D. Major Businesses

(1) Wireless business

The Company provides wireless telecommunications services, characterized by its competitive strengths in handheld devices, affordable pricing, network coverage and an extensive contents library. Since the introduction of services employing LTE technology in July 2011, the telecommunications market for such services has grown as demand for fast data transfer speeds and differentiated services has increased. Having reached one million subscribers by January 2012 and over 10 million subscribers by April 2013, the Company has solidified its leadership position in LTE services as it has done with its 3G services. In June 2013, the Company became the first telecommunications service provider in the world to provide commercial LTE-Advanced (LTE-A) services using carrier aggregation technology, and in June 2014, the Company reaffirmed the Company s technological leadership by becoming the first to provide commercial 225 Mbps wideband LTE-A services, which is three times faster than LTE. In December 2014, the Company launched tri-band LTE-A, which is four times faster than LTE. The Company also launched unlimited LTE data plans and other innovative data plans such as Rush hour / Subway Free plans that are unlimited data plans based on time, place and occasion (or, TPO), reflecting the data pattern usage of customers and their lifestyles. The Company also launched new customer-focused products in 2014 such as the T-Phone, T-outdoor and T Kids Phone -Joon. The Company plans to increase its profitability by strengthening its retention strategy in the era of data-intensive services by leveraging its competitive advantages.

In the business-to-business (B2B) area, the Company is strengthening its solutions business through the implementation of five main solution products: Smart Store, Smart Work, Smart Cloud, Green & Safety and M Ad & Payment. Since the commercial launch of its mobile IPTV services, B tv Mobile, in October 2012, the Company has gained over one million paying subscribers as of March 2014. The Company is the first telecommunications services provider in the world to provide full high definition streaming services using its LTE-A network. In 2014, the number of its mobile IPTV service subscribers increased by 1.56 million to reach 2.37 million subscribers by the end of the year. In the area of healthcare, the Company achieved the following milestones during 2014: point-of-care diagnostic devices manufactured by a company of which the Company is the largest shareholder received approval from the U.S. Food and Drug Administration, the Company entered the Chinese healthcare market and the Company was the first Korean company to export medical information systems. As with the healthcare business, the Company plans to

continue to find and develop new growth engines in the mid- to long-term. The Company also plans to seek out new growth engines in existing businesses, including the intelligence business, by utilizing its technologies relating to big data.

In addition, in order to strengthen our sales channels, the Company has been offering a variety of fixed-line and wireless telecommunication convergence products to its customers through PS&Marketing Co., Ltd. (PS&Marketing), one of its subsidiaries. Through Service Ace Co., Ltd., another subsidiary, the Company operates customer service centers in Seoul and provides telemarketing services. Furthermore, Network O&S Co., Ltd., the Company s subsidiary responsible for the operation of the Company s 2G to 4G networks (including its CDMA, WCDMA and LTE networks), provides customers with quality network services and provides the Company with technological know-how in network operations.

4

(2) Fixed-line business

SK Broadband Co., Ltd. (SK Broadband) is engaged in providing telecommunications, broadcasting and new media services and various other services that are permitted to be carried out by SK Broadband under relevant regulations, as well as business activities that are directly or indirectly related to providing those services. In 1999, SK Broadband launched its high-speed Internet service in Seoul, Busan, Incheon and Ulsan, and currently provides such service nationwide. SK Broadband also commercialized its TV-Portal service in July 2006 and its IPTV service in January 2009 upon receipt of permit in September 2008.

(3) Other businesses

With respect to the Company s e-commerce business, 11th Street, a platform service that connects various sellers and purchasers online, continues to gain market share. In the commerce platform business area, the Company, utilizing the existing network of partner businesses of OK Cashbag, Korea s largest loyalty mileage program with 38 million members, consumer information from big data, information technology, and other sources of competitive edges that can lead the industry, launched Syrup to provide smart shopping services to consumers and Syrup Store to provide integrated marketing solutions to partner businesses in June 2014. Syrup, a mobile wallet service upgraded and rebranded from its predecessor service, Smart Wallet, reached 13.3 million users as of December 31, 2014 and leads the online-to-offline commerce. In the location-based services business area, users of the Company s T-Map Navigation service reached 19.5 million as of December 31, 2014. T-Map Navigation provides real time traffic information and various local information. Utilizing location-based service technology in other services, including leisure, logistics and travel services, the Company provides increased convenience and added value to customers. In the digital contents business area, the Company provides high-quality digital contents in its leading mobile contents marketplace, T Store, which had 23.4 million subscribers as of December 31, 2014 and which the Company plans to expand. In the media business area, the Company provides Hoppin service that enables subscribers to access various multimedia contents through personal computers, mobile devices and other digital devices. In the advertising business area, the Company is engaged in advertisement production, promotion services and research and consulting services to substantively help businesses increase their value in a rapidly evolving business environment. SK Planet Co., Ltd. (SK Planet) will continue to provide value to customers by constantly developing and improving its services.

SK Communications Co., Ltd. (SK Communications) provides integrated Internet portal services through NATE and instant messaging services through NATE-ON. Key sources of revenue for SK Communications are display advertising, search engine-based advertising, and contents and other services. Display advertising consists of image, video and Flash-based multimedia advertising carried on NATE and NATE-ON and aims to give greater exposure to the advertiser s brand name to the public. The increased effectiveness of online media as an advertising outlet has resulted in a greatly expanded advertiser base, and the increasing variety in the format of advertising has contributed to the growth of display advertising. Search engine-based advertising refers to the type of advertising that embeds advertisements within search results produced by searches of certain keywords on the NATE portal site. Search engine-based advertising has a certain appeal to small and medium-sized advertisers. Contents and other services include contents sales and providing certain types of services. Revenues from contents and other services are generated through revenues from NATE-ON instant messaging, custom decorations for mobile phones, cartoon strips, fortunetelling, movies and other contents services. In addition, SK Planet receives revenue from its services agreement with the Company in connection with operation of WAP wireless NATE services and application development.

Changes in shareholding, including majority shareholder Not applicable because the spin-off is a simple vertical spin-off.

Appraisal rights of shareholders

Not applicable because the spin-off is a simple vertical spin-off.

Protection of creditors

In accordance with Article 530-9 Paragraph 1, both SK Telecom and SK Planet will be jointly and severally liable for the payment of all obligations of SK Telecom incurred prior to the spin-off.

Allocation of new shares

In accordance with Articles 530-2 through 530-12, the spin-off is a simple vertical spin-off and all shares of SK Planet were allocated to SK Telecom.

- (2) Acquisition of shares of SK hynix Inc. (formerly, Hynix Semiconductor Inc.) In accordance with the resolution of the Company s board of directors on November 14, 2011, the Company purchased 146,100,000 shares of SK hynix Inc. (formerly, Hynix Semiconductor Inc.) (SK Hynix) (aggregate purchase price of 3,374,726 million) on February 14, 2012 in order to acquire control of SK Hynix. The Company had a 21.05% equity interest in SK Hynix after the purchase.
- (3) Merger of SK Planet and SK Marketing & Company Co., Ltd.
 On January 11, 2013, the Company acquired the remaining 50% equity stake in SK Marketing & Company Co., Ltd.
 (SK Marketing & Company), a company providing e-commerce and advertising services, from SK Innovation Co., Ltd. and gained control of both SK Marketing & Company and its subsidiary, M&Service Co., Ltd. The Company thereafter contributed the 100% equity stake in SK Marketing & Company to SK Planet and merged SK Marketing & Company into SK Planet as of February 1, 2013.
 - (4) Acquisition of shares of PS&Marketing

On February 20, 2014, the board of directors of the Company resolved to invest an additional 100 billion (20 million common shares) into PS&Marketing, an affiliated company, in order to increase its mid- to long-term competitiveness in distribution. The estimated date of investment is April 2, 2014 and the cumulative investment amount will total 330 billion.

(5) Disposition of shares of iHQ Inc.

On March 10, 2014, the Company disposed of 3,790,000 shares (its 9.4% equity share) of iHQ Inc. to rebalance its investment portfolio.

(6) Acquisition of shares of Neos Networks Co., Ltd.

In order to acquire a new growth engine, the Company acquired a controlling stake in Neos Networks Co., Ltd., a building security company, with the purchase of 31,310 shares (a 66.7% equity interest) of Neos Networks Co., Ltd. on April 2, 2014.

9

(7) Acquisition of shares of Iriver Ltd.

In order to foster application development and smartphone accessories as part of the Company s growth engines, the Company purchased 10,241,722 shares (a 39.3% equity interest) of Iriver Ltd. (Iriver) from Vogo-Rio Investment Holdings Co., Ltd. and KGF-Rio Limited on August 13, 2014. As of December 31, 2014, the Company holds a 48.9% equity interest of Iriver by acquiring additional shares in its rights offering. The Company does not hold a majority of the voting rights of Iriver but the Company concluded that it has effective control as it holds significantly more voting rights than any other shareholder or any organized group of shareholders.

(8) Acquisition of shares of Shopkick, Inc.

On October 10 2014, SK Planet America LLC, a subsidiary of the Company, acquired (through its 95.2%-owned subsidiary Shopkick Management Company, Inc.) a 100.0% ownership interest in Shopkick, Inc. (Shopkick), a developer of a shopping app for mobile devices that provides benefits to customers for visiting stores, in order to penetrate the mobile commerce market in the United States.

[SK Broadband]

(1) Merger

On July 26, 2012, the board of directors of SK Broadband resolved to merge Broadband D&M Co., Ltd., its wholly-owned subsidiary, into SK Broadband after transferring Broadband D&M Co., Ltd. s network maintenance business to Network O&S Co., Ltd. The merger was effective as of September 26, 2012. In connection with this merger, SK Broadband did not issue any new shares.

On October 25, 2012, the board of directors of SK Broadband resolved to merge Broadband CS Co., Ltd., its wholly-owned subsidiary, into SK Broadband after transferring Broadband CS Co., Ltd. s customer service business to Service Ace Co., Ltd. The merger was effective as of December 26, 2012. In connection with this merger, SK Broadband did not issue any new shares.

On January 3, 2013, the board of directors of SK Broadband approved the merger of Broadband Media Co., Ltd., its wholly-owned subsidiary, into SK Broadband. The merger was effective as of March 22, 2013 and was recorded as of March 25, 2013. Please refer to the Merger Completion Report filed with the Financial Services Commission on March 25, 2013. In connection with this merger, SK Broadband did not issue any new shares.

[SK Planet]

(1) Merger

On January 11, 2013, the Company acquired the remaining 50% equity stake in SK Marketing & Company, a company providing e-commerce and advertising services, from SK Innovation Co., Ltd. and gained control of both SK Marketing & Company and its subsidiary, M&Service Co., Ltd. The Company thereafter contributed the 100% equity stake in SK Marketing & Company to SK Planet and merged SK Marketing & Company into SK Planet as of February 1, 2013. In connection with this merger, the merger ratio between SK Planet and SK Marketing & Company was 1.2927317:1 and SK Planet issued 12.927,317 of its common stock.

On April 22, 2013, the board of directors of SK Planet resolved to merge Madsmart, Inc., its wholly-owned subsidiary, into SK Planet to enhance the competitiveness of its platform business and provide faster service to customers by merging the information and communication technology (ICT) capabilities of the two companies. The merger was effective as of June 1, 2013 and SK Planet did not issue any new shares in connection with the merger.

10

[SK Telink]

(1) Merger

On July 22, 2010, the board of directors of SK Telink Co., Ltd. (SK Telink) approved the merger of TU Media Corp. into SK Telink effective as of November 1, 2010. In connection with this merger, SK Telink issued 256,763 shares of its common stock.

[SK Communications]

- (1) Disposition and acquisition of businesses
 - 1. Disposition of the Cyworld service

Pursuant to the resolution of its board of directors on March 8, 2014, SK Communications sold its Cyworld service and certain related assets to Cyworld Co., Ltd. for 2,824 million.

(2) Disposition of shares

1. Disposition of shares of Service-In

On November 19, 2012, SK Communications sold all of its shares (80,000 common shares) in Service-In Co., Ltd., its subsidiary, to the chief executive officer of Service-In Co., Ltd., pursuant to a resolution of its board of directors of October 31, 2012.

[PS&Marketing]

On February 20, 2014, the board of directors of PS&Marketing resolved to acquire the retail distribution business, including related assets, liabilities, contracts and human capital of the information technology and mobile wing of SK Networks. On the same day, the board of directors of PS&Marketing also resolved to acquire retail stores, including their assets and liabilities, of LCNC Co., Ltd (LCNC). The acquisitions were completed on April 30, 2014 at a purchase price of 124.5 billion for the assets acquired from SK Networks and a purchase price of 10 billion for the assets acquired from LCNC.

[M&Service]

Upon the merger between SK Marketing & Company, which held 100% equity stake in M&Service, and SK Planet on February 1, 2013, SK Planet holds 100% equity stake in M&Service.

E. Other Important Matters related to Management Activities [SK Telecom]

(1) Issuance of bonds

On May 14, 2014, the Company issued four tranches of fixed-rate unsecured bonds in the principal amounts of 50 billion (with an annual interest rate of 3.301% and a maturity date of May 14, 2019), 150 billion (with an annual interest rate of 3.637% and a maturity date of May 14, 2024), 50 billion (with embedded options, an annual interest rate of 4.725% and a maturity date of May 14, 2029), and 50 billion (with embedded options, an annual interest rate of 4.72% and a maturity date of May 14, 2029).

On October 28, 2014, the Company issued three tranches of fixed-rate unsecured bonds in the principal amounts of 160 billion (with an annual interest rate of 2.53% and a maturity date of October 28, 2019), 150 billion (with an annual interest rate of 2.66% and a maturity date of October 28, 2021), and 190 billion (with an annual interest rate of 2.82% and a maturity date of October 28, 2024).

11

On February 26, 2015, the Company issued three tranches of fixed-rate unsecured bonds in the principal amounts of 100 billion (with an annual interest rate of 2.40% and a maturity date of February 26, 2022, 150 billion (with an annual interest rate of 2.49% and a maturity date of February 26, 2025), and 50 billion (with an annual interest rate of 2.61% and a maturity date of February 26, 2030).

(2) Issuance of hybrid securities

On June 7, 2013, the Company issued 400 billion principal amount of hybrid securities in the form of unguaranteed subordinated bonds with an annual interest rate of 4.21%, which interest rate is adjusted five years after the date of issuance. The Company classified the hybrid securities as equity as there is no contractual obligation to deliver financial assets to the bondholders. The maturity date of the hybrid securities is June 7, 2073, which can be extended by the Company without any notice or announcement.

(3) Conversion of convertible notes

On April 7, 2009, the Company issued convertible notes with a maturity of five years in the principal amount of US\$332,528,000 with an annual interest rate of 1.75%. In 2013, holders exercised their conversion rights with respect to an aggregate principal amount of US\$326,023,000 of the convertible notes. The Company delivered 1,241,337 treasury shares in respect of US\$170,223,000 of the exercised aggregate principal amount and delivered cash in respect of the remainder due to the limit on foreign ownership. In connection with such conversion, the Company recognized 135,108 million in financial expenses in 2013. On November 13, 2013, the Company exercised its early redemption right and on December 13, 2013, redeemed the US\$6,505,000 principal amount of convertible notes not converted by noteholders. A 20-day volume weighted average pricing formula was used for the delivery of cash made in place of treasury shares. Due to such calculation, the Company still had US\$91,108,507 outstanding in payables as of December 31, 2013. The amount was delivered in full as of January 6, 2014 and currently has no amount outstanding.

[SK Broadband]

SK Broadband acquired subscriberships of regional cable and other service providers on several different occasions. Such acquisitions were intended to secure a stable subscriber base for its broadband Internet service and, at the same time, increase the service coverage area. Because such acquisitions were conducted on a relatively small scale and involved purchase of subscriberships, SK Broadband did not believe such acquisitions rose to the level of purchasing an entire business line from another company or were likely to have a material impact on its business, and therefore decided that such acquisitions did not require resolutions of its shareholders.

3. Total Number of Shares

II. BUSINESS

Each company in the consolidated entity is a separate legal entity providing independent services and products. The business is primarily separated into (1) the wireless business consisting of cellular voice, wireless data and wireless Internet services, (2) the fixed-line business consisting of fixed-line telephone, high speed Internet, data and network lease services, among others, and (3) other businesses consisting of platform services and Internet portal services, among others.

1. Business Overview

Set forth below is a summary business description of material consolidated subsidiaries.

Classification	Company name	Description of business
	SK Telecom Co., Ltd.	Wireless voice and data telecommunications services via digital wireless networks
Wireless	PS&Marketing Co., Ltd.	Sale of fixed-line and wireless telecommunications products through wholesale, retail and online distribution channels
	SK Broadband Co., Ltd.	High-speed Internet, TV, telephone, commercial data and other fixed-line services and management of the transmission system for online digital contents
Fixed-line	SK Telink Co., Ltd.	Various media-related services, such as channel management, including video on demand, and mobile IPTV services International wireless direct-dial 00700 services, pre-paid international card calling services, voice services using Internet protocol and Mobile Virtual Network Operator (MVNO) services
	SK Planet Co., Ltd.	Various platform services such as 11th Street, T Store, T-Map Navigation and Hoppin in the application, commerce and new media areas, among others
Other business	SK Communications Co., Ltd.	Integrated portal services through NATE and instant messaging services through NATE-ON
Other business	M&Service Co., Ltd.	System software development, distribution and technical support services and other online information services
	SK Planet America LLC	Digital contents provider and sourcing services
	Shopkick Management Company, Inc.	Investment business
[Wireless Busin	ž •	investment outsiness

A. Industry Characteristics

As of December 31, 2014, the Korean mobile communication market can be considered to have reached its maturation stage with more than a 100% penetration rate. However, the Korean mobile communications market continues to improve in the quality of services with the help of advances in network-related technology and the development of highly advanced LTE-A, LTE and 3G smartphones which enable the provision of convergence services for

multimedia contents, mobile commerce, telematics, new media and other related services. In addition, through the commercialization of LTE network in July 2011 and LTE-A network in June 2013, B2B businesses, such as the corporate connected workforce business which can directly contribute to an enhancement in productivity, are expected to grow rapidly. In the first half of 2014, wideband LTE-A service was commercialized and on December 29, 2014, tri-band LTE-A service with a maximum speed of 300 Mbps was also commercialized.

16

B. Growth Potential

(Unit: in 1,000 persons)

		As of December 31,				
Classification		2014	2013	2012	2011	2010
	SK Telecom	28,613	27,352	26,961	26,553	25,705
Number of subscribers	Others (KT, LGU+)	28,595	27,328	26,663	25,954	25,062
	Total	57,208	54,680	53,624	52,507	50,767

^{*} Source: Ministry of Science, ICT and Future Planning (MSIP) website and each Korean telecommunications company s respective earnings releases (including MVNOs).

C. Domestic and Overseas Market Conditions

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. Sales revenue related to data services is expected to increase due to the increasing popularity of smartphones and high-speed wireless networks. The importance of the business-to-business segment, which creates added value by selling and developing various solutions, is also growing. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

Set forth below is the historical market share of the Company.

(Unit: in percentages)

		As of	Decemb	er 31,			
Classification	2014	2013	2012	2011	2010		
Mobile communication services	50.0	50.0	50.3	50.6	50.6		

^{*} Source: MSIP website and each Korean telecommunications company s respective earnings releases (including MVNOs).

D. Business Overview and Competitive Strengths

The Company is seeking to transform itself from a telecommunications service provider into a comprehensive ICT service provider. It has continued to innovate the scope of its services and achieved strong growth in subscribers amid fierce competition and rate cuts. As a result, for the year ended December 31, 2014, the Company recorded 17.2 trillion in revenue and 1.8 trillion in operating income on a consolidated basis and 13.1 trillion in revenue and 1.7 trillion in operating income on a separate basis.

The number of subscribers (including MVNO subscribers) as of December 31, 2014 was 28.61 million, an increase of approximately 1,260,000 from the previous year. In particular, the number of smartphone subscribers as of December 31, 2014 was 19.49 million, an increase of approximately 1,210,000 from the previous year, including 16.74 million LTE subscribers, solidifying the Company s market leadership. Following the launch of commercial LTE services in July 2011, the Company became the first telecommunications service provider in the world to launch commercial wideband LTE-A services in June 2014. In December 2014, the Company launched tri-band LTE-A

services. By launching various high quality services utilizing the LTE-A and wideband LTE networks such as group video conference call services, full high definition mobile IPTV streaming services, and T Baseball Multiview, which allows users to watch multiple baseball games on one screen, the Company plans to provide an innovative user experience, enhance customer satisfaction and increase profitability.

The Company has proved that it has superior network quality compared to its competitors according to the Korea Communications Commission quality evaluations. The Company has also proved to be the leader in Korea s top three customer satisfaction indices: according to the National Customer Satisfaction Index, Korean Customer Satisfaction Index and Korean Standard Service Quality Index, the Company has continued to hold the leading position for 17 years, 17 years and 15 years, respectively.

SK Telink, a consolidated subsidiary of the Company, expanded its operations to the MVNO business based on its technical expertise and know-how obtained in its international telecommunications business and launched its MVNO service, 7Mobile, which is offered at reasonable rates and provides excellent quality. SK Telink is increasing its efforts to develop low-cost distribution channels and create niche markets through targeted marketing towards customers with lower average revenue per user. An MVNO leases the networks of a mobile network operator (MNO) and provides wireless telecommunication services under its own brand and fee structure, without owning telecommunication networks or frequencies.

17

Network O&S, a subsidiary of the Company responsible for the operation of the Company s base stations and related transmission and power facilities, offers quality fixed-line and wireless network services to customers, including mobile office products to business customers.

PS&Marketing, a subsidiary of the Company, provides a sales platform for products of the Company and SK Broadband including fixed-line and wireless telecommunication products which address customers needs for various convergence products. PS&Marketing provides differentiated service to clients through the establishment of new sales channels and product development.

[Fixed-line Business]

A. Industry Characteristics

As subscribers to various bundled wireless and fixed-line products are continuing to increase, the IPTV business is evolving to satisfy diverse customer needs for media services through differentiated service offerings including mobile IPTV, bundled wireless and IPTV products and ultra-high definition services for smart televisions. The market for our corporate business is also growing with cloud computing, mobile offices and other new information and communications technologies being commercialized. The increased usage of smartphones and tablet computers, the pilot programming of commercial ultra-high definition television broadcasting services and competition for wideband LTE services has greatly increased data traffic, thereby further emphasizing the importance of fixed-line network infrastructure that is capable of handling large capacities of data traffic with stability and efficiency.

B. Growth Potential

(Unit: in 1,000 persons)

		As of December 31,			
Classification		2014	2013	2012	
	High-speed Internet	19,199	18,738	18,253	
Fixed-line Subscribers	Fixed-line telephone	16,939	17,620	18,261	
	IPTV (real-time)	10,850	8,522	6,310	

^{*} Source: MSIP website, Korea Communications Commission website and the Korea Digital Media Industry Association website.

C. Cyclical Nature and Seasonality

High-speed Internet, fixed-line telephone and IPTV services are mature markets that are generally not sensitive to cyclical economic changes due to the easing of competition resulting from the decrease in differentiation between service providers and the nature of the respective services. The telecommunications services market overall is not expected to be particularly affected by economic downturns due to the low income elasticity of demand for telecommunication services.

Set forth below is the historical market share of the Company.

(Unit: in percentages)

	As of December 31,		
Classification	2014	2013	2012
High-speed Internet (include resales)	25.1	24.4	24.1
Fixed-line telephone (include Voice over Internet Protocol)	17.0	16.9	16.7
IPTV	26.1	23.8	22.0

^{*} Source: MSIP website and the Korea Communications Commission website.

D. Business Overview and Competitive Strengths

In 1999, the Company was the first in the world to commence commercial ADSL services and on the back of its premium technology and enhanced competitiveness achieved through bundled products, it is currently expanding subscriber base across all of its businesses, including broadband Internet, telephone and IPTV. In particular, SK Broadband has positioned itself to focus on corporate customer services and IPTV services as key strategic areas for mid- to long-term growth, exploiting opportunities in new ICT-based businesses that have led to revenue growth, and providing differentiated contents in its IPTV business by securing popular programming which includes exclusive children s channels and live broadcasts of Major League Baseball games. In addition, the Company is reinforcing its leadership in the ultra-high definition broadcasting market by launching ultra-high definition services that require no set-top boxes in April 2014 and by commercializing ultra-high definition set-top boxes for the first time in Korea in September 2014. Furthermore, the Company was the first in the industry to adopt solutions to upgrade full high definition to ultra-high definition, and the Company also strengthened the line-up of ultra-high definition contents by securing access to diverse contents provided by Sony and NBC Universal. Moreover, the Company provides the greatest number of channels in full high definition in the IPTV market due to its recent upgrade of all 130 live high definition channels to full high definition.

In September 2013, the Company developed technology that compresses videos for its ultra-high definition IPTV services. During the first quarter of 2014, the Company commercialized new transmission technology that can more efficiently transmit signals on the hybrid fiber-coaxial network despite its limited frequency. Furthermore, the Company solidified its technological leadership for providing ultra-high definition broadcasting for wireless and fixed line in the IPTV industry by commercializing a unique ultra-high-definition service that can be provided directly to smart televisions without the installation of smart set-top boxes in April 2014 and started transmitting ultra-high definition contents to mobile IPTV in May 2014.

SK Telink provides international telecommunications service. SK Telink has been able to establish itself as a market leader as a result of its affordable pricing, proactive marketing and the quality of its services. It launched a mobile phone-based international calling service under the brand name 00700 in 1998, creating a new niche market within the long-distance telephony market that was otherwise dominated by existing service providers. In 2003, SK Telink was designated a common carrier for international calling services, which allowed us to expand our international calling services to fixed-line international calling services. SK Telink plans to strategically target the convergence of wireless and fixed-line telecommunications and strengthen its existing business, including international and long-distance calling services, value-added services for local calling and B2B services, and video conference call services while aiming to satisfy the diverse needs of customers through the provision of quality solutions at reasonable prices.

[Other Business]

A. Industry Characteristics

As the number of smartphones distributed in Korea exceeds 40 million, the growth in various mobile devices has spurred the rise of the service provider with a strong platform business as the leader in the ICT market. It is becoming increasingly important to enhance competitiveness by building a platform with large data capacity to handle the increase in data transmission.

A platform business acts as an intermediary by promoting interactions among various customer groups, thereby generating new values. It is important for a platform business to continually attract subscribers and users and to create an ecosystem with certain

lock-in effects. A platform can exist in various forms, including as a technological standard (iOS, Android OS), a subscriber-based service platform (Facebook, Twitter) or a marketplace (Amazon, T Store). Platform businesses are evolving and expanding globally.

A platform business has strong growth potential due to its connectivity with related services and ease of global expansion. Apple became a world-leading smartphone producer based on its innovative design and the competitive strength of its App Store platform. Google has created a new ecosystem of long-tail advertising by attracting millions of third parties to its advertising platform, as well as showing strong growth in mobile markets with its competitive platform based on Android OS. It is becoming increasingly important to enhance competitiveness through a database that can register and analyze purchase patterns of customers across all areas and a platform with large data capacity to utilize this database and provide differentiated services to customers.

B. Growth Potential

The scope and value generated by the platform business, including application and content marketplaces and N-screen services, continues to increase, as smartphones and tablet computers become more popular and the bandwidth and speed of network infrastructure improve. As the wireless network evolves to LTE, business opportunities for the platform business exist, including multimedia streaming, N-screen service based on cloud technology and high-definition location-based services. Since the platform business realizes profit by connecting with advertisements or commerce sites after building a critical mass of subscribers and traffic, the recent growth in the advertising and commerce markets is expected to present an opportunity for platform businesses. The importance of building a platform with large data capacity that is connected to various digital contents and commerce is expected to increase in the future.

C. Domestic and Overseas Market Conditions

(1) Commerce markets

The Company expects that online commerce markets will continue to grow due to the growth potential of the Internet shopping population, the strengthening of online business models by off-line operators, and the rapid rise of mobile commerce. Recently, due to the widespread use of smartphones and social media, the commercialization of location-based services and the development of big data technology, online to offline (or, O2O) business, which is a concept of attracting customers to offline stores using online and mobile environments, is being highlighted as a new field in the online commerce market industry.

(2) Digital contents

The growth of application marketplaces, which started with Apple s App Store, provides the platform business with new opportunities for revenue generation. The competitive paradigm is shifting from a competition among platform operators toward a competition among eco-systems that include application developers as well as platform operators.

Due to an increase in the number of devices owned by each user and an increase in network speed, each user can now enjoy music or video files anywhere and anytime by storing them in cloud servers, which is called N-screen service. Users can recommend music to other users through social networking services and this is expected to become a distribution model for digital media contents. Various service providers are competing in this market expecting a strong growth in the online and mobile video market.

D. Business Overview and Competitive Strengths

The Company plans to expand its platform ecosystem focusing on its Open & Collaboration motto in operating its commerce business such as 11th Street, Syrup, and OK Cashbag, its digital contents business such as T Store and Hoppin, and its location-based service business such as T-Map Navigation, thereby ultimately increasing its enterprise value.

(1) Commerce

11th Street, an online marketplace, has continued its growth through effective marketing and customer satisfaction. Despite its later entry into the online commerce market (launched in 2008) which was already divided between Auction and G-Market, it is leading the domestic e-commerce market and is also rapidly growing in the mobile commerce market. Growth plans involving overseas joint ventures based on 11th Street s business expertise have resulted in the successful launch of an open online commerce market in Turkey in partnership with Doğuş Group in March 2013. In Indonesia, an open market platform was successfully launched through a joint venture established in July 2013 with PT XM Axiata Tbk, a wireless telecommunications company in Indonesia. In October 2014, SK Planet and Celcom Axiata Berhad, which is a leading telecommunications service provider in Malaysia, established a joint venture, Celcom Planet, to launch online commerce services tailored to the Malaysian market in the first half of 2015.

Syrup is a consumer-oriented commerce service and its goal is to minimize its customers—time and efforts while maximizing the economic benefits provided by providing information about coupons and events based on time, place and occasion. To achieve this goal, Syrup combines location-based services, such as geo-fencing, a virtual perimeter technology using a global positioning system (or, GPS) and Bluetooth Low Energy (or, BLE), with big data analysis of consumption patterns. Syrup—s business partners can benefit from cost-effective marketing through Syrup by utilizing statistics and analysis regarding consumers—frequency of visits, preferred products, and consumption patterns.

OK Cashbag is a point-based loyalty marketing program which has grown to become a global top-tier loyalty marketing program since its inception in 1999. Customers have access to increased benefits through accumulation of loyalty reward points and partner companies use OK Cashbag as a marketing resource. With 38 million subscribers, OK Cashbag maintains a leading position in the industry and plans to continue strengthening its position by providing customized services befitting customers needs and market conditions.

(2) Location-based services

T-Map Navigation provides map, local information, real-time traffic information and navigation services. With cumulative subscribers of 19.52 million as of December 31, 2014, T-Map Navigation is one of the leading location-based service platforms in Korea. The Company is broadening the range of its location-based services by also providing infotainment systems to commercial vehicle businesses as well as providing localized content on its products, such as region-specific information and advertisements. The Company plans to further develop the T-Map Navigation platform by initiating open application programming interface-based services, providing services to more diverse types of devices and providing local area-based services.

(3) Digital contents

T Store, launched in September 2009, reached 23.44 million subscribers and cumulative downloads of 2.5 billion as of December 31, 2014, solidifying its leadership position in the application market and plans to widen its services to tablets and navigation devices. The Company intends to further develop T Store into a personalized gateway and mobile playground through expansion of the scope of serviceable devices, reinforcement of digital content offerings and enhancement of search services, among other things.

The Company s Hoppin service enables subscribers to enjoy wide-ranging video on demand contents. Through continual service improvements and stable service provision, Hoppin has become the leading mobile video on demand service.

(4) Social networking services (SNS) and Internet portal services

The Company s instant messenger service, Nate-On, had a market share of 29.4% in the instant messenger market in Korea with 5 million net users during December 2014. The Company s Internet search portal service, Nate, had a page-view market share of 5.1% as of December 31, 2014. (Source: Korean Click, based on fixed-line access)

Satellite DMB service

The Company launched its Hanbyul satellite in 2004 and received government approval in December 30, 2004 to provide satellite DMB services. Broadcasting through satellite DMB commenced in May 2005 and satellite DMB services expanded nationwide thereafter. On August 23, 2012, the board of directors of SK Telink resolved to discontinue operation of its satellite DMB services due to the rapid decrease in satellite DMB subscribers and the continued burden of fixed costs.

2. Other Matters Related to Financial Information

A. Restatement of the Financial Statements

During the year ended December 31, 2013, SK Planet sold 13,924,369 shares (52.6% ownership interest) of Loen Entertainment, a company engaged in the publishing of music and provision of online music services, to Star Invest Holdings Limited. Following the disposition of shares, SK Planet s ownership interests in Loen Entertainment decreased to 15.0%. As a result of the transaction, Loen Entertainment was excluded from scope of consolidation. See note 39 of the notes to our consolidated financial statements for more information relating to the restatement.

B. Allowance for Doubtful Accounts

(1) Allowance for Doubtful Accounts of Trade and Other Receivables

(Unit: in millions of Won) For the year ended December 31, 2014

(2) Movements in Allowance for Doubtful Accounts of Trade and Other Receivables

(Unit: in millions of Won)

	For the year ended	For the year ended	
	December 31, 2014	December 31, 2013	December 31, 2012
Beginning balance	323,985	300,668	318,821
Increase of allowance for doubtful			
accounts	63,697	79,330	82,500
Reversal of allowance for doubtful			
accounts		(359)	(5,902)
Write-offs	(89,529)	(76,697)	(111,611)
Other	30,039	21,042	16,861
Ending balance	328,191	323,985	300,668

(3) Policies for Allowance for Doubtful Accounts

The Company establishes allowances for doubtful accounts based on the likelihood of recoverability of trade and other receivables based on their aging at the end of the period and past customer default experience for the past two years. With respect to trade receivables relating to wireless telecommunications services, the Company considers the likelihood of recovery based on past customer default experience and the length of default in connection with the type of default (e.g., whether the customer—s service has been terminated or is continued). For such trade receivables that have been overdue for more than two years after the customer—s service has been terminated, the Company records an allowance of 100% of such receivables and for such trade receivables that have been overdue for less than two years after the customer—s service has been terminated or relates to a customer that is continuing his service, the Company records an allowance of a certain percentage of such receivable. Consistent with customary practice, the Company writes off trade and other receivables for which the prescription period has passed or that are determined to be impossible or economically too costly to collect, including receivables that are less than 200,000 and more than six months overdue and receivables that have been determined to be the subject of identity theft.

(4) Aging of Accounts Receivable

			For the year ended December 31, 2014								
		Six	From six	From one year							
		months	months to one	to three	More than						
		or less	year	years	three years	Total					
Accounts receivable	trade	2,130,594	100,031	173,488	278,482	2,682,595					
Percentage		79.4%	3.7%	6.5%	10.4%	100.0%					

C. Inventories

(1) Detailed Categories of Inventories

	(Unit: in millions of Won							
	For the year ended	For the year ended						
	December 31,	December 31,	December 31,					
Account Category	2014	2013	2012					
Merchandise	246,738	161,928	228,856					
Goods in transit								
Other inventories	20,929	15,192	13,290					
Total	267,667	177,120	242,146					
Percentage of inventories to total								
assets								
[Inventories / Total assets]	0.96%	0.67%	0.95%					
Inventory turnover	7.55	6.20	9.85					

[Cost of sales / { (Beginning balance of inventories + Ending balance of inventories) / 2}]

(2) Reporting of Inventories

The Company holds handsets, ICT equipment for offline sales, etc. in inventory. The Company conducts physical due diligence of its inventories with its auditors at the end of each year.

D. Fair Value Measurement

See notes from 4(5) to 4(7) and 4(16) of the notes to our consolidated financial statements for more information.
