This
presentation
contains
certain
statements
that

describe
ITC
Holdings
Corp.
(ITC)
management's
beliefs
concerning
future
business conditions and prospects, growth opportunities and the outlook for ITC's business, including ITC's business and the
electric
transmission
industry
based
upon
information
currently
available.
Such
statements
are
forward-looking
statements
within
the meaning of the Private Securities Litigation Reform Act of 1995. Wherever possible, ITC has identified these forward-look
statements
by
words
such
as
anticipates ,
believes ,
intends ,
estimates ,
expects ,
projects
and
similar
phrases.
These
forward-looking statements are based upon assumptions ITC management believes are reasonable. Such forward-looking
statements are subject to risks and uncertainties which could cause ITC's actual results, performance and achievements to differ
materially from those expressed in, or implied by, these statements, including, among other things, (a) the risks and uncertainties
disclosed in ITC's annual report on Form 10-K and ITC's quarterly reports on Form 10-Q filed with the Securities and Exchange
Commission
(the
SEC)
from
time
to

time
and
(b)
the
following
transactional
factors
(in
addition
to
others
described
elsewhere
in
this
document
and
in
subsequent
filings
with
the
SEC):

(i)
risks
inherent
in
the
contemplated
transaction,
including:

(A)
failure
to

obtain approval by the Company's shareholders; (B) failure to obtain regulatory approvals necessary to consummate the transaction or to obtain regulatory approvals on favorable terms; (C) the ability to obtain the required financings; (D) delays in consummating the transaction or the failure to consummate the transactions; and (E) exceeding the expected costs of the transactions;

(ii)
legislative
and
regulatory
actions,

and
(iii)
conditions
of
the
capital
markets

during
the
periods
covered
by
the
forward-looking statements.

Because ITC's forward-looking statements are based on estimates and assumptions that are subject to significant business, economic and competitive uncertainties,

many
of
which
are
beyond
ITC's
control
or
are
subject
to
change,
actual
results
could
be

materially different and any or all of ITC's forward-looking statements may turn out to be wrong. They speak only as of the date made and can be affected by assumptions ITC might make or by known or unknown risks and uncertainties. Many factors mentioned in this document and the exhibits hereto and in ITC's annual and quarterly reports will be important in determining future results. Consequently, ITC cannot assure you that ITC's expectations or forecasts expressed in such forward-looking statements will be achieved. Actual future results may vary materially. Except as required by law, ITC undertakes no obligation to publicly update any of ITC's forward-looking or other statements, whether as a result of new information, future events, or otherwise.

The transaction is subject to certain conditions precedent, including regulatory approvals, approval of ITC's shareholders and availability of financing.

ITC
cannot
provide
any
assurance
that
the
proposed
transactions
related
thereto

will
be
completed,
nor
can it give assurances as to the terms on which such transactions will be consummated.

Entergy retail regulatory approvals

Federal Energy Regulatory Commission approvals

ITC shareholder approval

Certain other regulatory approvals

Operational Excellence

9

Operational excellence and safety are integral to ITC's culture and day-to-day operational performance.

ITC's goal: Best-in-class system operations and performance, including system security and safety.

Our operating companies consistently rank strongly in the SGS Statistical

Services Transmission Reliability Benchmarking program.

ITC's security operations recognized as an Example of Excellence
for our
Reliability Readiness Evaluation and Improvement Program.

Our control room is staffed with operators qualified at the highest level under
the federal Operator Certification Program.

Restoring power quickly is a core competency and strategic advantage for
ITC.

Historic Capital Spend

Investing in the System

ITC has a history of investing in the systems we acquire in order to improve reliability, facilitate generator interconnections and market efficiency, and serve customer needs.

Reliability

11

ITC's capital investments
and maintenance
programs have resulted in
improved reliability

ITC Midwest's
performance trend is
improving, following the
paths of ITC *Transmission*

and METC
Better
Performance
(Average Sustained Outages per Circuit)

Safety Statistics

ITC Compared to Peers

Accidents per 100 workers with
no lost time, relative to industry
average.

Accidents per 100 workers
resulting in lost time, relative to
industry average.

Security

13

Critical ITC substations are protected 24/7 with a sophisticated, integrated security system

Closed-circuit television cameras

Photo-beam motion detectors

Intrusion monitors

Access control

Cyber locks

Audible alarms

Barbed wire perimeter fencing

ITC headquarters access is restricted by a security checkpoint and steel gates. Building is equipped with layered access control devices, closed-circuit television cameras, and biometric identification system for control room access.

Storm Restoration
Building on Entergy's Record of Excellence
Jurisdiction
14

ITC's record:

In Michigan, ITC's systems are very reliable, resulting in only a handful of customer outages.

On our midwest system, 78% of outages impacting customers are restored at the point of interconnection within 90 minutes.

Post Closing: ITC plans to integrate key areas of its Incident Command System (ICS) with Entergy s ICS structure to ensure continued excellence in storm restoration.

ITC and Entergy will be developing detailed, integrated restoration plans prior to closing.
ITC s number one priority is getting customers back on line

ITC's Storm Restoration
Supply Chain Operational Excellence

ITC's Supply chain provides necessary steel structures and conductors to a site whenever a disaster requires line restoration.

Variety of methods ensure conductors and structures are readily available for storm restoration:

Numerous warehouses across footprint provide replacement conductors

and structures.

Specially designed temporary emergency structures available.

Alliance suppliers available as backup.

15

ITC's Restoration Readiness

Resource Transfer: Construction to Restoration

16

ITC alliance partner agreements provide
for quick transfer of capital project
contractors to storm recovery work

Hydaker-Wheatlake

MJ Electric

MYR Group

Allows ITC to respond efficiently to a storm event, lessening downtime

Labor contractors participating in recovery efforts already familiar with ITC safety practices, operating requirements and procedures

Expands ITC's available capital and equipment pool to a level that can address major storm events

ITC's Restoration Readiness
Example of Pole Supply Alliance
17

ITC has alliance partnership with Hydaker-Wheatlake Powerline Supply to manage a pole yard serving the ITC Midwest footprint.

Ability to supply minimum 750 poles during a storm recovery event.

Can deliver poles to 90% of region within 4 hours, with significant portion delivered within 2 hours. Remaining area can be serviced within 4-6 hours.

Examples -
Restoration Challenges

Straight-line Wind Storm in Iowa

Nuclear Plant Restoration in Michigan

Spring 2011 Storm Restoration in Michigan

2010 Pole Washout in Iowa

Straight-Line Wind Storm in Iowa
July 2011
Straight-line
winds reported up to 130
mph
ITCM restored all customers
capable of taking service within
72 hours. Three days later,
system experienced historic
peak load without incident.

NOAA: Wind event was most widespread and damaging in east central Iowa since 1998

Nuclear Plant Restoration
Summer 2011
20

Severe storms with tornado
damaged DTE Energy's Fermi 2
nuclear plant in Monroe County,
Michigan in June 2011

Storms cut power to the plant,

automatically shutting down the reactor

With the outstanding support from ITC, we were able to restore our offsite lines and our switchyard, assess the plant condition and exit the emergency plan by about 2 a.m. Monday morning.

--

DTE Fermi Plant Manager

21

June 20, 2011

Dear Mr. Welch:

I wanted to express my appreciation for the support and assistance the City of Mason received from ITC after the large storm and tornado on May 29, 2011. Our City's west side was cut off due to significant damage, with at least 60 poles knocked down. ITC reacted very quickly with equipment and resources, and ensured that the power lines were put up in a safe and timely manner.

This storm was one of the largest to hit the Mason area in years, and without your company's help, we could not have recovered as quickly as we did.

ITC reacted very quickly with equipment and resources, and ensured that the power lines were put up in a safe and timely manner.

Working Relationships with RECs and
Municipal Utilities

23

ITC has long-standing, close working relationships with the Rural Electric
Cooperative (REC) and Municipal Utility Customers it Serves

Dedicated Stakeholder Relations
group serves as single point of contact for
RECs and Municipal Utility Customers

Stakeholder Relations Group:

Advocates for the customer and seeks resolution when issues arise

Provides timely communications for planned outages such that coordinated maintenance can be accomplished

Provides ongoing and proactive communications on unplanned outages

Tracks customer issues to ensure prompt closure

Holds semi-annual Partners in Business meetings to provide updates on capital and maintenance plans, energy policy, rates, and legislative and regulatory updates

Conducts annual survey on effectiveness
