**Transax International Limited Reports Significant Transaction Volume and Revenue Increase For Third Quarter 2004. Brazil Operations Reach Break Even Status.**

IRVINE, Calif. October 12th, 2004 - Transax International Limited ("Transax") (OTC Bulletin Board: TNSX; Frankfurt/Berlin: TX6) has reported today through an 8K filing to the Securities and Exchange Commission that it has achieved a 38% increase in transaction volume during the third quarter 2004 compared with the second quarter of 2004 and will record third quarter revenues in excess of USD360,000. For the months of August 2004 and September 2004 alone, Transax has recorded revenues of approximately USD250,000 and its operations in Brazil have reached the break-even point.

Commenting on the preliminary results for the third quarter of 2004, Stephen Walters, President & CEO, stated: "Since commencing our roll-out program, we have experienced seven consecutive quarters of transaction volume and revenue growth. Moreover, our results for the third quarter 2004, and especially the 38% transaction volume increase over the June 2004 quarter is a credit to our operations staff." Walters continued: "With favorable contract negotiations with our clients and the continued rollout of our solutions to healthcare providers, our operations in Brazil have achieved the break-even point, recording USD250,000 in revenues during the last 60 days, as we look forward to the continued roll-out of our solutions until we reach profitability."

Transax is currently in discussions with its clients on roll-out strategy for 2005, and expects to achieve double digit sequential revenue quarterly growth for the remainder of 2004 and beyond into 2005.

Based on the success of its "real time" solution in South America's largest market and its recurring revenue model, Transax plans a major expansion for 2005 into the North American market where it has received interest from a number of medical providers, medical professionals and payers to participate in a pilot scheme providing an "on line and real time" solution for authorization and adjudication of healthcare claims for the USA market. Transax is currently in discussions with a major USA based technology consulting group regarding changes required in its solution to become HIPPA compliant for the USA market.

---

About Transax International Limited: Transax is a premier international provider of information network solutions for healthcare providers and health insurance companies, enabling the "real-time" automation of routine patient eligibility verifications, authorization, claims processing and payment functions that are currently performed manually. The technology has been proven to significantly decrease health insurance claim expenditure and provides additional operational efficiencies for the health insurer. Transax "MedLink" solution has been specifically designed for the healthcare and health insurance industry to allow insurance companies, Health Maintenance Organizations, and other industry concerns to connect to healthcare providers and electronically undertake eligibility, authorization and processing of health claims in "real-time". MedLink has been developed as a "Total Connectivity" solution where Transax is able to provide an insurer with the ability to cost effectively process all of the transactions generated in "real time" regardless of location or method of generation. Presently operational in Brazil, Transax currently undertakes approximately 300,000 transactions per month, has contracts in place for in excess of 2,500,000 transactions per month, and other potential contracts in various stages of negotiation.
