An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. NYSE Arca Gold Miners Index (GDMNTR) is a modified market capitalization - weighted index composed of publicly traded companies involved primarily in the mining for gold. The Index is calculated and maintained by the New York Stock Exchange. Market Vectors Junior Gold Miners Index (MVGDXJTR) is a rules - based, modified market capitalization - weighted, float - adjusted index comprised of a global universe of publicly traded small - and medium - capitalization companies that generate at least 50% of their revenues from gold and/or silver mining, hold real property that has the potential to produce at least 50% of the company's revenue from gold or silver mining when developed, or primarily invest in gold or silver. Philadelphia Stock Exchange Gold and Silver Index (XAU) is a capitalization - weighted index which includes the leading companies involved in the mining of gold and silver. S&P 500 ® Index (S&P 500) consists of 500 widely held common stocks, covering four broad sectors (industrials, utilities, financial and transportation). Gold Spot (GOLDS Comdty ) is quoted as U.S. dollars per troy ounce. U.S. Dollar Index (DXY) indicates the general international value of the U.S. dollar. The DXY does this by averaging the exchange rates between the U.S. dollar and six major world currencies: Euro, Japanese yen, Pound sterling, Canadian dollar, Swedish kroner, and Swiss franc. The Federal Funds Rate is "the interest rate" in the U.S. at which depository institutions actively trade balances held at the Federal Reserve, called federal funds, with each other, usually overnight, on an uncollateralized basis. Institutions with surplus balances in their accounts lend those balances to institutions in need of larger balances.

Please read the prospectus and summary prospectus carefully before investing. Please read them carefully before investing.

For financial professional use only. Do not distribute to the public. 29 Disclosures VanEck International Investors Gold Fund You can lose money by investing in the Fund. Any investment in the Fund should be part of an overall investment program, not a complete program. The Fund is subject to the risks associated with concentrating its assets in the gold industry, which can be significantly affected by international economic, monetary and political developments. The Fund's overall portfolio may decline in value due to developments specific to the gold industry. The Fund's investments in foreign securities involve risks related to adverse political and economic developments unique to a country or a region, currency fluctuations or controls, and the possibility of arbitrary action by foreign governments, including the takeover of property without adequate compensation or imposition of prohibitive taxation. The Fund is subject to risks associated with investments in debt securities, derivatives, commodity-linked instruments, illiquid securities, asset-backed securities, CMOs and small- or mid-cap companies. The Fund is also subject to inflation risk, short-sales risk, market risk, non-diversification risk and leverage risk. Investing involves risk, including possible loss of principal. An investor should consider investment objectives, risks, charges and expenses of the investment company carefully before investing. To obtain a prospectus and summary prospectus, which contain this and other information, call 800.826.2333 or visit [vaneck.com/etfs](http://vaneck.com/etfs). Please read the prospectus and summary prospectus carefully before investing. Please read them carefully before investing. VanEck Vectors Gold Miners ETF and VanEck Vectors Junior Gold Miners ETF Gold- and silver-related investments, including gold exchange-traded funds (ETFs), are subject to risks including bullion price volatility, changes in world political developments, competitive pressures and risks associated with foreign investments. In times of stable economic growth, the value of gold, silver and other precious metals may be adversely affected. Mining companies are subject to elevated risks, which include, among others, competitive pressures, commodity and currency price fluctuations, and adverse governmental or environmental regulations. In particular, small and mid-cap mining companies may be subject to additional risks including inability to commence production and generate material revenues, significant expenditures and inability to secure financing, which may cause such companies to operate at a loss, greater volatility, lower trading volume and less liquidity than larger companies. Investors should be willing to accept a high degree of volatility and the potential of significant loss. The Funds may loan their securities, which may subject them to additional credit and counterparty risk. VanEck Vectors Gold Miners ETF and VanEck Vectors Junior Gold Miners ETF shares are not individually redeemable and will be issued and redeemed at their Net Asset Value (NAV) only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market. You will incur brokerage expenses when trading Fund shares in the secondary market. Past performance is no guarantee of future results. Returns for actual Fund investments may differ from what is shown because of differences in timing, the amount invested, and fees and expenses.

## Edgar Filing: VanEck Merk Gold Trust - Form FWP

For financial professional use only. Do not distribute to the public. 30 Disclosures VanEck Merk Gold Trust The material must be preceded or accompanied by a prospectus. Before investing you should carefully consider the VanEck Merk Gold Trust's (the "Trust") investment objectives, risks, charges and expenses. This and other information is in the prospectus, a copy of which may be obtained by visiting [www.vaneck.com/etfs](http://www.vaneck.com/etfs) or calling 800.826.2333. Please read the prospectus carefully before you invest . Investing involves risk, including possible loss of principal. The Trust is not an investment company registered under the Investment Company Act of 1940 or a commodity pool for the purposes of the Commodity Exchange Act. Shares of the Trust are not subject to the same regulatory requirements as mutual funds. Because shares of the Trust are intended to reflect the price of the gold held in the Trust, the market price of the shares is subject to fluctuations similar to those affecting gold prices. Additionally, shares of the Trust are bought and sold at market price, not at net asset value ("NAV"). Brokerage commissions will reduce returns . The request for redemption of shares for gold is subject to a number of risks including but not limited to the potential for the price of gold to decline during the time between the submission of the request and delivery. Delivery may take a considerable amount of time depending on your location . Commodities and commodity - index linked securities may be affected by changes in overall market movements and other factors such as weather, disease, embargoes, or political and regulatory developments, as well as trading activity of speculators and arbitrageurs in the underlying commodities . Trust shares trade like stocks, are subject to investment risk and will fluctuate in market value. The value of Trust shares relates directly to the value of the gold held by the Trust (less its expenses), and fluctuations in the price of gold could materially and adversely affect an investment in the shares. The price received upon the sale of the shares, which trade at market price, may be more or less than the value of the gold represented by them. The Trust does not generate any income, and as the Trust regularly issues shares to pay for the Sponsor's ongoing expenses, the amount of gold represented by each Share will decline over time. Investing involves risk, and you could lose money on an investment in the Trust. For a more complete discussion of the risk factors relative to the Trust, carefully read the prospectus . The sponsor of the Trust is Merk Investments LLC (the "Sponsor"). Van Eck Securities Corporation and Foreside Fund Services, LLC , provide marketing services to the Trust. All trademarks, service marks or registered trademarks are the property of their respective owners. Van Eck Securities Corporation, Distributor of VanEck International Investors Gold Fund, VanEck Vectors Gold Miners ETF, and Van Eck Vectors Junior Gold Miners ETF.
