NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION The accompanying unaudited interim financial statements of WesBanco, Inc. and its consolidated subsidiaries (WesBanco) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements and should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2010.

WesBanco s interim financial statements have been prepared following the significant accounting policies disclosed in Note 1 of the Notes to the Consolidated Financial Statements of its 2010 Annual Report on Form 10-K filed with the Securities and Exchange Commission. In the opinion of management, the accompanying interim financial information reflects all adjustments, including normal recurring adjustments, necessary to present fairly WesBanco s financial position and results of operations for each of the interim periods presented. Results of operations for interim periods are not necessarily indicative of the results of operations that may be expected for a full year.

RECENT ACCOUNTING PRONOUNCEMENTS In September 2011, the Financial Accounting Standards Board (FASB) issued an accounting pronouncement to simplify how an entity tests goodwill for impairment by permitting an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. Under previous guidance an entity was required to test goodwill for impairment by comparing the fair value of a reporting unit with its carrying amount, including goodwill. If the fair value was less than its carrying amount, then the second step of the test was performed to measure the amount of the impairment loss. Under the new accounting pronouncement an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. The pronouncement is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted. The adoption of this pronouncement is not expected to have a material impact on WesBanco s consolidated financial statements.

In June 2011, the FASB issued an accounting pronouncement that requires all non-owner changes in stockholders equity to be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. Under the two-statement approach, the first statement should present total net income and its components followed consecutively by a second statement that should present total other comprehensive income, the components of other comprehensive income, and the total of comprehensive income. The pronouncement should be applied retrospectively effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted. The adoption of this pronouncement is not expected to have a material impact on WesBanco s consolidated financial statements.

In May 2011, the FASB issued an accounting pronouncement which amends the fair value measurement and disclosure requirements to achieve common disclosure requirements between U.S. GAAP and International Financial Reporting Standards (IFRS). The accounting pronouncement requires certain disclosures about transfers between level 1 and level 2 of the fair value hierarchy, sensitivity of fair value measurements categorized within Level 3 of the fair value hierarchy, and categorization by level of items that are reported at cost but are required to be disclosed at fair value. The disclosures are to be applied prospectively effective in the first interim and annual periods beginning after December 15, 2011. The adoption of this pronouncement is not expected to have a material impact on WesBanco s consolidated financial statements.

In April 2011, the FASB issued an accounting pronouncement which clarifies when a loan modification or restructuring is considered a troubled debt restructuring. The new pronouncement also requires new disclosures relating to troubled debt restructurings (TDRs). The guidance is effective for the first interim period beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. For purposes of measuring impairment on newly-considered impaired receivables an entity should apply the guidance prospectively. The provisions of this pronouncement did not change the amount of WesBanco's receivables that are considered TDRs but it did expand the related disclosures on TDRs. The adoption of this pronouncement did not have a material impact on WesBanco's financial condition and results of operations.

NOTE 2. EARNINGS PER COMMON SHARE

Earnings per common share are calculated as follows:

At September 30, 2011, and December 31, 2010, there were no holdings of any one issuer, other than the U.S. government and its agencies, in an amount greater than 10% of WesBanco s shareholders equity.

The following table presents the fair value of available-for-sale and held-to-maturity securities by contractual maturity at September 30, 2011. In some instances, the issuers may have the right to call or prepay obligations without penalty prior to the contractual maturity date.

⁽¹⁾Mortgage-backed and collateralized mortgage securities, which have prepayment provisions, are assigned to maturity categories based on current estimated average lives.

⁽²⁾ The held-to-maturity portfolio is carried at an amortized cost of **\$605.0** million.

Securities with aggregate par values of **\$705.9** million and \$621.4 million at September 30, 2011 and December 31, 2010, respectively, were pledged as security for public and trust funds, and securities sold under agreements to repurchase. Proceeds from the sale of available-for-sale securities were **\$5.0** million for the nine months ended September 30, 2011, and \$114.8 million for the same nine month period in 2010. Net unrealized security gains on the available-for-sale portfolio were **\$18.2** million and \$7.8 million for September 30, 2011 and December 31, 2010. These unrealized gains were recognized in other comprehensive income, net of tax. For the nine months ended September 30, 2011 and 2010, gross realized security gains were **\$0.1** million and \$3.3 million, respectively.

The following table provides information on unrealized losses on investment securities that have been in an unrealized loss position for less than twelve months and twelve months or more as of September 30, 2011 and December 31, 2010:

Unrealized losses on debt securities in the table represent temporary fluctuations resulting from changes in market rates in relation to fixed yields. Unrealized losses in the available-for-sale portfolio are accounted for as an adjustment to other comprehensive income in shareholders equity.

WesBanco does not believe the securities presented above are impaired due to reasons of credit quality, as substantially all debt securities are of investment grade quality and all are paying principal and interest according to their contractual terms. WesBanco does not intend to sell, nor is it more likely than not that it will be required to sell, loss position securities prior to recovery of their cost, and therefore, management believes the unrealized losses detailed above are temporary and no impairment loss relating to these securities has been recognized.

Securities that do not have readily determinable fair values and for which WesBanco does not exercise significant influence are carried at cost. Cost method investments consist primarily of Federal Home Loan Bank (FHLB) of Pittsburgh and FHLB of Cincinnati stock totaling **\$23.3** million and **\$28.0** million at September 30, 2011 and December 31, 2010, respectively, and are included in other assets in the Consolidated Balance Sheets. Cost-method investments are evaluated for impairment whenever events or circumstances suggest that their carrying value may not be recoverable.

In 2008 the FHLB of Pittsburgh announced that it would suspend dividends and the repurchase of excess capital stock from its member banks until further notice. However, the FHLB of Pittsburgh announced on October 28, 2010 that the suspension on the repurchase of excess capital stock would be partially lifted, and future excess capital stock repurchases would be reviewed on a quarter-to-quarter basis. The suspension of dividends was not affected by the announcement. The FHLB of Pittsburgh stock owned by WesBanco totaling **\$21.5** million and \$25.0 million at September 30, 2011 and December 31, 2010, respectively, does not have a readily determinable fair value, and is held primarily to serve as collateral on FHLB borrowings. Although the FHLB of Pittsburgh has suspended dividends and only partially lifted the suspension on the repurchase of excess capital stock, they are meeting their current debt obligations, have continued to exceed all required capital ratios, and have remained in compliance with statutory and regulatory requirements. Accordingly, as of September 30, 2011, WesBanco believes that sufficient evidence exists to conclude that its investment in FHLB stock was not impaired. At September 30, 2011, WesBanco held excess capital stock of **\$6.8** million that remains to be repurchased by the FHLB of Pittsburgh. The FHLB of Pittsburgh stock balance declined from December 31, 2010 to September 30, 2011 due to stock repurchases of **\$3.5** million.

NOTE 4. LOANS AND THE ALLOWANCE FOR CREDIT LOSSES

The recorded investment in loans is presented in the Consolidated Balance Sheets net of deferred loan fees and costs of **\$2.9** million at September 30, 2011 and \$3.1 million at December 31, 2010.

The following table presents the recorded investment in loans by category:

In September 2011, certain impaired and classified loans with a book value of \$17.2 million were sold, which included nonaccrual loans of \$6.8 million and TDRs accruing interest of \$9.9 million, with specific and general reserves totaling \$4.8 million. Total proceeds from the sale were \$6.9 million, resulting in \$10.3 million in charge-offs in the third quarter of 2011.

WesBanco maintains an internal loan grading system to reflect the credit quality of commercial loans. Commercial loan risk grades are determined based on an evaluation of the relevant characteristics of each loan, assigned at the inception of each loan and adjusted thereafter at any time to reflect changes in the risk profile throughout the life of each loan. The primary factors used to determine the risk grade are the reliability and sustainability of the primary source of repayment and overall financial strength of the borrower. This includes an analysis of cash flow available to repay debt, profitability, liquidity, leverage, and overall financial trends. Other factors include management, industry or property type risks, an assessment of secondary sources of repayment such as collateral or guarantees, other terms and conditions of the loan that may increase or reduce its risk, and economic conditions and other external factors that may influence repayment capacity and financial condition.

Commercial real estate land and construction consists of loans to finance investments in vacant land, land development, construction of residential housing, and construction of commercial buildings. Commercial real estate other consists of loans for the purchase or refinance of all types of improved owner-occupied and investment properties. Factors that are considered in assigning the risk grade vary depending on the type of property financed. The risk grade assigned to construction and development loans is based on the overall viability of the project, the experience and financial capacity of the developer or builder to successfully complete the project, project specific and market absorption rates and comparable property values, and the amount of pre-sales for residential housing construction or pre-leases for commercial investment property. The risk grade assigned to commercial investment property loans is based primarily on the adequacy of net rental income generated by the property to service the debt, the type, quality, industry and mix of tenants, and the terms of leases, but also considers the overall financial capacity of the investors and their experience in owning and managing investment property. The risk grade assigned to owner-occupied commercial real estate and commercial and industrial loans is based primarily on historical and projected earnings, the adequacy of operating cash flow to service all of the business s debt, and the capital resources, liquidity and leverage of the business, but also considers the industry in which the business operates, the business s specific competitive advantages or disadvantages, the quality and experience of management, and external influences on the business such as economic conditions. Other factors that are considered for commercial and industrial loans include the type, quality and marketability of non-real estate collateral and whether the structure of the loan increases or reduces its risk. The type, age, condition, location and any environmental risks associated with a property are also considered for all types of commercial real estate. The overall financial condition and repayment capacity of any guarantors is also evaluated to determine the extent to which they mitigate other risks of the loan. The following descriptions of risk grades apply to commercial real estate and commercial and industrial loans.

Excellent or minimal risk loans are fully secured by liquid or readily marketable collateral and therefore have virtually no risk of loss. Good or desirable risk loans are extended in the normal course of business to creditworthy borrowers that exhibit a history of positive financial results that are at least comparable to the average for their industry or type of real estate. These loans are expected to perform satisfactorily during most economic cycles and there are no significant external factors that are expected to adversely affect these borrowers more than others in the same industry. Any

minor unfavorable characteristics of these loans are outweighed or mitigated by strong positive factors including but not limited to adequate secondary sources of repayment or guarantees.

Fair or acceptable risk loans have a somewhat higher credit risk profile due to specific weaknesses or uncertainties that could adversely impact repayment capacity. Loans in this category generally warrant additional attention or monitoring, or a more rigid loan structure. These loans represent the maximum level of risk accepted in the normal course of lending. Specific issues that may warrant this grade include financial results that are less favorable than the average for the borrower s industry or type of real estate, cyclical financial results, loans based on projections that have a reasonable probability of being achieved, start-up businesses, construction projects, and other external factors that indicate a higher level of credit risk. Loans that are underwritten primarily on the basis of the repayment capacity or financial condition of guarantors may also be assigned this grade.

Criticized or marginal loans are currently protected but have weaknesses, which if not corrected, may inadequately protect WesBanco Bank, Inc. (the Bank) at some future date. These loans represent an unwarranted credit risk and would generally not be extended in the normal course of lending. Specific issues which may warrant this grade include declining financial results, increased reliance on secondary sources of repayment or guarantor support and adverse external influences that may negatively impact the business or property.

Substandard and doubtful loans are equivalent to the classifications used by banking regulators. Substandard loans are inadequately protected by the current repayment capacity and equity of the borrower or collateral pledged, if any. Substandard loans have one or more well-defined weaknesses that jeopardize their repayment or collection in full. These loans may or may not be reported as nonaccrual. Doubtful loans have all the weaknesses inherent to a substandard loan with the added characteristic that full repayment is highly questionable or improbable on the basis of currently existing facts, conditions and collateral values. However, recognition of loss may be deferred if there are reasonably specific pending factors that will reduce the risk if they occur.

The following tables summarize commercial loans by their assigned risk grade:

Residential real estate, home equity and consumer loans are not assigned internal risk grades other than as required by regulatory guidelines that are based primarily on the age of past due loans. WesBanco primarily evaluates the credit quality of residential real estate, home equity and consumer loans based on repayment performance and historical loss rates. The aggregate amount of residential real estate, home equity and consumer loans classified as substandard in accordance with regulatory guidelines were **\$18.1** million at September 30, 2011 and \$18.3 million at December 31, 2010, of which **\$6.2** million and \$6.6 million were accruing, for each period respectively.

The following table summarizes the age analysis of all categories of loans.

TDRs46,1358942901641,34847,483(1) Loans 90 days or more past due and accruing interest exclude TDRs 90 days or more past due and accruing interest.Homework40,483Impaired LoansA loan is considered impaired, based on current information and events, if it is probable that WesBanco will be unable to collect the payments of principal and interest when due according to the contractual terms of the loan agreement. Impaired loans included all non-accrual and TDRs, as well as, loans internally classified as substandard for which a specific reserve has been established.

Loans are generally placed on non-accrual status when they become past due 90 days or more unless they are both well-secured and in the process of collection.

Loans are categorized as TDRs when the Bank, for economic or legal reasons related to a borrower s financial difficulties, grants a concession to the borrower that it would not otherwise consider.

Other impaired loans consist of certain loans that are internally classified as substandard that have not been placed on non-accrual or considered a troubled debt restructuring but are not fully secured by the value of the collateral or the observable market price for the loan is less than its outstanding balance. Other impaired loans exhibit some adverse credit characteristics but continue to accrue interest because they are generally paying current.

The following tables summarize impaired loans:

When evaluating whether a loan restructuring is a TDR, WesBanco considers both whether the loan modification constitutes a concession and whether the borrower is experiencing financial difficulties. WesBanco generally considers all aspects of the restructuring in determining whether a concession has been granted, including the debtor s ability to access funds at a market rate for debt with similar risk characteristics and among other things, the significance of the modification relative to unpaid principal or collateral value of the debt, and/or the significance of a delay in the timing of payments relative to the frequency of payments, original maturity date, or the expected duration of the loan. The most common concessions granted generally include one or more modifications to the terms of the debt such as a reduction in the interest rate for the remaining life of the debt, an extension of the maturity date at an interest rate lower than the current market rate for new debt with similar risk, a reduction of the face amount or maturity amount of the debt, or a reduction of accrued interest.

WesBanco must also determine whether the debtor is experiencing financial difficulties. When making this determination, WesBanco considers whether the debtor is currently in payment default on any of its debt or whether it is probable that the debtor would be in payment default in the foreseeable future without the modification. Other indicators of financial difficulty include whether the debtor has declared or is in the process of declaring bankruptcy, the debtor s ability to continue as a going concern, or the debtor s projected cash flow to service its debt (including principal & interest) in accordance with the contractual terms for the foreseeable future, without a modification. If the payment of principal at original maturity is primarily dependent on the value of collateral, the current value of that collateral is considered in determining whether the principal will be paid.

In general, a debtor that can obtain funds from sources other than its existing creditors at market interest rates at or near those for non-troubled debt is not involved in a troubled debt restructuring. A restructuring that results in only a delay in payment that is insignificant is not a concession, for example, if the amounts of restructured payments subject to delay are insignificant relative to the unpaid principal or collateral value of the debt. Additionally, the delay in the timing of a restructured payment period that is insignificant relative to the frequency of payments due, the debt s original contractual maturity, or the debt s original expected duration is not a concession.

The restructuring of a loan does not have a material effect on the allowance or provision for credit losses as the internal risk grade of a loan has more influence on the allowance than the classification of a loan as a troubled debt restructuring. The internal risk rating is the primary factor for establishing the allowance for commercial loans, including commercial real estate except for loans that are individually evaluated for impairment, in which case a specific reserve is established pursuant to GAAP, and portfolio segment loss history is the primary factor for establishing the allowance for residential real estate, home equity and consumer loans.

Nonaccrual loans that are restructured remain on nonaccrual, but may move to accrual status after they have performed according to the restructured terms for a period of time. TDRs on accrual status generally remain on accrual status as long as they continue to perform in accordance with their modified terms. TDRs may also be placed on nonaccrual if they do not perform in accordance with the restructured terms.

The eleven largest restructurings at period-end represented **\$22.8** million or 52.1% of restructurings as of September 30, 2011 comprised of four commercial real estate land and construction loans and seven other commercial real estate loans with specific reserves of **\$3.1** million. The concessions granted in the majority of the top eleven restructurings were either extensions of maturity combined with interest only for a period of less than a year, or a reduction in payments through an extension of maturity date by re-amortizing principal and interest.

The following table presents details related to loans identified as TDRs during the three and nine months ended September 30, 2011:

(1) Excludes loans that were either paid off or charged-off by period end. The pre-modification balance represents the balance outstanding at the beginning of the period. The post-modification balance represents the outstanding balance at period end.

For the nine months ended September 30, 2011 there were two contracts restructured greater than \$1 million, representing approximately **\$3.1** million at September 30, 2011.

The following table summarizes TDRs which defaulted (defined as past due 90 days) during the three and nine months ended September 30, 2011 that were restructured within the last twelve months prior to September 30, 2011:

| | Defaulted TDRs (1) | | | | | | | | | |
|-----------------------------------|---------------------------|---------------|--------------------------------|------------|--|--|--|--|--|--|
| | For the Thre Septemi | | e Months Ended ber 30, 2011 | | | | | | | |
| | Number of | Recorded | Number of | Recorded | | | | | | |
| (unaudited, dollars in thousands) | Contracts | Investment | Contracts | Investment | | | | | | |

| Commercial and industrial | 5 | 933 | 7 | 1,336 | | | | | | |
| Residential real estate | - | - | - | - | | | | | | |
| Home equity | - | - | - | - | | | | | | |
| Consumer | - | - | - | - | | | | | | |
| Total | 11 | \$ 1,959 | 15 | \$ 2,730 | | | | | | |

(1) Excludes loans that were either charged-off or cured by period end. The recorded investment is as of September 30, 2011.

TDRs that defaulted during the nine month period and that were restructured within the last twelve months represented 6.2% of the balance at September 30, 2011. The average balance per contract was approximately \$180,000. Generally these loans are placed on non-accrual status unless they are both well-secured and in the process of collection. At September 30, 2011, only two loans in the table above were accruing interest.

Table of Contents

WesBanco had unfunded commitments to debtors whose loans were classified as TDRs of **\$0.1** million and \$1.4 million at September 30, 2011 and December 31, 2010, respectively.

The following table summarizes other real estate owned and repossessed assets included in other assets:

| (unaudited, in thousands) | 1 | September 30, 2011 | | December 31, 2010 | |
|--|----|-----------------------|----|----------------------|--|
| Other real estate owned | \$ | 4,497 | \$ | 7,724 | |
| Repossessed assets | | 190 | | 345 | |
| Total other real estate owned and repossessed assets | \$ | 4,687 | \$ | 8,069 | |

NOTE 5. FEDERAL HOME LOAN BANK BORROWINGS

WesBanco is a member of the FHLB System. WesBanco s FHLB borrowings, which consist of borrowings from both the FHLB of Pittsburgh and the FHLB of Cincinnati, are secured by a blanket lien by the FHLB on certain residential mortgages and other loan types or securities with a market value in excess of the outstanding balances of the borrowings. At September 30, 2011 and December 31, 2010 WesBanco had FHLB borrowings of **\$176.6** million and \$253.6 million, with a weighted-average interest rate of **3.59%** and 3.64% respectively. The decline in borrowings from December 31, 2010 was due to scheduled maturities and their payoff. The terms of the security agreement with the FHLB include a specific assignment of collateral that requires the maintenance of qualifying mortgage and other types of loans as pledged collateral with unpaid principal amounts in excess of the FHLB advances, when discounted at certain pre-established percentages of the loans unpaid principal balances. FHLB stock owned by WesBanco is also pledged as collateral on these advances. The remaining maximum borrowing capacity by WesBanco with the FHLB at September 30, 2011 and December 31, 2010 was estimated to be approximately \$1.0 billion for both periods.

Certain FHLB advances contain call features, which allow the FHLB to call the outstanding balance or convert a fixed rate borrowing to a variable rate advance if the strike rate goes beyond a certain predetermined rate. The probability that these advances will be called depends primarily on the level of related interest rates during the call period. Of the **\$176.6** million outstanding at September 30, 2011, **\$106.1** million in FHLB convertible advances are subject to call or conversion to a variable rate advance by the FHLB.

The following table presents the aggregate annual maturities and weighted-average interest rates of FHLB borrowings at September 30, 2011 based on their contractual maturity dates and effective interest rates:

| (unaudited, dollars in thousands) Year | Scheduled Maturity | Weighted Average Rate |
|---|-----------------------|--------------------------|
| 2011 | \$ 8,012 | 3.86% |
| 2012 | 76,543 | 3.64% |
| 2013 | 50,373 | 3.28% |
| 2014 | 16,208 | 3.40% |
| 2015 | 932 | 4.69% |
| 2016 and thereafter | 24,513 | 4.10% |
| Total | \$ 176,581 | 3.59% |
| NOTE 6. PENSION PLAN | | |

The following table presents the net periodic pension cost for WesBanco s Defined Benefit Pension Plan (the Plan) and the related components:

| | For | the Three Septem | For the Nine Months Ender September 30, | | | | | |
|---|-----|---------------------|--|---------|----|---------|----|---------|
| (unaudited, in thousands) | | 2011 | 2 | 010 | | 2011 | | 2010 |
| Service cost benefits earned during year | \$ | 650 | \$ | 587 | \$ | 1,929 | \$ | 1,742 |
| Interest cost on projected benefit obligation | | 917 | | 886 | | 2,720 | | 2,630 |
| Expected return on plan assets | | (1,427) | | (1,210) | | (4,235) | | (3,591) |
| Amortization of prior service cost | | 15 | | (29) | | 44 | | (87) |
| Amortization of net loss | | 321 | | 306 | | 954 | | 908 |
| Net periodic pension cost | \$ | 476 | \$ | 540 | \$ | 1,412 | \$ | 1,602 |

The Plan covers all employees of WesBanco and its subsidiaries who were hired on or before August 1, 2007 who satisfy minimum age and length of service requirements, and is not available to employees hired after such date.

A minimum required contribution of **\$2.6** million is due for 2011 which will be funded by the Plan s available credit balance. No decision has been made as of September 30, 2011 relative to the level of contribution in excess of the required minimum that will be made to the Plan, if any.

NOTE 7. FAIR VALUE MEASUREMENTS

Certain assets and liabilities are measured at fair value on a recurring or nonrecurring basis. The following is a discussion of these assets and liabilities and valuation techniques applied to each for fair value measurement:

Securities: The fair value of securities available-for-sale which are measured on a recurring basis are determined primarily by obtaining quoted prices on nationally recognized securities exchanges or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities relationship to other similar securities. These securities are classified within level 1 or 2 of the fair value hierarchy. Positions that are not traded in active markets for which valuations are generated using assumptions not observable in the market or management s best estimate are classified within level 3 of the fair value hierarchy. This includes certain specific municipal debt issues.

Mortgage servicing rights: The fair value of mortgage servicing rights is based on an independent valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions based on management s best judgment that are significant inputs to the discounting calculations. If the carrying value exceeds fair value, they are considered impaired and are classified within level 3 of the fair value hierarchy as a result.

Impaired loans: Impaired loans are carried at the lower of cost or the fair value of the collateral for collateral-dependent loans. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The use of discounted cash flow models and management s best judgment are significant inputs in arriving at the fair value measure of the underlying collateral and impaired loans are therefore classified within level 3 of the fair value hierarchy.

Other real estate owned and repossessed assets: Other real estate owned and repossessed assets are carried at the lower of the investment in the assets or the fair value of the assets less estimated selling costs. The use of management s best judgment is a significant input in arriving at the fair value measure of the underlying collateral and therefore other real estate owned and repossessed assets are classified within level 3 of the fair value hierarchy.

Loans held for sale: Loans held for sale are carried, in aggregate, at the lower of cost or fair value. The use of a valuation model and management s best judgment are significant inputs in arriving at the fair value and therefore loans held for sale are classified within level 3 of the fair value hierarchy.

The following tables set forth WesBanco s financial assets and liabilities that were accounted for at fair value on a recurring basis by level within the fair value hierarchy:

September 30, 2011

| | et at Fair | Quoted Prices in Active Markets for Identical Assets (Level | n Signil Ol | Measurements ficant Other oservable Inputs | Signi Unobs Inj | ficant ervable puts |

WesBanco may be required from time to time to measure certain assets at fair value on a nonrecurring basis in accordance with United States generally accepted accounting principles. These adjustments to fair value usually result from application of lower-of-cost-or-market accounting or write-downs of individual assets. For assets measured at fair value on a nonrecurring basis, the following table provides the level of valuation assumptions used to determine each adjustment in the carrying value of the related individual assets or portfolios:

| | | | F Quoted Prices in | Measurement | ıts Using: | | | |
|--|----|----------------------|---|---|------------|---------------------------------------|--------|--|
| | | | Active Markets for Identical Assets | Significant Other Observable Inputs | | Significant Unobservable Inputs | | |
| (unaudited, in thousands) | | ets at Fair Value | (Level 1) | | | (Level 3) | | |
| September 30, 2011 | | | | | | | | |
| Impaired loans (1) | \$ | 14,846 | \$ - | \$ | - | \$ | 14,846 | |
| Other real estate owned and repossessed assets (2) | | 4,687 | - | | - | | 4,687 | |
| Mortgage servicing rights (3) | | 1,522 | - | | - | | 1,522 | |
| Loans held for sale (4) | | 8,139 | - | | - | | 8,139 | |
| December 31, 2010 | | | | | | | | |
| Impaired loans (1) | \$ | 37,960 | - | | - | \$ | 37,960 | |
| Other real estate owned and repossessed assets (2) | | 8,069 | - | | - | | 8,069 | |
| Mortgage servicing rights (3) | | 1,675 | - | | - | | 1,675 | |
| Loans held for sale (4) | | 10,800 | - | | - | | 10,800 | |

(1) Represents the carrying value of loans for which adjustments are based on the appraised value and management s judgment of the value of collateral.

(2) Other real estate owned and repossessed assets are carried at the lower of the investment in the assets or the fair value of the assets less estimated selling costs.

(3) Represents the carrying value of mortgage servicing rights whose value has been impaired and therefore carried at fair value as determined from independent valuations.

(4) Loans held for sale are carried, in aggregate, at the lower of cost or fair value.

NOTE 8. DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value estimates of financial instruments are based on the present value of expected future cash flows, quoted market prices of similar financial instruments, if available, and other valuation techniques. These valuations are significantly affected by discount rates, cash flow assumptions, and risk assumptions used. Therefore, fair value estimates may not be substantiated by comparison to independent markets and are not intended to reflect the proceeds that may be realizable in an immediate settlement of the instruments.

Fair value is determined at one point in time and is not representative of future value. These amounts do not reflect the total value of a going concern organization. Management does not have the intention to dispose of a significant portion of its financial instruments and, therefore, the unrealized gains or losses should not be interpreted as a forecast of future earnings and cash flows.

The following table represents the estimates of fair value of financial instruments:

| | S | ptember | : 30, | | Decem | ıber 3 | 1, | |
|-----------------------------------|------------------|---------|-----------|----|----------------------|--------|-----------|--|
| | | 2011 | | | 20 |)10 | | |
| | | | Fair | | | | Fair | |
| (unaudited, in thousands) | Carryir Amoun | 0 | Value | | Carrying Amount V | | | |
| Financial assets: | | | | | | | | |
| Cash and due from banks | \$ 145, | 18 \$ | 145,518 | \$ | 79,136 | \$ | 79,136 | |
| Securities available-for-sale | 952, | 65 | 952,065 | | 957,481 | | 957,481 | |
| Securities held-to-maturity | 604,9 | 94 | 631,405 | | 468,710 | | 465,902 | |
| Net loans | 3,185,2 | 80 | 3,091,464 | 3, | 227,625 | | 3,070,061 | |
| Loans held for sale | 8, | 39 | 8,139 | | 10,800 | | 10,800 | |
| Accrued interest receivable | 20, | 37 | 20,837 | | 20,536 | | 20,536 | |
| Bank owned life insurance | 109,2 | 04 | 109,204 | | 106,502 | | 106,502 | |
| Financial liabilities: | | | | | | | | |
| Deposits | 4,356,4 | 08 | 4,384,540 | 4, | 172,423 | | 4,201,934 | |
| Federal Home Loan Bank borrowings | 176, | 81 | 183,703 | | 253,606 | | 263,983 | |
| Other borrowings | 192, | 80 | 194,263 | | 187,385 | | 189,094 | |
| Junior subordinated debt | 106, | 58 | 56,043 | | 106,034 | | 55,397 | |
| Accrued interest payable | 5, | 72 | 5,772 | | 6,559 | | 6,559 | |

The following methods and assumptions were used to estimate the fair value of financial instruments:

Cash and due from banks The carrying amount for cash and due from banks is a reasonable estimate of fair value.

Securities Fair values for securities are based on quoted market prices, if available. If market prices are not available, then quoted market prices of similar instruments are used. If quoted prices of similar instruments are not available, the fair value is generated from model-based techniques using assumptions not observable in the market.

Net loans Fair values for loans are estimated using a discounted cash flow methodology. The discount rates take into account interest rates currently being offered to customers for loans with similar terms, the credit risk associated with the loan and market factors, including liquidity. In the current market environment for loans, investors are generally requiring a much higher rate of return than the return inherent in loans if held to maturity given the general lack of market liquidity. The valuation of the loan portfolio reflects discounts that WesBanco believes are consistent with transactions occurring in the marketplace for both performing and distressed loan types. The carrying value that fair value is compared to is net of the allowance for loan losses and other associated premiums and discounts.

Loans held for sale Loans held for sale are carried, in aggregate, at the lower of cost or fair value.

Accrued interest receivable The carrying amount of accrued interest receivable approximates its fair value.

Bank-owned life insurance The carrying value of bank-owned life insurance represents the net cash surrender value of the underlying insurance policies, should these policies be terminated. Management believes that the carrying value approximates fair value.

Deposits The carrying amount is considered a reasonable estimate of fair value for demand, savings and other variable rate deposit accounts. The fair value of fixed maturity certificates of deposit is estimated by a discounted cash flow method using the rates currently offered for deposits of similar remaining maturities.

Federal Home Loan Bank borrowings For FHLB borrowings, fair value is based on rates currently available to WesBanco for borrowings with similar terms and remaining maturities.

Other borrowings Fair values for federal funds purchased and repurchase agreements are based on quoted market prices, if available. If market prices are not available, then quoted market prices of similar instruments are used.

Junior subordinated debt owed to unconsolidated subsidiary trusts Due to the pooled nature of these instruments, which are not actively traded on an equity market, estimated fair value is based on broker prices from recent similar sales.

Accrued interest payable The carrying amount of accrued interest payable approximates its fair value.

Off-balance sheet financial instruments Off-balance sheet financial instruments consist of commitments to extend credit including letters of credit. Fair values for commitments to extend credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit standing of the counterparties. The estimated fair value of the commitments to extend credit are insignificant and therefore not presented in the above table.

NOTE 9. COMMITMENTS AND CONTINGENT LIABILITIES

Commitments In the normal course of business, WesBanco offers off-balance sheet credit arrangements to enable its customers to meet their financing objectives. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the financial statements. WesBanco s exposure to credit losses in the event of non-performance by the other parties to the financial instruments for commitments to extend credit and standby letters of credit is limited to the contractual amount of those instruments. WesBanco uses the same credit policies in making commitments and conditional obligations as for all other lending. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The allowance for credit losses associated with loan commitments was **\$0.5** million and \$1.4 million as of September 30, 2011 and December 31, 2010 respectively, and is included in other liabilities on the Consolidated Balance Sheets.

Letters of credit are conditional commitments issued by banks to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including normal business activities, bond financing and similar transactions. Standby letters of credit are considered guarantees. The liability associated with standby letters of credit is recorded at its estimated fair value of **\$0.1** million as of both September 30, 2011 and December 31, 2010, respectively, and is included in other liabilities on the Consolidated Balance Sheets.

Affordable housing plan guarantees are performance guarantees for various building project loans. The guarantee amortizes as the loan balances decrease. Credit card guarantees are credit card balances not owned by WesBanco, whereby the Bank guarantees the performance of the cardholder.

The following table presents total commitments to extend credit, guarantees and various letters of credit outstanding:

| (unaudited, in thousands) | Sep | tember 30, 2011 | Dec | ember 31, 2010 |
|------------------------------------|-----|--------------------|-----|-------------------|
| Commitments to extend credit | \$ | 746,651 | \$ | 648,839 |
| Standby letters of credit | | 38,063 | | 35,794 |
| Affordable housing plan guarantees | | 4,168 | | 4,255 |
| Credit card guarantees | | 3,796 | | 3,758 |

CONTINGENT LIABILITIES WesBanco and its subsidiaries are parties to various legal and administrative proceedings and claims. While any claim contains an element of uncertainty, management believes that the outcome of such proceedings or claims pending or known to be threatened will not have a material adverse effect on WesBanco s consolidated financial position.

NOTE 10. BUSINESS SEGMENTS

WesBanco operates two reportable segments: community banking and trust and investment services. WesBanco s community banking segment offers services traditionally offered by full-service commercial banks, including commercial demand, individual demand and time deposit accounts, as well as commercial, mortgage and individual installment loans, and certain non-traditional offerings, such as insurance and securities brokerage services. The trust and investment services segment offers trust services as well as various alternative investment products including mutual funds. The market value of assets managed or held in custody by the trust and investment services segment was approximately **\$2.8** billion at September 30, 2011 and 2010, respectively. These assets are held by WesBanco in fiduciary or agency capacities for their customers and therefore are not included as assets on WesBanco s Consolidated Balance Sheets.

Condensed financial information by business segment is presented below:

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management s Discussion and Analysis represents an overview of the results of operations and financial condition of WesBanco for the three and nine months ended September 30, 2011. This discussion and analysis should be read in conjunction with the Consolidated Financial Statements and Notes thereto.

FORWARD-LOOKING STATEMENTS

Forward-looking statements in this report relating to WesBanco s plans, strategies, objectives, expectations, intentions and adequacy of resources, are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The information contained in this report should be read in conjunction with WesBanco s Form 10-K for the year ended December 31, 2010 and documents subsequently filed by WesBanco with the Securities and Exchange Commission (SEC), including WesBanco s Forms 10-Q for the quarters ended March 31 and June 30, 2011, which are available at the SEC s website, www.sec.gov or at WesBanco s website, www.wesbanco.com. Investors are cautioned that forward-looking statements, which are not historical fact, involve risks and uncertainties, including those detailed in WesBanco s most recent Annual Report on Form 10-K filed with the SEC under Risk Factors in Part I, Item 1A. Such statements are subject to important factors that could cause actual results to differ materially from those contemplated by such statements, including without limitation, the effects of changing regional and national economic conditions; changes in interest rates, spreads on earning assets and interest-bearing liabilities, and associated interest rate sensitivity; sources of liquidity available to WesBanco and its related subsidiary operations; potential future credit losses and the credit risk of commercial, real estate, and consumer loan customers and their borrowing activities; actions of the Federal Reserve Board, the Federal Deposit Insurance Corporation, the SEC, Financial Institution Regulatory Authority, Municipal Securities Rulemaking Board, Securities Investors Protection Corporation, and other regulatory bodies; potential legislative and federal and state regulatory actions and reform, including, without limitation, the impact of the implementation of the Dodd-Frank Act; adverse decisions of federal and state courts; fraud, scams and schemes of third parties; internet hacking; competitive conditions in the financial services industry; rapidly changing technology affecting financial services; marketability of debt instruments and corresponding impact on fair value adjustments; and/or other external developments materially impacting WesBanco s operational and financial performance. WesBanco does not assume any duty to update forward-looking statements.

OVERVIEW

WesBanco is a multi-state bank holding company operating through 112 branches, one loan production office and 123 ATM machines in West Virginia, Ohio and western Pennsylvania, offering retail banking, corporate banking, personal and corporate trust services, brokerage services, mortgage banking and insurance. WesBanco s businesses are significantly impacted by economic factors such as market interest rates, federal monetary and regulatory policies, local and regional economic conditions and the competitive environment s effect upon WesBanco s business volumes. WesBanco s deposit levels are affected by numerous factors including personal savings rates, personal income, and competitive rates on alternative investments, as well as competition from other financial institutions within the markets we serve and liquidity needs of WesBanco. Loan levels are also subject to various factors including construction demand, business financing needs, consumer spending and interest rates, as well as loan terms offered by competing lenders.

APPLICATION OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

WesBanco s critical accounting policies involving the significant judgments and assumptions used in the preparation of the Consolidated Financial Statements as of September 30, 2011 have remained unchanged from the disclosures presented in WesBanco s Annual Report on Form 10-K for the year ended December 31, 2010 under the section Management s Discussion and Analysis of Financial Condition and Results of Operations.

RESULTS OF OPERATIONS

EARNINGS SUMMARY

Net income for the quarter ended September 30, 2011 was \$11.0 million as compared to \$9.2 million for the third quarter of 2010, representing an increase of 20.3%, while diluted earnings per share were \$0.41, as compared to \$0.34 per share for the third quarter of 2010. For the nine month period ended September 30, 2011, net income was \$33.2 million as compared to \$25.3 million for the same period in 2010, representing an increase of 31.1%, while diluted earnings per share were \$1.25, as compared to \$0.95 per share for the nine months ended September 30, 2010.

Net interest income increased \$0.9 million or 2.2% in the third quarter and \$3.7 million or 3.0% in the first nine months of 2011 as compared to the same periods in 2010 due primarily to increases in the net interest margin. The margin strengthened through disciplined pricing of loans and deposits, and significant improvements in the funding mix. The net interest margin improved to 3.67% in the third quarter and to 3.69% in the year-to-date period of 2011, an increase of 6 and 11 basis points, respectively, as compared to the same periods of 2010. The average rate on interest bearing liabilities decreased by 28 basis points in the third quarter and 38 basis points in the year-to-date period, while the rate on earning assets declined at a slower pace of 20 and 25 basis points, respectively. Lower offered rates on maturing, higher-rate certificates of deposit, an increase in the balances of lower-cost products, and utilization of liquidity from increased deposits to reduce higher cost FHLB borrowings all contributed to the improvement in the cost of funds. The average balance for FHLB borrowings, which have the highest average interest cost at 3.42% and represent 12.8% of interest expense, decreased by \$104.4 million or 34.4% in the third quarter of 2011 from the third quarter of 2010.

The provision for credit losses decreased \$0.9 million in the third quarter and \$9.3 million in the first nine months of 2011 as compared to the same periods in 2010. The provision was higher in 2010 due to the ongoing impact of the recession on all categories of the portfolio but the decrease in 2011 reflects gradually improving credit quality. Net charge-offs increased \$10.5 million as compared to the second quarter of 2011 due to \$10.3 million of charge offs relating to the sale of \$17.2 million of commercial real estate loans. As compared to the second quarter of 2011, non-accrual loans at September 30, 2011 decreased \$5.2 million and TDRs accruing interest decreased \$9.0 million, primarily due to the loan sale. Classified and criticized loans at September 30, 2011 decreased \$35.1 million compared to June 30, 2011 and \$50.7 million compared to September 30, 2010, of which, \$17.2 million was attributable to the loan sale with the remainder resulting from improvement in credit quality and principal reductions. The allowance for loan losses was 1.70% of total loans at September 30, 2011, 1.86% at December 31, 2010 and 1.78% at September 30, 2010.

In the third quarter of 2011 non-interest income decreased \$0.4 million or 2.5% as compared to the third quarter of 2010 and \$0.5 million or 1.1% as compared to the first nine months of 2010. The quarterly decrease was due to a \$0.9 million decrease in net securities gains, and a \$0.7 million decrease in net gains on sales of mortgage loans as more loans with terms of 15 years and less are being retained in 2011. These decreases were partially offset by a \$0.4 million increase in electronic banking fees and continued decreases in losses on other real estate owned. Similar trends were evident in the year-to-date period, but additionally trust fees increased \$1.5 million or 13.2% through new business, fee increases and market improvements, and service charges on deposits decreased \$1.9 million due to regulatory changes effective in August of last year. Service charges on deposits stabilized in the current quarter as compared to both the third quarter of 2010 and the second quarter of 2011.

Non-interest expense decreased \$2.1 million or 5.8% in the third quarter and \$0.8 million or 0.8% in the first nine months of 2011, as compared to the same periods in 2010. In the third quarter, employee benefits decreased \$1.0 million due to lower employee health care costs, and FDIC insurance decreased \$0.6 million due to a new calculation of FDIC insurance expense, effective April 1, 2011. Other operating expense decreased by \$1.0 million due to the recovery of a second quarter expensed item relating to retail customer fraud for \$0.7 million and continued expense reductions in many other categories. Year-to-date, FDIC insurance decreased \$1.3 million and employee benefits decreased \$0.7 million, partially offset by increases in salaries and wages of \$1.3 million, due to routine annual adjustments to compensation, and a \$0.9 million increase in marketing due to the promotions focused on growing demand deposits and home equity loans. WesBanco s efficiency ratio was 56.8% in the third quarter as compared to 61.1% in the third quarter of 2010. Year-to-date the ratio was 59.4% compared to 61.1% in the 2010 period.

| Net interest margin, fully taxable equivalent | | 3.67% | 3.61% | | 3.69% | 3.58% |

Net interest income, which is WesBanco s largest source of revenue, is the difference between interest income on earning assets, primarily loans and securities, and interest expense on liabilities, comprised of deposits and short and long-term borrowings. Net interest income is affected by the general level of and changes in interest rates, the steepness of the yield curve, changes in the amount and composition of interest earning assets and interest bearing liabilities, as well as the frequency of repricing and turnover of those assets and liabilities. Net interest income increased \$0.9 million or 2.2% in the third quarter and \$3.7 million or 3.0% in the first nine months of 2011 as compared to the same periods in 2010 due to increases in the net interest margin on relatively flat average earning assets. The margin strengthened through disciplined pricing of loans and deposits and significant improvements in the funding mix through decreases in higher cost CDs and borrowings. In addition, interest income from the investment portfolio has increased by 2.3% in the first nine months of 2011 due to an increase in average outstanding balances of \$203.7 million partially offset by a decrease in the average rates earned as market rates decreased. The net interest margin improved to 3.67% in the third quarter and to 3.69% in the year-to-date period of 2011, an increase of 6 and 11 basis points, respectively, as compared to the same periods of 2010. The average rate on interest bearing liabilities decreased by 28 basis points in the third quarter and 38 basis points in the nine month period, while the rate on earning assets declined at a slower pace of 20 and 25 basis points, respectively. Lower offered rates on maturing, higher-rate certificates of deposit and an increase in the balances of lower-cost products including checking, money market and savings accounts all contributed to the improvement in the cost of funds. Average total deposits increased 2.4% in the third quarter. This growth includes deposits received from customers participating in Marcellus shale gas activity. In addition, the average balance for FHLB borrowings, which have the highest average interest cost at 3.42% and represent 12.8% of interest expense, decreased by \$104.4 million or 34.4% in the third quarter of 2011 from the third quarter of 2010. FHLB borrowings dropped to 3.2% of total assets from 4.8% at September 30, 2010. Average non-interest bearing deposit balances increased 14.5% in the third quarter as a result of marketing campaigns, customer incentives and treasury management initiatives for commercial customers. In addition, an increase in temporary trust deposits and timing differences for certain governmental deposits were factors.

Interest income decreased 3.9% in the third quarter and 5.2% in the year-to-date period of 2011 as compared to the same periods in 2010 due to lower yields, while total average earning assets were nearly unchanged. The yield decreased 20 basis points to 4.78% in the third quarter and 25 basis

points to 4.86% in the first nine months of 2011. Rates decreased on all earning asset categories from reduced rates on new and repriced assets due to competition and the lower interest rate environment. In addition, the percentage of earning assets invested in lower yielding securities increased, as compared to typically higher-yielding loans. Securities yields decreased, primarily due to the reinvestment of funds from investment maturities and calls at current lower available interest rates. Taxable securities yields decreased 31 basis points in the third quarter while tax-exempt securities yields declined only 28 basis points due to the longer average life of the tax-exempt portfolio and limited additions to this portfolio. In addition, mortgage backed, structured notes and government supported (Build America Bonds during 2010) rate opportunities were available in taxable securities, resulting in an increase in average taxable securities. Repricing of loans and the competitive necessity of offering lower rates on quality credits in an increasingly competitive and lower interest rate environment caused a decline in loan yields of 16 basis points in the third quarter and 15 basis points in the first nine months of 2011. In addition, during a period where customer loan demand and the economic environment limited loan growth opportunities, proceeds from loan maturities, payoffs and principal reductions, which generally have higher yields, have been reinvested at lower yields, thus reducing the overall yield of earning assets.

Average loan balance decreases over the past year are primarily due to management s continued focus on overall profitability and quality of the loan portfolio through disciplined underwriting and pricing practices and strategic decreases in residential real estate loans through the sale of most originations through the end of the first quarter of 2011. More recently, as a result of higher overall residential originations, primarily refinances, and a greater percentage of such loans retained on the balance sheet, these loans are beginning to grow. There were also several larger loan payoffs, as well as sales, charge offs and the implementation of other exit strategies for certain impaired or otherwise underperforming commercial loans, including the sale of \$17.2 million of impaired commercial real estate loans in the third quarter of 2011. In addition, the slow economic recovery has resulted in businesses and consumers remaining cautious, leading to fewer new commercial loans, such as residential construction, and reduced commercial line usage. Consumer loans declined somewhat due to reduced demand and overall poorer credit quality of new applicants for automobile and other consumer loan types. However, excluding the effect of the third quarter 2011 loan sale, total portfolio loans at September 30, 2011 decreased only 0.9% since December 31, 2010.

In the third quarter of 2011 interest expense decreased 19.3% and, in the first nine months of 2011, interest expense decreased 23.6% as compared to the same periods of 2010 due to decreases in rates paid, decreases in average interest bearing liability balances, and a change in the liability mix towards less expensive sources of funding. The average rate paid on interest bearing liabilities decreased 28 basis points to 1.28% in the third quarter and 38 basis points to 1.36% in the first nine months of 2011, while interest bearing liabilities decreased 1.7% and 2.3%, respectively. Rates paid on deposits declined by 25 basis points in the third quarter and 31 basis points in the year-to-date period primarily due to declines in rates paid in all deposit categories. These declines are due to management reducing interest rates in all categories, including renewing and new CDs, to competitive levels in order to realize a lower cost of funds during a period of declining loan yields. Improvements in the deposit funding mix helped to lower the cost of funds, with average CDs decreasing to 37.9% of total average deposits in the third quarter, from 42.3% in the same quarter of 2010, while all other account types increased to 62.1%. The overall reduction in average interest bearing liabilities is primarily due to the decrease in FHLB borrowings, partially offset by increases in average interest bearing deposits of \$18.8 million in the third quarter and \$65.4 million in the year-to-date period of 2011 as compared to 2010. In addition, average non-interest bearing demand deposits increased by \$82.3 million and \$72.9 million in the quarter and year-to-date periods. Balance sheet liquidity from the deposit increases was used to pay down higher-cost maturing FHLB borrowings, significantly contributing to the reduced cost of funds. FHLB borrowings were 4.8% of average interest bearing liabilities in the third quarter as compared to 7.2% in 2010. Average deposits increased significantly in every category other than CDs even as offered rates were reduced. Certificates of deposits decreased by \$141.6 million due to reductions in rate offerings and customer demand for other shorter-term deposit products.

PROVISION FOR CREDIT LOSSES

The provision for credit losses is the amount to be added to the allowance for credit losses after net charge-offs have been deducted to bring the allowance to a level considered appropriate to absorb probable losses inherent in the loan portfolio. The provision for credit losses decreased \$0.9 million in the third quarter and \$9.3 million in the first nine months of 2011 as compared to the same periods in 2010. The provision was higher in 2010 due to the ongoing impact of the recession on all categories of the portfolio but the decrease in 2011 reflects gradually improving credit quality. Net charge-offs increased \$10.5 million as compared to the second quarter of 2011 due to \$10.3 million of charge offs relating to the sale of \$17.2 million of commercial real estate loans. Third quarter 2011 net charge offs were slightly lower than in the third quarter of 2010 which also included a loan sale. As compared to the end of the second quarter of 2011, non-accrual loans at September 30, 2011 decreased \$5.2 million and TDRs accruing interest decreased \$9.0 million, primarily due to the loan sale. Classified and criticized loans at September 30, 2011 decreased \$35.1 million or 11.5% compared to June 30, 2011 and \$50.7 million or 15.8% compared to September 30, 2010, of which, \$17.2 million was attributable to the loan sale with the remainder resulting from improvement in credit quality and principal reductions. The allowance for loan losses was 1.70% of total loans at September 30, 2011, 1.86% at December 31, 2010 and 1.78% at September 30, 2010. (Please see the Allowance for Credit Losses section of this MD&A for additional discussion).

Non-interest income is a significant source of revenue and an important part of WesBanco s results of operations. WesBanco offers its customers a wide range of retail, commercial, investment and electronic banking services, which are viewed as a vital component of WesBanco s ability to attract and maintain customers, as well as providing additional fee income beyond normal spread-related income to WesBanco. In the third quarter of 2011 non-interest income decreased \$0.4 million as compared to the third quarter of 2010 and \$0.5 million in the year-to-date period. The quarterly decrease was due to a \$0.9 million decrease in net securities gains, and a \$0.7 million decrease in net gains on sales of mortgage loans as more loans with terms of 15 years and less are being retained in 2011. These decreases were partially offset by a \$0.4 million increase in electronic banking fees due to increased transaction volume, and continued decreases in losses on other real estate owned. Similar trends were evident in the year-to-date period, but additionally trust fees increased \$1.5 million or 13.2% through new business, fee increases and market improvements, and service charges on deposits decreased \$1.9 million due to regulatory changes effective in August of last year. Service charges on deposits have stabilized in the current quarter compared to both the third quarter of 2010 and the second quarter of 2011.

Trust fees improved 4.7% in the third quarter and 13.2% year-to-date, as compared to the respective periods in 2010, due to new business and the implementation of a fee increase in October of 2010. Higher average trust assets during 2011 also contributed to the improved fees; however, due to the recent decline in the markets, trust assets at September 30, 2011 remain unchanged from September 30, 2010 at \$2.8 billion. At September 30, 2011, trust assets include managed assets of \$2.2 billion and non-managed (custodial) assets of \$0.6 billion. Assets managed for the WesMark funds, a proprietary group of mutual funds that are advised by WesBanco s trust and investment services group, were \$708.2 million as of September 30, 2011 and \$707.8 million at September 30, 2010 and are included in trust managed assets.

Electronic banking fees, which include debit card interchange fees, improved by \$0.4 million and \$1.2 million in the third quarter and first nine months of 2011 as compared to the same periods in the prior year, due to a higher volume of debit card transactions during the period which have continued to grow as customers move more towards electronic transactions from checks and other forms of payment. Recent marketing campaigns aimed at rewarding customers for debit card transactions have also increased transaction volumes. Regulatory changes, which became effective October 1, 2011 for issuers with more than \$10 billion in assets, place a cap on debit card interchange fees. WesBanco anticipates some market-related long-term impact on its electronic banking fees in the future from these changes even though it is not directly subject to the new regulations.

Service charges on deposits, which are primarily customer overdraft fees, were 12.1% lower in the first nine months of 2011 as compared to the same period in 2010 due to changes in customer behavior and recent regulatory changes that include requirements for customers to opt in for overdraft coverage of certain types of electronic banking activities. Preceding the August 15, 2010 implementation of the new rules on existing accounts, WesBanco experienced lower daily and monthly overdraft usage patterns as average retail demand deposit balances were higher. Changes in marketing strategies and effectiveness for new demand deposit customers may have also had an impact on the decrease. While an overwhelming majority of WesBanco s heaviest overdraft users have opted-in to continue such coverage, low response rates from infrequent users may have some impact on our ability to earn associated fees, as does continuing higher average customer deposit account balances. Service

charges on deposits were relatively unchanged in the third quarter of 2011 as compared to the same quarter in 2010 as the regulatory changes went into effect in the third quarter of 2010.

Net losses on the sale of other real estate owned and other assets decreased by \$2.5 million for the nine months ended September 30, 2011 as compared to the first nine months of 2010 due to ongoing property liquidation efforts, as such the real estate owned balances have been reduced by almost 50% over the last year, and a prior year loss taken on a large hospitality-owned property.

Gains on the sale of mortgage loans decreased in 2011 by 37.6% as compared to the same period in 2010 primarily from a strategic effort initiated early in 2011 to retain more residential mortgage loans, with terms of 15 years or less, in the portfolio instead of selling most of these originations to the secondary market.

Non-interest expense decreased \$2.1 million or 5.8% in the third quarter and \$0.8 million or 0.8% in the first nine months of 2011, as compared to the same periods in 2010. In the third quarter, employee benefits decreased \$1.0 million due to lower employee health care costs, and FDIC insurance decreased \$0.6 million due to a new calculation of FDIC insurance expense, effective April 1, 2011. Other operating expense decreased by \$1.0 million due to the recovery of a second quarter expensed item relating to retail customer fraud for \$0.7 million and continued expense reductions in many other categories. Year-to-date, FDIC insurance decreased \$1.3 million and employee benefits decreased \$0.7 million, partially offset by increases in salaries and wages of \$1.3 million, due to routine annual adjustments to compensation, and a \$0.9 million increase in marketing due to promotions focused on growing demand deposits and home equity loans. WesBanco s efficiency ratio was 56.8% in the third quarter as compared to 61.1% in the third quarter of 2010. Year-to-date the ratio was 59.4% compared to 61.1% in the 2010 period.

Salaries and wages increased 3.5% and 3.2% for the three and nine months ended September 30, 2011 as compared to the same periods in 2010, primarily due to regular employee compensation increases and higher incentive compensation accruals. Employee benefits declined 21.6% and 5.2% primarily due to lower employee health care partially offset by higher stock compensation expense.

Marketing expenses increased \$0.9 million for the nine months ended September 30, 2011 as compared to the same period in 2010 primarily due to increased customer cash incentives and free checking promotions focused on growing home equity loans and demand deposits throughout the year, while marketing for the quarter remained flat as compared to the third quarter of 2010.

Net occupancy for the three and nine months of 2011 increased due to higher depreciation and normal seasonal factors. Equipment declined in both the third quarter and year-to-date period primarily from depreciation decreases combined with a decline in service agreement expenses.

Other operating expenses in the third quarter of 2011 decreased \$1.0 million, as compared to the same period in 2010 primarily due to the recovery in the third quarter of charges recorded in the 2011 second quarter relating to retail customer fraud.

INCOME TAXES

The provision for income taxes increased \$1.7 million in the third quarter of 2011 and \$5.4 million in the nine month period as compared to the same periods in 2010, due to increased earnings and an increase in the estimated effective tax rate for 2011 to 19.2% from 8.9% in 2010 as the ratio of taxable income to tax-exempt income increased. Filed tax return adjustments in the third quarter of each year also somewhat impacted the year-to-date tax rates.

FINANCIAL CONDITION

Total assets increased 2.6% in the first nine months of 2011, while total shareholders equity increased 4.5% as compared to December 31, 2010. The net loan portfolio declined 1.3% from December 31, 2010, while investment securities and cash and due from banks increased by 13.1%. The loan portfolio decrease is a result of the sale or exit of certain impaired loans, and a continued focus on maintaining credit quality along with normal paydowns. However, excluding the effect of the loan sale during the third quarter, loans decreased only 0.9% from year end and overall loan originations have increased over 2010. Deposits increased 4.4% from December 31, 2010 primarily due to a 16.4% increase in demand deposits, which, combined with a 10.7% increase in savings deposits and a 5.7% increase in money market deposits, more than offset a 5.7% decrease in CDs. The reduction in CDs was due to planned reductions through lower offered rates for new and rollover CDs, and customers desire to shorten interest rate maturities. FHLB borrowings decreased 30.4% from December 31, 2010 as higher cost FHLB borrowings were paid down using available funding provided by the increase in deposits. Total shareholders equity increased by approximately \$27.5 million primarily due to net income exceeding dividends for the period by \$20.9 million, coupled with a \$10.4 million increase in unrealized gains in the available-for-sale portfolio, which are included net of the tax effect in accumulated other comprehensive income.

TABLE 6. COMPOSITION OF SECURITIES (1)

| (unaudited, dollars in thousands) | | ptember 30, 2011 | December 31, 2010 | | | Change | % Change |
|--|----|---------------------|----------------------|-----------|----|----------|----------|
| Securities available-for-sale (at fair value): | | | | | | | |
| Other government agencies | \$ | 275,028 | \$ | 363,135 | \$ | (88,107) | (24.3%) |
| Residential mortgage-backed securities and collateralized mortgage | | | | | | | |
| obligations of government agencies | | 451,067 | | 353,345 | | 97,722 | 27.7% |
| Obligations of states and political subdivisions | | 189,497 | | 210,808 | | (21,311) | (10.1%) |
| Corporate debt securities | | 31,839 | | 25,583 | | 6,256 | 24.5% |
| Equity securities | | 4,634 | | 4,610 | | 24 | 0.5% |
| Total securities available-for-sale | \$ | 952,065 | \$ | 957,481 | \$ | (5,416) | (0.6%) |
| Securities held-to-maturity (at amortized cost): | | | | | | | |
| Residential mortgage-backed securities and collateralized mortgage | | | | | | | |
| obligations of government agencies | | 281,025 | | 202,062 | | 78,963 | 39.1% |
| Other residential collateralized mortgage obligations | | 876 | | 1,224 | | (348) | (28.4%) |
| Obligations of states and political subdivisions | | 321,641 | | 263,973 | | 57,668 | 21.8% |
| Corporate debt securities | | 1,452 | | 1,451 | | 1 | 0.1% |
| Total securities held-to-maturity | \$ | 604,994 | \$ | 468,710 | \$ | 136,284 | 29.1% |
| Total securities | \$ | 1,557,059 | \$ | 1,426,191 | \$ | 130,868 | 9.2% |
| Available-for-sale securities: | | | | | | | |
| Weighted average taxable equivalent yield at the respective period end | | 3.13% | | 3.46% | | | |
| As a % of total securities | | 61.1% | | 67.1% | | | |
| Weighted average life (in years) | | 2.8 | | 4.0 | | | |
| Held-to-maturity securities: | | | | | | | |
| Weighted average taxable equivalent yield at the respective period end | | 4.55% | | 4.84% | | | |
| As a % of total securities | | 38.9% | | 32.9% | | | |
