CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1 Basis of Presentation and Summary of Significant Accounting Policies

Waters Corporation ("Waters" or the "Company") is an analytical instrument manufacturer that primarily designs, manufactures, sells and services, through its Waters Division, high performance liquid chromatography ("HPLC"), ultra performance liquid chromatography ("UPLC") and together with HPLC, referred to as "LC") and mass spectrometry ("MS") technology systems and support products, including chromatography columns, other consumable products and comprehensive post-warranty service plans. These systems are complementary products that are frequently employed together ("LC-MS") and sold as integrated instrument systems using a common software platform. LC is a standard technique and is utilized in a broad range of industries to detect, identify, monitor and measure the chemical, physical and biological composition of materials, and to purify a full range of compounds. MS instruments are used in drug discovery and development, including clinical trial testing, the analysis of proteins in disease processes (known as "proteomics"), nutritional safety analysis and environmental testing. LC-MS instruments combine a liquid phase sample introduction and separation system with mass spectrometric compound identification and quantification. Through its TA Division ("TA"), the Company primarily designs, manufactures, sells and services thermal analysis, rheometry and calorimetry instruments, which are used in predicting the suitability of fine chemicals, pharmaceuticals, water, polymers and viscous liquids for various industrial, consumer goods and healthcare products, as well as for life science research. The Company is also a developer and supplier of software-based products that interface with the Company's instruments, as well as other manufacturers' instruments, and are typically purchased by customers as part of the instrument system.

The Company's interim fiscal quarter typically ends on the thirteenth Saturday of each quarter. Since the Company's fiscal year end is December 31, the first and fourth fiscal quarters may not consist of thirteen complete weeks. The Company's second fiscal quarters for 2014 and 2013 ended on June 28, 2014 and June 29, 2013, respectively.

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with the instructions to the Quarterly Report on Form 10-Q and do not include all of the information and note disclosures required by generally accepted accounting principles ("GAAP") in the United States of America. The consolidated financial statements include the accounts of the Company and its subsidiaries, most of which are wholly owned. All material inter-company balances and transactions have been eliminated.

The preparation of consolidated financial statements in conformity with GAAP requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent liabilities at the dates of the financial statements. Actual amounts may differ from these estimates under different assumptions or conditions.

It is management's opinion that the accompanying interim consolidated financial statements reflect all adjustments (which are normal and recurring) that are necessary for a fair statement of the results for the interim periods. The interim consolidated financial statements should be read in conjunction with the consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the U.S. Securities and Exchange Commission on February 27, 2014.

Cash, Cash Equivalents and Investments

Cash equivalents represent highly liquid investments, with original maturities of 90 days or less, while investments with longer maturities are classified as investments. The Company maintains cash balances in various operating accounts in excess of federally insured limits, and in foreign subsidiary accounts in currencies other than U.S. dollars. As of June 28, 2014 and December 31, 2013, \$1,876 million out of \$1,918 million and \$1,738 million out of \$1,804 million, respectively, of the Company's total cash, cash equivalents and investments were held by foreign subsidiaries and may be subject to material tax effects on distribution to U.S. legal entities.

Property, Plant and Equipment

During the three and six months ended June 28, 2014, the Company recorded a \$4 million impairment charge related to a write-down in the fair value of a building in the U.K. The building is currently classified as held-for-sale and recorded in other current assets in the consolidated balance sheet as of June 28, 2014 at a fair value of \$5 million, which was determined based on a real estate market analysis.

Table of Contents**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited) (Continued)***Fair Value Measurements*

In accordance with the accounting standards for fair value measurements and disclosures, certain of the Company's assets and liabilities are measured at fair value on a recurring basis as of June 28, 2014 and December 31, 2013. Fair values determined by Level 1 inputs utilize observable data, such as quoted prices in active markets. Fair values determined by Level 2 inputs utilize data points other than quoted prices in active markets that are observable either directly or indirectly. Fair values determined by Level 3 inputs utilize unobservable data points for which there is little or no market data, which require the reporting entity to develop its own assumptions.

The following table represents the Company's assets and liabilities measured at fair value on a recurring basis at June 28, 2014 (in thousands):

	Total at June 28, 2014	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Table of Contents**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited) (Continued)**

The following table represents the Company's assets and liabilities measured at fair value on a recurring basis at December 31, 2013 (in thousands):

	Total at December 31, 2013	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
U.S. Treasury securities	\$ 556,539	\$	\$ 556,539	\$
Foreign government securities	139,670		139,670	
Corporate debt securities	629,434		629,434

Liabilities:				
Foreign currency exchange contract agreements	\$ 88	\$	\$ 88	\$
Total	\$ 88	\$	\$ 88	\$

The fair values of the Company's cash equivalents, investments, 401(k) restoration plan assets and foreign currency exchange contracts are determined through market and observable sources and have been classified as Level 2. These assets and liabilities have been initially valued at the transaction price and subsequently valued, typically utilizing third-party pricing services. The pricing services use many inputs to determine value, including reportable trades, benchmark yields, credit spreads, broker/dealer quotes, current spot rates and other industry and economic events. The Company validates the prices provided by third-party pricing services by reviewing their pricing methods and obtaining market values from other pricing sources. After completing these validation procedures, the Company did not adjust or override any fair value measurements provided by third-party pricing services as of June 28, 2014 and December 31, 2013.

Fair Value of Other Financial Instruments

The Company's cash, accounts receivable, accounts payable and variable interest rate debt are recorded at cost, which approximates fair value. The carrying value of the Company's fixed interest rate debt was \$400 million at both June 28, 2014 and December 31, 2013. The fair value of the Company's fixed interest rate debt was estimated using discounted cash flow models, based on estimated current rates offered for similar debt under current market conditions for the Company. The fair value of the Company's fixed interest rate debt was estimated to be \$406 million and \$398 million at June 28, 2014 and December 31, 2013, respectively, using Level 2 inputs.

Derivative Transactions

The Company enters into forward foreign exchange contracts to manage exposures to foreign currency by hedging the impact of currency fluctuations on certain inter-company balances and short-term assets and liabilities. Principal hedged currencies include the Euro, Japanese yen, British pound and Brazilian real. At June 28, 2014 and December 31, 2013, the Company held forward foreign exchange contracts with notional amounts totaling \$107 million and \$104 million, respectively.

Table of Contents**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited) (Continued)**

The Company's foreign currency exchange contracts included in the consolidated balance sheets are classified as follows (in thousands):

	June 28, 2014	December 31, 2013
Other current assets	\$ 64	\$ 929
Other current liabilities	\$ 180	\$ 88

The following is a summary of the activity in the statements of operations related to the forward foreign exchange contracts (in thousands):

Stockholders' Equity

In May 2014, the Company's Board of Directors authorized the Company to repurchase up to \$750 million of its outstanding common stock over a three-year period. In May 2014, the Company's Board of Directors also authorized the extension of the May 2012 program until May 2015, permitting the repurchase of the remaining \$221 million under that program. During the six months ended June 28, 2014 and June 29, 2013, the Company repurchased 1.7 million and 1.8 million shares of the Company's outstanding common stock at a cost of \$178 million and \$165 million, respectively, under the May 2012 authorization. As of June 28, 2014, the Company repurchased an aggregate of 6.0 million shares at a cost of \$580 million under the May 2012 repurchase program, leaving a total of \$920 million authorized for future repurchases. In addition, the Company repurchased \$7 million and \$6 million of common stock related to the vesting of restricted stock units during the six months ended June 28, 2014 and June 29, 2013, respectively.

Product Warranty Costs

The Company accrues estimated product warranty costs at the time of sale, which are included in cost of sales in the consolidated statements of operations. While the Company engages in extensive product quality programs and processes, including actively monitoring and evaluating the quality of its component suppliers, the Company's warranty obligation is affected by product failure rates, material usage and service delivery costs incurred in correcting a product failure. The amount of the accrued warranty liability is based on historical information, such as past experience, product failure rates, number of units repaired and estimated costs of material and labor. The liability is reviewed for reasonableness at least quarterly.

The following is a summary of the activity of the Company's accrued warranty liability for the six months ended June 28, 2014 and June 29, 2013 (in thousands):

	Balance at Beginning of Period	Accruals for Warranties	Settlements Made	Balance at End of Period

4 Acquisitions

The Company accounts for business acquisitions under the accounting standards for business combinations and the results of each acquisition have been included in the Company's consolidated results from the respective acquisition dates.

In January 2014, the Company acquired all of the outstanding stock of ULSP B.V. (ULSP), a manufacturer of instrumentation componentry that enable ultra low temperature generation, for approximately \$4 million in cash. ULSP's core business is the manufacturing and servicing of high quality low temperature coolers for thermal analysis and rheology applications. ULSP was acquired to bring the manufacturing of these devices in-house and to expand the Company's product offering. The purchase price of the acquisition was allocated to tangible and intangible assets and assumed liabilities based on their estimated fair values. The Company has allocated \$1 million of the purchase price to an intangible asset comprised of technology, which will be amortized over ten years. The remaining purchase price of \$3 million has been accounted for as goodwill. The goodwill is not deductible for tax purposes.

The principal factor that resulted in recognition of goodwill in the acquisition of ULSP is that the purchase price was based, in part, on cash flow projections assuming the integration of any acquired technology, distribution channels and products with the Company's products, which is of considerably greater value than utilizing each of the acquired companies' technology, customer access or products on a stand-alone basis. The goodwill also includes value assigned to assembled workforce, which cannot be recognized as an intangible asset.

In this acquisition, the sellers provided the Company with customary representations, warranties and indemnification, which would be settled in the future if and when a breach of the contractual representation or warranty condition occurs. The impact of the acquisition of ULSP on the Company's revenues and net income since the acquisition date for the six months ended June 28, 2014 was immaterial.

The fair values of the assets and liabilities acquired were determined using various income-approach valuation techniques, which use Level 3 inputs. The following table presents the fair values as of the acquisition date, as determined by the Company, of 100% of the assets and liabilities owned and recorded in connection with the acquisition of ULSP (in thousands):

Accounts receivable and other current assets	\$ 448
Property, plant and equipment	50

In July 2014, the Company acquired the net assets of Medimass Research, Development and Service Kft., a developer of mass spectrometry-related technologies with the potential to be used for a variety of applications, for approximately \$23 million in cash.

Table of Contents**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited) (Continued)****5 Goodwill and Other Intangibles**

The carrying amount of goodwill was \$354 million and \$350 million at June 28, 2014 and December 31, 2013, respectively. During the six months ended June 28, 2014, the Company's acquisitions increased goodwill by \$3 million (Note 4) and the effect of foreign currency translation increased goodwill by \$1 million.

The Company's intangible assets included in the consolidated balance sheets are detailed as follows (in thousands):

	June 28, 2014			December 31, 2013		
	Gross Carrying Amount	Accumulated Amortization	Weighted-Average Amortization Period	Gross Carrying Amount	Accumulated Amortization	Weighted-Average Amortization Period

Total	\$ 580,447	\$ 343,383	8 years	\$ 561,485	\$ 322,373	8 years

During the six months ended June 28, 2014, the Company acquired \$1 million of purchased intangibles as a result of the acquisition of ULSP (Note 4). During the six months ended June 28, 2014, the effect of foreign currency translation decreased the gross carrying value of intangible assets and accumulated amortization for intangible assets by \$4 million and \$2 million, respectively. Amortization expense for intangible assets was \$12 million and \$10 million for the three months ended June 28, 2014 and June 29, 2013, respectively. Amortization expense for intangible assets was \$24 million and \$20 million for the six months ended June 28, 2014 and June 29, 2013, respectively. The increase in purchased intangibles amortization for both the three and six months ended June 28, 2014 is primarily due to acquisitions made in 2013 and 2014. Amortization expense for intangible assets is estimated to be approximately \$49 million per year for each of the next five years. The increase in amortization expense in 2014 and for the next five years is due to amortization associated with acquisitions and capitalized software costs related to the launch of new software product platforms. The net carrying value of the new software platforms were approximately \$113 million as of June 28, 2014 and are being amortized over ten years.

6 Debt

In June 2013, the Company entered into a new credit agreement (the 2013 Credit Agreement) that provides for a \$1.1 billion revolving facility and a \$300 million term loan facility. The revolving facility and term loan facility both mature on June 25, 2018 and require no scheduled prepayments before that date.

The interest rates applicable to the 2013 Credit Agreement are, at the Company's option, equal to either the alternate base rate calculated daily (which is a rate per annum equal to the greatest of (a) the prime rate in effect on such day, (b) the federal funds effective rate in effect on such day plus 1/2% per annum, or (c) the adjusted LIBO rate on such day (or if such day is not a business day, the immediately preceding business day) for a deposit in U.S. dollars with a maturity of one month plus 1% per annum) or the applicable 1, 2, 3 or 6 month adjusted LIBO rate, in each case, plus an interest rate margin based upon the Company's leverage ratio, which can range between 0 to 12.5 basis points for alternate base rate loans and between 75 basis points and 112.5 basis points for adjusted LIBO rate loans. The facility fee on the 2013 Credit Agreement ranges between 12.5 basis points and 25 basis points. The 2013 Credit Agreement requires that the Company comply with an interest coverage ratio test of not less than 3.50:1 as of the end of any fiscal quarter for any period of four consecutive fiscal quarters and a leverage ratio test of not more than 3.50:1 as of the end of any fiscal quarter. In addition, the 2013 Credit Agreement includes negative covenants, affirmative covenants, representations and warranties and events of default that are customary for investment grade credit facilities.

At June 28, 2014, \$125 million of the outstanding portions of the revolving facilities have been classified as short-term liabilities in the consolidated balance sheet due to the fact that the Company expects to utilize this portion of the revolving line of credit to fund its working

capital needs within the next twelve months and can repay and re-

borrow from the facility without penalty. The remaining \$560 million of the outstanding portions of the revolving facilities have been classified as long-term liabilities in the consolidated balance sheet, as no repayments are required prior to the maturity date in 2018 and this portion is not expected to be repaid within the next twelve months.

As of both June 28, 2014 and December 31, 2013, the Company had a total of \$400 million of outstanding senior unsecured notes. Interest on the senior unsecured notes is payable semi-annually each year. The Company may prepay all or some of the senior unsecured notes at any time in an amount not less than 10% of the aggregate principal amount outstanding, plus the applicable make-whole amount. In the event of a change in control (as defined in the note purchase agreement) of the Company, the Company may be required to prepay the senior unsecured notes at a price equal to 100% of the principal amount thereof, plus accrued and unpaid interest. These senior unsecured notes require that the Company comply with an interest coverage ratio test of not less than 3.50:1 for any period of four consecutive fiscal quarters and a leverage ratio test of not more than 3.50:1 as of the end of any fiscal quarter. In addition, these senior unsecured notes include customary negative covenants, affirmative covenants, representations and warranties and events of default.

As of June 28, 2014, the Company was in compliance with all debt covenants.

The Company had the following outstanding debt at June 28, 2014 and December 31, 2013 (in thousands):

	June 28, 2014	December 31, 2013

Total debt	\$ 1,393,403	\$ 1,323,346

As of June 28, 2014 and December 31, 2013, the Company had a total amount available to borrow of \$413 million and \$483 million, respectively, after outstanding letters of credit, under the 2013 Credit Agreement. The weighted-average interest rates applicable to the senior unsecured notes and 2013 Credit Agreement borrowings collectively were 2.08% and 1.94% at June 28, 2014 and December 31, 2013, respectively.

The Company and its foreign subsidiaries also had available short-term lines of credit totaling \$93 million and \$87 million at June 28, 2014 and December 31, 2013, respectively, for the purpose of short-term borrowing and issuance of commercial guarantees. At June 28, 2014 and December 31, 2013, the weighted-average interest rates applicable to these short-term borrowings were 2.05% and 2.00%, respectively.

On June 30, 2014 (fiscal third quarter), the Company issued and sold the following senior unsecured notes:

Edgar Filing: WATERS CORP /DE/ - Form 10-Q

Series G	10 years	3.92%	\$ 50	June 2024
Series H	10 years	Floating Rate*	\$ 50	June 2024

* Series H senior unsecured notes bear interest at 3 month LIBOR for that floating rate interest period plus 1.25%.

Table of Contents**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited) (Continued)**

All of the proceeds from the issuance of the new senior unsecured notes were used to repay outstanding portions of the revolving facilities. Interest on the Series F and G senior unsecured notes is payable semi-annually each year. Interest on Series H senior unsecured notes is payable quarterly. The Company may prepay all or some of the senior unsecured notes at any time in an amount not less than 10% of the aggregate principal amount outstanding, plus the applicable make-whole amount or prepayment premium for Series H senior unsecured notes. Other provisions for these senior unsecured notes are similar to the existing senior unsecured notes, as described above.

7 Income Taxes

The Company's effective tax rate was 13.9% and 14.7% for the three months ended June 28, 2014 and June 29, 2013, respectively. The Company's effective tax rate was 14.4% for the six months ended June 28, 2014 and a tax benefit of 1.1% for the six months ended June 29, 2013. The income tax provision for the six months ended June 29, 2013 included a \$31 million tax benefit related to the completion of tax audit examinations. In addition, the research and development tax credit (R&D Tax Credit) was retroactively extended in January 2013 for the 2012 and 2013 tax years. The entire \$3 million benefit related to the 2012 tax year was recorded in the first quarter of 2013, and the 2013 benefit was included in the 2013 annual effective tax rate. This R&D Tax Credit expired at the end of 2013 and is not applicable for 2014. The net income tax benefits related to the completed tax audit examinations and the 2012 R&D Tax Credit decreased the Company's effective tax rate by 16.4 percentage points in the six months ended June 29, 2013. The remaining differences between the quarter and year-to-date effective tax rates for 2014 and 2013 were primarily attributable to differences in the proportionate amounts of pre-tax income recognized in jurisdictions with different effective tax rates.

The Company accounts for its uncertain tax return reporting positions in accordance with the accounting standards for income taxes, which require financial statement reporting of the expected future tax consequences of uncertain tax reporting positions on the presumption that all concerned tax authorities possess full knowledge of those reporting positions, as well as all of the pertinent facts and circumstances, but prohibit any discounting of unrecognized tax benefits associated with those reporting positions for the time value of money.

The following is a summary of the activity of the Company's unrecognized tax benefits for the six months ended June 28, 2014 and June 29, 2013 (in thousands):

	June 28, 2014	June 29, 2013
Balance at the beginning of the period	\$ 24,716	\$ 64,390
Changes resulting from completion of tax examinations		(35,279)
Other changes in uncertain tax benefits	(1,952)	(1,670)
Balance at the end of the period	\$ 22,764	\$ 27,441

With limited exceptions, the Company is no longer subject to examinations in significant jurisdictions for the years ended on or before December 31, 2009. However, carryforward attributes that were generated in years beginning on or before January 1, 2010 may still be adjusted upon examination by tax authorities if the attributes are utilized. The Company continuously monitors the lapsing of statutes of limitations on potential tax assessments for related changes in the measurement of unrecognized tax benefits, related net interest and penalties, and deferred tax assets and liabilities.

During the six months ended June 29, 2013, the Company recorded a \$31 million reduction in the measurement of its unrecognized tax benefits due to the completion of certain tax audit examinations, which reduced the provision for income taxes and increased net income for the six months ended June 29, 2013 by \$31 million. As of June 28, 2014, the Company expects to record additional reductions in the measurement of its unrecognized tax benefits and related net interest and penalties of approximately \$6 million within the next twelve months due to the lapsing of statutes of limitations on potential tax assessments. The Company does not expect to record any other material reductions in the measurement of its unrecognized tax benefits within the next twelve months.

Table of Contents**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited) (Continued)****8 Stock-Based Compensation**

The Company maintains various shareholder-approved, stock-based compensation plans which allow for the issuance of incentive or non-qualified stock options, stock appreciation rights, restricted stock or other types of awards (e.g. restricted stock units).

The Company accounts for stock-based compensation costs in accordance with the accounting standards for stock-based compensation, which require that all share-based payments to employees be recognized in the statements of operations based on their fair values. The Company recognizes the expense using the straight-line attribution method. The stock-based compensation expense recognized in the consolidated statements of operations is based on awards that ultimately are expected to vest; therefore, the amount of expense has been reduced for estimated forfeitures. The stock-based compensation accounting standards require forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based on historical experience. If actual results differ significantly from these estimates, stock-based compensation expense and the Company's results of operations could be materially impacted. In addition, if the Company employs different assumptions in the application of these standards, the compensation expense that the Company records in the future periods may differ significantly from what the Company has recorded in the current period.

The consolidated statements of operations for the three and six months ended June 28, 2014 and June 29, 2013 include the following stock-based compensation expense related to stock option awards, restricted stock, restricted stock unit awards and the employee stock purchase plan (in thousands):

	Three Months Ended		Six Months Ended	
	June 28, 2014	June 29, 2013	June 28, 2014	June 29, 2013

Total stock-based compensation	\$ 8,224	\$ 7,876	\$ 16,353	\$ 15,307

Stock Options

In determining the fair value of the stock options, the Company makes a variety of assumptions and estimates, including volatility measures, expected yields and expected stock option lives. The fair value of each option grant was estimated on the date of grant using the Black-Scholes option pricing model. The Company uses implied volatility on its publicly-traded options as the basis for its estimate of expected volatility. The Company believes that implied volatility is the most appropriate indicator of expected volatility because it is generally reflective of historical volatility and expectations of how future volatility will differ from historical volatility. The expected life assumption for grants is based on historical experience for the population of non-qualified stock optionees. The risk-free interest rate is the yield currently available on U.S. Treasury zero-coupon issues with a remaining term approximating the expected term used as the input to the Black-Scholes model. The relevant data used to determine the value of the stock options granted during the six months ended June 28, 2014 and June 29, 2013 are as follows:

During fiscal year 2014, the Company expects to contribute a total of approximately \$29 million to \$31 million to the Company's defined benefit plans.

11 Business Segment Information

The Company's business activities, for which discrete financial information is available, are regularly reviewed and evaluated by the chief operating decision maker. As a result of this evaluation, the Company determined that it has two operating segments: Waters Division and TA Division.

Waters Division is primarily in the business of designing, manufacturing, distributing and servicing LC and MS instruments, columns and other chemistry consumables that can be integrated and used along with other analytical instruments. TA Division is primarily in the business of designing, manufacturing, distributing and servicing thermal analysis, rheometry and calorimetry instruments. The Company's two divisions are its operating segments and each has similar economic characteristics; product processes; products and services; types and classes of customers; methods of distribution and regulatory environments. Because of these similarities, the two segments have been aggregated into one reporting segment for financial statement purposes. Please refer to the consolidated financial statements for financial information regarding the one reportable segment of the Company.

12 Recent Accounting Standard Changes and Developments

Recently Adopted Accounting Standards

In July 2013, amended accounting guidance was issued regarding the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss or a tax credit carryforward exists. The adoption of this standard on January 1, 2014 did not have a material effect on the Company's financial position, results of operations or cash flows.

Recently Issued Accounting Standards

In May 2014, amended accounting guidance was issued regarding the recognition of revenue from contracts with customers. The objective of this guidance is to significantly enhance comparability and clarify principles of revenue recognition practices across entities, industries, jurisdictions and capital markets. This guidance is effective for annual and interim reporting periods beginning after December 15, 2016. Early adoption is not permitted. The Company is currently evaluating the potential impact that the adoption of this standard will have on the Company's financial position, results of operations or cash flows.

Table of Contents**Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations**
Business and Financial Overview

The Company has two operating segments: the Waters Division and the TA Division (TA). The Waters Division's products and services primarily consist of high performance liquid chromatography (HPLC), ultra performance liquid chromatography (UPLC) and together with HPLC, referred to as LC), mass spectrometry (MS) and chemistry consumable products and related services. TA products and services primarily consist of thermal analysis, rheometry and calorimetry instrument systems and service sales. The Company's products are used by pharmaceutical, life science, biochemical, industrial, nutritional safety, environmental, academic and governmental customers. These customers use the Company's products to detect, identify, monitor and measure the chemical, physical and biological composition of materials and to predict the suitability of fine chemicals, pharmaceuticals, water, polymers and viscous liquids in various industrial, consumer goods and healthcare products.

The Company's operating results for the three and six months ended June 28, 2014 and June 29, 2013 are as follows (in thousands):

Sales for the second quarter increased 7% as compared to the second quarter of 2013, with instrument system sales growing 6% and recurring revenues (combined sales of services and chemistry consumables) growing 8%. The sales growth experienced in the quarter was a result of higher LC and TA instrument system sales and higher service sales. Year-to-date, sales increased 4% as compared with the first half of 2013. Recurring revenues increased 6% year-to-date, while instrument system sales increased 1% year-to-date. Foreign currency translation benefited both the quarter and year-to-date sales by 1% across all products and services. Recent acquisitions added approximately 1% to the sales growth for both the quarter and year-to-date.

Sales to pharmaceutical customers increased 9% and 5% for the quarter and year-to-date, respectively, with positive sales growth in all regions except China. Combined sales to industrial chemical, nutritional safety and environmental customers increased 8% and 3% for the quarter and year-to-date, respectively, with positive sales growth for all regions in the quarter, except China. Combined sales to industrial chemical, nutritional safety and environmental

Table of Contents

customers increased year-to-date in the U.S., Europe and China but decreased in other regions. Combined global sales to governmental and academic customers decreased 2% and 5% for the quarter and year-to-date, respectively, as declines in Europe and Asia were partially offset by increases in the U.S. and the rest of the world.

The decline in gross profit as a percentage of sales for the quarter and year-to-date was primarily a result of the effects of unfavorable foreign currency translation. Selling and administrative expenses increased 7% for both the quarter and year-to-date. Selling and administrative expenses included a \$4 million impairment charge recorded in the second quarter of 2014 related to a write-down in the fair value of a building held for sale in the U.K. Year-to-date, selling and administrative expenses also included \$6 million of severance-related costs incurred in the first quarter of 2014 in connection with a reduction in workforce.

Net income per diluted share in the quarter and year-to-date benefited from an increase in sales and fewer shares outstanding due to additional share repurchases; however, these benefits were offset by an increase in selling and administrative expenses. In addition, net income per diluted share benefited \$0.39 in 2013 as a result of income tax benefits discussed below in *Provision for Income Taxes* under Results of Operations. Foreign currency translation decreased net income per diluted share by approximately \$0.01 for the quarter and approximately \$0.10 year-to-date.

Year-to-date, net cash provided by operating activities was \$222 million and \$237 million in 2014 and 2013, respectively. The \$15 million decrease was primarily a result of the decrease in net income, as well as the timing of payments to vendors and the collection of receivables from customers. In addition, the Company made one-time contributions totaling \$21 million to certain Non-U.S. pension plans during 2014.

Within cash flows used in investing activities, capital expenditures related to property, plant, equipment and software capitalization were \$44 million and \$61 million year-to-date for 2014 and 2013, respectively. The capital expenditures for 2013 included \$23 million of construction costs associated with the recently completed research, manufacturing and distribution facility in Wilmslow, England. In addition, the Company acquired ULSP B.V. in January 2014 for approximately \$4 million in cash. In July 2014, the Company acquired the net assets of Medimass Research, Development and Service Kft., a developer of mass spectrometry-related technologies with the potential to be used for a variety of applications, for approximately \$23 million in cash.

Within cash flows used in financing activities, the Company received \$41 million and \$19 million of proceeds from stock plans year-to-date for 2014 and 2013, respectively. Fluctuations in these amounts were primarily attributable to changes in the Company's stock price and the expiration of stock option grants. In May 2014, the Company's Board of Directors authorized the Company to repurchase up to \$750 million of its outstanding common stock over a three-year period. In May 2014, the Company's Board of Directors also authorized the extension of the May 2012 program until May 2015, permitting the repurchase of the remaining \$221 million under that program. Year-to-date, the Company repurchased \$178 million and \$165 million of the Company's outstanding common stock in 2014 and 2013, respectively, under the May 2012 authorization. On June 30, 2014 (fiscal third quarter), the Company issued and sold senior unsecured notes with an aggregate principal amount of \$200 million. The proceeds from the issuance of these senior unsecured notes were used to repay existing debt and for general corporate purposes.

Total net sales	\$ 481,801	\$ 451,115	7%	\$ 912,309	\$ 881,453	4%

The increase in sales in the U.S. for the quarter and year-to-date was broad-based across all product and customer classes. The increase in Europe's sales for both the quarter and year-to-date was primarily due to foreign exchange translation, which added 5% to sales growth in both the quarter and year-to-date. China's sales decline can be attributed primarily to lower research-focused, higher priced instrument sales to governmentally funded customers. Japan's sales were negatively impacted by foreign currency translation, which decreased sales by 4% and 7% for the quarter and year-to-date, respectively. The increase in sales in both the quarter and year-to-date in the rest of Asia was broad-based across all product and customer classes.

Waters Division Net Sales

Net sales for the Waters Division's products and services are as follows for the three and six months ended June 28, 2014 and June 29, 2013 (in thousands):

Total Waters Division net sales	\$ 811,445	100%	\$ 783,603	100%	4%

Waters instrument system sales (LC and MS) increased in the quarter and year-to-date, primarily due to stronger demand for instrument systems from pharmaceutical, industrial chemical, nutritional safety and environmental customers. The increase in recurring revenues for both the quarter and year-to-date primarily resulted from a combination of a higher utilization rate of installed instrument systems and a higher base of installed instruments. The effect of foreign currency translation and acquisitions had a minimal impact on sales for the Waters Division.

Table of Contents

Waters Division sales increased 9% and 4% in the U.S. for the quarter and year-to-date, respectively. Europe sales increased 7% and 6% for the quarter and year-to-date, respectively, primarily due to the favorable effect of foreign currency translation. Total Asia sales increased 3% and 2% for the quarter and year-to-date, respectively, with sales in China decreasing 12% and 4%, respectively. The decrease in sales in China can be attributed primarily to lower spending by governmentally funded customers. Sales in the rest of the world increased 10% for the quarter but decreased 3% year-to-date.

TA Division Net Sales

Net sales for the TA Division's products and services are as follows for the three and six months ended June 28, 2014 and June 29, 2013 (in thousands):

	Three Months Ended				
	June 28, 2014	% of Total	June 29, 2013	% of Total	% change

Total TA Division net sales	\$ 100,864	100%	\$ 97,850	100%	3%

TA instrument system sales increased 9% in the quarter due to stronger customer demand. TA service sales increased for both the quarter and year-to-date due to sales of service plans and billings to a higher installed base of customers. TA had double-digit sales growth in the U.S. and Europe for both the quarter and year-to-date. For the quarter, TA's sales increased 1% and 7% in China and Japan, respectively, but decreased in the rest of Asia and the rest of the world. Year-to-date, TA experienced sales declines in all of Asia and the rest of the world. The effect of foreign currency translation increased TA's total sales by 1% for the quarter and had a minimal impact on TA's sales year-to-date. Recent acquisitions added 7% and 4% to sales growth for the quarter and year-to-date, respectively.

Gross Profit

Gross profit increased 7% and 1% for the quarter and year-to-date, respectively, as the increase in the second quarter sales volume was partially offset by the unfavorable effect of foreign currency translation. Year-to-date, the unfavorable effect of foreign currency translation primarily resulted from the movements in the British pound and Japanese yen. Gross profit as a percentage of sales was also impacted by these factors.

Gross profit as a percentage of sales is affected by many factors, including, but not limited to, foreign currency translation, product mix, price, product costs of instrument systems and amortization of software platforms. The Company expects that the impact of foreign currency translation will marginally negatively affect gross profit for the remainder of 2014, based on current exchange rates.

Selling and Administrative Expenses

Selling and administrative expenses increased 7% for both the quarter and year-to-date. Selling and administrative expenses included a \$4 million impairment charge recorded in the second quarter of 2014 related to a write-down in the fair value of a building held for sale in the U.K. Year-to-date, selling and administrative expenses also included \$6 million of severance-related costs incurred in the first quarter of 2014 in connection with a reduction in workforce. As a percentage of net sales, selling and administrative expenses were 27.4% and 28.3% for the 2014 quarter and year-to-date, respectively, and 27.3% and 27.4% for the 2013 quarter and year-to-date, respectively.

Table of Contents*Research and Development Expenses*

Research and development expenses increased 9% and 4% for the quarter and year-to-date, respectively, primarily as a result of increased spending on new products.

Other Expense

The Company recorded a \$2 million charge in the second quarter of 2013 for an other-than-temporary impairment to an investment.

Provision for Income Taxes

The four principal jurisdictions in which the Company manufactures are the U.S., Ireland, the United Kingdom and Singapore, where the marginal effective tax rates were approximately 37.5%, 12.5%, 21.5% and 0%, respectively, as of June 28, 2014. The Company has a contractual tax rate in Singapore of 0% through March 2016, based upon achievement of contractual milestones that the Company expects to continue to meet. The current statutory tax rate in Singapore is 17%. The Company's effective tax rate is influenced by many significant factors, including, but not limited to, the wide range of income tax rates in jurisdictions in which the Company operates; sales volumes and profit levels in each tax jurisdiction; changes in tax laws, tax rates and policies; the outcome of various ongoing tax audit examinations; and the impact of foreign currency transactions and translation. As a result of variability in these factors, the Company's effective tax rates in the future may not be similar to the effective tax rates for the current or prior year.

The Company's effective tax rate for the quarter was 13.9% and 14.7% for 2014 and 2013, respectively. The Company's effective tax rate year-to-date was 14.4% for 2014 and a tax benefit of 1.1% for 2013. The year-to-date income tax provision for 2013 included a \$31 million tax benefit related to the completion of tax audit examinations. In addition, the research and development tax credit (R&D Tax Credit) was retroactively extended in January 2013 for the 2012 and 2013 tax years. The entire \$3 million benefit related to the 2012 tax year was recorded in the first quarter of 2013, and the 2013 benefit was included in the 2013 annual effective tax rate. This R&D Tax Credit expired at the end of 2013 and is not applicable for 2014. The net income tax benefits related to the completed tax audit examinations and the 2012 R&D Tax Credit decreased the Company's effective tax rate by 16.4 percentage points year-to-date in 2013. The remaining differences between the quarter and year-to-date effective tax rates for 2014 and 2013 were primarily attributable to differences in the proportionate amounts of pre-tax income recognized in jurisdictions with different effective tax rates.

Cash Flow from Operating Activities

Edgar Filing: WATERS CORP /DE/ - Form 10-Q

Net cash provided by operating activities was \$222 million and \$237 million in the six months ended June 28, 2014 and June 29, 2013, respectively. The changes within net cash provided by operating activities in 2014 as compared to 2013 include the following significant changes in the sources and uses of net cash provided by operating activities, aside from the decrease in net income:

The change in accounts receivable in 2014 compared to 2013 was primarily attributable to timing of shipments and payments made by customers. Days-sales-outstanding (DSO) increased to 76 days at June 28, 2014 from 74 days at June 29, 2013.

Table of Contents

The 2014 change in inventory is primarily attributable to lower-than-anticipated instrument system sales volumes in 2014.

The 2014 and 2013 change in accounts payable and other current liabilities was a result of timing of payments to vendors. In addition, 2013 includes a decrease in accrued income taxes due to the resolution of ongoing tax audits.

Net cash provided from deferred revenue and customer advances in both 2014 and 2013 was a result of the higher installed base of customers renewing annual service contracts.

Other changes were attributable to variation in the timing of various provisions, expenditures, prepaid income taxes and accruals in other current assets, other assets and other liabilities. In addition, the Company made one-time contributions totaling \$21 million to certain Non-U.S. pension plans during 2014.

Cash Used in Investing Activities

Year-to-date, net cash used in investing activities totaled \$174 million and \$198 million in 2014 and 2013, respectively. Additions to fixed assets and capitalized software were \$44 million and \$61 million year-to-date in 2014 and 2013, respectively. The capital expenditures for 2013 include \$23 million of construction costs associated with the recently completed research, manufacturing and distribution facility in Wilmslow, England. During 2014 and 2013, the Company purchased \$1,179 million and \$1,564 million of investments year-to-date, while \$1,053 million and \$1,427 million of investments matured, respectively. Business acquisitions, net of cash acquired, were \$4 million year-to-date in 2014. There were no business acquisitions in the first half of 2013. In July 2014, the Company acquired the net assets of Medimass Research, Development and Service Kft., a developer of mass spectrometry-related technologies with the potential to be used for a variety of applications, for approximately \$23 million in cash.

Cash Used in Financing Activities

Year-to-date, the Company's total debt borrowings increased by \$70 million and \$90 million in 2014 and 2013, respectively. As of June 28, 2014, the Company had a total of \$1,393 million in outstanding debt, which consisted of \$400 million in outstanding senior unsecured notes, \$300 million borrowed under the term loan facility under the 2013 Credit Agreement, \$685 million borrowed under revolving credit facility under the 2013 Credit Agreement and \$8 million borrowed under various other short-term lines of credit. At June 28, 2014, \$125 million of the outstanding portions of the revolving facilities have been classified as short-term liabilities in the consolidated balance sheet due to the fact that the Company expects to utilize this portion of the revolving line of credit to fund its working capital needs within the next twelve months and can repay and re-borrow from the facility without penalty. The remaining \$560 million of the outstanding portions of the revolving facilities have been classified as long-term liabilities in the consolidated balance sheet, as no repayments are required prior to the maturity date in 2018 and this portion is not expected to be repaid within the next twelve months. As of June 28, 2014, the Company had a total amount available to borrow under the 2013 Credit Agreement of \$413 million after outstanding letters of credit. On June 30, 2014 (fiscal third quarter), the Company issued and sold senior unsecured notes with an aggregate principal amount of \$200 million. The proceeds from the issuance of these senior unsecured notes were used to repay existing debt and for general corporate purposes.

In May 2014, the Company's Board of Directors authorized the Company to repurchase up to \$750 million of its outstanding common stock over a three-year period. In May 2014, the Company's Board of Directors also authorized the extension of the May 2012 program until May 2015, permitting the repurchase of the remaining \$221 million under that program. During the first six months of 2014 and 2013, the Company repurchased 1.7 million and 1.8 million shares of the Company's outstanding common stock at a cost of \$178 million and \$165 million, respectively, under the May 2012 authorization. As of June 28, 2014, the Company had a total of \$920 million authorized for future repurchases. In addition, the Company repurchased \$7 million and \$6 million of common stock related to the vesting of restricted stock units during 2014 and 2013, respectively.

The Company received \$41 million and \$19 million of proceeds from the exercise of stock options and the purchase of shares pursuant to the Company's employee stock purchase plan in 2014 and 2013, respectively.

Table of Contents

The Company had cash, cash equivalents and investments of \$1,918 million as of June 28, 2014. The majority of the Company's cash, cash equivalents and investments are generated from foreign operations, with \$1,876 million held by foreign subsidiaries at June 28, 2014. Due to the fact that most of the Company's cash, cash equivalents and investments are held outside of the U.S., the Company must manage and maintain sufficient levels of cash flow in the U.S. to fund operations and capital expenditures, service debt interest, finance potential U.S. acquisitions and continue the authorized stock repurchase program in the U.S. These U.S. cash requirements are managed by the Company's cash flow from U.S. operations and the use of the Company's revolving credit facilities.

Management believes, as of the date of this report, that its financial position, particularly in the U.S., along with expected future cash flows from earnings based on historical trends and the ability to raise funds from external sources and the borrowing capacity from existing, committed credit facilities, will be sufficient to service debt and fund working capital and capital spending requirements, authorized share repurchase amounts and potential acquisitions. In addition, there have been no recent significant changes to the Company's financial position, nor are there any anticipated changes, to warrant a material adjustment related to indefinitely reinvested foreign earnings.

Contractual Obligations, Commercial Commitments, Contingent Liabilities and Dividends

A summary of the Company's contractual obligations and commercial commitments is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the U.S. Securities and Exchange Commission (SEC) on February 27, 2014. The Company reviewed its contractual obligations and commercial commitments as of June 28, 2014 and determined that there were no material changes from the information set forth in the Annual Report on Form 10-K.

From time to time, the Company and its subsidiaries are involved in various litigation matters arising in the ordinary course of business. The Company believes that it has meritorious arguments in its current litigation matters and that any outcome, either individually or in the aggregate, will not be material to the Company's financial position or results of operations.

During the six months ended June 28, 2014, the Company contributed \$1 million to the Company's U.S. pension plans. In addition, the Company made one-time contributions totaling \$21 million to certain Non-U.S. pension plans during the six months ended June 28, 2014. During fiscal year 2014, the Company expects to contribute a total of approximately \$29 million to \$31 million to the Company's defined benefit plans.

The Company has not paid any dividends and has no plans, at this time, to pay any dividends in the future.

Critical Accounting Policies and Estimates

In the Company's Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the SEC on February 27, 2014, the Company's most critical accounting policies and estimates upon which its financial status depends were identified as those relating to revenue recognition, loss provisions on accounts receivable and inventory, valuation of long-lived assets, intangible assets and goodwill, warranty, income taxes, pension and other postretirement benefit obligations, litigation and stock-based compensation. The Company reviewed its policies and determined that those policies remain the Company's most critical accounting policies for the six months ended June 28, 2014. The Company did not make any changes in those policies during the six months ended June 28, 2014.

expenses, including interest expense, capitalized software costs and effective tax rates; the impact of foreign currency translation on financial results; the impact and outcome of the Company's various ongoing tax audit examinations; the achievement of contractual milestones to preserve foreign tax rates; the impact and outcome of litigation matters; the impact of the loss of intellectual property protection; the impact of new accounting standards and pronouncements; the adequacy of the Company's supply chain and manufacturing capabilities and facilities; the impact of regulatory compliance; the Company's expected cash flow, borrowing capacity, debt repayment and refinancing; the Company's ability to fund working capital, capital expenditures, service debt, repay outstanding lines of credit, make authorized share repurchases, fund potential acquisitions and pay any adverse litigation or tax audit liabilities, particularly in the U.S.; future impairment charges; the Company's contributions to defined benefit plans; the Company's expectations regarding changes to its financial position; compliance with applicable environmental laws; and the impact of recent acquisitions on sales and earnings.

Many of these statements appear, in particular, under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part I, Item 2 of this Quarterly Report on Form 10-Q. Statements that are not statements of historical fact may be deemed forward-looking statements. You can identify these forward-looking statements by the use of the words "feels", "believes", "anticipates", "plans", "expects", "may", "will", "would", "intends", "suggests", "appears", "estimates", "projects", "should" and similar expressions, whether in the negative. These statements are subject to various risks and uncertainties, many of which are outside the control of the Company, including, and without limitation:

The risks inherent in succession planning, as the Company's chief executive officer has announced his intention to retire by the end of 2015.

Current global economic, sovereign and political conditions and uncertainties, particularly regarding the European debt crisis and the overall stability of the Euro and its suitability as a single currency; the Company's ability to access capital and maintain liquidity in volatile market conditions of customers; changes in timing and demand by the Company's customers and various market sectors, particularly if they should reduce capital expenditures or are unable to obtain funding, as in the cases of governmental, academic and research institutions; the effect of mergers and acquisitions on customer demand; and the Company's ability to sustain and enhance service.

Negative industry trends; introduction of competing products by other companies and loss of market share; pressures on prices from customers or resulting from competition; regulatory, economic and competitive obstacles to new product introductions; lack of acceptance of new products; expansion of our business in developing markets; spending by certain end-markets; and ability to obtain alternative sources for components and modules.

Foreign exchange rate fluctuations that could adversely affect translation of the Company's future sales, financial operating results and the condition of its non-U.S. operations, especially when a currency weakens against the U.S. dollar.

Increased regulatory burdens as the Company's business evolves, especially with respect to the Food and Drug Administration and Environmental Protection Agency, among others, as well as regulatory, environmental and logistical obstacles affecting the distribution of the Company's products, completion of purchase order documentation by our customers and ability of customers to obtain letters of credit or other financing alternatives.

Risks associated with lawsuits, particularly involving claims for infringement of patents and other intellectual property rights.

The impact and costs incurred from changes in accounting principles and practices or tax rates; shifts in taxable income in jurisdictions with different effective tax rates; and the outcome of and costs associated with ongoing and future tax audit examinations or changes in respective country legislation affecting the Company's effective rates.

Certain of these and other factors are discussed under the heading "Risk Factors" under Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the SEC on February 27, 2014. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements, whether because of these factors or for other reasons. All

Item 3: *Quantitative and Qualitative Disclosures About Market Risk*

There have been no material changes in the Company's market risk during the six months ended June 28, 2014. For information regarding the Company's market risk, refer to Item 7A of Part II of the Company's Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the SEC on February 27, 2014.

Item 4: *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

The Company's chief executive officer and chief financial officer (principal executive and principal financial officer), with the participation of management, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, the Company's chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures were effective as of June 28, 2014 (1) to ensure that information required to be disclosed by the Company, including its consolidated subsidiaries, in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its chief executive officer and chief financial officer, to allow timely decisions regarding the required disclosure and (2) to provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Controls Over Financial Reporting

No change was identified in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended June 28, 2014 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II: *Other Information*

Item 1: *Legal Proceedings*

There have been no material changes in the Company's legal proceedings during the six months ended June 28, 2014 as described in Item 3 of Part I of the Company's Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the SEC on February 27, 2014.

Item 1A: *Risk Factors*

Information regarding risk factors of the Company is set forth under the heading "Risk Factors" under Part I, Item 1A in the Company's Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the SEC on February 27, 2014. The Company reviewed its risk factors as of June 28, 2014 and determined that there were no material changes from the ones set forth in the Form 10-K. Note, however, the discussion under the subheading "Special Note Regarding Forward-Looking Statements" in Part I, Item 2 of this quarterly report on Form 10-Q. These risks are not the only ones facing the Company. Additional risks and uncertainties not currently known to the Company or that the Company currently deems to be immaterial also may materially adversely affect the Company's business, financial condition and operating results.
