I. Operating Results and Financial Conditions

2016 First Quarter in Review

Looking back at the global economy in the first quarter of 2016, the U.S. economy continued recovering smoothly as consumer spending and employment conditions improved. In Europe, the economy recovered moderately amid decreases in unemployment rates in Germany and the U.K. In contrast, the Chinese economy continued its deceleration and the economies of emerging countries, including those of Southeast Asia and Russia, remained stagnant owing to further declines in oil prices. In Japan, although weaknesses were seen in consumer spending, corporate earnings and employment conditions continued to improve. As a result, the global economy overall continued to realize moderate growth.

As for the markets in which Canon operates amid these conditions, demand for office multifunction devices (MFDs) remained at around the same level as for the previous year, while the market for laser printers shrunk due to the sluggish market in emerging countries. As for cameras, although demand for interchangeable-lens digital cameras continued to recover in developed countries, demand across Asia continued to decline compared with last year. Likewise, sales volumes of digital compact cameras declined in all regions. Additionally, demand for inkjet printers continued to decline, mainly in emerging countries in Asia. Within the Industry and Others sector, however, demand for lithography equipment used in the production of semiconductor devices and flat panel displays (FPDs) enjoyed strong growth thanks to active capital investment by memory device and panel manufacturers.

The average value of the yen during the quarter was ¥114.91 against the U.S. dollar, a year-on-year appreciation of approximately ¥4, and ¥127.01 against the euro, a year-on-year appreciation of approximately ¥7, which had a negative impact on net sales of ¥31.0 billion and operating profit of ¥13.3 billion.

During the first quarter, although office MFDs enjoyed solid demand, mainly for color models, total sales volume of laser printers declined due to the contraction of the market. Although harsh conditions for interchangeable-lens digital cameras in Asia remained the same as during the previous year, demand remained firm in developed countries with unit sales remaining essentially unchanged from the same period of the previous year. As for digital compact cameras, unit sales declined in all regions compared with the previous year. Looking at inkjet printers, despite the shrinking market, sales volume remained at approximately the same level as for the previous year thanks to such factors as expanded sales of new products in developed countries. Also, sales of semiconductor lithography equipment and FPD lithography equipment exceeded those for the previous year thanks to favorable market conditions. Consequently, along with the negative effect of currency exchange rates, first-quarter net sales decreased 7.0% year on year to ¥797.2 billion. Despite the appreciation of the yen, the gross profit ratio decreased by only 0.3 points year on year to 50.8% owing to ongoing cost-cutting activities and efforts aimed at controlling price reductions. Operating expenses decreased 2.1% year on year to ¥364.7 billion thanks to Group-wide efforts to thoroughly reduce spending. As a result, first-quarter operating profit decreased by 39.4% to ¥40.1 billion. Other income (deductions) increased by ¥10.6 billion due to foreign currency exchange gains while income before income taxes decreased by 25.3% year on year to ¥45.8 billion and net income attributable to Canon Inc. decreased by 17.5% to ¥28.0 billion.

Basic net income attributable to Canon Inc. shareholders per share for the quarter was ¥25.63, a year-on-year decrease of ¥5.44.

Results by Segment

Looking at Canon's first-quarter performance by business unit, beginning with the Office Business Unit, unit sales for office MFDs overall increased from the same period of the previous year, including monochrome models, which had been facing decreasing demand. This was thanks to strong sales of color models, led by small-office/home-office color A3 (12 x18 ") imageRUNNER ADVANCE C3300-series models launched in the previous year, and the imagePRESS C10000VP-series, which targets the production market. Among high-speed continuous-feed printers and wide-format printers, the Océ-produced VarioPrint i300 series has been steadily receiving orders. As for laser printers, amid continued sluggishness in the market, unit sales volume declined from the corresponding period of the previous year as a result of a shift in sales strategy away from selling low-end models with low profitability in favor of efforts aimed at ensuring profitability through the proactive sales promotion of high-added-value models, which will lead to consumables sales. These factors, coupled with the negative effect of unfavorable currency exchange rates, resulted in total sales for the business unit of ¥454.4 billion, a year on year decrease of 14.1%, while operating profit totaled ¥44.7 billion, a year-on-year decrease of 37.7%.

Within the Imaging System Business Unit, sales volume of interchangeable-lens digital cameras remained at around the same level as the previous year owing to healthy demand for the advanced-amateur-model EOS 80D, launched this year, and the EOS M3 and M10, which were released the previous year, in Japan and other Asian markets. As for digital compact cameras, while sales volume declined amid the ongoing contraction of the market, PowerShot G-series cameras, the lineup of which grew to five models in the previous year, enjoyed solid demand. As for inkjet printers, sales promotions for new products contributed to growth in unit sales in developed markets, such as those in Europe, the U.S. and Japan, while models launched in the previous year equipped with large-capacity ink tanks enjoyed strong demand in Asia, a region in which market conditions have remained sluggish. Consequently, unit sales for the segment remained at approximately the same level as for the corresponding period of the previous year. As a result, along with the negative effect of unfavorable currency exchange rates, sales for the business unit decreased by 10.6% to ¥234.8 billion year on year, while operating profit totaled ¥19.6 billion, a year-on-year decline of 32.6%.

In the Industry and Others Business Unit, within the semiconductor lithography equipment segment, unit sales increased from the same period of the previous year, boosted by active capital investment in response to the growing variety of semiconductor-equipped products associated with the prevalence of the IoT (Internet of Things). Unit sales of FPD lithography equipment also increased, supported by favorable market conditions. As for network cameras, sales by Axis, which was consolidated in the second quarter last year, contributed significantly to robust sales growth, along with increased sales of Canon-brand products. In addition, Canon Tokki, which sells manufacturing equipment for organic LED (OLED) panel devices, posted an increase in sales amid brisk capital investment by panel manufacturers. Consequently, sales for the business unit totaled ¥130.2 billion, an increase of 45.8% year on year. As for operating profit, despite an improvement of ¥7.2 billion compared with the previous year, the business unit was in the red by ¥0.6 billion owing to upfront investment in next-generation technologies and new businesses.

Cash Flow

During the first quarter of 2016, cash flow from operating activities totaled ¥114.6 billion, an increase of ¥15.2 billion compared with the previous year owing to improvements in working capital, such as trade receivables. Cash flow from investing activities increased ¥686.5 billion year on year to ¥720.2 billion due to the payment for the right to acquire all of the ordinary shares of Toshiba Medical Systems Corporation (TMSC). Accordingly, free cash flow totaled negative ¥605.6 billion, a decrease of ¥671.3 billion compared with the corresponding year-ago period.

Cash flow from financing activities recorded proceeds of ¥570.7 billion, mainly owing to a provisional bank borrowing related to TMSC.

Owing to these factors, as well as the negative impact from foreign currency translation adjustments, cash and cash equivalents decreased by ¥52.7 billion to ¥581.0 billion from the end of the previous year.

Outlook

As for the outlook in the second quarter onward, the U.S. and European economies are expected to grow moderately thanks to expanding domestic demand as employment conditions continue to improve. With regard to the Japanese economy, the outlook indicates a recovery trend supported by improved corporate earnings, mainly in the non-manufacturing sector, and employment conditions. Looking at China, sluggish capital investment and other factors are expected to result in a continuation of the gradual economic slowdown. As for emerging economies, such as those of Southeast Asia, Brazil and Russia, despite signs of recovery that were mainly driven by domestic demand, the outlook indicates the need for more time before a true recovery takes hold owing to declines in oil prices and volatility in the financial and capital markets. Looking at the global economy as a whole, while a gradual recovery is expected heading into the latter half of the year, the degree of the recovery will likely be weaker than originally assumed.

In the businesses in which Canon is involved, demand for office MFDs is projected to expand moderately, mainly for color models, while demand in the laser printer market is expected to remain low for the time being. As for interchangeable-lens digital cameras, despite the moderate recovery in developed countries, demand in Asian markets is expected to shrink. Likewise, projections for digital compact cameras indicate continued market contraction in all regions, centered mainly on low-priced models. With regard to inkjet printers, amid the recession in Southeast Asian and other emerging countries, demand is expected to decline. Within the market for semiconductor lithography equipment, manufacturers are expected to postpone some capital investment due to a slowdown in the smartphone market, while forecasts for the FPD lithography equipment market point to further expansion thanks to the growing demand for high-definition OLED panels used in mobile devices. The network camera market is also expected to grow in response to increasing global safety and security needs.

With regard to currency exchange rates for the second quarter onward, on which Canon's performance outlook is based, Canon anticipates exchange rates of ¥110 to the U.S. dollar and ¥125 to the euro, representing appreciations of approximately ¥10 against the U.S. dollar and approximately ¥9 against the euro compared with the annual average rates of the previous year.

Upon taking into consideration the prolonged economic slowdown in China and developing countries, along with the negative impact of the revised foreign exchange rate assumptions on sales and gross profit, Canon projects full-year consolidated net sales in 2016 of ¥3,600.0 billion, a year-on-year decrease of 5.3%; operating profit of ¥300.0 billion, a year-on-year decrease of 15.5%; income before income taxes of ¥310.0 billion, a year on year decrease of 10.8%; and net income attributable to Canon Inc. of ¥200.0 billion, a year-on-year decrease of 9.2%.

The impact of the acquisition of TMSC has not been included in the Consolidated Outlook by reason that the clearance process by necessary competition regulatory authorities is still ongoing and the timing of consolidation has yet to be determined.

CANON INC. AND SUBSIDIARIES

CONSOLIDATED

Discontinue disclosure of SEGMENT INFORMATION BY GEOGRAPHIC AREA

In addition to the disclosure requirements under Topic 280, Canon has disclosed the segment information, SEGMENT INFORMATION BY GEOGRAPHIC AREA, which is based on the location of Canon Inc. and its subsidiaries. Results from a survey of a representative sample of financial statement users, however, indicated that they consider the latter to be less useful than sales information based on the location where the product is shipped to customers, which is disclosed separately. For this reason, Canon decided to discontinue the disclosure of geographical segment information based on the location of Canon Inc. and its subsidiaries from this year, in order to avoid the risk of confusing users due to disclosing two similar types of geographical information and make disclosure more concise and transparent. Sales information based on the location where the products is shipped to customers is available on page 8-3. DETAILS OF SALES in II. Financial Statements.

7. SIGNIFICANT CHANGES IN CANON INC. SHAREHOLDERS' EQUITY

None.

8. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

(1) GROUP POSITION

1. Number of Group Companies

	March 31, 2016	December 31, 2015	Change
Subsidiaries	325	317	8
Affiliates	5	5	-
Total	330	322	8

2. Change in Group Entities

Subsidiaries	
Addition:	8 companies

3. Subsidiaries Listed on Domestic Stock Exchange

Tokyo Stock Exchange (1st section): Canon Marketing Japan Inc., Canon Electronics Inc.

(2) SIGNIFICANT ACCOUNTING POLICIES

Canon's consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles.

Recently Issued Accounting Guidance

In November 2015, the Financial Accounting Standards Board issued an amendment which requires deferred tax assets and liabilities be classified as noncurrent in the consolidated balance sheets. Canon early adopted this amended guidance from the quarter beginning January 1, 2016, on a prospective basis, and prior periods were not retrospectively adjusted. Canon's current deferred tax assets were ¥55,108 million and current deferred tax liabilities were ¥2,682 million as of December 31, 2015.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, plan, project or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.
