

BANK OF MONTREAL /CAN/
Form 424B2
January 23, 2018

Registration Statement No. 333-217200
Filed Pursuant to Rule 424(b)(2)

Pricing Supplement dated January 19, 2018
(To the Prospectus dated April 27, 2017 and
the Prospectus Supplement dated April 27, 2017)
\$68,828,000
Senior Medium-Term Notes, Series D
Linked to Raymond James Analysts' Best Pick® for 2018,
due January 28, 2019

The notes are linked to an equally-weighted basket of shares of 17 common stocks and/or American Depositary Shares (each, a "Reference Share" and together, the "Basket") of entities that are not affiliated with us (each, a "Reference Share Issuer"). The Reference Shares were selected in December 2017 by the Equity Research Department at Raymond James & Associates, Inc. ("Raymond James") as the Raymond James Analysts' Best Pick® for 2018.

· You may lose all or a portion of the principal amount of your notes at maturity.

The Reference Shares are: Alaska Air Group, Inc. ("ALK"), Broadcom Limited ("AVGO"), Alibaba Group Holding Limited ("BABA"), Becton, Dickinson and Company ("BDX"), Continental Resources Inc. ("CLR"), Dollar Tree, Inc. ("DLTR"), Fastenal Company ("FAST"), First Horizon National Corporation ("FHN"), FLIR Systems, Inc. ("FLIR"), ICU Medical, Inc. ("ICUI"), The Progressive Corporation ("PGR"), ProPetro Holding Corp. ("PUMP"), ServiceNow, Inc. ("NOW"), SS&C Technologies Holdings, Inc. ("SSNC"), SVB Financial Group ("SIVB"), UnitedHealth Group Incorporated ("UNH") and Weyerhaeuser Company ("WY"). Each Reference Share has an equal weighting of 1/17. This pricing supplement contains a description of the criteria used to select the Reference Shares for inclusion in the Basket. See "Raymond James' Analysts Best Picks for 2018."

· The notes do not pay any interest.

On the maturity date, the amount that we will pay to you for each \$1,000 in principal amount of the notes (the "Redemption Amount") will depend upon the performance of the Basket and the dividends paid on the Reference Shares over the term of the notes. As described in more detail below, the Redemption Amount will be less than the price to the public set forth below if the "Basket Level Percentage" (as defined below) is not at least approximately 102.25%. We describe in more detail below how the payment at maturity will be determined.

· Any payment at maturity on the notes is subject to our credit risk.

· The notes will not be listed on any securities exchange or quotation system.

· The CUSIP number of the notes is 06367TW71.

Our subsidiary, BMO Capital Markets Corp. ("BMOCM"), is the agent for this offering. See "Supplemental Plan of Distribution—Conflicts of Interest" below.

Investing in the notes involves risks, including those described in the "Additional Risk Factors" section beginning on page PS-6 of this pricing supplement and the "Risk Factors" sections beginning on page S-1 of the prospectus

supplement, and on page 8 of the prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these notes or passed upon the accuracy of this pricing supplement, the prospectus supplement or the prospectus. Any representation to the contrary is a criminal offense.

The notes will be our unsecured obligations and will not be savings accounts or deposits that are insured by the United States Federal Deposit Insurance Corporation, the Deposit Insurance Fund, the Canada Deposit Insurance Corporation or any other governmental agency or instrumentality or other entity.

On January 19, 2018 (the “pricing date”), the estimated initial value of the notes was \$975.20 per \$1,000 in principal amount. As discussed in more detail in this pricing supplement, the actual value of the notes at any time will reflect many factors and cannot be predicted with accuracy.

	<u>Price to Public</u>	<u>Agent’s Commission⁽¹⁾</u>	<u>Proceeds to Us</u>
Per \$1,000 of the Notes	US\$1,000.00	US\$12.50	US\$987.50
Total	US\$68,828,000.00	US\$860,350.00	US\$67,967,650.00

\$12.50 per \$1,000 in principal amount per note will be received by Raymond James for its services acting as an

(1) agent in connection with the distribution of the notes. Please see “Supplemental Plan of Distribution (Conflicts of Interest)” in this pricing supplement.

BMO Capital Markets

KEY TERMS OF THE NOTES

This section summarizes the terms of the notes, and should be read together with the additional information in this pricing supplement, including the information set forth below under the captions “Additional Risk Factors” and “Description of the Notes.”

Pricing Date of
the
Notes:

January 19, 2018

Issue Date of
the Notes:

January 26, 2018

Issue Price of
the Notes:

\$1,000 per \$1,000 in principal amount of the notes.

Interest
Payments:

None.

Reference
Shares:

The 17 Reference Shares set forth on the cover page of this pricing supplement. The Reference Shares are the securities included in Raymond James Analysts’ Best Picks for 2018.

Raymond
James
Analysts’ Best
Picks for
2018:

In December of each year, the equity research department at Raymond James selects its best picks for the following calendar year. Raymond James’ goal in selecting the Best Picks for 2018 was to identify stocks that will be able to sustain operational growth and price appreciation over a 12 month period. For more detail, please see the section entitled “Raymond James Analysts’ Best Picks for 2018” and “Additional Risk Factors—Risks Relating to the Reference Shares” in this pricing supplement.

Redemption
Amount:

The amount that you will receive at maturity for each \$1,000 in principal amount of the notes will depend upon the performance of the Basket and the dividends paid on the Reference Shares. The Redemption Amount will equal the product of (a) \$1,000, (b) the Basket Level Percentage, and (c) the Participation Rate.

As discussed in more detail below, the Basket Level Percentage must exceed approximately 102.25% in order for you to receive a Redemption Amount per \$1,000 in principal amount of the notes that exceeds the principal amount. In addition, the Redemption Amount could be substantially less than the principal amount of the notes.

Reference
Share
Weighting:

For each Reference Share, 1/17th.

Reference
Share
Performance:

The Reference Share Performance will measure the change in value of each Reference Share over the term of the notes, including the payment of certain dividends. For each Reference Share, the Reference Share Performance will equal (a) the applicable Final Share Price divided by (b) the applicable Initial Share Price, expressed as a percentage. See “Description of the Notes—Payment at Maturity.”

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

Weighted Reference Share Performance:	For each Reference Share, the product of (a) its Reference Share Performance and (b) the Reference Share Weighting.
Participation Rate:	97.80%. Because the Participation Rate is less than 100%, the Basket Level Percentage must exceed approximately 102.25% in order for you to receive a Redemption Amount per \$1,000 in principal amount of the notes that exceeds the principal amount of the notes.
Basket Level Percentage:	The sum of the Weighted Reference Share Performances.
Average Intra-day Price:	With respect to a Reference Share and any averaging date, the arithmetic mean of the prices at which we or any of our affiliates (which may include the calculation agent) acquires, establishes, reestablishes, substitutes, maintains, unwinds or disposes of, as the case may be, of any transactions or assets relating to that Reference Share as we deem necessary to hedge our obligations with respect to the notes.
Initial Share Price:	The arithmetic mean of the Average Intra-day Prices on each averaging date occurring shortly before the issue date of the notes. The Initial Share Price of each Reference Share will be made available to investors after the final Averaging Date.
Final Share Price:	For one Reference Share, the sum of (a) the arithmetic mean of the closing prices on each valuation date, and (b) the Dividend Amount for that Reference Share.
Averaging Dates:	January 19, 2018, January 22, 2018, January 23, 2018 and January 24, 2018.

PS-2

Valuation Dates: The valuation dates will occur on four trading days occurring shortly before the maturity date. The scheduled valuation dates are: January 18, 2019, January 22, 2019, January 23, 2019 and January 24, 2019.

Dividend Amount: An amount in U.S. dollars equal to 100% of the gross cash distributions (including ordinary and extraordinary dividends) per Reference Share declared by the applicable Reference Share Issuer where the date that the applicable Reference Share has commenced trading ex-dividend on its primary U.S. securities exchange as to each relevant distribution occurs from the second averaging date to the final valuation date, determined as described in more detail below. The positive effect of the Dividend Amount on the Redemption Amount will be reduced as a result of the Participation Rate, as set forth in “—Redemption Amount” above.

For each Reference Share Issuer that is organized outside of the U.S., the applicable Dividend Amount may be reduced as described in the section below, “Description of the Notes—Payment at Maturity.”

Calculation Agent: BMO Capital Markets Corp. (“BMOCM”)

CUSIP: 06367TW71

Distribution: The notes are not intended for purchase by any investor that is not a United States person, as that term is defined for U.S. federal income tax purposes, and no dealer may make offers of the notes to any such investor.

Each averaging date and each valuation date for any Reference Share, as well as the maturity date, are subject to postponement in the event of a Market Disruption Event with respect to an applicable Reference Share, as described in the section “Description of the Notes – Market Disruption Events” in this pricing supplement.

PS-3

HYPOTHETICAL PAYMENTS ON THE NOTES AT MATURITY

The following hypothetical examples are provided for illustration purposes only and are hypothetical; they do not purport to be representative of every possible scenario concerning increases or decreases in the value of the Basket and the related effect on the Redemption Amount. The following hypothetical examples illustrate the payment you would receive on the maturity date if you purchased \$1,000 in principal amount of the notes. Numbers appearing in the examples below have been rounded for ease of analysis. The examples below assume a Participation Rate of 97.80%.

Basket Level Redemption Amount per \$1,000 in Percentage	Principal Amount	Percentage Gain (or Loss) per \$1,000 in Principal Amount
140.00%	\$1,369.20	36.92%
130.00%	\$1,271.40	27.14%
120.00%	\$1,173.60	17.36%
110.00%	\$1,075.80	7.58%
102.25% ⁽¹⁾	\$1,000.00	0.00%
100.00% ⁽²⁾	\$978.00	-2.20%
90.00%	\$880.20	-11.98%
80.00%	\$782.40	-21.76%
70.00%	\$684.60	-31.54%
60.00%	\$586.80	-41.32%

⁽¹⁾ For you to receive a Redemption Amount greater than the principal amount the notes, the Basket Level Percentage must be greater than approximately 102.25% due to the effect of the Participation Rate being only 97.80%.

⁽²⁾ If the Basket Level Percentage is not at least approximately 102.25%, you will lose some or all of the principal amount of the notes.

Please see the sections below, “Additional Risk Factors—General Risks Relating to the Notes—Your investment may result in a loss” and “—The notes will not reflect the full performance of the Reference Shares, which may negatively impact your return on the notes.”

ADDITIONAL TERMS OF THE NOTES

You should read this pricing supplement together with the prospectus supplement dated April 27, 2017 and the prospectus dated April 27, 2017. This pricing supplement, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours or the agent. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors” in this pricing supplement, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

Prospectus supplement dated April 27, 2017:

<https://www.sec.gov/Archives/edgar/data/927971/000119312517142764/d381374d424b5.htm>

Prospectus dated April 27, 2017:

<https://www.sec.gov/Archives/edgar/data/927971/000119312517142728/d254784d424b2.htm>

Our Central Index Key, or CIK, on the SEC website is 927971. As used in this pricing supplement, “we,” “us” or “our” refers to Bank of Montreal.

PS-5

ADDITIONAL RISK FACTORS

An investment in the notes involves risks. This section describes significant risks relating to the terms of the notes. The notes are a riskier investment than ordinary debt securities. In addition, the notes are not equivalent to investing directly in the Reference Shares. Before investing in the notes, you should read the following information about these risks, together with the other information contained in or incorporated by reference in the prospectus supplement and prospectus.

General Risks Relating to the Notes

Your investment in the notes may result in a loss. The notes do not guarantee any return of principal. The amount payable on the notes at maturity will depend on the performance of the Reference Shares and the applicable Dividend Amount and may be less, and possibly significantly less, than your initial investment. If the prices of the Reference Shares decrease, the payment at maturity may be less than the principal amount. In addition, because the Participation Rate is only 97.80%, the Basket Level Percentage must exceed approximately 102.25% in order for you to receive a Redemption Amount that exceeds the principal amount. You may lose all or a substantial portion of the amount that you invested to purchase the notes. You may incur a loss, even if the Basket Level Percentage is positive (but less than approximately 102.25%). Please also see “—The notes will not reflect the full performance of the Reference Shares, which may negatively impact your return on the notes.”

The notes do not pay interest and your return may be lower than the return on a conventional debt security of comparable maturity. There will be no periodic interest payments on the notes as there would be on a conventional fixed-rate or floating-rate debt security having the same maturity. The yield that you will receive on your notes, which could be negative, may be less than the yield you could earn if you purchased a standard senior debt security of Bank of Montreal with the same maturity date. Your investment may not reflect the full opportunity cost to you when you take into account factors that affect the time value of money.

Owning the notes is not the same as owning the Reference Shares or a security directly linked to the performance of the Reference Shares. The return on your notes will not reflect the return you would realize if you actually owned the Reference Shares or a security directly linked to the performance of the Reference Shares and held that investment for a similar period. Your notes may trade quite differently from the Reference Shares. Changes in the prices and dividend yields of the Reference Shares may not result in comparable changes in the market value of your notes. Even if the prices and dividend yields of the Reference Shares increase during the term of the notes, the market value of the notes prior to maturity may not increase to the same extent. It is also possible for the market value of the notes to decrease while the prices and dividend yields of the Reference Shares increase.

Our initial estimated value of the notes is lower than the price to public. Our initial estimated value of the notes is only an estimate, and is based on a number of factors. The price to public of the notes exceeds our initial estimated value, because, among other things, costs associated with offering, structuring and hedging the notes are included in the price to public, but are not included in the estimated value. These costs include the agent's commission, and the profits that we and our affiliates expect to realize for assuming the risks in hedging our obligations under the notes and the estimated cost of hedging these obligations.

Our initial estimated value does not represent any future value of the notes, and may also differ from the estimated value of any other party. Our initial estimated value of the notes as of the pricing date was derived using our internal pricing models. This value is based on market conditions, interest rates, and other relevant factors. Different pricing models and assumptions could provide values for the notes that are greater than or less than our initial estimated value. In addition, market conditions and other relevant factors after the pricing date are expected to change, possibly rapidly, and our assumptions may prove to be incorrect. After the pricing date, the value of the notes could change dramatically due to changes in market conditions, our creditworthiness, and the other factors set forth in this pricing

supplement. These changes are likely to impact the price, if any, at which we or BMOCM would be willing to purchase the notes from you in any secondary market transactions. Our initial estimated values do not represent a minimum price at which we or our affiliates would be willing to buy your notes in any secondary market at any time.

The terms of the notes were not determined by reference to the credit spreads for our conventional fixed-rate debt. To determine the terms of the notes, we used an internal funding rate that represents a discount from the credit spreads for our conventional fixed-rate debt. As a result, the terms of the notes are less favorable to you than if we had used a higher funding rate.

PS-6

Certain costs are likely to adversely affect the value of the notes. Absent any changes in market conditions, any secondary market prices of the notes will likely be lower than the price to public. This is because any secondary market prices will likely take into account our then-current market credit spreads, and because any secondary market prices are likely to exclude all or a portion of the agent's commission and the hedging profits and estimated hedging costs that are included in the price to public of the notes and that may be reflected on your account statements. In addition, any such price is also likely to reflect a discount to account for costs associated with establishing or unwinding any related hedge transaction, such as dealer discounts, mark-ups and other transaction costs. As a result, the price, if any, at which BMOCM or any other party may be willing to purchase the notes from you in secondary market transactions, if at all, will likely be lower than the price to public. Any sale that you make prior to the maturity date could result in a substantial loss to you.

Any increase in the price of one or more Reference Shares may be offset by decreases in the price of one or more other Reference Shares. The price of one or more of the Reference Shares may increase while the price of one or more of the other Reference Shares decreases. Therefore, in determining the value of the Basket at any time, increases in the price of one Reference Share may be moderated, or wholly offset, by decreases in the price of one or more other Reference Shares. You may incur a loss, even if the Basket Level Percentage is positive (but less than 102.25%).

The notes may not have an active trading market. Your notes will not be listed on any securities exchange, and there may be little or no secondary market for your notes. Even if a secondary market for your notes develops, it may not provide significant liquidity. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your notes in any secondary market could be substantial. If you sell your notes before maturity, you may suffer substantial losses.

The notes will not reflect the full performance of the Reference Shares, which may negatively impact your return on the notes. Because the calculation of the Redemption Amount includes a Participation Rate of less than 100%, the return, if any, on the notes will not reflect the full performance of the Reference Shares. Therefore, the yield to maturity based on the methodology for calculating the Redemption Amount will be less than the yield that would be produced if the Reference Shares were purchased and held for a similar period. The Basket Level Percentage must be at least approximately 102.25% for the Redemption Amount to exceed the principal amount.

In addition, as to the Reference Shares that are organized outside of the U.S., the Dividend Amounts that are reflected in the payments on the notes may be reduced as discussed in the section below, "Description of the Notes—Payment at Maturity."

The market value of your notes may be influenced by many unpredictable factors. The following factors, many of which are beyond our control, may influence the market value of your notes:

- the market prices of the Reference Shares;
- the dividend yields of the Reference Shares;
- economic, financial, political, military, regulatory, legal and other events that affect the securities markets generally and the U.S. markets in particular, and which may affect the values of the Reference Shares;
- if the Reference Shares include one or more equity securities that have been issued by non-U.S. companies (a "non-U.S. Reference Share"), changes in, and the volatility of, the exchange rates between the U.S. dollar and the relevant non-U.S. currency or currencies could have a negative impact on the payments due on your notes and their market value; and
- interest rates in the market.

These factors may influence the market value of your notes if you sell your notes before maturity. Our creditworthiness, as represented by our credit ratings or as otherwise perceived in the market will also affect the

market value of your notes. If you sell your notes prior to maturity, you may receive less than your initial investment.

Payments on the notes are subject to our credit risk, and changes in our credit ratings may adversely affect the market value of the notes. The notes are our senior unsecured debt securities. The payment amount due on the maturity date is dependent upon our ability to repay our obligations at that time. This will be the case even if the values and dividend yields of the Reference Shares increase as of the valuation dates. No assurance can be given as to what our financial condition will be at any time during the term of the notes.

The Initial Share Price for each Reference Share will be based on the Average Intra-day Prices for that Reference Share on each averaging date, which may adversely affect the return on the notes. The Initial Share Price of each Reference Share, which is used to determine the related Reference Share Performance and therefore the Basket Level Percentage, will be based on the Average Intra-day Prices of that Reference Share on each averaging date. The Average Intra-day Price for a Reference Share on any averaging date is the arithmetic mean of the prices at which we, or one or more of our affiliates execute transactions with respect to such Reference Share on each averaging date in order to hedge our obligations under the notes.

PS-7

As a result, the hedging activities relating to each Reference Share by us or any of our affiliates may affect the calculation agent's determination of the Initial Share Price for each Reference Share; therefore, these hedging activities may adversely affect the payment at maturity, if any.

The Initial Share Price for each Reference Share will not be known until after the pricing date of the notes. The Initial Share Price of the Reference Shares will be determined over four averaging dates. The first averaging date was the pricing date of the notes. As a result, the Initial Share Price of one or more Reference Shares may be substantially higher or lower than its market price on the date that you made your investment decision to purchase the notes.

The Final Share Price of each Reference Share is based on the arithmetic average of its closing prices on each valuation date and may be less than the closing prices of such Reference Share prior to such dates or on any valuation date individually. The Final Share Price of each Reference Share will be calculated based on the closing prices of that Reference Share on each of the valuation dates specified above. The prices prior to those dates will not be used to determine the Redemption Amount. Therefore, no matter how high the prices of the relevant Reference Shares may be during the term of the notes, only the closing prices of the Reference Shares on each of the valuation dates will be used to calculate the applicable Final Share Prices and the Redemption Amount payable to you at maturity. In addition, because each Final Share Price is based on the arithmetic average of the closing prices of the relevant Reference Share on each valuation date, the Final Share Price calculated in this manner may be lower than the price of the relevant Reference Share on any single valuation date. Accordingly, the averaging feature may decrease the Final Share Price and therefore your return on the notes.

Correlation among the Reference Shares may affect the value of your notes. The Reference Shares may not represent a diversified portfolio of securities. To the extent that the Reference Shares move in the same direction (i.e., are highly correlated), you will lose some or all of the benefits that would ordinarily attend a diversified portfolio of securities. The Reference Shares may be concentrated in a limited number of industries. An investment in the notes might increase your exposure to fluctuations in any of the sectors represented by the Basket.

We will not hold shares of any Reference Share for your benefit. The indenture and the terms governing your notes do not contain any restriction on our ability or the ability of any of our affiliates to sell, pledge or otherwise convey all or any portion of Reference Shares that we or they may acquire. Neither we nor our affiliates will pledge or otherwise hold any assets for your benefit, including any Reference Shares. Consequently, in the event of our bankruptcy, insolvency or liquidation, any of those assets that we own will be subject to the claims of our creditors generally and will not be available for your benefit specifically.

You must rely on your own evaluation of the merits of an investment linked to the Reference Shares. In the ordinary course of their business, BMOCM, Raymond James and our respective affiliates may have expressed views on expected movements in any Reference Share, and may do so in the future. These views or reports may be communicated to our clients, Raymond James' clients, and clients of our respective affiliates. However, these views are subject to change from time to time. Moreover, other professionals who transact business in markets relating to any Reference Share may at any time have significantly different views from those of our respective affiliates. For these reasons, you are encouraged to derive information concerning the Reference Shares from multiple sources, and you should not rely solely on views expressed by us or our respective affiliates.

Our trading and other transactions relating to the Reference Shares, futures, options or other derivative products may adversely affect the market value of the notes. As described below under "Use of Proceeds and Hedging," we or our affiliates may hedge our obligations under the notes by purchasing or selling the Reference Shares, futures or options relating to the Reference Shares, or other derivative instruments with returns linked or related to changes in the performance of the Reference Shares. We may adjust these hedges by, among other things, purchasing or selling those assets at any time. Although they are not expected to do so, any of these hedging activities may adversely affect the prices of the Reference Shares, and therefore, the market value of the notes, and the amount payable at maturity. It

is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities, even though the market value of the notes decreases.

We, Raymond James, or one or more of our respective affiliates may also engage in trading relating to the Reference Shares on a regular basis as part of our general broker-dealer and other businesses, for proprietary accounts, for other accounts under management or to facilitate transactions for our customers, including block trades. Any of these activities could adversely affect the prices of the Reference Shares and, therefore, the market value of the notes. We, Raymond James, or one or more of our respective affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in the performance of the Reference Shares. By introducing competing products into the marketplace in this manner, we or one or more of our affiliates could adversely affect the market value of the notes.

PS-8

Our business activities and the business activities of our affiliates may create conflicts of interest. As noted above, we, Raymond James, or one or more of our respective affiliates expect to engage in trading activities related to the Reference Shares that are not for the account of holders of the notes or on their behalf. These trading activities may present a conflict between the holders' interests in the notes and the interests we and our affiliates will have in their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for their customers and in accounts under their management. These trading activities, if they influence the prices of the Reference Shares, could be adverse to the interests of the holders of the notes. We, Raymond James, or one or more of our respective affiliates may, at present or in the future, engage in business with the issuers of the Reference Shares, including making loans to or providing advisory services to those companies. These services could include investment banking and merger and acquisition advisory services. These activities may present a conflict between our or one or more of our affiliates' obligations and your interests as a holder of the notes. Moreover, we, Raymond James and our respective affiliates have published, and in the future expect to publish, research reports and other materials with respect to most or even all of the Reference Shares. Our views are modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the notes. Even if our affiliates or Raymond James express a negative opinion about one or more of the Reference Shares, or if market conditions change, the composition of the Basket will not change during the term of the notes (except under the limited circumstances described below). Any of these activities by us or one or more of our affiliates may affect the prices of the Reference Shares and, therefore, the market value of the notes.

As calculation agent, BMOCM will have the authority to make determinations that could affect the value of your notes and your payment at maturity. As calculation agent for your notes, BMOCM will have discretion in making various determinations that affect your notes, including determining the Initial Share Prices, the Final Share Prices, the Basket Level Percentage, the Redemption Amount and whether any market disruption event has occurred. The calculation agent also has discretion in making certain adjustments relating to mergers and certain other corporate transactions that a Reference Share Issuer may undertake. The exercise of this discretion by BMOCM could adversely affect the value of your notes and may present BMOCM, which is our wholly owned subsidiary, with a conflict of interest.

The historical performance of the Reference Shares should not be taken as an indication of their future performance. The Final Share Prices of the Reference Shares will determine the Redemption Amount. The historical performance of the Reference Shares does not necessarily give an indication of their future performance. As a result, it is impossible to predict whether the prices of the Reference Shares will rise or fall during the term of the notes. The prices of the Reference Shares will be influenced by complex and interrelated political, economic, financial and other factors.

Holders of the Reference Shares are only entitled to receive those dividends as each issuer's board of directors may declare out of funds legally available. Although dividends and distributions on one or more of the Reference Shares may have historically been declared by the applicable board of directors, they are not required to do so and may reduce or eliminate those dividends in the future. The Dividend Amount of one or more of the Reference Shares during the term of the notes may be zero.

Some of the Reference Shares have only been publicly traded for a limited amount of time. As set forth below in the section "The Reference Shares," some of the Reference Shares have only been publicly traded for a limited amount of time. Accordingly, it may be more difficult for you to evaluate the historical performance of those Reference Shares than would be the case for Reference Shares with a longer trading history.

Significant aspects of the tax treatment of the notes are uncertain. The tax treatment of the notes is uncertain. We do not plan to request a ruling from the Internal Revenue Service or from any Canadian authorities regarding the tax treatment of the notes, and the Internal Revenue Service or a court may not agree with the tax treatment described in this pricing supplement.

Since a Reference Share is the type of financial asset described under Section 1260 of the Internal Revenue Code of 1986, as amended (the “Code”) (including, among others, any equity interest in pass-thru entities such as regulated investment companies (including certain exchange-traded funds), real estate investment trusts, partnerships, trusts, and passive foreign investment companies), while the matter is not entirely clear, an investment in the notes will likely, in whole or in part, be treated as a “constructive ownership transaction” to which Section 1260 of the Code applies. If Section 1260 of the Code applies, all or a portion of any long-term capital gain recognized by a United States Holder in respect of the notes will be recharacterized as ordinary income and certain interest charges may apply. See the section entitled “Supplemental Tax Considerations – Supplemental U.S. Federal Income Tax Considerations – Potential Application of Section 1260 of the Code.”

The Internal Revenue Service has issued a notice indicating that it and the Treasury Department are actively considering whether, among other issues, a holder should be required to accrue interest over the term of an instrument such as the notes even though that holder will not receive any payments with respect to the notes until maturity and whether all or part of the gain a holder may recognize upon sale or maturity of an instrument such as the notes could be treated as ordinary income. The outcome of this process is uncertain and could apply on a retroactive basis.

PS-9

Please read carefully the section entitled “Supplemental Tax Considerations” in this pricing supplement, the section entitled “United States Federal Income Taxation” in the accompanying prospectus and the section entitled “Certain Income Tax Consequences” in the accompanying prospectus supplement. You should consult your tax advisor about your own tax situation.

Insurance companies and employee benefit plans should carefully review the legal issues of an investment in the notes. Any insurance company or fiduciary of a pension plan or other employee benefit plan that is subject to the prohibited transaction rules of the Employee Retirement Income Security Act of 1974, as amended, which we call “ERISA,” or the Code, including an IRA or Keogh plan (or a governmental plan to which similar prohibitions apply), and that is considering purchasing the notes with the assets of the insurance company or the assets of such plan, should consult with its counsel regarding whether the purchase or holding of the notes could become a “prohibited transaction” under ERISA, the Code or any substantially similar prohibition in light of the representations a purchaser or holder in any of the above categories is deemed to make by purchasing and holding the notes. These issues are discussed in more detail in the section “Employee Retirement Income Security Act” below.

Risks Relating to the Reference Shares

The inclusion of the Reference Shares in Raymond James’ Best Picks does not guarantee a positive return on the notes. Raymond James’ process in creating the Best Picks for 2018 was to permit the analysts of its research department to each identify stocks that, at the time of the creation of the list, the analyst believes will be able to sustain operational growth and price appreciation over a 12 month period. However, there can be no assurance that any Reference Share, or the Best Picks for 2018 in its entirety, will perform as intended. The list of stocks on Best Picks for 2018 is not dynamic; if the analysts’ opinion of a Reference Share changes after the list is constituted, that change will not cause the deletion or addition of Reference Shares to the list. While all of the securities that are included in the best picks list had a “strong buy” rating from Raymond James at the time of selection, there is no guarantee that those securities will retain that rating throughout the term of the notes. The performance of the Reference Shares may be less than the performance of the equities markets generally, and less than the performance of specific sectors of the equity markets, or other securities in which you may choose to invest. Although Raymond James has expressed a positive view as to the Reference Shares prior to the date of this pricing supplement, its views may change significantly during the term of the notes. In addition, any positive views of Raymond James’ research division is separate and apart from the offering of these notes, and does not constitute investment advice. Our offering of the notes does not constitute our recommendation or the recommendation of ours, Raymond James, or our respective affiliates to invest in the notes or in the Reference Shares.

You will not have any shareholder rights and will have no right to receive any Reference Shares at maturity. Investing in the notes will not make you a holder of any of the Reference Shares. Neither you nor any other holder or owner of the notes will have any voting rights, any right to receive dividends or other distributions (except to the extent that the Dividend Amounts are reflected in the Redemption Amount) or any other rights with respect to any of these securities.

Changes that affect a Reference Share may affect the market value of the notes and the amount you will receive at maturity. Changes affecting a Reference Share or a Reference Share Issuer, such as reorganizations or mergers, will be reflected in the price of that Reference Share and therefore could affect the amount payable on your notes at maturity and the market value of the notes prior to maturity. If these events occur, the calculation agent may adjust the applicable Initial Share Price. See “Description of the Notes—Anti-dilution Adjustments.”

No Reference Share Issuer will have any role or responsibilities with respect to the notes. None of the issuers of the Reference Shares will have authorized or approved the notes, or will be involved in this offering. No such company will have any financial or legal obligation with respect to the notes or the amounts to be paid to you, including any obligation to take our needs or your needs into consideration for any reason, including taking any corporate actions that might affect the value of the Reference Shares or the notes. No such company will receive any of the proceeds

from any offering of the notes. No Reference Share Issuer or any other company will be responsible for, or participate in, the determination or calculation of the Redemption Amount.

An investment in the notes may be subject to risks associated with non-U.S. securities markets. Two of the Reference Shares, Alibaba Group Holding Limited and Broadcom Limited, were issued by a non-U.S. company or may be listed on a non-U.S. stock exchange, in addition to its U.S. listing. Therefore, the return on the notes may be affected by factors affecting the value of securities in the relevant non-U.S. markets. Non-U.S. securities markets may be more volatile than U.S. securities markets, and market developments may affect non-U.S. securities markets differently from the U.S. securities markets. Direct or indirect government intervention to stabilize these non-U.S. securities markets, as well as cross shareholdings among non-U.S. companies, may affect trading prices and volumes in those markets. In addition, non-U.S. companies are subject to accounting, disclosure, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies.

PS-10

Securities prices of non-U.S. companies are subject to political, economic, financial and social factors that may be unique to the particular country. These factors, which could negatively affect the non-U.S. securities markets, include the possibility of recent or future changes in the economic and fiscal policies of non-U.S. governments, the possible imposition of, or changes in, currency exchange laws or other non-U.S. laws or restrictions applicable to non-U.S. companies or investments in non-U.S. equity securities, the possibility of fluctuations in the rate of exchange between currencies, the possibility of outbreaks of hostility and political instability and the possibility of natural disaster or adverse public health developments in the region. Moreover, the economies of certain foreign countries may differ favorably or unfavorably from the U.S. economy in important respects, such as growth of gross national product, rate of inflation, trade surpluses or deficits, capital reinvestment, resources and self-sufficiency.

The return on the notes may be exposed to fluctuations in exchange rates that might affect the prices of the Reference Shares and the payment at maturity. Because one of the Reference Shares included in the Basket, Alibaba Group Holding Limited, in addition to its U.S. listing, trades in a currency other than U.S. dollars, and the notes are denominated in U.S. dollars, the amount payable on the notes at maturity may be exposed to fluctuations in the exchange rate between the U.S. dollar and the currency in which that Reference Share is denominated. These changes in exchange rates may reflect changes in various non-U.S. economies that in turn may affect the payment on the notes at maturity.

We do not control any Reference Share Issuer and we are not responsible for any disclosure made by any other company. Neither we nor any of our affiliates have the ability to control the actions of any Reference Share Issuer, nor do we assume any responsibility for the adequacy or accuracy of any publicly available information about any of these companies, unless (and only to the extent that) our securities or the securities of our affiliates are represented by that Reference Share. We are not responsible for any other issuer's public disclosure of information on itself or any Reference Share, whether contained in U.S. Securities and Exchange Commission (the "SEC") filings or otherwise. We will not perform any due diligence procedures with respect to the applicable Reference Share Issuers. You should make your own investigation into the Reference Share Issuers.

Industry consolidation and other corporate events may alter the composition of the Basket. If a Reference Share Issuer is acquired in a stock-for-stock transaction, the stock of the acquiring company will assume that Reference Share's place in the Basket, including if the stock of the acquiring company is already in the Basket. Consequently, any consolidation among issuers of the Reference Shares will result in an increased weighting in the Basket for the surviving company. The effects on the Basket and the Initial Share Prices of the Reference Shares of consolidation transactions and other reorganization events with respect to the Reference Shares are described in "Description of the Notes—Anti-dilution Adjustments."

You will have limited anti-dilution protection with respect to the Reference Shares. The calculation agent will adjust the Initial Share Price of a Reference Share for stock splits, reverse stock splits, stock dividends and other events that affect the applicable issuer's capital structure, but only in the situations we describe in "Description of the Notes—Anti-dilution Adjustments" below. The calculation agent will not be required to make an adjustment for every corporate event that may affect a Reference Share. For example, the calculation agent will not make any adjustments for events such as an offering by a Reference Share Issuer of equity securities or a tender or exchange offer for less than all outstanding shares of that issuer by a third party. Those events or other actions by the applicable issuer or a third party may nevertheless adversely affect the price of the Reference Share, and adversely affect the value of your notes.

Additional Risks Relating to Reference Shares that Are ADSs

The value of the Reference Share may not accurately track the value of the common shares of the applicable company. If a Reference Share is an ADS, such as BABA, each share of that Reference Share will represent shares of the relevant Reference Share Issuer. The trading patterns of the ADSs will generally reflect the characteristics and

valuations of the underlying common shares; however, the value of the ADSs may not completely track the value of those shares. Trading volume and pricing on the applicable non-U.S. exchange may, but will not necessarily, have similar characteristics as the ADSs. For example, certain factors may increase or decrease the public float of the ADSs and, as a result, the ADSs may have less liquidity or lower market value than the common shares of the Reference Share Issuer.

Adverse trading conditions in the applicable non-U.S. market may negatively affect the value of the Reference Share. Holders of a Reference Share Issuer's ADSs may usually surrender the ADSs in order to receive and trade the underlying common shares. This provision permits investors in the ADSs to take advantage of price differentials between markets. However, this provision may also cause the market prices of the Reference Share to more closely correspond with the values of the common shares in the applicable non-U.S. markets. As a result, a market outside of the U.S. for the underlying common shares that is not liquid may also result in an illiquid market for the ADSs.

PS-11

DESCRIPTION OF THE NOTES

This pricing supplement, and the accompanying prospectus dated April 27, 2017 relating to the notes, should be read together. Because the notes are part of a series of our senior debt securities called Senior Medium-Term Notes, Series D, this pricing supplement and the accompanying prospectus should also be read together with the accompanying prospectus supplement, dated April 27, 2017. Terms used but not defined in this pricing supplement have the meanings given to them in the accompanying prospectus or accompanying prospectus supplement, unless the context requires otherwise.

The notes will be issued in book-entry form through The Depository Trust Company. Owners of beneficial interests in the notes should read the section entitled “Description of the Notes We May Offer—Legal Ownership” in the accompanying prospectus supplement and “Description of Debt Securities We May Offer—Legal Ownership and Book-Entry Issuance” in the accompanying prospectus.

The notes are part of a series of senior debt securities entitled “Senior Medium-Term Notes, Series D” that we may issue from time to time under the senior indenture, dated January 25, 2010, between Bank of Montreal and Wells Fargo Bank, National Association, as trustee. Terms that apply generally to our medium term notes are described in “Description of the Notes We May Offer” in the accompanying prospectus supplement. The terms described in this pricing supplement, supplement those described in the accompanying prospectus and the accompanying prospectus supplement, and, if the terms described here are inconsistent with those described in those documents, the terms described in this pricing supplement are controlling.

We will not pay periodic interest payments on the notes.

Composition of the Basket

The Basket is composed of the 17 Reference Shares, which are the securities included in Raymond James Analysts’ Best Picks for 2018. The Reference Shares will not change over the term of the notes, except in limited circumstances relating to corporate events that may affect the Reference Shares, as described below.

Each Reference Share was assigned a weighting (each, a “Reference Share Weighting”) so that each Reference Share represents a specified portion of the value of the Basket on the first averaging date. The Reference Share Weighting of each Reference Share is 1/17th.

Payment at Maturity

The amount that you will receive at maturity for each \$1,000 in principal amount of the notes (the “Redemption Amount”) will depend upon the performance of the Basket and the dividends paid on the Reference Shares. The Redemption Amount will equal:

$(\$1,000 \times \text{the Basket Level Percentage} \times \text{the Participation Rate})$

Basket Level Percentage. The Basket Level Percentage will equal the sum of the Weighted Reference Share Performances.

Weighted Reference Share Performance. For each Reference Share, the product of (a) its Reference Share Performance and (b) its Reference Share Weighting.

Reference Share Performance. The Reference Share Performance will measure the change in value of each Reference Share over the term of the notes, including the payment of certain dividends. For each Reference Share, the Reference

Share Performance will equal (a) the applicable Final Share Price divided by (b) the applicable Initial Share Price, expressed as a percentage.

Initial Share Price. For each Reference Share, the “Initial Share Price” will be determined over the four averaging dates set forth above. For each Reference Share, the Initial Share Price will equal the arithmetic mean of the Average Intra-day Prices on each averaging date.

Average Intra-Day Price. With respect to each Reference Share and any averaging date, the arithmetic mean of the prices at which we or any of our affiliates (which may include the calculation agent) acquires, establishes, reestablishes, substitutes, maintains, unwinds or disposes of, as the case may be, of any transactions or assets relating to that Reference Share as we deem necessary to hedge our obligations with respect to the notes.

PS-12

Final Share Price. For each Reference Share, the sum of (a) the arithmetic mean of the closing prices on each valuation date, and (b) the Dividend Amount for that Reference Share.

Dividend Amount. An amount in U.S. dollars equal to 100% of the gross cash distributions (including ordinary and extraordinary dividends) per Reference Share declared by the applicable Reference Share Issuer where the date that the applicable Reference Share has commenced trading ex-dividend on its primary U.S. securities exchange as to each relevant distribution occurs from (and including) the second averaging date to (and including) the final valuation date, as determined by the calculation agent, and subject to the following limitations:

with respect to any distribution where the date that the applicable Reference Share commences trading ex-dividend on the second averaging date, only 1/4 of the applicable distribution shall be included;

with respect to any distribution where the date that the applicable Reference Share commences trading ex-dividend on the third averaging date, only 2/4 of the applicable distribution shall be included;

with respect to any distribution where the date that the applicable Reference Share commences trading ex-dividend on the fourth averaging date, only 3/4 of the applicable distribution shall be included;

with respect to any distribution where the date that the applicable Reference Share commences trading ex-dividend on the second valuation date, only 3/4 of the applicable distribution shall be included;

with respect to any distribution where the date that the applicable Reference Share commences trading ex-dividend on the third valuation date, only 2/4 of the applicable distribution shall be included; and

with respect to any distribution where the date that the applicable Reference Share commences trading ex-dividend on the fourth valuation date, only 1/4 of the applicable distribution shall be included.

As to each Reference Share Issuer that is organized outside of the U.S. (AVGO and BABA), each Dividend Amount may be reduced by (a) a “Net Percentage” and (b) the calculation agent’s reasonable estimate of any issuance fee that would apply to a hypothetical U.S. holder of the applicable Reference Share, which such issuance fee we do not expect to exceed 12% of the amount of the relevant dividend). These reductions are designed to reflect the approximate net portion of a dividend that a hypothetical holder of the Reference Share would receive after giving effect to applicable withholding taxes of the relevant jurisdictions and any issuance fees. However, there can be no assurance that these reductions would reflect the actual amounts received by any holder of the applicable Reference Shares. The Net Percentages are up to 0% as to AVGO, and up to 10% as to BABA.

Valuation Dates

The valuation dates will occur on four trading days occurring shortly before the maturity date. The scheduled valuation dates are: January 18, 2019, January 22, 2019, January 23, 2019 and January 24, 2019. If any valuation date is not a trading day as to any Reference Share, that valuation date will be postponed as to that Reference Share to the next trading day (and each subsequent valuation date will be similarly postponed). If the calculation agent determines that a market disruption event occurs or is continuing on any valuation date, the Final Share Price of the applicable Reference Share or Reference Shares will be determined according to the calculation in “—Consequences of Market Disruption Events” below.

Maturity Date

The maturity date will be January 28, 2019, unless that date is not a business day, in which case the maturity date will be the next following business day. The maturity date will be postponed by the same number of business days as the

final valuation date may be postponed, as provided herein and no interest will be payable as a result of any such postponement.

Certain Definitions

Business Day. A day of the week other than Saturday or Sunday that is neither a legal holiday nor a day on which banking institutions are authorized or obligated by law or executive order to close in New York City, Toronto, or Montreal.

Trading Day. As to any Reference Share, any day, as determined by the calculation agent, on which trading is generally conducted on the relevant primary U.S. exchange for that Reference Share.

PS-13

Closing Price. The closing price for any Reference Share on any day will equal the closing sale price or last reported sale price, regular way, for the security, on a per-share basis:

- on the principal national securities exchange on which that Reference Share is listed for trading on that day, or
- if that Reference Share is not listed on any national securities exchange on that day, on any other market system or quotation system that is the primary market for the trading of that Reference Share.

If that Reference Share is not listed or traded as described above, then the closing price for that Reference Share on any day will be the average, as determined by the calculation agent, of the bid prices for the security obtained from as many dealers in that security selected by the calculation agent as will make those bid prices available to the calculation agent. The number of dealers need to exceed three and may include the calculation agent, Raymond James, or any of their respective affiliates.

Consequences of Market Disruption Events

If a market disruption event with respect to any of the Reference Shares occurs or is continuing on any scheduled averaging date or valuation date, the price of any affected Reference Share for that date will be based upon its price on the next scheduled trading day on which no market disruption event occurs, and each subsequent averaging date or valuation date will be similarly postponed. In no event, however, will any averaging date or valuation date be postponed by more than ten trading days. As a result, if a market disruption event occurs or is continuing on an averaging date or a valuation date, the determination of the Initial Share Price or the Final Share Price could also be postponed, although not by more than ten trading days. If the final scheduled valuation date is postponed, the maturity date shall be postponed by the same number of business days.

If an averaging date or a valuation date is postponed to the tenth scheduled trading day thereafter, and a market disruption event occurs on that day, then the calculation agent shall determine the value of the applicable Reference Share on that day based upon its good faith estimate, made in its sole discretion, of the value that would have been applicable in the absence of the market disruption event.

Any of the following will be a “market disruption event” as to any Reference Share:

- a suspension, absence or limitation of trading in (i) that security in its primary market, as determined by the calculation agent, or (ii) futures or options contracts relating to that security in the primary market for those contracts, as determined by the calculation agent;

- any event that disrupts or impairs, as determined by the calculation agent, the ability of market participants to (i) effect transactions in, or obtain market values for, the security in its primary market, or (ii) effect transactions in, or obtain market values for, futures or options contracts relating to that security in its primary market;

the closure on any day of the primary market for that security on a scheduled trading day prior to the scheduled weekday closing time of that market (without regard to after hours or any other trading outside of the regular trading session hours) unless such earlier closing time is announced by the primary market at least one hour prior to the earlier of (i) the actual closing time for the regular trading session on such primary market on such scheduled trading day for such primary market and (ii) the submission deadline for orders to be entered into the relevant exchange system for execution at the close of trading on such scheduled trading day for such primary market;

- any scheduled trading day on which (i) the primary market for that security or (ii) the exchanges or quotation systems, if any, on which futures or options cont
