SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No.: 0-26823

ALLIANCE RESOURCE PARTNERS, L.P.

(Exact name of registrant as specified in its charter)

Edgar Filing: ALLIANCE RESOURCE PARTNERS LP - Form 10-Q

Delaware **73-1564280**
(State or other jurisdiction of **(IRS Employer**
incorporation or organization) **Identification No.)**
1717 South Boulder Avenue, Suite 400, Tulsa, Oklahoma 74119

(Address of principal executive offices and zip code)

(918) 295-7600

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (check one)

Large Accelerated Filer Accelerated Filer

Non-Accelerated Filer (Do not check if smaller reporting company) Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of August 9, 2010, 36,716,855 common units are outstanding.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. ORGANIZATION AND PRESENTATION

Significant Relationships Referenced in Notes to Condensed Consolidated Financial Statements

References to *we*, *us*, *our* or *ARLP Partnership* mean the business and operations of Alliance Resource Partners, L.P., the parent company as well as its consolidated subsidiaries.

References to *ARLP* mean Alliance Resource Partners, L.P., individually as the parent company, and not on a consolidated basis.

References to *MGP* mean Alliance Resource Management GP, LLC, the managing general partner of Alliance Resource Partners, L.P., also referred to as our managing general partner.

References to *SGP* mean Alliance Resource GP, LLC, the special general partner of Alliance Resource Partners, L.P., also referred to as our special general partner.

References to *Intermediate Partnership* mean Alliance Resource Operating Partners, L.P., the intermediate partnership of Alliance Resource Partners, L.P., also referred to as our intermediate partnership.

References to *Alliance Coal* mean Alliance Coal, LLC, the holding company for the operations of Alliance Resource Operating Partners, L.P., also referred to as our operating subsidiary.

References to *AHGP* mean Alliance Holdings GP, L.P., individually as the parent company, and not on a consolidated basis.

References to *AGP* mean Alliance GP, LLC, the general partner of Alliance Holdings GP, L.P.

Organization

ARLP is a Delaware limited partnership listed on the NASDAQ Global Select Market under the ticker symbol *ARLP*. ARLP was formed in May 1999, to acquire, upon completion of ARLP's initial public offering on August 19, 1999, certain coal production and marketing assets of Alliance Resource Holdings, Inc., a Delaware corporation (*ARH*), consisting of substantially all of ARH's operating subsidiaries, but excluding ARH. ARH was previously owned by our current and former management. In June 2006, our special general partner, SGP, and its parent, ARH, became wholly-owned, directly and indirectly, by Joseph W. Craft III, a director and the President and Chief Executive Officer of our managing general partner. SGP, a Delaware limited liability company, holds a 0.01% general partner interest in each of ARLP and the Intermediate Partnership. We have a time sharing agreement for the use of aircraft and we lease certain assets, including coal reserves and certain surface facilities, owned by SGP.

We are managed by our managing general partner, MGP, a Delaware limited liability company, which holds a 0.99% and a 1.0001% managing general partner interest in ARLP and the Intermediate Partnership, respectively, and a 0.001% managing member interest in Alliance Coal.

Edgar Filing: ALLIANCE RESOURCE PARTNERS LP - Form 10-Q

AHGP is a Delaware limited partnership that was formed to become the owner and controlling member of MGP. AHGP completed its initial public offering on May 15, 2006. AHGP owns directly and indirectly 100% of the members' interest of MGP, the incentive distribution rights (IDR) in ARLP and 15,544,169 common units of ARLP.

Table of Contents

Basis of Presentation

The accompanying condensed consolidated financial statements include the accounts and operations of the ARLP Partnership and present our financial position as of June 30, 2010 and December 31, 2009, results of our operations for the three and six months ended June 30, 2010 and 2009 and our cash flows for the six months ended June 30, 2010 and 2009. All of our intercompany transactions and accounts have been eliminated. Net income attributable to Alliance Resource Partners, L.P. within our accompanying condensed consolidated financial statements will be described as Net Income of ARLP.

These condensed consolidated financial statements and notes are unaudited. However, in the opinion of management, these financial statements reflect all adjustments (which include only normal recurring adjustments) necessary for a fair presentation of the results for the periods presented. Results for interim periods are not necessarily indicative of results for a full year.

These condensed consolidated financial statements and notes are prepared pursuant to the rules and regulations of the Securities and Exchange Commission for interim reporting and should be read in conjunction with the consolidated financial statements and notes included in our Annual Report on Form 10-K for the year ended December 31, 2009.

Use of Estimates

The preparation of the ARLP Partnership's condensed consolidated financial statements in conformity with generally accepted accounting principles (GAAP) of the United States (U.S.) requires management to make estimates and assumptions that affect the reported amounts and disclosures in our condensed consolidated financial statements. Actual results could differ from those estimates.

2. NEW ACCOUNTING STANDARDS

New Accounting Standards Issued and Adopted

In December 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2009-17, *Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities* (ASU 2009-17). ASU 2009-17 codified Statement of Financial Accounting Standards (SFAS) No. 167, *Amendments to FASB Interpretation No. 46(R)*, which changed the consolidation guidance applicable to a variable interest entity (VIE). ASU 2009-17 updated the guidance governing the determination of whether an enterprise is the primary beneficiary of a VIE, and is, therefore, required to consolidate such VIE, by requiring a qualitative analysis rather than a quantitative analysis. The qualitative analysis includes, among other things, consideration of whether the enterprise has the power to direct the activities of the entity that most significantly impact the entity's economic performance and has the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. ASU 2009-17 also requires continuous reassessments of whether an enterprise is the primary beneficiary of a VIE. Previously, FASB Accounting Standards Codification (ASC) 810, *Consolidation*, required reconsideration of whether an enterprise was the primary beneficiary of a VIE only when specific events had occurred. Qualifying special purpose entities, which were previously exempt from the application of this standard, are now subject to the provisions of ASU 2009-17. In addition, ASU 2009-17 also requires enhanced disclosures about an enterprise's involvement with a VIE. The provisions of ASU 2009-17 were effective as of the beginning of interim and annual reporting periods that began after November 15, 2009. Based on our evaluation of ASU 2009-17, we deconsolidated Mid-America Carbonates, LLC (MAC) upon adoption, effective January 1, 2010 (Note 13). The deconsolidation of MAC did not have a material impact on our condensed consolidated financial statements.

Table of Contents

In January 2010, the FASB issued ASU 2010-06, *Improving Disclosures About Fair Value Measurements* (ASU 2010-06). ASU 2010-06 amended guidance on certain aspects of FASB ASC 820, *Fair Value Measurements and Disclosures*, to add new requirements for disclosures of transfers into and out of Level 1 and 2 measurements and separate disclosures about purchases, sales, issuances, and settlements relating to Level 3 measurements, all on a gross basis. ASU 2010-06 also clarifies existing fair value disclosures regarding the level of disaggregation and the inputs and valuation techniques used to measure fair value. The provisions of ASU 2010-06 were effective for the first reporting period beginning after December 15, 2009, except for the requirement to provide Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010. The adoption of ASU 2010-06 did not have an impact on our condensed consolidated financial statements.

3. CONTINGENCIES

Various lawsuits, claims and regulatory proceedings incidental to our business are pending against the ARLP Partnership. We record an accrual for a potential loss related to these matters when, in management's opinion, such loss is probable and reasonably estimable. Based on known facts and circumstances, we believe the ultimate outcome of these outstanding lawsuits, claims and regulatory proceedings will not have a material adverse effect on our financial condition, results of operations or liquidity. However, if the results of these matters were different from management's current opinion and in amounts greater than our accruals, then they could have a material adverse effect.

The matters referenced in the previous paragraph include, but are not limited to, the *George W. Rector v. White County Coal, LLC* lawsuit, which is a royalty dispute involving certain coal leases that had been previously terminated. Plaintiffs have alleged damages of \$33 million or more and have also asserted a claim for punitive damages. A bench trial of this case was concluded in November 2009 and closing arguments were heard on February 10, 2010, but the court has not yet issued a decision. We believe plaintiffs' claims are without merit, have accrued no loss and are vigorously defending the litigation.

4. PATTIKI VERTICAL HOIST CONVEYOR SYSTEM FAILURE

On May 13, 2010, White County Coal, LLC's (White County Coal) Pattiki mine was temporarily idled following the failure of the vertical hoist conveyor system used in conveying raw coal out of the mine. On July 19, 2010, White County Coal's efforts to repair the vertical hoist conveyor system had progressed sufficiently to allow resumption of limited production operations. Our operating expenses for the three months ended June 30, 2010 includes \$1.2 million for retirement of certain assets related to the failed vertical hoist conveyor system in addition to other repair and clean-up expenses that were not significant on a consolidated or segment basis. We are conducting a review of our commercial property (including business interruption) insurance policies, which provide for self-retention, various deductibles and 22% co-insurance for the first \$50 million in coverage. Until such analysis is completed, the Partnership can make no assurances of the amount or timing of recoveries under such policies, if any.

Expanded coal production at our other coal mines in the region, which included addition of the seventh and eighth production units at the River View Coal, LLC's (River View) mine, partially offset the loss of production from the Pattiki mine. Consequently, the temporary idling of the Pattiki mine did not have a material adverse impact on our results of operations and cash flows. On July 19, 2010, the Pattiki mine resumed limited production while it continues to assess the effectiveness and reliability of the repaired vertical hoist conveyor system until such time it determines the system is safe to operate at full capacity.

Table of Contents**5. FAIR VALUE MEASUREMENTS**

We apply the provisions of FASB ASC 820, *Fair Value Measurements and Disclosures* which, among other things, defines fair value, requires enhanced disclosures about assets and liabilities carried at fair value and establishes a hierarchal disclosure framework based upon the quality of inputs used to measure fair value.

Valuation techniques are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our own market assumptions. These two types of inputs create the following fair value hierarchy:

Level 1 Quoted prices for identical instruments in active markets.

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model derived valuations whose inputs are observable or whose significant value drivers are observable.

Level 3 Instruments whose significant value drivers are unobservable.

The carrying amounts for accounts receivable and accounts payable approximate fair value because of the short maturity of those instruments. At June 30, 2010 and December 31, 2009, the estimated fair value of our fixed rate term debt, including current maturities, was approximately \$490.4 million and \$460.7 million, respectively, based on interest rates that we believe are currently available to us for issuance of debt with similar terms and remaining maturities (Note 6).

6. LONG-TERM DEBT

Long-term debt consists of the following, (in thousands):

	June 30, 2010	December 31, 2009
Revolving credit facility	\$ 5,000	\$
Senior notes	90,000	90,000
Series A senior notes	205,000	205,000
Series B senior notes	145,000	145,000
	445,000	440,000
Less current maturities	(18,000)	(18,000)
Total long-term debt	\$ 427,000	\$ 422,000

The Intermediate Partnership has a \$150.0 million revolving credit facility (ARLP Credit Facility), \$90.0 million in senior notes and \$205.0 million in Series A and \$145.0 million in Series B senior notes (collectively, the ARLP Debt Arrangements), which are guaranteed by all of the direct and indirect subsidiaries of our Intermediate Partnership. The ARLP Debt Arrangements contain various covenants affecting our Intermediate Partnership and its subsidiaries restricting, among other things, the amount of distributions by our Intermediate Partnership, the incurrence of additional indebtedness and liens, the sale of assets, the making of investments, the entry into mergers and consolidations and the entry into transactions with affiliates, in each case subject to various exceptions. The ARLP Debt Arrangements also require the Intermediate Partnership to remain in control of a certain amount of mineable coal reserves relative to its annual production. In addition, the ARLP Debt Arrangements require our Intermediate Partnership to maintain the following: (i) debt to cash flow ratio of not more than 3.0 to 1.0, (ii) cash flow to interest expense ratio of not less than 4.0 to 1.0, in each case, during the four most recently ended fiscal quarters and (iii) maximum annual capital expenditures, excluding acquisitions, of

Table of Contents

\$471.8 million for 2010. The debt to cash flow ratio and cash flow to interest expense ratio were 1.08 to 1.0 and 13.1 to 1.0, respectively, for the trailing twelve months ended June 30, 2010. Actual capital expenditures were \$174.8 million for the six months ended June 30, 2010. We were in compliance with the covenants of the ARLP Debt Arrangements as of June 30, 2010.

Lehman Commercial Paper, Inc. (Lehman), a subsidiary of Lehman Brothers Holding, Inc., held a 5%, or \$7.5 million, commitment in our \$150 million ARLP Credit Facility. On February 11, 2010, we gave our lenders a notice of borrowing under the ARLP Credit Facility and, in response to that notice, Lehman notified us that it would not fund its proportionate share of the borrowing. As a result, as of February 11, 2010, Lehman became a defaulting lender and availability for borrowing under the ARLP Credit Facility was reduced by \$7.5 million. We are currently in negotiations to amend the ARLP Credit Facility to remove Lehman as a commitment holder.

At June 30, 2010, we had \$11.6 million of letters of credit and \$5.0 million of net borrowings outstanding with \$125.9 million available for borrowing under the ARLP Credit Facility. We incur an annual commitment fee of 0.375% on the undrawn portion of the ARLP Credit Facility.

7. NET INCOME OF ARLP PER LIMITED PARTNER UNIT

We apply the provisions of FASB ASC 260, *Earnings Per Share* (FASB ASC 260). As required by FASB ASC 260, we apply the two-class method in calculating basic and diluted earnings per unit (EPU). Net Income of ARLP is allocated to the general partners and limited partners in accordance with their respective partnership percentages, after giving effect to any special income or expense allocations, including incentive distributions to our managing general partner, the holder of the IDR pursuant to our partnership agreement, which are declared and paid following the end of each quarter. Under the quarterly IDR provisions of our partnership agreement, our managing general partner is entitled to receive 15% of the amount we distribute in excess of \$0.275 per unit, 25% of the amount we distribute in excess of \$0.3125 per unit, and 50% of the amount we distribute in excess of \$0.375 per unit. Our partnership agreement contractually limits our distributions to available cash and therefore, undistributed earnings of the ARLP Partnership are not allocated to the IDR holder. In addition, our outstanding unvested awards under our Long-Term Incentive Plan (LTIP) include rights to nonforfeitable distributions and are therefore considered participating securities. As such, we allocate undistributed and distributed earnings to the outstanding unvested awards in our calculation of EPU.

The following is a reconciliation of Net Income of ARLP and net income used for calculating basic earnings per unit and the weighted average units used in computing EPU for the three and six months ended June 30, 2010 and 2009, respectively, (in thousands, except per unit data):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Net Income of ARLP	\$ 85,461	\$ 41,460	\$ 160,449	\$ 113,971
Adjustments:				
General partner s priority distributions	(16,579)	(14,219)	(32,439)	(27,900)
General partners 2% equity ownership	(1,378)	(545)	(2,560)	(1,721)
Limited partners interest in Net Income of ARLP	67,504	26,696	125,450	84,350
Less:				
Distributions on LTIP awards outstanding	(308)	(248)	(608)	(491)
Undistributed earnings attributable to LTIP awards	(384)		(674)	(279)
Net Income of ARLP available to limited partners	\$ 66,812	\$ 26,448	\$ 124,168	\$ 83,580
Weighted average limited partner units outstanding Basic and Diluted	36,717	36,661	36,704	36,650
Basic and Diluted Net Income of ARLP per limited partner unit (1)	\$ 1.82	\$ 0.72	\$ 3.38	\$ 2.28

Edgar Filing: ALLIANCE RESOURCE PARTNERS LP - Form 10-Q

- (1) Diluted EPU gives effect to all dilutive potential common units outstanding during the period using the treasury stock method. Diluted EPU excludes all dilutive potential units calculated under the treasury stock method if their effect is anti-dilutive. For the three and six months ended June 30, 2010 and 2009, LTIP units of 210,328, 155,927, 206,988 and 143,484, respectively, were considered anti-dilutive under the treasury stock method.

Table of Contents**8. WORKERS COMPENSATION AND PNEUMOCONIOSIS (BLACK LUNG)**

The changes in the workers compensation liability (including current and long-term liability balances) for each of the periods presented were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Beginning balance	\$ 66,371	\$ 56,350	\$ 63,220	\$ 56,671
Accruals increase	5,005	4,749	9,811	9,147
Payments	(2,293)	(2,625)	(4,818)	(5,953)
Interest accretion	833	864	1,666	1,728
Valuation loss	134	3,744	171	1,489
Ending balance	\$ 70,050	\$ 63,082	\$ 70,050	\$ 63,082

Pneumoconiosis

The Patient Protection and Affordable Care Act, which was signed into law by President Obama in March 2010, amended previous legislation related to coal workers Black Lung providing automatic extension of awarded lifetime benefits to surviving spouses and providing changes to the legal criteria used to assess and award claims. We are presently unable to estimate the impact of this legislation on our obligations and our future service period charges related to future claims due to uncertainty about the number of claims that will be filed, how the new award criteria will impact these claim populations and the effect of regulations relating to the retroactive application of certain criteria. We expect to complete an evaluation of the obligation by the end of fiscal year 2010. For more information, please see Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Health Care Reform in this Quarterly Report on Form 10-Q.

9. COMPENSATION PLANS

We maintain the LTIP for certain employees and officers of our managing general partner and its affiliates who perform services for us. The LTIP awards are grants of non-vested notional units, which upon satisfaction of vesting requirements entitle the LTIP participant to receive ARLP common units. On January 26, 2010, the compensation committee of the board of directors (Compensation Committee) determined that the vesting requirements for the 2007 grants of 88,975 units (which are net of 4,500 forfeitures) had been satisfied as of January 1, 2010. As a result of this vesting, on February 12, 2010, we issued 55,826 unrestricted common units to LTIP participants. The remaining units were settled in cash to satisfy the individual tax withholding obligations for the LTIP participants. On February 1, 2010, the Compensation Committee authorized additional grants up to 143,145 restricted units, of which 138,130 were granted during the six months ended June 30, 2010, all of which will vest on January 1, 2013 subject to satisfaction of certain financial tests. The fair

Table of Contents

value of these 2010 grants is equal to the intrinsic value at the date of grant, which was \$39.59 per unit on a weighted average basis. LTIP expense was \$1.0 million, \$0.9 million, \$1.9 million and \$1.7 million for the three and six months ended June 30, 2010 and 2009, respectively. On October 23, 2009, our unitholders approved the third amendment (Third Amendment) to the LTIP. The Third Amendment was previously authorized by the Board of Directors of our managing general partner, subject to unitholder approval. The Third Amendment increased the number of units available for issuance under the LTIP from 1.2 million to 3.6 million, providing 2.4 million units for satisfaction of future awards. After consideration of the January 1, 2010 vesting and subsequent issuance of 55,826 common units, approximately 2.3 million units remain available for issuance in the future, assuming all grants issued in 2008, 2009 and 2010 currently outstanding are settled with common units and no future forfeitures occur.

As of June 30, 2010, there was \$6.9 million in total unrecognized compensation expense related to the non-vested LTIP grants that are expected to vest. That expense is expected to be recognized over a weighted-average period of 1.6 years. As of June 30, 2010, the intrinsic value of the non-vested LTIP grants was \$17.1 million. As of June 30, 2010, the total obligation associated with the LTIP was \$5.5 million and is included in the partners' capital-limited partners line item in our condensed consolidated balance sheets.

As provided under the distribution equivalent rights provisions of the LTIP, all non-vested grants include contingent rights to receive quarterly cash distributions in an amount equal to the cash distributions we make to unitholders during the vesting period.

10. COMPONENTS OF PENSION PLAN NET PERIODIC BENEFIT COSTS

Eligible employees at certain of our mining operations participate in a defined benefit plan (the Pension Plan) that we sponsor. The benefit formula for the Pension Plan is a fixed dollar unit based on years of service. Components of the net periodic benefit cost for each of the periods presented are as follows (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Service cost	\$ 713	\$ 667	\$ 1,426	\$ 1,334
Interest cost	840	754	1,679	1,509
Expected return on plan assets	(924)	(608)	(1,846)	(1,216)
Amortization of net loss	269	356	538	711
Net periodic benefit cost	\$ 898	\$ 1,169	\$ 1,797	\$ 2,338

We previously disclosed in our financial statements for the year ended December 31, 2009 that we expected to contribute \$9.8 million to the Pension Plan in 2010 for the 2009 plan year. During 2010, we received a final funding report for the 2009 plan year, which included updated assumptions on expected retirement patterns, interest rate analysis and asset value method. The finalization of these assumptions significantly decreased our required funding in 2010 for the 2009 plan year. During the six months ended June 30, 2010, we made a quarterly contribution payment of \$0.6 million and will make a final contribution payment of \$0.4 million by September 15, 2010 for the 2009 plan year. During the six months ended June 30, 2010, we also made a quarterly contribution payment of \$0.7 million for the 2010 plan year.

Table of Contents**11. COMPREHENSIVE INCOME**

Total comprehensive income for the three and six months ended June 30, 2010 and 2009, respectively, is as follows (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Net income	\$ 85,461	\$ 41,510	\$ 160,449	\$ 114,150
Other comprehensive income:				
Unrealized gain on marketable securities		567		567
Pension (Note 10)	269	356	538	711
Total other comprehensive income	269	923	538	1,278
Total comprehensive income	85,730	42,433	160,987	115,428
Less comprehensive income attributable to noncontrolling interest		(50)		(179)
Comprehensive income attributable to ARLP	\$ 85,730	\$ 42,383	\$ 160,987	\$ 115,249

Comprehensive income differs from net income due to an unrealized gain on our available for sale marketable securities resulting from valuation changes (2009 only) and amortization of actuarial loss associated with adoption of amendments to FASB ASC 715, *Compensation Retirement Benefits*.

12. SEGMENT INFORMATION

We operate in the eastern U.S. as a producer and marketer of coal to major utilities and industrial users. We have four reportable segments: Illinois Basin, Central Appalachia, Northern Appalachia and Other and Corporate. The first three segments correspond to the three major coal producing regions in the eastern U.S. Coal quality, coal seam height, mining and transportation methods and regulatory issues are similar within each of these three segments.

The Illinois Basin segment is comprised of Webster County Coal, LLC's Dotiki mining complex, Gibson County Coal, LLC's Gibson North mining complex, Hopkins County Coal, LLC's Elk Creek mining complex, White County Coal's Pattiki mining complex, Warrior Coal, LLC's mining complex, River View's mining complex, which initiated operations in 2009, the Sebree Mining, LLC (Sebree) property, the Gibson County Coal (South), LLC (Gibson South) property and certain properties of Alliance Resource Properties, LLC (Alliance Resource Properties) and its wholly-owned subsidiary, ARP Sebree, LLC. We are in the process of permitting the Gibson South property and the Sebree property for future mine development.

The Central Appalachian segment is comprised of Pontiki Coal, LLC's and MC Mining, LLC's mining complexes.

The Northern Appalachian segment is comprised of Mettiki Coal, LLC's mining complex, Mettiki Coal (WV) LLC's Mountain View mining complex, two small third-party mining operations (one of which was idled in May 2009 and restarted in February 2010), a mining complex currently under construction at Tunnel Ridge, LLC (Tunnel Ridge) and the Penn Ridge Coal, LLC (Penn Ridge) property. In May 2010, incidental production began from mine development activities at Tunnel Ridge; longwall production is not anticipated until late 2011. We are in the process of permitting the Penn Ridge property for future mine development.

Table of Contents

Other and Corporate includes marketing and administrative expenses, Matrix Design Group, LLC (Matrix Design), Alliance Design Group, LLC (Alliance Design), the Mt. Vernon Transfer Terminal, LLC (Mt. Vernon) dock activities, coal brokerage activity, our equity investment in MAC and certain properties of Alliance Resource Properties. Segment results for the three and six months ended June 30, 2010 and 2009 are presented below.

	Illinois Basin	Central Appalachia	Northern Appalachia	Other and Corporate	Elimination (1)	Consolidated
	(in thousands)					
Operating segment results for the three months ended June 30, 2010:						
Total revenues (2)	\$ 296,949	\$ 40,928	\$ 57,973	\$ 10,835	\$ (6,342)	\$ 400,343
Segment Adjusted EBITDA Expense (3)	174,590	31,921	41,616	9,157	(6,342)	250,942

Capital expenditures	74,920	2,687	10,029	1,452		89,088
Operating segment results for the six months ended June 30, 2010:						
Total revenues (2)	\$ 591,586	\$ 80,690	\$ 98,975	\$ 21,346	\$ (11,593)	\$ 781,004
Segment Adjusted EBITDA Expense (3)	347,443	64,746	73,587	18,018	(11,593)	492,201
Segment Adjusted EBITDA (4)	230,001	15,834	21,111	3,331		270,277
Total assets	759,487	80,656	286,740	29,326	(2,707)	1,153,502
Capital expenditures	83,389	4,520	85,991	948		174,848
Operating segment results for the six months ended June 30, 2009:						
Total revenues (2)	\$ 458,313	\$ 96,338	\$ 70,857	\$ 17,941	\$ (10,245)	\$ 633,204
Segment Adjusted EBITDA Expense (3)	272,524	71,945	58,284	13,027	(10,163)	405,617
Segment Adjusted EBITDA (4)	167,770	22,969	8,337	4,909	(82)	203,903
Total assets	654,320	88,429	163,443	179,197	(85)	1,085,304
Capital expenditures	132,404	7,710	32,321	2,250		174,685

- (1) The elimination column represents the elimination of intercompany transactions and is primarily comprised of sales from Matrix Design, Alliance Design and MAC (for 2009 only; see Note 13) to our mining operations.
- (2) Revenues included in the Other and Corporate column are primarily attributable to Matrix Design revenues, Alliance Design revenues, Mt. Vernon transloading revenues, administrative service revenues from affiliates, MAC rock dust revenues (for 2009 only; see Note 13) and brokerage sales.
- (3) Segment Adjusted EBITDA Expense (a non-GAAP financial measure) includes operating expenses, outside coal purchases and other income. Transportation expenses are excluded as these expenses are passed through to our customers and consequently we do not realize any gain or loss on transportation revenues. We review Segment Adjusted EBITDA Expense per ton for cost trends.

Table of Contents

The following is a reconciliation of consolidated Segment Adjusted EBITDA Expense to operating expenses (excluding depreciation, depletion and amortization), the most comparable GAAP measure (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Segment Adjusted EBITDA Expense	\$ 250,942	\$ 204,707	\$ 492,201	\$ 405,617
Outside coal purchases	(4,544)	(432)	(6,386)	(5,192)
Other income	304	202	154	428
Operating expenses (excluding depreciation, depletion and amortization)	\$ 246,702	\$ 204,477	\$ 485,969	\$ 400,853

- (4) Segment Adjusted EBITDA (a non-GAAP measure) is defined as Net Income of ARLP before net interest expense, income taxes, depreciation, depletion and amortization, net income attributable to noncontrolling interest and general and administrative expenses. Management therefore is able to focus solely on the evaluation of segment operating profitability as it relates to our revenues and operating expenses, which are primarily controlled by our segments. Consolidated Segment Adjusted EBITDA is reconciled to net income and Net Income of ARLP, the most comparable GAAP measure, as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Segment Adjusted EBITDA	\$ 140,580	\$ 86,403	\$ 270,277	\$ 203,903
General and administrative	(11,628)	(9,307)	(22,329)	(19,041)
Depreciation, depletion and amortization	(35,677)	(28,272)	(71,973)	(55,622)
Interest expense, net	(7,391)	(7,515)	(14,935)	(14,865)
Income tax (expense) benefit	(423)	201	(591)	(225)
Net income	85,461	41,510	160,449	114,150
Net income attributable to noncontrolling interest		(50)		(179)
Net Income of ARLP	\$ 85,461	\$ 41,460	\$ 160,449	\$ 113,971

13. NONCONTROLLING INTEREST

We apply the provisions of FASB ASC 810, *Consolidation*, which were amended on January 1, 2010. Based on our evaluation of these amendments, we deconsolidated MAC effective January 1, 2010 (Note 2).

White County Coal and Alexander J. House (House) entered into a limited liability company agreement in 2006 to form MAC, which manufactures and sells rock dust. Consistent with prior years, we have a 50% ownership interest in MAC. Previously, we consolidated MAC's financial results in accordance with FASB ASC 810. However, based on the provisions of ASU 2009-17, we concluded that we are no longer the primary beneficiary of MAC and thus deconsolidated MAC as House has the power to direct the activities that most significantly impact the entity's economic performance.

Table of Contents

We adopted the amendments to FASB ASC 810 on January 1, 2010. As a result, we reclassified \$1.1 million from noncontrolling interest in partners' capital to other long-term assets in our condensed consolidated balance sheets. We did not retrospectively apply the provisions of ASU 2009-17 as allowed by the amendments. Our equity investment in MAC is \$1.2 million at June 30, 2010.

MAC has a \$1.75 million Revolving Credit Agreement (Revolver) with ARLP. On November 17, 2009, MAC entered into Amendment No. 2, effective June 30, 2009, which increased the Revolver to \$1.75 million from \$1.5 million. The Revolver is scheduled to expire on December 31, 2010. At June 30, 2010, MAC owed ARLP \$1.7 million under the Revolver, which is classified as Due From Affiliates on our condensed consolidated balance sheets.

14. SUBSEQUENT EVENTS

On July 26, 2010, we declared a quarterly distribution for the quarter ended June 30, 2010, of \$0.81 per unit, on all common units outstanding, totaling approximately \$46.9 million (which includes our managing general partner's incentive distributions), payable on August 13, 2010 to all unitholders of record as of August 6, 2010.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Significant relationships referenced in this management's discussion and analysis of financial condition and results of operations include the following:

References to we, us, our or ARLP Partnership mean the business and operations of Alliance Resource Partners, L.P., the parent company as well as its consolidated subsidiaries.

References to ARLP mean Alliance Resource Partners, L.P., individually as the parent company, and not on a consolidated basis.

References to MGP mean Alliance Resource Management GP, LLC, the managing general partner of Alliance Resource Partners, L.P., also referred to as our managing general partner.

References to SGP mean Alliance Resource GP, LLC, the special general partner of Alliance Resource Partners, L.P., also referred to as our special general partner.

References to Intermediate Partnership mean Alliance Resource Operating Partners, L.P., the intermediate partnership of Alliance Resource Partners, L.P., also referred to as our intermediate partnership.

References to Alliance Coal mean Alliance Coal, LLC, the holding company for the operations of Alliance Resource Operating Partners, L.P., also referred to as our operating subsidiary.

References to AHGP mean Alliance Holdings GP, L.P., individually as the parent company, and not on a consolidated basis.

References to AGP mean Alliance GP, LLC, the general partner of Alliance Holdings GP, L.P.

Summary

We are a diversified producer and marketer of coal primarily to major United States (U.S.) utilities and industrial users. We began mining operations in 1971 and, since then, have grown through acquisitions and internal development to become what we believe to be the fifth largest coal producer in the eastern U.S. We operate nine mining complexes in Illinois, Indiana, Kentucky, Maryland and West Virginia. We are constructing a new mining complex in West Virginia. We also operate a coal loading terminal on the Ohio River at Mt. Vernon, Indiana. As is customary in the coal industry, we have entered into long-term coal supply agreements with many of our customers.

We have four reportable segments: Illinois Basin, Central Appalachia, Northern Appalachia and Other and Corporate. The first three segments correspond to the three major coal producing regions in the eastern U.S. Coal quality, coal seam height, mining and transportation methods and regulatory issues are similar within each of these three segments.

Illinois Basin segment is comprised of Webster County Coal, LLC's Dotiki mining complex (Dotiki), Gibson County Coal, LLC's Gibson North mining complex, Hopkins County Coal, LLC's Elk Creek mining complex, White County Coal, LLC's Pattiki mine (Pattiki), Warrior Coal, LLC's (Warrior) mining complex, River View Coal, LLC's (River View) mining complex, which initiated operations in 2009, the Sebree Mining, LLC (Sebree) property, the Gibson County Coal (South), LLC (Gibson South) property and certain properties of Alliance Resource Properties, LLC (Alliance Resource Properties) and its wholly-owned subsidiary, ARP Sebree, LLC. We are in the process of permitting the Gibson South property and the Sebree property for future mine development.

Central Appalachian segment is comprised of Pontiki Coal, LLC s (Pontiki) and MC Mining, LLC s (MC Mining) mining complexes.

Table of Contents

Northern Appalachian segment is comprised of Mettiki Coal, LLC's mining complex, Mettiki Coal (WV), LLC's Mountain View mining complex, two small third-party mining operations (one of which was idled in May 2009 and restarted in February 2010), a mining complex currently under construction at Tunnel Ridge, LLC (Tunnel Ridge) and the Penn Ridge Coal, LLC (Penn Ridge) property. In May 2010, incidental production began from mine development activities at Tunnel Ridge; longwall production is not anticipated until late 2011. We are in the process of permitting the Penn Ridge property for future mine development.

Other and Corporate segment includes marketing and administrative expenses, Matrix Design Group, LLC (Matrix Design), Alliance Design Group, LLC, the Mt. Vernon Transfer Terminal, LLC (Mt. Vernon) dock activities, coal brokerage activity, our equity investment in Mid-America Carbonates, LLC (MAC) and certain properties of Alliance Resource Properties.

Health Care Reform

On March 23, 2010, President Obama signed into law the Patient Protection and Affordable Care Act. Additionally, on March 30, 2010, President Obama signed into law a reconciliation measure, the Health Care and Education Reconciliation Act of 2010. The passage of the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act (collectively, the Health Care Act) will result in comprehensive changes to health care in the United States. Implementation of this legislation is planned to occur in phases, with plan standard changes taking effect beginning in 2010, but to a greater extent with the 2011 benefit plan year and extending through 2018.

The Health Care Act has both short-term and long-term implications on benefit plan eligibility, coverage requirements, and benefit standards and limitations. In the short term, our healthcare costs are expected to increase due to raising the maximum age and easing of eligibility limitations for covered dependents. The Health Care Act also prevents the group health plan from limiting benefit payments for participants who meet or exceed annual or lifetime dollar limits per covered individual. In the long term, our healthcare costs could increase for various reasons due to the Health Care Act, including the potential impact of an excise tax on high cost plans (beginning in 2018), among other standard requirements.

We anticipate that certain government agencies will provide additional regulations or interpretations concerning the application of the Health Care Act and reporting required thereunder. Until these regulations or interpretations are published, we are unable to reasonably estimate the impact of such federal mandate requirements on our future healthcare costs.

We will continue to evaluate the potential impact of the legislation on our self-insured long term disability plan, pneumoconiosis (Black Lung) liabilities, results of operations and internal controls as governmental agencies issue interpretations regarding the meaning and scope of the Health Care Act. However, we believe it is likely that our costs will increase as a result of these provisions, which may have an adverse impact on our results of operations and cash flows.

Financial Reform

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The Dodd-Frank Act gives regulators new resolution authority, creates a new council to monitor and address systematic risk, changes the mandate of the Federal Reserve, imposes significant new regulations on banking organizations, makes significant changes to the rules that affect the process of financing business enterprises and creates a new governmental authority, the Bureau of Consumer Financial Protection, to regulate retail financial products and services, among many other provisions. The Dodd-Frank Act also requires public mining companies to report certain safety information in each periodic report filed with SEC and to file Form 8-K for certain safety matters. We are currently evaluating the effect, if any, of the Dodd-Frank Act on our operations.

Three Months Ended June 30, 2010 Compared to Three Months Ended June 30, 2009

We reported record Net Income of ARLP of \$85.5 million for the three months ended June 30, 2010 (2010 Quarter) compared to \$41.5 million for the three months ended June 30, 2009 (2009 Quarter). This increase of \$44.0 million was principally due to record tons sold and improved pricing resulting in a record quarterly average coal sales price of \$51.53 per ton sold, as compared to \$46.04 per ton sold for the 2009 Quarter. We had record tons sold of 7.5 million tons and higher tons produced of 6.9 million tons in the 2010 Quarter, compared to 6.2 million tons sold and 6.3 million tons produced in

Table of Contents

the 2009 Quarter. This increase in produced tons primarily reflects increased production from our new River View mine. Higher operating expenses during the 2010 Quarter resulted primarily from increased sales and production volumes, which particularly impacted materials and supplies expenses and sales-related expenses. Increased operating expenses also reflect an increase in labor and labor-related expenses as well as higher costs associated with beginning coal inventories sold in the 2010 Quarter.

	Three Months Ended June 30,			
	2010 (in thousands)	2009	2010 (per ton sold)	2009
Tons sold	7,489	6,247	N/A	N/A
Tons produced	6,917	6,324	N/A	N/A
Coal sales	\$ 385,905	\$ 287,620	\$ 51.53	\$ 46.04
Operating expenses and outside coal purchases	\$ 251,246	\$ 204,909	\$ 33.55	\$ 32.80

Coal sales. Coal sales for the 2010 Quarter increased 34.2% to \$385.9 million from \$287.6 million for the 2009 Quarter. The increase of \$98.3 million in coal sales reflected the benefit of record tons sold (contributing \$57.2 million in coal sales) and record average coal sales prices (contributing \$41.1 million in additional coal sales). Average coal sales prices in the 2010 Quarter increased \$5.49 per ton sold to \$51.53 per ton in the 2010 Quarter compared to \$46.04 per ton in the 2009 Quarter primarily as a result of improved contract pricing across all regions.

Operating expenses. Operating expenses increased 20.7% to \$246.7 million for the 2010 Quarter from \$204.5 million for the 2009 Quarter primarily due to record coal sales and increased production volumes. Operating expenses were impacted by various other factors, the most significant of which are discussed below:

Labor and benefit expenses per ton produced, excluding workers' compensation, decreased 2.4% to \$11.15 per ton in the 2010 Quarter from \$11.42 per ton in the 2009 Quarter. This decrease of \$0.27 per ton was primarily due to increased production volumes at our new River View mine (which has relatively lower production costs), partially offset by increased mine development labor at our Tunnel Ridge mine, increased regulatory oversight, particularly at our Central Appalachian mines, and production disruptions at our Dotiki and Pattiki mines;

Workers' compensation expenses per ton produced decreased to \$1.06 per ton in the 2010 Quarter from \$1.73 per ton in the 2009 Quarter. The decrease of \$0.67 per ton produced resulted primarily from a non-cash charge during the 2009 Quarter due to a discount rate change, which increased the accrued liabilities for the present value of estimated future claim payments;

Material and supplies expenses per ton produced increased 8.8% to \$10.40 per ton in the 2010 Quarter from \$9.56 per ton in the 2009 Quarter. The increase of \$0.84 per ton produced resulted from increased costs for certain products and services, such as transportation costs (increase of \$0.39 per ton), roof support (increase of \$0.23 per ton), safety expenses (increase of \$0.15 per ton) and fuel and power used in the mining process (increase of \$0.14 per ton), partially offset by decreased costs per ton in various other categories;

Table of Contents

Maintenance expenses per ton produced decreased 7.9% to \$3.61 per ton in the 2010 Quarter from \$3.92 per ton in the 2009 Quarter. The decrease of \$0.31 per ton produced resulted primarily from the benefit of newer equipment and increased production at our new River View mining complex, partially offset by higher maintenance costs for our mine development project at Tunnel Ridge;

Mine administration expenses increased \$2.3 million for the 2010 Quarter compared to the 2009 Quarter, primarily due to higher costs resulting from increased Matrix Design product sales and higher mine administration expense at River View and our mine development project at Tunnel Ridge;

Contract mining expenses increased \$1.8 million for the 2010 Quarter compared to the 2009 Quarter. The increase primarily reflects the restart of a third-party mining operation in our Northern Appalachian region during February 2010 that was previously idled in May 2009 (due to weak demand in the export and spot coal markets) and increased production from existing operations in Northern Appalachia, both in response to increased demand in the export coal market;

Production taxes and royalties expenses (which were incurred as a percentage of coal sales prices and volumes) increased \$0.46 per produced ton sold in the 2010 Quarter compared to the 2009 Quarter primarily as a result of increased average coal sales prices across all regions;

Operating expenses also increased in the 2010 Quarter due to 1.5 million tons sold from beginning coal inventory compared to 0.8 million tons sold from beginning coal inventory in the 2009 Quarter, partially offset by lower beginning inventory costs per ton sold in the 2010 Quarter as compared to the 2009 Quarter;

Operating expenses for the 2010 Quarter included \$1.2 million related to the retirement of certain assets related to the failed vertical hoist conveyor system at our Pattiki mine. For more information on Pattiki, please read Part I. Item 1. Financial Statements (Unaudited) Note 4. Pattiki Vertical Hoist Conveyor System Failure of this Quarterly Report on Form 10-Q; and

Certain operating expenses incurred during the 2010 Quarter related to River View and our Tunnel Ridge mine development project increased \$29.2 million over the 2009 Quarter. These expenses are generally included in the variances discussed above.

General and administrative. General and administrative expenses for the 2010 Quarter increased to \$11.6 million compared to \$9.3 million in the 2009 Quarter. The increase of \$2.3 million was primarily due to increases in incentive compensation expense.

Other sales and operating revenues. Other sales and operating revenues are principally comprised of Mt. Vernon transloading revenues, products and services provided by MAC (in the 2009 Quarter only), Matrix Design and other outside services and administrative services revenue from affiliates. Other sales and operating revenues increased to \$5.6 million for the 2010 Quarter from \$3.5 million for the 2009 Quarter. The increase of \$2.1 million was primarily attributable to increased Matrix Design product sales partially offset by decreased rock dust revenues reflecting the deconsolidation of MAC. For more information about MAC, please read Part I. Item 1. Financial Statements (Unaudited) Note 13. Noncontrolling Interest of this Quarterly Report on Form 10-Q.

Table of Contents

Outside coal purchases. Outside coal purchases increased to \$4.5 million for the 2010 Quarter compared to \$0.4 million in the 2009 Quarter. The increase of \$4.1 million was primarily attributable to increased outside coal purchases predominately in our Northern Appalachian region due to increased demand in the export coal markets.

Depreciation, depletion and amortization. Depreciation, depletion and amortization expense increased to \$35.7 million for the 2010 Quarter from \$28.3 million for the 2009 Quarter. The increase of \$7.4 million was attributable to additional depreciation expense associated with continuing capital expenditures related to infrastructure improvements, efficiency projects and expansion of production capacity, particularly at our River View mine.

Interest expense. Interest expense, net of capitalized interest, decreased to \$7.4 million for the 2010 Quarter from \$7.8 million for the 2009 Quarter. The decrease of \$0.4 million was principally attributable to reduced interest expense resulting from our August 2009 principal repayment of \$18.0 million on our original senior notes issued in 1999, partially offset by increased interest expense for borrowings on our \$150.0 million revolving credit facility (ARLP Credit Facility) during the 2010 Quarter, each of which are discussed in more detail below under Debt Obligations.

Transportation revenues and expenses. Transportation revenues and expenses were \$8.8 million and \$12.8 million for the 2010 and 2009 Quarters, respectively. The decrease of \$4.0 million was primarily attributable to reduced tonnage for which we arrange transportation from our Warrior and MC Mining mines. The 2010 Quarter transportation revenue reduction at Warrior primarily reflects certain customers requiring transportation assistance in the 2009 Quarter that no longer required the same assistance in the 2010 Quarter. MC Mining's reduced transportation tonnage resulted primarily from one customer with significant transportation costs in the 2009 Quarter that received no coal shipments from MC Mining subsequent to the 2009 Quarter. The cost of transportation services are passed through to our customers. Consequently, we do not realize any gain or loss on transportation revenues.

Income tax expense (benefit). Income tax expense was \$0.4 million for the 2010 Quarter compared to an income tax benefit of \$0.2 million for the 2009 Quarter. Income taxes are primarily due to the operations of Matrix Design, which is owned by our subsidiary, Alliance Service, Inc. Increased taxes reflect higher net income in the 2010 Quarter from our Matrix Design operation.

Net income attributable to noncontrolling interest. The noncontrolling interest for the 2009 Quarter represents a 50% third-party interest in MAC. The third-party's portion of MAC's net income was \$0.1 million for the 2009 Quarter. Effective January 1, 2010, we deconsolidated MAC based on amendments to the provisions of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 810, Consolidation. For more information about MAC, please read Part I. Item 1. Financial Statements (Unaudited) Note 13. Noncontrolling Interest of this Quarterly Report on Form 10-Q.

Table of Contents

Segment Adjusted EBITDA. Our 2010 Quarter Segment Adjusted EBITDA increased \$54.2 million, or 62.7%, to a record \$140.6 million from the 2009 Quarter Segment Adjusted EBITDA of \$86.4 million. Segment Adjusted EBITDA, tons sold, coal sales, other sales and operating revenues and Segment Adjusted EBITDA Expense by segment are (in thousands):

	Three Months Ended		Increase/(Decrease)

(1) Percentage change was greater than or equal to 100%.

Table of Contents

- (2) Segment Adjusted EBITDA (a non-GAAP measure) is defined as Net Income of ARLP before net interest expense, income taxes, depreciation, depletion and amortization, net income attributable to noncontrolling interest and general and administrative expenses. Segment Adjusted EBITDA is a key component of consolidated EBITDA, which is used as a supplemental financial measure by management and by external users of our financial statements such as investors, commercial banks, research analysts and others, to assess:

the financial performance of our assets without regard to financing methods, capital structure or historical cost basis;

the ability of our assets to generate cash sufficient to pay interest costs and support our indebtedness;

our operating performance and return on investment as compared to those of other companies in the coal energy sector, without regard to financing or capital structures; and

the viability of acquisitions and capital expenditure projects and the overall rates of return on alternative investment opportunities. Segment Adjusted EBITDA is also used as a supplemental financial measure by our management for reasons similar to those stated in the above explanation of EBITDA. In addition, the exclusion of corporate general and administrative expenses from Segment Adjusted EBITDA allows management to focus solely on the evaluation of segment operating profitability as it relates to our revenues and operating expenses, which are primarily controlled by our segments.

The following is a reconciliation of consolidated Segment Adjusted EBITDA to net income and Net Income of ARLP, the most comparable GAAP measure (in thousands):

	Three Months Ended June 30,	
	2010	2009
Segment Adjusted EBITDA	\$ 140,580	\$ 86,403
General and administrative	(11,628)	(9,307)
Depreciation, depletion and amortization	(35,677)	(28,272)
Interest expense, net	(7,391)	(7,515)
Income tax (expense) benefit	(423)	201
Net income	\$ 85,461	\$ 41,510
Net income attributable to noncontrolling interest		(50)
Net Income of ARLP	\$ 85,461	\$ 41,460

- (3) Segment Adjusted EBITDA Expense (a non-GAAP measure) includes operating expenses, outside coal purchases and other income. Transportation expenses are excluded as these expenses are passed through to our customers and, consequently, we do not realize any gain or loss on transportation revenues. Segment Adjusted EBITDA Expense is used as a supplemental financial measure by our management to assess the operating performance of our segments. Segment Adjusted EBITDA Expense is a key component of EBITDA in addition to coal sales and other sales and operating revenues. The exclusion of corporate general and administrative expenses from Segment Adjusted EBITDA Expense allows management to focus solely on the evaluation of segment operating performance as it primarily relates to our operating expenses. Outside coal purchases are included in Segment Adjusted EBITDA Expense because tons sold and coal sales include sales from outside coal purchases.

Table of Contents

The following is a reconciliation of consolidated Segment Adjusted EBITDA Expense to operating expense, the most comparable GAAP measure (in thousands):

	Three Months Ended June 30,	
	2010	2009
Segment Adjusted EBITDA Expense	\$ 250,942	\$ 204,707
Outside coal purchases	(4,544)	(432)
Other income	304	202
Operating expense (excluding depreciation, depletion and amortization)	\$ 246,702	\$ 204,477

Illinois Basin Segment Adjusted EBITDA increased 50.5% to \$115.9 million in the 2010 Quarter from \$77.0 million in the 2009 Quarter. The increase of \$38.9 million was primarily attributable to a 20.8% increase in tons sold to 6.1 million tons in the 2010 Quarter, as well as strong contract pricing reflecting a higher average coal sales price of \$47.47 per ton sold during the 2010 Quarter compared to \$43.06 per ton sold for the 2009 Quarter. Coal sales increased 33.1% to \$290.2 million in the 2010 Quarter compared to \$218.0 million in the 2009 Quarter. The increase of \$72.2 million primarily reflects increased sales from our new River View mine (which commenced operations in August 2009 and continued to expand production during the 2010 Quarter), partially offset by production disruptions at our Dotiki and Pattiki mines. Total Segment Adjusted EBITDA Expense for the 2010 Quarter increased 23.7% to \$174.6 million from \$141.1 million in the 2009 Quarter and increased \$0.68 per ton sold to \$28.56 from \$27.88 per ton sold, primarily as a result of certain cost increases described above under consolidated operating expenses as well as a \$1.2 million loss on the retirement of certain assets related to the failed vertical hoist conveyor system at our Pattiki mine. For more information on Pattiki, please read Part I. Item 1. Financial Statements (Unaudited) Note 4. Pattiki Vertical Hoist Conveyor System Failure of this Quarterly Report on Form 10-Q.

Central Appalachia Segment Adjusted EBITDA increased 44.9% to \$8.9 million for the 2010 Quarter compared to \$6.1 million in the 2009 Quarter. The increase of \$2.8 million was primarily attributable to strong contract pricing reflecting a higher average coal sales price of \$75.24 per ton sold during the 2010 Quarter compared to \$66.70 per ton sold for the 2009 Quarter, partially offset by lower sales volumes due to the timing of contract shipments, reduced production due to increased regulatory oversight and the continued impact of idling one mining unit at Pontiki in July 2009. Segment Adjusted EBITDA Expense per ton sold during the 2010 Quarter increased to \$58.82 compared to \$56.69 per ton sold in the 2009 Quarter, an increase of \$2.13 per ton sold reflecting certain cost increases described above under consolidated operating expenses, as well as lower production volumes and increased regulatory cost. Although Segment Adjusted EBITDA Expense per ton sold increased in the 2010 Quarter, Segment Adjusted EBITDA Expense for the 2010 Quarter decreased 8.4% to \$31.9 million from \$34.8 million in the 2009 Quarter primarily as a result of lower coal sales volumes offset in part by higher expenses per ton as described above.

Northern Appalachia Segment Adjusted EBITDA increased to \$14.1 million for the 2010 Quarter as compared to \$1.6 million in the 2009 Quarter. This increase of \$12.5 million was primarily attributable to strong contract pricing reflecting a higher average sales price of \$65.87 per ton sold for the 2010 Quarter compared to \$50.25 per ton sold for the 2009 Quarter, as well as increased tons sold which increased 46.1% to 0.8 million tons in the 2010 Quarter, both resulting from improved demand in the export coal markets. Total Segment Adjusted EBITDA Expense for the 2010 Quarter increased 50.1% to \$41.6 million from \$27.7 million in the 2009 Quarter and increased \$1.34 per ton sold to \$49.97 from

Table of Contents

\$48.63 per ton sold, primarily as a result of higher coals sales volumes, lower coal recoveries, as well as the other cost increases described above under consolidated operating expenses, including expenses incurred related to our Tunnel Ridge mine development project, increased coal purchases, the resumption in February 2010 of a third-party mining operation that had been idled in May 2009 and increased production from existing operations. Increased outside coal purchases and third-party mining production were both in response to improved demand, as noted above.

Other and Corporate Segment Adjusted EBITDA was \$1.7 million in the 2010 Quarter and the 2009 Quarter. Other sales and operating revenues increased 33.4% to \$10.8 million for the 2010 Quarter compared to \$8.1 million for the 2009 Quarter. The increase of \$2.7 million was primarily attributable to increased third-party sales of mine safety equipment by Matrix Design. Segment Adjusted EBITDA Expense increased 42.5% to \$9.2 million for the 2010 Quarter, primarily due to increased expenses associated with higher outside services revenue and product sales at Matrix Design.

Six Months Ended June 30, 2010 Compared to Six Months Ended June 30, 2009

We reported record Net Income of ARLP of \$160.4 million for the six months ended June 30, 2010 (2010 Period) compared to \$114.0 million for the six months ended June 30, 2009 (2009 Period). This increase of \$46.4 million was principally due to increased tons sold and improved contract pricing resulting in an average coal sales price of \$50.44 per ton sold, as compared to \$47.33 per ton sold for the 2009 Period. We had tons sold of 14.9 million and tons produced of 14.5 million for the 2010 Period compared to 12.7 million tons sold and 13.2 million tons produced for the 2009 Period. This increase in produced tons primarily reflects increased production from our new River View mine and resulted in higher operating expenses during the 2010 Period, particularly impacting materials and supplies expenses and sales-related expenses. Increased operating expenses also reflect the increase in labor and labor-related expenses as well as higher costs associated with beginning coal inventories.

	Six Months Ended June 30,			
	2010 (in thousands)	2009	2010 (per ton sold)	2009
Tons sold	14,870	12,674	N/A	N/A
Tons produced	14,461	13,196	N/A	N/A
Coal sales	\$ 750,064	\$ 599,880	\$ 50.44	\$ 47.33
Operating expenses and outside coal purchases	\$ 492,355	\$ 406,045	\$ 33.11	\$ 32.04

Coal sales. Coal sales for the 2010 Period increased 25.0% to \$750.1 million from \$599.9 million for the 2009 Period. The increase of \$150.2 million in coal sales reflected the benefit of increased tons sold (contributing \$103.9 million in coal sales) and higher average coal sales prices (contributing \$46.3 million in additional coal sales). Average coal sales prices increased \$3.11 per ton sold to \$50.44 per ton in the 2010 Period as compared to the 2009 Period, primarily as a result of improved contract pricing across all regions.

Operating expenses. Operating expenses increased 21.2% to \$486.0 million for the 2010 Period from \$400.9 million for the 2009 Period primarily due to record coal sales and increased production volumes. Operating expenses were impacted by various other factors, the most significant of which are discussed below:

Labor and benefit expenses per ton produced, excluding workers compensation, decreased to \$10.64 per ton in the 2010 Period from \$10.83 per ton in the 2009 Period. The decrease of \$0.19 per ton was primarily attributable to increased production volumes at our new River View mine (which has relatively lower costs of production) and a decrease in the cost of training new employees in the Illinois Basin, partially offset by increased mine development

Table of Contents

labor at our Tunnel Ridge mine, increased regulatory oversight, particularly at our Central Appalachian mines, and production disruptions at our Dotiki and Pattiki mines during the 2010 Quarter;

Workers' compensation expenses per ton produced decreased to \$1.00 per ton in the 2010 Period from \$1.15 per ton in the 2009 Period. The decrease of \$0.15 per ton produced resulted primarily from non-cash charges during the 2009 Period due to discount rate changes, which increased the accrued liabilities for the present value of estimated future claim payments;

Material and supplies expenses per ton produced increased 5.8% to \$9.96 per ton in the 2010 Period from \$9.41 per ton in the 2009 Period. The increase of \$0.55 per ton produced resulted from increased costs for certain products and services, primarily roof support (increase of \$0.19 per ton), outside services expenses, such as transportation costs (increase of \$0.18 per ton), and power and fuel used in the mining process (increase of \$0.16 per ton), partially offset by decreased costs per ton in various other categories;

Maintenance expenses per ton produced decreased 6.7% to \$3.46 per ton in the 2010 Period from \$3.71 per ton in the 2009 Period. The decrease of \$0.25 per ton produced resulted primarily from the benefit of newer equipment and increased production at our new River View mining complex, partially offset by higher maintenance costs for our mine development project at Tunnel Ridge;

Mine administration expenses increased \$3.6 million for the 2010 Period compared to the 2009 Period, primarily due to higher costs resulting from increased Matrix Design product sales;

Production taxes and royalties expenses (which were incurred as a percentage of coal sales prices and volumes) increased \$0.30 per produced ton sold in the 2010 Period compared to the 2009 Period primarily as a result of increased average coal sales prices across all regions;

Operating expenses per ton also increased in the 2010 Period due to 1.3 million tons sold from higher cost per ton beginning of the year coal inventory compared to 261,000 tons sold from beginning coal inventory in the 2009 Period;

Operating expenses for the 2010 Period included \$1.2 million related to the retirement of certain assets related to the failed vertical hoist conveyor system at our Pattiki mine. For more information, please read Part I. Item 1. Financial Statements (Unaudited) Note 4. Pattiki Vertical Hoist Conveyor System Failure of this Quarterly Report on Form 10-Q; and

Certain operating expenses incurred during the 2010 Period related to River View and our Tunnel Ridge mine development project increased \$54.4 million over the 2009 Period. These expenses are generally included in the variances discussed above.

General and administrative. General and administrative expenses for the 2010 Period increased to \$22.3 million compared to \$19.0 million in the 2009 Period. The increase of \$3.3 million was primarily due to increased incentive compensation expenses and salary expenses due to increased headcount.

Table of Contents

Other sales and operating revenues. Other sales and operating revenues are principally comprised of Mt. Vernon transloading revenues, products and services provided by MAC (in the 2009 Period only) and Matrix Design, and other outside services and administrative services revenue from affiliates. Other sales and operating revenues increased to \$12.4 million for the 2010 Period from \$9.6 million for the 2009 Period. The increase of \$2.8 million was primarily attributable to increased Matrix Design product sales partially offset by decreased rock dust revenues reflecting the deconsolidation of MAC. For more information about MAC, please read Part I. Item 1. Financial Statements (Unaudited) Note 13. Noncontrolling Interest of this Quarterly Report on Form 10-Q.

Outside coal purchases. Outside coal purchases increased to \$6.4 million for the 2010 Period from \$5.2 million in the 2009 Period. The increase of \$1.2 million was primarily attributable to an increase in outside coal purchases at our Northern Appalachian region in response to improved demand in export coal market partially offset by decreased outside coal purchases in the Central Appalachian region due to the lack of attractive sales opportunities in the coal spot markets that were available in the first quarter of 2009.

Depreciation, depletion and amortization. Depreciation, depletion and amortization expense increased to \$72.0 million for the 2010 Period from \$55.6 million for the 2009 Period. The increase of \$16.4 million was primarily attributable to additional depreciation expense associated with continuing capital expenditures related to infrastructure improvements, efficiency projects and expansion of production capacity, particularly at our River View mine.

Interest expense. Interest expense, net of capitalized interest, decreased to \$15.0 million for the 2010 Period from \$15.8 million for the 2009 Period. The decrease of \$0.8 million was principally attributable to reduced interest expense resulting from our August 2009 principal repayment of \$18.0 million on our original senior notes issued in 1999, partially offset by increased interest expense for borrowings on our \$150.0 million revolving credit facility (ARLP Credit Facility) during the 2010 Period, each of which are discussed in more detail below under Debt Obligations.

Interest income. Interest income decreased to \$0.1 million for the 2010 Period from \$0.9 million for the 2009 Period. The decrease of \$0.8 million resulted from decreased interest income earned on short-term investments purchased with proceeds from the 2008 financing activities in the 2009 Period, which were substantially liquidated throughout 2009.

Transportation revenues and expenses. Transportation revenues and expenses each decreased to \$18.5 million for the 2010 Period compared to \$23.7 million for the 2009 Period. The decrease of \$5.2 million was primarily attributable to decreased coal sales volumes in the 2010 Period for which we arranged the transportation compared to the 2009 Period, as well as a decrease in average transportation rates of \$0.24 on a per ton basis in the 2010 Period compared to the 2009 Period reflecting in part lower fuel costs. The cost of transportation services are passed through to our customers. Consequently, we do not realize any gain or loss on transportation revenues.

Income tax expense. Income tax expense increased to \$0.6 million for the 2010 Period compared to \$0.2 million for the 2009 Period. The increase of \$0.4 million was primarily due to differences in the forecasted annual operating income for 2010 as compared to 2009 for Matrix Design. Increased taxes reflect higher net income in the 2010 Period from our Matrix Design operation.

Table of Contents

Net income attributable to noncontrolling interest. The noncontrolling interest represents a 50% third-party interest in MAC. The third-party's portion of MAC's net income was \$0.2 million for the 2009 Period. Effective January 1, 2010, we deconsolidated MAC based on the amendments to the provisions of FASB ASC 810, Consolidation. For more information about MAC, please read Part I, Item 1. Financial Statements (Unaudited) Note 13. Noncontrolling Interest of this Quarterly Report on Form 10-Q.

Table of Contents

Segment Adjusted EBITDA. Our 2010 Period Segment Adjusted EBITDA increased \$66.4 million, or 32.6%, to \$270.3 million from the 2009 Period Segment Adjusted EBITDA of \$203.9 million. Segment Adjusted EBITDA, tons sold, coal sales, other sales and operating revenues and Segment Adjusted EBITDA Expense by segment are (in thousands):

	Six Months Ended June 30,		Increase/(Decrease)

- (1) Percentage change was greater than or equal to 100%.

Table of Contents

(2) Segment Adjusted EBITDA (a non-GAAP measure) is defined as Net Income of ARLP before net interest expense, income taxes, depreciation, depletion and amortization, net income attributable to noncontrolling interest and general and administrative expenses. Segment Adjusted EBITDA is a key component of consolidated EBITDA, which is used as a supplemental financial measure by management and by external users of our financial statements such as investors, commercial banks, research analysts and others, to assess:

the financial performance of our assets without regard to financing methods, capital structure or historical cost basis;

the ability of our assets to generate cash sufficient to pay interest costs and support its indebtedness;

our operating performance and return on investment as compared to those of other companies in the coal energy sector, without regard to financing or capital structures; and

the viability of acquisitions and capital expenditure projects and the overall rates of return on alternative investment opportunities. Segment Adjusted EBITDA is also used as a supplemental financial measure by our management for reasons similar to those stated in the above explanation of EBITDA. In addition, the exclusion of corporate general and administrative expenses from Segment Adjusted EBITDA allows management to focus solely on the evaluation of segment operating profitability as it relates to our revenues and operating expenses which are primarily controlled by our segments.

The following is a reconciliation of consolidated Segment Adjusted EBITDA to net income and Net Income of ARLP, the most comparable GAAP measure (in thousands):

	Six Months Ended June 30,	
	2010	2009
Segment Adjusted EBITDA	\$ 270,277	\$ 203,903
General and administrative	(22,329)	(19,041)
Depreciation, depletion and amortization	(71,973)	(55,622)
Interest expense, net	(14,935)	(14,865)
Income tax expense	(591)	(225)
Net income	160,449	114,150
Net income attributable to noncontrolling interest		(179)
Net income of ARLP	\$ 160,449	\$ 113,971

(3) Segment Adjusted EBITDA Expense (a non-GAAP measure) includes operating expenses, outside coal purchases and other income. Transportation expenses are excluded as these expenses are passed through to our customers, and consequently we do not realize any gain or loss on transportation revenues. Segment Adjusted EBITDA Expense is used as a supplemental financial measure by our management to assess the operating performance of our segments. Segment Adjusted EBITDA Expense is a key component of EBITDA in addition to coal sales and other sales and operating revenues. The exclusion of corporate general and administrative expenses from Segment Adjusted EBITDA Expense allows management to focus solely on the evaluation of segment operating performance as it primarily relates to our operating expenses. Outside coal purchases are included in Segment Adjusted EBITDA Expense because tons sold and coal sales include sales from outside coal purchases.

Table of Contents

The following is a reconciliation of consolidated Segment Adjusted EBITDA Expense to operating expense, the most comparable GAAP measure (in thousands):

	Six Months Ended June 30,	
	2010	2009
Segment Adjusted EBITDA Expense	\$ 492,201	\$ 405,617
Outside coal purchases	(6,386)	(5,192)
Other income	154	428
Operating expense (excluding depreciation, depletion and amortization)	\$ 485,969	\$ 400,853

Illinois Basin Segment Adjusted EBITDA increased 37.1% to \$230.0 million for the 2010 Period from \$167.8 million for the 2009 Period. The increase of \$62.2 million was primarily attributable to increased tons sold, which increased 21.6% to 12.2 million tons sold in the 2010 Period, as well as improved contract pricing resulting in a higher average coal sales price of \$47.31 per ton during the 2010 Period compared to \$43.84 per ton for the 2009 Period. Coal sales increased 31.2% to \$576.6 million in the 2010 Period compared to \$439.5 million in the 2009 Period. The increase of \$137.1 million primarily reflects increased sales from our new River View mine (which commenced operations in August of 2009 and continued to expand production during the 2010 period) and the negative impact of weather disruptions in the 2009 Period at our Dotiki, Warrior and Elk Creek mines, partially offset by production disruptions at our Dotiki and Pattiki mines during the 2010 Period. Total Segment Adjusted EBITDA Expense for the 2010 Period increased 27.5% to \$347.4 million from \$272.5 million in the 2009 Period and increased \$1.32 per ton sold to \$28.50 from \$27.18 per ton sold, primarily as a result of certain cost increases described above under consolidated operating expenses as well as a \$1.2 million loss on the retirement of certain assets related to the failed vertical hoist conveyor system at our Pattiki mine. For more information, please read Part I. Item 1. Financial Statements (Unaudited) Note 4. Pattiki Vertical Hoist Conveyor System Failure of this Quarterly Report on Form 10-Q.

Central Appalachia Segment Adjusted EBITDA decreased \$7.1 million, or 31.1%, to \$15.8 million for the 2010 Period, compared to \$23.0 million for the 2009 Period. The decrease was primarily the result of lower sales volumes due to reduced coal demand in the spot market during the 2010 Period, the timing of shipments, increased regulatory oversight and the continued impact of idling one mining unit at Pontiki in July 2009, partially offset by improved contract pricing in the 2010 Period that resulted in an increase in the average coal sales price of \$1.26 per ton to \$70.01 per ton in the 2010 Period, as compared to \$68.75 per ton in the 2009 Period. Segment Adjusted EBITDA Expense per ton sold during the 2010 Period increased to \$56.33 compared to \$52.18 per ton sold, an increase of \$4.15 per ton sold, reflecting certain cost increases described above under consolidated operating expenses, as well lower coal sales volumes and decreased coal production in response to lower spot market demand and lower productivity due to Pontiki's transition from the depleted Pond Creek coal seam into the thinner Van Lear coal seam during the 2009 Period. Although Segment Adjusted EBITDA Expense per ton sold increased, Segment Adjusted EBITDA Expense for the 2010 Period decreased 10.0% to \$64.7 million from \$71.9 million in the 2009 Period primarily as a result of lower coal sales offset in part by higher expenses per ton as described above.

Northern Appalachia Segment Adjusted EBITDA increased to \$21.1 million for the 2010 Period, compared to \$8.3 million for the 2009 Period. The increase of \$12.8 million was primarily attributable to strong contract pricing reflecting a higher average sales price of \$60.73 per ton sold for the 2010 Period compared to \$51.28 per ton sold for the 2009 Period, as well as increased tons sold which

Table of Contents

increased 20.6% to 1.5 million tons in the 2010 Period, both resulting from improved demand in the export coal markets. Segment Adjusted EBITDA Expense for the 2010 Period increased 26.3% to \$73.6 million from \$58.3 million in the 2009 Period and increased \$2.20 on a per ton sold basis to \$48.08 from \$45.88 per ton sold, primarily as a result higher coal sales volumes as well as other cost increases described above under consolidated operating expenses, including expenses incurred related to our Tunnel Ridge mine development project.

Other and Corporate Segment Adjusted EBITDA decreased to \$3.3 million in the 2010 Period from \$4.9 million in the 2009 Period, primarily attributable to higher costs associated with Matrix Design product sales, decreased MAC rock dust revenues and the impact of the deconsolidation of MAC effective January 1, 2010, a loss in the 2010 Period compared to a gain in the 2009 Period associated with United Kingdom (UK) currency held for future equipment purchases from a UK supplier, lower Mt. Vernon transportation revenues and lower coal brokerage sales. For more information about MAC, please read Part I. Item 1. Financial Statements (Unaudited) Note 13. Noncontrolling Interest of this Quarterly Report on Form 10-Q. Segment Adjusted EBITDA Expense increased 38.3% to \$18.0 million for the 2010 Period, primarily due to increased expenses associated with higher outside services revenue and product sales.

Liquidity and Capital Resources

Liquidity

We have historically satisfied our working capital requirements and funded our capital expenditures and debt service obligations from cash generated from operations, cash provided by the issuance of debt or equity and borrowings under revolving credit facilities. We believe that the current cash on hand, cash generated from operations, cash from borrowings under the ARLP Credit Facility, and cash provided from the issuance of debt or equity will be sufficient to meet our working capital requirements, anticipated capital expenditures, scheduled debt payments and distribution payments. Our ability to satisfy our obligations and planned expenditures will depend upon our future operating performance and access to and cost of financing sources, which will be affected by prevailing economic conditions generally and in the coal industry specifically, which are beyond our control. Based on our recent operating results, current cash position, anticipated future cash flows and sources of financing that we expect to have available, we do not anticipate any significant liquidity constraints in the foreseeable future. However, to the extent operating cash flow or access to and cost of financing sources are materially different than expected, future liquidity may be adversely affected. Please see Item 1A. Risk Factors in the Annual Report on Form 10-K for the year ended December 31, 2009.

Cash Flows

Cash provided by operating activities was \$258.9 million for the 2010 Period compared to \$164.3 million for the 2009 Period. The increase in cash provided by operating activities was principally attributable to higher net income, increases in certain operating liabilities, such as accrued taxes other than income taxes, accrued payroll and related expenses and a reduction in coal inventory costs during the 2010 Period as compared to a significant increase during the 2009 Period. These increases in cash provided by operating activities were partially offset by increases in certain operating assets, such as accounts receivable.

Net cash used in investing activities was \$183.6 million for the 2010 Period compared to \$169.6 million for the 2009 Period. The increase in cash used for investing activities was primarily attributable to increased Tunnel Ridge capital expenditures and timing differences in accounts payable and accrued liabilities compared to the 2009 Period, partially offset by a decrease in capital expenditures due to the completion of River View mine development during the third quarter of 2009 and Warrior s infrastructure additions during the second quarter of 2009.

Table of Contents

Net cash used in financing activities was \$86.8 million for the 2010 Period compared to \$82.3 million for the 2009 Period. The increase in cash used in financing activities was primarily attributable to increased distributions paid to partners in the 2010 Period, partially offset by net borrowings of \$5.0 million under the ARLP Credit Facility in the 2010 Quarter for capital expenditures primarily related to our continuing growth initiatives (see *Debt Obligations* below).

Capital Expenditures

Capital expenditures were comparable at \$174.8 million and \$174.7 million in the 2010 Period and 2009 Period, respectively. See *Cash Flows* above for additional information regarding capital expenditures.

Our anticipated total capital expenditures for the year ending December 31, 2010 are estimated in a range of \$285 to \$325 million. Management anticipates funding remaining 2010 capital requirements with cash and cash equivalents (\$9.7 million as of June 30, 2010), cash flows provided by operations, borrowing available under the ARLP Credit Facility and, as necessary, by accessing the debt or equity capital markets. The availability and cost of additional capital will depend upon prevailing market conditions, the market price of our common units and several other factors over which we have limited control, as well as our financial condition and results of operations.

Debt Obligations

ARLP Credit Facility. Our Intermediate Partnership maintains the ARLP Credit Facility, a \$150.0 million revolving credit facility that matures September 25, 2012. On September 30, 2009, our Intermediate Partnership entered into Amendment No. 2 (the *Credit Amendment*) to the ARLP Credit Facility. The *Credit Amendment* increased the annual capital expenditure limits under the ARLP Credit Facility. The new limits are \$471.8 million for 2010, \$350.0 million for 2011 and \$250.0 million for 2012. The amount of any annual limit in excess of actual capital expenditures for that year carries forward and is added to the annual limit for the subsequent year.

At June 30, 2010, we had \$11.6 million of letters of credit and \$5.0 million of net borrowings outstanding with \$125.9 million available for borrowing under the ARLP Credit Facility. We incur an annual commitment fee of 0.375% on the undrawn portion of the ARLP Credit Facility.

Lehman Commercial Paper, Inc. (*Lehman*), a subsidiary of Lehman Brothers Holding, Inc., holds a 5%, or \$7.5 million, commitment in our \$150 million ARLP Credit Facility. The ARLP Credit Facility is underwritten by a syndicate of twelve financial institutions, including Lehman, with no individual institution representing more than 11.3% of the \$150 million revolving credit facility. Lehman filed for protection under Chapter 11 of the Federal Bankruptcy Code in early October 2008. The obligations of the lenders under the ARLP Credit Facility are individual obligations and the failure of one or more lenders does not relieve the remaining lenders of their funding obligations. On February 11, 2010, we gave our lenders a notice of borrowing under the ARLP Credit Facility and, in response to that notice, Lehman notified us that it would not fund its proportionate share of the borrowing. As a result, as of February 11, 2010, Lehman became a defaulting lender and availability for borrowing under the ARLP Credit Facility was reduced by \$7.5 million. We are currently in negotiations to amend the ARLP Credit Facility to remove Lehman as a commitment holder.

Table of Contents

Senior Notes. Our Intermediate Partnership has \$90.0 million principal amount of 8.31% senior notes due August 20, 2014, payable in five remaining equal annual installments of \$18.0 million with interest payable semi-annually (Senior Notes).

Series A Senior Notes. On June 26, 2008, our Intermediate Partnership entered into a Note Purchase Agreement (the 2008 Note Purchase Agreement) with a group of institutional investors in a private placement offering. We issued \$205.0 million of Series A Senior Notes, which bear interest at 6.28% and mature on June 26, 2015 with interest payable semi-annually.

Series B Senior Notes. On June 26, 2008, we issued under the 2008 Note Purchase Agreement \$145.0 million of Series B Senior Notes, which bear interest at 6.72% and mature on June 26, 2018 with interest payable semi-annually.

We incurred debt issuance costs of approximately \$0.3 million in 2009 associated with the ARLP Credit Facility, which have been deferred and are being amortized as a component of interest expense over the term of the respective notes.

The ARLP Credit Facility, Senior Notes and Series A and Series B Senior Notes (collectively, ARLP Debt Arrangements) are guaranteed by all of the direct and indirect subsidiaries of our Intermediate Partnership. The ARLP Debt Arrangements contain various covenants affecting our Intermediate Partnership and its subsidiaries restricting, among other things, the amount of distributions by our Intermediate Partnership, the incurrence of additional indebtedness and liens, the sale of assets, the making of investments, the entry into mergers and consolidations and the entry into transactions with affiliates, in each case subject to various exceptions. The ARLP Debt Arrangements also require the Intermediate Partnership to remain in control of a certain amount of mineable coal reserves relative to its annual production. In addition, the ARLP Debt Arrangements require our Intermediate Partnership to maintain the following: (i) debt to cash flow ratio of not more than 3.0 to 1.0, (ii) cash flow to interest expense ratio of not less than 4.0 to 1.0, in each case, during the four most recently ended fiscal quarters and (iii) maximum annual capital expenditures, excluding acquisitions, of \$471.8 million for the year ending December 31, 2010. The debt to cash flow ratio and cash flow to interest expense ratio were 1.08 to 1.0 and 13.1 to 1.0, respectively, for the trailing twelve months ended June 30, 2010. Actual capital expenditures were \$174.8 million for the 2010 Period. We were in compliance with the covenants of the ARLP Debt Arrangements as of June 30, 2010.

Other. In addition to the letters of credit available under the ARLP Credit Facility discussed above, we also have agreements with two banks to provide additional letters of credit in an aggregate amount of \$31.1 million to maintain surety bonds to secure certain asset retirement obligations and our obligations for workers' compensation benefits. At June 30, 2010, we had \$31.1 million in letters of credit outstanding under agreements with these two banks. SGP guarantees \$5.0 million of these outstanding letters of credit.

Related-Party Transactions

We have continuing related-party transactions with our managing general partner, AHGP and SGP and its affiliates. These related-party transactions relate principally to the provision of administrative services to AHGP and Alliance Resource Holdings II, Inc. (ARH II) and their respective affiliates, a time sharing agreement concerning use of aircraft and mineral and equipment leases with SGP and its affiliates, and guarantees from SGP for certain letters of credit.

MAC has a \$1.75 million Revolving Credit Agreement (Revolver) with ARLP. On November 17, 2009, MAC entered into Amendment No. 2, effective June 30, 2009, which increased the Revolver to \$1.75 million from \$1.5 million. The Revolver is scheduled to expire on December 31, 2010. At June 30, 2010, MAC owed ARLP \$1.7 million under the Revolver, which is classified as Due From Affiliates on our condensed consolidated balance sheets.

Table of Contents

On April 1, 2010, effective January 1, 2010, ARLP entered into an Amended and Restated Administrative Services Agreement (the Agreement) with our managing general partner, our Intermediate Partnership, AHGP and its general partner AGP, and ARH II, the indirect parent of SGP. The Agreement supersedes the Administrative Services Agreement signed in connection with the AHGP initial public offering in 2006. Under the Agreement, certain employees, including some executive officers, provide administrative services to AHGP and ARH II and their respective affiliates. We are reimbursed for services rendered by our employees on behalf of these affiliates as provided under the Agreement.

Because the Agreement described above was a related-party transaction, it was reviewed by the board of directors of our managing general partner and its conflicts committee. Based upon this review, the conflicts committee determined that this transaction reflected market clearing terms and conditions. As a result, the board of directors of our managing general partner and its conflicts committee approved the transaction as fair and reasonable to us and our limited partners.

Please read our Annual Report on Form 10-K for the year ended December 31, 2009, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Related-Party Transactions for additional information concerning the related-party transactions described above.

New Accounting Standards

New Accounting Standards Issued and Adopted

In December 2009, the FASB issued Accounting Standards Update (ASU) 2009-17, *Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities* (ASU 2009-17). ASU 2009-17 codified Statement of Financial Accounting Standards (SFAS) No. 167, *Amendments to FASB Interpretation No. 46(R)*, which changed the consolidation guidance applicable to a variable interest entity (VIE). ASU 2009-17 updated the guidance governing the determination of whether an enterprise is the primary beneficiary of a VIE, and is, therefore, required to consolidate such VIE, by requiring a qualitative analysis rather than a quantitative analysis. The qualitative analysis includes, among other things, consideration of whether the enterprise has the power to direct the activities of the entity that most significantly impact the entity's economic performance and has the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. ASU 2009-17 also requires continuous reassessments of whether an enterprise is the primary beneficiary of a VIE. Previously, FASB ASC 810, *Consolidation*, required reconsideration of whether an enterprise was the primary beneficiary of a VIE only when specific events had occurred. Qualifying special purpose entities, which were previously exempt from the application of this standard, are now subject to the provisions of ASU 2009-17. In addition, ASU 2009-17 also requires enhanced disclosures about an enterprise's involvement with a VIE. The provisions of ASU 2009-17 were effective as of the beginning of interim and annual reporting periods that began after November 15, 2009. Based on our evaluation of ASU 2009-17, we deconsolidated Mid-America Carbonates, LLC (MAC) upon adoption, effective January 1, 2010. For more information about MAC, please read Part I. Item 1. Financial Statements (Unaudited) Note 13. Noncontrolling Interest of this Quarterly Report on Form 10-Q. The deconsolidation of MAC did not have a material impact on our condensed consolidated financial statements.

In January 2010, the FASB issued ASU 2010-06, *Improving Disclosures About Fair Value Measurements* (ASU 2010-06). ASU 2010-06 amended guidance on certain aspects of FASB ASC 820, *Fair Value Measurements and Disclosures*, to add new requirements for disclosures of transfers into

Table of Contents

and out of Level 1 and 2 measurements and separate disclosures about purchases, sales, issuances, and settlements relating to Level 3 measurements, all on a gross basis. ASU 2010-06 also clarifies existing fair value disclosures regarding the level of disaggregation and the inputs and valuation techniques used to measure fair value. The provisions of ASU 2010-06 were effective for the first reporting period beginning after December 15, 2009, except for the requirement to provide Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010. The adoption of ASU 2010-06 did not have an impact on our condensed consolidated financial statements.

Other

Pattiki Vertical Hoist Conveyor System Failure

On May 13, 2010, White County Coal's Pattiki mine was temporarily idled following the failure of the vertical hoist conveyor system used in conveying raw coal out of the mine. On July 19, 2010, White County Coal's efforts to repair the vertical hoist conveyor system had progressed sufficiently to allow resumption of limited production operations. Our operating expenses for the three months ended June 30, 2010 includes \$1.2 million for retirement of certain assets related to the failed vertical hoist conveyor system in addition to other repair and clean-up expenses that were not significant on a consolidated or segment basis. We are also conducting a review of our commercial property (including business interruption) insurance policies, which provide for self-retention, various deductibles and 22% co-insurance for the first \$50 million in coverage. Until such analysis is completed, we can make no assurances of the amount or timing of recoveries under such policies, if any.

Expanded coal production at our other coal mines in the region, including addition of the seventh and eighth production units at the River View mine, partially offset the loss of production from the Pattiki mine. Consequently, the temporary idling of the Pattiki mine did not have a material adverse impact on our results of operations and cash flows. On July 19, 2010, the Pattiki mine resumed limited production while it continues to assess the effectiveness and reliability of the repaired vertical hoist conveyor system until such time it determines the system is safe to operate at full capacity.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have significant long-term coal supply agreements. Virtually all of the long-term coal supply agreements are subject to price adjustment provisions, which permit an increase or decrease periodically in the contract price principally to reflect changes in specified price indices or items such as taxes, royalties or actual production costs.

Almost all of our transactions are denominated in U.S. dollars and, as a result, we do not have material exposure to currency exchange-rate risks. During 2009, we entered into a contract to purchase longwall shields for our Tunnel Ridge mine from a foreign supplier for approximately £10.2 million. We paid £9.2 million to this foreign supplier through June 30, 2010 with the remaining balance, which is maintained in British Pounds, to be paid out through 2011. We do not have any interest rate or commodity price-hedging transactions outstanding.

Borrowings under the ARLP Credit Facility are at variable rates and, as a result, we have interest rate exposure. Historically, our earnings have not been materially affected by changes in interest rates. We had net borrowings of \$5.0 million outstanding under the ARLP Credit Facility as of June 30, 2010.

As of June 30, 2010, the estimated fair value of the Senior Notes and Series A and Series B Senior Notes was approximately \$490.4 million. The fair values of long-term debt are estimated using discounted cash flow analyses, based upon our current incremental borrowing rates for similar types of borrowing arrangements as of June 30, 2010. There were no other significant changes in our quantitative and qualitative disclosures about market risk as set forth in our Annual Report on Form 10-K for the year ended December 31, 2009.

ITEM 4. CONTROLS AND PROCEDURES

We maintain controls and procedures designed to ensure that information required to be disclosed in the reports we file with the U.S. Securities and Exchange Commission (SEC) is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. An evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) or Rule 15d-15(e) of the Securities Exchange Act) was performed as of June 30, 2010. This evaluation was performed by our management, with the participation of our Chief Executive Officer and Chief Financial Officer. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that these controls and procedures are effective to ensure that the ARLP Partnership is able to collect, process and disclose the information it is required to disclose in the reports it files with the SEC within the required time periods, and during the quarterly period ended June 30, 2010, there have not been any changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) identified in connection with this evaluation that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are intended to come within the safe harbor protection provided by those sections. These statements are based on our beliefs as well as assumptions made by, and information currently available to, us. When used in this document, the words anticipate, believe, continue, estimate, expect, forecast, may, project, will, and similar expressions identify statements. Without limiting the foregoing, all statements relating to our future outlook, anticipated capital expenditures, future cash flows and borrowings and sources of funding are forward-looking statements. These statements reflect our current views with respect to future events and are subject to numerous assumptions that we believe are reasonable, but are open to a wide range of uncertainties and business risks, and actual results may differ materially from those discussed in these statements. Among the factors that could cause actual results to differ from those in the forward-looking statements are:

increased competition in coal markets and our ability to respond to the competition;

decreases in coal prices, which could adversely affect our operating results and cash flows;

risks associated with the expansion of our operations and properties;

the impact of recent federal health care legislation;

deregulation of the electric utility industry or the effects of any adverse change in the coal industry, electric utility industry, or general economic conditions;

dependence on significant customer contracts, including renewing customer contracts upon expiration of existing contracts;

weakness in global economic conditions or in industries in which our customers operate;

liquidity constraints, including those resulting from the cost or unavailability of financing due to current capital market conditions;

customer bankruptcies, cancellations or breaches to existing contracts, or other failures to perform;

customer delays, failure to take coal under contracts or defaults in making payments;

adjustments made in price, volume or terms to existing coal supply agreements;

fluctuations in coal demand, prices and availability due to labor and transportation costs and disruptions, equipment availability, governmental regulations, including those related to carbon dioxide emissions, and other factors;

Edgar Filing: ALLIANCE RESOURCE PARTNERS LP - Form 10-Q

legislation, regulatory and court decisions and interpretations thereof, including issues related to climate change and miner health and safety;

our productivity levels and margins earned on our coal sales;

greater than expected increases in raw material costs;

greater than expected shortage of skilled labor;

our ability to maintain satisfactory relations with our employees;

any unanticipated increases in labor costs, adverse changes in work rules, or unexpected cash payments associated with post- mine reclamation and workers compensation claims;

any unanticipated increases in transportation costs and risk of transportation delays or interruptions;

greater than expected environmental regulation, costs and liabilities;

a variety of operational, geologic, permitting, labor and weather-related factors;

risks associated with major mine-related accidents, such as mine fires, or interruptions;

results of litigation, including claims not yet asserted;

difficulty maintaining our surety bonds for mine reclamation as well as workers compensation and black lung benefits;

difficulty in making accurate assumptions and projections regarding pension, black lung benefits and other post-retirement benefit liabilities;

Table of Contents

coal market's share of electricity generation, including as a result of environmental concerns related to coal mining and combustion and the cost and perceived benefits of alternative sources of energy, such as natural gas, nuclear energy and renewable fuels;

replacement of coal reserves;

a loss or reduction of benefits from certain tax credits;

difficulty obtaining commercial property insurance, and risks associated with our participation (excluding any applicable deductible) in the commercial insurance property program; and

other factors, including those discussed in Part II. Item 1A. Risk Factors and Part II. Item 1. Legal Proceedings of this Quarterly Report on Form 10-Q.

If one or more of these or other risks or uncertainties materialize, or should underlying assumptions prove incorrect, our actual results may differ materially from those described in any forward-looking statement. When considering forward-looking statements, you should also keep in mind the risks described in Risk Factors below. These risks could also cause our actual results to differ materially from those contained in any forward-looking statement. We disclaim any obligation to update the above list or to announce publicly the result of any revisions to any of the forward-looking statements to reflect future events or developments.

You should consider the information above when reading or considering any forward-looking statements contained in:

this Quarterly Report on Form 10-Q;

other reports filed by us with the SEC;

our press releases; and

written or oral statements made by us or any of our officers or other authorized persons acting on our behalf.

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information in Note 3. Contingencies to the Unaudited Condensed Consolidated Financial Statements included in Part I. Item 1. Financial Statements (Unaudited) of this Quarterly Report on Form 10-Q herein is hereby incorporated by reference. See also Item 3. Legal Proceedings in the Annual Report on Form 10-K for the year ended December 31, 2009 and Part II. Item 1. Legal Proceedings in the Quarterly Report on Form 10-Q for the quarter ended March 31, 2010.

On April 24, 2006, we were served with a complaint from Mr. Ned Comer, et al. (the Plaintiffs) alleging that approximately 40 oil and coal companies, including us, (the Defendants) are liable to the Plaintiffs for tortuously causing damage to Plaintiffs' property in Mississippi. The Plaintiffs allege that the Defendants' greenhouse gas emissions caused global warming and resulted in the increase in the destructive capacity of Hurricane Katrina. On August 30, 2007, the trial court dismissed the Plaintiffs' complaint. On September 17, 2007, Plaintiffs filed a notice of appeal of that dismissal to the U.S. Court of Appeals for the Fifth Circuit. On October 16, 2009, the Fifth Circuit overturned the trial court's dismissal of the Plaintiffs' private nuisance, trespass and negligence claims, finding Article III constitutional standing and no political question. The Fifth Circuit remanded these claims to the trial court for further proceedings. By order filed February 26, 2010, the Fifth Circuit granted the Defendants' petition for rehearing en banc, with oral argument scheduled for May 24, 2010. On May 28, 2010, the Fifth Circuit Court of Appeals dismissed the appeal because the court did not have a quorum after one of the judges hearing the appeal recused herself. The court ruled that, without a quorum, it could not decide the appeal nor could it reinstate the earlier ruling by a three judge panel that would have reversed the District Courts decision dismissing the case. Plaintiffs have 90 days to appeal to the U.S. Supreme Court. To date, we have not received a notice of appeal. We believe this complaint is without merit and we do not believe that an adverse decision in this litigation matter, if any, based on our status as a defendant, will have a material adverse effect on our business, financial position or results of operations. If, however, tort claims brought in this and other cases against corporate defendants for liability arising from greenhouse gas emissions are successful, demand for our coal could be adversely impacted.

ITEM 1A. RISK FACTORS

We are subject to a variety of risks, including, but not limited to those referenced under the heading Health Care Reform of Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations of this Quarterly Report on Form 10-Q and those referenced herein to other Items contained in our Annual Report on Form 10-K for the year ended December 31, 2009, including Item 1. Business, Item 1A. Risk Factors, Item 3. Legal Proceedings and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Except as set forth under Health Care Reform and elsewhere under Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations of this Quarterly Report on Form 10-Q, we do not believe there have been any material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2009, except as follows.

Table of Contents

Recent legislation regarding healthcare may adversely impact our results of operations.

On March 23, 2010, President Obama signed into law the Patient Protection and Affordable Care Act. Additionally, on March 30, 2010, President Obama signed into law a reconciliation measure, the Health Care and Education Reconciliation Act of 2010. The passage of the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act (collectively, the Health Care Act) will result in comprehensive changes to health care in the United States. Implementation of this legislation is planned to occur in phases, with plan standard changes taking effect beginning in 2010, but to a greater extent with the 2011 benefit plan year and extending through 2018.

The Health Care Act has both short-term and long-term implications on benefit plan eligibility, coverage requirements, and benefit standards and limitations. In the short term, our healthcare costs are expected to increase due to raising the maximum age and easing of eligibility limitations for covered dependents. The Health Care Act also prevents the group health plan from limiting benefit payments for participants who meet or exceed annual or lifetime dollar limits per covered individual. In the long term, our healthcare costs could increase for various reasons due to the Health Care Act, including the potential impact of an excise tax on high cost plans (beginning in 2018), among other standard requirements.

We anticipate that certain government agencies will provide additional regulations or interpretations concerning the application of the Health Care Act and reporting required thereunder. Until these regulations or interpretations are published, we are unable to reasonably estimate the impact of such federal mandate requirements on our future healthcare costs.

We will continue to evaluate the potential impact of the legislation on our self-insured long term disability plan, pneumoconiosis (Black Lung) liabilities, results of operations and internal controls as governmental agencies issue interpretations regarding the meaning and scope of the Health Care Act. However, we believe it is likely that our costs will increase as a result of these provisions, which may have an adverse impact on our results of operations and cash flows.

Recent health care legislation has generally made it easier for claimants to assert and prosecute Black Lung claims, which could increase our exposure to Black Lung benefit liabilities.

The recently enacted Health Care Act includes a Black Lung provision that creates a rebuttable presumption that a miner with at least 15 years of service, with totally disabling pulmonary or respiratory lung impairment and negative radiographic chest x-ray evidence, would be disabled due to pneumoconiosis and be eligible for Black Lung benefits. The new Health Care Act also makes it easier for widows of miners to become eligible for benefits, as it amended previous legislation related to coal workers Black Lung benefits by providing automatic extensions of awarded lifetime benefits to surviving spouses and providing changes to the legal criteria used to assess and award claims, effective for claims filed or pending after January 1, 2005. As a result of this new legislation, the number of claimants who are awarded benefits and our future payments of Black Lung benefits could increase, which may have an adverse impact on our results of operations and cash flows.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

Table of Contents**ITEM 4. RESERVED****ITEM 5. OTHER INFORMATION*****Federal Mine Safety and Health Act Information***

Workplace safety is fundamental to our culture. Our operating subsidiaries empower their employees to be actively involved in continuous efforts to prevent accidents. By providing a work environment that rewards safety and encourages employee participation in the safety process, our mining operations strive to be the leaders in safety performance in our industry.

We are also a leader in developing and implementing new technologies to improve safety throughout the industry. For example, our subsidiary Matrix Design Group, LLC (Matrix) recently announced the development of two innovative technologies designed to improve safety in underground mining operations - a portable, wireless communication and electronic tracking system designed to allow surface personnel the ability to communicate with and locate underground mining personnel and a proximity detection system designed to improve the safety of continuous mining units used in underground operations. Matrix has completed installation of its communication and tracking system at all of our operating subsidiaries and has either installed or received orders to install this vital safety system at over half of the operating underground coal mines in the U.S. In addition, Matrix has installed and is conducting field tests on seven of its proximity detection systems at five of our operating subsidiaries' underground coal mines.

Our industry is focused on improving employee safety and its safety performance is continuously monitored, including through the mining industry standard of non-fatal days lost , or NFDL , which reflects both the frequency and severity of injuries incurred and, we believe, is a better measure of safety performance than compliance statistics. As indicated in the chart below, these efforts have resulted in significant safety improvements as the industry average NFDL, as reported^(a) by the Mine Safety and Health Administration (MSHA), has decreased approximately 62% since 1998.

(a) Data compiled for all U.S. underground bituminous coal mines and related surface facilities from the MSHA report Mine Injury and Worktime, Quarterly Closeout Edition. Data for 1998 through 2009 reflects the January - December, Final report for each year. Data for 2010 reflects the January - March, Preliminary report for the first three months of 2010.

During this same time period, the combined NFDL rating of our operating subsidiaries has averaged approximately one-third better than the industry average. The average NFDL rating of our operating subsidiaries for the first half of 2010 has positioned us to achieve our best annual NFDL results in our history.

Our mining operations are subject to extensive and stringent compliance standards established pursuant to the Federal Mine Safety and Health Act of 1977, as amended by the Federal Mine Improvement and New Emergency Response Act of 2006 (as amended, the Mine Act). MSHA monitors and rigorously enforces compliance with these standards, and our mining operations are inspected frequently. During the three months ended June 30, 2010, our mines were subject to 1,610 MSHA inspection days, with an average of only 0.18 significant and substantial , or S&S , citations written per inspection day.

We endeavor to comply at all times with all Mine Act regulations. However, the Mine Act has been construed as authorizing MSHA to issue citations and orders pursuant to the legal doctrine of strict liability, or liability without fault. If, in the opinion of an MSHA inspector, a condition that violates the Mine Act or regulations promulgated pursuant to it exists, then a citation or order will be issued regardless of whether we had any knowledge of, or fault in, the existence of that condition. Many of the Mine Act standards include one or more subjective elements, so that issuance of a citation often depends on the opinions or experience of the MSHA inspector involved and the frequency of citations will vary from inspector to inspector.

The number of citations issued also is affected by the size of the mine, in that the number of citations issued generally increases with the size of the mine. Our mines typically are larger in scale than most underground coal mines in the U.S. in terms of area, production and employee hours.

We take all allegations of violations of Mine Act standards seriously, and if we disagree with the assertions of an MSHA inspector, we exercise our right to challenge those findings by contesting the citation or order pursuant to the procedures established by the Mine Act and its regulations. On average, our operating subsidiaries contest approximately 25% of all citations and the majority of S&S citations issued by MSHA inspectors. These contest proceedings frequently result in the dismissal or modification of previously issued citations, substantial reductions in the penalty amounts originally assessed by MSHA, or both.

Table of Contents

The recently enacted Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) requires issuers to include in periodic reports filed with the SEC certain information relating to citations or orders for violations of standards under the Mine Act. Responding to that legislation, we report that, for the three months ended June 30, 2010, none of our operating subsidiaries (a) received any violations under section 110(b)(2) of the Mine Act for failure to make reasonable efforts to eliminate a known violation of a mandatory safety or health standard that substantially proximately caused, or reasonably could have been expected to cause, death or serious bodily injury, (b) received any MSHA written notice under Mine Act section 104(e) of a pattern of violations of mandatory health or safety standards or the potential to have such a pattern, or (c) had any legal proceedings (i.e. appeals before the Federal Mine Safety and Health Review Commission (the Commission)) pending. We have 249 contests pending before administrative law judges of the Commission that were initiated during the quarter and that involve all types of citations (i.e., not just S&S citations). Two miners were fatally injured in a roof fall accident at Webster County Coal, LLC's Dotiki Mine on April 28, 2010. Our internal investigation revealed the accident was the result of unpredictable and unforeseeable geologic conditions.

The following chart sets out additional information responding to the Dodd-Frank Act for the three months ended June 30, 2010:

Subsidiary Name ⁽¹⁾	Section 104(a) Citations ⁽²⁾	Section 104(b) Orders ⁽³⁾	Section 104(d) Citations and Orders ⁽⁴⁾	Section 107(a) Orders ⁽⁵⁾	Total Proposed Assessments (in thousands) ⁽⁶⁾
<u>Illinois Basin Operations</u>					
Webster County Coal, LLC (KY)	65		1		\$ 55.0
Warrior Coal, LLC (KY)	25				\$ 26.3
Hopkins County Coal, LLC (KY)	10	1			\$ 3.6
River View Coal, LLC (KY)	62		1	1	\$ 33.9
White County Coal, LLC (IL)	37		2		\$ 15.8
Gibson County Coal, LLC (IN)	15				\$ 40.2
<u>Central Appalachian Operations</u>					
Pontiki Coal, LLC (KY)	40				\$ 214.8
MC Mining, LLC (KY)	34			1	\$ 46.7
<u>Northern Appalachian Operations</u>					
Mettiki Coal, LLC (MD)	2				\$ 1.0
Mettiki Coal (WV), LLC	4				\$ 2.5
Tunnel Ridge, LLC (PA/WV)	1				\$

(1) The statistics reported for each of our subsidiaries listed above include all components of the mining complex involved and therefore may involve multiple MSHA identification numbers. Any S&S citations or orders issued to our subsidiary, Excel Mining, LLC, are included in the statistics for either Pontiki Coal, LLC or MC Mining, LLC, depending on the mining complex involved.

(2) Mine Act section 104(a) citations shown above are for alleged violations of health or safety standards that could significantly and substantially contribute to a serious injury if left unabated.

(3) Mine Act section 104(b) orders are for alleged failures to totally abate a citation within the period of time specified in the citation.

(4) Mine Act section 104(d) citations and orders are for an alleged unwarrantable failure (i.e. aggravated conduct constituting more than ordinary negligence) to comply with a mining safety standard or regulation.

(5)

Edgar Filing: ALLIANCE RESOURCE PARTNERS LP - Form 10-Q

Mine Act section 107(a) orders are for alleged conditions or practices which could reasonably be expected to cause death or serious physical harm before such condition or practice can be abated.

- ⁽⁶⁾ Amounts shown include assessments proposed by MSHA during the three months ended June 30, 2010 on the citations and orders reflected in this chart.
