raising a minimum of \$15 million of equity. Proceeds of the offering were to be used to repay Senior Notes which totaled \$6.5 million at September 30, 2007, scheduled principal and interest due on the Hillside Notes during the standstill period totaling approximately \$1.0 million and the balance would be available to fund other general corporate initiatives. During the standstill period Hillside agreed not to accelerate the maturity of their indebtedness or commence legal action against us.

Recent efforts to raise new equity have been unsuccessful and presently we do not envision being able to satisfy that condition in the standstill agreement. We have informed Hillside that we wish to extend the standstill period and to enter into further negotiations to develop a mutually acceptable plan that provides sufficient resources for us to remain a going concern. Hillside has indicated their willingness to extend the standstill period on terms to be negotiated.

Based on our projected operations, we believe that we will not have sufficient financial resources or be able to generate cash flow to service all of our obligations, including scheduled indebtedness, within the next 12 months and beyond. In order for us to remain a going concern, we will be required to substantially modify the repayment terms of our Senior Notes as well as the Hillside Notes. Alternatively, we may be required to issue new equity to holders of all or most of our outstanding debt securities, as well as for debt that will be issued in connection with future pension plan contributions. Any such issuance of equity for debt would result in current stockholders' ownership interest being significantly diluted, and potentially cause a substantial decline in the price of our Common Stock. We cannot assure you that we will be successful in restructuring our indebtedness. If Hillside were to declare the Hillside Notes due and/or we are unable to restructure our indebtedness or unable to otherwise service our indebtedness, we might be forced to reorganize under federal bankruptcy laws, which could negatively affect our revenues and the price of our Common Stock. The financial statements presented in this Form 10-Q do not include any adjustments to the carrying value of assets or liabilities or the classification of debt that might result from any debt restructuring or plan of reorganization that might be ultimately approved by us and our lenders.

For a more detailed discussion of the Hillside Agreement and the nature of the breach alleged by Hillside, see Part I Financial Information, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, above.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

ITEM 5. OTHER INFORMATION

There is no information required to be disclosed in a report on Form 8-K during the third quarter of fiscal 2007 that was not so reported.

There were no material changes to the procedures by which security holders may recommend nominees to our Board of Directors that were implemented since we last provided such disclosure in our 2007 Proxy Statement, dated April 13, 2007.

ITEM 6. EXHIBITS

The Exhibits filed with this Report are listed in the Exhibit Index included elsewhere herein and which is hereby incorporated by reference in this Item 6.

AMPEX CORPORATION

FORM 10-Q FOR THE QUARTER ENDED

September 30, 2007

EXHIBIT INDEX

Exhibit No.	Exhibit Description
10.1	Standstill Agreement dated as of September 12, 2007, between Hillside Capital Incorporated and Ampex Corporation (filed as Exhibit 10.1 to the Company's Form 8-K dated September 12, 2007, and incorporated herein by reference).
10.2*	Third Amendment to Lease dated as of August 30, 2007 between The Board of Trustees of the Leland Stanford Junior University (successor to Martin/Campus Associates, L.P.), as landlord, and Ampex Data Systems Corporation (successor to the Company), as tenant, with respect to the premises located at 500 Broadway, Redwood City, California.
10.3*	Fifth Amendment to Lease dated as of August 30, 2007 between The Board of Trustees of the Leland Stanford Junior University (successor to Martin/Campus Associates, L.P.), as landlord, and Ampex Data Systems Corporation (successor to the Company), as tenant, with respect to the premises located at 1228 Douglas Avenue, Redwood City, California.
31.1*	Chief Executive Officer certification pursuant to Rules 13a-14(a) and 15d-14(a) of the Exchange Act.
31.2*	Chief Financial Officer certification pursuant to Rules 13a-14(a) and 15d-14(a) of the Exchange Act.
32.1*	Chief Executive Officer and Chief Financial Officer certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

* Filed herewith.
