What has happened?

Cypress and Simtek have signed a Definitive Agreement for Cypress
to Acquire Simtek

This is a tender offer to buy all of the outstanding Simtek stock

This is a cash only offer

Stock purchase price is \$2.60 per share, the Tender Offer

Current Stock price SMTK = \$1.62

Current premium per share = \$ 0.98

Outstanding shares of Simtek stock

17.55M Shares

Cypress owns 674,082 shares acquired in connection with its previous JV investment with Simtek

Total purchase price is approximately \$45.6M

Final Comments

Cypress is very excited about this potential acquisition

It will extend our leadership position in the Memory market

It will enable better competitive solutions against MRAM, FRAM and other Battery based technologies

It will provide a healthy Customer and revenue base

It will provide fundamental IP to enable embedded SOC s

It will leverage core competencies in a growing market

It will allow us to get better products to market, faster

This is the first step in a very exciting ride .more to come

Thank you

The following email was circulated to all Simtek employees on August 1, 2008.

CYPRESS SEMICONDUCTOR CORPORATION

Internal Correspondence

Dear Simtek Employee,

Today we announced that Cypress has signed a definitive agreement to acquire Simtek for approximately \$46M or \$2.60 per share. This acquisition is subject to customary closing conditions and regulatory approvals and is expected to be finalized in or prior to the fourth calendar quarter of 2008.

As many of you know, Cypress is one of the leading suppliers of static memory devices in the semiconductor industry today, having served this market for more than 25 years. It is also a leading supplier of USB and capacitive sensing based solutions and continues to grow and renew its business with its programmable product offerings including its PSoC® (Programmable System-on-Chip) device.

We are excited about the potential merger of these two companies, which we believe will help strengthen and expand the Cypress portfolio in the area of high-speed, nonvolatile memory solutions. This is a relatively new and growing market segment that continues to demand higher performance, higher density, increased speeds and near-infinite endurance, along with the high quality and reliability standards that we believe jointly we can provide.

Applications for these standalone nvSRAM and future embedded products range from desktop computing, server and storage systems, to industrial controls, medical and automotive-based solutions and even into the gaming and military product sectors. There are truly a wide range of applications and implementations where our Secure Storage solutions will provide significant value to our customers.

We believe the joint efforts of our companies will result in better customer-focused products and will enable a higher level of competition with the alternative technologies in this space. Both companies have been focused and committed to producing a CMOS-based, highly scalable and easily integrated solution, to solve our customer's nonvolatile needs. We are confident that the Simtek nvSRAM and Cypress SONOS processing and manufacturing leadership are the answers to this need. Alternative technologies utilizing FRAM, MRAM or battery-based technologies will just not be able to compete with our density, power, scaling and integration capabilities.

We thank the Simtek leadership team for working with Cypress through this tender offer process and are looking forward to the next steps in our engagement with Simtek. Thanks for your time, support and patience.

Regards,

Bob Dunnigan

VP NVP Business Unit

Additional Information and Where to Find it:

The tender offer for the outstanding common stock of Simtek has not yet commenced. This memorandum is for informational purposes only and is not an offer to buy or the solicitation of an offer to sell any securities. The solicitation and the offer to buy shares of Simtek common stock will be made only pursuant to an offer to purchase and related materials that Cypress intends to file with the SEC on Schedule TO. Simtek also intends to file a solicitation/recommendation statement on Schedule 14D-9 with respect to the offer. Simtek stockholders and other investors should read these materials carefully because they contain important information, including the terms and conditions of the offer. Simtek stockholders and other investors will be able to obtain copies of these materials without charge from the SEC through the SEC's Web site at www.sec.gov, from the Information Agent named in the tender offer documents, from Cypress (with respect to documents filed by Cypress with the SEC), or from Simtek (with respect to documents filed by Simtek with the SEC).
