2. Business

A. Business overview

We were incorporated in February 1985 under the laws of the Republic of Korea. LG Electronics and LG Semicon transferred their respective LCD business to us in 1998, and since then, our business has been focused on the research, development, manufacture and sale of display panels, applying technologies such as TFT-LCD, LTPS-LCD and OLED.

As of March 31, 2012, we operated TFT-LCD and OLED production facilities in Paju and Gumi, Korea and a LCD research center in Paju, Korea. We have also established subsidiaries in the Americas, Europe and Asia.

As of March 31, 2012, our business consisted of the manufacture and sale of LCD and OLED panels and monitor products. Because our non-LCD business represented an extremely small portion of our assets and revenues as of and for the three months ended March 31, 2012, we have included them as part of our LCD reporting business segment.

B. Industry

(1) Industry characteristics and growth potential

- TFT-LCD technology is one of the widely used technologies in the manufacture of flat panel displays, and the demand for flat panel displays is growing. The flat panel display industry is characterized by entry barriers due to rapidly evolving technology, capital-intensive characteristics, and the significant investments required to achieve economies of scale, among other factors. There is intense competition among the players in the industry, and the industry as a whole has experienced continued growth in its production capacity in response to growth in demand for flat panel displays.

- The demand for LCD panels for notebook computers and desktop monitors has grown, to a degree, in tandem with the growth in the information technology industry. The demand for LCD panels for television sets has been growing as digital broadcasting is becoming more common and as LCD television has come to play an important role in the digital display market. In addition, markets for small- to medium-sized LCD panels, such as those used in mobile phones (including smartphones), smartbooks, medical applications, automobile navigation systems and e-books, among others, have shown continued growth.

- The average selling prices of LCD panels may continue to decline with time irrespective of general business cycles as a result of, among other factors, technology advancements and cost reductions.

(2) Cyclicalities

- The TFT-LCD business is highly cyclical. In spite of the increased demand for products, this industry has experienced periodic volatility caused by imbalances between supply and demand due to capacity expansion within the industry.

- Macroeconomic factors and other causes of business cycles can affect the rate of growth in demand for display panels. Accordingly, if supply exceeds demand, average selling prices of display panels may decrease. Conversely, if growth in demand outpaces growth in supply, average selling prices may increase.

(3) Market conditions

- Since 2011, due to a general overcapacity in the TFT-LCD industry, TFT-LCD panel makers have slowed their respective rates of production capacity growth, while a number of them are pursuing other strategic alternatives such as mergers or formation of new alliances.

- Most TFT-LCD panel makers are located in Asia.
 - a. Korea: LG Display, Samsung Display, Samsung Mobile Display, Hydis Technologies, etc.

 - b. Taiwan: AU Optronics, Chimei Innolux, CPT, HannStar, etc.

Edgar Filing: LG Display Co., Ltd. - Form 6-K

c. Japan: Japan Display, Sharp, Panasonic LCD, etc.

d. China: BOE, CSOT, CEC-Panda, etc.

(4) Market shares

- Our worldwide market share of large-sized TFT-LCD panels (i.e., TFT-LCD panels that are 9 inches or larger) based on revenue is as follows:

(5) Competitiveness

- Our ability to compete successfully depends on factors both within and outside our control, including product pricing, our relationship with customers, successful and timely investment and product development, cost competitiveness, success in marketing to our end-brand customers, component and raw material supply costs, foreign exchange rates and general economic and industry conditions.
- In order to compete effectively, it is critical to be cost competitive and maintain stable and long-term relationships with customers which will enable us to be profitable even in a buyer's market.
- A substantial portion of our sales is attributable to a limited number of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would result in reduced sales.
- Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. It is important that we take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain experienced key managerial personnel and skilled line operators.
- As a leading technology innovator in the display industry, we continue to focus on delivering differentiated value to our customers by developing new technologies and products, including in the categories of 3D, touch screens and next generation displays. With respect to 3D technology, we have commenced mass production of high definition 3D panels with reduced degrees of crosstalk, or the degree of 3D image overlapping, of less than 1% (which is less than what the human eye can perceive). We have also acquired the technical skills and have established a supply chain management system that enables us to provide one-stop solutions to our customers with respect to touch module products. In addition, we have shown that we are technologically a step ahead of the competition by developing products such as 10.1-inch flexible LCDs, 2.6 mm thin televisions (the thinnest in the world at the time) and 19-inch flexible e-papers. We are a leader in large OLED panel display technology, as demonstrated by our 55-inch OLED display panel unveiled at the Consumer Electronics Show in Las Vegas in January 2012, which was the largest OLED panel at the time.
- Moreover, we entered into long-term sales contracts with major global firms to secure customers and expand partnerships for technology development.

C. New businesses

- In order to meet the rapidly increasing market demand for large TFT-LCD panels, we successfully commenced mass production at P83, an eighth generation fabrication line located in our P8 facility, in March 2011. In January 2011, we also decided to invest in a new eighth generation production facility, P9.

Table of Contents

- We also plan to strengthen our market position in future display technologies by strengthening our OLED business, accelerating the development of flexible display technologies and maintaining our leadership position in the LED backlight LCD market.

- We are making an effort to increase our competitiveness, including in the LCD component parts market, by forming cooperative relationships with suppliers and purchasers of our products. As part of this effort, in March 2005, we established a joint venture company, Paju Electric Glass Co., Ltd., with Nippon Electric Glass Co., Ltd. We invested (Won)14.4 billion in return for a 40% interest in Paju Electric Glass Co., Ltd. In November 2010 and April 2011, we invested an additional (Won)14.8 billion and W4.4 billion, respectively, in Paju Electric Glass Co., Ltd. but the additional investments did not change our percentage interest in Paju Electric Glass Co., Ltd. In July 2008, we purchased 6,850,000 shares of common stock of New Optics Ltd. at a purchase price of W9.7 billion, and in February 2010, we purchased an additional 1,000,000 shares of common stock of New Optics at a purchase price of W2.5 billion. In January 2010, we purchased 10.8 million shares of Can Yang Investment Limited representing a 15% interest at a purchase price of US\$10.8 million. In October 2010, we invested an additional US\$4.5 million and acquired 4.8 million additional shares of Can Yang Investment Limited.

- In October 2008, we established a joint venture company, Suzhou Raken Technology Ltd., with AmTRAN Technology Co., Ltd., a Taiwan corporation. We invested US\$10.4 million in return for a 51% interest in Suzhou Raken Technology Ltd. Suzhou Raken Technology Ltd. will supply both parties with TFT-LCD modules and TFT-LCD televisions. Through the establishment of this joint venture, we are able to further expand our customer base by securing a stable long-term panel dealer. In 2009 and 2010, we invested an additional US\$58.7 million and US\$14.5 million, respectively, in Suzhou Raken Technology Ltd., but the additional investments did not change our percentage interest in Suzhou Raken Technology Ltd.

- As part of our strategy to expand our production capacity overseas, we signed an investment agreement and a joint venture agreement in November 2009 with the City of Guangzhou, China, to build an eighth-generation panel fabrication facility in China.

- In December 2009, certain LG affiliates and we entered into a joint venture investment agreement and established a joint venture company, Global OLED Technology LLC, for purposes of managing the patent assets relating to OLED technology that we acquired from Eastman Kodak Company in December 2009. As of December 31, 2009, we had invested (Won)72.3 billion in return for a 49% equity interest in the joint venture company. In June 2010, we sold (Won)19.0 billion worth of our equity interest in the joint venture company. After such sale, our equity interest was reduced to 32.73%.

- In December 2009, we acquired a 30.6% limited partnership interest in LB Gemini New Growth Fund No. 16. Under the limited partnership agreement, we agreed to invest a total amount of (Won)30 billion in the fund, and as of December 31, 2010, we had invested (Won)8.3 billion in the fund. By becoming a limited partner of this fund, our aim is to seek direct investment opportunities as well as to receive benefits from the investment. In February 2011, we received a distribution of (Won)1.4 billion from the fund, and in March and April 2011, we invested an additional (Won)1.9 billion and (Won)3.1 billion, respectively, in the fund. In June 2011, we received a further distribution of (Won)0.7 billion as return of principal and (Won)0.9 billion as dividends and we invested an additional (Won)1.2 billion in the fund. In December 2011, we invested an additional (Won)2.0 billion in the fund. The additional investments did not change our investment commitment amount of (Won)30 billion or our limited partnership interest in the fund, which remained at 30.6%.

Table of Contents

- In order to establish a production base for LCD modules, LCD television sets and LCD monitors, we entered into a joint investment agreement with Top Victory Investment Ltd. in January 2010 and established L&T Display Technology (Xiamen) Ltd. and L&T Display Technology (Fujian) Ltd. in Xiamen and Fujian, China, respectively. We invested (i) (Won)7.1 billion and acquired a 51% equity interest in L&T Display Technology (Xiamen) Ltd. and (ii) (Won)10.1 billion and acquired a 51% equity interest in L&T Display Technology (Fujian) Ltd.
- In May 2010, we completed the acquisition of the LCD module division of LG Innotek Co., Ltd. Through this acquisition, we expect to improve our module manufacturing process and simplify our supply chain which will increase our efficiency and competitiveness.
- In August 2010, in order to strengthen our competitiveness in the LED backlight LCD market, we entered into a joint venture with Everlight Electronics Co., Ltd. and AmTRAN Technology Co., Ltd. and established Eralite Optoelectronics (Jiangsu) Co., Ltd., a company that specializes in LED packaging and manufacturing, in Suzhou, China. We invested US\$4 million and acquired a 20% equity interest in Eralite Optoelectronics (Jiangsu) Co., Ltd.
- In September 2010, in order to strengthen our OLED business, we acquired a 20% equity interest in YAS Co., Ltd., which develops and manufactures OLED deposition equipment components, at a purchase price of (Won)10 billion.
- In November 2010, in order to strengthen our e-book business, we acquired a 100% equity interest in Image & Materials, Inc., a company that develops and manufactures e-book deposition equipment components, at a purchase price of (Won)35 billion. In each of June 2011, September 2011 and February 2012, we invested an additional (Won)3.0 billion in Image & Materials, Inc.
- In October 2010, in order to strengthen our competitiveness in the e-book market, we entered into a joint venture with Iriver Ltd. and established L&I Electronics Technology (Dongguan) Limited, a company that specializes in e-book manufacturing, in Dongguan, China. We invested US\$2.6 million and acquired a 51% equity interest in L&I Electronics Technology (Dongguan) Limited.
- In November 2010, in order to build Backlight-Module-System (BMS) lines that would help differentiate our technical skills from those of our competitors and increase our cost competitiveness, we entered into a joint venture with Compal Electronics, Inc., a Taiwanese company, and established LUCOM Display Technology (Kunshan) Ltd. in Kunshan, China. We invested US\$2.3 million and acquired a 51% equity interest in LUCOM Display Technology (Kunshan) Ltd. In February and April 2011, we invested an additional US\$ 3.1 million and US\$2.3 million, respectively, in LUCOM Display Technology (Kunshan) Ltd., but the additional investments did not change our percentage interest in LUCOM Display Technology (Kunshan) Ltd.
- In April 2011, in order to enhance the product quality and assist the local development of coaters, a component used in our TFT-LCD products, we invested (Won)20 billion and acquired a 16.6% interest in Narae Nanotech Corporation, a Korean equipment manufacturer. In June 2011, we invested an additional (Won)10.0 billion and acquired a further 7.7% interest in Narae Nanotech Corporation. As of March 31, 2012, we held a 23% equity interest in Narae Nanotech Corporation.
- In December 2011, in order to improve our cost competitiveness with respect to the glass substrate etching stage of our TFT-LCD panel manufacturing process, we invested (Won)10.6 billion and acquired a 20.3% interest in Avatec Co., Ltd., a third party glass substrate etching processor.
- In December 2011, in order to expand our module production capacity, we established LG Display U.S.A. Inc. in Texas, United States, and LG Display Reynosa S.A. de C.V. in Reynosa, Mexico. We invested in the form of paid-in capital (Won)12.4 billion and (Won)9.2 billion in LG Display U.S.A. Inc. and LG Display Reynosa S.A. de C.V., respectively. We currently own a 100% interest in LG Display U.S.A. Inc. and a 99% interest in LG Display Reynosa S.A. de C.V. LG Display U.S.A. Inc. owns the remaining 1%

Edgar Filing: LG Display Co., Ltd. - Form 6-K

interest in LG Display Reynosa S.A. de C.V.

- In April 2012, in order to improve our cost competitiveness with respect to tempered glass used for touchscreens, we invested (Won)2.0 billion and acquired a 19.8% interest in Glonix Co., Ltd.

(1) Based on ship-to-party.

B. Average selling price trend of major products

The average selling price of LCD panels per square meter of net display area shipped in the first quarter of 2012 decreased by 2% from the fourth quarter of 2011. There is no assurance that the average selling prices of LCD panels will not fluctuate in the future due to imbalances in supply and demand.

(Unit: US\$ / m²)

Description	2012 Q1	2011 Q4	2011 Q3	2011 Q2
TFT-LCD panel ⁽¹⁾⁽²⁾	669	684	705	747

(1) Quarterly average selling price per square meter of net display area shipped.

(2) Excludes semi-finished products in the cell process.

C. Major raw materials

Prices of major raw materials depend on fluctuations in supply and demand in the market as well as on change in size and quantity of raw materials due to the increased production of large-sized panels.

4. Production and Equipment

A. Production capacity and output

(1) Production capacity

The table below sets forth the production capacity of our Gumi and Paju facilities in the periods indicated.

(Unit: 1,000 Glass sheets)

Business area	Items	Location of facilities	2012 (Q1) ⁽¹⁾	2011 ⁽²⁾	2010 ⁽²⁾
TFT-LCD	TFT-LCD	Gumi, Paju	1,950	8,376	7,509

- (1) Calculated based on the maximum monthly input capacity (based on glass input substrate size for eighth generation glass sheets) during the period multiplied by the number of months in the period (i.e., 3 months).
- (2) Calculated based on the maximum monthly input capacity (based on glass input substrate size for eighth generation glass sheets) during the year multiplied by the number of months in a year (i.e., 12 months).

(2) Production output

The table below sets forth the production output of our Gumi and Paju facilities in the periods indicated.

(Unit: 1,000 Glass sheets)

Business area	Items	Location of facilities	2012 (Q1)	2011	2010
TFT-LCD	TFT-LCD	Gumi, Paju	1,750	6,850	6,490

- Based on glass input substrate size for eighth generation glass sheets.

B. Production performance and utilization ratio

(Unit: Hours, except percentages)

Business place (area)	Available working hours	Actual working hours	Average utilization ratio
Gumi (TFT-LCD)	of 2012 (Q1) 2,184 ⁽¹⁾	of 2012 (Q1) 2,050 ⁽¹⁾	93.9%
Paju (TFT-LCD)	(91 days) ⁽²⁾ 2,184 ⁽¹⁾	(85 days) ⁽²⁾ 2,184 ⁽¹⁾	100%
	(91 days) ⁽²⁾	(91 days) ⁽²⁾	

- (1) Based on the assumption that all 24 hours in a day have been fully utilized.
- (2) Number of days is calculated by averaging the number of working days for each facility.

C. Investment plan

In connection with our strategy to expand our TFT-LCD production capacity, we estimate that we will incur capital expenditures on a cash out basis of approximately (Won)4 trillion in 2012. Such amount is subject to change depending on business conditions and market environment.

5. Sales

A. Sales performance

(Unit: In billions of Won)

Business Area	Sales Types	Items (Market)	2012 (Q1)	2011	2010	
TFT-LCD	Products, etc.	TFT-LCD	Overseas ⁽¹⁾	5,685	22,328	23,806
			Korea ⁽¹⁾	499	1,963	1,706
			Total	6,184	24,291	25,512

(1) Based on ship-to-party.

B. Sales route and sales method

(1) Sales organization

- As of the date of this report, each of our Television Business Unit and IT Business Unit had individual sales and customer support functions.
- Sales subsidiaries in the United States, Germany, Japan, Taiwan, China and Singapore perform sales activities and provide local technical support to customers.

(2) Sales route

Sales of our products take place through one of the following two routes:

- LG Display HQ and overseas manufacturing subsidiaries ® Overseas sales subsidiaries (USA/Germany/Japan/Taiwan/China/Singapore), etc. ® System integrators and end-brand customers ® End users
- LG Display HQ and overseas manufacturing subsidiaries ® System integrators and end-brand customers ® End users

(3) Sales methods and sales terms

- Direct sales and sales through overseas subsidiaries, etc. Sales terms are subject to change depending on the fluctuation in the supply and demand of LCD panels.

(4) Sales strategy

- To secure stable sales to major personal computer makers and leading consumer electronics makers globally. To increase sales of high-end notebook computer products (including smartbooks, IPS and slim and narrow bezel notebook computer products), to strengthen sales of the high-end monitor segment (such as LED, IPS, slim and narrow bezel and 3D monitors), to lead in the large and wide television market (including the LED television market) and to continually increase our market share in the 3D television market by utilizing film patterned retarder technology.

- In the small- to medium-sized products segment, which is centered on high-end products applying IPS technology, to strengthen our business portfolio by developing a diverse range of products, such as mobile phone (including smartphone), smartbook, car navigation, e-book, industrial products (including aviation and medical equipment), etc.

Table of Contents

(5) Purchase orders

- Customers generally place purchase orders with us one month prior to delivery. Our customary practice for procuring orders from our customers and delivering our products to such customers is as follows:

- Receive order from customer (overseas sales subsidiaries, etc.) g Headquarter is notified g Manufacture product g Ship product (overseas sales subsidiaries, etc.) g Sell product (overseas sales subsidiaries, etc.)

6. Market Risks and Risk Management

A. Market risks

Our industry continues to experience continued declines in the average selling prices of display panels irrespective of cyclical fluctuations in the industry, and our margins would be adversely impacted if prices decrease faster than we are able to reduce our costs.

The TFT-LCD industry is highly competitive. We have experienced pressure on the prices and margins of our major products due largely to additional industry capacity from panel makers in Korea, Taiwan, China and Japan. Our main competitors in the industry include Samsung Display, Samsung Mobile Display, Hydis Technologies, AU Optronics, Chimei Innolux, CPT, HannStar, Japan Display, Sharp, Panasonic LCD, BOE, CSOT and CEC-Panda.

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, performance and reliability, successful and timely investment and product development, success or failure of our end-brand customers in marketing their brands and products, component and raw material supply costs, and general economic and industry conditions. We cannot provide assurance that we will be able to compete successfully with our competitors on these fronts and, as a result, we may be unable to sustain our current market position.

Our results of operations are subject to exchange rate fluctuations. To the extent that we incur costs in one currency and generate sales in a different currency, our profit margins may be affected by changes in the exchange rates between the two currencies. Our sales of display panels are denominated mainly in U.S. dollars, whereas our purchases of raw materials are denominated mainly in U.S. dollars and Japanese Yen. Our risk management policy regarding foreign currency risk is to minimize the impact of foreign currency fluctuations on our foreign currency denominated assets and liabilities.

B. Risk management

The average selling prices of display panels have declined in general and could continue to decline with time irrespective of industry-wide cyclical fluctuations. Certain contributing factors for this decline will be beyond our ability to control and manage. However, in anticipation of such price decline we have continued to develop new technologies and have implemented various cost reduction measures. In addition, in order to manage our risk against foreign currency fluctuations, we may from time to time enter into cross-currency interest rate swap contracts and foreign currency forward contracts.

7. Derivative Contracts

A. Currency risks

- We are exposed to currency risks on sales, purchases and borrowings that are denominated in currencies other than in Won, our functional currency. These currencies are primarily the U.S. dollar, the Euro, the Japanese Yen and the Chinese Renminbi.

- We generally use forward exchange contracts with a maturity of less than one year to hedge against currency risks.

Table of Contents

- Interest on borrowings is denominated in the currency of the borrowing. Generally, borrowings are denominated in currencies that match the cash flows generated by our underlying operations, primarily in Won, the U.S. dollar, the Japanese Yen and the Chinese Renminbi.

- In respect of other monetary assets and liabilities denominated in foreign currencies, we ensure that our net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates, when necessary, to address short-term imbalances. In addition, we also adjust the factoring volumes of foreign currency denominated receivables and utilize usances as means of settling accounts payable relating to capital expenditures for our facilities, in response to currency fluctuations.

B. Interest rate risks

- Our exposure to interest rate risks relates primarily to our long term debt obligations. To the extent necessary, we may from time to time enter into interest swap contracts to hedge our interest rate risks. As of March 31, 2012, we had no interest swap contracts outstanding.

8. Major contracts

Our material contracts, other than contracts entered into in the ordinary course of business, are set forth below:

Type of agreement	Name of party	Term	Content
Technology licensing agreement	Semiconductor Energy Laboratory	October 2005 ~	Patent licensing of LCD and OLED related technology
	Ferguson Patent Properties	October 2007 ~	Patent licensing of LCD driving technology
	Hewlett-Packard	January 2011 ~	Patent licensing of semiconductor device technology
Technology licensing/supply agreement	Chunghwa Picture Tubes	November 2007 ~	Patent cross-licensing of LCD technology
	HannStar Display Corporation	November 2009 ~	Patent cross-licensing of LCD technology
	AU Optronics Corporation	August 2011~	Patent cross-licensing of LCD technology

B. R&D achievements

Achievements in 2010

- 1) Development of 9.7-inch AH-IPS model for Apple's iPad.
 - Development of the world's first IPS Tablet
 - Achieving the following viewing angles by applying AH-IPS: top (80°) / bottom (80°) / left (80°) / right (80°)
- 2) Development of second Green PC products (13.3-inch, 14.0-inch and 15.6-inch in high-definition (HD))
 - Thin and light; low electricity consumption thereby increasing battery life
 - Development of Company-led flat product market
- 3) Development of world's first TruMotion 480Hz product (47-inch and 55-inch in full high-definition (FHD))
 - World's first application of 240hz driving technology and scanning technology to achieve TruMotion 480Hz.
 - 50% reduction in source driver integrated circuits (from 16ea to 8ea) by applying 1 gate 1 drain technology

Edgar Filing: LG Display Co., Ltd. - Form 6-K

- 4) World's first FHD 47-inch three-dimensional (3D) display panels using Glass Patterned Retarder (GPR) technology
 - Achieving FHD for 3D display panels using GPR technology

- 5) Development of our first large-sized display panels viewable in 3D using shutter glasses (42-inch, 47-inch, 55-inch in FHD)
 - Achieving high aperture ratio by applying S-IPS V technology
 - Removal of gate driver integrated circuits by applying GIP technology
 - Reduction in the number of integrated circuits (from 8ea to 6ea) by applying 960Ch source driver integrated circuits

- 6) World's first LCD product which uses the LCD monitor's bottom cover as the back cover of a television set (32-inch, 37-inch and 42-inch in FHD)

Table of Contents

- Removal of the television set back cover by replacing it with the LCD monitor's bottom cover. Co-designed with a third party

- 7) Development of 42-inch and 47-inch FHD display panels for television to be sold in emerging markets
 - Focusing on basic functions and removing functions that are costly

 - Achieving cost reduction by applying GIP technology

- 8) Development of intra interface technology for large-sized, high resolution, high frequency display panels
 - Improved data transmission rate (from 660Mbps to 1.6Gbps)

 - Developing slim PCBs by decreasing the number of transmission lines

- 9) Development of our first 21.5-inch and 26-inch FHD Edge LED products
 - Application of 21.5-inch, 26-inch FHD TV LED BL and mid-sized FHD model Slim TCON (176Pin g 88Pin)

- 10) Development of our first 32 HD Edge LED product
 - Application of 32-inch HD TV Edge LED BL

- 11) Development of our first 37-inch FHD M240Hz product
 - Development of 37-inch FHD 240Hz panel. Development and mass production of MEMC 240Hz with TCON model.

- 12) Development of 240Hz panel for LG Electronics' Borderless TV
 - Development of Narrow Bezel 240Hz panel (Bezel 14mm g 7mm) for LG Electronics' Borderless TV

- 13) Development of the world's first slim 23W FHD monitor in IPS mode
 - Slim design by applying slim-type LED backlight (thickness: 14.5t g 11.5t)

Edgar Filing: LG Display Co., Ltd. - Form 6-K

- Cost saving by applying low voltage liquid crystal

- Removal of gate driver integrated circuits by applying GIP technology

- 14) Development of the world's first slim 185W HD monitor in TN mode
 - Slim design by applying slim-type LED backlight (thickness: 11.5t g 9.7t)

 - 50% reduction in source driver integrated circuits by applying DRD (Double Rate Driving) technology

 - Elimination of optical sheet by applying new TFT structure technology (I-VCOM)

 - Removal of gate driver integrated circuits by applying GIP technology

- 15) Development of 42-inch, 47-inch and 55-inch FHD monitors applying low cell gap (3.1 g 2.8 μ m) technology
 - Enhanced 3D performance (3D CrossTalk 10.x% g 5.x%)

 - World's first application of this technology in 42-inch, 47 inch and 55-inch FHD products

- 16) Development of ultra slim 0.2t glass 12.1-inch notebook computer
 - Realization of ultra slim product by applying 0.2t glass and flat screen backlight structure

- 17) Development of world's first ultra slim 19SX TN monitor
 - Slim design by applying slim type LED backlight (thickness: 15.5 g 9.9t)

 - 50% reduction (6ea to 3ea) in the number of source driver integrated circuits by applying DRD (Double Rate Driving) technology

 - Elimination of gate driver integrated circuits by applying GIP technology

Table of Contents

- 18) Development of 215FHD e-IPS monitor products applying LED PKG
 - Reduction in the number of LED and LED array cost through optimization of LED PKG's beam and size
 - Realization of 2 sheet structure by adopting I-VCOM resulting in increased transmittance and backlight luminance
 - Elimination of gate driver integrated circuits by applying GIP technology
 - Minimization of LCM thickness by applying thin LED array structure (14.5t g 10.2t)
- 19) Development and application of LED PKG in 215FHD TN monitor products
 - Reduction in the number of LED and LED array cost through optimization of LED PKG's beam and size
 - Elimination of DBEF sheet by adopting I-VCOM resulting in increased transmittance and backlight luminance
 - Elimination of gate driver integrated circuits by applying GIP technology
 - Minimization of LCM thickness by applying thin LED array structure (14.5t g 10.2t)
- 67) Development of world's first slim TN monitor (185W HD, 20W HD+, 215W/23W FHD)
 - Developing ultra slim monitor by cooperating with set makers in the design process (SET standard: over 20t g 12.9t)
 - Minimization of LCM thickness by applying thin LED array structure (11.5t g 8.2t)
 - Simplification of circuit by developing T-con + Scaler 1chip
- 20) Development of world's first ultra slim 215W FHD TN monitor
 - Developing ultra slim monitor by cooperating with set makers in the design process (SET standard: 12.9t g 7.2t)
 - Minimization of LCM thickness by applying thin LED array structure (8.2t g 6t)
- 21) Development of the world's first 3D FPR type 42-inch, 47-inch and 55-inch FHD panels

Edgar Filing: LG Display Co., Ltd. - Form 6-K

- Improved 3D performance (cross talk 1.0% g, 3D luminance 170 nit)

- 22) Development of our first 42-inch, 47-inch and 55-inch FHD panels with built-in 3D formatters

- Development of our first products with built-in MEMC and 3D formatters

- 23) Development of the world's first real 240Hz applying GIP driving technology

- First to develop real 240Hz applying GIP driving technology

- Reduced the number of driver integrated circuits by applying 960ch Source Driver: 8ea g 6 ea

- 24) Development of panels for Macbook Air

- Development and mass production of 116HD, 133 WXGA+ panels

- Application of Z-inversion technology for low energy consumption

- 25) Introduction of the world's first HD shutter glasses type 3D notebook product (17.3 inch FHD)

- Development of 172Hz high recharging speed notebook LCD panel

- Development of Timing Controller (TC) driving technology

Table of Contents

- 26) The first all-in-one touch panel notebook from an LCD panel manufacturer (15.6 inch HD add-on touch notebook)
 - The world's first large size (15.6-inch) notebook panel to receive Win7 Touch certification (received on July 23, 2010)
 - The world's first LCD and touch panel integrated add-on touch module developed by an LCD panel manufacturer
- 27) Introduction of the world's first Micro Film 3D notebook (15.6-inch FHD)
 - The world's first 3D FPR type notebook (developed timely to win market share in the 3D market)
- 28) Development of the world's first 240Hz 23W IPS monitor
 - The world's first to realize 240Hz by application of 120Hz panel driving and scanning technologies
 - Achievement of Motion Picture Response Time (MPRT) of 8ms
- 29) Development of the world's first add-on infrared camera type 215W IPS monitor
 - Realization of thin LCM (20.5t) by application of the world's first add-on infrared camera
 - Improved touch capabilities (dead zone free and multi-touch) and the first in the world to receive Win 7 Logo certification
 - Touch location auto correction by applying auto calibration
- 30) Development of 20-inch HD and 23-inch FHD e-IPS monitor products applying widescreen LED PKG
 - Reduction in the number of LED and LED array cost through optimization of LED PKG's beam and size
 - Elimination of gate driver integrated circuits by applying GIP technology
 - Cost reduction and lower power consumption (20% reduction for driver integrated circuits) by using low voltage driver integrated circuits
 - Minimization of LCM thickness by applying thin LED array structure (for 20-inch HD panels: 14.5t g 10.2t)

Edgar Filing: LG Display Co., Ltd. - Form 6-K

31) Development of 20-inch HD and 23-inch FHD TN monitor products applying widescreen LED PKG

- Reduction in the number of LED and LED array cost through optimization of LED PKG's beam and size
- Elimination of DBEF sheet by adopting I-VCOM resulting in increased transmittance and backlight luminance (for 20-inch HD monitors)
- 50% reduction in the number of source driver integrated circuits by applying DRD technology (for 23-inch FHD panels)
- Elimination of gate driver integrated circuits by applying GIP technology
- Minimization of LCM thickness by applying thin LED array structure (11.5t g 10.2t)

Achievements in 2011

1) Introduction of glass-free mobile 3D product (4.3-inch WVGA)

- Development and preparation for mass production of our first glass-free 3D product (utilizing barrier cell)

2) Introduction of the world's first 12.5-inch AH-IPS notebook product

- Development of the world's first 12.5-inch notebook utilizing AH-IPS technology
- Achievement of a maximum circuit logic power of 1.0W
- Development of a slim and light AH-IPS model (development of a model that utilizes IPS and flat PCB)

Table of Contents

- 3) Introduction of an integrated 14.0-inch touch panel notebook product
 - Development of a 14.0-inch touch panel notebook product as part of our plan to develop and expand our integrated touch panel products portfolio

- 4) Introduction of our 15.6-inch dream color IPS notebook product
 - Development of a notebook utilizing H-IPS technology

 - Realization of a 100% color reproduction rate by applying RGB LED technology

 - Realization of 1.073G color by applying 10-bit color depth technology

- 5) Development and mass production of 9.7-inch LCD panels for i-Pad 2
 - Application of AH-IPS and slim LCD technology

 - Decreased thickness by 20% and weight by 7% compared to LCD panel for i-Pad 1

- 6) Development of the world's first 3D FPR 23-inch FHD TN monitor product
 - Minimization of flicker / crosstalk by applying FPR technology

 - Minimization of cost increase by applying one layer 3D film

 - Realization of high luminance 3D images (two times the luminance compared to images from monitors utilizing shutter glass technology)

- 7) Introduction of our first 50-inch Cinema TV product
 - Application of 21:9 screen display ratio (2560 x 1080 resolution)

 - Application of 960ch + EPI source driver integrated circuits for optimal high-resolution

 - Application of scanning technology under the Horizontal 2Edge structure

- 8) Development of the world's first 3D FPR 23-inch IPS FHD monitor product
 - Minimization of flicker / crosstalk by applying FPR technology
 - Minimization of cost increase by applying one layer 3D film
 - Realization of high luminance 3D images (two times the luminance compared to images from monitors utilizing shutter glass technology)
- 9) Development and introduction of the world's first 15.6-inch HD FPR 3D notebook product
 - Realization of the world's first 15.6-inch HD FPR 3D product
 - Realization of high luminance 3D images (two times the luminance compared to images from notebooks utilizing shutter glass technology)
 - Minimization of cost increase by applying one layer 3D film
- 10) Development and introduction of the world's first 17.3-inch Dream Color AH-IPS notebook product
 - Development of the world's first 17.3-inch notebook computer applying AH-IPS
 - Realization of Dream Color (100% color reproduction rate) by applying RGB LED
 - Realization of 1.073G color by applying Color Depth 10-bit technology
 - Realization of 89 degrees viewing angle (up/down/left/right) by applying IPS technology

Table of Contents

- 11) Development and introduction of a 15.6-inch HD product with the world's lowest (at the time) power consumption from logic circuit (0.5W).
 - Application of DRD Z-inversion, HVDD and low voltage process
 - Application of high intensity LED (2.3cd) and Vcut light guide plate
 - Increase in battery life due to logic circuit power consumption reduction

- 12) Development of the world's smallest (at the time) Narrow Bezel Notebook Model
 - The first in the world to apply 4.5 mm narrow bezel
 - Formation of camera hole by B/M mask patterning

- 13) Development of a new 10.1-inch WX smartbook LCD
 - Development of the our first 10.1-inch WXGA LCD following in the footsteps of our 9.7-inch XGA model
 - Realization of reduced power consumption, high permeability and increased viewing angle by application of IPS technology.

- 14) Development of a 42-inch FHD product applying COT technology
 - Simplifying panel production process by applying COT (Color Filter on TFT) technology
 - Luminance increased by 10%

- 15) Development of 42-inch, 47-inch and 55-inch direct slim LCD TV
 - Development of the world's first direct-mounted 11.0 mm depth ultra-slim LCM model
 - Application of 96 block local dimming and M240Hz technology

- 16) Development of a 47-inch super narrow public display panel

Edgar Filing: LG Display Co., Ltd. - Form 6-K

- Development of our first super narrow bezel (seam 6.9mm) product for application in public display panels
- 17) Introduction of the world's first 15.6-inch FHD AH-IPS notebook product
- Development of the world's first 15.6-inch FHD model applying AH-IPS technology
 - Development of slim & light AH-IPS model (thickness: 3.4mm; weight: 330g)
 - Achieving the following viewing angles by applying IPS technology; 178° from top to bottom; 178° from left to right
- 18) Development of a 15.6-inch FHD notebook applying a new backlight arrangement
- Optimization of light placement by application of New Concept LED Backlight
 - Reduction in the number of LED integrated circuits (78ea g 10ea) by application of mid-power LED
 - Reduced energy consumption pursuant to a reduction in the number of LED integrated circuits (7.4W g 5.9W)
- 19) Development of the world's first 215/25/27 FHD TN and 215 FHD IPS 3D monitor
- Minimization of flicker/crosstalk by application of FPR technology
 - Minimization of cost increase by applying one-layered 3D film
 - Realization of high luminance 3D images (two times the luminance compared to images from monitors utilizing shutter glass technology)
- 20) Development of a 4.5-inch true HD AH-IPS display smartphone product
- For 4G LTE smartphones (introduced by LG Electronics in September 2011)
 - Application of true HD720 resolution and AH-IPS technology

Table of Contents

- 21) Development of the world's first 14.0-inch HD 3D FPR notebook product
 - Realization of the world's first 14.0-inch 3D FPR display
 - Realization of high luminance 3D images (two times the luminance compared to images from notebook panels utilizing shutter glass technology)

 - 22) Development of the world's first AH-IPS GIP / DRD column inversion technology
 - Development of AH-IPS GIP / DRD by application of shrink GIP technology
 - Realization of TN-equivalent panel size through reduced panel load
 - Achieved TN-equivalent logic energy consumption levels
- Achievements in 2012*
- 1) Introduction of the world's first 13.3-inch high definition plus (HD+) AH-IPS notebook product
 - Development of the world's first 13.3-inch HD+ model applying AH-IPS technology

 - 2) Development and introduction of a 14.0-inch HD product with the world's lowest (at the time) rate of logic circuit energy consumption (0.4W)
 - Application of DRD Z-inversion, HVDD and low voltage process
 - Application of high intensity LED (2.3cd) and Vcut light guiding plate
 - Increase in battery life due to reduced logic circuit energy consumption

 - 3) Introduction of a 14.0-inch HD+ notebook product with a high color reproduction rate
 - Development of a 14.0-inch HD+ 72% color reproduction rate model
 - Development of a slim model applying 0.3 mm glass etching

Edgar Filing: LG Display Co., Ltd. - Form 6-K

- 4) Introduction of a 15.6-inch FHD glasses-free 3D notebook product
 - Development of the first notebook product applying switchable barrier type 3D technology that does not require the use of glasses

- 5) Development of the world's first 23-inch FHD monitor product applying AH-IPS 4Mask technology
 - Increased display panel luminance by application of AH-IPS technology (20% more luminance compared to display panels applying conventional IPS technology)
 - Simplified panel production process by application of AH-IPS 4Mask technology
 - 30% reduction in energy consumption resulting from increased efficiency of LED and circuit components
 - Increased productivity in the manufacture of circuit and mechanical components resulting from increased standardization

- 6) Development of TN monitor products (20-inch HD+, 21.5-inch FHD and 23-inch FHD) applying new LED
 - 20% reduction in energy consumption resulting from increased efficiency of LED and circuit components (based on 23W power consumption models)
 - Increased productivity in the manufacture of circuit and mechanical components resulting from increased standardization

- 7) Development of products incorporating 32/37/42 Vertical 1 Bar structure
 - First time we were able to incorporate Vertical 1Bar LED backlight unit
 - Reduced energy consumption resulting from a reduction in the number of LED integrated circuits (42.7W g 31.9W)

- 8) Development of low-cost direct backlight unit to replace conventional edge LED lighting lamp
 - First time we developed low-cost direct backlight unit for 42-inch FHD products (72ea)
 - Same thickness as conventional edge LED lighting lamp (35.5 mm)
- 9) Development of 47-inch and 55-inch panels with narrow bezels of 3.5mm
 - Slimmer set design possible using 3.5mm bezel
- 10) Development of the world's first panel products without borders on three sides (32-inch, 42-inch, 47-inch and 55-inch)
 - Made possible by removing the forward facing case top, resulting in zero bezel on three sides

10. Intellectual Property

As of March 31, 2012, our cumulative patent portfolio (including patents that have already expired) included a total of 17,550 patents, consisting of 7,831 in Korea and 9,719 in other countries.

11. Environmental Matters

We are subject to a variety of environmental regulations and we may be subject to fines or restrictions that could cause our operations to be interrupted. Our manufacturing processes generate worksite waste, including water and air pollutants, at various stages in the manufacturing process, and we are subject to a variety of laws and regulations relating to the use, storage, discharge and disposal of such chemical by-products and waste substances. We have installed various types of anti-pollution equipment, consistent with environmental standards, for the treatment of chemical waste and equipment for the recycling of treated waste water at our various facilities. However, we cannot provide assurance that environmental claims will not be brought against us or that the local or national governments will not take steps toward adopting more stringent environmental standards. Any failure on our part to comply with any present or future environmental regulations could result in the assessment of damages or imposition of fines against us, suspension of production or a cessation of operations. In addition, environmental regulations could require us to acquire costly equipment or to incur other significant compliance expenses that may materially and negatively affect our financial condition and results of operations.

We have also voluntarily agreed to reduce emission of greenhouse gases, such as trifluoride oxide and perfluoro compounds, or PFCs, including sulfur hexafluoride, or SF₆, gases, by installing abatement systems to meet voluntary emissions targets for the TFT-LCD industry for 2010. As part of our voluntary activities to reduce emission of greenhouse gases, we installed trifluoride oxide abatement systems at all of our production lines.

We also installed an SF₆ abatement system in P1 in April 2005, and have taken steps to install additional SF₆ abatement systems through the use of Clean Development Mechanism, or CDM, projects. We manage our CDM projects jointly with LG International Corp. On July 10, 2010, after becoming the first TFT-LCD company to receive the UNFCCC CDM Executive Board's approval of our CDM project, we installed an SF₆ abatement system in P6. We received a total of 343,971 tonnes of CO₂ equivalent of certified emission reduction credits from the UN for the reduction of greenhouse gas emissions during the period from August 1, 2010 to December 31, 2010, all of which was sold in December 2011. We were the first TFT-LCD manufacturer to receive such certified emission reduction credits pursuant to an SF₆ decomposition CDM project. Currently, a third party accreditation agency is also examining the reduction of our greenhouse gas emissions since January 1, 2011 as part of our application for receiving certified emission reduction credits from the UN. In August 2011, we commenced the installation of an SF₆ abatement system in P7 through the implementation of CDM projects which became operational in February 2012, which further reduced our greenhouse gas emissions.

Table of Contents

Under the Framework Act on Low Carbon, Green Growth, the Korean government has designated us as one of the companies subject to greenhouse gas emission and energy consumption targets. As a result, we may need to invest in additional equipment and there may be other costs associated with meeting the reduction target for 2012, which may have a negative effect on our profitability or production activities. In addition, if we fail to meet our reduction target and are unable to comply with the government's subsequent enforcement notice relating to such failure, we may be subject to fines.

In connection with the greenhouse gas emission reduction target system, we submitted a statement of our domestic emissions and energy usage for the years 2007 through 2010 to the Korean government (i.e., the Ministry of Environment and the Ministry of Knowledge Economy), which was certified by DNV Certification Co., Ltd., a government-designated certification agency. We are currently preparing a statement of our domestic emissions and energy usage for the year 2011, which we submitted to the Ministry of Environment and the Ministry of Knowledge Economy in March 2012 after certification by Lloyd's Register Quality Assurance, another government-designated certification agency. The table below sets forth yearly levels of our greenhouse gases emissions and energy usage in the statement submitted to the Korean government:

(Unit: thousand tonnes of CO₂ equivalent; Tetra Joules)

Category	2011	2010	2009
Greenhouse gases	5,926	5,576	4,755
Energy	55,234	45,850	37,075

In addition, in order to improve the efficiency and reliability of measuring our greenhouse gas emission reduction activities, we have begun implementing improvements in our electronic greenhouse gas inventory system and plan to complete such improvements sometime in 2012.

Operations at our manufacturing plants are subject to regulation and periodic monitoring by the Korean Ministry of Environment and local environmental protection authorities. We believe that we have adopted adequate anti-pollution measures and have minimized our impact on the environment by improving existing and developing new technologies for the effective maintenance of environmental protection standards consistent with local industry practice. In addition, we have continually monitored, and we believe that we are in compliance in all material respects with, the applicable environmental laws and regulations in Korea. Expenditures related to such compliance may be substantial. Such expenditures are generally included in capital expenditures. As required by Korean law, we employ licensed environmental specialists for each environmental area, including air quality, water quality, toxic materials and radiation. We currently have ISO 14001 certifications with respect to the environmental record for P1 through P8, our OLED production facility in Gumi, Korea, our Gumi module production plant and our Paju module production plant, as well as our module production plants in Nanjing and Guangzhou, China.

In addition, with respect to P1 through P8 and our module production plants in Gumi and Paju, we have established and are currently operating a new green management system, which was certified by BSI Group Korea in November 2011. Furthermore, we have been certified by the Korean Ministry of Environment as a "Green Company", with respect to our environmental record for P1 and our module production plant in Gumi since 1997, with respect to our operations at P2 and P3 since 2006, and with respect to our operations at P4, P5 and P6 since 2008, and received commendations from the Prime Minister and the Minister of Environment of Korea for our efforts to promote recycling.

We also have an internal monitoring system to control the use of hazardous substances in the manufacture of our products as we are committed to compliance with all applicable environmental laws and regulations, including European Union Restriction of Hazardous Substances (RoHS) Directive 2002/95/EC, which took effect in July 2006, and restricts the use of certain hazardous substances in the manufacture of electrical and electronic equipment.

Table of Contents

In addition, as part of our commitment to purchase environment-friendly raw materials, we have implemented a green purchasing system that prevents the introduction of hazardous materials at the purchasing stage. The green purchasing system has been a key component in our efforts to comply with RoHS and other applicable environmental laws and regulation.

In October 2005, we became the first TFT-LCD company to receive accreditation as an International Accredited Testing Laboratory by the Korea Laboratory Accreditation Scheme, which is operated by the Korean Ministry of Knowledge Economy. In September 2006, we received international accreditation from TUV SUD, EU's German accreditation agency, as a RoHS testing laboratory. Moreover, we participated in reforming IEC 62321 by 2012, a RoHS international testing standard, by including a halogen-free combustion ion chromatography method in our committee draft that we submitted in June 2010.

Independent Auditors' Review Report

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

Introduction

We have reviewed the accompanying condensed consolidated statement of financial position of LG Display Co., Ltd. and subsidiaries (the Group) as of March 31, 2012, and the related condensed consolidated statements of comprehensive loss, changes in equity and cash flows for the three-month periods ended March 31, 2012 and 2011 and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Condensed Consolidated Interim Financial Statements

Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with Korean International Financial Reporting Standards No.1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed consolidated interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express a conclusion on these condensed consolidated interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly/Semiannual Financial Statements of the Republic of Korea. A review consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of Korea and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed consolidated interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards No.1034, *Interim Financial Reporting*.

Emphasis of Matter

As discussed in note 17 to the condensed consolidated financial statements, LG Display Co., Ltd., along with its subsidiaries, was or has been under investigations by antitrust authorities in certain countries with respect to possible anti-competitive activities in the LCD industry and named as defendants in a number of federal class actions in the United States and Canada and related individual lawsuits in connection with the alleged antitrust violations concerning the sale of LCD panels. The Group estimated and recognized losses related to these legal proceedings. However, actual losses are subject to change in the future based on new developments in each matter, or changes in circumstances, which could be materially different from those estimated and recognized by the Group.

Other Considerations

We audited the consolidated statement of financial position as of December 31, 2011 and the consolidated statements of comprehensive loss, changes in equity and cash flows for the year ended December 31, 2011, not accompanying this review report, in accordance with auditing standards generally accepted in the Republic of Korea, and our report thereon, dated February 22, 2012, expressed an unqualified opinion. The accompanying condensed consolidated statement of financial position of the Group as of December 31, 2011, presented for comparative purposes, is not different from that audited by us in all material respects.

1. Reporting Entity

(a) Description of the Controlling Company

LG Display Co., Ltd. (the Controlling Company) was incorporated in February 1985 under its original name of LG Soft, Ltd. as a wholly owned subsidiary of LG Electronics Inc. In 1998, LG Electronics Inc. and LG Semicon Co., Ltd. transferred their respective Thin Film Transistor Liquid Crystal Display (TFT-LCD) related business to the Controlling Company. The main business of the Controlling Company and its subsidiaries is to manufacture and sell TFT-LCD panels. The Controlling Company is a stock company (Jusikhoesa) domiciled in the Republic of Korea with its address at 128 Yeouidae-ro, Yeongdeungpo-gu, Seoul, the Republic of Korea. In July 1999, LG Electronics Inc. and Koninklijke Philips Electronics N.V. (Philips) entered into a joint venture agreement. Pursuant to the agreement, the Controlling Company changed its name to LG.Philips LCD Co., Ltd. However, on February 29, 2008, the Controlling Company changed its name to LG Display Co., Ltd. based upon the approval of shareholders at the general shareholders meeting on the same date as a result of the decrease in Philips's share interest in the Controlling Company and the possibility of its business expansion to Organic Light Emitting Diode (OLED) and Flexible Display products. As of March 31, 2012, LG Electronics Inc. owns 37.9% (135,625,000 shares) of the Controlling Company's common shares.

As of March 31, 2012, the Controlling Company has its TFT-LCD manufacturing plants, OLED manufacturing plant and LCD Research & Development Center in Paju and TFT-LCD manufacturing plants and OLED manufacturing plant in Gumi. The Controlling Company has overseas subsidiaries located in the United States of America, Europe and Asia.

The Controlling Company's common stock is listed on the Korea Exchange under the identifying code 034220. As of March 31, 2012, there are 357,815,700 shares of common stock outstanding. The Controlling Company's common stock is also listed on the New York Stock Exchange in the form of American Depositary Shares (ADSs) under the symbol LPL. One ADS represents one-half of one share of common stock. As of March 31, 2012, there are 21,085,294 ADSs outstanding.

2. **Basis of Presenting Financial Statements**

(a) **Statement of Compliance**

The condensed consolidated interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRSs) 1034, *Interim Financial Reporting*. They do not include all of the information required for full annual consolidated financial statements and should be read in conjunction with the consolidated financial statements of the Group as of and for the year ended December 31, 2011.

The condensed consolidated interim financial statements were authorized for issuance by the Board of Directors on April 24, 2012.

(b) **Basis of Measurement**

The condensed consolidated interim financial statements have been prepared on the historical cost basis except for the following material items in the statement of financial position:

derivative financial instruments measured at fair value;

financial instruments at fair value through profit or loss measured at fair value;

available-for-sale financial assets measured at fair value; and

liabilities for defined benefit plans recognized at the net total of the present value of defined benefit obligation less the fair value of plan assets

(c) **Functional and Presentation Currency**

The condensed consolidated interim financial statements are presented in Korean won, which is the Controlling Company's functional currency. All amounts in Korean won are in millions unless otherwise stated.

(d) **Use of Estimates and Judgments**

The preparation of the condensed consolidated interim financial statements in conformity with K-IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those applied in its financial statements as of and for the year ended December 31, 2011.

Table of Contents**3. Summary of Significant Accounting Policies**

The significant accounting policies followed by the Group in the preparation of its condensed consolidated interim financial statements are the same as those followed by the Group in its preparation of the consolidated financial statements as of and for the year ended December 31, 2011, except for the application of K-IFRS No. 1034, *Interim Financial Reporting*, and the amendments to K-IFRS No. 1107, *Financial Instruments: Disclosures*, as explained below:

The Group has applied the amendments to K-IFRS No. 1107, *Financial Instruments: Disclosures*, effective January 1, 2012, by prospectively disclosing the nature of transferred assets, their carrying amount, and the description of risks and rewards for each class of transferred financial assets that are not derecognized in their entirety.

4. Financial Risk Management

The objectives and policies on financial risk management followed by the Group are consistent with those disclosed in the consolidated financial statements as of and for the year ended December 31, 2011.

5. Inventories

(ii) Sensitivity analysis

A weakening of the won, as indicated below, against the following currencies which comprise the Group's financial assets or liabilities denominated in foreign currency as of March 31, 2012 and December 31, 2011 would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Group considered to be reasonably possible at the end of each reporting period. The analysis assumes that all other variables, in particular interest rates, remain constant. The changes in equity and profit or loss are as follows:

(In millions of won)

		2012		2011	
		Equity	Profit or loss	Equity	Profit or loss
USD (5 percent weakening)	(Won)	(53,836)	(37,033)	(29,623)	(28,032)
JPY (5 percent weakening)		(26,153)	(22,851)	(40,040)	(35,494)
CNY (5 percent weakening)		1,320		(4,830)	
TWD (5 percent weakening)		(216)	(87)	8,974	162
EUR (5 percent weakening)		(1,890)	(1,528)	(4,900)	(1,957)
PLN (5 percent weakening)		318	30	(85)	128
SGD (5 percent weakening)		44		4	

A strengthening of the won against the above currencies as of March 31, 2012 and December 31, 2011 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(d) Interest rate risk

(i) Profile

The interest rate profile of the Group's interest-bearing financial instruments as of March 31, 2012 and December 31, 2011 are as follows:

<i>(In millions of won)</i>		2012	2011
Fixed rate instruments			
Financial assets	(Won)	2,396,311	2,335,815
Financial liabilities		(2,685,319)	(2,685,175)
	(Won)	(289,008)	(349,360)

Financial liabilities		(2,569,137)	(1,925,192)
	(Won)	(2,568,537)	(1,924,592)

(ii) Fair value sensitivity analysis for fixed rate instruments

The Group has recognized certain fixed rate convertible bonds as financial liabilities at fair value through profit or loss. As of March 31, 2012, an increase in the interest rate by 100 basis points would have decreased the Group's profit or loss by (Won)29 million and a decrease in the interest rate by 100 basis points would have increased the Group's profit or loss by (Won)29 million.

(iii) Cash flow sensitivity analysis for variable rate instruments

As of March 31, 2012 and December 31, 2011, a change of 100 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below for each 12-month period following the reporting dates. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

<i>(In millions of won)</i>		Equity		Profit or loss	
		1% p increase	1% p decrease	1% p increase	1% p decrease

(f) Capital Management

Management's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Liabilities to equity ratio, net borrowings to equity ratio and other financial ratios are used by management to achieve an optimal capital structure. Management also monitors the level of dividends to ordinary shareholders. Equity, defined by K-IFRS, is identical to the definition of capital, managed by management.

17. Contingencies

Patent infringement lawsuit against Chi Mei Optoelectronics Corp., and others

In 2006, the Group filed a complaint in the United States District Court for the District of Delaware against Chimei Innolux Corp. (formerly, Chi Mei Optoelectronics Corp.) and AU Optronics Corp. claiming infringement of patents related to liquid crystal displays and the manufacturing processes for TFT-LCDs. Both AU Optronics Corp. and Chimei Innolux Corp. filed counter-claims against the Group claiming the Group's infringement of their patents. The Court bifurcated the Group's trial against AU Optronics Corp., from the trial against Chimei Innolux Corp., holding the first trial against AU Optronics Corp. on June 2, 2009. In September 2011, the Group and AU Optronics Corp. filed a stipulation for dismissal of the Delaware case and amicably settled the claims and counterclaims between the two parties. The stay of the Chi Mei Optoelectronics case was lifted on January 31, 2012, and the parties filed a joint status report with the court on March 23, 2012. The Group is unable to predict the ultimate outcome of the Chimei Innolux case.

Anvik Corporation's lawsuit for infringement of patent

In 2007, Anvik Corporation filed a patent infringement case against the Group, along with other LCD manufacturing companies in the United States District Court for the Southern District of New York, in connection with the usage of photo-masking equipment manufactured by Nikon Corporation. The court granted Nikon Corporation's motion for summary judgment of invalidity of the patents-in-suit and entered a judgment in favor of Nikon Corporation, the Controlling Company and LG Display America and other TFT-LCD manufacturing companies, dismissing the case on April 5, 2012. On April 6, 2012, Anvik Corporation appealed the court's decision to the United States Court of Appeals for the Federal Circuit. The Group is unable to predict the ultimate outcome of this case.

Industrial Technology Research Institute of Taiwan's lawsuit for infringement of patent

In 2012, the United States International Trade Commission, or USITC, granted a motion by Industrial Technology Research Institute of Taiwan, or ITRI, to add the Controlling Company and LG Display America as additional respondents in a Section 337 investigation pending before the USITC. ITRI is seeking an exclusion order prohibiting the importation of televisions and monitors incorporating the Group's products into the United States for alleged patent infringement. The Group is unable to predict the ultimate outcome of this case.

Table of Contents17. Contingencies, Continued*Antitrust investigations and litigations*

In December 2006, the Controlling Company received notices of investigation by the Korea Fair Trade Commission, the Japan Fair Trade Commission, the U.S. Department of Justice, and the European Commission with respect to possible anti-competitive activities in the TFT-LCD industry. The Controlling Company subsequently received similar notices from the Canadian Bureau of Competition Policy, the Federal Competition Commission of Mexico, the Secretariat of Economic Law of Brazil and the Taiwan Fair Trade Commission.

In November 2008, the Controlling Company executed an agreement with the U.S. Department of Justice (DOJ) whereby the Controlling Company and its U.S. subsidiary, LG Display America, Inc. (LGDUS), pleaded guilty to a Sherman Antitrust Act violation and agreed to pay a single total fine of USD400 million. In December 2008, the U.S. District Court for the Northern District of California accepted the terms of the plea agreement and entered a judgment against the Controlling Company and LGDUS and ordered the payment of USD400 million. The agreement resolved all federal criminal charges against the Controlling Company and LGDUS in the United States in connection with this matter.

On December 8, 2010, the European Commission (the EC) issued a decision finding that the Controlling Company engaged in anti-competitive activities in the LCD industry in violation of European competition laws and imposed a fine of EUR215 million. On February 23, 2011, the Controlling Company filed with the European Union General Court an application for partial annulment and reduction of the fine imposed by the EC. The European Union General Court has not ruled on the Controlling Company's application. In November 2011, the Controlling Company received an additional Request for Information from the EC relating to the alleged anti-competitive activities in the LCD industry and is responding to the request.

In November 2009, the Taiwan Fair Trade Commission terminated its investigation without any finding of violations or levying of fines. Also, in February 2012, the Competition Bureau of Canada terminated its investigation against the Controlling Company without any finding of violations or levying of fines. To date no decision has been issued by the Japan Fair Trade Commission, and we believe the statutory time period by which the Commission was required to have issued a decision has already lapsed. To date investigations by the Federal Competition Commission of Mexico and the Secretariat of Economic Law of Brazil are ongoing.

In August 2011, the Korea Fair Trade Commission issued an Examination Report finding that the Controlling Company engaged in anti-competitive activities in violation of Korean fair trade laws and a hearing was held in October 2011. In December 2011, the Korea Fair Trade Commission imposed a fine on the Controlling Company and certain of its subsidiaries of approximately W31,378 million, and the Controlling Company filed an appeal of the decision with the Seoul Appellate Court in December 2011. To date the Seoul High Court has not ruled on the Controlling Company's appeal.

Subsequent to the commencement of the DOJ investigation, a number of class action complaints were filed against the Controlling Company and other TFT-LCD panel manufacturers in the U.S. and Canada alleging violation of respective antitrust laws and related laws. The class action lawsuits in the U.S. were transferred to the Northern District of California for pretrial proceedings (MDL Proceedings). On March 28, 2010, the court certified the class action complaints filed by direct purchasers and indirect purchasers. 78 entities (including groups of affiliated entities) submitted requests for exclusion from the direct purchaser class. The time period for submitting requests for exclusion from the indirect purchaser class expired on April 13, 2012. 10 entities (including groups and affiliated entities) submitted requests for exclusion from the indirect purchaser class. In addition, since 2010, the attorneys general of Arkansas, California, Florida, Illinois, Michigan, Mississippi, Missouri, New York, Oklahoma, Oregon, South Carolina, Washington, West Virginia and Wisconsin filed complaints against the Controlling Company, alleging similar antitrust violations as alleged in the MDL Proceedings. In June 2011, the Controlling Company reached a settlement with the direct purchaser class, which the federal district court approved in December 2011.

Similar claims were filed separately by ATS. Claim, LLC, (assignee of Ricoh Electronics, Inc.), AT&T Corp. and its affiliates, Motorola, Inc., Electrograph Technologies Corp. and their respective related entities, all of which have been transferred to the MDL Proceedings. In November 2010, ATS Claim, LLC dismissed its action as to the Controlling Company pursuant to a settlement agreement. In addition, in 2010, Trac Fone Wireless Inc., Best Buy Co., Inc. and its affiliates, Target Corp., Sears, Roebuck and Co., Kmart Corp., Old Comp Inc., Good Guys, Inc., RadioShack Corp., Newegg Inc., Costco Wholesale Corp., Sony Electronics, Inc. and its affiliates, SB Liquidation Trust, and the trustee of the Circuit City Stores, Inc. Liquidation Trust, filed claims in the United States. In addition, in 2011, Office Depot, Inc., T-Mobile U.S.A., Inc., Interbond Corp. of America (Brandsmart), Jaco Electronics, Inc., P.C. Richard & Son Long Island Corp., MARTA Cooperative of America, Inc., ABC Appliance (ABC Warehouse), Schultze Agency Services, LLC (Tweeter), Tech Data Corp. and its affiliate, and AASI Creditor Liquidating Trust for All American Semiconductor Inc., and CompuCom Systems, Inc. filed similar claims. In 2012, ViewSonic Corp., NECO Alliance LLC and Rockwell Automation Inc. filed similar claims. To the extent these claims were not filed in the MDL Proceedings, they have been transferred or are expected to be transferred to the MDL Proceedings for pretrial proceedings.

In Canada, the Ontario Superior Court of Justice certified the class action complaints filed by the direct and indirect purchasers in May 2011. The Controlling Company is pursuing an appeal of the decision as well as defending the on-going class actions in Quebec and British Columbia.

While the Group continues its vigorous defense of the various pending proceedings described above, there is a possibility that one or more proceedings may result in an unfavorable outcome to the Group. The Group has established provisions with respect to certain of the contingencies. However, actual liability may be materially different from the provisions estimated by the Group. For certain cases described above, management is not able to estimate the potential estimated loss if the final outcome of the cases is unfavorable to the Group as the cases are in early stage and management does not have sufficient information to estimate the amount of possible loss.

18. Capital and Reserves

Independent Auditors' Review Report

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

Introduction

We have reviewed the accompanying condensed statement of financial position of LG Display Co., Ltd. (the Company) as of March 31, 2012, and the related condensed statements of comprehensive loss, changes in equity and cash flows for the three-month periods ended March 31, 2012 and 2011 and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Condensed Interim Financial Statements

Management is responsible for the preparation and fair presentation of these condensed separate interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed separate interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express a conclusion on these condensed separate interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly/Semiannual Financial Statements of the Republic of Korea. A review consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of Korea and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed separate interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*.

Emphasis of Matter

As discussed in note 17 to the condensed financial statements, LG Display Co., Ltd. was or has been under investigations by antitrust authorities in certain countries with respect to possible anti-competitive activities in the LCD industry and named as defendants in a number of federal class actions in the United States and Canada and related individual lawsuits in connection with the alleged antitrust violations concerning the sale of LCD panels. The Company estimated and recognized losses related to these legal proceedings. However, actual losses are subject to change in the future based on new developments in each matter, or changes in circumstances, which could be materially different from those estimated and recognized by the Company.

Other Considerations

We audited the separate statement of financial position as of December 31, 2011, and the separate statements of comprehensive loss, changes in equity and cash flows for the year ended December 31, 2011, not accompanying this review report, in accordance with auditing standards generally accepted in the Republic of Korea, and our report thereon, dated February 22, 2012, expressed an unqualified opinion. The accompanying condensed separate statement of financial position of the Company as of December 31, 2011, presented for comparative purposes, is not different from that audited by us in all material respects.

1. **Organization and Description of Business**

LG Display Co., Ltd. (the Company) was incorporated in February 1985 under its original name of LG Soft, Ltd. as a wholly owned subsidiary of LG Electronics Inc. In 1998, LG Electronics Inc. and LG Semicon Co., Ltd. transferred their respective Thin Film Transistor-Liquid Crystal Display (TFT-LCD) related business to the Company. The main business of the Company is to manufacture and sell TFT-LCD panels. The Company is a stock company (Jusikhoesa) domiciled in the Republic of Korea with its address at 128 Yeouidae-ro, Yeongdeungpo-gu, Seoul, the Republic of Korea. In July 1999, LG Electronics Inc. and Koninklijke Philips Electronics N.V. (Philips) entered into a joint venture agreement. Pursuant to the agreement, the Company changed its name to LG.Philips LCD Co., Ltd. However, on February 29, 2008, the Company changed its name to LG Display Co., Ltd. based upon the approval of shareholders at the general shareholders meeting on the same date as a result of the decrease in Philips' share interest in the Company and the possibility of its business expansion to Organic Light Emitting Diode (OLED) and Flexible Display products. As of March 31, 2012, LG Electronics Inc. owns 37.9% (135,625,000 shares) of the Company's common shares.

As of March 31, 2012, the Company has its TFT-LCD manufacturing plants, OLED manufacturing plant and LCD Research & Development Center in Paju and TFT-LCD manufacturing plants and OLED manufacturing plant in Gumi. The Company has overseas subsidiaries located in the United States of America, Europe and Asia.

The Company's common stock is listed on the Korea Exchange under the identifying code 034220. As of March 31, 2012, there are 357,815,700 shares of common stock outstanding. The Company's common stock is also listed on the New York Stock Exchange in the form of American Depository Shares (ADSs) under the symbol LPL . One ADS represents one-half of one share of common stock. As of March 31, 2012, there are 21,085,294 ADSs outstanding.

2. **Basis of Presenting Financial Statements**

(a) **Statement of Compliance**

The condensed separate interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRSs) No. 1034, *Interim Financial Reporting*. They do not include all of the information required for full annual financial statements and should be read in conjunction with the financial statements of the Company as of and for the year ended December 31, 2011.

These condensed interim financial statements are separate interim financial statements prepared in accordance with K-IFRS No.1027 *Consolidated and Separate Financial Statements* presented by a parent, an investor in an associate or a venturer in a jointly controlled entity, in which the investments are accounted for on the basis of the direct equity interest rather than on the basis of the reported results and net assets of the investees.

The condensed separate interim financial statements were authorized for issuance by the Board of Directors on April 24, 2012.

Table of Contents

2. Basis of Presenting Financial Statements, Continued

(b) Basis of Measurement

The condensed separate interim financial statements have been prepared on the historical cost basis except for the following material items in the statement of financial position:

derivative financial instruments measured at fair value;

financial instruments at fair value through profit or loss measured at fair value;

available-for-sale financial assets measured at fair value; and

liabilities for defined benefit plans recognized at the net total of the present value of defined benefit obligation less the fair value of plan assets

(c) Functional and Presentation Currency

The condensed separate interim financial statements are presented in Korean won, which is the Company's functional currency. All amounts in Korean won are in millions unless otherwise stated.

(d) Use of Estimates and Judgments

The preparation of the condensed separate interim financial statements in conformity with K-IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed separate interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those applied in its financial statements as of and for the year ended December 31, 2011.

3. Summary of Significant Accounting Policies

The significant accounting policies followed by the Company in the preparation of its condensed separate interim financial statements are the same as those followed by the Company in its preparation of the financial statements as of and for the year ended December 31, 2011, except for the application of K-IFRS No. 1034, *Interim Financial Reporting*, and the amendments to K-IFRS No. 7, *Financial Instruments: Disclosures*, as explained below:

The Company has applied the amendments to K-IFRS No. 1107, *Financial Instruments: Disclosures* effective January 1, 2012, by prospectively disclosing the nature of transferred assets, their carrying amount, and the description of risks and rewards for each class of transferred financial assets that are not derecognized in their entirety.

4. Financial Risk Management

The objectives and policies on financial risk management followed by the Company are consistent with those disclosed in the financial statements as of and for the year ended December 31, 2011.

Table of Contents5. Inventories

Inventories as of March 31, 2012 and December 31, 2011 are as follows:

(ii) Sensitivity analysis

A weakening of the won, as indicated below, against the following currencies which comprise the Company's financial assets or liabilities denominated in foreign currency as of March 31, 2012 and December 31, 2011 would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Company considered to be reasonably possible at the end of each reporting period. The analysis assumes that all other variables, in particular interest rates, remain constant. The changes in equity and profit or loss are as follows:

<i>(In millions of won)</i>		2012		2011	
		Equity	Profit or loss	Equity	Profit or loss
USD (5 percent weakening)	(Won)	(45,193)	(45,429)	(24,041)	(24,280)
JPY (5 percent weakening)		(19,248)	(19,248)	(30,601)	(30,601)
TWD (5 percent weakening)		18	18	230	230
PLN (5 percent weakening)		28	28	64	64
EUR (5 percent weakening)		1,549	1,549	1,869	1,869

A strengthening of the won against the above currencies as of March 31, 2012 and December 31, 2011 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(d) Interest rate risk

(i) Profile

The interest rate profile of the Company's interest-bearing financial instruments as of March 31, 2012 and December 31, 2011 are as follows:

<i>(In millions of won)</i>		2012	2011
Fixed rate instruments			
Financial assets	(Won)	1,349,388	1,422,728

	(Won)	(2,509,339)	(1,829,834)

Table of Contents9. Financial Instruments, Continued

(ii) Fair value sensitivity analysis for fixed rate instruments

The Company has recognized certain fixed rate convertible bonds as financial liabilities at fair value through profit or loss. As of March 31, 2012, an increase in the interest rate by 100 basis points would have decreased the Company's profit or loss by (Won)29 million and a decrease in the interest rate by 100 basis points would have increased the Company's profit or loss by (Won)29 million.

(iii) Cash flow sensitivity analysis for variable rate instruments

As of March 31, 2012 and December 31, 2011, a change of 100 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below for each 12-month period following the reporting dates. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

(In millions of won)

		Equity		Profit or loss

(f) Capital Management

Management's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Liabilities to equity ratio, net borrowings to equity ratio and other financial ratios are used by management to achieve an optimal capital structure. Management also monitors the level of dividends to ordinary shareholders. Equity, defined by K-IFRS, is identical to the definition of capital, managed by management.

17. ContingenciesPatent infringement lawsuit against Chi Mei Optoelectronics Corp., and others

In 2006, the Company filed a complaint in the United States District Court for the District of Delaware against Chimei Innolux Corp. (formerly, Chi Mei Optoelectronics Corp.) and AU Optronics Corp. claiming infringement of patents related to liquid crystal displays and the manufacturing processes for TFT-LCDs. Both AU Optronics Corp. and Chimei Innolux Corp. filed counter-claims against the Company claiming the Company's infringement of their patents. The Court bifurcated the Company's trial against AU Optronics Corp., from the trial against Chimei Innolux Corp., holding the first trial against AU Optronics Corp. on June 2, 2009. In September 2011, the Company and AU Optronics Corp. filed a stipulation for dismissal of the Delaware case and amicably settled the claims and counterclaims between the two parties. The stay of the Chi Mei Optoelectronics case was lifted on January 31, 2012, and the parties filed a joint status report with the court on March 23, 2012. The Company is unable to predict the ultimate outcome of the Chimei Innolux case.

Anvik Corporation's lawsuit for infringement of patent

In 2007, Anvik Corporation filed a patent infringement case against the Company, along with other LCD manufacturing companies in the United States District Court for the Southern District of New York, in connection with the usage of photo-masking equipment manufactured by Nikon Corporation. The court granted Nikon Corporation's motion for summary judgment of invalidity of the patents-in-suit and entered a judgment in favor of Nikon Corporation, the Company and LG Display America and other TFT-LCD manufacturing companies, dismissing the case on April 5, 2012. On April 6, 2012, Anvik Corporation appealed the court's decision to the United States Court of Appeals for the Federal Circuit. The Company is unable to predict the ultimate outcome of this case.

Industrial Technology Research Institute of Taiwan, lawsuit for infringement of patent

In 2012, the United States International Trade Commission, or USITC, granted a motion by Industrial Technology Research Institute of Taiwan, or ITRI, to add the Company and LG Display America as additional respondents in a Section 337 investigation pending before the USITC. ITRI is seeking an exclusion order prohibiting the importation of televisions and monitors incorporating the Company's products into the United States for alleged patent infringement. The Company is unable to predict the ultimate outcome of this case.

Table of Contents17. Contingencies, Continued*Anti-trust investigations and litigations*

In December 2006, the Company received notices of investigation by the Korea Fair Trade Commission, the Japan Fair Trade Commission, the U.S. Department of Justice, and the European Commission with respect to possible anti-competitive activities in the TFT-LCD industry. The Company subsequently received similar notices from the Canadian Bureau of Competition Policy, the Federal Competition Commission of Mexico, the Secretariat of Economic Law of Brazil and the Taiwan Fair Trade Commission.

In November 2008, the Company executed an agreement with the U.S. Department of Justice (DOJ) whereby the Company and its U.S. subsidiary, LG Display America, Inc. (LGDUS), pleaded guilty to a Sherman Antitrust Act violation and agreed to pay a single total fine of USD400 million. In December 2008, the U.S. District Court for the Northern District of California accepted the terms of the plea agreement and entered a judgment against the Company and LGDUS and ordered the payment of USD400 million. The agreement resolved all federal criminal charges against the Company and LGDUS in the United States in connection with this matter.

In December 2010, the European Commission (the EC) issued a decision finding that the Company engaged in anti-competitive activities in the LCD industry in violation of European competition laws and imposed a fine of EUR215 million. On February 23, 2011, the Company filed with the European Union General Court an application for partial annulment and reduction of the fine imposed by the EC. The European Union General Court has not ruled on the Company's application. In November 2011, the Company received an additional Request for Information from the EC relating to the alleged anti-competitive activities in the LCD industry and is responding to the request.

In November 2009, the Taiwan Fair Trade Commission terminated its investigation without any finding of violations or levying of fines. Also, in February 2012, the Competition Bureau of Canada terminated its investigation against the Company without any finding of violations or levying of fines. To date April 2012, no decision has been issued by the Japan Fair Trade Commission, and we believe the statutory time period by which the Commission was required to have issued a decision has already lapsed. To date April 2012, investigations by the Federal Competition Commission of Mexico and the Secretariat of Economic Law of Brazil are ongoing.

In August 2011, the Korea Fair Trade Commission issued an Examination Report finding that the Company engaged in anti-competitive activities in violation of Korean fair trade laws and a hearing was held in October 2011. In December 2011, the Korea Fair Trade Commission imposed a fine on the Company and certain of its subsidiaries of approximately W31,378 million, and the Company filed an appeal of the decision with the Seoul Appellate Court in December 2011. To date April 2012, the Seoul High Court has not ruled on the Company's appeal.

Subsequent to the commencement of the DOJ investigation, a number of class action complaints were filed against the Company and other TFT-LCD panel manufacturers in the U.S. and Canada alleging violation of respective antitrust laws and related laws. The class action lawsuits in the U.S. were transferred to the Northern District of California for pretrial proceedings (MDL Proceedings). In March 2010, the court certified the class action complaints filed by direct purchasers and indirect purchasers. 78 entities (including groups of affiliated entities) submitted requests for exclusion from the direct purchaser class. The time period for submitting requests for exclusion from the indirect purchaser class expired on April 13, 2012. 10 entities (including groups and affiliated entities) submitted requests for exclusion from the indirect purchaser class. In addition, since 2010, the attorneys general of Arkansas, California, Florida, Illinois, Michigan, Mississippi, Missouri, New York, Oklahoma, Oregon, South Carolina, Washington, West Virginia and Wisconsin filed complaints against the Company, alleging similar antitrust violations as alleged in the MDL Proceedings. In June 2011, the Company reached a settlement with the direct purchaser class, which the federal district court approved in December 2011.

Similar claims were filed separately by ATS. Claim, LLC, (assignee of Ricoh Electronics, Inc.), AT&T Corp. and its affiliates, Motorola, Inc., Electrograph Technologies Corp. and their respective related entities, all of which have been transferred to the MDL Proceedings. In November 2010, ATS Claim, LLC dismissed its action as to the Company pursuant to a settlement agreement. In addition, in 2010, Trac Fone Wireless Inc., Best Buy Co., Inc. and its affiliates, Target Corp., Sears, Roebuck and Co., Kmart Corp., Old Comp Inc., Good Guys, Inc., RadioShack Corp., Newegg Inc., Costco Wholesale Corp., Sony Electronics, Inc. and its affiliates, SB Liquidation Trust, and the trustee of the Circuit City Stores, Inc. Liquidation Trust, filed claims in the United States. In addition, in 2011, Office Depot, Inc., T-Mobile U.S.A., Inc., Interbond Corp. of America (Brandsmart), Jaco Electronics, Inc., P.C. Richard & Son Long Island Corp., MARTA Cooperative of America, Inc., ABC Appliance (ABC Warehouse), Schultze Agency Services, LLC (Tweeter), Tech Data Corp. and its affiliate, AASI Creditor Liquidating Trust for All American Semiconductor Inc., and CompuCom Systems, Inc. filed similar claims. In 2012, ViewSonic Corp., NECO Alliance LLC, and Rockwell Automation Inc. filed similar claims. To the extent these claims were not filed in the MDL Proceedings, they have been transferred or are expected to be transferred to the MDL Proceedings for pretrial proceedings.

In Canada, the Ontario Superior Court of Justice certified the class action complaints filed by the direct and indirect purchasers in May 2011. The Company is pursuing an appeal of the decision as well as defending the on-going class actions in Quebec and British Columbia.

While the Company continues its vigorous defense of the various pending proceedings described above, there is a possibility that one or more proceedings may result in an unfavorable outcome to the Company. The Company has established provisions with respect to certain of the contingencies. However, actual liability may be materially different from the provisions estimated by the Company. For certain cases described above, management is not able to estimate the potential estimated loss if the final outcome of the cases is unfavorable to the Company as the cases are in early stage and management does not have sufficient information to estimate the amount of possible loss.

Table of Contents18. Capital and Reserves

(a) Share capital

The Company is authorized to issue 500,000,000 shares of capital stock (par value (Won)5,000), and as of March 31, 2012 and December 31, 2011, the number of issued common shares is 357,815,700. There have been no changes in the capital stock for the three-month period ended March 31, 2012.
