PREFERRED INCOME STRATEGIES FUND, INC.

The Benefits and
Risks of
Leveraging

Preferred Income Strategies Fund, Inc. will utilize leveraging through borrowings or issuance of short-term debt securities or shares of Preferred Stock. The concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the return earned by the Fund on its longer-term portfolio investments. Since the total assets of the Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Fund's Common Stock shareholders are the beneficiaries of the incremental yield.

Leverage creates risks for holders of Common Stock including the likelihood of

Edgar Filing: PREFERRED INCOME STRATEGIES FUND INC - Form N-CSR

greater net asset value and market price volatility. In addition, there is the risk that fluctuations in interest rates on borrowings (or in the dividend rates on any Preferred Stock, if the Fund were to issue Preferred Stock) may reduce the Common Stock's yield and negatively impact its market price. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Fund's net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Fund's net income will be less than if leverage had not been used, and therefore the amount available for distribution to Common Stock shareholders will be reduced. In this case, the Fund may nevertheless decide to maintain its leveraged position in order to avoid capital losses on securities purchased with leverage. However, the Fund will not generally utilize leverage if it anticipates that its leveraged capital structure would result in a lower yield for its Common Stock than would be obtained if the Common Stock were unleveraged for any significant amount of time.

Preferred Income Strategies Fund, Inc., April 30, 2003

DEAR SHAREHOLDER

We are pleased to provide you with this first semi-annual report to shareholders for Preferred Income Strategies Fund, Inc. The Fund seeks to provide shareholders with current income by investing primarily in a diversified portfolio of preferred securities, which are subordinated fixed income securities. Issuers are rated in the investment-grade rating categories of the established bond ratings services (Baa or higher by Moody's Investors Service, Inc., BBB or higher by Standard & Poor's Ratings Services or BBB or higher by Fitch, Inc.) or in unrated securities considered by the Fund's Investment Adviser to be of comparable quality. In this and future reports to shareholders, we will provide information on the Fund's performance and discuss our investment strategy.

Since inception (March 28, 2003) through April 30, 2003, the Common Stock of Preferred Income Strategies Fund, Inc. had a net annualized yield of 3.69%, based on a period-end per share net asset value of \$24.41. For the same period, the total investment return on the Fund's Common Stock was +2.24%, based on a change in per share net asset value from \$23.88 to \$24.41.

Economic and Market Overview

The economy has not gained as much momentum as had been hoped following the Iraqi war. Recent data continues to indicate tepid consumer spending, weak manufacturing and weak service sector activities. The potential economic impact of SARS on the world economy is still not quantifiable. However, there are several factors that contribute to our cautiously optimistic outlook. First, geopolitical uncertainties are dissipating with the successful prosecution of the Iraqi war. Oil prices have fallen below \$25 per barrel, more than 25% below pre-war levels. Consumer confidence is also higher with the Conference Board Index registering an 81 reading in April, up from the 61.4 level in March. Furthermore, we expect business spending to accelerate in the second quarter as companies see a pickup in demand. At April 30, 2003, corporate earnings were better than expected, as 63.5% exceeded analysts' earnings estimates, while only 16% came in below expectations.

The credit markets are sending an even clearer signal of improving economic prospects. Yield spreads on corporate bonds and preferred securities (both high grade and high yield) have narrowed remarkably in the last few months, to the tightest levels in more than three years. While it is apparent that the corporate market has been the beneficiary of reaching for yield as nominal rates

Edgar Filing: PREFERRED INCOME STRATEGIES FUND INC - Form N-CSR

have continued to fall, there can be little doubt that the dramatic outperformance is also the result of vastly improving credit fundamentals and strong technical factors. Corporations have seen an increase of "net free cash flows" for seven consecutive quarters, while paying down debt, creating a healthy demand/supply imbalance.

The U.S. economy grew by just 1.9% in the first quarter of 2003, following a 1.4% increase in the fourth quarter of 2002. This sub-par performance has been the result of sluggish growth, if not outright weakness in all key contributors to the economy: consumption, investment and government spending. Looking ahead, the economy is likely to expand at a slightly better rate in the second quarter of 2003 (the low 2% area) and considerably faster in the second half of the year. (2.5% - 3% annual rate).

Leverage Strategy

As of April 30, 2003, the Fund was approximately 90% invested. We anticipate that the leveraging process will begin in June 2003 and that it could take several months to reach our target leverage of 36% of the Fund's total assets. We intend to borrow through an auction preferred stock offering at interest rates that provide an attractive spread between our borrowing costs and the preferred securities in our portfolio. While leverage can hurt total return in a weak market, the converse is also true. We believe that attempting to time the market is generally not successful. Therefore, we will seek to maintain our leverage position at near 36% of total assets though that level may vary somewhat as we adjust portfolio holdings. In order to try to reduce the effects of rising interest rates (falling bond prices) on the Fund's net asset value, we may seek to employ an active hedging strategy. (For a more complete explanation of the benefits and risks of leveraging, see page 1 of this report to shareholders.)

Investment Strategy

We are attempting to construct a diversified portfolio of investment-grade issuers. Our process involves a rigorous credit approval procedure prior to the purchase of an issuer. We have utilized both the new-issue and secondary markets to find Fund investments. The largest investments have been in the bank, insurance and real estate sectors, which are among the largest in the preferred securities market.

In Conclusion

We thank you for your investment in Preferred Income Strategies Fund, Inc., and we look forward to assisting you with your financial needs in the months and years ahead.

Sincerely,

/s/ Terry K. Glenn

Preferred Income Strategies Fund, Inc., April 30, 2003

NOTES TO FINANCIAL STATEMENTS

1. Significant Accounting Policies:

Preferred Income Strategies Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. Prior to commencement of operations on March 28, 2003, the Fund had no operations other than those relating to organizational matters and the sale of 4,189 shares of Common Stock on March 12, 2003 to Fund Asset

Edgar Filing: PREFERRED INCOME STRATEGIES FUND INC - Form N-CSR

Management, L.P. ("FAM") for \$100,012. The Fund's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, which may require the use of management accruals and estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to a fair statement of the results for the interim period presented. All such adjustments are of a normal, recurring nature. The Fund's Common Stock is listed on the New York Stock Exchange under the symbol PSY. The following is a summary of significant accounting policies followed by the Fund.

(a) Valuation of investments -- Portfolio securities are valued on the basis of prices furnished by one or more pricing services which determine prices for normal, institutional-size trading units of such securities using market information, transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders. In certain circumstances, portfolio securities are valued at the last sale price on the exchange that is the primary market for such securities, or the last quoted bid price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales during the day. The value of interest rate swaps, caps and floors is determined in accordance with a formula and then confirmed periodically by obtaining a bank quotation. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the over-the-counter market, valuation is the last asked price (options written) or the last bid price (options purchased). Obligations with remaining maturities of sixty days or less are valued at amortized cost, which approximates market value, unless this method no longer produces fair valuations. Rights or warrants to acquire stock, or stock acquired pursuant to the exercise of a right or warrant, may be valued taking into account various factors such as original cost to the Fund, earnings and net worth of the issuer, market prices for securities of similar issuers, assessment of the issuer's future prosperity, liquidation value or third party transactions involving the issuer's securities. Securities for which there exist no price quotations or valuations and all other assets are valued at fair value as determined in good faith by or on behalf of the Board of Directors of the Fund. Occasionally, events affecting the values of securities and other assets may occur between the times at which valuations of such securities are determined (that is, close of the market on which such securities trade) and the close of business on the NYSE. If events (for example, company announcement, natural disasters, market volatility) occur during such periods that are expected to materially affect the value for such securities, those securities may be valued at their fair market value as determined in good faith by the Fund's Board of Directors or by the investment adviser using a pricing service and/or procedures approved by the Board of Directors of the Fund.

(b) Derivative financial instruments -- The Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, its exposure to interest rate movements and movements in securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

o Options -- The Fund is authorized to write and purchase call and put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked to market to reflect the current market value of the option written.

When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing

Edgar Filing: PREFERRED INCOME STRATEGIES FUND INC - Form N-CSR

transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

o Financial futures contracts -- The Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

o Interest rate swaps -- The Fund is authorized to enter into interest rate swap agreements. In a swap agreement, the Fund exchanges with the counterparty their respective commitments to pay or receive interest on a specified notional principal amount. If the counterparty defaults on its obligation, the Fund's ability to receive interest will be delayed or limited. Furthermore, if the Fund does not have sufficient income to pay its obligation under the swap agreement, the Fund would be in default and the counterparty would be able to terminate the swap agreement. When the swap agreement is closed, the Fund records a gain or loss equal to the difference between the value of the swap agreement at the time it was entered into and the value at the time it was closed.

(c) Income taxes -- It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no Federal income tax provision is required.

(d) Security transactions and investment income -- Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Fund amortizes all premiums and discounts on debt securities.

(e) Offering expenses -- Direct expenses relating to the public offering of the Fund's Common Stock were charged to capital at the time of issuance of the shares.

(f) Dividends and distributions -- Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

(g) Custodian bank -- The Fund recorded an amount payable to the Custodian Bank reflecting an overnight overdraft which resulted from management estimates of available cash.

2. Investment Advisory Agreement and Transactions with Affiliates:

The Fund has entered into an Investment Advisory Agreement with FAM. The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of the Fund's portfolio and provides the

necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate of .60% of the Fund's average weekly net assets including proceeds from the issuance of Preferred Stock, plus the proceeds of any outstanding borrowings used for leverage. For the period March 28, 2003 to April 30, 2003, FAM earned fees of \$497,201, all of which was waived.

During the period March 28, 2003 to April 30, 2003, Merrill Lynch, Pierce, Fenner & Smith Incorporated, an affiliate of FAM, received underwriting fees of \$43,875,000 in connection with the issuance of the Fund's Common Stock.

For the period March 28, 2003 to April 30, 2003, the Fund reimbursed FAM \$2,301 for certain accounting services.

Certain officers and/or directors of the Fund are officers and/or directors of FAM, PSI, and/or ML & Co.

Preferred Income Strategies Fund, Inc. seeks to provide shareholders with current income and capital appreciation. The Fund seeks to achieve its objectives by investing primarily in a portfolio of preferred securities, including convertible preferred securities that may be converted into common stock or other securities of the same or a different issuer.

This report, including the financial information herein, is transmitted to shareholders of Preferred Income Strategies Fund, Inc. for their information. It is not a prospectus. The Fund intends to leverage its Common Stock to provide Common Stock shareholders with a potentially higher rate of return. Leverage creates risk for Common Stock shareholders, including the likelihood of greater volatility of net asset value and market price of Common Stock shares, and the

risk that fluctuations in short-term interest rates may reduce the Common Stock's yield. Past performance results shown in this report should not be considered a representation of future performance. Statements and other information herein are as dated and are subject to change.
