(1) According to the non-recurring events described on page 8 of the Report on Economic and Financial Analysis; (2) Excludes the asset valuation adjustments recorded under Shareholders' Equity; (3) or R\$112.189 billion, considering the total number of shares (less treasury shares) x closing quote of preferred shares on the last day of the period (most liquid share); (4) Considers reinvestment of dividends/interest on shareholders' equity; (5) Includes Sureties and Guarantees, advances of credit cards receivables and loan assignments (receivables-backed investment funds and mortgage-backed receivables); (6) In last twelve months.

15. Bradesco, helping to capitalize companies, intermediated through Banco Bradesco BBI S.A. issuances of primary and secondary shares, debentures, promissory notes, mortgage-backed securities and receivables-backed investment funds, which amounted to R\$6.980 billion in the period, representing 45.1% of the total volume of these issuances registered at the Securities and Exchange Commission of Brazil (CVM). Bradesco also registered strong volumes of project finance and structured operations, and was responsible for the origination, distribution and management of clients' assets, cash flows and financial inventories.

16. Main Awards and Recognitions in the period:

- Bradesco was the leading bank in the 7th edition of the survey Companies that Most Respect the Consumer (*Consumidor Moderno* magazine and Shopper Experience);
- Bradesco ranked 1st in the new quality ranking of companies with the best customer service in 2009 (*Exame* magazine, in partnership with the Brazilian Customer Relations Institute);
- Bradesco won, for the second consecutive year, the International Golden Peacock Global Award for Corporate Social Responsibility 2010, which is only awarded to companies that adopt the best corporate social responsibility practices;
- Bradesco was the only Brazilian bank included in the ten most valuable brands in the world among financial institutions, with the brand worth US\$13.3 billion (Global Banking 500 - Brand Finance/The Banker magazine);
- Bradesco won the International Technology Application of the Year - *Transpromo* award for the study case Application to Checking Account Statements (*Xplor International*);
- The Bradesco Brazil Bond Fund - Dividend Focus Fund was selected the best investment fund of the year in the category Brazilian fixed-income securities (MorningStar);
- Bradesco Corretora ranked first in an annual survey of institutions with the best stock recommendations for components of the Morgan Stanley Capital International index (MSCI) - *Emerging Markets Free Latin America* stock; and
- Bradesco was the best Brazilian company in the Canadian Corporate Knight ranking of the 100 most sustainable companies in the world.

17. Bradesco's sustainability actions are divided into three pillars: (i) Sustainable Finances, with a focus on banking inclusion, social and environmental variables for loan approvals and offering social and environmental products; (ii) Responsible Management, focused on valuing professionals, improving the workplace and adopting eco-efficient practices; and (iii) Social and Environmental Investments, focused on education, the environment, culture and sports. The highlight in this area is Fundação Bradesco, which for 53 years has been developing a broad social and educational program that operates 40 schools across Brazil. In 2010, a R\$268.010 million budget will provide over 662 thousand services, of which 112 thousand were provided to students in its own schools. In addition, the over 50 thousand students enrolled in basic education also receive, at no charge, uniforms, school materials, food and medical and dental care. Over 550 thousand students will be served through the Virtual School, its e-learning portal, through the Digital Inclusion Centers (CIDs) and through programs conducted under strategic partnerships, like Educa+Ação.

Adjusted Net Income and Profitability

In the first quarter of 2010, Adjusted Net Income was R\$2,147 million, an increase of 16.7% or R\$308 million on the previous quarter. Compared with the same quarter of 2009, this increase was 9.8% or R\$191 million. This growth was mainly driven by the better economic environment as of the third quarter of 2009, with lower delinquency and recovery in loan growth.

Shareholders' Equity stood at R\$43,087 million on March 31, 2010, increasing 22.0% from the previous year. The Capital Adequacy Ratio reached 16.8%, 14.3% of which under Tier I Reference Assets.

The main reasons for this result are described below in the analysis of the main income statement items, with the consolidation of the income accounts of Banco Ibi as of November 2009.

Efficiency Ratio

In March 2010, Bradesco's Efficiency Ratio* stood at 41.2%, up 0.7 p.p. from the end of the previous quarter. The variation was basically due to other administrative and personnel expenses, which were impacted in part by the merger of Banco Ibi and lower non-interest financial margin offset primarily by the higher revenue.

Compared to the first quarter of 2009, the 1.3 p.p. improvement was mainly due to the higher revenue from financial margin and fee and commission income, and was offset by the recording of allowances for contingencies related to civil claims and by higher personnel and administrative expenses.

* Efficiency Ratio (ER) in last twelve months = $\frac{\text{Personnel Expenses} + \text{Employee Profit Sharing (PLR)} + \text{Administrative Expenses}}{\text{Financial Margin} + \text{Income from Insurance} + \text{Fee and Commission Income} + \text{Equity in the Earnings (Losses) of Unconsolidated Companies} + \text{Other Operating Expenses} + \text{Other Operating Income}}$. If we considered the ratio between total administrative costs (Personnel Expenses + Administrative Expenses + Other Operating Expenses + Tax Expenses not related to revenue generation) and revenue net of related taxes (not considering Claims Expenses from the Insurance Group), our Efficiency Ratio in the first quarter of 2010 would be 40.5%

Financial Margin

The increase of R\$197 million between the first quarter of 2010 and the fourth quarter of 2009 was due to:

- the increase in income from interest-earning operations of R\$262 million, mainly due to the higher average volume of loan operations;

offset by:

- the R\$65 million reduction in non-interest income caused by the lower treasury/securities gains.

In the comparison between the first quarter of 2010 and the same period of 2009, financial margin improved by R\$574 million, or 8.1%, driven by the following factors:

- the R\$984 million increase in the result of interest-earning operations as a result of an increase in loans, due to the higher business volume and increased margins;

offset by:

- the decrease in non-interest income of R\$410 million, basically derived from lower treasury/securities gains.

Total Loan Portfolio

In March 2010, Bradesco's loan operations (considering sureties, guarantees, advances of credit card receivables and assignment of receivables-backed investment funds and mortgage-backed securities) totaled R\$235.2 billion. This expansion of 3.1% in the quarter was due to growth of 4.8% in the Individuals portfolio, 4.2% in the SME portfolio and 0.7% in the Large Corporate portfolio.

In the comparison between the 12-month periods, the portfolio expanded by 10.4%, composed of the following growth rates: Individuals 16.7%, SMEs 14.5% and Large Corporate 1.7%.

In the Individuals segment, the products registering the strongest growth in the last twelve months were: payroll-deductible loans, credit cards and vehicle loans. In the Corporate segment, growth was led by real estate financing -corporate plans, BNDES/Finame onlending operations and working capital loans.

Allowance for Loan Losses (PLL)

In the first quarter of 2010, the balance of expenses with the allowance for loan losses fell for the third consecutive quarter, by 18.8% from the previous quarter, mainly due to the reduction in the allowance, which occurred despite the 3.1% expansion in the loan portfolio in the first quarter of 2010. Compared to the same period of 2009, expenses in the first quarter of 2010 decreased by 20.8%, demonstrating the growth, accompanied by quality, of Bradesco's loan portfolio.

Delinquency Ratio > 90 days

The delinquency ratio for credits overdue more than 90 days decreased to 4.4% in the first quarter of 2010, benefitted by the better economic scenario and recovery in economic activity, which fueled growth in loan operations in the quarter.

Improvement was observed in all segments and we expect this trend to continue over the next few months, given the current economic scenario.

Coverage Ratio

The balance of the Allowance for Loan Losses of R\$15.8 billion in March 2010 was composed of R\$12.8 billion in provisions required by the Central Bank of Brazil and R\$3.0 billion in additional provisions.

The graph below presents the evolution of the coverage ratio of the Allowance for Loan Losses for loans overdue more than 90 days. In March 2010, the ratio stood at 180.8%, the highest level in the data series and representing a very comfortable level of provisioning, especially when compared to a year earlier (152.4%).

Adjusted Results of the Insurance, Private Pension and Savings Bond Operations

Adjusted Net Income in the first quarter of 2010 was R\$703 million, for Return on Average Equity of 27.9% and growth of 16.8% from Adjusted Net Income in the fourth quarter of 2009 of R\$602 million.

Compared to the same quarter of 2009, Adjusted Net Income increased by 8.2%.

Note: For comparison purposes, we excluded the ratios of the first quarter of 2010 the build in Technical Provision for benefits to be granted Remission (Health), and did not consider in the calculation of combined ratios the effects of RN 206/09, which had an effect on health revenues;

(*) Market Share Excludes the R\$345 million (health) impact of RN 206/09 (ANS), which as of January 2010 eliminated PPNG (SES), with revenue from premiums now accounted Pro-rata temporis. This accounting change did not affect Earned Premiums.

(**) Data as of January 2010, November 2009, August 2009, May 2009, January 2009, November 2008, July 2008 and May 2008.

In the first quarter of 2010, revenue from the Insurance Group (insurance premiums written, private pension contributions and savings bonds income) decreased by 10.5% from the previous quarter, basically reflecting the seasonality of the fourth quarter of 2009, which historically records stronger growth than the other quarters, mainly due to the high concentration of private pension plan contributions.

The 30.5% increase in production in the first quarter of 2010 compared with the same quarter a year earlier was mainly driven by growth in the products Life, PGBL and VGBL (38.6%), Auto (38.8%) and Savings Bonds (27.4%).

Adjusted Net Income in the first quarter of 2010 grew by 16.8% from the previous quarter, mainly due to the net result of: (i) the improvement of 1.0 percentage point in the claims ratio, despite the severe rain events in São Paulo state during the period; and (ii) the increase in personnel expenses as a result of the collective bargaining agreement, with the base date of January. Note that Adjusted Net Income in the fourth quarter of 2009 was impacted by: (i) expenses with the creation of a provision for insufficient contribution (PIC); and (ii) a technical provision for administrative expenses (PDA) due to the decrease in the interest rate used to calculate these reserves from 4.3% p.a. to 4% p.a.

Adjusted Net Income in the first quarter of 2010 increased by 8.2% from the first quarter of 2009, due to: (i) the revenue growth of 30.5%; (ii) the slight drop in claims, despite the intense rain events in São Paulo state; (iii) the improvement in the financial result; and offset by: (iv) the increase in administrative expenses due to the collective bargaining agreement.

In January 2010, Net Income from Bradesco's Insurance Group accounted for 40% of net income in Brazil's entire insurance industry and 53% of the net income from insurance companies associated with banks (Source: Insurance Superintendence - Susep).

Meanwhile, the Insurance Group's technical provisions represented 31.8% of the insurance industry in January 2010, according to Susep and the National Supplementary Health Agency (ANS).

In terms of solvency, Grupo Bradesco de Seguros e Previdência complies with the Susep rules that took effect on January 1, 2008, and also with international standards (Solvency II). The financial leverage ratio stood at 2.7 times Shareholders' Equity.

Fee and Commission Income

In the first quarter of 2010, Fee and Commission Income totaled R\$3,124 million, remaining practically stable in relation to the previous quarter. An important factor was the increase in the credit card line, basically reflecting the impacts from the merger of Banco Ibi as of November 2009, which offset the decrease in revenue from credit and underwriting transactions in the period.

In comparison with the same quarter of 2009, the 14.7% increase was driven by the strong performance of credit card operations, the higher income from underwriting operations and the higher income from fund management due to the expansion in business volume and the client base, which grew some 5% from the previous twelve months.

Personnel Expenses

In the first quarter of 2010, the R\$39 million increase from the previous quarter was composed of variations in the following components:

- structural - R\$10 million, essentially related to the higher expenses with salaries and compulsory social charges resulting from the collective bargaining agreement for insurance workers in January 2010, the change in the Occupational Accident Insurance (SAT) rate and the merger of Banco Ibi and Odontoprev, which were offset by the higher concentration of vacations in the first quarter; and
- non-structural R\$29 million, basically related to the higher expenses with the provision for employee profit sharing.

In the comparison with the same quarter last year, the R\$268 million increase reflects:

- the R\$147 million increase in structural expenses related primarily to the higher expenses with salaries, social charges and benefits, which were mainly impacted by the wage increase (6% under the 2009 collective bargaining agreement) and the merger of Banco Ibi; and
- the R\$121 million increase in "non-structural expenses", which was basically due to higher expenses with the provision for employee profit sharing and higher provisions for labor claims.

Note: Structural Expenses = Salaries + Compulsory Social Charges + Benefits + Private Pension.

Non-Structural Expenses = Employee Profit Sharing (PLR) + Training + Labor Provision + Severance Expenses.

Administrative Expenses

Administrative Expenses fell 3.6% from the fourth quarter of 2009, mainly explained by the lower advertising and marketing expenses due to seasonality, which was partially offset by higher expenses with outsourced services.

In comparison with the first quarter of 2009, the 22.8% increase basically reflects the expansion in the Customer Service Network, the higher business volume, the expansion in the client base and the impact of the Banco Ibi merger.

Tax Expenses

Tax expenses in the first quarter of 2010 increased by R\$55 million from the prior quarter, basically due to the growth in taxable revenue, especially financial margin.

In comparison with the same period of the previous year, the increase of 27.6% or R\$162 million was primarily driven by the higher expenses with PIS/Cofins taxes due to the higher taxable revenue from financial margin and fee and commission income in the period.

Other Operating Income and Expenses

In the first quarter of 2010, other operating expenses, net of other operating income, increased by R\$11 million on the previous quarter, primarily due to: (i) higher expenses with the provision for civil contingencies; (ii) higher expenses with goodwill amortization; and offset by (iii) lower expenses with sundry losses.

Compared with the same quarter of 2009, the R\$138 million increase in other operating expenses net of other operating income basically reflects: (i) higher expenses with provisions for civil contingencies; (ii) higher expenses with goodwill amortization; and (iii) higher expenses with sundry losses.

Income Tax and Social Contribution

The R\$491 million contraction in the first quarter of 2010 from the previous quarter is basically explained by the increase in taxable income.

In comparison with the first quarter of 2009, income tax and social contribution rose by 39.7%, due to the higher operating income in the first quarter of 2010.

Tax credits from prior periods, which resulted from the increase in the CSLL tax rate to 15%, are recorded in the book financial statements up to the limit of corresponding consolidated tax liabilities. The balance of unused tax credits is R\$736 million. Further details can be found in Note 34 to the Financial Statements.

Unrealized Gains

Unrealized gains totaled R\$10,911 million in the first quarter of 2010, up R\$788 million from the previous quarter. The variation was mainly represented by: (i) gains on investments, in particular from our remaining interest in Cielo; and (ii) the increase in unrealized gains in the held-to-maturity securities portfolio.

Economic Scenario

The recovery in the world economy continues to advance, despite the more pessimistic predictions. The performance of the U.S. economy, in particular, has been quite surprising, and, combined with robust growth in the developing world, has led to recovery in production, trade and employment levels worldwide. Asia and Latin America continue to lead the recovery among emerging markets, led by China and Brazil. Meanwhile, Europe, through Germany and France, is showing signs of recovery, while more fiscally vulnerable countries, like Greece, Portugal, Spain, Ireland and the United Kingdom, will have to make important adjustments to their economies to address the high public-sector deficits, which should lead to slower growth in the region in the medium term. However, fiscal imbalances will remain on the radar for several quarters, however, these issue should not prevent the slow (albeit consistent and sustainable) recovery in the world economy.

Brazil remains a highlight in the global economy, demonstrating an unmatched capacity to respond to the crisis, and is now benefitting from internal growth dynamics, with the economic recovery expanding to include all sectors, even those not directly benefitted by government incentives. This dynamic is rooted in the strong job market and income growth, which has led to strong growth in investment in the industrial sector and one of the highest diffusion rates in recent history. The 31.4% increase in capital goods production since the onset of the recovery in March last year shows the extent to which Brazilian companies are preparing for this strong cycle of demand growth. Despite the growth in investment, capacity utilization has increased rapidly, generating increased inflationary pressures in the industrial sector and for consumers.

In view of these indicators and the prospects for the favorable scenario remaining in place, we have revised our forecast for Brazil GDP growth in 2010 to 6.4%. Annual inflation in 2010, which should reach 8.0% for the IGP-M reading and 5.5% for the IPCA reading, is expected to lead the Central Bank to concentrate its hikes in the Selic basic interest rate somewhat more than in our previous forecast, with a cumulative hike of 2.25 p.p. in three meetings and continuing the tightening cycle into 2011, taking the Selic rate to 12.25%. In spite of the higher interest rates, the outlook for growth in employment and income levels, as well as for output in the industrial, agricultural and services sectors, remains extremely favorable.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
