**SOUTHERN FIRST BANCSHARES, INC. AND SUBSIDIARY
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

NOTE 1 Nature of Business and Basis of Presentation

Business Activity

Southern First Bancshares, Inc. (the "Company") is a South Carolina corporation that owns all of the capital stock of Southern First Bank (the "Bank") and all of the stock of Greenville First Statutory Trust I and II (collectively, the "Trusts"). The Trusts are special purpose non-consolidated entities organized for the sole purpose of issuing trust preferred securities. The Bank's primary federal regulator is the Federal Deposit Insurance Corporation (the "FDIC"). The Bank is also regulated and examined by the South Carolina Board of Financial Institutions. The Bank is primarily engaged in the business of accepting demand deposits and savings deposits insured by the FDIC, and providing commercial, consumer and mortgage loans to the general public.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine month periods ended September 30, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 as filed with the Securities and Exchange Commission on March 2, 2016. The consolidated financial statements include the accounts of the Company and the Bank. In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 810, Consolidation, the financial statements related to the Trusts have not been consolidated.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amount of income and expenses during the reporting periods. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, real estate acquired in the settlement of loans, fair value of financial instruments, evaluating other-than-temporary-impairment of investment securities and valuation of deferred tax assets.

Business Segments

Beginning in 2016 the Company reports its activities as three business segments Commercial and Retail Banking, Mortgage Banking and Corporate. In determining proper segment definition, the Company considers the materiality of a potential segment and components of the business about which financial information is available and regularly evaluated, relative to a resource allocation and performance assessment. The Company accounts for intersegment revenues and expenses as if the revenue/expense transactions were generated to third parties, that is, at current market prices. Please refer to Note 7 Reportable Segments for further information on the reporting for the three business segments.

Reclassifications

Certain amounts, previously reported, have been reclassified to state all periods on a comparable basis and had no effect on shareholders' equity or net income.

Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Non-recognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management performed an evaluation to determine whether there have been any subsequent events since the balance sheet date and determined that no subsequent events occurred requiring accrual or disclosure.

Table of Contents*Initial Adoption of Fair Value Option*

In accordance with ASC 825-10 *Financial Instruments*, the Company adopted the fair value option for mortgage loans held for sale beginning on April 1, 2016. ASC 825-10 allows the Company to measure eligible financial assets and liabilities at fair value that are not otherwise required to be measured at fair value and to offset changes in the fair values of derivative instruments and the related hedged item by selecting the fair value option for the hedged item. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings at each subsequent reporting date. Prior to adoption, mortgage loans held for sale were carried at the lower of cost or fair value.

NOTE 2 Investment Securities

The amortized costs and fair value of investment securities are as follows:

(dollars in thousands)	September 30, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available for sale				
US government agencies	\$ 6,277	122	-	6,399

Total investment securities available for sale	\$ 89,945	717	723	89,939

During the first nine months of 2016, approximately \$33.5 million of investment securities were either sold or called, subsequently resulting in a gain on sale of investment securities of \$431,000.

Contractual maturities and yields on the Company's investment securities at September 30, 2016 and December 31, 2015 are shown in the following table. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

	December 31, 2015									
	Less than 12 months				12 months or longer				Total	
	#	Fair value	Unrealized losses	#	Fair value	Unrealized losses	#	Fair value	Unrealized losses	
Available for sale										
US government agencies	9	\$ 12,853	\$ 113	-	\$ -	\$ -	9	\$ 12,853	\$ 113	
SBA securities	-	-	-	2	4,691	133	2	4,691	133	
State and political subdivisions	7	3,125	17	3	1,220	20	10	4,345	37	
Mortgage-backed securities	27	40,868	440	-	-	-	27	40,868	440	
Total	43	\$ 56,846	\$ 570	5	\$ 5,911	\$ 153	48	\$ 62,757	\$ 723	

At September 30, 2016, the Company had eight individual investments with a fair market value of \$9.3 million that were in an unrealized loss position for less than 12 months and one individual investment with a fair market value of \$2.3 million that was in an unrealized loss position for 12 months or longer. The unrealized losses were primarily attributable to changes in interest rates, rather than deterioration in credit quality. The individual securities are each investment grade securities. The Company considers the length of time and extent to which the fair value of available-for-sale debt securities have been less than cost to conclude that such securities are not other-than-temporarily impaired. The Company also considers other factors such as the financial condition of the issuer including credit ratings and specific events affecting the operations of the issuer, volatility of the security, underlying assets that collateralize the debt security, and other industry and macroeconomic conditions. As the Company has no intent to sell securities with unrealized losses and it is not more-likely-than-not that the Company will be required to sell these securities before recovery of amortized cost, the Company has concluded that these securities are not impaired on an other-than-temporary basis.

Other investments are comprised of the following and are recorded at cost which approximates fair value.

Table of Contents

The Company has evaluated the Federal Home Loan Bank (FHLB) stock for impairment and determined that the investment in the FHLB stock is not other than temporarily impaired as of September 30, 2016 and ultimate recoverability of the par value of this investment is probable. All of the FHLB stock is used to collateralize advances with the FHLB.

At September 30, 2016, \$20.9 million of securities were pledged as collateral for repurchase agreements from brokers, and approximately \$16.8 million of securities were pledged to secure client deposits. At December 31, 2015, \$21.3 million of securities were pledged as collateral for repurchase agreements from brokers, and approximately \$11.1 million of securities were pledged to secure client deposits.

NOTE 3 Mortgage Loans Held for Sale

Mortgage loans originated and intended for sale in the secondary market are reported as loans held for sale and carried at fair value under the fair value option, which was adopted by the Company on April 1, 2016, with changes in fair value recognized in current period earnings. At the date of funding of the mortgage loan held for sale, the funded amount of the loan, the related derivative asset or liability of the associated interest rate lock commitment, less direct loan costs becomes the initial recorded investment in the loan held for sale. Such amount approximates the fair value of the loan. At September 30, 2016, mortgage loans held for sale totaled \$9.1 million compared to \$4.9 million at December 31, 2015.

Mortgage loans held for sale are considered de-recognized, or sold, when the Company surrenders control over the financial assets. Control is considered to have been surrendered when the transferred assets have been isolated from the Company, beyond the reach of the Company and its creditors; the purchaser obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets; and the Company does not maintain effective control over the transferred assets through an agreement that both entitles and obligates the Company to repurchase or redeem the transferred assets before their maturity or the ability to unilaterally cause the holder to return specific assets.

Gains and losses from the sale of mortgage loans are recognized based upon the difference between the sales proceeds and carrying value of the related loans upon sale and are recorded in mortgage banking income in the statement of income. Mortgage banking income also includes the unrealized gains and losses associated with the loans held for sale and the realized and unrealized gains and losses from derivatives.

Mortgage loans sold to investors by the Company, and which were believed to have met investor and agency underwriting guidelines at the time of sale, may be subject to repurchase or indemnification in the event of specific default by the borrower or subsequent discovery that underwriting standards were not met. The Company may, upon mutual agreement, agree to repurchase the loans or indemnify the investor against future losses on such loans. In such cases, the Company bears any subsequent credit loss on the loans.

Table of Contents**NOTE 4 Loans and Allowance for Loan Losses**

The following table summarizes the composition of our loan portfolio. Total gross loans are recorded net of deferred loan fees and costs, which totaled \$1.9 million as of September 30, 2016 and \$1.7 million as of December 31, 2015.

Maturities and Sensitivity of Loans to Changes in Interest Rates

The information in the following tables summarizes the loan maturity distribution by type and related interest rate characteristics based on the contractual maturities of individual loans, including loans which may be subject to renewal at their contractual maturity. Renewal of such loans is subject to review and credit approval, as well as modification of terms upon maturity. Actual repayments of loans may differ from the maturities reflected below, because borrowers have the right to prepay obligations with or without prepayment penalties.

Portfolio Segment Methodology*Commercial*

Commercial loans are assessed for estimated losses by grading each loan using various risk factors identified through periodic reviews. The Company applies historic grade-specific loss factors to each loan class. In the development of statistically derived loan grade loss factors, the Company observes historical losses over 20 quarters for each loan grade. These loss estimates are adjusted as appropriate based on additional analysis of external loss data or other risks identified from current economic conditions and credit quality trends. The allowance also includes an amount for the estimated impairment on nonaccrual commercial loans and commercial loans modified in a troubled debt restructuring (TDR), whether on accrual or nonaccrual status.

Consumer

For consumer loans, the Company determines the allowance on a collective basis utilizing historical losses over 20 quarters to represent its best estimate of inherent loss. The Company pools loans, generally by loan class with similar risk characteristics. The allowance also includes an amount for the estimated impairment on nonaccrual consumer loans and consumer loans modified in a TDR, whether on accrual or nonaccrual status.

Credit Quality Indicators*Commercial*

The Company manages a consistent process for assessing commercial loan credit quality by monitoring its loan grading trends and past due statistics. All loans are subject to individual risk assessment. The Company's risk categories include Pass, Special Mention, Substandard, and Doubtful, each of which is defined by banking regulatory agencies. Delinquency statistics are also an important indicator of credit quality in the establishment of the Company's allowance for credit losses.

Table of Contents

The Company categorizes its loans into risk categories based on relevant information about the ability of the borrower to service their debt such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. A description of the general characteristics of the risk grades is as follows:

Pass These loans range from minimal credit risk to average however still acceptable credit risk.

Special mention A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or the institution's credit position at some future date.

Substandard A substandard loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness, or weaknesses, that may jeopardize the liquidation of the debt. A substandard loan is characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.

Doubtful A doubtful loan has all of the weaknesses inherent in one classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of the currently existing facts, conditions and values, highly questionable and improbable.

The tables below provide a breakdown of outstanding commercial loans by risk category.

As of September 30, 2016 and December 31, 2015, consumer loans 30 days or more past due were 0.14% and 0.06% of total loans, respectively.

Table of Contents**Nonperforming assets**

The following table shows the nonperforming assets and the related percentage of nonperforming assets to total assets and gross loans. Generally, a loan is placed on nonaccrual status when it becomes 90 days past due as to principal or interest, or when the Company believes, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that collection of the contractual principal or interest on the loan is doubtful. A payment of interest on a loan that is classified as nonaccrual is recognized as a reduction in principal when received.

Following is a summary of our nonperforming assets, including nonaccruing TDRs.

(dollars in thousands)	September 30, 2016	December 31, 2015

Table of Contents**Impaired Loans**

The table below summarizes key information for impaired loans. The Company's impaired loans include loans on nonaccrual status and loans modified in a TDR, whether on accrual or nonaccrual status. These impaired loans may have estimated impairment which is included in the allowance for loan losses. The Company's commercial and consumer impaired loans are evaluated individually to determine the related allowance for loan losses.

Allowance for Loan Losses

The allowance for loan loss is management's estimate of credit losses inherent in the loan portfolio. The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The Company has an established process to determine the adequacy of the allowance for loan losses that assesses the losses inherent in the portfolio. While the Company attributes portions of the allowance to specific portfolio segments, the entire allowance is available to absorb credit losses inherent in the total loan portfolio. The Company's process involves procedures to appropriately consider the unique risk characteristics of the commercial and consumer loan portfolio segments. For each portfolio segment, impairment is measured individually for each impaired loan. The Company's allowance levels are influenced by loan volume, loan

grade or delinquency status, historic loss experience and other economic conditions.

NOTE 5 Troubled Debt Restructurings

At September 30, 2016, the Company had 27 loans totaling \$9.2 million compared to 29 loans totaling \$8.0 million at December 31, 2015, which were considered as TDRs. The Company considers a loan to be a TDR when the debtor experiences financial difficulties and the Company grants a concession to the debtor that it would not normally consider. Concessions can relate to the contractual interest rate, maturity date, or payment structure of the note. As part of the workout plan for individual loan

relationships, the Company may restructure loan terms to assist borrowers facing financial challenges in the current economic environment. To date, the Company has restored three commercial loans previously classified as TDRs to accrual status.

Table of Contents

The following table summarizes the concession at the time of modification and the recorded investment in the Company's TDRs before and after their modification during the nine months ended September 30, 2016 and 2015, respectively.

For the nine months ended September 30, 2016

(dollars in thousands)	Renewals deemed a concession	Reduced or deferred payments	Converted to interest only	Maturity date extensions	Total Number of loans	Pre-modification outstanding recorded investment	Post-modification outstanding recorded investment
Commercial							
Owner occupied	1	-	-	-	1	\$ 18	\$ 22
Business	1	-	-	-	1	2,381	2,381
Consumer							
Real estate	1	-	-	-	1	188	188
Other	1	-	-	-	1	26	30
Total loans	4	-	-	-	4	\$ 2,613	\$ 2,621

For the nine months ended September 30, 2015

(dollars in thousands)	Renewals deemed a concession	Reduced or deferred payments	Converted to interest only	Maturity date extensions	Total Number of loans	Pre-modification outstanding recorded investment	Post-modification outstanding recorded investment
Commercial							
Non-owner occupied RE	1	-	-	1	2	\$ 112	\$ 112
Business	-	-	-	-	-	-	-
Total loans	1	-	-	1	2	\$ 112	\$ 112

As of September 30, 2016 there was one loan with a recorded investment of \$30,000 modified as a TDR for which there was a payment default (60 days past due) within 12 months of the restructuring date. There were no such loans as of September 30, 2015.

NOTE 6 Derivative Financial Instruments

The Company utilizes derivative financial instruments primarily to hedge its exposure to changes in interest rates. All derivative financial instruments are recognized as either assets or liabilities and measured at fair value. The Company accounts for all of its derivatives as free-standing derivatives and does not designate any of these instruments for hedge accounting. Therefore, the gain or loss resulting from the change in the fair value of the derivative is recognized in the Company's statement of income during the period of change.

The Company enters into commitments to originate residential mortgage loans held for sale, at specified interest rates and within a specified period of time, with clients who have applied for a loan and meet certain credit and underwriting criteria (interest rate lock commitments). These interest rate lock commitments (IRLCs) meet the definition of a derivative financial instrument and are reflected in the balance sheet at fair value with changes in fair value recognized in current period earnings. Unrealized gains and losses on the IRLCs are recorded as derivative assets and derivative liabilities, respectively, and are measured based on the value of the underlying mortgage loan, quoted mortgage-backed securities (MBS) prices and an estimate of the probability that the mortgage loan will fund within the terms of the interest rate lock commitment, net of estimated commission expenses.

The Company manages the interest rate and price risk associated with its outstanding IRLCs and mortgage loans held for sale by entering into derivative instruments such as forward sales of MBS. Management expects these derivatives will experience changes in fair value opposite to changes in fair value of the IRLCs and mortgage loans held for sale, thereby reducing earnings volatility. The Company takes into account various factors and strategies in determining the portion of the mortgage pipeline (IRLCs and mortgage loans held for sale) it wants to economically hedge.

Table of Contents

The following table summarizes the Company's outstanding financial derivative instruments as of September 30, 2016. Derivative financial instruments were not material at December 31, 2015.

(dollars in thousands)	Notional	Balance Sheet Location	Fair Value Asset/(Liability)
Mortgage loan interest rate lock commitments	\$40,322	Other assets	\$ 619
MBS forward sales commitments	26,750	Other assets	(112)
Total derivative financial instruments	\$67,072		\$ 507

NOTE 7 Fair Value Accounting

FASB ASC 820, Fair Value Measurement and Disclosures, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. FASB ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted market price in active markets

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include certain debt and equity securities that are traded in an active exchange market.

Level 2 Significant other observable inputs

Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include fixed income securities and mortgage-backed securities that are held in the Company's available-for-sale portfolio and valued by a third-party pricing service, as well as certain impaired loans.

Level 3 Significant unobservable inputs

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. These methodologies may result in a significant portion of the fair value being derived from unobservable data.

Following is a description of valuation methodologies used for assets recorded at fair value.

Investment Securities

Securities available for sale are valued on a recurring basis at quoted market prices where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable securities. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange or U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities and debentures issued by government sponsored entities, municipal bonds and corporate debt securities. In certain cases where there is limited activity or less transparency around inputs to valuations, securities are classified as Level 3 within the valuation hierarchy. Securities held to maturity are valued at quoted market prices or dealer quotes similar to securities available for sale. The carrying value of Other Investments, such as FHLB stock, approximates fair value based on their redemption provisions.

Table of Contents

Mortgage Loans Held for Sale

Loans held for sale include mortgage loans which are saleable into the secondary mortgage markets and their fair values are estimated using observable quoted market or contracted prices or market price equivalents, which would be used by other market participants. These saleable loans are considered Level 2.

Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan may be considered impaired and an allowance for loan losses may be established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures the impairment in accordance with FASB ASC 310, *Receivables*. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value, and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At September 30, 2016, a significant portion of the impaired loans were evaluated based on the fair value of the collateral. In accordance with FASB ASC 820, *Fair Value Measurement and Disclosures*, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company considers the impaired loan as nonrecurring Level 2. The Company's current loan and appraisal policies require the Bank to obtain updated appraisals on an as is basis at renewal, or in the case of an impaired loan, on an annual basis, either through a new external appraisal or an appraisal evaluation. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company considers the impaired loan as nonrecurring Level 3. The fair value of impaired loans may also be estimated using the present value of expected future cash flows to be realized on the loan, which is also considered a Level 3 valuation. These fair value estimates are subject to fluctuations in assumptions about the amount and timing of expected cash flows as well as the choice of discount rate used in the present value calculation.

Other Real Estate Owned (OREO)

OREO, consisting of properties obtained through foreclosure or in satisfaction of loans, is reported at the lower of cost or fair value, determined on the basis of current appraisals, comparable sales, and other estimates of value obtained principally from independent sources, adjusted for estimated selling costs (Level 2). At the time of foreclosure, any excess of the loan balance over the fair value of the real estate held as collateral is treated as a charge against the allowance for loan losses. Gains or losses on sale and generally any subsequent adjustments to the value are recorded as a component of real estate owned activity. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company considers the OREO as nonrecurring Level 3.

Derivative Financial Instruments

The Company estimates the fair value of IRLCs based on the value of the underlying mortgage loan, quoted MBS prices and an estimate of the probability that the mortgage loan will fund within the terms of the IRLC, net of commission expenses (Level 2). The Company estimates the fair value of forward sales commitments based on quoted MBS prices (Level 2).

Table of Contents*Assets and Liabilities Recorded at Fair Value on a Recurring Basis*

The tables below present the recorded amount of assets and liabilities measured at fair value on a recurring basis as of September 30, 2016 and December 31, 2015.

(dollars in thousands)	September 30, 2016

Mortgage-backed securities	-	46,804	-	46,804
Total assets measured at fair value on a recurring basis	\$ -	89,939	-	89,939

The Company has no liabilities carried at fair value or measured at fair value on a recurring basis as of December 31, 2015.

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Company is predominantly an asset based lender with real estate serving as collateral on more than 80% of loans as of September 30, 2016. Loans which are deemed to be impaired are valued net of the allowance for loan losses, and other real estate owned is valued at the lower of cost or net realizable value of the underlying real estate collateral. Such market values are generally obtained using independent appraisals, which the Company considers to be level 2 inputs. The tables below present the recorded amount of assets and liabilities measured at fair value on a nonrecurring basis as of September 30, 2016 and December 31, 2015.

(dollars in thousands)	As of September 30, 2016			
	Level 1	Level 2	Level 3	Total
Assets				
Impaired loans	\$ -	5,243	6,335	11,578

Impaired loans	\$ -	9,102	557	9,659
Other real estate owned	-	2,208	267	2,475

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Total assets measured at fair value on a nonrecurring basis	\$	-	11,310	824	12,134
---	----	---	--------	-----	--------

The Company has no liabilities carried at fair value or measured at fair value on a nonrecurring basis as of September 30, 2016 and December 31, 2015.

Table of Contents

For Level 3 assets and liabilities measured at fair value on a recurring or nonrecurring basis as of September 30, 2016, the significant unobservable inputs used in the fair value measurements were as follows:

	Valuation Technique	Significant Unobservable Inputs	Range of Inputs
Impaired loans	Appraised Value/ Discounted Cash Flows	Discounts to appraisals or cash flows for estimated holding and/or selling costs or age of appraisal	0-25%
Other real estate owned	Appraised Value/ Comparable Sales	Discounts to appraisals for estimated holding or selling costs	0-25%

Fair Value of Financial Instruments

Financial instruments require disclosure of fair value information, whether or not recognized in the consolidated balance sheets, when it is practical to estimate the fair value. A financial instrument is defined as cash, evidence of an ownership interest in an entity or a contractual obligation which requires the exchange of cash. Certain items are specifically excluded from the disclosure requirements, including the Company's common stock, premises and equipment and other assets and liabilities.

The following is a description of valuation methodologies used to estimate fair value for certain other financial instruments.

Fair value approximates carrying value for the following financial instruments due to the short-term nature of the instrument: cash and due from banks, federal funds sold, federal funds purchased, and securities sold under agreement to repurchase.

Deposits Fair value for demand deposit accounts and interest-bearing accounts with no fixed maturity date is equal to the carrying value. The fair value of certificate of deposit accounts are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

FHLB Advances and Other Borrowings Fair value for FHLB advances and other borrowings are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

Junior subordinated debentures Fair value for junior subordinated debentures are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

The Company has used management's best estimate of fair value based on the above assumptions. Thus, the fair values presented may not be the amounts that could be realized in an immediate sale or settlement of the instrument. In addition, any income taxes or other expenses, which would be incurred in an actual sale or settlement, are not taken into consideration in the fair value presented.

The estimated fair values of the Company's financial instruments at September 30, 2016 and December 31, 2015 are as follows:

(dollars in thousands)	September 30, 2016				
	Carrying Amount	Fair Value	Level 1	Level 2	Level 3

NOTE 8 Earnings Per Common Share

The following schedule reconciles the numerators and denominators of the basic and diluted earnings per share computations for the three and nine month periods ended September 30, 2016 and 2015. Dilutive common shares arise from the potentially dilutive effect of the Company's stock options that were outstanding at September 30, 2016. The assumed conversion of stock options can create a difference between basic and dilutive net income per common share. At September 30, 2016 and 2015, there were 108,457 and 88,000 options, respectively, that were not considered in computing diluted earnings per common share because they were anti-dilutive.

(dollars in thousands, except share data)	Three months ended		Nine months ended

Total assets	\$ 1,277,213	9,678	119,431	(116,576)	1,289,746

Commercial and retail banking. The Company's primary business is to provide traditional deposit and lending products and services to its commercial and retail banking clients.

Mortgage banking. The mortgage banking segment provides mortgage loan origination services for loans that will be sold in the secondary market to investors.

Corporate. Corporate is comprised primarily of compensation and benefits for certain members of management and interest on parent company debt.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion reviews our results of operations for the three and nine month periods ended September 30, 2016 as compared to the three and nine month periods ended September 30, 2015 and assesses our financial condition as of September 30, 2016 as compared to December 31, 2015. You should read the following discussion and analysis in conjunction with the accompanying consolidated financial statements and the related notes and the consolidated financial statements and the related notes for the year ended December 31, 2015 included in our Annual Report on Form 10-K for that period. Results for the three and nine month periods ended September 30, 2016 are not necessarily indicative of the results for the year ending December 31, 2016 or any future period.

CAUTIONARY WARNING REGARDING FORWARD-LOOKING STATEMENTS

This report, including information included or incorporated by reference in this report, contains statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may relate to our financial condition, results of operations, plans, objectives, or future performance. These statements are based on many assumptions and estimates and are not guarantees of future performance. Our actual results may differ materially from those anticipated in any forward-looking statements, as they will depend on many factors about which we are unsure, including many factors which are beyond our control. The words "may," "would," "could," "should," "will," "expect," "anticipate," "predict," "project," "potential," "believe," "continue," "assume," "intend," "plan," and "es" expressions, are meant to identify such forward-looking statements. Potential risks and uncertainties that could cause our actual results to differ from those anticipated in any forward-looking statements include, but are not limited to, those described under Item 1A- Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2015, as well as the following:

Restrictions or conditions imposed by our regulators on our operations;
Increases in competitive pressure in the banking and financial services industries;

Table of Contents

Our ability to identify and retain individuals with experience and relationships in the markets in which we intend to expand, including our newly announced Raleigh, North Carolina market;
The time and costs of evaluating new markets, hiring or retaining experienced local management, and opening new offices and the time lags between these activities and the generation of sufficient assets and deposits to support the costs of the expansion;
Changes in access to funding or increased regulatory requirements with regard to funding;
Changes in deposit flows;
Credit losses as a result of declining real estate values, increasing interest rates, increasing unemployment, changes in payment behavior or other factors;
Credit losses due to loan concentration;
Changes in the amount of our loan portfolio collateralized by real estate and weaknesses in the real estate market;
Our ability to attract and retain key personnel;
Changes in the interest rate environment which could reduce anticipated or actual margins;
Changes in political conditions or the legislative or regulatory environment, including governmental initiatives affecting the financial services industry;
Changes in economic conditions resulting in, among other things, a deterioration in credit quality;
Changes occurring in business conditions and inflation;
Cybersecurity breaches, including potential business disruptions or financial losses;
Changes in technology;
The adequacy of the level of our allowance for loan losses and the amount of loan loss provisions required in future periods;
Examinations by our regulatory authorities, including the possibility that the regulatory authorities may, among other things, require us to increase our allowance for loan losses or write-down assets;
Changes in monetary and tax policies;
The rate of delinquencies and amounts of loans charged-off;
The rate of loan growth in recent years and the lack of seasoning of a portion of our loan portfolio;
Our ability to maintain appropriate levels of capital and to comply with our capital ratio requirements;
Adverse changes in asset quality and resulting credit risk-related losses and expenses;
Changes in accounting policies and practices; and
Other risks and uncertainties detailed in this Quarterly Report on Form 10-Q and, from time to time, in our other filings with the Securities and Exchange Commission (the "SEC").

If any of these risks or uncertainties materialize, or if any of the assumptions underlying such forward-looking statements proves to be incorrect, our results could differ materially from those expressed in, implied or projected by, such forward-looking statements. For information with respect to factors that could cause actual results to differ from the expectations stated in the forward-looking statements, see "Risk Factors" under Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2015. We urge investors to consider all of these factors carefully in evaluating the forward-looking statements contained in this Quarterly Report on Form 10-Q. We make these forward-looking statements as of the date of this document and we do not intend, and assume no obligation, to update the forward-looking statements or to update the reasons why actual results could differ from those expressed in, or implied or projected by, the forward-looking statements.

Table of Contents

OVERVIEW

Our business model continues to be client-focused, utilizing relationship teams to provide our clients with a specific banker contact and support team responsible for all of their banking needs. The purpose of this structure is to provide a consistent and superior level of professional service, and we believe it provides us with a distinct competitive advantage. We consider exceptional client service to be a critical part of our culture, which we refer to as "ClientFIRST."

At September 30, 2016, we had total assets of \$1.29 billion, a 6.0% increase from total assets of \$1.22 billion at December 31, 2015. The largest components of our total assets are net loans and securities which were \$1.10 billion and \$73.6 million, respectively, at September 30, 2016. Comparatively, our net loans and securities totaled \$991.3 million and \$95.5 million, respectively, at December 31, 2015. Our liabilities and shareholders' equity at September 30, 2016 totaled \$1.18 billion and \$106.0 million, respectively, compared to liabilities of \$1.12 billion and shareholders' equity of \$94.2 million at December 31, 2015. The principal component of our liabilities is deposits which were \$1.05 billion and \$985.7 million at September 30, 2016 and December 31, 2015, respectively. We received a short-term client deposit of approximately \$40 million in June 2016; however, a majority of the deposit was withdrawn in early July 2016.

Like most community banks, we derive the majority of our income from interest received on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we pay interest. Consequently, one of the key measures of our success is our amount of net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits and borrowings. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities, which is called our net interest spread. In addition to earning interest on our loans and investments, we earn income through fees and other charges to our clients.

Our net income to common shareholders was \$3.4 million and \$2.7 million for the three months ended September 30, 2016 and 2015, respectively, an increase of \$706 thousand, or 25.9%. Diluted earnings per share (EPS) was \$0.51, for the third quarter of 2016 as compared to \$0.41 for the same period in 2015. The increase in net income resulted primarily from increases in net interest income and noninterest income, partially offset by an increase in noninterest and income tax expenses.

Our net income to common shareholders was \$9.7 million and \$7.3 million for the nine months ended September 30, 2016 and 2015, respectively, an increase of \$2.4 million, or 33.2%. Diluted EPS was \$1.45 for the nine months ended September 30, 2016 as compared to \$1.12 for the same period in 2015. The increase in net income resulted primarily from increases in net interest income and noninterest income, partially offset by an increase in noninterest and income tax expenses.

Economic conditions, competition, and the monetary and fiscal policies of the Federal government significantly affect most financial institutions, including the Bank. Lending and deposit activities and fee income generation are influenced by levels of business spending and investment, consumer income, consumer spending and savings, capital market activities, and competition among financial institutions, as well as customer preferences, interest rate conditions and prevailing market rates on competing products in our market areas.

RESULTS OF OPERATIONS

Net Interest Income and Margin

Our level of net interest income is determined by the level of earning assets and the management of our net interest margin. Our net interest income was \$10.9 million for the three month period ended September 30, 2016, a 10.6% increase over net interest income of \$9.8 million for the same period in 2015. In comparison, our average earning assets increased 10.6%, or \$115.2 million, during the third quarter of 2016 compared to the third quarter of 2015, while our interest-bearing liabilities increased by \$65.8 million during the same period. Our net interest income was \$31.7 million for the nine month period ended September 30, 2016, an 11.6% increase over net interest income of \$28.4 million for the same period in 2015. In comparison, our average earning assets increased 12.5%, or \$129.3 million, during the first nine months of 2016 compared to the first nine months of 2015, while our interest-bearing liabilities increased by \$88.9 million during the same period. The increase in average earning assets is primarily related to an increase in average loans and investment securities, while the increase in average interest-bearing liabilities is primarily a result of an increase in interest-bearing deposits.

Table of Contents

We have included a number of tables to assist in our description of various measures of our financial performance. For example, the Average Balances, Income and Expenses, Yields and Rates table reflects the average balance of each category of our assets and liabilities as well as the yield we earned or the rate we paid with respect to each category during the three and nine month periods ended September 30, 2016 and 2015. A review of this table shows that our loans typically provide higher interest yields than do other types of interest-earning assets, which is why we direct a substantial percentage of our earning assets into our loan portfolio. Similarly, the Rate/Volume Analysis table demonstrates the effect of changing interest rates and changing volume of assets and liabilities on our financial condition during the periods shown. We also track the sensitivity of our various categories of assets and liabilities to changes in interest rates, and we have included tables to illustrate our interest rate sensitivity with respect to interest-earning accounts and interest-bearing accounts.

The following tables set forth information related to our average balance sheets, average yields on assets, and average costs of liabilities. We derived these yields by dividing income or expense by the average balance of the corresponding assets or liabilities. We derived average balances from the daily balances throughout the periods indicated. During the same periods, we had no securities purchased with agreements to resell. All investments owned have an original maturity of over one year. Nonaccrual loans are included in the following tables. Loan yields have been reduced to reflect the negative impact on our earnings of loans on nonaccrual status. The net of capitalized loan costs and fees are amortized into interest income on loans.

Average Balances, Income and Expenses, Yields and Rates

(dollars in thousands)	Average Balance	Income/ Expense	For the Three Months Ended September 30,			
			2016 Yield/ Rate ⁽¹⁾	Average Balance	Income/ Expense	2015 Yield/ Rate ⁽¹⁾

Net interest income		\$ 10,880			\$ 9,838	

(1) Annualized for the three month period.

(2) The tax-equivalent adjustment to net interest income adjusts the yield for assets earning tax-exempt income to a comparable yield on a taxable basis.

(3) Includes mortgage loans held for sale.

Our net interest margin, on a tax-equivalent basis, was 3.63% for the three months ended September 30, 2016 compared to 3.62% for the third quarter of 2015. While the yield on our interest-earning assets decreased by three basis points, our net interest margin increased by one basis point during the 2016 period as our interest-earning assets grew by \$115.2 million at an average rate of 4.30% compared to growth of \$65.8 million in interest-bearing liabilities at an average cost of 0.86%.

Table of Contents

Our average interest-earning assets increased by \$115.2 million for the three months ended September 30, 2016 as compared to the same quarter in 2015, primarily related to an \$119.2 million increase in our average loan balances during the 2016 period. However, the yield on our interest-earning assets decreased by three basis points driven by an eight basis point decrease in our loan yield. The decline in yield on our loan portfolio was driven primarily by loans being originated or renewed at market rates which are lower than those in the past.

In addition, our average interest-bearing liabilities increased by \$65.8 million during the third quarter of 2016 as compared to the third quarter of 2015, while the cost of our interest-bearing liabilities declined by two basis points during the same period. The slight reduction in cost during the 2016 period resulted primarily from a \$58.7 million increase in our interest-bearing deposits which have a lower cost than our other interest-bearing liabilities. In addition, the cost of our other interest-bearing liabilities, of which 56% are at variable rates tied to LIBOR, increased in relation to current market rates and trends.

Our net interest spread was 3.44% for the three months ended September 30, 2016 compared to 3.45% for the same period in 2015. The net interest spread is the difference between the yield we earn on our interest-earning assets and the rate we pay on our interest-bearing liabilities. The three basis point reduction in yield on our interest-earning assets, slightly offset by the two basis point decrease in rate on our interest-bearing liabilities, resulted in a one basis point decrease in our net interest spread for the 2016 period.

(1) Annualized for the nine month period.

(2) The tax-equivalent adjustment to net interest income adjusts the yield for assets earning tax-exempt income to a comparable yield on a taxable basis.

(3) Includes mortgage loans held for sale.

Table of Contents

Our net interest margin, on a tax-equivalent basis, was 3.66% for the nine months ended September 30, 2016 compared to 3.69% for the first nine months of 2015. The decrease in net interest margin for the first nine months of 2016 as compared to the same period in 2015 was driven primarily by a five basis point reduction in the yield on our interest-earning assets.

Our average interest-earning assets increased by \$129.3 million for the first nine months of 2016 as compared to the 2015 period due primarily to a \$110.0 million increase in our average loan balances for the 2016 period. However, the yield on our interest-earning assets decreased by five basis points due primarily to a four basis point decrease in our loan yield combined with a lower yield on our investment securities. The decline in yield on our loan portfolio was driven primarily by loans being originated or renewed at market rates which are lower than those in the past.

In addition, our average interest-bearing liabilities increased by \$88.9 million during the nine months ended September 30, 2016 as compared to the first nine months of 2015. Both the cost of our interest-bearing liabilities and interest-bearing deposits remained flat during the same period, despite the \$89.4 million increase in our average interest-bearing deposits. In addition, the cost of our other interest-bearing liabilities, of which 56% are at variable rates tied to LIBOR, increased in relation to current market rates and trends.

Our net interest spread was 3.48% for the nine months ended September 30, 2016 compared to 3.53% for the same period in 2015. The five basis point decrease in our net interest spread for the 2016 period was driven by the five basis point reduction in yield on our interest-earning assets.

Rate/Volume Analysis

Net interest income can be analyzed in terms of the impact of changing interest rates and changing volume. The following table sets forth the effect which the varying levels of interest-earning assets and interest-bearing liabilities and the applicable rates have had on changes in net interest income for the periods presented.

(dollars in thousands)	September 30, 2016 vs. 2015 Increase (Decrease) Due to				Three Months Ended September 30, 2015 vs. 2014 Increase (Decrease) Due to			
	Volume	Rate	Rate/ Volume		Volume	Rate	Rate/ Volume	
			Volume	Total			Volume	Total
Interest income								
Loans	\$ 1,343	(195)	(24)	1,124	\$ 1,781	(210)	(38)	1,533
Investment securities	116	(69)	(23)	24	(15)	(15)	1	(29)
Federal funds sold	(18)	32	(16)	(2)	6	3	-	9
Total interest income	1,441	(232)	(63)	1,146	1,772	(222)	(37)	1,513
Interest expense								
Deposits	85	(63)	(6)	16	144	66	13	223
FHLB advances and other borrowings	54	21	1	76	(75)	17	(1)	(59)
Junior subordinated debt	-	12	-	12	-	2	-	2
Total interest expense	139	(30)	(5)	104	69	85	12	166
Net interest income	\$ 1,302	(202)	(58)	1,042	\$ 1,703	(307)	(49)	1,347

Net interest income, the largest component of our income, was \$10.9 million for the three-month period ended September 30, 2016 and \$9.8 million for the three months ended September 30, 2015, a \$1.0 million, or 10.6%, increase during the third quarter of 2016. The increase in net interest income is due to a \$1.1 million increase in interest income, partially offset by a \$104,000 increase in interest expense. During the third quarter of 2016, the primary driver of the increase in net interest income was the \$115.2 million increase in our average interest-earning assets as compared to the third quarter of 2015.

Table of Contents

(dollars in thousands)	September 30, 2016 vs. 2015 Increase (Decrease) Due to				Nine Months Ended September 30, 2015 vs. 2014 Increase (Decrease) Due to			
	Volume	Rate	Rate/ Volume		Volume	Rate	Rate/ Volume	
			Volume	Total			Volume	Total
Interest income								
Loans	\$3,713	(122)	(14)	3,577	\$5,255	(428)	(80)	4,747
Investment securities	495	(175)	(80)	240	(223)	(63)	10	(276)
Federal funds sold	(17)	76	(16)	43	13	10	2	25
Total interest income	4,191	(221)	(110)	3,860	5,045	(481)	(68)	4,496
Interest expense								
Deposits	382	(47)	(7)	328	398	60	11	469
Note payable and other	(10)	206	(1)	195	(147)	(23)	1	(169)
Junior subordinated debt	-	36	-	36	-	3	-	3
Total interest expense	372	195	(8)	559	251	40	12	303
Net interest income	\$3,819	(416)	(102)	3,301	\$4,794	(521)	(80)	4,193

Net interest income for the nine months ended September 30, 2016 was \$31.7 million compared to \$28.4 million for the first nine months ended September 30, 2015, a \$3.3 million, or 11.6% increase during the first nine months of 2016. The increase in net interest income is due to a \$3.9 million increase in interest income, offset in part by a \$559,000 increase in interest expense. The \$129.3 million increase in average earning assets during the nine months ended September 30, 2016 as compared to nine months ended September 30, 2015 was the primary driver of the increase in net interest income during the 2016 period.

Provision for Loan Losses

We have established an allowance for loan losses through a provision for loan losses charged as an expense on our consolidated statements of income. We review our loan portfolio periodically to evaluate our outstanding loans and to measure both the performance of the portfolio and the adequacy of the allowance for loan losses. Please see the discussion below under *Balance Sheet Review Allowance for Loan Losses* for a description of the factors we consider in determining the amount of the provision we expense each period to maintain this allowance.

For the three and nine months ended September 30, 2016, we incurred a noncash expense related to the provision for loan losses of \$825,000 and \$2.0 million, respectively, which resulted in an allowance for loan losses of \$14.5 million, or 1.30% of gross loans, for the 2016 period. For the three and nine months ended September 30, 2015, our provision for loan losses of \$875,000 and \$2.5 million, respectively, resulted in an allowance for loan losses of \$13.4 million, or 1.35% of gross loans, for the 2015 period. During the past 12 months, our loan balances increased by \$120.9 million, while the amount of our nonperforming loans and classified loans declined. Factors such as these are also considered in determining the amount of loan loss provision necessary to maintain our allowance for loan losses at an adequate level.

Noninterest Income

The following table sets forth information related to our noninterest income.

(dollars in thousands)	Three months ended September 30,		Nine months ended September 30,	
	2016	2015	2016	2015
Mortgage banking income	\$ 2,003	1,332	5,685	3,816
Service fees on deposit accounts	269	230	732	676
Income from bank owned life insurance	187	167	553	498
Gain on sale of investment securities	106	2	431	297
Other income	452	393	1,320	1,093
Total noninterest income	\$ 3,017	2,124	8,721	6,380

Table of Contents

Noninterest income increased \$893,000, or 42.0%, for the third quarter of 2016 as compared to the same period in 2015. The increase in total noninterest income during this 2016 period resulted primarily from the following:

Mortgage banking income increased by \$671,000, or 50.4%, driven primarily by a transition to mandatory delivery of mortgage loans to the secondary market in April 2016 (which traditionally results in a higher profit margin upon sale) combined with an increased volume of loans originated. In addition, we have added two mortgage originators to our mortgage team within the past 12 months which has contributed to the increased volume in mortgage loan originations.

Service fees on deposit accounts increased \$39,000, or 17.0%, driven by increased non-sufficient funds (NSF) and overdraft fee income.

Gain on sale of investment securities increased to \$106,000 for the third quarter of 2016.

Other income increased \$59,000, or 15.0%, driven by increased appraisal review fees, rental income, ATM and debit card exchange income, and wire transfer fees.

Noninterest income increased \$2.3 million, or 36.7%, during the nine months ended September 30, 2016 as compared to the same period in 2015. The increase in total noninterest income during the nine months ended September 30, 2016 resulted primarily from a \$1.9 million increase in mortgage banking income, a \$56,000 increase in service fees on deposit accounts, a \$55,000 increase in income from bank owned life insurance, a \$134,000 increase in gain on sale of investment securities, and a \$227,000 increase in other income which consists primarily of loan fee income from late charges, line of credit fees, and appraisal review fees; ATM and debit card transactions; wire transfer fees; and rent income from tenants at our Columbia, South Carolina office.

In accordance with the requirement set forth under the Dodd-Frank Wall Street Reform and Consumer Protection Act, in June 2011, the Federal Reserve approved a final rule which caps an issuer's base interchange fee at 21 cents per transaction and allows an additional 5 basis point charge per transaction to help cover fraud losses. Although the rule does not apply to institutions with less than \$10 billion in assets, such as our Bank, there is concern that the price controls may harm community banks, which could be pressured by the marketplace to lower their own interchange rates. Our ATM/Debit card fee income is included in other noninterest income and was \$220,000 and \$201,000 for the three months ended September 30, 2016 and 2015, respectively, and \$641,000 and \$573,000 for the nine months ended September 30, 2016 and 2015, respectively, the majority of which related to interchange fee income.

Noninterest expenses

The following table sets forth information related to our noninterest expenses.

	Three months ended September 30,		Nine months ended September 30,	
	2016	2015	2016	2015
(dollars in thousands)				
Compensation and benefits	\$ 4,948	\$ 4,313	14,353	12,695
Occupancy	908	845	2,670	2,424
Real estate owned expenses	81	148	725	1,003
Data processing and related costs	690	588	1,916	1,747
Insurance	227	215	678	630
Professional fees	326	180	864	646
Marketing	195	217	625	677
Other	425	365	1,339	1,155
Total noninterest expense	\$ 7,800	\$ 6,871	23,170	20,977

Noninterest expense was \$7.8 million for the three months ended September 30, 2016, a \$929,000, or 13.5%, increase from noninterest expense of \$6.9 million for the three months ended September 30, 2015. Significant fluctuations in noninterest expenses resulted from the following:

Compensation and benefits expense increased \$635,000, or 14.7%, relating primarily to increases in base compensation, incentive compensation and benefits expenses. Base compensation increased by \$1.0 million driven by the cost of 10 additional employees, four of which were hired in conjunction with the opening of our new office in Raleigh, North Carolina, with the remainder being hired to support our mortgage department as well as service our clients and support loan and deposit growth. Incentive compensation increased by \$127,000, while benefits expense decreased by \$79,000 during the 2016 period. The increase in incentive compensation related to the additional number of employees at September 30, 2016 while the decrease in benefits expenses was driven by a decrease in retirement expenses for the 2016 period.

Table of Contents

Occupancy expenses increased by \$63,000, or 7.5%, driven by increased rent expense as well as additional insurance and property tax expenses on the properties we own.

Data processing and related costs increased by \$102,000, or 17.3%, driven by increased software licensing and maintenance costs as well as ATM/Debit card related expenses.

Professional fees increased by \$146,000, or 81.1%, due to increased legal and accounting costs primarily related to the increased size of our institution as well as professional service fees related to our mortgage operations.

Other noninterest expenses increased by \$60,000, or 16.4%, driven by an increase in travel and entertainment expenses, collection expenses, and deposit account losses.

Partially offsetting the increases in noninterest expense was a decrease in real estate owned expenses of \$67,000, or 45.3%, due primarily to a loss on sale of property during the 2015 period.

Our efficiency ratio was 56.1% for the third quarter of 2016 compared to 57.4% for the same period in 2015. The efficiency ratio represents the percentage of one dollar of expense required to be incurred to earn a full dollar of revenue and is computed by dividing noninterest expense by the sum of net interest income and noninterest income.

Noninterest expense for the nine months ended September 30, 2016 increased 10.5%, or \$2.2 million, as compared to the nine months ended September 30, 2015. The increase was driven primarily by the \$1.7 million increase in compensation and benefits expense which relates to the 10 additional employees during the 2016 period, as stated above. In addition, noninterest expense also included increases of \$246,000 in occupancy expense, \$169,000 in data processing and related costs, \$218,000 in professional fees, and \$184,000 in other noninterest expenses. Partially offsetting the increases in noninterest expense was a decrease of \$278,000 in real estate owned expenses during the first nine months of 2016.

We incurred income tax expense of \$1.8 million for the three months ended September 30, 2016 as compared to \$1.5 million during the same period in 2015. Income tax expense for the nine months ended September 30, 2016 was \$5.5 million as compared to \$4.0 million for the same period of 2015. Our effective tax rate was 36.0% and 35.3% for the nine months ended September 30, 2016 and 2015, respectively. The increase in the effective tax rate during the 2016 period is primarily a result of the lesser impact of tax-exempt income.

BALANCE SHEET REVIEW

Investment Securities

At September 30, 2016, the \$73.6 million in our investment securities portfolio represented approximately 5.7% of our total assets. Our available for sale investment portfolio included US government agency securities, SBA securities, state and political subdivisions, and mortgage-backed securities with a fair value of \$67.9 million and an amortized cost of \$66.8 million resulting in an unrealized gain of \$1.1 million. At December 31, 2015, the \$95.5 million in our investment securities portfolio represented approximately 7.8% of our total assets. At December 31, 2015, we held investment securities available for sale with a fair value and amortized cost of \$89.9 million for an unrealized loss of \$6,000.

Loans

Since loans typically provide higher interest yields than other types of interest earning assets, a substantial percentage of our earning assets are invested in our loan portfolio. Average loans, excluding mortgage loans held for sale, for the nine months ended September 30, 2016 and 2015 were \$1.05 billion and \$931.6 million, respectively. Before the allowance for loan losses, total loans outstanding at September 30, 2016 and December 31, 2015 were \$1.11 billion and \$1.00 billion, respectively.

Table of Contents

The principal component of our loan portfolio is loans secured by real estate mortgages. As of September 30, 2016, our loan portfolio included \$905.0 million, or 81.2%, of real estate loans. As of December 31, 2015, real estate loans made up 81.4% of our loan portfolio and totaled \$818.1 million. Most of our real estate loans are secured by residential or commercial property. We obtain a security interest in real estate, in addition to any other available collateral. This collateral is taken to increase the likelihood of the ultimate repayment of the loan. Generally, we limit the loan-to-value ratio on loans to coincide with the appropriate regulatory guidelines. We attempt to maintain a relatively diversified loan portfolio to help reduce the risk inherent in concentration in certain types of collateral and business types. We do not generally originate traditional long term residential mortgages to hold in our loan portfolio, but we do issue traditional second mortgage residential real estate loans and home equity lines of credit. Home equity lines of credit totaled \$132.6 million as of September 30, 2016, of which approximately 37% were in a first lien position, while the remaining balance was second liens, compared to \$116.6 million as of December 31, 2015, with approximately 33% in first lien positions and the remaining balance in second liens. The average loan had a balance of approximately \$91,000 and a loan to value of 72% as of September 30, 2016, compared to an average loan balance of \$91,000 and a loan to value of approximately 70% as of December 31, 2015. Further, 0.6% of our total home equity lines of credit were over 30 days past due as of both September 30, 2016 and December 31, 2015.

Following is a summary of our loan composition at September 30, 2016 and December 31, 2015. During the first nine months of 2016, our loan portfolio increased by \$109.2 million, or 10.9%. Our commercial and consumer loan portfolios experienced similar growth during the nine months ended September 30, 2016 with a 10.6% increase in commercial loans and an 11.3% increase in consumer loans during the period. Of the \$109.2 million in loan growth during the first nine months of 2016, \$86.9 million of the increase was in loans secured by real estate, and \$19.7 million in commercial business loans. Our consumer real estate portfolio includes high quality 1-4 family consumer real estate loans. Our average consumer real estate loan currently has a principal balance of \$336,000, compared to \$309,000 at December 31, 2015, a term of nine years, and an average rate of 4.37% as of both September 30, 2016 and December 31, 2015.

(dollars in thousands)	September 30, 2016		December 31, 2015

Table of Contents*Nonperforming assets*

Nonperforming assets include real estate acquired through foreclosure or deed taken in lieu of foreclosure and loans on nonaccrual status. Generally, a loan is placed on nonaccrual status when it becomes 90 days past due as to principal or interest, or when we believe, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that collection of the contractual principal or interest on the loan is doubtful. A payment of interest on a loan that is classified as nonaccrual is recognized as a reduction in principal when received. Our policy with respect to nonperforming loans requires the borrower to make a minimum of six consecutive payments in accordance with the loan terms and to show capacity to continue performing into the future before that loan can be placed back on accrual status. As of September 30, 2016 and December 31, 2015, we had no loans 90 days past due and still accruing.

Following is a summary of our nonperforming assets, including nonaccruing TDRs.

(dollars in thousands)	September 30, 2016	December 31, 2015
Commercial	\$ 4,631	5,653
Consumer	533	263
Nonaccruing troubled debt restructurings	441	701
Total nonaccrual loans	5,605	6,617
Other real estate owned	1,885	2,475
Total nonperforming assets	\$ 7,490	9,092

At September 30, 2016, nonperforming assets were \$7.5 million, or 0.58% of total assets and 0.67% of gross loans. Comparatively, nonperforming assets were \$9.1 million, or 0.75% of total assets and 0.90% of gross loans at December 31, 2015. Nonaccrual loans were \$5.6 million at September 30, 2016, a \$1.0 million decrease from December 31, 2015. During the first nine months of 2016, seven loans were put on nonaccrual status and nine nonaccrual loans were either paid or charged-off. The amount of foregone interest income on the nonaccrual loans in the first nine months of 2016 and 2015 was approximately \$341,000 and \$286,000, respectively.

Nonperforming assets include other real estate owned which totaled \$1.9 million at September 30, 2016, a \$590,000 decrease from December 31, 2015. The balance at September 30, 2016 includes six commercial properties totaling \$1.5 million and three residential properties totaling \$364,000. All of these properties are located in the Upstate of South Carolina and Georgia. We believe that these properties are appropriately valued at the lower of cost or market as of September 30, 2016.

At September 30, 2016 and 2015, the allowance for loan losses represented 258.3% and 186.0% of the total amount of nonperforming loans, respectively. A significant portion, or 98%, of nonperforming loans at September 30, 2016 is secured by real estate. Our nonperforming loans have been written down to approximately 57% of their original nonperforming balance. We have evaluated the underlying collateral on these loans and believe that the collateral on these loans is sufficient to minimize future losses. Based on the level of coverage on nonperforming loans and analysis of our loan portfolio, we believe the allowance for loan losses of \$14.5 million as of September 30, 2016 to be adequate.

As a general practice, most of our loans are originated with relatively short maturities of less than 10 years. As a result, when a loan reaches its maturity we frequently renew the loan and thus extend its maturity using the same credit standards as those used when the loan was first originated. Due to these loan practices, we may, at times, renew loans which are classified as nonperforming after evaluating the loan's collateral value and financial strength of its guarantors. Nonperforming loans are renewed at terms generally consistent with the ultimate source of repayment and rarely at reduced rates. In these cases the Company will seek additional credit enhancements, such as additional collateral or additional guarantees to further protect the loan. When a loan is no longer performing in accordance with its stated terms, the Company will typically seek performance under the guarantee.

In addition, at September 30, 2016, 81.2% of our loans are collateralized by real estate and 88.0% of our impaired loans are secured by real estate. The Company utilizes third party appraisers to determine the fair value of collateral dependent loans. Our current loan and appraisal policies require the Company to obtain updated appraisals on an annual basis, either through a new external appraisal or an appraisal evaluation. Impaired loans are individually reviewed on a quarterly basis to determine the level of impairment. As of September 30, 2016, we do not have any impaired real estate loans carried at a value in excess of the appraised value. We typically charge-off a portion or create a specific reserve for impaired loans when we do not expect repayment to occur.

as agreed upon under the original terms of the loan agreement.

Table of Contents

At September 30, 2016, impaired loans totaled \$14.4 million for which \$9.1 million of these loans have a reserve of approximately \$2.8 million allocated in the allowance. During the first nine months of 2016, the average recorded investment in impaired loans was approximately \$14.8 million. Comparatively, impaired loans totaled \$13.9 million at December 31, 2015, and \$9.4 million of these loans had a reserve of approximately \$4.2 million allocated in the allowance. During 2015, the average recorded investment in impaired loans was approximately \$14.5 million.

We consider a loan to be a TDR when the debtor experiences financial difficulties and we provide concessions such that we will not collect all principal and interest in accordance with the original terms of the loan agreement. Concessions can relate to the contractual interest rate, maturity date, or payment structure of the note. As part of our workout plan for individual loan relationships, we may restructure loan terms to assist borrowers facing challenges in the current economic environment. As of September 30, 2016, we determined that we had loans totaling \$9.2 million that we considered TDRs. As of December 31, 2015, we had loans totaling \$8.0 million, that we considered TDRs.

Allowance for Loan Losses

The allowance for loan losses was \$14.5 million and \$13.4 million at September 30, 2016 and 2015, respectively, or 1.30% of outstanding loans at September 30, 2016 and 1.34% of outstanding loans at September 30, 2015. At December 31, 2015, our allowance for loan losses was \$13.6 million, or 1.36% of outstanding loans, and we had net loans charged-off of \$1.3 million for the year ended December 31, 2015.

During the nine months ended September 30, 2016, we charged-off \$1.5 million of loans and recorded \$286,000 of recoveries on loans previously charged-off, for net charge-offs of \$1.2 million, or 0.15% of average loans, annualized. Comparatively, we charged-off \$1.0 million of loans and recorded \$156,000 of recoveries on loans previously charged-off, resulting in net charge-offs of \$884,000, or 0.13% of average loans, annualized, for the first nine months of 2015.

Following is a summary of the activity in the allowance for loan losses.

(dollars in thousands)	Nine months ended		Year ended December 31, 2015
	2016	September 30, 2015	
Balance, beginning of period	\$ 13,629	\$ 11,752	11,752
Provision	2,025	2,500	3,200
Loan charge-offs	(1,462)	(1,040)	(1,508)
Loan recoveries	286	156	185
Net loan charge-offs	(1,176)	(884)	(1,323)
Balance, end of period	\$ 14,478	\$ 13,368	13,629

Deposits and Other Interest-Bearing Liabilities

Our primary source of funds for loans and investments is our deposits, advances from the FHLB, and structured repurchase agreements. In the past, we have chosen to obtain a portion of our certificates of deposits from areas outside of our market in order to obtain longer term deposits than are readily available in our local market. We have adopted guidelines regarding our use of brokered CDs that limit our brokered CDs to 25% of total deposits and dictate that our current interest rate risk profile determines the terms. In addition, we do not obtain time deposits of \$100,000 or more through the Internet. These guidelines allow us to take advantage of the attractive terms that wholesale funding can offer while mitigating the related inherent risk.

Our retail deposits represented \$976.1 million, or 93.4% of total deposits at September 30, 2016, while our out-of-market, or brokered, deposits represented \$68.9 million, or 6.6% of our total deposits at September 30, 2016. At December 31, 2015, retail deposits represented \$926.8 million, or 94.0% of our total deposits, and brokered CDs were \$58.9 million, representing 6.0% of our total deposits. Our loan-to-deposit ratio was 107% at September 30, 2016 and 102% at December 31, 2015.

Table of Contents

The following is a detail of our deposit accounts:

(dollars in thousands)	September 30, 2016	December 31, 2015
Non-interest bearing	\$ 222,165	189,686
Interest bearing:		
NOW accounts	212,880	194,835
Money market accounts	317,253	311,167
Savings	14,040	10,806
Time, less than \$100,000	52,496	60,153
Time and out-of-market deposits, \$100,000 and over	226,241	219,086
Total deposits	\$ 1,045,075	985,733

During the past 12 months, we continued our focus on increasing core deposits, which exclude out-of-market deposits and time deposits of \$250,000 or more, in order to provide a relatively stable funding source for our loan portfolio and other earning assets. Our core deposits were \$880.4 million and \$840.2 million at September 30, 2016, and December 31, 2015, respectively. In late June 2016, we received a short-term deposit of approximately \$40 million into a NOW account; however, a majority of this deposit was withdrawn in early July 2016.

The following table shows the average balance amounts and the average rates paid on deposits.

(dollars in thousands)	2016		Nine months ended September 30, 2015	
	Amount	Rate	Amount	Rate
Noninterest bearing demand deposits	\$ 198,166	-%	\$ 155,921	-%
Interest bearing demand deposits	201,257	0.16%	168,080	0.17%
Money market accounts	312,833	0.42%	244,787	0.40%
Savings accounts	12,438	0.05%	8,880	0.07%
Time deposits less than \$100,000	56,034	0.73%	61,564	0.76%
Time deposits greater than \$100,000	213,746	0.84%	223,647	0.75%
Total deposits	\$ 994,474	0.39%	\$ 862,879	0.40%

During the twelve months ended September 30, 2016, our average transaction account balances increased by \$147.0 million, or 25.5%, from the nine months ended September 30, 2015, while our average time deposit balances decreased by \$15.4 million during the same twelve-month period.

All of our time deposits are certificates of deposits. The maturity distribution of our time deposits of \$100,000 or more at September 30, 2016 was as follows:

(dollars in thousands)	September 30, 2016
Three months or less	\$ 72,396
Over three through six months	39,364
Over six through twelve months	67,701
Over twelve months	46,780
Total	\$ 226,241

Table of Contents

Included in time deposits of \$100,000 or more at September 30, 2016 is \$68.9 million of wholesale CDs scheduled to mature within the next 12 months at a weighted average rate of 0.75%. Time deposits that meet or exceed the FDIC insurance limit of \$250,000 at September 30, 2016 and December 31, 2015 were \$164.7 million and \$145.5 million, respectively.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity represents the ability of a company to convert assets into cash or cash equivalents without significant loss, and the ability to raise additional funds by increasing liabilities. Liquidity management involves monitoring our sources and uses of funds in order to meet our day-to-day cash flow requirements while maximizing profits. Liquidity management is made more complicated because different balance sheet components are subject to varying degrees of management control. For example, the timing of maturities of our investment portfolio is fairly predictable and subject to a high degree of control at the time investment decisions are made. However, net deposit inflows and outflows are far less predictable and are not subject to the same degree of control.

At September 30, 2016 and December 31, 2015, our liquid assets, consisting of cash and due from banks and federal funds sold, amounted to \$41.9 million and \$62.9 million, or 3.2% and 5.2% of total assets, respectively. Our investment securities at September 30, 2016 and December 31, 2015 amounted to \$73.6 million and \$95.5 million, or 5.7% and 7.8% of total assets, respectively. The decrease in liquid assets and investment securities is primarily attributable to our intentional decrease of these asset classes in favor of funding new loan growth. Investment securities traditionally provide a secondary source of liquidity since they can be converted into cash in a timely manner. However, approximately 55% of these securities are pledged against outstanding debt. Therefore, the related debt would need to be repaid prior to the securities being sold in order for these securities to be converted to cash. In addition, approximately 20% of our investment securities are pledged to secure client deposits.

Our ability to maintain and expand our deposit base and borrowing capabilities serves as our primary source of liquidity. We plan to meet our future cash needs through the liquidation of temporary investments, the generation of deposits, loan payoffs, and from additional borrowings. In addition, we will receive cash upon the maturity and sale of loans and the maturity of investment securities. We maintain three federal funds purchased lines of credit with correspondent banks totaling \$45.0 million for which there were no borrowings against the lines of credit at September 30, 2016.

We are also a member of the FHLB, from which applications for borrowings can be made. The FHLB requires that securities, qualifying mortgage loans, and stock of the FHLB owned by the Bank be pledged to secure any advances from the FHLB. The unused borrowing capacity currently available from the FHLB at September 30, 2016 was \$144.9 million, based on the Bank's \$5.2 million investment in FHLB stock, as well as qualifying mortgages available to secure any future borrowings. However, we are able to pledge additional securities to the FHLB in order to increase our available borrowing capacity. In addition, at September 30, 2016 and December 31, 2015 we had \$103.0 million and \$114.9 million, respectively, of letters of credit outstanding with the FHLB to secure client deposits.

We also have a line of credit with another financial institution for \$10 million, which was unused at September 30, 2016. The line of credit bears interest at LIBOR plus 2.90% with a floor of 3.25% and a ceiling of 5.15%, and matures on June 6, 2017.

We believe that our existing stable base of core deposits, borrowings from the FHLB, and short-term repurchase agreements will enable us to successfully meet our long-term liquidity needs. However, as short-term liquidity needs arise, we have the ability to sell a portion of our investment securities portfolio to meet those needs.

Total shareholders' equity at September 30, 2016 was \$106.0 million. At December 31, 2015, total shareholders' equity was \$94.2 million. The \$11.8 million increase from December 31, 2015 is primarily related to net income of \$9.7 million during the first nine months of 2016, combined with a \$740,000 increase in accumulated other comprehensive income and \$1.3 million related to equity compensation transactions.

Table of Contents

The following table shows the return on average assets (net income divided by average total assets), return on average equity (net income divided by average equity), equity to assets ratio (average equity divided by average assets), and tangible common equity ratio (total equity less preferred stock divided by total assets) annualized for the nine months ended September 30, 2016 and the year ended December 31, 2015. Since our inception, we have not paid cash dividends.

	September 30, 2016	December 31, 2015
Return on average assets	1.05%	0.90%
Return on average equity	12.94%	11.42%
Return on average common equity	12.94%	11.42%
Average equity to average assets ratio	8.13%	7.93%
Tangible common equity to assets ratio	8.22%	7.74%

At both the holding company and Bank level, we are subject to various regulatory capital requirements administered by the federal banking agencies. Under the capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors, and the regulators can lower classifications in certain cases. Failure to meet various capital requirements can initiate regulatory action that could have a direct material effect on the financial statements.

Regulatory capital rules released in July 2013 to implement capital standards referred to as Basel III and developed by an international body known as the Basel Committee on Banking Supervision, impose higher minimum capital requirements for bank holding companies and banks. The rules apply to all national and state banks and savings associations regardless of size and bank holding companies and savings and loan holding companies with more than \$1 billion in total consolidated assets. More stringent requirements are imposed on advanced approaches banking organizations—those organizations with \$250 billion or more in total consolidated assets, \$10 billion or more in total foreign exposures, or that have opted in to the Basel II capital regime. The requirements in the rule began to phase in on January 1, 2015, for us. The requirements in the rule will be fully phased in by January 1, 2019.

The rule includes certain new and higher risk-based capital and leverage requirements than those currently in place. Specifically, the following minimum capital requirements apply to us:

- a new common equity Tier 1 risk-based capital ratio of 4.5%;
- a Tier 1 risk-based capital ratio of 6% (increased from the former 4% requirement);
- a total risk-based capital ratio of 8% (unchanged from the former requirement); and
- a leverage ratio of 4% (also unchanged from the former requirement).

Under the rule, Tier 1 capital is redefined to include two components: Common Equity Tier 1 capital and additional Tier 1 capital. The new and highest form of capital, Common Equity Tier 1 capital, consists solely of common stock (plus related surplus), retained earnings, accumulated other comprehensive income, and limited amounts of minority interests that are in the form of common stock. Additional Tier 1 capital includes other perpetual instruments historically included in Tier 1 capital, such as noncumulative perpetual preferred stock. Tier 2 capital consists of instruments that currently qualify in Tier 2 capital plus instruments that the rule has disqualified from Tier 1 capital treatment. Cumulative perpetual preferred stock, formerly includable in Tier 1 capital, is now included only in Tier 2 capital. Accumulated other comprehensive income (AOCI) is presumptively included in Common Equity Tier 1 capital and often would operate to reduce this category of capital. The rule provided a onetime opportunity at the end of the first quarter of 2015 for covered banking organizations to opt out of much of this treatment of AOCI. We made this opt-out election and, as a result, will retain the pre-existing treatment for AOCI.

Table of Contents

In addition, in order to avoid restrictions on capital distributions or discretionary bonus payments to executives, a covered banking organization must maintain a capital conservation buffer on top of its minimum risk-based capital requirements. This buffer must consist solely of Tier 1 Common Equity, but the buffer applies to all three measurements (Common Equity Tier 1, Tier 1 capital and total capital). The capital conservation buffer will be phased in incrementally over time, becoming fully effective on January 1, 2019, and will consist of an additional amount of common equity equal to 2.5% of risk-weighted assets. As of January 1, 2016, we are required to hold a capital conservation buffer of 0.625%, increasing by that amount each successive year until 2019.

In general, the rules have had the effect of increasing capital requirements by increasing the risk weights on certain assets, including high volatility commercial real estate, certain loans past due 90 days or more or in nonaccrual status, mortgage servicing rights not includable in Common Equity Tier 1 capital, equity exposures, and claims on securities firms, that are used in the denominator of the three risk-based capital ratios.

It is management's belief that, as of September 30, 2016, the Company and the Bank would have met all capital adequacy requirements under Basel III on a fully phased-in basis if such requirements were currently effective.

The following table summarizes the capital amounts and ratios of the Bank and the regulatory minimum requirements.

	Actual		For capital adequacy purposes minimum		September 30, 2016 To be well capitalized under prompt corrective action provisions minimum	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(dollars in thousands)						
Total Capital (to risk weighted assets)	\$ 128,183	11.77%	87,120	8.00%	108,899	10.00%
Tier 1 Capital (to risk weighted assets)	114,560	10.52%	65,120	6.00%	87,120	8.00%
Common Equity Tier 1 Capital (to risk weighted assets)	114,560	10.52%	49,005	4.50%	70,785	6.50%
Tier 1 Capital (to average assets)	114,560	9.10%	56,633	4.00%	62,925	5.00%

The following table summarizes the capital amounts and ratios of the Company and the minimum regulatory requirements.

	Actual		For capital adequacy purposes minimum		September 30, 2016 To be well capitalized under prompt corrective action provisions minimum	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(dollars in thousands)						
Total Capital (to risk weighted assets)	131,910	12.11%	87,120	8.00%	N/A	N/A
Tier 1 Capital (to risk weighted assets)	118,287	10.86%	65,340	6.00%	N/A	N/A
Common Equity Tier 1 Capital (to risk weighted assets)	105,287	9.67%	49,005	4.50%	N/A	N/A
Tier 1 Capital (to average assets)	118,287	9.38%	50,454	4.00%	N/A	N/A

The ability of the Company to pay cash dividends is dependent upon receiving cash in the form of dividends from the Bank. The dividends that may be paid by the Bank to the Company are subject to legal limitations and regulatory capital requirements.

EFFECT OF INFLATION AND CHANGING PRICES

The effect of relative purchasing power over time due to inflation has not been taken into account in our consolidated financial statements. Rather, our financial statements have been prepared on an historical cost basis in accordance with generally accepted accounting principles.

Unlike most industrial companies, our assets and liabilities are primarily monetary in nature. Therefore, the effect of changes in interest rates will have a more significant impact on our performance than will the effect of changing prices and inflation in general. In addition, interest rates may generally increase as the rate of inflation increases, although not necessarily in the same magnitude.

As discussed previously, we seek to manage the relationships between interest sensitive assets and liabilities in order to protect against wide rate fluctuations, including those resulting from inflation.

Table of Contents

OFF-BALANCE SHEET RISK

Commitments to extend credit are agreements to lend money to a client as long as the client has not violated any material condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. At September 30, 2016, unfunded commitments to extend credit were \$214.9 million, of which \$55.2 million was at fixed rates and \$159.6 million was at variable rates. At December 31, 2015, unfunded commitments to extend credit were \$194.7 million, of which approximately \$61.8 million was at fixed rates and \$133.0 million was at variable rates. A significant portion of the unfunded commitments related to consumer equity lines of credit. Based on historical experience, we anticipate that a significant portion of these lines of credit will not be funded. We evaluate each client's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the borrower. The type of collateral varies but may include accounts receivable, inventory, property, plant and equipment, and commercial and residential real estate.

At both September 30, 2016 and December 31, 2015, there were commitments under letters of credit for \$4.7 million and \$4.3 million, respectively. The credit risk and collateral involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. Since most of the letters of credit are expected to expire without being drawn upon, they do not necessarily represent future cash requirements.

A portion of our business is to originate mortgage loans that will be sold in the secondary market to investors. Loan types that we originate include conventional loans, jumbo loans and other governmental agency loan products. We adhere to the legal lending limits and guidelines as set forth by the various governmental agencies and investors to whom we sell loans. Under a best efforts selling procedure, we make our best effort to process, fund, and deliver the loan to a particular investor. If the loan fails to fund, there is no immediate cost to us, as the market risk has been transferred to the investor. In the event of a customer loan default, we may be required to reimburse the investor.

Except as disclosed in this report, we are not involved in off-balance sheet contractual relationships, unconsolidated related entities that have off-balance sheet arrangements or transactions that could result in liquidity needs or other commitments that significantly impact earnings.

MARKET RISK AND INTEREST RATE SENSITIVITY

Market risk is the risk of loss from adverse changes in market prices and rates, which principally arises from interest rate risk inherent in our lending, investing, deposit gathering, and borrowing activities. Other types of market risks, such as foreign currency exchange rate risk and commodity price risk, do not generally arise in the normal course of our business.

We actively monitor and manage our interest rate risk exposure in order to control the mix and maturities of our assets and liabilities utilizing a process we call asset/liability management. The essential purposes of asset/liability management are to ensure adequate liquidity and to maintain an appropriate balance between interest sensitive assets and liabilities in order to minimize potentially adverse impacts on earnings from changes in market interest rates. Our asset/liability management committee (ALCO) monitors and considers methods of managing exposure to interest rate risk. We have both an internal ALCO consisting of senior management that meets at various times during each month and a board ALCO that meets monthly. The ALCOs are responsible for maintaining the level of interest rate sensitivity of our interest sensitive assets and liabilities within board-approved limits.

Table of Contents

As of September 30, 2016, the following table summarizes the forecasted impact on net interest income using a base case scenario given upward and downward movements in interest rates of 100, 200, and 300 basis points based on forecasted assumptions of prepayment speeds, nominal interest rates and loan and deposit repricing rates. Estimates are based on current economic conditions, historical interest rate cycles and other factors deemed to be relevant. However, underlying assumptions may be impacted in future periods which were not known to management at the time of the issuance of the Consolidated Financial Statements. Therefore, management's assumptions may or may not prove valid. No assurance can be given that changing economic conditions and other relevant factors impacting our net interest income will not cause actual occurrences to differ from underlying assumptions. In addition, this analysis does not consider any strategic changes to our balance sheet which management may consider as a result of changes in market conditions.

Interest rate scenario	Change in net interest income from base
Up 300 basis points	5.63 %
Up 200 basis points	4.50 %
Up 100 basis points	2.48 %
Base	-
Down 100 basis points	(6.06)%
Down 200 basis points	(9.33)%
Down 300 basis points	(11.78)%

CRITICAL ACCOUNTING POLICIES

We have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States and with general practices within the banking industry in the preparation of our financial statements. Our significant accounting policies are described in the footnotes to our audited consolidated financial statements as of December 31, 2015, as filed in our Annual Report on Form 10-K.

Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgment and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Our Critical Accounting Policies are the allowance for loan losses, fair value of financial instruments, other-than-temporary impairment analysis, other real estate owned, and income taxes. Because of the nature of the judgment and assumptions we make, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of our assets and liabilities and our results of operations.

ACCOUNTING, REPORTING, AND REGULATORY MATTERS*Recently Issued Accounting Standards*

The following is a summary of recent authoritative pronouncements that could affect accounting, reporting, and disclosure of financial information by us:

In May 2014, the FASB issued guidance to change the recognition of revenue from contracts with customers. The core principle of the guidance is that an entity should recognize revenue to reflect the transfer of goods and services to customers in an amount equal to the consideration the entity receives or expects to receive. In August 2015, the FASB deferred the effective date of ASU 2014-09, Revenue from Contracts with Customers. As a result of the deferral, the guidance in ASU 2014-09 will be effective for the Company for reporting periods beginning after December 15, 2017. In March 2016, the FASB amended the Revenue from Contracts with Customers topic of the Accounting Standards Codification to clarify the implementation guidance on principal versus agent considerations and address how an entity should assess whether it is the principal or the agent in contracts that include three or more parties. In April 2016, the FASB amended the Revenue from Contracts with Customers topic of the Accounting Standards Codification to clarify guidance related to identifying performance obligations and accounting for licenses of intellectual property. In May 2016, the FASB amended the Revenue from Contracts with Customers topic of the Accounting Standards Codification to clarify guidance related to collectability, noncash consideration, presentation of sales tax, and transition. The Company does not expect these amendments to have a material effect on its financial statements.

Table of Contents

In January 2015, the FASB issued guidance to eliminate from U.S. GAAP the concept of an extraordinary item, which is an event or transaction that is both (1) unusual in nature and (2) infrequently occurring. Under the guidance, an entity will no longer (1) segregate an extraordinary item from the results of ordinary operations; (2) separately present an extraordinary item on its income statement, net of tax, after income from continuing operations; or (3) disclose income taxes and earnings-per-share data applicable to an extraordinary item. The amendments became effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. These amendments did not have a material effect on the Company's financial statements.

In February 2015, the FASB issued guidance which amends the consolidation requirements and significantly changes the consolidation analysis required under U.S. GAAP. Although the amendments are expected to result in the deconsolidation of many entities, the Company will need to reevaluate all of its previous consolidation conclusions. The amendments became effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. These amendments did not have a material effect on the Company's financial statements.

In January 2016, the FASB amended the Financial Instruments topic of the ASC to address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. The amendments will be effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Company will apply the guidance by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The amendments related to equity securities without readily determinable fair values will be applied prospectively to equity investments that exist as of the date of adoption of the amendments. The Company does not expect these amendments to have a material effect on its financial statements.

In February 2016, the FASB amended the Leases topic of the Accounting Standards Codification to revise certain aspects of recognition, measurement, presentation, and disclosure of leasing transactions. The amendments will be effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is currently evaluating the effect that implementation of the new standard will have on its financial position, results of operations, and cash flows.

In March 2016, the FASB issued guidance to simplify several aspects of the accounting for share-based payment award transactions including the income tax consequences, the classification of awards as either equity or liabilities, and the classification on the statement of cash flows. Additionally, the guidance simplifies two areas specific to entities other than public business entities allowing them to apply a practical expedient to estimate the expected term for all awards with performance or service conditions that have certain characteristics and also allowing them to make a one-time election to switch from measuring all liability-classified awards at fair value to measuring them at intrinsic value. The amendments will be effective for the Company for annual periods beginning after December 15, 2016 and interim periods within those annual periods. The Company does not expect these amendments to have a material effect on its financial statements.

In June 2016, the FASB issued guidance to change the accounting for credit losses and modify the impairment model for certain debt securities. The amendments will be effective for the Company for reporting periods beginning after December 15, 2019. The Company is currently evaluating the effect that implementation of the new standard will have on its financial position, results of operations, and cash flows.

In August 2016, the FASB amended the Statement of Cash Flows topic of the Accounting Standards Codification to clarify how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments will be effective for the Company for fiscal years beginning after December 15, 2017 including interim periods within those fiscal years. The Company does not expect these amendments to have a material effect on its financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the consolidated financial statements upon adoption.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

See Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Market Risk and Interest Rate Sensitivity and Liquidity Risk.

Item 4. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

Management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports we file and submit under the Exchange Act is (i) recorded, processed, summarized and reported as and when required and (ii) accumulated and communicated to our management, including our Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There has been no change in the Company's internal control over financial reporting during the three months ended September 30, 2016, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS.

We are a party to claims and lawsuits arising in the course of normal business activities. Management is not aware of any material pending legal proceedings against the Company which, if determined adversely, would have a material adverse impact on the company's financial position, results of operations or cash flows.

Item 1A RISK FACTORS.

Investing in shares of our common stock involves certain risks, including those identified and described in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2015, as well as cautionary statements contained in this Form 10-Q, including those under the caption "Cautionary Warning Regarding Forward-Looking Statements" set forth in Part 1, Item 2 of this Form 10-Q, risks and matters described elsewhere in this Form 10-Q and in our other filings with the SEC.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.
