SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements that are based on our management's beliefs and assumptions and on information currently available to our management. In some cases, you can identify forward-looking statements by terms such as anticipates, believes, could, estimates, expects, intends, may, plans, potential, predicts, projects, should, will, would and similar expressions intended to identify forward-looking statements. These forward-looking statements include but are not limited to statements regarding our anticipated sales, revenue, expenses, profits, capital needs, product offerings, competition and the status of our facilities. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performances or achievements expressed or implied by the forward-looking statements. We discuss many of these risks in greater detail under the heading "Risk Factors" in Part II Item 1A of this report. Given these uncertainties, you should not place undue reliance on these forward-looking statements. You should read this report and the documents that we reference in this report and have filed as exhibits to the report completely and with the understanding that our actual future results may be materially different from what we expect. Also, forward-looking statements represent our management's beliefs and assumptions only as of the date of this report. Except as required by law, we assume no obligation to update these forward-looking statements publicly, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.

U.S. AUTO PARTS NETWORK, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Summary of Significant Accounting Policies

Basis of Presentation

The condensed consolidated financial statements of U.S. Auto Parts Network, Inc. (collectively with its subsidiaries, the Company) have been prepared in accordance with accounting principles generally accepted in the United States (U.S. GAAP) for interim financial information and with the instructions to Securities and Exchange Commission (SEC) Form 10-Q and Article 10 of SEC Regulation S-X. In the opinion of management, the accompanying condensed consolidated financial statements contain all adjustments, consisting of normal recurring adjustments, necessary to present fairly the consolidated financial position of the Company as of March 31, 2008 and December 31, 2007, and the consolidated results of operations for the three months ended March 31, 2008 and 2007, and cash flows for the three months ended March 31, 2008 and 2007. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to the rules and regulations of the SEC. The results of operations for the three months ended March 31, 2008 are not necessarily indicative of those to be expected for the entire year. The accompanying consolidated financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2007, which was filed with the SEC on March 28, 2008.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates made by management include, but are not limited to, the valuation of inventory, valuation of deferred tax assets and liabilities, estimated useful lives of property, equipment and software, valuation of intangible assets, including goodwill, recoverability of software development costs, estimation of sales returns and allowances, and the provision for doubtful accounts. Actual results could differ from these estimates.

Seasonality

The Company has historically experienced seasonality in its business. The Company expects seasonality to continue in future years as automobile collisions during inclement weather generally create increased demand for auto body parts in winter months and consumers often undertake projects to maintain and enhance the performance of their automobiles in the summer months. The Company anticipates that seasonality will continue to have a material impact on the Company's financial condition and results of operations in future years.

Note 2 Fair Value Measurements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accordance with U.S. GAAP, and expands disclosures about fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. In February 2008, the FASB issued SFAS No. 157-2, *Effective Date of FASB Statement No. 157*, which delays the effective date of SFAS 157 to fiscal years beginning after November 15, 2008 for all nonfinancial assets and nonfinancial liabilities, except for those that are recognized or disclosed at fair value in the financial statements on a recurring basis. The Company has adopted the provisions of SFAS 157 as of January 1, 2008.

SFAS 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include:

Level 1- defined as observable inputs such as quoted prices in active markets;

Level 2- defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and

Level 3- defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Table of Contents

As of March 31, 2008, the Company held certain assets that are required to be measured at fair value on a recurring basis. These included the Company's financial instruments, including investments associated with the auction rate preferred securities. We measure the following financial assets at fair value on a recurring basis. The fair value of these financial assets was determined using the following inputs at March 31, 2008:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash and cash equivalents ⁽¹⁾	\$ 32,156	\$ 32,156	\$	\$
Non-current investments available-for-sale ⁽²⁾	7,601			7,601
Total	\$ 39,757	\$ 32,156	\$	\$ 7,601

⁽¹⁾ Cash and cash equivalents consist primarily of money market funds with original maturity dates of three months or less, for which we determine fair value through quoted market prices.

⁽²⁾ Investments available-for-sale consists of auction rate preferred securities (ARPS). ARPS are tax-exempt, long-term variable rate securities tied to short-term interest rates that are reset through a Dutch Auction process that occurs every seven days. The Company has the option to participate in the auction and sell ARPS to prospective buyers through a broker-dealer, but does not have the right to put the security back to the issuer. The investments in ARPS all had AAA credit ratings at the time of purchase and represent interests in collateralized debt obligations issued by municipal and state agencies. In the past, the auction process has allowed investors to obtain immediate liquidity if so desired by selling the securities at their face amounts. However, as has been recently reported in the financial press, the current disruptions in the credit markets have adversely affected the auction market for these types of securities. ARPS auctions fail when there are not enough buyers to absorb the amount of securities available for sale for that particular auction period. Historically, ARPS auctions have rarely failed since the investment banks and broker dealers have been willing to purchase the securities when investor demand was weak. However, beginning in mid-February 2008, due to uncertainty in the global credit and capital markets and other factors, investment banks and broker dealers have been less willing to support ARPS and many ARPS auctions have failed. The Company will not be able to access non-current investments until future auctions for these ARPS are successful, or until the Company sells the securities in a secondary market which currently is not active, although there have been certain instances of redemptions at par by municipalities through the refinancing of new instruments.

As of March 31, 2008, the Company had invested \$7.6 million in auction rate security instruments, which are classified as available for sale securities and reflected at fair value. The Company has included its investments related to ARPS in the Level 3 category. Before utilizing Level 3 inputs in our fair value measurement, the Company considered significant Level 2 observable inputs of similar assets in active and inactive markets. The Company's broker dealer received estimated market values from an independent pricing service as of the balance sheet date which carry these investments at par value due to the overall quality of the underlying investments and the anticipated future market for such investments. Further evidence includes the fact that these investments consist solely of collateralized debt obligations supported by municipal and state agencies; do not include mortgage-backed securities or student loans; have redemption features that call for redemption at 100% of par value; and have a current credit rating of A or AAA. However, the fact that there is not an active market to liquidate these certain investments was considered in classifying them as Level 3. Due to the uncertainty with regard to the short-term liquidity of these securities, the Company determined that it could not rely on par value to represent fair value. Therefore, the Company estimated the fair values of these securities utilizing a discounted cash flow valuation model as of March 31, 2008. This analysis considered the collateralization underlying the security investments, the creditworthiness of the counterparty, the timing of expected future cash flows, and the expectation of the next time the security is expected to have a successful auction. These securities were also compared, when possible, to other observable market data with similar characteristics to the securities held by the Company.

As a result of the temporary declines in fair value for the Company's ARPS, which the Company attributes to liquidity issues rather than credit issues, it has recorded an unrealized loss of \$149,000 to accumulated other comprehensive income. Due to the Company's belief that the market for these collateralized instruments may take in excess of twelve months to fully recover, the Company has classified these investments as

Edgar Filing: U.S. Auto Parts Network, Inc. - Form 10-Q

noncurrent and has included them in Investments on the unaudited Condensed Consolidated Balance Sheet at March 31, 2008. As of March 31, 2008, the Company continues to earn interest on all of its ARPS instruments. Any future fluctuation in fair value related to these instruments that the Company deems to be temporary, including any recoveries of previous write-downs, would be recorded to accumulated other comprehensive income. If the Company determines that any future valuation adjustment was other than temporary, it would record a charge to earnings as appropriate. The Company is not certain how long it may be

Table of Contents

required to hold each security. However, given the Company's current cash position, liquid cash equivalents and expected cash flow from operations, it believes it has the ability to hold, and intends to continue to hold the failed ARPS as long-term investments until the market stabilizes.

The following table presents the Company's assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as defined in SFAS 157 at March 31, 2008:

	Investments in Marketable Securities (in thousands)
Balance at December 31, 2007	\$
Transfers to Level 3	7,750
Unrealized losses recorded to other comprehensive loss	(149)
Balance at March 31, 2008	\$ 7,601

Note 3 Inventory

Inventories consist of finished goods available-for-sale and are stated at the lower of cost or market value, determined using the first in, first out (FIFO) method. The Company purchases inventory from suppliers both domestically and internationally. The Company believes that its inventoried products are generally available from more than one supplier and seeks to maintain multiple sources for its products, both internationally and domestically.

The Company primarily purchases products in bulk quantities to take advantage of quantity discounts and to improve inventory availability. Inventory is reported net of inventory reserves for excess or obsolete product, which are established based on specific identification of slow moving items and the evaluation of overstock considering anticipated sales levels. Gross inventory, inventory reserves and net inventory at March 31, 2008 and December 31, 2007 are as follows:

	March 31, 2008	December 31, 2007
	(unaudited) (in thousands)	
Gross inventory	\$ 13,382	\$ 11,794
Inventory reserves	(743)	(603)
Total net inventory	\$ 12,639	\$ 11,191

Note 4 Intangibles

Intangibles subject to amortization are expensed on a straight-line basis. Amortization expense relating to intangibles totaled \$2.1 million for the each of three months ended March 31, 2008 and 2007. Included in the intangible assets, assembled workforce was increased by \$140,000 and \$159,000 due to foreign currency fluctuations as of March 31, 2008 and December 31, 2007, respectively.

Table of Contents

Intangibles, excluding goodwill, consisted of the following at March 31, 2008 and December 31, 2007:

	Useful Life	(unaudited) March 31, 2008			December 31, 2007		
		Gross Carrying Amount	Accum. Amort.	Net Carrying Amount (in thousands)	Gross Carrying Amount	Accum. Amort.	Net Carrying Amount
Intangible assets subject to amortization:							
Websites	5 years	\$ 28,988	\$ (10,816)	\$ 18,172	\$ 28,988	\$ (9,367)	\$ 19,621
Software	2 - 5 years	4,089	(2,543)	1,546	4,089	(2,202)	1,887
Vendor agreements	3 years	2,996	(1,863)	1,133	2,996	(1,613)	1,383
Assembled workforce	7 years	1,426	(204)	1,222	1,446	(155)	1,291
Purchased domain names	3 years	175	(153)	22	175	(143)	32
		37,674	(15,579)	22,095	37,694	(13,480)	24,214
Intangible assets not subject to amortization:							
Domain names	indefinite life	2,230		2,230	2,230		2,230
Total		\$ 39,904	\$ (15,579)	\$ 24,325	\$ 39,924	\$ (13,480)	\$ 26,444

Note 5 Contingencies

The Company is subject to legal proceedings and claims which arise in the ordinary course of its business. Although occasional adverse decisions or settlements may occur, the potential loss, if any, cannot be reasonably estimated. However, the Company believes that the final disposition of such matters will not have a material adverse effect on the financial position, results of operations or cash flow of the Company with the exception of the items noted below. The Company maintains various liability insurance coverages to protect the Company's assets from losses arising out of or involving activities associated with ongoing and normal business operations.

Ford Global Technologies, LLC

On December 2, 2005, Ford Global Technologies, LLC (Ford) filed a complaint with the United States International Trade Commission (USITC) against the Company and five other named Respondents, including four Taiwan-based manufacturers. On December 12, 2005, Ford filed an Amended Complaint. Both the Complaint and the Amended Complaint contended that the Company and the other Respondents infringed 14 design patents that Ford alleges cover eight parts on the 2004-2005 Ford F-150 truck (the Ford Design Patents). Ford asked the USITC to issue a permanent general exclusion order excluding from entry into the United States all automotive parts that infringe the Ford Design Patents and that are imported into the United States, sold for importation in the United States, or sold within the United States after importation. Ford also sought a permanent order directing the Company and the other Respondents to cease and desist from, among other things, selling, marketing, advertising, distributing and offering for sale imported automotive parts that infringe the Ford Design Patents. On December 28, 2005, the USITC issued a Notice of Investigation based on Ford's Amended Complaint. The USITC's Notice of Investigation was published in the Federal Register on January 4, 2006.

On January 23, 2006, the Company filed its Response to the Complaint and Notice of Investigation. In the Response, the Company denied, among other things, that any of the Ford Design Patents is valid and/or enforceable and, accordingly, denied each and every allegation of infringement. The Company further asserted several affirmative defenses. In interlocutory rulings, the Administrative Law Judge (ALJ) struck the Company's affirmative defenses of patent exhaustion, permissible repair, license and patent misuse and Keystone's affirmative defense that each of the patents is invalid for failure to comply with the ornamentality requirement of 35 U.S.C. §171. Additionally, the ALJ granted Ford's request to drop four patents from the investigation. A hearing before the ALJ took place the last week of August 2006.

On December 4, 2006, the ALJ issued an Initial Determination upholding seven of Ford's design patents and declaring the remaining three design patents to be invalid. Both Ford and the Respondents petitioned the Commission to review and set aside portions of the ALJ's Initial Determination. The Company's petition also sought review of the ALJ's interlocutory rulings concerning certain of its affirmative defenses. On March 20, 2007, the USITC decided not to review the ALJ's Initial

Table of Contents

Determination. Initially, the USITC determined that it would render its order on remedy, bonding, and public policy on May 4, 2007. However, on April 30, 2007, the United States Supreme Court decided the case of *KSR International Co. v. Teleflex Inc.* (*KSR*), which addressed claims of obviousness in patent law and which may have had potential implications relative to the Respondent's case before the USITC. The Respondents filed a petition for reconsideration with the USITC on May 1, 2007 based on the decision in the *KSR* case. On May 4, 2007, the USITC extended the deadline for rendering its order on remedy, bonding, and public policy until June 6, 2007, so that it could review its decision not to review the ALJ's Initial Determination in light of the *KSR* case.

On June 6, 2007, the USITC issued its Notice of Final Determination. The Notice of Final Determination denied Respondent's petition for reconsideration and their motion for leave to supplement their petition. In addition, the USITC issued a general exclusion order prohibiting the importation of certain automotive parts found to infringe the seven Ford design patents found valid. The USITC's decision became final on August 6, 2007 upon the expiration without action of the 60-day Presidential review period. On May 18, 2007, Ford filed a Notice of Appeal with the United States Federal Circuit Court of Appeals with regard to the three patents declared invalid in the ALJ's Initial Determination. On August 23, 2007, the Respondents filed a Notice of Appeal with the United States Federal Court of Appeals. The appeals were consolidated, and the parties are submitting their respective briefs to the appellate court.

On May 2, 2008, Ford Global Technologies, LLC (*FGT*) filed with the United States International Trade Commission (*ITC*) another complaint under section 337 of the Tariff Act of 1930. The complaint alleges that the Company and seven other domestic and foreign entities import and sell certain automotive parts relating to the 2005 Ford Mustang that infringes eight *FGT* design patents. The *ITC* has 30 days from the date of filing to determine whether it is going to institute an investigation.

The Company will continue to defend this action vigorously. At the time the exclusion order was issued, the parts that are subject to the order comprised only a minimal amount of the Company's sales. However, as such parts become incorporated into more vehicles over time; it is likely that the amount of the Company's sales of such parts could have increased substantially. If the ten design patents in question are ultimately found on appeal to be valid and infringing, it is not anticipated that the loss of sales of these parts will be materially adverse to the Company's financial condition, cash flows or results of operations. However, depending upon the nature and extent of any adverse ruling, other auto manufacturers may attempt to assert similar allegations based upon design patents on a significant number of parts for several of their models, which over time could have a material adverse impact on the entire aftermarket parts industry.

Securities Litigation

On March 24, 2007, a putative stockholder class action lawsuit was filed against the Company and certain officers, directors and underwriters in the U.S. District Court for the Central District of California. The complaint alleged that the Company filed a false Registration Statement in connection with the Company's initial public offering in violation of Section 11 and Section 15 of the Securities Act of 1933, as amended (the Securities Act). On April 26, 2007, a second complaint containing substantially similar allegations was filed, and also included a claim under Section 12(a)(2) of the Securities Act. The complaints were consolidated on May 15, 2007. A lead plaintiff was selected on August 9, 2007. The amended consolidated complaint was filed on October 4, 2007, alleging violations of Sections 11, 12(a)(2) and 15 of the Securities Act. The amended complaint is against the Company and certain current and former officers, as well as Oak Investment Partners XI, LP, and the underwriters involved in the initial public offering. The amended consolidated complaint alleged that the Company's Registration Statement failed to disclose material information and misstated the Company's financial results. Plaintiffs sought compensatory damages, restitution, unspecified equitable relief, as well as attorneys' fees and costs. In January 2008, the parties reached a settlement in principle. A definitive settlement agreement was filed on May 1, 2008, which settlement is subject to Court approval. The Company's contribution to the settlement consideration of approximately \$3.8 million plus legal expenses has been accrued in the Company's financial statements as of March 31, 2008. The Company cannot guarantee that a court-approved settlement agreement will be obtained and therefore the Company could be subject to incur additional significant costs and or results in the further diversion of the attention of management and other key employees.

In August 2007, the Company also received a letter from the SEC that indicated that the SEC had commenced an informal inquiry into the events leading up to the Company's announcement on March 20, 2007 of its financial results for the fourth quarter and year ended December 31, 2006. The Company intends to fully cooperate with the SEC in this matter.

Table of Contents**Note 6 Comprehensive Income (Loss)**

The Company reports comprehensive income (loss) in accordance with SFAS No. 130, *Reporting Comprehensive Income*, which defines comprehensive income (loss) as non-stockholder changes in equity. Comprehensive income (loss) for the three month ended March 31, 2008 and 2007, respectively, includes the following:

	March 31, 2008 2007 (unaudited) (in thousands)	
Net income (loss)	\$ (875)	\$ 235
Unrealized loss on investments	(149)	
Foreign currency translation adjustments	(40)	9
Comprehensive income (loss)	\$ (1,064)	\$ 244

Note 7 Reserve For Sales Returns

Sales discounts are recorded in the period in which the related sale is recognized. Credits are issued to customers for returned products. Credits amounted to \$4.4 million and \$4.0 million for the three months ended March 31, 2008 and 2007, respectively. The Company's sales returns and allowances reserve totaled \$559,000 and \$710,000 at March 31, 2008 and December 31, 2007, respectively.

The following table provides an analysis of the reserve for sales returns:

	Balance at 12/31/07	Charged to Revenue	Deductions (in thousands)	Balance at 3/31/08
Three Months Ended March 31, 2008				
Reserve for sales returns	\$ 710	\$ (1,949)	\$ 1,798	\$ 559

Note 8 Income Taxes

For the quarter ended March 31, 2008 and 2007, the effective tax rate for the Company was 39.2% and 40.5%, respectively. The Company's effective tax rate is higher than the U.S. federal statutory rate primarily as a result of state income taxes, other non deductible permanent differences.

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109* (FIN 48), which became effective for the Company on January 1, 2007. FIN 48 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. As a result of the implementation of FIN 48, the Company recognized no material adjustment in the liability for unrecognized income tax benefits.

As of March 31, 2008, the Company has no material unrecognized tax benefits, interest or penalties related to various federal and state income tax matters. The Company's policy is to recognize accrued interest and penalties related to unrecognized tax benefits as income tax expense.

The Company is subject to U.S. federal income tax as well as income tax of foreign and state tax jurisdictions. The Company is currently open to audit under the statute of limitations by the Internal Revenue Service for the years ending December 31, 2004 through 2007. The Company's foreign and state income tax returns are open to audit under the statute of limitations for the years ending December 31, 2003 through 2007. The Company does not anticipate a significant change to the total amount of unrecognized tax benefits within the next 12 months.

Table of Contents**Note 9 Net Income (Loss) Per Share**

Net income (loss) per share has been computed in accordance with FASB Statement No. 128, *Earnings Per Share*. The following table sets forth the computation of basic and diluted net income per share:

Three Months Ended March 31,
2008 **2007**
(in thousands, except share and per share data)

(unaudited)

Net Income (Loss) Per Share

Numerator:		
Net income (loss)	\$ (875)	\$ 235
Denominator:		
Weighted-average common shares outstanding (basic)	29,846,757	23,491,850
Common equivalent shares from conversion of preferred stock		2,874,411
Common equivalent shares from common stock options and warrants		198,342
 Weighted-average common shares outstanding (diluted)	 29,846,757	 26,564,603
 Basic and diluted net income (loss) per share	 \$ (0.03)	 \$ 0.01

Note 10 Share-Based Compensation

The Company accounts for share-based compensation in accordance with SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS 123(R)), which was adopted on January 1, 2006. No stock options were granted prior to January 1, 2006. All stock options issued to employees are recognized as share-based compensation expense in the financial statements based on their respective grant date fair values, and are recognized within the statement of income as general and administrative, marketing, fulfillment or technology, based on employee departmental classifications.

Under SFAS 123(R), the fair value of each share-based payment award is estimated on the date of grant using an option pricing model that meets certain requirements. The Company currently uses the Black-Scholes option pricing model to estimate the fair value of share-based payment awards, with the exception of options granted containing market conditions, which the Company estimates the fair value using a Monte Carlo model. The determination of the fair value of share-based payment awards utilizing the Black-Scholes and Monte Carlo models is affected by the Company's stock price and a number of assumptions, including expected volatility, expected life, risk-free interest rate and expected dividends. As of March 31, 2008, the Company did not have an adequate history of market prices of its common stock as the Company only recently became a public company in February 2007, and as such the Company estimates volatility in accordance with Staff Accounting Bulletin No. 107 (SAB 107) using historical volatilities of similar public entities. The expected life of the awards is based on a simplified method which defines the life as the average of the contractual term of the options and the weighted average vesting period for all open tranches. The risk-free interest rate assumption is based on observed interest rates appropriate for the terms of awards. The dividend yield assumption is based on the Company's expectation of paying no dividends. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

For non-employees, the Company accounts for share-based compensation in accordance with EITF No. 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services*. Equity instruments awarded to non-employees are periodically remeasured as the underlying awards vest unless the instruments are fully vested, immediately exercisable and non-forfeitable on the date of grant.

There was \$8.1 million of unrecognized compensation expense related to stock options as of March 31, 2008, which expense is expected to be recognized over a weighted-average period of 3.3 years.

The Company granted 359,500 stock options under the 2007 Omnibus Incentive Plan during the three months ended March 31, 2008 at a weighted-average fair value of \$4.91 per share. The intrinsic value of stock options at the date of exercise is the difference between the fair value of the stock at the date of exercise and the exercise price. During the three months ended March 31, 2008, there were no exercises under the 2007 Omnibus Incentive Plan. Aggregate intrinsic value is calculated as the difference between the exercise price of the underlying awards and

Edgar Filing: U.S. Auto Parts Network, Inc. - Form 10-Q

the fair value price of the Company's common stock for options that were in-the-money as of March 31, 2008. No options outstanding at March 31, 2008 were in-the-money.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Cautionary Statement

You should read the following discussion and analysis in conjunction with our unaudited condensed consolidated financial statements and the related notes thereto contained in Part I, Item 1 of this report. The information contained in this Quarterly Report on Form 10-Q is not a complete description of our business or the risks associated with an investment in our common stock. We urge you to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the Securities and Exchange Commission, or SEC, including our Annual Report on Form 10-K for the year ended December 31, 2007 and subsequent reports on Forms 10-Q and 8-K, which discuss our business in greater detail. The section entitled Risk Factors set forth below, and similar discussions in our other SEC filings, describe some of the important risk factors that may affect our business, results of operations and financial condition. You should carefully consider those risks, in addition to the other information in this report and in our other filings with the SEC, before deciding to purchase, hold or sell our common stock.

Overview

We are a leading online provider of aftermarket auto parts, including body parts, engine parts and performance parts and accessories. Our user-friendly websites provide customers with a broad selection of SKUs, with detailed product descriptions and photographs. Our proprietary product database maps our SKUs to product applications based on vehicle makes, models and years. We principally sell our products to individual consumers through our network of websites and online marketplaces. Our flagship websites are located at www.partstrain.com and www.autopartswarehouse.com. We believe our strategy of disintermediating the traditional auto parts supply channels and selling products directly to customers over the Internet allows us to more efficiently deliver products to our customers while generating higher margins.

Our History. We were formed in 1995 as a distributor of aftermarket auto parts and launched our first website in 2000. We rapidly expanded our online operations, increasing the number of SKUs sold through our e-commerce network, adding additional websites, improving our Internet marketing proficiency and commencing sales in online marketplaces. As a result, our business has grown consistently since 2000, generating net sales of \$161.0 million for the year ended December 31, 2007.

Partsbin Acquisition. In May 2006, we completed the acquisition of Partsbin. As a result of this acquisition, we expanded our product offering and product catalog to include performance parts and accessories and additional engine parts, enhanced our ability to reach more customers, significantly increased our net sales and added a complementary, drop-ship order fulfillment method. Partsbin also expanded our international operations by adding a call center in the Philippines and an outsourced call center in India, as well as a Canadian subsidiary to facilitate sales in Canada. We also augmented our technology platform and expanded our management team. We may pursue additional acquisition opportunities in the future to increase our share of the aftermarket auto parts market or expand our product offerings.

International Operations. In April 2007, we entered into a purchase agreement to bring in-house certain sales and customer service employees based in the Philippines who were providing support to us through our outsourced call center provider, Access Worldwide. As of the closing of this transaction, approximately 171 of the Access Worldwide employees had agreed to transition over to direct employment by our Philippines subsidiary. The purchase price for the right to acquire this assembled workforce was approximately \$1.7 million. In addition to our Philippines operations, we have outsourced call center operations in India and own a Canadian subsidiary to facilitate sales of our products in Canada. We believe that the cost advantages of our offshore operations provide us with the ability to grow our business in a cost-effective manner, and we expect to continue to add headcount and infrastructure to our offshore operations.

New Chief Executive Officer. In October 2007, Shane Evangelist joined the Company as its Chief Executive Officer, succeeding Mehran Nia, who served as our President and Chief Executive Officer since founding U.S. Auto Parts in 1995. Mr. Nia continues to serve on our Board of Directors and has been working with Mr. Evangelist to facilitate an orderly transition of his responsibilities. Prior to joining us, Mr. Evangelist served as Senior Vice President and General Manager of BLOCKBUSTER Online where he was responsible for leading the creation, development and launch of Blockbuster Inc.'s online movie rental service.

Table of Contents**Critical Accounting Policies**

Our discussion and analysis of our financial condition and results of operations is based upon our unaudited condensed consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these unaudited condensed consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to revenue recognition, uncollectible receivables, intangible and other long-lived assets and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. There were no significant changes to our critical accounting policies during the three months ended March 31, 2008, as compared to those policies disclosed in our annual report on Form 10-K for the fiscal year ended December 31, 2007 except as noted below.

In September 2006, the FASB issued SFAS 157 which defines fair value, establishes a framework for measuring fair value in accordance with accounting principles generally accepted in the United States, and expands disclosures about fair value measurements. We have adopted the provisions of SFAS 157 as of January 1, 2008, for financial assets. SFAS 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1-defined as observable inputs such as quoted prices in active markets; Level 2-defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3-defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. We have evaluated both Level 2 and Level 3 evidence to measure the fair value of our \$7.6 million of auction rate preferred securities (ARPS) as of March 31, 2008. These investments consist solely of collateralized debt obligations supported by municipal and state agencies; do not include mortgage-backed securities or student loans; have redemption features that call for redemption at 100% of par value; and have a current credit rating of A or AAA. The fact that there is not an active market as of March 31, 2008 to liquidate these certain investments was the final determination in classifying them as Level 3. We used a discounted cash flow valuation model to estimate the fair value of the securities. As a result of the temporary declines in fair value of our ARPS, which we attribute to liquidity issues rather than credit issues, it has recorded an unrealized loss of \$149,000 to accumulated other comprehensive income.

Results of Operations

The following table sets forth certain statements of income data as a percentage of total net sales for the periods indicated:

	Three Months Ended March 31,			
	2008 (in thousands)	% of Net Sales	2007 (in thousands)	% of Net Sales
Net sales	\$ 40,009	100.0%	\$ 43,743	100.0%
Cost of sales	26,259	65.6	30,074	68.8
Gross profit	13,750	34.4	13,669	31.2
Operating expenses:				
General and administrative	4,623	11.6	2,876	6.6
Marketing	5,967	14.9	5,900	13.5
Fulfillment	2,088	5.2	1,717	3.9
Technology	684	1.7	449	1.0
Amortization of intangibles	2,099	5.2	2,054	4.7
Total operating expenses	15,461	38.6	12,996	29.7
Income (loss) from operations	(1,711)	(4.2)	673	1.5
Other income (expense):				
Other income	2	0.0	2	0.0
Interest expense, net	270	0.7	(280)	(0.6)

Edgar Filing: U.S. Auto Parts Network, Inc. - Form 10-Q

Other income (expense), net	272	0.7	(278)	(0.6)
Income (loss) before income taxes	(1,439)	(3.5)	395	0.9
Income tax provision (benefit)	(564)	(1.4)	160	0.4
Net income (loss)	\$ (875)	(2.1)%	\$ 235	0.5%

Table of Contents**Three Months Ended March 31, 2008 Compared to Three Months Ended March 31, 2007***Net Sales and Gross Margin*

	Three Months Ended March 31,		\$ Change	% Change
	2008	2007		
	(in thousands)			
Net sales	\$ 40,009	\$ 43,743	\$ (3,734)	(8.5)%
Cost of sales	26,259	30,074	3,815	12.7%
Gross profit	\$ 13,750	\$ 13,669	\$ 81	0.6%
Gross margin	34.4%	31.2%		3.1%

Net sales decreased \$3.7 million, or 8.5%, for the three months ended March 31, 2008 compared to the same period in the previous year, primarily due to a 10.1% decrease in our online business, which consists of our e-commerce and online marketplace channels. Our e-commerce channel includes a network of e-commerce websites, supported by our call-center sales agents who generate cross-sell and up-sell opportunities. We also sell our products through our online marketplaces, which primarily consist of auction and other third party websites.

E-commerce sales decreased \$2.1 million, or 6.5%, from \$33.3 million for the three months ended March 31, 2007 to \$31.1 million for the three months ended March 31, 2008. The decrease was primarily attributable to a decline in our average order value from \$129 per order at March 31, 2007 to \$126 per order at March 31, 2008 which was caused by a decrease in sales of our higher priced products. The total number of our placed orders in our e-commerce channel increased from 315,000 orders in the first quarter of 2007 to 320,000 orders in the first quarter of 2008 primarily due to higher website traffic (monthly unique visitors), better staffing and improvements in our call center, partially offset by a lower conversion rate.

Online marketplace sales decreased \$1.9 million, or 28.9%, from \$6.5 million for the three months ended March 31, 2007 to \$4.6 million in the current quarter. This decrease was primarily due to a lower number of completed auctions in our eBay channel.

Net sales of our Kool-Vue product line increased \$518,000, or 23.0%, to \$2.8 million for the three months ended March 31, 2008 compared to \$2.3 million for the same period in the previous year. There was no significant change in wholesale sales for the first quarter of 2008 compared to the first quarter of 2007. We anticipate that sales of our Kool-Vue product line and wholesale channel will decline as a percentage of net sales in the future primarily due to our online business. One significant Kool-Vue customer is expected to decrease its purchases from us in the second quarter and may ultimately terminate our business relationship. Net sales to this customer were approximately \$6.0 million in 2007.

We have historically experienced seasonality in our business. We expect seasonality to continue in future years as automobile collisions during inclement weather create increased demand for body parts in winter months, and consumers often undertake projects to maintain and enhance the performance of their automobiles in the summer months. We anticipate that seasonality will continue to have a material impact on our financial condition and results of operations during any given year.

While gross profit remained relatively constant given the decrease in net sales, gross margin increased in 2008 primarily due to increased prices, lower direct product cost, a higher portion of sales from direct ship and lower outbound freight costs.

Table of Contents*General and Administrative Expense*

	Three Months Ended March 31,		\$ Change	% Change
	2008	2007		
	(in thousands)			
General and administrative expense	\$ 4,623	\$ 2,876	\$ 1,747	60.7%
Percent of net sales	11.6%	6.6%		5.10%

General and administrative expenses increased \$1.7 million, or 60.7%, for the three months ended March 31, 2008 compared to the same period in the previous year. The increase in general and administrative reflects \$514,000 in higher payroll and related expenses due to increased headcount; \$191,000 of additional stock-based compensation expense; recruiting and relocation fees of \$166,000; an increase of \$676,000 related to administrative operating expenses including accounting, legal, SOX compliance, and insurance; increased amortization expense of \$201,000, partially offset by a \$208,000 reduction in merchant processing fees.

During the first quarter of 2008, we recognized share-based compensation of \$631,000, net of capitalized internally developed software, determined in accordance with SFAS 123(R). Based on options outstanding as of March 31, 2008, we expect to recognize additional share-based compensation expense of \$8.1 million in the following periods:

Nine months ending December 31, 2008	\$ 2,333
Year ending December 31, 2009	2,989
Year ending December 31, 2010	1,919
Year ending December 31, 2011	826
	\$ 8,067

We anticipate that we will incur increased general and administrative expenses in 2008 and future periods as we incur costs related to compliance with the Sarbanes-Oxley Act of 2002 and other public company compliance requirements, such as accounting and legal fees, higher insurance premiums, increased personnel and employee benefit costs and non-employee director costs. We expect that the costs of compliance associated with the transition to and operation as a public company, including the requirements relating to improving, documenting and testing our internal controls and procedures, will be significant.

Marketing Expense

	Three Months Ended March 31,		\$ Change	% Change
	2008	2007		
	(in thousands)			
Marketing expense	\$ 5,967	\$ 5,900	\$ 67	1.1%
Percent of net sales	14.9%	13.5%		1.4%

Marketing expenses increased \$67,000, or 1.1%, for the three months ended March 31, 2008 compared to the same period in the previous year. The increase in marketing expense for the first quarter of 2008 was primarily due to \$486,000 of additional sales and marketing employees in our Philippines operation compared to the first quarter of 2007; higher depreciation and operating expenses of \$313,000 due to the expansion of our call center facility; and an increase of \$97,000 in marketing services. This increase was partially offset by an \$876,000 decrease in advertising costs which reflects our decision to limit incremental spending on paid search to breakeven levels based on our estimated lifetime value of a customer.

Table of Contents*Fulfillment Expense*

	Three Months Ended March 31,		\$ Change	% Change
	2008	2007		
	(in thousands)			
Fulfillment expense	\$ 2,088	\$ 1,717	\$ 371	21.6%
Percent of net sales	5.2%	3.9%		1.3%

Fulfillment expense increased \$371,000, or 21.6%, for the three months ended March 31, 2008 compared to the same period in the previous year, primarily due to a \$216,000 increase in personnel costs that was largely related to the hiring of additional warehouse and purchasing personnel to support our increased direct distribution of performance parts and accessories and an increase of \$129,000 in depreciation expense. Our fulfillment costs may increase if we open a stand-alone distribution center on the East Coast to complement our existing facilities.

Technology Expense

	Three Months Ended March 31,		\$ Change	% Change
	2008	2007		
	(in thousands)			
Technology expense	\$ 684	\$ 449	\$ 235	52.3%
Percent of net sales	1.7%	1.0%		0.7%

Technology expense increased \$235,000, or 52.3%, for the three months ended March 31, 2008 compared to the same period in the previous year, primarily due to \$194,000 of higher payroll and related expenses to support our expanded infrastructure. During 2008, we expect technology expense as a percent of net sales to continue to increase in absolute dollars due to the hiring of additional programmers and key management and increased investment in our overall technology platform.

Amortization of Intangibles

	Three Months Ended March 31,		\$ Change	% Change
	2008	2007		
	(in thousands)			
Amortization of intangibles	\$ 2,099	\$ 2,054	\$ 45	2.2%
Percent of net sales	5.2%	4.7%		0.5%

Amortization of intangibles increased \$45,000, or 2.2%, for the three months ended March 31, 2008 compared to the same period in the previous year. This increase was primarily due to the intangible assets acquired pursuant to the acquisition of the assembled workforce in April 2007. We preliminarily estimate aggregate amortization expense for the remaining nine months ending December 31, 2008, and the years ending December 31, 2009, 2010, 2011 and thereafter to be approximately \$6.2 million, \$6.9 million, \$6.0 million, \$2.4 million and \$450,000, respectively.

Other Income (Expense), Net

	Three Months Ended March 31,		\$ Change	% Change
	2008	2007		
	(in thousands)			
Other income (expense), net	\$ 272	\$ (278)	\$ 550	197.9%
Percent of net sales	0.7%	(0.6)%		1.3%

Edgar Filing: U.S. Auto Parts Network, Inc. - Form 10-Q

Other income (expense), net increased \$550,000 or 197.9%, for the three months ended March 31, 2008 compared to the same period in the previous year primarily due to \$561,000 reduction of interest expense due to the repayment of approximately \$28.0 million of our long-term indebtedness upon completion of our initial public offering in February 2007 and the interest income generated from investing available cash.

Table of Contents

Liquidity and Capital Resources

Sources of Liquidity

We have historically funded our operations from cash generated from operations, credit facilities, bank and stockholder loans, an equity financing and capital lease financings. At March 31, 2008, we had no balance outstanding under term loans or our bank line of credit, which expires on October 30, 2009 and bears interest at prime minus 0.5%.

Cash Flows

We had cash and cash equivalents of \$32.2 million as of March 31, 2008, representing a \$9.9 million decrease from \$42.1 million of liquid assets as of December 31, 2007. The decrease in our cash and cash equivalents as of March 31, 2008 was primarily due to a reclassification of our investments in ARPS to long-term assets totaling \$7.6 million.

Operating Activities

We used \$91,000 of net cash from operating activities for the three months ended March 31, 2008. The significant components of cash flows from operating activities were a net loss of \$875,000; a decrease of \$1.4 million in inventory; a decrease of \$1.3 million in other current assets and liabilities; offset by \$2.9 million in non-cash depreciation and amortization expense and \$631,000 of non-cash stock-based compensation expense.

Investing Activities

Cash provided by investing activities during the three months ended March 31, 2008 totaled \$13.9 million and was primarily attributable to our net change in investments of \$14.9 million in ARPS and purchases of \$1.0 million of property and equipment.

Financing Activities

Cash used in financing activities during the three months ended March 31, 2008 totaled \$1.0 million and was primarily due to repayments made on notes payable.

Funding Requirements

We had working capital of \$34.3 million as of March 31, 2008, which was primarily due to the cash generated from our initial public offering. The historical seasonality in our business during the fourth and first calendar quarters of each year cause cash and cash equivalents, inventory and accounts payable to be generally higher in these quarters, resulting in fluctuations in our working capital. We anticipate that funds generated from operations, cash on hand and funds available under our line of credit will be sufficient to meet our working capital needs and expected capital expenditures for at least the next twelve months. Our future capital requirements may, however, vary materially from those now planned or anticipated. Changes in our operating plans, lower than anticipated net sales, increased expenses or other events, including those described in Risk Factors, may cause us to seek additional debt or equity financings in the future. Financings may not be available on acceptable terms, on a timely basis, or at all, and our failure to raise adequate capital when needed could negatively impact our growth plans and our financial condition and results of operations. In addition, our \$7.6 million of short-term investments as of March 2008 was reclassified as long-term investments as a result of failed auctions and liquidity issues and we may not have access to those funds.

We are currently evaluating the feasibility of opening a new distribution center which would result in a significant capital investment, should we move forward with these plans.

Seasonality

We believe our business is subject to seasonal fluctuations. We have historically experienced higher sales of body parts in winter months when inclement weather and hazardous road conditions typically result in more automobile collisions. Engine parts and performance parts and accessories have historically experienced higher sales in the summer months when consumers have more time to undertake elective projects to maintain and enhance the performance of their automobiles and the warmer weather during that time is conducive for such projects. We expect the historical seasonality trends to continue to have a material impact on our financial condition and results of operations in any given year.

Inflation

Inflation has not had a material impact upon our operating results, and we do not expect it to have such an impact in the near future. We cannot assure you that our business will not be affected by inflation in the future.

Table of Contents**ITEM 3. Quantitative and Qualitative Disclosures about Market Risk**

Market risk represents the risk of loss that may impact our financial position, results of operations or cash flows due to adverse changes in financial commodity market prices and rates. We are exposed to market risk primarily in the area of changes in United States interest rates and conditions in the credit markets. We also have some exposure related to foreign currency fluctuations. We do not have other derivative financial instruments. Under our current policies, we do not use interest rate derivative instruments to manage exposure to interest rate changes. We attempt to increase the safety and preservation of our invested principal funds by limiting default risk, market risk and reinvestment risk. We mitigate default risk by investing in investment grade securities.

Interest Rate Risk. All of our investments are classified as available-for-sale and therefore reported on the balance sheet at market value. Our investment securities consist of high-grade auction rate preferred securities. As of March 31, 2008, our long-term investments included \$7.6 million of investments in ARPS which hold high-grade (AAA rated) debt issued by municipalities. Our ARPS are invested in debt instruments with a long-term maturity and with an interest rate that is reset in short intervals through auctions. The recent conditions in the global credit markets have prevented some investors from liquidating their holdings of ARPS because the amount of securities submitted for sale has exceeded the amount of purchase orders for these securities. If there is insufficient demand for the securities at the time of an auction, the auction may not be completed and the interest rates may be reset to predetermined higher rates. When auctions for these securities fail, the investments may not be readily convertible to cash until a future auction of these investments is successful or they are redeemed or mature. If the credit ratings of the security issuers deteriorate and any decline in market value is determined to be other-than-temporary, we would be required to adjust the carrying value of the investment through an impairment charge. We have recorded \$149,000 of unrealized losses on our investment portfolio as of March 31, 2008.

On February 13, 2008, we were informed that there was insufficient demand at auctions for four of our high-grade ARPS, representing approximately \$7.8 million. As a result, these affected securities are currently not liquid and the interest rates have been reset to the predetermined higher rates.

In the event we need to access the funds that are in an illiquid state, we will not be able to do so without the possible loss of principal, until a future auction for these investments is successful or they are redeemed by the issuer. At this time, management has not obtained sufficient evidence to conclude that these investments are impaired or that they will not be settled in the short term, although the market for these investments is presently uncertain. If we are unable to sell these securities in the market or they are not redeemed, then we may be required to hold them indefinitely. We do not have a need to access these funds for operational purposes for the foreseeable future. We will continue to monitor and evaluate these investments on an ongoing basis for impairment or for a short-term to long-term reclassification. Based on our ability to access our cash and other short-term investments, our expected cash flows, and our other sources of cash, we do not anticipate that the potential illiquidity of these investments will affect our ability to execute our current business plan.

Pursuant to the terms of our line of credit with our principal lender, changes in the prime rate or monthly LIBOR rate could affect the existing rate of our outstanding loans and the rates at which we could borrow funds under our line of credit. At March 31, 2008, we had no outstanding borrowings under our line of credit with this lender.

Foreign Currency Risk. Our purchases of auto parts from our Asian suppliers are denominated in U.S. dollars; however a change in the foreign currency exchange rates could impact our product costs over time. While our operating expenses in the Philippines are generally paid in Philippine pesos, and Canadian website sales are denominated in Canadian dollars, fluctuations in currency rates have only had a nominal impact on our operations historically.

ITEM 4. Controls and Procedures***Evaluation of Disclosure Controls and Procedures***

We carried out an evaluation required by the Securities Exchange Act of 1934 (the "1934 Act"), under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rule 13a-15(e) of the 1934 Act, as of the end of the period covered by this report.

Disclosure control and procedures provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the 1934 Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and to provide reasonable assurance that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Table of Contents

Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were not effective at the reasonable assurance level because of the identification of certain material weaknesses in our internal control over financial reporting, as described in our 2007 Form 10-K, which we view as an integral part of our disclosures controls and procedures.

Changes in Internal Control of Financial Reporting

During the most recent fiscal quarter, there has not occurred any change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

However, to address the identified material weakness, we are in the process of implementing remediation plans, including the following:

We hired several key finance and accounting professionals in the first three months of 2008 and we plan to hire additional accounting resources in the second half of 2008.

Additional information systems executives have been hired who are evaluating our current systems, including necessary alternatives.

We completed our documentation of policies and procedures, risk control matrices, gap analysis, and initial remediation plans and are in the process of implementing those plans and testing key controls.

Inherent Limitations on Internal Controls

Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives as specified above. Management does not expect, however, that our disclosure controls and procedures will prevent or detect all error and fraud. Any control system, no matter how well designed and operated, is based upon certain assumptions and can provide only reasonable, not absolute, assurance that its objectives will be met. Further, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected.

PART II. Other Information

ITEM 1. Legal Proceedings

The information set forth under Note 5 of Notes to Unaudited Condensed Consolidated Financial Statements, included in Part I, Item I of this report, is incorporated herein by reference.

ITEM 1A. Risk Factors

Our business is subject to a number of risks, some of which are discussed below. Other risks are presented elsewhere in this report and in the information incorporated by reference into this report. You should consider carefully the following risks in addition to the other information contained in this report and our other filings with the SEC, including our subsequent reports on Forms 10-Q and 8-K, and amendments thereto, before deciding to buy, sell or hold our common stock.

Table of Contents

The risks and uncertainties described below are not the only ones facing our company. Additional risks and uncertainties not presently known to us or that we currently believe are not important may also impair our business operations. If any of the following risks actually occur, our business, financial condition or results of operations could be materially adversely affected, the value of our common stock could decline and you may lose all or part of your investment.

Purchasers of aftermarket auto parts may not choose to shop online, which would prevent us from acquiring new customers who are necessary to the growth of our business.

The online market for aftermarket auto parts is less developed than the online market for many other business and consumer products. Our success will depend in part on our ability to attract new customers and customers who have historically purchased auto parts through traditional retail and wholesale operations. Furthermore, we may have to incur significantly higher and more sustained advertising and marketing expenditures or may need to price our products more competitively than we currently anticipate in order to attract additional online consumers and convert them into purchasing customers. Specific factors that could prevent prospective customers from purchasing from us include:

concerns about buying auto parts without face-to-face interaction with sales personnel;

the inability to physically handle, examine and compare products;

delivery time associated with Internet orders;

concerns about the security of online transactions and the privacy of personal information;

delayed shipments or shipments of incorrect or damaged products;

increased shipping costs; and

the inconvenience associated with returning or exchanging items purchased online.

If the online market for auto parts does not gain widespread acceptance, our sales may decline and our business and financial results may suffer.

We depend on search engines and other online sources to attract visitors to our websites, and if we are unable to attract these visitors and convert them into customers in a cost-effective manner, our business and results of operations will be harmed.

Our success depends on our ability to attract online consumers to our websites and convert them into customers in a cost-effective manner. We are significantly dependent upon search engines, shopping comparison sites and other online sources for our website traffic. We are included in search results as a result of both paid search listings, where we purchase specific search terms that will result in the inclusion of our listing, and algorithmic searches that depend upon the searchable content on our sites. Algorithmic listings cannot be purchased and instead are determined and displayed solely by a set of formulas utilized by the search engine. We rely on both algorithmic and purchased listings to attract and direct consumers to our websites. Search engines, shopping comparison sites and other online sources revise their algorithms from time to time in an attempt to optimize their search results. Recently, a search engine changed its algorithm for natural search which significantly reduced traffic to many of our websites. If one or more of the search engines, shopping comparison sites or other online sources on which we rely for website traffic were to modify its general methodology for how it displays or selects our websites, resulting in fewer consumers clicking through to our websites, our financial results could be adversely affected. We operate a multiple website platform that generally allows us to provide multiple search results for a particular algorithmic search. If the search engines were to limit our display results to a single result or entirely eliminate our results from the algorithmic search, our website traffic would significantly decrease and our business would be materially harmed. If any free search engine or shopping comparison site on which we rely begins charging fees for listing or placement, or if one or more of the search engines, shopping comparison sites and other online sources on which we rely for purchased listings, modifies or terminates its relationship with

us, our expenses could rise, we could lose customers and traffic to our websites could decrease. In addition, our success in attracting visitors who convert to customers will depend in part upon our ability to identify and purchase relevant search terms, provide relevant content on our sites, and effectively target our other marketing programs such as e-mail campaigns and affiliate programs. If we are unable to attract visitors to our websites and convert them to customers in a cost-effective manner, then our sales may decline and our business and financial results may be harmed.

If we are unable to manage the challenges associated with our international operations, the growth of our business could be limited and our business could suffer.

We maintain business operations in the United States and the Philippines and an outsourced call center in India. These international operations include development and maintenance of our websites, Internet marketing personnel, and sales and

Table of Contents

customer support services. We also operate a Canadian subsidiary to facilitate sales in Canada. We are subject to a number of risks and challenges that specifically relate to our international operations. Our international operations may not be successful if we are unable to meet and overcome these challenges, which could limit the growth of our business and may have an adverse effect on our business and operating results. These risks and challenges include:

difficulties and costs of staffing and managing foreign operations;

restrictions imposed by local labor practices and laws on our business and operations;

exposure to different business practices and legal standards;

unexpected changes in regulatory requirements;

the imposition of government controls and restrictions;

political, social and economic instability and the risk of war, terrorist activities or other international incidents;

the failure of telecommunications and connectivity infrastructure;

natural disasters and public health emergencies;

potentially adverse tax consequences;

the failure of local laws to provide a sufficient degree of protection against infringement of our intellectual property; and

fluctuations in foreign currency exchange rates.

Negative conditions in the global credit markets may impair the liquidity of a portion of our investments portfolio.

Our investment securities consist of high-grade ARPS. As of March 31, 2008, our long-term marketable securities were comprised of \$7.6 million of high-grade (AAA rated) ARPS issued primarily by close end funds that primarily hold debt obligations from municipalities. The recent negative conditions in the global credit markets have prevented some investors from liquidating their holdings, including their holdings of ARPS. In response to the credit situation, on February 8, 2008, we instructed our investment advisor to liquidate all our investments in close end funds and move these funds into money market investments. On February 13, 2008, we were informed that there was insufficient demand at auction for our remaining four high-grade ARPS, representing approximately \$7.8 million. As a result, these affected securities currently are not liquid, and we do not know when we will have access to the capital in these investments. In the event we need to access the funds that are in an illiquid state, we will not be able to do so without a loss of principal or until a future auction on these investments is successful, the securities are redeemed by the issuer or a secondary market emerges. If we cannot readily access these funds, we may be required to borrow funds or issue additional debt or equity securities to meet our capital requirements. At this time, management has not obtained sufficient evidence to conclude that these investments are impaired or that they will not be settled in the short term, although the market for these investments is presently uncertain. If the credit ratings of the security issuers deteriorate and any decline in market value is determined to be other-than-temporary, we would be required to adjust the carrying value of the investment through an impairment charge.

Challenges by Original Equipment Manufacturers (OEMs) to the validity of aftermarket auto parts industry and claims of intellectual property infringement could adversely affect our business and the viability of the aftermarket auto parts industry.

OEMs have attempted to use claims of intellectual property infringement against manufacturers and distributors of aftermarket auto parts to restrict or eliminate the sale of aftermarket auto parts that are the subject of the claims. We have received in the past, and we anticipate we may in the future receive, communications alleging that certain products we sell infringe third-party patents, copyrights, trademarks and trade names or other intellectual property rights. For example, in December 2005, Ford Global Technologies, LLC filed a complaint with the United States International Trade Commission (USITC or the Commission), against us and five other named respondents, including four Taiwan-based manufacturers. Ford alleged in this action that we and the other respondents infringed 14 design patents, or the Ford Design Patents (four of which were subsequently dropped from the investigation at Ford's request) that Ford claims cover eight parts for the 2004-2005 Ford F-150 truck. Ford asked the USITC to issue a permanent general exclusion order excluding from entry into the United States all auto parts that infringe the ten Ford design patents and that are imported into the United States, sold for importation in the United States, or sold within the United States after importation. Ford also sought a permanent order directing us and the other respondents to cease and desist from, among other things, selling, marketing, advertising, distributing and offering for sale imported auto parts that infringe the design patents. The administrative law judge issued an initial determination on December 4, 2006 finding three of the ten Ford Design Patents invalid, but upholding the validity and

Table of Contents

enforceability of the other seven Ford Design Patents. The judge further ruled that the importation of automotive parts allegedly covered by these seven patents violates Section 337 of the Tariff Act of 1930, as amended. This initial determination was subject to review by the USITC but became final upon notice by the USITC in March 2007 of its decision not to review the determination made by the administrative law judge.

On May 1, 2007, we and other respondents petitioned the USITC to reconsider its March 2007 ruling not to review the determination made by the ALJ regarding the seven Ford Design Patents found valid and infringed, in light of the U.S. Supreme Court's April 30, 2007 decision in *KSR International, Inc. v. Teleflex, Inc.* The USITC issued a Notice of Commission Determination To Waive Reconsideration Rule Deadline And To Extend Target Date on May 4, 2007. In this Notice, the USITC indicated that it would consider the petition and extended the target date for issuing a final order to June 6, 2007. On June 6, 2007, the USITC denied the petition for reconsideration, terminated its investigation and issued a general exclusion order. The USITC denied Ford's request for a cease and desist order. The general exclusion order prohibits the importation, sale for importation, or sale in the United States after importation of aftermarket collision parts that infringe any of Ford's seven design patents previously determined to be valid. The final determination by the USITC was subject to review by the President of the United States, who is authorized to disapprove Commission orders for policy considerations. The mandatory 60-day Presidential review period ended on August 6, 2007 without the President taking any action.

While the portion of the Commission's March 20, 2007 ruling finding a violation of Section 337 did not become final appealable order until the end of the Presidential review period, the Commission's finding of no violation of Section 337 as to the three of Ford's Design Patents held invalid was not subject to Presidential review, and became a final appealable order as of March 20, 2007. Accordingly, on May 18, 2007, Ford filed a Petition For Review at the United States Court of Appeals for the Federal Circuit seeking review and reversal of the portion of the USITC's March 20, 2007 final determination that concluded three of the Ford Design Patents were invalid.

On August 23, 2007, we also appealed to the United States Court of Appeals for the Federal Circuit, seeking a review and reversal of the portion of the USITC's March 20, 2007 final determination finding a violation of Section 337. Ford's Petition for Review and our appeal have been consolidated and are currently pending before the United States Court of Appeals for the Federal Circuit.

To date, our sales of these parts have been minimal, but as the design for the 2004 model is incorporated into later year models of the F-150 and these trucks have been on the road longer, sales of aftermarket replacement parts for these trucks may increase substantially. Furthermore, if Ford continues to pursue, expands or escalates its claims against us, if there is an unfavorable outcome of the pending appeal, or if other OEMs commence similar actions, and any of them are successful in these actions, we could be restricted or prohibited from selling certain aftermarket products and the aftermarket auto parts industry could decline significantly, which could have a material adverse effect on our business, financial condition and results of operations.

On May 2, 2008, Ford Global Technologies, LLC (FGT) filed with the United States International Trade Commission (ITC) another complaint under section 337 of the Tariff Act of 1930. The complaint alleges that the Company and seven other domestic and foreign entities import and sell certain automotive parts relating to the 2005 Ford Mustang that infringes eight FGT design patents. The ITC has 30 days from the date of filing to determine whether it is going to institute an investigation.

Future infringement claims could also result in increased costs of doing business arising from increased legal expenses, adverse judgments or settlements or changes to our business practices required to settle such claims or satisfy any judgments. Litigation could result in interpretations of the law that require us to change our business practices or otherwise increase our costs and harm our business. We do not maintain insurance coverage to cover the types of claims that could be asserted. If a successful claim were brought against us, it could expose us to significant liability.

Our future operating results may fluctuate and may fail to meet market expectations, which could adversely affect the market price of our common stock.

We expect that our revenue and operating results will continue to fluctuate from quarter to quarter due to various factors, many of which are beyond our control. If our quarterly revenue or operating results fall below the expectations of investors or securities analysts, the price of our common stock could significantly decline. In March 2007, our stock price decreased by approximately 45% following our announcement that our financial results for the quarter ended December 31, 2006 did not meet analysts' expectations. Since our initial public offering in February 2007, the sales price per share of our common stock has fluctuated between a high of \$12.61 and a low of \$2.13. The factors that could cause our operating results to continue to fluctuate include, but are not limited to:

fluctuations in the demand for aftermarket auto parts;

Table of Contents

price competition on the Internet or among offline retailers for auto parts;

our ability to attract visitors to our websites and convert those visitors into customers;

our ability to maintain and expand our supplier and distribution relationships;

the effects of seasonality on the demand for our products;

our ability to accurately forecast demand for our products, price our products at market rates and maintain appropriate inventory levels;

our ability to build and maintain customer loyalty;

infringement actions that could impact the viability of the auto parts aftermarket, or portions thereof;

the success of our brand-building and marketing campaigns;

our ability to accurately project our future revenues, earnings, and results of operations;

government regulations related to use of the Internet for commerce, including the application of existing tax regulations to Internet commerce and changes in tax regulations;

technical difficulties, system downtime or Internet brownouts; and

the amount and timing of operating costs and capital expenditures relating to expansion of our business, operations and infrastructure.

We are dependent upon relationships with suppliers in Taiwan, China and the United States for the vast majority of our products.

We acquire substantially all of our products from manufacturers and distributors located in Taiwan, China and the United States. Our top ten suppliers represented approximately 65.4% of our total product purchases during the three months ended March 31, 2008. We do not have any long-term contracts or exclusive agreements with our foreign suppliers that would ensure our ability to acquire the types and quantities of products we desire at acceptable prices and in a timely manner. We continue to enter into supply agreements with our U.S. based suppliers and our primary drop-ship vendors. In addition, our ability to acquire products from our suppliers in amounts and on terms acceptable to us is dependent upon a number of factors that could affect our suppliers and which are beyond our control. For example, financial or operational difficulties that some of our suppliers may face could result in an increase in the cost of the products we purchase from them. In addition, the increasing consolidation among auto parts suppliers may disrupt or end our relationship with some suppliers, result in product shortages and/or could lead to less competition and, consequently, higher prices.

In addition, because many of our suppliers are outside of the United States, additional factors could interrupt our relationships or affect our ability to acquire the necessary products on acceptable terms, including:

Edgar Filing: U.S. Auto Parts Network, Inc. - Form 10-Q

political, social and economical instability and the risk of war or other international incidents in Asia or abroad;

fluctuations in foreign currency exchange rates that may increase our cost of products;

tariffs and protectionist laws and business practices that favor local businesses;

difficulties in complying with import and export laws, regulatory requirements and restrictions; and

natural disasters and public health emergencies.

If we do not maintain our relationships with our existing suppliers or develop relationships with new suppliers on acceptable commercial terms, we may not be able to continue to offer a broad selection of merchandise at competitive prices and, as a result, we could lose customers and our sales could decline.

Two class action lawsuits have been filed against us and certain of our officers and directors and there is an SEC informal inquiry into this matter, which has resulted and may continue to result in significant costs and a diversion of our management's efforts.

We and certain of our officers, directors and underwriters were served with two complaints associated with class action lawsuits alleging violations of federal securities law in connection with our initial public offering. In January 2008, we and the lead plaintiff's counsel reached a non-binding proposed settlement agreement under a memorandum of understanding (MOU), which outlines the general terms to be included in the binding agreement. We entered into a settlement agreement in this regard in May 2008, but such settlement remains subject to court approval under such agreement, a settlement

Table of Contents

payment of \$10.0 million will be paid to the lead plaintiff's counsel within thirty days of a court-approved settlement. We will be responsible for \$3.8 million of the settlement payment and have included a reserve for this expense in our financial results as of March 31, 2008. We cannot assure you that a court-approved settlement will be obtained, and therefore we could be subject to incur additional significant costs and/or result in the further diversion of the attention of management and other key employees. In August 2007, we also received a letter from the SEC indicating that the SEC had commenced an informal inquiry into the events leading up to our announcement on March 20, 2007 of our financial results for the fourth quarter and year ended December 31, 2006. We intend to fully cooperate with the SEC in this matter and prepared and submitted a response to the SEC in September 2007. The preparation of additional responses in connection with the SEC inquiry and any unfavorable outcome could result in significant costs that could have a material adverse effect on our business.

We face intense competition and operate in an industry with limited barriers to entry, and some of our competitors may have greater resources than us and may be better positioned to capitalize on the growing e-commerce auto parts market.

The auto parts industry is competitive and highly fragmented, with products distributed through multi-tiered and overlapping channels. We compete with both online and offline retailers who offer OEM and aftermarket auto parts to either the DIY or DIFM customer segments. Current or potential competitors include the following:

national auto parts retailers such as Advance Auto Parts, AutoZone, CSK Auto, Napa Auto Parts, O'Reilly Automotive and Pep Boys;

large online marketplaces such as Amazon.com and eBay;

online competitors;

local independent retailers or niche auto parts online retailers; and

wholesale auto parts distributors such as LKQ Corporation.

Barriers to entry are low, and current and new competitors can launch websites at a relatively low cost. Many of our current and potential offline competitors have longer operating histories, larger customer bases, greater brand recognition and significantly greater financial, marketing, technical, management and other resources than we do. In addition, some of our competitors have used and may continue to use aggressive pricing tactics and devote substantially more financial resources to website and system development than we do. We expect that competition will further intensify in the future as Internet use and online commerce continue to grow worldwide. Increased competition may result in reduced operating margins, reduced profitability, loss of market share and diminished brand recognition.

We would also experience significant competitive pressure if any of our suppliers were to sell their products directly to customers. Since our suppliers have access to merchandise at very low costs, they could sell products at lower prices and maintain higher gross margins on their product sales than we can. In this event, our current and potential customers may decide to purchase directly from these suppliers. Increased competition from any supplier capable of maintaining high sales volumes and acquiring products at lower prices than us could significantly reduce our market share and adversely impact our financial results.

Our integration of Partsbin has been time consuming and expensive, and may not be successful in the long run, if at all.

In May 2006, we completed the acquisition of Partsbin, an online retailer of aftermarket auto parts. As a result of the acquisition, we added 47 employees, and our available SKUs and net sales increased significantly. The acquisition of Partsbin has involved significant costs, has resulted in challenges integrating the diverse technologies used by each company and has placed, and may continue to place, pressures on our operational and financial infrastructure. We cannot assure you that our current cost structure or infrastructure will be adequate for the combined companies. To successfully integrate Partsbin, we need to continue to improve our operational and financial systems, procedures and controls and maintain our cost structure at appropriate levels.

The Partsbin acquisition also expanded our product offerings, particularly in the area of engine parts and performance parts and accessories, and significantly increased our use of drop-ship as a method of fulfillment. We cannot assure you that we can effectively manage this new

fulfillment model or address the market for these additional auto parts.

The integration of Partsbin has, and may continue to, involve the consolidation of diverse business cultures and technology infrastructures, require substantial time and expenses, and distract management from other business matters. In addition, this acquisition includes significant intangible assets that are subject to periodic impairment testing which could result in substantial accounting charges. In early 2007, we discovered some integration issues related to the Partsbin acquisition that were largely related to lower than expected order fill rates from drop-ship vendors in the fourth quarter of 2006 and lower pricing levels on our performance parts and accessories product category in the first quarter of 2007, which negatively impacted our gross margins during the second half of 2007. We cannot assure you that we will be able to adequately address these or other integration issues related to this acquisition.

Table of Contents

Economic conditions may have an adverse effect on the demand for aftermarket auto parts and could adversely affect our sales and operating results.

We sell aftermarket auto parts consisting of body and engine parts used for repair and maintenance, performance parts used to enhance performance or improve aesthetics and accessories that increase functionality or enhance a vehicle's features. Demand for our products may be adversely affected by general economic conditions. In declining economies, consumers often defer regular vehicle maintenance and may forego purchases of nonessential performance and accessories products, which can result in a decrease in demand for auto parts in general. In expanding economies, consumers may be more likely to purchase new vehicles instead of repairing existing vehicles or they may be less price sensitive, leading to an increase in OEM parts sales at dealerships, either of which could also result in a decline in our sales. If such decreases in demand for our products are not offset by other factors, such as the deferral of new car purchases in declining economies, which may result in more required repairs for older vehicles, or the purchase of performance parts and accessories in expanding economies, our financial condition and results of operations would suffer.

If our product catalog database is stolen, misappropriated or damaged, or if a competitor is able to create a substantially similar catalog without infringing our rights, then we may lose an important competitive advantage.

We have invested significant resources and time to build and maintain our product catalog, which is maintained in the form of an electronic database, and maps SKUs to relevant product applications based on vehicle makes, models and years. We believe that our product catalog provides us with an important competitive advantage in both driving traffic to our websites and converting that traffic to revenue by enabling customers to quickly locate the products they require. We cannot assure you that we will be able to protect our product catalog from unauthorized copying or theft by a third party or that our product catalog will continue to operate adequately, without any technological challenges. In addition, it is possible that a competitor could develop a catalog or database that is similar to or more comprehensive than ours, without infringing our rights. In the event our product catalog is damaged or is stolen, copied or otherwise replicated by a competitor, whether lawfully or not, we may lose an important competitive advantage and our business could be harmed.

We rely on key personnel and may need additional personnel for the success and growth of our business.

Our business is largely dependent on the personal efforts and abilities of key personnel including Shane Evangelist, our Chief Executive Officer, and Michael McClane, our Chief Financial Officer, Executive Vice President of Finance, Treasurer and Secretary. Messrs. Evangelist, and McClane, as well as any of our other key employees, can terminate their employment relationship with us at any time. We do not maintain key person life insurance on any officer or employee. Our performance also depends on our ability to identify, attract, retain and motivate highly skilled technical, managerial, merchandising, marketing and call center personnel. Competition for such personnel is intense, and we cannot assure you that we will be successful in attracting and retaining such personnel. The loss of any key employee or our inability to attract or retain other qualified employees could harm our business and results of operations.

If our fulfillment operations are interrupted for any significant period of time or are not sufficient to accommodate increased demand, our sales would decline and our reputation could be harmed.

Our success depends on our ability to successfully receive and fulfill orders and to promptly deliver our products to our customers. The majority of orders for our auto body parts products are filled from our inventory in our distribution centers, where all our inventory management, packaging, labeling and product return processes are performed. Increased demand and other considerations may require us to expand our distribution centers or transfer our fulfillment operations to larger facilities in the future.

Our distribution centers are susceptible to damage or interruption from human error, fire, flood, power loss, telecommunications failures, terrorist attacks, acts of war, break-ins, earthquakes and similar events. We do not currently maintain back-up power systems at our fulfillment centers. We do not presently have a formal disaster recovery plan and our business interruption insurance may be insufficient to compensate us for losses that may occur in the event operations at our fulfillment center are interrupted. Any interruptions in our fulfillment operations for any significant period of time, including interruptions resulting from the expansion of our existing facilities or the transfer of operations to a new facility, could damage our reputation and brand and substantially harm our business and results of operations. In addition, if we do not successfully expand our fulfillment capabilities in response to increases in demand, we may not be able to substantially increase our net sales.

Table of Contents

We are dependent upon third parties for distribution and fulfillment operations with respect to many of our products.

For a number of the products that we sell, we outsource the distribution and fulfillment operation and are dependent on our distributors to manage inventory, process orders and distribute those products to our customers in a timely manner. For the quarter ended March 31, 2008, our product purchases from a single supplier represented 14.9% or more of our total product purchases. If we do not maintain our existing relationships with our distributors on acceptable commercial terms, we will need to obtain other suppliers and may not be able to continue to offer a broad selection of merchandise at competitive prices, and our sales may decrease.

In addition, because we outsource to distributors a number of these traditional retail functions relating to those products, we have limited control over how and when orders are fulfilled. We also have limited control over the products that our distributors purchase or keep in stock. Our distributors may not accurately forecast the products that will be in high demand or they may allocate popular products to other resellers, resulting in the unavailability of certain products for delivery to our customers. Any inability to offer a broad array of products at competitive prices and any failure to deliver those products to our customers in a timely and accurate manner may damage our reputation and brand and could cause us to lose customers.

Our ability to sustain or increase our profitability will suffer if we fail to manage our growth effectively.

In recent years, we have experienced rapid growth that has placed, and may continue to place, pressures on our operational and financial infrastructure. Our workforce has increased from 114 employees as of December 31, 2003 to 963 employees as of March 31, 2008. Our net sales have increased from \$31.7 million in 2003 to \$161.0 million in 2007. Our recent expansion and planned growth have placed, and are expected to continue to place, a strain on our infrastructure, operations and managerial resources. We intend to further increase the size of our operations, and we expect our operating expenses to increase, as we, among other things:

expand our domestic and international operations;

add additional distribution facilities;

increase our technology and development efforts to enhance and maintain our websites and technology infrastructure;

hire additional personnel, including customer service specialists, sales and marketing professionals and financial professionals;

upgrade our operational and financial systems, procedures and controls; and

address the responsibilities and costs of being a public company, including costs of complying with the Sarbanes-Oxley Act of 2002. Our success depends upon our ability to manage our operations and our growth effectively. To be successful, we will need to improve our operational and financial systems, procedures and controls, maintain our cost structure at appropriate levels, manage international operations, and hire additional personnel. We cannot assure you that our efforts will be successful or that we can improve our systems, procedures and controls in a timely manner. Delays or problems associated with any improvements or expansion of our systems, procedures and controls could harm our business and operating results. In addition, we may fail to accurately estimate and assess our increased operating expenses as we grow. As our operating expenses increase, we will need to grow our revenue in order to maintain our profitability.

If we fail to offer a broad selection of products at competitive prices to meet our customers' demands, our revenue could decline.

In order to expand our business, we must successfully offer, on a continuous basis, a broad selection of auto parts that meet the needs of our customers. Our auto parts are used by consumers for a variety of purposes, including repair, performance, improved aesthetics and functionality. In addition, to be successful, our product offerings must be broad and deep in scope, competitively priced, well-made, innovative and attractive to a wide range of consumers. We cannot predict with certainty that we will be successful in offering products that meet all of these

requirements. If our product offerings fail to satisfy our customers' requirements or respond to changes in customer preferences, our revenue could decline.

Future acquisitions could disrupt our business and harm our financial condition.

As part of our growth strategy, we expect that we will selectively pursue acquisitions of businesses, technologies or services in order to expand our capabilities, enter new markets or increase our market share. Integrating any newly acquired businesses' websites, technologies or services is likely to be expensive and time consuming. For example, our acquisition of Partsbin has resulted in significant costs and a number of challenges, including retaining employees of the acquired company, integrating our order processing and credit processing, integrating our product pricing strategy, and integrating the diverse

Table of Contents

technologies and differing e-commerce platforms and accounting systems used by each company. If we are unable to successfully complete this integration, we may not realize the synergies from the acquisition, and our business and results of operations could suffer. To finance any future acquisitions, it may also be necessary for us to raise additional capital through public or private financings. Additional funds may not be available on terms that are favorable to us, and, in the case of equity financings, would result in dilution to our stockholders. Future acquisitions by us could also result in large and immediate write-offs, assumption of debt and unforeseen liabilities and significant adverse accounting charges, any of which could substantially harm our business, financial condition and results of operations.

We may be subject to liability for sales and other taxes and penalties, which could have an adverse effect on our business.

We currently collect sales or other similar taxes only on the shipment of goods to the states of California, New Jersey, Kansas and Tennessee. The U.S. Supreme Court has ruled that vendors whose only connection with customers in a state is by common carrier or the U.S. mail are free from state-imposed duties to collect sales and use taxes in that state. However, states could seek to impose additional income tax obligations or sales tax collection obligations on out-of-state companies such as ours, which engage in or facilitate online commerce, based on their interpretation of existing laws, including the Supreme Court ruling, or specific facts relating to us. If sales tax obligations are successfully imposed upon us by a state or other jurisdiction, we could be exposed to substantial tax liabilities for past sales and penalties and fines for failure to collect sales taxes. We could also suffer decreased sales in that state or jurisdiction as the effective cost of purchasing goods from us increases for those residing in that state or jurisdiction.

In addition, a number of states, as well as the U.S. Congress, have been considering various initiatives that could limit or supersede the Supreme Court's apparent position regarding sales and use taxes on Internet sales. If any of these initiatives are enacted, we could be required to collect sales and use taxes in additional states and our revenue could be adversely affected. Furthermore, the U.S. Congress has not yet extended a moratorium, which was first imposed in 1998 but has since expired, on state and local governments' ability to impose new taxes on Internet access and Internet transactions. The imposition by state and local governments of various taxes upon Internet commerce could create administrative burdens for us as well as substantially impair the growth of e-commerce and adversely affect our revenue and profitability. Since our service is available over the Internet in multiple states, these jurisdictions may require us to qualify to do business in these states. If we fail to qualify in a jurisdiction that requires us to do so, we could face liabilities for taxes and penalties.

We could be liable for breaches of security on our websites.

A fundamental requirement for e-commerce is the secure transmission of confidential information over public networks. Anyone who is able to circumvent our security measures could misappropriate proprietary information or cause interruptions in our operations. Although we have developed systems and processes that are designed to protect consumer information and prevent fraudulent credit card transactions and other security breaches, failure to mitigate such fraud or breaches may adversely affect our operating results. We may be required to expend significant capital and other resources to protect against potential security breaches or to alleviate problems caused by any breach. We rely on licensed encryption and authentication technology to provide the security and authentication necessary for secure transmission of confidential information, including credit card numbers. Advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments may result in a compromise or breach of the algorithms that we use to protect customer transaction data. In the event someone circumvents our security measures, it could seriously harm our business and reputation and we could lose customers. Security breaches could also expose us to a risk of loss or litigation and possible liability for failing to secure confidential customer information.

If we do not respond to technological change, our websites could become obsolete and our financial results and conditions could be adversely affected.

We maintain a network of websites which requires substantial development and maintenance efforts, and entails significant technical and business risks. To remain competitive, we must continue to enhance and improve the responsiveness, functionality and features of our websites. The Internet and the e-commerce industry are characterized by rapid technological change, the emergence of new industry standards and practices and changes in customer requirements and preferences. Therefore, we may be required to license emerging technologies, enhance our existing websites, develop new services and technology that address the increasingly sophisticated and varied needs of our current and prospective customers, and adapt to technological advances and emerging industry and regulatory standards and practices in a cost-effective and timely manner. Our ability to remain technologically competitive may require substantial expenditures and lead time and our failure to do so may harm our business and results of operations.

Table of Contents

The success of our business depends on the continued growth of the Internet as a retail marketplace and the related expansion of the Internet infrastructure.

Our future success depends upon the continued and widespread acceptance and adoption of the Internet as a vehicle to purchase products. If customers or manufacturers are unwilling to use the Internet to conduct business and exchange information, our business will fail. The commercial acceptance and use of the Internet may not continue to develop at historical rates, or may not develop as quickly as we expect. The growth of the Internet, and in turn the growth of our business, may be inhibited by concerns over privacy and security, including concerns regarding viruses and worms, reliability issues arising from outages or damage to Internet infrastructure, delays in development or adoption of new standards and protocols to handle the demands of increased Internet activity, decreased accessibility, increased government regulation, and taxation of Internet activity. In addition, our business growth may be adversely affected if the Internet infrastructure does not keep pace with the growing Internet activity and is unable to support the demands placed upon it, or if there is any delay in the development of enabling technologies and performance improvements.

System failures, including failures due to natural disasters or other catastrophic events, could prevent access to our websites, which could reduce our net sales and harm our reputation.

Our sales would decline and we could lose existing or potential customers if they are not able to access our websites or if our websites, transaction processing systems or network infrastructure do not perform to our customers' satisfaction. Any Internet network interruptions or problems with our websites could:

prevent customers from accessing our websites;

reduce our ability to fulfill orders or bill customers;

reduce the number of products that we sell;

cause customer dissatisfaction; or

damage our brand and reputation.

We have experienced brief computer system interruptions in the past, and we believe they will continue to occur from time to time in the future. Our systems and operations are also vulnerable to damage or interruption from a number of sources, including a natural disaster or other catastrophic event such as an earthquake, typhoon, volcanic eruption, fire, flood, terrorist attack, computer viruses, power loss, telecommunications failure, physical and electronic break-ins and other similar events. For example, our headquarters and the majority of our infrastructure, including some of our servers, are located in Southern California, a seismically active region. We also maintain offshore and outsourced operations in the Philippines, an area that has been subjected to a typhoon and a volcanic eruption in the past. In addition, California has in the past experienced power outages as a result of limited electrical power supplies and due to recent fires in the southern part of the state. Such outages, natural disasters and similar events may recur in the future and could disrupt the operation of our business. Our technology infrastructure is also vulnerable to computer viruses, physical or electronic break-ins and similar disruptions. Although the critical portions of our systems are redundant and backup copies are maintained offsite, not all of our systems and data are fully redundant. We do not presently have a formal disaster recovery plan in effect and may not have sufficient insurance for losses that may occur from natural disasters or catastrophic events. Any substantial disruption of our technology infrastructure could cause interruptions or delays in our business and loss of data or render us unable to accept and fulfill customer orders or operate our websites in a timely manner, or at all.

Capacity constraints on our technology infrastructure would harm our business, prospects, results of operations and financial condition.

If the volume of traffic on our websites or the number of purchases made by customers increases substantially, we may need to further expand and upgrade our technology, transaction processing systems and network infrastructure. Capacity constraints can cause unanticipated system disruptions, slower response times, degradation in levels of customer service, impaired quality and delays in reporting accurate financial information.

Edgar Filing: U.S. Auto Parts Network, Inc. - Form 10-Q

We may be unable to project accurately the rate or timing of traffic increases or successfully and cost-effectively upgrade our systems and infrastructure in time to accommodate future traffic levels on our websites. Any such upgrades to our systems and infrastructure will require substantial expenditures. In addition, we may be unable to upgrade and expand our transaction processing systems in an effective and timely manner or to integrate any newly developed or purchased functionality with our existing systems. Any inability to efficiently upgrade our systems and infrastructure in a timely manner to account for such growth and integrations may cause unanticipated system disruptions, slower response times, degradation in levels of customer service, impaired quality, delayed order fulfillment, any of which could result in a decline in our sales and harm our reputation.

Table of Contents

We depend on third-party delivery services to deliver our products to our customers on a timely and consistent basis, and any deterioration in our relationship with any one of these third parties or increases in the fees that they charge could adversely affect our business and financial condition.

We rely on third parties for the shipment of our products and we cannot be sure that these relationships will continue on terms favorable to us, or at all. Shipping costs have increased from time to time, and may continue to increase, which could harm our business, prospects, financial condition and results of operations by increasing our costs of doing business and resulting in reduced gross margins. In addition, if our relationships with these third parties are terminated or impaired, or if these third parties are unable to deliver products for us, whether through labor shortage, slow down or stoppage, deteriorating financial or business condition, responses to terrorist attacks or for any other reason, we would be required to use alternative carriers for the shipment of products to our customers. Changing carriers could have a negative effect on our business and operating results due to reduced visibility of order status and package tracking and delays in order processing and product delivery, and we may be unable to engage alternative carriers on a timely basis, upon terms favorable to us, or at all.

We face exposure to product liability lawsuits.

The automotive industry in general has been subject to a large number of product liability claims due to the nature of personal injuries that result from car accidents or malfunctions. As a distributor of auto parts, we could be held liable for the injury or damage caused if the products we sell are defective or malfunction. While we carry insurance against product liability claims, if the damages in any given action were high or we were subject to multiple lawsuits, the damages and costs could exceed the limits of our insurance coverage. If we were required to pay substantial damages as a result of these lawsuits, it may seriously harm our business and financial condition. Even defending against unsuccessful claims could cause us to incur significant expenses and result in a diversion of management's attention. In addition, even if the money damages themselves did not cause substantial harm to our business, the damage to our reputation and the brands offered on our websites could adversely affect our future reputation and our brand, and could result in a decline in our net sales and profitability.

If we fail to develop and maintain an effective system of internal control over financial reporting or are not able to adequately address certain identified material weaknesses in our system of internal controls or comply with Section 404 of the Sarbanes-Oxley Act of 2002, we may not be able to accurately report our financial results or prevent fraud, and our stock price could decline.

Management has identified a material weakness in our financial statement close process and contributing deficiencies in our information technology general controls and has concluded that our internal control over financial reporting were not effective as of December 31, 2007. If we fail to adequately address this material weakness, we may not be able to improve our system of internal control over financial reporting to comply with the reporting requirements applicable to public companies in the United States. Furthermore, because we have not completed the testing of the operation of our internal controls, it is possible that we or our auditors will identify additional material weaknesses or significant deficiencies in the future in our system of internal control over financial reporting. Our failure to address any deficiencies or weaknesses in our internal control over financial reporting or to properly maintain an effective system of internal control over financial reporting could impact our ability to prevent fraud or to issue our financial statements in a timely manner that presents fairly our financial condition and results of operations. The existence of any such deficiencies or weaknesses, even if cured, may also lead to the loss of investor confidence in the reliability of our financial statements, could harm our business and negatively impact the trading price of our common stock. Such deficiencies or material weaknesses may also subject us to lawsuits, investigations and other penalties.

In addition, Section 404 of the Sarbanes-Oxley Act of 2002 required us to evaluate and report on our internal control over financial reporting with the Annual Report on Form 10-K for the year ended December 31, 2007, and have our independent auditors attest to our evaluation, beginning with our Annual Report on Form 10-K for the year ending December 31, 2008. While we have prepared an internal plan of action for compliance with Section 404 and for strengthening and testing our system of internal control to provide the basis for our report and the attestation report by our independent auditing firm, we cannot assure you that this plan of action will be sufficient to meet the rigorous requirements of Section 404, and our independent auditors may issue an adverse opinion regarding management's assessment of Section 404 compliance. Our failure to comply with Section 404 or our reporting requirements would reduce investors' confidence in our financial statements and harm our stock price and could subject us to a variety of administrative sanctions, including the suspension or delisting of our common stock from the NASDAQ Global Market and the inability of registered broker/dealers to make a market in our common stock, which could also cause our stock price to decline.

Table of Contents

Existing or future government regulation could expose us to liabilities and costly changes in our business operations and could reduce customer demand for our products and services.

We are subject to federal and state consumer protection laws and regulations, including laws protecting the privacy of customer non-public information and regulations prohibiting unfair and deceptive trade practices, as well as laws and regulations governing businesses in general and the Internet and e-commerce. Additional laws and regulations may be adopted with respect to the Internet, the effect of which on e-commerce is uncertain. These laws may cover issues such as user privacy, spyware and the tracking of consumer activities, marketing e-mails and communications, other advertising and promotional practices, money transfers, pricing, content and quality of products and services, taxation, electronic contracts and other communications, intellectual property rights, and information security. Furthermore, it is not clear how existing laws such as those governing issues such as property ownership, sales and other taxes, trespass, data mining and collection, and personal privacy apply to the Internet and e-commerce. To the extent we expand into international markets, we will be faced with complying with local laws and regulations, some of which may be materially different than U.S. laws and regulations. Any such foreign law or regulation, any new U.S. law or regulation, or the interpretation or application of existing laws and regulations to the Internet or other online services, may have a material adverse effect on our business, prospects, financial condition and results of operations by, among other things, impeding the growth of the Internet, subjecting us to fines, penalties, damages or other liabilities, requiring costly changes in our business operations and practices, and reducing customer demand for our products and services. We do not maintain insurance coverage to cover the types of claims or liabilities that could arise as a result of such regulation.

If we are unable to protect our intellectual property rights, our reputation and brand could be impaired and we could lose customers.

We regard our trademarks, trade secrets and similar intellectual property as important to our success. We rely on trademark and copyright law, and trade secret protection, and confidentiality and/or license agreements with employees, customers, partners and others to protect our proprietary rights. We cannot be certain that we have taken adequate steps to protect our proprietary rights, especially in countries where the laws may not protect our rights as fully as in the United States. In addition, third parties may infringe or misappropriate our proprietary rights, and we could be required to incur significant expenses to preserve them. We have common law trademarks, as well as pending federal trademark registrations for several marks and one registered mark. Even if we obtain approval of such pending registrations, the resulting registrations may not adequately cover our inventions or protect us against infringement by others. Effective trademark, service mark, copyright, patent and trade secret protection may not be available in every country in which our products and services may be made available online. We also currently own or control a number of Internet domain names, including www.usautoparts.net, www.partstrain.com and www.autopartswarehouse.com. We may be unable to protect these domain names or acquire or maintain relevant domain names in the United States and in other countries. If we are not able to protect our trademarks, domain names or other intellectual property, we may experience difficulties in achieving and maintaining brand recognition and customer loyalty.

Our e-commerce system is dependent on open-source software, which exposes us to uncertainty and potential liability.

We utilize open-source software such as Linux, Apache, MySQL, PHP, Fedora and Perl throughout our web properties and supporting infrastructure. Open-source software is maintained and upgraded by a general community of software developers under various open-source licenses, including the GNU General Public License (GPL). These developers are under no obligation to maintain, enhance or provide any fixes or updates to this software in the future. Additionally, under the terms of the GPL and other open-source licenses, we may be forced to release to the public source-code internally developed by us pursuant to such licenses. Furthermore, if any of these developers contribute any code of others to any of the software that we use, we may be exposed to claims and liability for intellectual property infringement. A number of lawsuits are currently pending against third parties over the ownership rights to the various components within some open-source software that we use. If the outcome of these lawsuits is unfavorable, we may be held liable for intellectual property infringement based on our use of these open-source software components. We may also be forced to implement changes to the code-base for this software or replace this software with internally developed or commercially licensed software.

We rely on bandwidth and data center providers and other third parties to provide products to our customers, and any failure or interruption in the services provided by these third parties could disrupt our business and cause us to lose customers.

We rely on third-party vendors, including data center and bandwidth providers. Any disruption in the network access or co-location services, which are the services that house and provide Internet access to our servers, provided by these third-party providers or any failure of these third-party providers to handle current or higher volumes of use could significantly harm our business. Any financial or other difficulties our providers face may have negative effects on our business, the nature

Table of Contents

and extent of which we cannot predict. We exercise little control over these third-party vendors, which increases our vulnerability to problems with the services they provide. We also license technology and related databases from third parties to facilitate elements of our e-commerce platform. We have experienced and expect to continue to experience interruptions and delays in service and availability for these elements. Any errors, failures, interruptions or delays experienced in connection with these third-party technologies could negatively impact our relationship with our customers and adversely affect our business.

Our systems also heavily depend on the availability of electricity, which also comes from third-party providers. If we were to experience a major power outage, we would have to rely on back-up generators. These back-up generators may not operate properly through a major power outage, and their fuel supply could also be inadequate during a major power outage. Information systems such as ours may be disrupted by even brief power outages, or by the fluctuations in power resulting from switches to and from backup generators. This could disrupt our business and cause us to lose customers.

The United States government may substantially increase border controls and impose restrictions on cross-border commerce that may substantially harm our business.

We purchase a substantial portion of our products from foreign manufacturers and other suppliers who source products internationally. Restrictions on shipping goods into the United States from other countries pose a substantial risk to our business. Particularly since the terrorist attacks on September 11, 2001, the United States government has substantially increased border surveillance and controls. If the United States were to impose further border controls and restrictions, impose quotas, tariffs or import duties, increase the documentation requirements applicable to cross border shipments or take other actions that have the effect of restricting the flow of goods from other countries to the United States, we may have greater difficulty acquiring our inventory in a timely manner, experience shipping delays, or incur increased costs and expenses, all of which would substantially harm our business and results of operations.

Our stock price has been and may continue to be volatile, which may result in losses to our stockholders.

The market prices of technology and e-commerce companies generally have been extremely volatile and have recently experienced sharp share price and trading volume changes. The trading price of our common stock is likely to be volatile and could fluctuate widely in response to, among other things, the risk factors described in this report and other factors beyond our control such as fluctuations in the operations or valuations of companies perceived by investors to be comparable to us, our ability to meet analysts' expectations, or conditions or trends in the Internet or auto parts industries.

Since the completion of our initial public offering in February 2007, the trading price of our common stock has been volatile, declining from a high of \$12.61 per share to a low per share of \$2.13. We have also experienced significant fluctuations in the trading volume of our common stock. General economic and political conditions unrelated to our performance may also adversely affect the price of our common stock. In the past, following periods of volatility in the market price of a public company's securities, securities class action litigation has often been initiated. In March 2007, we and certain of our officers, directors and the underwriters for our initial public offering were served with two putative class action complaints alleging violations of federal securities law in connection with our initial public offering. These complaints were subsequently consolidated. In January 2008, the parties to the litigation reached an agreement to settle in principle, subject to confirmatory discovery, finalization of settlement document and Court approval. If the settlement is not consummated, the litigation would continue. Due to the inherent uncertainties of litigation, we cannot predict the ultimate outcome of the litigation if it were to continue. An unfavorable result could have a material adverse effect on our financial condition and results of operation.

The SEC's informal inquiry in this regard is still pending and any negative development in that inquiry may adversely impact our stock price in the future.

Our executive officers and directors own a significant percentage of our stock.

As of March 31, 2008, our executive officers and directors and entities that are affiliated with them beneficially owned approximately 51.5% of our outstanding shares of common stock. This significant concentration of share ownership may adversely affect the trading price for our common stock because investors often perceive disadvantages in owning stock in companies with controlling stockholders. Also, these stockholders, acting together, will be able to control our management and affairs and matters requiring stockholder approval including the election of our entire board of directors and certain significant corporate actions such as mergers, consolidations or the sale of substantially all of our assets. As a result, this concentration of ownership could delay, defer or prevent others from initiating a potential merger, takeover or other change in our control, even if these actions would benefit our other stockholders and us.

Table of Contents

A large number of additional shares may be sold into the public market in the near future, which may cause the market price of our common stock to decline significantly, even if our business is doing well.

Sales of a substantial amount of common stock in the public market, or the perception that these sales may occur, could adversely affect the market price of our common stock. Approximately 18 million shares of our common stock that were outstanding as of March 24, 2008 may be resold in the public market immediately. The remaining shares of our outstanding common stock are subject to lock-up agreements with us but will also become available for resale in the public market in August 2008. We can waive the lock-up restriction and allow these stockholders to sell their shares at any time, subject to applicable securities law and other limitations. As restrictions on resale end, the market price could drop significantly if the holders of these restricted shares sell them or are perceived by the market as intending to sell them.

We will incur increased costs and compliance risks as a result of being a public company.

We completed our initial public offering in February 2007. As a public company, we have and expect to continue to incur significant legal, accounting and other expenses that we did not incur as a private company. These expenses are associated with our public company reporting requirements and certain corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002 and the new rules implemented by the SEC and the NASDAQ Stock Market. Compliance with these rules and regulations, in particular Section 404 of the Sarbanes-Oxley Act of 2002, has increased, and is expected to continue to substantially increase our legal and financial compliance costs and will likely require us to hire additional personnel and/or consultants. Like many smaller public companies, we expect to face a significant impact from required compliance with Section 404 of the Sarbanes-Oxley Act of 2002. The process of strengthening our internal control and complying with Section 404 is expected to be expensive and time consuming, and will require significant time and attention from our management team. We continue to evaluate and monitor developments with respect to these new rules, and we cannot predict or estimate the amount of additional costs we may incur or the timing of such costs.

We also expect these new rules and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, it may be more difficult for us to attract and retain qualified individuals to serve on our board of directors or as executive officers.

We do not intend to pay dividends on our common stock.

We currently intend to retain any future earnings and do not expect to pay any cash dividends on our capital stock for the foreseeable future.

Our charter documents could deter a takeover effort, which could inhibit your ability to receive an acquisition premium for your shares.

Provisions in our certificate of incorporation and bylaws could make it more difficult for a third party to acquire us, even if doing so would be beneficial to our stockholders. Such provisions include the following:

our board of directors are authorized, without prior stockholder approval, to create and issue preferred stock which could be used to implement anti-takeover devices;

advance notice is required for director nominations or for proposals that can be acted upon at stockholder meetings;

our board of directors is classified such that not all members of our board are elected at one time, which may make it more difficult for a person who acquires control of a majority of our outstanding voting stock to replace all or a majority of our directors;

stockholder action by written consent is prohibited except with regards to an action that has been approved by the board;

Edgar Filing: U.S. Auto Parts Network, Inc. - Form 10-Q

special meetings of the stockholders are permitted to be called only by the chairman of our board of directors, our chief executive officer or by a majority of our board of directors;

stockholders are not be permitted to cumulate their votes for the election of directors; and

stockholders are permitted to amend certain provisions of our bylaws only upon receiving at least 66 2/3% of the votes entitled to be cast by holders of all outstanding shares then entitled to vote generally in the election of directors, voting together as a single class.
