(dollars and share amounts in thousands, except per share amounts, unless otherwise noted)

**Note 3 Recent Accounting Pronouncements**

*ASU 2011-03* In April 2011, the Financial Accounting Standards Board ( FASB ) issued Accounting Standards Update ( ASU ) No. 2011-03, *Reconsideration of Effective Control for Repurchase Agreements* ( ASU 2011-03 ). ASU 2011-03 provides amendments to Accounting Standards Codification ( ASC ) No. 860 *Transfers and Servicing* , which remove from the assessment of effective control (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation guidance related to that criterion. The amendments in this update are effective prospectively for transactions or modifications of existing transactions that occur on or after the beginning of the first interim or annual reporting period beginning on or after December 15, 2011, with early adoption not permitted. The Company is currently assessing the impact of the adoption of this update on the Company s financial condition, results of operations and cash flows.

*ASU 2011-04* In May 2011, the FASB issued ASU No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS* ( ASU 2011-04 ). ASU 2011-04 provides amendments to ASC No. 820 *Fair Value Measurement* , which results in a consistent definition of fair value and common requirements for measurement of and disclosure of fair value between U.S. GAAP and IFRS. Some of the amendments clarify the Board s intent about the application of existing fair value measurement requirements, while others change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The amendments in this update are effective prospectively during interim and annual periods beginning after December 15, 2011, with early adoption not permitted. The Company is currently assessing the impact of the adoption of this update on the Company s financial condition, results of operations and cash flows.

*ASU 2011-05* In June 2011, the FASB issued ASU No. 2011-05, *Presentation of Comprehensive Income* ( ASU 2011-05 ). ASU 2011-05 provides amendments to ASC No. 220 *Comprehensive Income* , which require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The amendments in this update are effective retrospectively for fiscal years and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. The FASB recently decided that the specific requirement to present items that are reclassified from other comprehensive income to net income alongside their respective components of net income and other comprehensive income will be deferred. The Company is currently assessing the impact of the adoption of this update on the Company s financial condition, results of operations and cash flows.

*ASU 2011-08* In September 2011, the FASB issued ASU No. 2011-08, *Testing Goodwill for Impairment* ( ASU 2011-08 ). ASU 2011-08 provides amendments to ASC No. 350 *Intangibles Goodwill and Other* , which are intended to reduce complexity and costs by allowing an entity the option to make a qualitative evaluation about the likelihood of goodwill impairment to determine whether it should calculate the fair value of a reporting unit. The amendments also improve previous guidance by expanding upon the examples of events and circumstances that an entity should consider between annual impairment tests in determining whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Also, the amendments improve the examples of events and circumstances that an entity having a reporting unit with a zero or negative carrying amount should consider in determining whether to measure an impairment loss, if any, under the second step of the goodwill impairment test. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, with early adoption permitted. The Company is currently assessing the impact of the adoption of this update on the Company s financial condition, results of operations and cash flows.

**Note 8 Financial Instruments Owned and Pledged as Collateral at Fair Value, Securities Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase**

The Company, through Protego Casa de Bolsa, S.A. de C.V. (PCB), enters into repurchase agreements with clients seeking overnight money market returns whereby PCB transfers to the clients Mexican government securities in exchange for cash and concurrently agrees to repurchase the securities at a future date for an amount equal to the cash exchanged plus a stipulated premium or interest factor. PCB deploys the cash received from, and acquires the securities deliverable to, clients under these repurchase arrangements by purchasing securities in the open market, which the Company reflects as Financial Instruments Owned and Pledged as Collateral at Fair Value on the Unaudited Condensed Consolidated Statements of Financial Condition, or by entering into reverse repurchase agreements with unrelated third parties. The Company accounts for these repurchase and reverse repurchase agreements as collateralized financing transactions, which are carried at their contract amounts, which approximate fair value given that the contracts generally mature the following business day. The Company records a liability on its Unaudited Condensed Consolidated Statements of Financial Condition in relation to repurchase transactions executed with clients as Securities Sold Under Agreements to Repurchase. The Company records as assets on its Unaudited Condensed Consolidated Statements of Financial Condition, Financial Instruments Owned and Pledged as Collateral at Fair Value (where the Company has acquired the securities deliverable to clients under these repurchase arrangements by purchasing securities in the open market) and Securities Purchased Under Agreements to Resell (where the Company has acquired the securities deliverable to clients under these repurchase agreements by entering into reverse repurchase agreements with unrelated third parties). These Mexican government securities have an estimated average time to maturity of approximately 2.5 years, as of September 30, 2011, and are pledged as collateral against repurchase agreements. Generally, collateral is posted equal to the contract value at inception and is subject to market changes. These repurchase agreements are primarily with institutional customer accounts managed by PCB which permit the counterparty to pledge the securities.

As of September 30, 2011 and December 31, 2010, a summary of the Company's assets, liabilities and collateral received or pledged related to these transactions was as follows:

**Cost Basis Investments**

In 2009, the Company invested \$1,250 in CITIC Securities International ( CSIP ) in exchange for a 5% noncontrolling interest in the entity. CSIP and the Company focus on providing merger and acquisition ( M&A ) advisory and investment management service, focused on transactions between China and other international markets. This investment is accounted for on the cost basis.

**Note 10 Fair Value Measurements**

ASC 820, *Fair Value Measurements and Disclosures* ( ASC 820 ), among other matters, requires enhanced disclosures about investments that are measured and reported at fair value. ASC 820 establishes a hierarchal disclosure framework which prioritizes and ranks the level of market price observability used in measuring investments at fair value. Market price observability is affected by a number of factors, including the type of investment and the characteristics specific to the investment. Investments with readily-available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value.

Investments measured and reported at fair value are classified and disclosed in one of the following categories:

**Level I** Quoted prices are available in active markets for identical investments as of the reporting date. The type of investments included in Level I include listed equities and listed derivatives. As required by ASC 820, the Company does not adjust the quoted price for these investments, even in situations where Evercore holds a large position and a sale could reasonably impact the quoted price.

**Level II** Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. The estimated fair values of these securities are based on quoted market prices provided by external pricing services.

**Level III** Pricing inputs are unobservable for the investment and includes situations where there is little, if any, market activity for the investment. The inputs into the determination of fair value require significant management judgment or estimation.

The following table presents the categorization of investments and certain other assets and liabilities measured at fair value on a recurring basis as of September 30, 2011 and December 31, 2010:

	September 30, 2011			Total

**Note 11 Issuance of Notes Payable and Warrants**

On August 21, 2008, the Company entered into a Purchase Agreement with Mizuho Corporate Bank, Ltd. ( Mizuho ) pursuant to which Mizuho purchased from the Company \$120,000 principal amount of senior notes due 2020 with a 5.20% coupon ( the Senior Notes ) and warrants to purchase 5,455 Class A Shares at \$22.00 per share (the Warrants ) expiring in 2020. Based on their relative fair value at issuance, plus accretion, the Senior Notes and Warrants were reflected in Notes Payable and Additional Paid-In-Capital on the Unaudited Condensed Consolidated Statement of Financial Condition. The Senior Notes have an effective yield of 7.94%. At September 30, 2011, the fair value of the Company s Senior Notes exceeded their aggregate carrying value by approximately \$20,000. The fair value of the Company s Senior Notes was estimated based on a present value analysis utilizing aggregate market yields for similar financial instruments.

The holder of the Senior Notes may require the Company to purchase, for cash, all or any portion of the holder s Senior Notes upon a change of control of the Company for a price equal to the aggregate accreted amount of such Senior Notes, (the Accreted Amount ), plus accrued and unpaid interest. Senior Notes held by Mizuho will be redeemable at the Accreted Amount at the option of the Company at any time within 90 days following the date on which Mizuho notifies the Company that it is terminating their strategic alliance agreement ( Strategic Alliance Agreement ). Senior Notes held by any other holder than Mizuho will be redeemable at the Accreted Amount (plus accrued and unpaid interest) at the option of the Company at any time beginning on the third anniversary of the closing of the Senior Notes and Warrants. In the event of a default under the indenture, the trustee or holders of 33 1/3% of the Senior Notes may declare that the Accreted Amount is immediately due and payable.

Pursuant to the agreement, Mizuho may not transfer the Senior Notes or Warrants until August 16, 2012 or, if the Strategic Alliance Agreement is terminated, one year following such termination. The Company has a right of first offer on any proposed transfer by Mizuho of the Warrants, Common Stock purchased in the open market or acquired by exercise of the Warrants and associated Common Stock issued as dividends.

The exercise price for the Warrants is payable, at the option of the holder of the Warrants, either in cash or by tender of Senior Notes at the Accreted Amount, at any point in time.

**Offerings** During the second quarter of 2011, the Company had an offering of 5,365 Class A Shares. A portion of the proceeds were used to purchase from certain holders, including members of the Company s senior management, a number of outstanding Evercore LP partnership units ( LP Units ). The Company used a portion of the remainder of the proceeds to fund the initial cash payments associated with the acquisition of Lexicon. See Note 4.

The offering resulted in an increase to Common Stock and Additional Paid-In-Capital of \$54 and \$167,880, respectively, on the Company s Unaudited Condensed Consolidated Statement of Financial Condition as of September 30, 2011. The purchase of outstanding LP Units resulted in a decrease to Additional Paid-In-Capital of \$84,195 on the Company s Unaudited Condensed Consolidated Statement of Financial Condition as of September 30, 2011. See Note 13 for the impact of this transaction on Noncontrolling Interest. Additionally, the above transaction resulted in an increase in the tax basis of the tangible and intangible assets of Evercore LP, which triggered an additional liability under the tax receivable agreement that was entered into in 2006 between the Company and the LP Unit holders. The agreement provides for a payment to the LP Unit holders of 85% of the cash tax savings (if any), resulting from the increased tax benefits from the exchange and for the Company to retain 15% of such benefits. Accordingly, Deferred Tax Assets Non-Current, Amounts Due Pursuant to Tax Receivable Agreements and Additional Paid-In-Capital increased \$47,481, \$40,360 and \$7,122, respectively, on the Company s Unaudited Condensed Consolidated Statement of Financial Condition as of September 30, 2011.

The effective tax rate was 89% and 60% for the three and nine months ended September 30, 2011, respectively, and 49% and 46% for the three and nine months ended September 30, 2010, respectively. The effective tax rate for 2010 also reflected the effect of losses in certain foreign jurisdictions for which no income tax benefits are anticipated.

The Company reported an increase in deferred tax assets of \$4,159 associated with changes in Accumulated Other Comprehensive Income (Loss) for the nine months ended September 30, 2011.

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*The following discussion should be read in conjunction with Evercore Partners Inc.'s unaudited condensed consolidated financial statements and the related notes included elsewhere in this Form 10-Q.*

#### **Forward-Looking Statements**

This report contains or incorporates by reference forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act, which reflect our current views with respect to, among other things, our operations and financial performance. In some cases, you can identify these forward-looking statements by the use of words such as "outlook," "believes," "expects," "potential," "continues," "may," "should," "seeks," "approximately," "predicts," "intends," "plans," "estimates," "anticipates" or the negative version of these and comparable words. Such forward-looking statements are subject to various risks and uncertainties.

Accordingly, there are or will be important factors that could cause actual outcomes or results to differ materially from those indicated in these forward-looking statements. All statements other than statements of historical fact are forward-looking statements and are based on various underlying assumptions and expectations and are subject to known and unknown risks, uncertainties and assumptions, and may include projections of our future financial performance based on our growth strategies and anticipated trends in Evercore's business. We believe these factors include, but are not limited to, those described under "Risk Factors" discussed in the Annual Report on Form 10-K for the year ended December 31, 2010 and subsequent quarterly reports on Form 10-Q. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included or incorporated by reference in this report. We undertake no obligation to publicly update or review any forward-looking statement. We operate in a very competitive and rapidly changing environment. New risks and uncertainties emerge from time to time, and it is not possible for our management to predict all risks and uncertainties, nor can management assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

#### **Key Financial Measures**

##### *Revenue*

Total revenues reflect revenues from our Investment Banking (formerly called Advisory) and Investment Management business segments that include transaction-related client reimbursements plus other revenue. Net revenues reflect total revenues less interest expense related to repurchase agreements, the Senior Notes and other borrowings.

*Investment Banking.* Our Investment Banking business earns fees from our clients for providing advice on mergers, acquisitions, divestitures, leveraged buyouts, restructurings and similar corporate finance matters, and from underwriting and private fund placement activities, as well as commissions from our agency trading activities. The amount and timing of the fees paid vary by the type of engagement. In general, advisory fees are paid at the time we sign an engagement letter, during the course of the engagement or when an engagement is completed. The majority of our investment banking revenue comes from advisory fees that are dependent on the successful completion of a transaction. A transaction can fail to be completed for many reasons, including failure of parties to agree upon final terms with the counterparty, to secure necessary board or shareholder approvals, to secure necessary financing or to achieve necessary regulatory approvals. In the case of bankruptcy engagements, fees are subject to approval of the court. Underwriting revenues are recognized when the offering has been deemed to be completed, placement fees are recognized at the time of the client's acceptance of capital or capital commitments and commissions are recorded on a trade-date basis.

Revenue trends in our advisory business generally are correlated to the volume of M&A activity and/or restructuring activity, which tends to be counter-cyclical to M&A. However, deviations from this trend can occur in any given year or quarter for a number of reasons. For example, changes in our market share or the ability of our clients to close certain large transactions can cause our revenue results to diverge from the level of overall M&A or restructuring activity.

We operate in a highly competitive environment and each revenue-generating engagement is separately awarded and negotiated. Our list of clients, including our list of clients with whom there is a currently active revenue-generating engagement, changes continually. We gain new clients through our business development initiatives, through recruiting additional senior investment banking professionals, and through referrals from executives, directors, attorneys and other parties with whom we have relationships. We may also lose clients as a result of the sale or merger of a client, a change in a client's senior management, competition from other investment banks and other causes.

*Investment Management.* Our Investment Management business includes operations related to the management of the Institutional Asset Management, Wealth Management and Private Equity businesses. Revenue sources primarily include management fees, which include fees earned from portfolio companies, fiduciary and consulting fees, performance fees (including carried interest) and gains (or losses) on our

investments.

---

## **Table of Contents**

Management fees for third party clients generally represent a percentage of assets under management ( AUM ). Fiduciary and consulting fees, which are generally a function of the size and complexity of each engagement, are individually negotiated. Management fees from private equity operations are generally a percentage of committed capital or invested capital at rates agreed with the investment funds we manage or with the individual client. Performance fees from private equity funds are earned when specified benchmarks are exceeded. In certain circumstances, such fees are subject to claw-back provisions. Portfolio company fees include monitoring, director and transaction fees associated with services provided to the portfolio companies of the private equity funds we manage. Gains and losses include both realized and unrealized gains and losses on principal investments, including those arising from our equity interest in investment partnerships.

*Transaction-Related Client Reimbursements.* In both our Investment Banking and Investment Management segments, we make various transaction-related expenditures, such as travel and professional fees, on behalf of our clients. Pursuant to the engagement letters with our advisory clients or the contracts with the limited partners in the private equity funds we manage, these expenditures may be reimbursable. We define these expenses as transaction-related expenses and record such expenditures as incurred and record revenue when it is determined that clients have an obligation to reimburse us for such transaction-related expenses. Client expense reimbursements are recorded as revenue on the Unaudited Condensed Consolidated Statements of Operations on the later of the date an engagement letter is executed or the date we pay or accrue the expense.

*Other Revenue and Interest Expense.* Other Revenue and Interest Expense is derived primarily from investing customer funds in financing transactions. These transactions are principally repurchases and resales of Mexican government and government agency securities. Revenue and expenses associated with these transactions are recognized over the term of the repurchase or resale transaction. Other Revenue includes income earned on marketable securities, cash and cash equivalents and assets segregated for regulatory purposes. Interest Expense includes interest expense associated with the Senior Notes.

### *Operating Expenses*

*Employee Compensation and Benefits Expense.* We include all payments for services rendered by our employees, as well as profits interests in our businesses that have been accounted for as compensation, in employee compensation and benefits expense.

We maintain compensation programs, including base salary, cash, deferred cash and equity bonus awards and benefits programs and manage compensation to estimates of competitive levels based on market conditions. Our level of compensation reflects our plan to maintain competitive compensation levels to retain key personnel, and it reflects the impact of newly-hired senior professionals, including related grants of equity awards which are generally valued at their grant date.

Increasing the number of high-caliber, experienced senior level employees is critical to our growth efforts. In our advisory businesses, these hires generally do not begin to generate significant revenue in the year they are hired.

Our annual compensation program includes stock-based compensation awards and deferred cash awards as a component of the annual bonus awards for certain employees. These awards are generally subject to annual vesting requirements over a four-year period beginning at the date of grant, which generally occurs in the first quarter of each year; accordingly, the expense is amortized over the vesting period.

*Non-Compensation Expenses.* The balance of our operating expenses includes costs for occupancy and equipment rental, professional fees, travel and related expenses, communications and information services, depreciation and amortization, acquisition and transition costs and other operating expenses. We refer to all of these expenses as non-compensation expenses.

### *Other Expenses*

Other Expenses include: a) amortization costs associated with the modification of unvested LP Units and certain other awards, b) charges associated with the vesting of Event-based Awards, c) the amortization of intangible assets associated with certain acquisitions, d) compensation charges associated with deferred consideration, retention awards and related compensation for Lexicon employees, e) a charge related to the exiting of a lease commitment for office space and an introducing fee in connection with the Lexicon acquisition and f) a charge associated with the write-off of intangible assets associated with the Company's planned exit of EAM.

## **Table of Contents**

### *Income from Equity Method Investments*

Our share of the income (loss) from our equity interests in Pan and G5 are included within Income (Loss) from Equity Method Investments, as a component of Income Before Income Taxes, on the Unaudited Condensed Consolidated Statements of Operations.

### *Provision for Income Taxes*

We account for income taxes in accordance with ASC 740, *Accounting for Income Taxes* ( ASC 740 ), which requires the recognition of tax benefits or expenses on temporary differences between the financial reporting and tax basis of our assets and liabilities.

### *Noncontrolling Interest*

We record noncontrolling interest relating to the ownership interests of our current and former Senior Managing Directors, their estate planning vehicles and Trilantic in Evercore LP, as well as the portions of our operating subsidiaries not owned by Evercore. As described in Note 13 to our unaudited condensed consolidated financial statements herein, Evercore Partners Inc. is the sole general partner of Evercore LP and has a majority economic interest in Evercore LP. As a result, Evercore Partners Inc. consolidates Evercore LP and records a noncontrolling interest for the economic interest in Evercore LP held by the limited partners.

We generally allocate net income or loss to noncontrolling interests held at Evercore LP and at the operating entity level, where required, by multiplying the vested equity ownership percentage of the noncontrolling interest holders for the period by the net income or loss of the entity to which the noncontrolling interest relates. In circumstances where the governing documents of the entity to which the noncontrolling interest relates require special allocations of profits or losses to the controlling and noncontrolling interest holders, then the net income or loss of these entities will be allocated based on these special allocations.

## **Results of Operations**

The following is a discussion of our results of operations for the three and nine months ended September 30, 2011 and 2010. For a more detailed discussion of the factors that affected the revenue and operating expenses of our Investment Banking and Investment Management business segments in these periods, see the discussion in *Business Segments* below.

We operate in a very competitive and rapidly changing environment. New risks and uncertainties emerge from time to time, and it is not possible for us to predict all risks and uncertainties, nor can we assess the impact of all potentially applicable factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

*Impairment of Assets*

## Edgar Filing: Evercore Partners Inc. - Form 10-Q

On October 25, 2011, EAM decided to wind down its business. As a result, we have recorded a charge of \$1.0 million in the third quarter of 2011 relating to the write-off of intangible assets associated with EAM which is included within Other Expenses above. In addition, we expect to record a charge of approximately \$1.3 million in the fourth quarter of 2011 primarily representing payments for severance and related expenses and facilities and contract termination costs.

As a result of the above, we performed a Step 1 impairment test for the Goodwill in our Institutional Asset Management reporting unit, which includes EAM. The amount of Goodwill allocated to this reporting unit was \$94.7 million as of September 30, 2011. In this process, we made estimates and assumptions to determine the fair value of this reporting unit and to project future earnings using valuation techniques. We used our best judgment and the information available to us at the time to perform this review. Because our assumptions and estimates are used in projecting future earnings as part of the valuation, actual results could differ. Certain circumstances such as continued decreases in AUM resulting from either net outflows or market declines may have a negative impact on the future earnings of this reporting unit and could have a negative effect on its fair value.

**Table of Contents**

In determining the fair value of this reporting unit, we utilized both a market multiple approach and a discounted cash flow methodology based on the adjusted cash flows from operations. The market multiple approach included applying the average earnings multiples of comparable public companies multiplied by the forecasted earnings of the respective reporting unit to yield an estimate of fair value. The discounted cash flow methodology began with the adjusted cash flows from the reporting unit and used a discount rate that reflected the weighted average cost of capital adjusted for the risks inherent in the future cash flows. As of September 30, 2011, we concluded that the fair value of our Institutional Asset Management reporting unit exceeded its carrying value by approximately 15%.

***Three Months Ended September 30, 2011 versus September 30, 2010***

Net revenues were \$163.9 million for the three months ended September 30, 2011; an increase of \$40.2 million, or 33%, versus net revenues of \$123.7 million for the three months ended September 30, 2010. Investment Banking Revenue and Investment Management Revenue increased 38% and 8%, respectively, compared to the three months ended September 30, 2010. See the segment discussion below for further information. Other revenue for the three months ended September 30, 2011 was lower than for the three months ended September 30, 2010 as a result of relatively lower gains on our Marketable Securities portfolios for the three months ended September 30, 2011, compared to the three months ended September 30, 2010. Net revenues include interest expense on our Senior Notes.

Total Operating Expenses were \$133.4 million for the three months ended September 30, 2011 as compared to \$100.5 million for the three months ended September 30, 2010, a 33% increase. Employee Compensation and Benefits Expense, as a component of Operating Expenses, was \$102.0 million for the three months ended September 30, 2011, an increase of \$24.6 million, or 32%, versus expense of \$77.3 million for the three months ended September 30, 2010. The increase was primarily due to an increase in revenues and compensation costs resulting from the expansion of our new and existing businesses, as well as additional costs from our recent acquisition of Lexicon, which closed on August 19, 2011. Non-compensation expenses as a component of Operating Expenses were \$31.5 million for the three months ended September 30, 2011, an increase of \$8.3 million, or 36% over non-compensation operating expenses of \$23.2 million for the three months ended September 30, 2010. Non-compensation operating expenses increased compared to the three months ended September 30, 2010 primarily as a result of the expansion of our new and existing businesses, as well as additional costs from our recent acquisition of Lexicon.

Total Other Expenses of \$18.8 million for the three months ended September 30, 2011 related to compensation costs associated with unvested LP Units and certain other awards of \$5.3 million, acquisition related compensation charges of \$7.7 million, Special Charges of \$3.6 million and amortization of intangibles of \$2.1 million. Total Other Expenses of \$5.5 million for the three months ended September 30, 2010 related to costs associated with unvested LP Units and certain other awards of \$4.9 million and amortization of intangibles of \$0.6 million.

Employee Compensation and Benefits Expense as a percentage of Net Revenues was 70% for the three months ended September 30, 2011 and 66% for the three months ended September 30, 2010. Employee Compensation and Benefits Expense was impacted by costs associated with our recent acquisition of Lexicon.

The provision for income taxes for the three months ended September 30, 2011 was \$10.6 million, which reflected an effective tax rate of 89%. The provision was impacted by the vesting of LP Units and certain other awards, which are not deductible for income tax purposes, as well as the noncontrolling interest associated with LP Units. The provision for income taxes for the three months ended September 30, 2010 was \$8.5 million, which reflected an effective tax rate of 49%. This provision was impacted by the non-deductible compensation expense associated with the vesting of LP Units and certain other awards, as well as losses in certain foreign jurisdictions for which no income tax benefits are anticipated.

Income (loss) from equity method investments was \$0.2 million for the three months ended September 30, 2011, as compared to (\$0.1) million for the three months ended September 30, 2010. The increase was primarily due to our investment in G5, which the Company made in the fourth quarter of 2010.

Noncontrolling interest was (\$0.5) million for the three months ended September 30, 2011 compared to \$5.5 million for the three months ended September 30, 2010, reflecting an allocation of an operating loss in the current quarter as opposed to operating income in the prior period.

***Nine Months Ended September 30, 2011 versus September 30, 2010***

Net revenues were \$413.8 million for the nine months ended September 30, 2011; an increase of \$137.1 million, or 50%, versus net revenues of \$276.7 million for the nine months ended September 30, 2010. Investment Banking Revenue and Investment Management Revenue increased 50% and 57%, respectively, compared to the nine months ended September 30, 2010. See the segment discussion below for further information. Other revenue for the nine months ended September 30, 2011 was lower than for the nine months ended September 30, 2010 as a result of relatively lower gains on our Marketable Securities portfolios for the nine months ended September 30, 2011, compared to the nine months

ended September 30, 2010. Net revenues include interest expense on our Senior Notes.

**Table of Contents**

Total Operating Expenses were \$335.7 million for the nine months ended September 30, 2011 as compared to \$233.9 million for the nine months ended September 30, 2010, a 44% increase. Employee Compensation and Benefits Expense, as a component of Operating Expenses, was \$249.0 million for the nine months ended September 30, 2011, an increase of \$80.9 million, or 48%, versus expense of \$168.1 million for the nine months ended September 30, 2010. The increase was primarily due to increased revenue and compensation costs resulting from the expansion of our new and existing businesses, some of which were not in operation during the entire prior year period, as well as additional costs from our recent acquisition of Lexicon. Non-compensation expenses as a component of Operating Expenses were \$86.8 million for the nine months ended September 30, 2011, an increase of \$20.9 million, or 32% over non-compensation operating expenses of \$65.8 million for the nine months ended September 30, 2010. Non-compensation operating expenses increased compared to the nine months ended September 30, 2010 primarily as a result of the expansion of our new and existing businesses, as well as additional costs from our recent acquisition of Lexicon.

Total Other Expenses of \$44.0 million for the three months ended September 30, 2011 related to compensation costs associated with unvested LP Units and certain other awards of \$17.9 million, charges associated with the vesting of Event-based Awards of \$11.4 million, acquisition related compensation charges of \$7.7 million, Special Charges of \$3.6 million and amortization of intangibles of \$3.3 million. Total Other Expenses of \$17.4 million for the three months ended September 30, 2010 related to costs associated with unvested LP Units and certain other awards of \$15.7 million and amortization of intangibles of \$1.7 million.

Employee Compensation and Benefits Expense as a percentage of Net Revenues was 69% for the nine months ended September 30, 2011, compared to 66% for the nine months ended September 30, 2010. The increase was primarily attributable to increased compensation expense associated with the amortization of unvested LP Units and certain other awards and the effect of new businesses, offset by higher revenues, as well as additional costs from our recent acquisition of Lexicon. Employee Compensation and Benefits Expense was also impacted by the vesting of Event-based Awards, which occurred in conjunction with our offering during the second quarter of 2011.

The provision for income taxes for the nine months ended September 30, 2011 was \$20.9 million, which reflected an effective tax rate of 60%. The provision was impacted by the vesting of LP Units and certain other awards, which are not deductible for income tax purposes, as well as the noncontrolling interest associated with LP Units. The provision for income taxes for the nine months ended September 30, 2010 was \$11.5 million, which reflected an effective tax rate of 46%. This provision was impacted by the non-deductible compensation expense associated with the vesting of LP Units and certain other awards, as well as losses in certain foreign jurisdictions for which no income tax benefits are anticipated.

Income (loss) from equity method investments was \$0.7 million for the nine months ended September 30, 2011, as compared to (\$0.4) million for the nine months ended September 30, 2010. The increase was primarily due to our investment in G5, which the Company made in the fourth quarter of 2010.

Noncontrolling interest was \$6.3 million for the nine months ended September 30, 2011 compared to \$7.8 million for the nine months ended September 30, 2010.

Our Wealth Management business includes the results of EWM and our acquisition of Morse Williams during the second quarter of 2010. Our Institutional Asset Management business includes the results of Atalanta Sosnoff, which was acquired during the second quarter of 2010. ## Edgar Filing: Evercore Partners Inc. - Form 10-Q

Our U.S. private equity funds, with the exception of Evercore Capital Partners L.P. and its affiliated entities ( ECP I ), earn management fees of 1% of invested capital. Starting January 1, 2010, pursuant to an amendment to the ECP I Partnership Agreement, no management fees were earned. Our Mexican private equity fund, EMCP II, earns management fees of 2.25% on committed capital during its investment period and 2.25% on net funded committed capital thereafter.

In addition, the general partner of the private equity funds earns carried interest of 20% based on the fund's performance, provided it exceeds preferred return hurdles to its limited partners. We own 8%-9% of the carried interest earned by the general partner of ECP II and 100% of Carried Interest in EMCP II. A significant portion of any gains recognized related to ECP II are distributed to certain of our U.S. private equity professionals.

In the event the fund performs poorly we may be obligated to repay certain carried interest previously distributed. As of September 30, 2011, we had \$2.7 million of previously received carried interest that may be subject to repayment.

### *Assets Under Management*

AUM for our Investment Management business of \$13.6 billion at September 30, 2011, decreased from \$17.4 billion at December 31, 2010. The amounts of AUM presented in the table below reflect the assets for which we charge a management fee. These assets reflect the fair value of assets managed on behalf of Institutional Asset Management and Wealth Management clients, and the amount

of either invested or committed capital to the Private Equity funds. As defined in ASC 820, valuations performed for Level I investments are based on quoted prices obtained from active markets generated by third parties and Level II investments are valued through the use of models based on either direct or indirect observable inputs in the use of models or other valuation methodologies performed by third parties to determine fair value. For both the Level I and Level II investments, we obtain both active quotes from nationally recognized exchanges and third-party pricing services to determine market or fair value quotes, respectively. Wealth Management maintained 51% and 48% of Level I investments and 49% and 52% of Level II investments as of September 30, 2011 and December 31, 2010, respectively, and Institutional Asset Management maintained 93% and 95% of Level I investments and 7% and 5% of Level II investments as of September 30, 2011 and December 31, 2010, respectively. As noted above, Private Equity AUM is not presented at fair market value, but reported at either invested or committed capital in line with fee arrangements; notwithstanding, these assets represent primarily Level III investments. The following table summarizes AUM activity for the nine months ended September 30, 2011:

Other Expenses of \$1.8 million for the three months ended September 30, 2011 included \$0.7 million related to compensation costs associated with unvested LP Units and certain other awards, \$1.0 million of Special Charges and \$0.1 million of intangible asset amortization. **Table of Contents****Nine Months Ended September 30, 2011 versus September 30, 2010**

Net Investment Management Revenues were \$78.3 million for the nine months ended September 30, 2011, compared to \$51.4 million for the nine months ended September 30, 2010. Fee-based revenues earned from the management of client portfolios and other investment advisory services increased 50% from the nine months ended September 30, 2010 primarily as a result of the full period's impact of the acquisition of new businesses in 2010 within Institutional Asset Management and Wealth Management. Fee-based revenues included \$0.2 million of revenues from performance fees during the nine months ended September 30, 2011 compared to \$0.2 million for the nine months ended September 30, 2010. Realized and Unrealized Gains increased from the prior year primarily resulting from gains in our private equity funds, which were principally driven by carried interest from Trilantic.

Operating Expenses were \$72.7 million for the nine months ended September 30, 2011, as compared to \$57.2 million for the nine months ended September 30, 2010, an increase of \$15.5 million, or 27%. Employee Compensation and Benefits Expense, as a component of Operating Expenses, was \$48.2 million for the nine months ended September 30, 2011, as compared to \$37.3 million for the nine months ended September 30, 2010, an increase of \$11.0 million, or 29%. The increase in Operating Expenses was primarily a result of the acquisition and expansion of new businesses added during the second quarter of 2010.

Other Expenses of \$6.1 million for the three months ended September 30, 2011 included \$2.3 million related to compensation costs associated with unvested LP Units and certain other awards, \$2.5 million of charges related to the vesting of Event-based Awards, \$1.0 million of Special Charges and \$0.3 million of intangible asset amortization. **Cash Flows**

Our operating cash flows are primarily influenced by the timing and receipt of investment banking and investment management fees, and the payment of operating expenses, including bonuses to our employees and interest expense on our Senior Notes. Investment Banking advisory fees are generally collected within 90 days of billing. Management fees from our private equity investment management activities are generally billed in advance but collected at the end of a half year period from billing. Fees from our wealth management and institutional asset management businesses are generally billed and collected within 90 days. We traditionally pay a substantial portion of incentive compensation to personnel in the Investment Banking business and to executive officers during the first three months of each calendar year with respect to the prior year's results. Our investing and financing cash flows are primarily influenced by activities to deploy capital to fund investments and acquisitions, raise capital through the issuance of stock or debt, repurchase of outstanding Class A shares, payment of dividends and other periodic distributions to our stakeholders. We generally make dividend payments and other distributions on a quarterly basis. A summary of our operating, investing and financing cash flows is as follows:

## Liquidity and Capital Resources

### General

Our current assets include Cash and Cash Equivalents, Marketable Securities and Accounts Receivable in relation to Investment Banking and Investment Management revenues. Our current liabilities include accrued expenses and accrued employee compensation. We traditionally have made payments for employee bonuses and year-end distributions to partners in the first quarter of the year with respect to the prior year's results. Cash distributions related to partnership tax allocations are made to the partners of Evercore LP in accordance with our corporate estimated payment calendar; these payments are made prior to the end of each calendar quarter. In addition, dividends on Class A Shares are paid when and if declared by the Board of Directors, which is generally quarterly.

We regularly monitor our liquidity position, including cash, other significant working capital, current assets and liabilities, long-term liabilities, lease commitments, principal investment commitments related to our Investment Management business, dividends on Class A Shares, partnership distributions and other matters relating to liquidity and compliance with regulatory requirements. Our liquidity is highly dependent on our revenue stream from our operations, principally from our Investment Banking business, which is a function of closing transactions and earning success fees, the timing and realization of which is irregular and dependent upon factors that are not subject to our control. Our revenue stream funds the payment of our expenses, including annual bonus payments, a portion of which are guaranteed, interest expense on our Senior Notes and income taxes. Payments made for income taxes may be reduced by deductions taken for the increase in tax basis of our investment in Evercore LP. These tax deductions, when realized, require payment under our long-term liability, Amounts Due Pursuant to Tax Receivable Agreements. We intend to fund these payments from cash and cash equivalents on hand, principally derived from cash flows from operations. These tax deductions, when realized, will result in cash otherwise required to satisfy tax obligations becoming available for other purposes. Our Management Committee meets regularly to monitor our liquidity and cash positions against our short and long-term obligations, as well as our capital commitments. The result of this review contributes to management's recommendation to the Board of Directors as to the level of quarterly dividend payments, if any.

As a financial services firm, our businesses are materially affected by conditions in the global financial markets and economic conditions throughout the world. Revenue generated by our advisory activities is directly related to the number and value of the transactions in which we are involved. During periods of unfavorable market or economic conditions, the number and value of M&A transactions generally decrease, and they increase during periods of favorable market or economic conditions. Restructuring activity generally is counter-cyclical to M&A activity. In addition, during periods of unfavorable market conditions our Investment Management business may be impacted by reduced equity valuations and generate relatively lower revenue because fees we receive typically are in part based on the market value of underlying publicly-traded securities. Our profitability may also be adversely affected by our fixed costs and the possibility that we would be unable to scale back other costs within a time frame sufficient to match any decreases in revenue relating to changes in market and economic conditions. Reduced equity valuations resulting from future adverse economic events and/or market conditions may impact our performance, which could result in future impairment charges related to our goodwill and/or intangibles assets. The global financial markets have experienced significant disruption and volatility beginning in the third quarter of 2011 and it is possible that difficult market conditions may persist throughout the rest of the year, and into 2012. These economic and market conditions have negatively affected our financial performance in our Investment Management businesses, resulting in significant decreases in AUM, which may continue to adversely affect our financial performance into 2012. Furthermore, if these adverse economic and market conditions persist, they may also have a negative impact on our Investment Banking business. For a further discussion of risks related to our business, refer to Risk Factors in our Form 10-K for the year ended December 31, 2010.

In October 2010, our Board of Directors authorized the repurchase of up to 2 million Class A Shares and/or LP Units for up to \$85.0 million. Under this share repurchase program, shares may be repurchased from time to time in open market transactions, in privately-negotiated transactions or otherwise. The timing and the actual amount of shares repurchased will depend on a variety of factors, including legal requirements, price and economic and market conditions. This program may be suspended or discontinued at any time and does not have a

specified expiration date.

In addition, periodically, we buy shares into treasury from our employees in order to fund the minimum tax requirements for share deliveries under our share equity plan. During the nine months ended September 30, 2011, we repurchased 1,221,248 shares for \$35.1 million primarily related to funding the minimum tax withholding requirements of share deliveries.

On August 21, 2008, we entered into a Purchase Agreement with Mizuho pursuant to which Mizuho purchased from us \$120.0 million principal amount of Senior Notes and the Warrants to purchase 5,454,545 Class A Shares at \$22.00 per share expiring in 2020. The holder of the Senior Notes may require us to purchase, for cash, all or any portion of the holder's Senior Notes upon a change of control of the Company for a price equal to the Accreted Amount, plus accrued and unpaid interest. Senior Notes held by Mizuho will be redeemable at the Accreted Amount at our option at any time within 90 days following the date on which Mizuho notifies us that it is terminating their Strategic Alliance Agreement. Senior Notes held by any holder other than Mizuho will be redeemable at the Accreted Amount (plus accrued and unpaid interest) at our option at any time. In the event of a default under the indenture, the trustee or holders of 33 1/3% of the Senior Notes may declare that the Accreted Amount is immediately due and payable.

Pursuant to the agreement, Mizuho may not transfer the Senior Notes or Warrants until either (a) after August 16, 2012 or (b) if the Strategic Alliance Agreement is terminated one year following such termination. We have a right of first offer on any proposed transfer by Mizuho of the Warrants, Common Stock purchased by Mizuho in the open market or acquired by Mizuho upon exercise of the Warrants and associated Common Stock issued as dividends.

The exercise price for the Warrants is payable, at the option of the holder of the Warrants, either in cash or by tender of Senior Notes at the Accreted Amount, at any point in time.

Pursuant to the agreement with Mizuho, Evercore is subject to certain nonfinancial covenants. As of September 30, 2011, we were in compliance with all of these covenants.

During the second quarter of 2011, we had an offering of 5,364,991 Class A Shares. A portion of the proceeds were used to purchase from certain holders, including members of the Company's senior management, a number of outstanding LP Units. See Note 12 to our unaudited condensed consolidated financial statements.

This offering resulted in an increase to Common Stock and Additional Paid-In-Capital of \$0.1 million and \$167.9 million, respectively, on the Unaudited Condensed Consolidated Statement of Financial Condition as of September 30, 2011. The purchase of outstanding LP Units resulted in a decrease to Additional Paid-In-Capital of \$84.2 million on the Unaudited Condensed Consolidated Statement of Financial Condition as of September 30, 2011. See Note 13 to our unaudited condensed consolidated financial statements for the impact of this transaction on Noncontrolling Interest. Additionally, the above transaction resulted in an increase in the tax basis of the tangible and intangible assets of Evercore LP, which triggered an additional liability under the tax receivable agreement that was entered into in 2006 between the Company and the LP Unit holders. The agreement provides for a payment to the LP Unit holders of 85% of the cash tax savings (if any), resulting from the increased tax benefits from the exchange and for the Company to retain 15% of such benefits. Accordingly, Deferred Tax Assets Non-Current, Amounts Due Pursuant to Tax Receivable Agreements and Additional Paid-In-Capital increased \$47.5 million, \$40.4 million and \$7.1 million, respectively, on the Unaudited Condensed Consolidated Statement of Financial Condition as of September 30, 2011. For a complete discussion of the Company's Tax Receivable Agreement, refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2010. See Contractual Obligations for future payments related to the Tax Receivable Agreement.

Upon completion of the offering, Messrs. Altman, Beutner and Aspe (and trusts benefiting their families and permitted transferees) beneficially owned less than 50% of the aggregate LP Units owned by them at the time of our IPO. Accordingly, the IPO related Event-based Awards vested upon completion of the offering.

We have made certain capital commitments, with respect to our investment activities, as well as commitments related to redeemable noncontrolling interest and contingent consideration from our acquisitions, which are included in the Contractual Obligations section below.

PCB maintains a line of credit with BBVA Bancomer to fund its trading activities on an intra-day and overnight basis. The intra-day facility is approximately \$7.4 million and secured with trading securities. No interest is charged on the intra-day facility. The overnight facility is charged the Inter-Bank Balance Interest Rate plus 10 basis points and is secured with trading securities. There have been no significant draw downs on PCB's line of credit since August 10, 2006. The line of credit is renewable annually.

Pursuant to deferred compensation arrangements, we are obligated to make cash payments in future periods. For further information see Note 15 to our unaudited condensed consolidated financial statements.

**Table of Contents***Collateralized Financing Activity at PCB*

PCB enters into repurchase agreements with clients seeking overnight money market returns whereby PCB transfers to the clients Mexican government securities in exchange for cash and concurrently agrees to repurchase the securities at a future date for an amount equal to the cash exchanged plus a stipulated premium or interest factor. PCB deploys the cash received from, and acquires the securities deliverable to, clients under these repurchase arrangements by purchasing securities in the open market or by entering into reverse repurchase agreements with unrelated third parties. We account for these repurchase and reverse repurchase agreements as collateralized financing transactions. We record a liability on our Unaudited Condensed Consolidated Statements of Financial Condition in relation to repurchase transactions executed with clients as Securities Sold Under Agreements to Repurchase. We record as assets on our Unaudited Condensed Consolidated Statements of Financial Condition, Financial Instruments Owned and Pledged as Collateral at Fair Value (where we have acquired the securities deliverable to clients under these repurchase arrangements by purchasing securities in the open market) and Securities Purchased Under Agreements to Resell (where we have acquired the securities deliverable to clients under these repurchase agreements by entering into reverse repurchase agreements with unrelated third parties). These Mexican government securities included in Financial Instruments Owned and Pledged as Collateral at Fair Value on the Unaudited Condensed Consolidated Statements of Financial Condition have an estimated average time to maturity of approximately 2.5 years, as of September 30, 2011, and are pledged as collateral against repurchase agreements, which are collateralized financing agreements. Generally, collateral is posted equal to the contract value at inception and is subject to market changes. These repurchase agreements are primarily with institutional customer accounts managed by PCB, generally mature within one business day and permit the counterparty to pledge the securities. Increases and decreases in asset and liability levels related to these transactions are a function of growth in PCB's AUM, as well as clients' investment allocations requiring positioning in repurchase transactions.

PCB has procedures in place to monitor the daily risk limits for positions taken, as well as the credit risk based on the collateral pledged under these agreements against their contract value from inception to maturity date. The daily risk measure is Value at Risk, which is a statistical measure, at a 98% confidence level, of the potential losses from adverse market movements in an ordinary market environment based on a historical simulation using the prior year's historical data. PCB's Risk Management Committee meets monthly to analyze the overall market risk exposure based on positions taken, as well as the credit risk, based on the collateral pledged under these agreements against the contract value from inception to maturity date.

We periodically assess the collectability or credit quality related to securities purchased under agreements to resell; as of September 30, 2011, the Company believes it maintains a sufficient level of cash or collateral.

As of September 30, 2011 and December 31, 2010, a summary of PCB's assets, liabilities, collateral received or pledged and risk measures related to its collateralized financing activities is as follows:

### **Contractual Obligations**

For a complete discussion of our contractual obligations, refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2010.

As of September 30, 2011, we were unable to make reasonably reliable estimates of the period of cash settlement with the respective taxing authority, hence, per ASC 740, unrecognized tax benefits have been excluded from this disclosure.

## **Table of Contents**

During the third quarter of 2011, we agreed to lease 39,261 square feet of office space at 15 Stanhope Gate, London, England, expiring in March 2022 with annual base rental payments of approximately \$2.2 million.

As a result of the offering of common stock which occurred during the second quarter of 2011, the Amounts Due Pursuant to Tax Receivable Agreements increased to \$142.5 million. As of September 30, 2011, we estimated the contractual obligations related to the Tax Receivable Agreements to be \$146.5 million. We expect to pay to the counterparties to the Tax Receivable Agreement \$4.0 million within one year or less, \$20.5 million in one to three years, \$23.5 million in three to five years and \$98.5 million after five years.

On August 19, 2011, we consummated our acquisition of Lexicon. See Note 4 to our unaudited condensed consolidated financial statements for information related to our commitment in this transaction.

We had total commitments (not reflected on our Unaudited Condensed Consolidated Statements of Financial Condition) relating to future principal investments of \$6.9 million and \$8.1 million as of September 30, 2011 and December 31, 2010, respectively. We expect to fund these commitments with cash flows from operations. We may be required to fund these commitments at any time through December 2017, depending on the timing and level of investments by our private equity funds.

We also have commitments related to our redeemable noncontrolling interests. See Note 13 of our unaudited condensed consolidated financial statements for further information.

## **Off-Balance Sheet Arrangements**

We do not invest in any off-balance sheet vehicles that provide liquidity, capital resources, market or credit risk support, or engage in any leasing activities that expose us to any liability that is not reflected in our unaudited condensed consolidated financial statements.

## **Market Risk and Credit Risk**

We, in general, are not a capital-intensive organization and as such, are not subject to significant market or credit risks. Nevertheless, we have established procedures to assess both the market and credit risk, as well as specific investment risk, exchange rate risk and credit risk related to receivables.

### *Market and Investment Risk*

#### **Institutional Asset Management**

We invest in funds managed by EAM, EWM and G5. These funds principally hold readily-marketable investment securities. As of September 30, 2011, the fair value of our investments with these products, based on closing prices, was \$15.0 million.

We estimate that a hypothetical 10% adverse change in the market value of the investments would have resulted in a decrease in pre-tax income of approximately \$1.5 million for the three months ended September 30, 2011.

See **Liquidity and Capital Resources** above for a discussion of collateralized financing transactions at PCB.

#### **Private Equity Funds**

Through our principal investments in our private equity funds and our ability to earn carried interest from these funds, we face exposure to changes in the estimated fair value of the companies in which these funds invest. Our professionals devote considerable time and resources to work closely with the portfolio company's management to assist in designing a business strategy, allocating capital and other resources and evaluating expansion or acquisition opportunities. On a quarterly basis, we perform a comprehensive analysis and valuation of all of the portfolio companies. Our analysis includes reviewing the current market conditions and valuations of each portfolio company. Valuations and analysis regarding our investments in CSI Capital and Trilantic are performed by their respective professionals.

We estimate that a hypothetical 10% adverse change in the value of the private equity funds would have resulted in a decrease in pre-tax income of approximately \$5.6 million for the three months ended September 30, 2011.

### *Exchange Rate Risk*

## Edgar Filing: Evercore Partners Inc. - Form 10-Q

We have foreign operations, through our subsidiaries and affiliates, in Mexico, the United Kingdom, Brazil and Hong Kong which creates foreign exchange rate risk. Their respective functional currencies are the Mexican peso, British pound sterling, Brazilian real and Hong Kong dollar. We have not entered into any transactions to hedge our exposure to these foreign exchange fluctuations through

## **Table of Contents**

the use of derivative instruments or otherwise. An appreciation or depreciation of any of these currencies relative to the U.S. dollar would result in an adverse or beneficial impact to our financial results. A significant portion of our Latin American revenues have been, and will continue to be, derived from contracts denominated in Mexican pesos and Evercore Europe's revenue and expenses are denominated primarily in British pounds sterling and euro. Historically, the value of these foreign currencies has fluctuated relative to the U.S. dollar. For the nine months ended September 30, 2011, the net impact of the fluctuation of foreign currencies recorded in Other Comprehensive Income and Noncontrolling Interest within the Unaudited Condensed Consolidated Statement of Equity was (\$6.6) million. It is currently not our intention to hedge our foreign currency exposure, and we will reevaluate this policy from time to time.

### *Credit Risks*

We maintain cash and cash equivalents with financial institutions with high credit ratings. At times, we may maintain deposits in federally insured financial institutions in excess of federally insured ( FDIC ) limits. However, we believe that we are not exposed to significant credit risk due to the financial position of the depository institution in which those deposits are held.

Accounts Receivable consists primarily of advisory fees and expense reimbursements billed to our clients. Receivables are reported net of any allowance for doubtful accounts. We maintain an allowance for bad debts to provide coverage for probable losses from our customer receivables and derive the estimate through specific identification for the allowance for doubtful accounts and an assessment of the client's creditworthiness. As of September 30, 2011 and December 31, 2010, total receivables amounted to \$66.2 million and \$49.6 million, respectively, net of an allowance. The Investment Banking and Investment Management receivables collection periods generally are within 90 days of invoice. The collection period for restructuring transactions and private equity fee receivables may exceed 90 days. We recorded minimal bad debt expense for each of the nine months ended September 30, 2011 and 2010.

With respect to our Marketable Securities portfolio, which is comprised primarily of highly rated corporate and municipal bonds, mutual funds and Seed Capital Investments, we manage our credit risk exposure by limiting concentration risk and maintaining investment grade credit quality. As of September 30, 2011, we had Marketable Securities of \$62.8 million, of which 63% were corporate and municipal bonds and other debt securities primarily with S&P ratings ranging from AAA to BB+ and 37% were Seed Capital Investments and mutual funds.

### **Critical Accounting Policies and Estimates**

The unaudited condensed consolidated financial statements included in this report are prepared in conformity with U.S. GAAP, which requires management to make estimates and assumptions regarding future events that affect the amounts reported in our unaudited condensed consolidated financial statements and their notes, including reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. We base these estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Actual results could differ materially from those estimates. For a complete discussion of our critical accounting policies and estimates, refer to our Annual Report on Form 10-K for the year ended December 31, 2010.

### *Recently Issued Accounting Standards*

*ASU 2011-03* In April 2011, the Financial Accounting Standards Board ( FASB ) issued Accounting Standards Update ( ASU ) No. 2011-03, *Reconsideration of Effective Control for Repurchase Agreements* ( ASU 2011-03 ). ASU 2011-03 provides amendments to Accounting Standards Codification ( ASC ) No. 860 *Transfers and Servicing*, which remove from the assessment of effective control (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation guidance related to that criterion. The amendments in this update are effective prospectively for transactions or modifications of existing transactions that occur on or after the beginning of the first interim or annual reporting period beginning on or after December 15, 2011, with early adoption not permitted. The Company is currently assessing the impact of the adoption of this update on the Company's financial condition, results of operations and cash flows.

*ASU 2011-04* In May 2011, the FASB issued ASU No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS* ( ASU 2011-04 ). ASU 2011-04 provides amendments to ASC No. 820 *Fair Value Measurement*, which results in a consistent definition of fair value and common requirements for measurement of and disclosure of fair value between U.S. GAAP and IFRS. Some of the amendments clarify the Board's intent about the application of existing fair value measurement requirements, while others change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The amendments in this update are effective prospectively during interim and annual periods beginning after December 15, 2011, with early adoption not permitted. The Company is currently assessing the impact of the adoption of this update on the Company's financial condition, results of operations and cash flows.

**Table of Contents**

*ASU 2011-05* In June 2011, the FASB issued ASU No. 2011-05, *Presentation of Comprehensive Income* ( ASU 2011-05 ). ASU 2011-05 provides amendments to ASC No. 220 *Comprehensive Income*, which require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The amendments in this update are effective retrospectively for fiscal years and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. The FASB recently decided that the specific requirement to present items that are reclassified from other comprehensive income to net income alongside their respective components of net income and other comprehensive income will be deferred. The Company is currently assessing the impact of the adoption of this update on the Company's financial condition, results of operations and cash flows.

*ASU 2011-08* In September 2011, the FASB issued ASU No. 2011-08, *Testing Goodwill for Impairment* ( ASU 2011-08 ). ASU 2011-08 provides amendments to ASC No. 350 *Intangibles - Goodwill and Other*, which are intended to reduce complexity and costs by allowing an entity the option to make a qualitative evaluation about the likelihood of goodwill impairment to determine whether it should calculate the fair value of a reporting unit. The amendments also improve previous guidance by expanding upon the examples of events and circumstances that an entity should consider between annual impairment tests in determining whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Also, the amendments improve the examples of events and circumstances that an entity having a reporting unit with a zero or negative carrying amount should consider in determining whether to measure an impairment loss, if any, under the second step of the goodwill impairment test. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, with early adoption permitted.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk  
Risk Management**

See Management's Discussion and Analysis of Financial Condition and Results of Operations - Market Risk and Credit Risk. We do not believe we face any material interest rate risk, foreign currency exchange risk, equity price risk or other market risk except as disclosed in Item 2 Market Risk and Credit Risk above.

**Item 4. Controls and Procedures  
Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures**

Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15 under the Exchange Act as of the end of the period covered by this report. Based upon that evaluation and subject to the foregoing, our chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) were effective to accomplish their objectives at the reasonable assurance level.

**Changes in Internal Controls over Financial Reporting**

On August 19, 2011, the Company acquired all of the outstanding partnership interests of Lexicon. We performed an assessment of Evercore Europe's internal control environment over financial reporting following the acquisition of Lexicon and have begun conducting control reviews pursuant to the Sarbanes-Oxley Act of 2002. For further information see Note 4 to our unaudited condensed consolidated financial statements. Excluding the effects of the purchased interest in Lexicon, there have been no changes in our internal controls over financial reporting during the quarter ended September 30, 2011 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act).

**Table of Contents****PART II. OTHER INFORMATION****Item 1. Legal Proceedings***General*

In the normal course of business, from time to time the Company and its affiliates may be involved in judicial proceedings or arbitration concerning matters arising in connection with the conduct of its businesses, and, in the past, the Company and its affiliates have been involved in civil litigation matters. In addition, Mexican, United Kingdom, Hong Kong and United States government agencies and self-regulatory organizations, as well as state securities commissions in the United States, conduct periodic examinations and initiate administrative proceedings regarding the Company's business, including, among other matters, accounting and operational matters, that can result in censure, fine, the issuance of cease-and-desist orders or the suspension or expulsion of a broker-dealer, investment advisor, or its directors, officers or employees. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases where claimants seek substantial or indeterminate damages or where investigations and proceedings are in the early stages, the Company cannot predict the loss or range of loss, if any, related to such matters, how or if such matters will be resolved, when they will ultimately be resolved, or what the eventual settlement, fine, penalty or other relief, if any, might be. Subject to the foregoing, the Company believes, based on current knowledge and after consultation with counsel, that it is not currently party to any material pending legal proceedings, individually or in the aggregate, the resolution of which would have a material effect on the Company. Legal reserves are established in accordance with ASC 450, *Accounting for Contingencies* when warranted. Once established, reserves are adjusted when there is more information available or when an event occurs requiring a change.
