**Forward-Looking Statements**

This Economic and Financial Analysis Report contains forward-looking statements related to our business. Such statements are based on management's current expectations, estimates and projections concerning future events and financial trends that may affect our business. Words such as "believe", "anticipate", "plan", "expect", "intend", "goal", "estimate", "forecast", "predict", "project", "guidelines", "should" and other similar expressions are used to indicate predicting statements. However, forward-looking statements are not guarantees of future performance and involve certain risks and uncertainties that may be beyond our control. In addition, some forward-looking statements are based on assumptions which, depending on future events, may prove not to be accurate. Therefore, actual results may differ significantly from the plans, goals, expectations, projections and intentions expressed or implied in such statements.

The factors that may impact the actual results include, among others, changes in regional, national and international trade and economic policies; inflation; an increased number of defaults by borrowers in loan operations, with a consequent increase in the allowance for losses from loan operations; loss of ability to receive deposits; loss of customers or revenues; our ability to sustain and improve performance; changes in interest rates which may, among other things, adversely affect our margins; competition in the banking industry, financial services, credit card services, insurance, asset management and other related industries; government regulation and fiscal affairs; disputes or adverse legal proceedings or regulations; and credit and other risks involved in lending and investment activities.

As a result, one should not rely excessively on these forward-looking statements. The statements are valid only for the date on which they were drafted. Except as required by applicable law, we do not assume any obligation to update these statements as a result of new information, future developments or any other matters which may arise.

Some numbers included in this Report have been subjected to rounding adjustments.

As a result, some amounts indicated as total amounts in some charts may not be the arithmetic sum  
of the preceding numbers.

("HSBC"). The completion of the operation is subject to the approval of the other competent regulatory authorities and compliance with legal formalities.

18. In January 2016, Bradesco signed a non-binding Memorandum of Understanding with Banco do Brasil S.A., Banco Santander (Brasil) S.A., Caixa Econômica Federal and Itaú Unibanco S.A., in order to create a holding company of credit intelligence ("GIC"), which will develop a database with the goal of adding, reconciling and handling database and credit-related information, of individuals and legal entities, which expressly authorize their inclusion in the database, as required by the applicable rules.

19. Major Awards and Acknowledgments in the period:

- Most valuable brand in Brazil in the last 10 years, according to the ranking promoted by *IstoÉ Dinheiro* magazine in partnership with consultancy firm Kantar Vermeer, linked to the British group WPP;
- Bradesco BBI was awarded "The best investment bank of Brazil" in 2016 in the 17th edition of "Best Investment Banks of the world" (Global Finance magazine);

Organização Bradesco is fully committed to internationally recognized sustainability and corporate governance initiatives, particularly: Global Compact, PRI (Principles for Responsible Investment), and Equator Principles. We set our guidelines and strategies with a view to incorporating the best sustainability practices into our businesses, considering the context and the potential of each region, thus contributing to the generation of value in the Organization. Our management process adopts economic and socio-environmental indexes developed in Brazil and abroad, such as the Dow Jones Sustainability Index (DJSI), the Corporate Sustainability Index (ISE, of BM&FBovespa), and the Carbon Efficient Index (ICO2, also of BM&FBovespa), as well as the guidelines and indexes of the Global Reporting Initiative (GRI) and the Carbon Disclosure Project (CDP).

With a broad social and educational program in place for 59 years, Fundação Bradesco operates 40 schools across Brazil. In 2016, an estimated R\$593.360 million budget will benefit approximately 101,566 students enrolled in its schools at the following levels: basic education (from kindergarten to high school and higher secondary technical-professional education), youth and adult education; and preliminary and continuing vocational training, which focuses on creating jobs and income. In addition to being guaranteed free, quality education, the students enrolled in the Basic Education system, numbering approximately 43 thousand, also receive uniforms, school supplies, meals, and medical and dental assistance. With regard to the distance learning system (EaD), it is estimated that more than 550 thousand students will benefit from it, through its e-learning portal Escola Virtual (Virtual School). These students will conclude, at least, one of the various courses

**Summarized Analysis of Adjusted Income**

**Adjusted Net Income and Profitability**

The return on the Average Adjusted Shareholders' Equity (ROAE), which is calculated on a linear basis, registered 17.5% in March 2016. In this quarter, the reduction of the adjusted net income, which varied -9.8% in the quarterly comparison, and -3.8% in the annual comparison, impacted, largely, by the increase in allowance for loan losses expenses, as a result of: (i) the levelling of provisioning for corporate client operations, particularly a specific case, whose rating worsening had an impact of R\$836 million; and (ii) the effect of an increase in delinquency due to the economic slowdown.

The main events that affected adjusted net income are detailed below.

Adjusted net income reached R\$4,113 million in the first quarter of 2016, a decrease of R\$449 million compared to the previous quarter, mainly due to the increase in allowance for loan losses expenses, for the reasons detailed above. However, it is highlighted: (i) the decrease in administrative expenses; and the increment; (ii) the "interest-earning portion of the NII"; and (iii) the income of insurance premiums, pension and capitalization bonds.

In the comparison between the first quarter of 2016 and the same period in the previous year, the adjusted net income decreased R\$161 million, which reflects the highest revenues in (i) provision for doubtful debts, for the reasons detailed above; and (ii) personnel and administrative expenses. However, it is highlighted the increase of revenues

originated from: (i) the interest earning portion; (ii) the services provided; and (iii) the highest operating result of Insurance, Pension Plans and Capitalization Bonds, net of technical reserves, retained claims and others.

Shareholders' Equity totaled R\$93,330 million in March 2016, up 11.2% over March 2015. Basel III Ratio, calculated based on the Prudential Conglomerate, stood at 16.9%, 12.9% of which was classified as Common Equity / Tier I.

Total Assets registered R\$1.102 trillion in March 2016, a 6.5% increase over March 2015, driven by the increased turnover. Return on Average Assets (ROAA) reached 1.5%, calculated on a linear basis.

## Summarized Analysis of Adjusted Income

### Operating Efficiency Ratio (ER)

The 12-month ER<sup>(1)</sup> reached 37.2% in the first quarter of 2016, once again registering the best historical level, showing improvement of 0.3 p.p. in comparison to the previous quarter, and 1.1 p.p. in comparison to the same period of the previous year, whereby the main variations were due to the increase in (i) the interest earning portion of the NII; (ii) fee and commission income; (iii) higher income from Insurance, Pension Plans and Capitalization Bonds, net of technical reserves, retained claims and others; offset, largely, by: (iv) the increase in operational expenses in the period.

The improvement of 3.0 p.p. in the quarterly ER, in the first quarter of 2016, was mainly, due to: (i) lower administrative expenses, arising, basically, (a) from the higher advertising and marketing expenses and (b) larger volumes of transactions and services, in the fourth quarter of 2015; combined with: (ii) the growth of interest-earning portion of the NII.

The risk adjusted ER, reflects the impact of the risk associated with loan operations<sup>(2)</sup> and reached 47.1%, impacted by 0.6 p.p., primarily due to levelling of provisions for corporate clients carried out in the first quarter of 2016.

(1)  $ER = (\text{Personnel Expenses} - \text{Employee Profit Sharing} + \text{Administrative Expenses}) / (\text{Net Interest Income} + \text{Fee and Commission Income} + \text{Income from Insurance} + \text{Equity in the Earnings (Losses) of Unconsolidated Companies} + \text{Other Operating Income} - \text{Other Operating Expenses})$ ; and

(2) Including ALL expenses, adjusted for discounts granted, loan recovery and sale of foreclosed assets, among others.

It is important to mention that the ER performance reflects the strategy of sustainable growth, which includes, among other things, (i) the availability of appropriate products and services for clients through the segmentation of the base and of digital channels, (ii) the optimization of points of service, and (iii) the strict control of operating expenses, arising from the actions of the Efficiency Committee and of investments in Information Technology, in the amount of R\$1.390 billion, in the first quarter of 2016.

Press Release**Summarized Analysis of Adjusted Income****NII (Net Interest Income)**

In the quarterly comparison, the R\$380 million, or 2.6%, increase was, mainly, due to: (i) the higher interest-earning portion of the NII, to the value of R\$354 million, with emphasis on "Securities/Other" and "Credit Intermediation", a result of an improved management in investment resources and funding operations; and (ii) non-interest-earning portion of the NII, in the amount of R\$26 million.

In the comparison between the first quarter of 2016 and the same period in the previous year, the net interest income increased by R\$1,293 million, or 9.5%, mainly due to: (i) a higher interest-earning portion of the NII, in the amount of R\$1,461 million, particularly in "Credit Intermediation"; and offset by: (ii) the non-interest-earning portion of the NII, in the amount of R\$168 million.

**NII - Interest Earning Portion – Average Rates in the last 12 months**

Insurance	1,475	180,970	3.3%	1,523	174,030	3.4%
Securities/Other	1,773	411,992	1.6%	1,544	395,578	1.6%
<b>NII - Interest Earning Portion</b>	<b>14,734</b>	<b>-</b>	<b>7.5%</b>	<b>14,380</b>	<b>-</b>	<b>7.5%</b>

The average rate of the NII – interest-earning portion in the last 12 months was 7.5% in the first quarter of 2016. In the year-over-year comparison, the growth of 0.2 p.p. was the reflection of increased profits obtained in the interest earning portions of "Credit Intermediation" and "Insurance".

**Summarized Analysis of Adjusted Income**

**Expanded Loan Portfolio<sup>(1)</sup>**

In March 2016, the expanded loan portfolio of Bradesco totaled R\$463.2 billion, a 2.3% decrease in comparison to December 2015, impacted, partially, by the exchange rate variation in the quarter. Micro, Small and Medium Sized Enterprises and Corporations presented a reduction of 6.5% and 1.7%, respectively, while the Individual remained stable in the period.

In relation to the last 12 months, the balance of the portfolio remained stable, focused on the growth of: (i) 4.0% in the Individual; and (ii) 2.9% in the Large Companies, favored by the exchange rate variation of the period.

For Individuals, the products that have the strongest growth in the last 12 months were: (i) real estate financing; and (ii) payroll-deductible loans. For the Corporate segment, the highlights were: (i) export financing; and (ii) operations bearing credit risk – commercial portfolio (debentures and promissory notes).

(1) In addition to Bacen loan portfolio, it includes sureties, guarantees, letters of credit, advances of credit card receivables, debentures, promissory notes, co-obligation in mortgage-backed receivables, and farm loans.

For more information, see Chapter 2 of this Report.

**Allowance for Loan Losses (ALL) Expenses <sup>(1)</sup>**

In the first quarter of 2016, allowance for loan losses expenses totaled R\$5,448 million, registering a variation of 30.0%, or R\$1,256 million, over the previous quarter, and a variation of 52.2%, or

R\$1,868 million, over the same quarter of 2015, mainly impacted by: (i) levelling of provisions for corporate clients, particularly a specific case, whose rating worsening had an impact of R\$ 836 million; and (ii) by the higher delinquency rate in the quarter, mainly due to the process of deceleration in economic activity. It is important to note that the balance in credit operations – Bacen concept remained stable in the year and presented a decrease of 3.6% in the quarter.

The effect in the growth of delinquency rates was mitigated by the reinforcement of the credit granting policies, quality of guarantees, as well as the improvement of the credit recovery processes. It is important to highlight that, from this quarter, the effect of an improvement in the guarantee management system, in terms of vehicle operations, did not produce any relevant effect on the allowance for loan losses expenses.

For more information, see Chapter 2 of this Report.

**Summarized Analysis of Adjusted Income**

**Delinquency Ratio<sup>(1) (2)</sup>**

**Delinquency over 90 days**

As expected, the total delinquency ratio, which refers to operations that are over 90 days past due, increased in the quarter, mainly due: (i) to the continuity of the unfavorable economic situation, which impacted the quality of the credit portfolio, mainly for the Individual and Micro, Small and Medium-Sized Enterprises; and (ii) by the reduction of the credit portfolio in the first quarter of 2016, also including Micro, Small and Medium Sized Enterprises.

**Delinquency from 15 to 90 days**

In the quarter, short-term delinquency, including operations past due between 15 and 90 days presented growth, impacted, in part, by: (i) seasonal issues of the beginning of the year; and (ii) the individual cases of corporate clients.

(1) As defined by Bacen; and

(2) Portfolios were not sold.

**Provisioning, Delinquency, ALL and Effective Coverage Ratio**

The assertiveness of the provisioning criteria adopted must be mentioned, which is proven by: (i) analyzing historical data on recorded allowances for loan losses; and (ii) effective losses in the subsequent 12-month period. When analyzed in

terms of net loss of recovery, for an existing provision of 6.7% of the portfolio<sup>(1)</sup> in March 2015, the net loss in the subsequent 12 months was 3.3%, that is, representing an effective coverage of 203.0%.

It should be highlighted that, considering the losses expected for one year (dotted part), which has a high correlation with E-H non-performing loans, there is an effective coverage of 220.5% for March 2016, which compares well with excess ALL, because it eliminates the effect of any sales of portfolios.

**Income from Insurance, Pension Plans and Capitalization Bonds**

In the first quarter of 2016, the revenue showed an increase of 11.4% in comparison to the same period of the previous year, influenced by “Life and Pension Plans” and “Health Plans” products, which increased 13.6% and 16.8%, respectively.

Due to the concentration of private pension contributions, which occur historically in the last quarter of the financial year, the revenue did not present the same performance, in comparison to the fourth quarter of 2015.

The net income of the first quarter of 2016 remained in line with the results presented in the previous quarter, basically, due to: (i) a decrease of 0.5 p.p. in the commercialization index; (ii) the maintenance of the claims ratio and the administrative efficiency ratio, even considering the collective bargaining agreement in January 2016; partially offset by: (iii) a decrease in revenues; and (iv) a decrease in the financial and equity results.

**Minimum Capital Required – Grupo Bradesco Seguros**

According to CNSP Resolution No. 321/15, corporations should have adjusted shareholder’s equity (ASE) equal to or higher than the minimum capital required (MCR). MCR is equivalent to the highest value between the base capital and the risk capital. For companies regulated by the ANS, Normative Resolution No. 373/15 establishes that

The net income of the first quarter of 2016 was 7.6% higher than the results presented in the same period last year, basically due to: (i) the growth of 11.4% in revenues; (ii) the decrease of 0.5 p.p. in the commercialization index; (iii) the improvement in the financial and equity results; partially offset by: (iv) the increase of the Social Contribution rate (CSLL), that influenced the first quarter of 2016 results; and (v) the increase of 0.4 p.p. in the claims ratio.

The capital adjustment and management process is continuously monitored and aims to ensure that Grupo Bradesco Seguros keeps a solid capital base to support the development of activities and cope with the risks in any market situation, in compliance with regulatory requirements and/or Corporate Governance principles. Companies must permanently maintain a capital compatible with the risks for their activities and operations, according to the characteristics and peculiarities of each

corporations should have adjusted shareholder's equity (ASE) equal to or higher than the Solvency Margin.

company belonging to Grupo Bradesco Seguros, represented by adequate capital levels. Grupo Bradesco Seguros permanently observes the limits required by the respective regulatory entities. The Minimum Capital Required in February 2016 was R\$8,539 billion.

## Summarized Analysis of Adjusted Income

### Fee and Commission Income

In the comparison between the first quarter of 2016 and the same period of the previous year, the increase of R\$661 million, or 11.5%, in the revenues of provision of services, was mainly due to: (i) an increase in the volume of operations, which are arising from the continuous investments in service channels and in technology; and (ii) an advance in the client segmentation process for a better offer of products and services. It must be noted that the lines that have most contributed to this result derived from: (i) an increase in the checking account income, mainly due to an improvement in the client segmentation process; (ii) the good performance of the card business, as a result of (a) the increase in the financial volume traded; and (b) the highest volume of transactions performed; and evolution of revenue with: (iii) asset management; (iv) consortium management; and (v) loan operations, especially income from collaterals.

In the first quarter of 2016, fee and commission income totaled R\$6,405 million, showing a decrease of R\$192 million, or 2.9%, in comparison to the previous quarter, primarily due to the smaller volume of operations/billing, caused by the seasonality of the end of the year and the lower number of business days in the first quarter of 2016, which impacted the revenue generated with: (i) cards; (ii) credit operations; and (iii) checking accounts.

### Personnel Expenses

In the comparison between the first quarter of 2016 and the same period of the previous year, the increase of R\$309 million, or 9.0%, in personnel expenses, is mainly due to the variations in the following expenses: (i) structural portion due to the increase in expenses with payroll, social charges and benefits, impacted by higher salaries, in accordance with the 2015 collective bargaining agreement; and (ii) "non-structural", mainly due to higher expenses with profit sharing to management and employees (EPS) and provision for labor lawsuits.

In the first quarter of 2016<sup>(1)</sup>, the decrease of R\$85 million, or 2.2%, compared to the previous quarter is mainly composed of the variations in the following expenses:

- "structural" – reduction of R\$133 million originated, largely, from the higher concentration of vacation, characteristic of the first quarter of each year; and

- "non-structural" – increase of R\$48 million, basically as a consequence of the higher expenses with profit to management and employees (EPS).

Note: Structural Expenses = Salaries + Social Charges + Benefits + Pension Plans.

Non-Structural Expenses = Employee and Management Profit Sharing + Training + Labor Provision + Costs with termination of employment contracts.

## Summarized Analysis of Adjusted Income

### Administrative Expenses

In the comparison between the first quarter of 2016 and the same period of the previous year, the 13.1%, or R\$477 million increase in administrative expenses, was primarily due to an increase in expenses originated from: (i) higher business volume in the period; (ii) contractual adjustments; (iii) the effect of advertising and marketing actions; and offset by: (iv) the optimization of service channels.

In the first quarter of 2016, the decrease of 10.0%, or R\$458 million, over the previous quarter, was mainly due to: (i) the seasonal effect of greater expenses incurred in the fourth quarter of each year, especially in advertising and marketing, due to the higher concentration of actions related to the institutional campaign and to support the offer of products and services; combined with: (ii) the decrease in business volume, caused by the seasonality of the end of the year; and (iii) the fewer number of business days, resulting in less expenses with: (a) outsourced services; (b) asset maintenance; and (c) data processing.

(1) The decrease as of March 2015 is related to: (i) the migration of “External ATM Network – Bradesco” to “Banco24Horas Network”; (ii) the deactivation of ATMs from “Banco24Horas Network”; and (iii) the decrease of Bradesco Expresso correspondents.

### Other Operating Income and Expenses

In the first quarter of 2016, other operating expenses, net, totaled R\$1,669 million, a R\$243 million decrease over the same period of the previous year, primarily due to the constitution of tax provisions, in the first quarter of 2015, relating to the levy of pension plan contributions and IRPJ/CSLL on credit losses, in the amount of R\$475 million.

In the comparison between the first quarter of 2016 and the previous quarter, other operating expenses increased by R\$83 million, or 5.2%, primarily due to: (i) higher expenses with civil provisions; and (ii) higher operating expenses related to insurance activities and cards.

**Summarized Analysis of Adjusted Income**

**Income Tax and Social Contribution**

Income tax and social contribution expenses, in the quarterly comparison showed an increase of 5.9%, or R\$128 million, mainly due to the higher use of tax benefit in the constitution of interest on shareholder's equity in the fourth quarter of 2015.

In the comparison between the first quarter of 2016 and the same period of the previous year, the increase of 1.6%, or R\$36 million, is related to: (i) the increase in the CSLL (social contribution) rate; and partially offset by the: (ii) increase in the TJLP (from 5.5% in the first quarter of 2015 to 7.5% in the first quarter of 2016), which provided a reduction of the tax due to higher values in the constitution of interest on shareholder's equity in higher values in this quarter.

**Unrealized Gains**

Unrealized gains totaled R\$13,097 million at the end of the first quarter of 2016, an R\$5,997 million increase over the previous quarter. Such variation was mainly due to: (i) investments, highlighting the shares of Cielo, which appreciated 5.0%; and (ii) securities indexed to fixed income.

## Capital Ratios - Basel III

### Basel Ratio

In March 2016, the Capital of the Prudential Conglomerate stood at R\$100,452 million, against risk-weighted assets totaling R\$595,757 million. The Basel Ratio presented an increase of 0.1 p.p., from 16.8% in December 2015 to 16.9% in March 2016, and the Common Equity Tier I ratio from 12.7% in December 2015 to 12.9% in March 2016.

The table below shows the main events that impacted the Common Equity Tier I ratio in the quarter:

It is important to highlight that the impact of the change in phase-in arrangements, from 40% in December 2015 to 60% in January 2016, as defined in CMN Resolution No. 4,192/13, was offset by: (i) an increase in results; (ii) decrease in the credit and market risk-weighted assets; and (iii) the improvement of the mark-to-market adjustments of available for sale securities.

### Full Impact – Basel III

We calculated a Basel III simulation, considering some of the main future adjustments, which include: (i) the 100% deductions according to the schedule of phase-in arrangements; (ii) the allocation of resources, obtained via payment of dividends, by our Insurance Group; (iii) the use of tax credits; (iv) the decrease in market and operational risk multiplier (early adoption), from 9.875% to 8%; and (v) the impact of the HSBC's acquisition of, reaching an 11.0% Common Equity ratio, which, added to funding obtained via subordinated debt, may reach a Common Equity Tier I ratio of approximately 12.5% in the end of 2018.

(1) Published (Schedule 60%);

(2) Effect of the full impact. Includes the allocation of resources, obtained via payment of dividends, by the Insurance Group;

(3) Considers the decrease in the market and operational risks multiplier (early adoption), from 9.875% to 8% in 2019;

(4) Under analysis by the Regulating Agencies;

(5) Refers to the minimum required. It is important to highlight that Bacen fixed at 0% the tranche of countercyclical capital required, which could reach up to 2.5% in 2019; and

(6) Considering a possible issuance of additional capital by 2018, according to the Management, depending on market conditions.

Press Release

**Economic Environment**

The risks present in the international environment intensified at the turn of the year. The loss of the Chinese foreign exchange reserves and devaluation of the Chinese yuan brought back uncertainties regarding the economic conditions of the country. However, the timely action of the main central banks worldwide reduced the volatility of the markets at the end of the first quarter.

China promoted new monetary and fiscal stimuli, while the Japanese central bank adopted a negative interest rate for deposits and Europe intensified its program of purchase of sovereign bonds. At the same time, the Federal Reserve (Fed) signaled that it would reduce the rhythm of monetary normalization. As a result, the dollar lost strength in comparison to other currencies and the price of commodities showed some recovery.

The domestic economy maintained a trajectory of deceleration in the first quarter, although at a slower rate to that recorded in previous periods. The formal labor market should be highlighted, which showed a reduction in the rate of lay-offs. At the same time, the relief of global financial conditions and incipient signs of the decompression of inflation positively impacted the confidence of the local agents.

However, political uncertainties and the slowdown in economic activity continued to hinder the ongoing fiscal adjustment in the short term. Thus, actions to ensure fiscal sustainability in the medium term and the progress on the reform agenda have become even more relevant. Efforts in this direction are a necessary condition to maintain the economic predictability and to increase the level of trust of families and entrepreneurs, enabling the resumption of the trend to increase actual income and productive investments.

Additional actions of a structural nature that leverage future growth are also fundamental. The constant search for excellence in education is Brazil's front line in its struggle to become more competitive and to expedite its efforts to upgrade infrastructure. It is never too much to remember that, in the long term, the main source of economic growth is productivity, a theme that is even more relevant in a global context characterized by increased competition and an economic growth that is still fragile.

The investments tend to have an increasingly important role in the composition of growth in coming years, especially in the process of the recovery of economic activity. This should still be favored by greater participation of the capital market in the financing of these projects. At the same time, despite the cyclical retraction of the consumer market in some segments, structurally, the potential of domestic demand for goods and services is not exhausted.

Bradesco maintains a positive outlook towards Brazil, with favorable perspectives for its operating segments. Credit volume is evolving in sustainable and risk-compatible rates, even in the face of a cyclical upswing in delinquency rates, due to the retraction of the activity and the reduction of the employment level this year. The circumstances are still very promising for Brazilian banking and insurance sectors in the medium and long term.

<b>NII - Interest Earning Portion</b>	<b>11,486</b>	<b>11,313</b>	<b>10,242</b>	<b>173</b>	<b>1,244</b>

In the first quarter of 2016, interest earning portion of “Credit Intermediation” reached R\$11,486 million, up 1.5% or R\$173 million when compared to the fourth quarter of 2015. The variation is, mainly, the result of a R\$173 million increase in the average spread due to an improved management in investment resources and funding operations.

In the comparison between the first quarter of 2016 and the same period of the previous year, there was an increase of 12.1% or R\$1,244 million. The variation is the result of: (i) an increase in the average spread, amounting to R\$1,143 million, due to an improved management in investment resources and funding operations; and (ii) a R\$101 million increase in the volume of operations.

#### Net Earning Portion of Credit Intermediation

The graph beside presents a summary of Credit Intermediation activity. The Gross Margin line refers to interest income from loans, deducted from the client acquisition costs.

The curve relating to the ALL shows delinquency costs, which are represented by Allowance for Loan Losses (ALL) Expenses, plus discounts granted in transactions net of loan recoveries, arising from the sale of foreclosed assets, among others.

In the first quarter of 2016, the curve related to the net margin, which presents the result of the net revenue from credit interest of ALL, had a decrease

(1) Without effect of the levelling of provisioning from a specific corporate client; and

(2) If we ignore the effect of the levelling of provisioning from a specific corporate client, net margin, in the first quarter of 2016 would be R\$6,874 million.

of 15.2% in the quarterly comparison, and 9.4% in the comparison between the first quarter of 2016 and the same period of the previous year, primarily due to the higher delinquency rate in the period, mainly due to: (i) the levelling of provisioning for corporate client operations, particularly a specific client, whose rating worsening had an impact of R\$836 million; and (ii) the downturn in economic activities.

**Payroll-deductible Loans**

In March 2016, payroll-deductible loans operations totaled R\$35,503 million, presenting an increase in the quarter-over-quarter comparative of R\$938 million, or 2.7%, and in comparison to the same period in the previous year an increase in the amount of R\$4,006 million, or 12.7%. The operations with the payroll-deductible loans represented, in March 2016, 70.0% of total personal loans operations.

**Real State Financing**

In the first quarter of 2016, the origination of real estate financing registered R\$3,031 million (R\$1,747 million by individuals and R\$1,284 million by builders), representing 13,155 properties.

Real state financing operations totaled R\$50,469 million in March 2016. The Individuals portfolio increased R\$1,058 million, or 4.6%, in the quarter, and R\$5,061 million, or 27.0%, in comparison with the same period of the previous year. Corporate operations increased R\$122 million, or 0.5%, in the quarter, and R\$2,330 million, or 9.6%, in comparison with the same period of the previous year.

**Vehicle financing**

The variations presented in the portfolio are the reflection of a reduced financing market and of

Bradesco's search for lower risk and more profitable operations, due to the demand for higher value of entry for these financing operations.

In March 2016, vehicle financing operations totaled R\$35,226 million, presenting a decrease both in the quarter-over-quarter comparison as well as in comparison with the same period of the previous year. Of the total vehicle portfolio, 75.3% corresponds to "CDC", 22.2% to "Finame", and 2.5% to "Leasing".

**Expanded Credit Portfolio – Per Currency**

The balance of loans and indexed on-lending and/or denominated in foreign currency (excluding ACCs) totaled R\$47.5 billion in March 2016, presenting a 14.3% decrease in the quarter, reflecting the devaluation of the dollar of 8.9%; and the 2.1% increase in the last 12 months.

In March 2016, the total of credit operations in reais reached R\$415.7 billion, representing a 0.7% decrease in the quarter-over-quarter comparison and a 0.2% increase in the last 12 months.

Disregarding the effect of the devaluation of the dollar, the expanded portfolio would have presented a 1.3% decrease in the quarter and 1.0% in the last 12 months.

Economic and Financial Analysis

**Interest Earning Portion of Credit Intermediation**

The charts below refer to the Loan Portfolio, as defined by Bacen.

**Loan Portfolio<sup>(1)</sup> – By Flow of Maturities<sup>(2)</sup>**

The loan portfolio by flow of maturities of operations has, as one of its features, a longer profile, mainly due to the representativeness of real estate financing and payroll-deductible loans operations. It must be noted that, due to their guarantees and characteristics, these operations are not only exposed to lower risk, but they also provide favorable conditions to gain client loyalty.

**Loan Portfolio<sup>(1)</sup> – Delinquency**

**Delinquency over 90 days <sup>(2)</sup>**

As predicted, the delinquency ratio, comprising the balance of operations delayed for more than 90 days, showed an increase in the quarter, due to: (i) the continued unfavorable economic environment, with impact on the quality of the credit portfolio, mainly in, Micro, Small and Medium Sized Enterprises; and (ii) the decrease in loan portfolio in the first quarter of 2016, including in Micro, Small and Medium Sized Enterprises.

**Delinquency between 15 and 90 days**

In the quarter, short-term delinquency, including operations overdue by between 15 and 90 days, presented an increase, impacted, partially, by: (i) seasonal issues at the beginning of each year; and (ii) and the individual cases both in “Small and

Medium Sized Enterprises”, and in “Large Enterprises”, besides the effect of reduction of the credit portfolio in the period.

## Economic and Financial Analysis

### **Interest Earning Portion of Credit Intermediation**

### **Allowance for Loan Losses (ALL) vs. Delinquency vs. Losses<sup>(1)</sup>**

#### **Composition of the Provision**

Bradesco monitors the development of its loan portfolio, as well as respective risks, by internally applying the expanded portfolio concept. In addition to the allowance for loan losses required by Bacen, Bradesco has excess ALL to support potential stress scenarios, as well as other operations/commitments bearing credit risks.

Allowance for Loan Losses totaled R\$30.5 billion in March 2016, representing 8.6% of the total loan portfolio, comprising: (i) generic provision (client and/or operation rating), mainly, due to the levelling of provisioning of a specific corporate client, in the amount of R\$836 million; (ii) specific provision (non-performing loans); and (iii) excess provision (internal criteria, including provision for guarantees provided).

Provisioning levels are deemed appropriate and sufficient to support possible changes in scenarios, such as higher delinquency levels and/or changes in the loan portfolio profile.

#### **Net Loss of Recovery**

The assertiveness of the provisioning criteria adopted must be mentioned, which is proven by: (i) analyzing historical data on recorded allowances for loan losses; and (ii) effective losses in the subsequent 12-month period. When analyzed in

terms of net loss of recovery, for an existing provision of 6.7% of the portfolio<sup>(1)</sup> in March 2015, the net loss in the subsequent 12 months was 3.3%, representing an effective coverage of 203.0%.

It should be highlighted that, considering the losses expected for one year (dotted part), which has a high correlation with the operations of abnormal course of the E-H ratings, there is an effective coverage of 220.5% for March 2016, which is an index of good comparability of surplus provisions, because it eliminates the effect of any sales of portfolios.

(1) As defined by Bacen; and

(2) Includes provision for guarantees provided, encompassing sureties, guarantees, letters of credit and standby letters of credit, which comprises the concept of “excess” ALL. In the third quarter of 2015, includes the ALL Surplus/Deficit Rating, considered as an extraordinary event, totaling R\$3,704 million. Thus, the balance of the ALL – Surplus provision went from R\$4,004 million in June 2015 to R\$6,409 million in September 2015.

#### Coverage Ratio

The graph below presents the behavior of the ratios to cover the provision for doubtful accounts in relation to the default credits exceeding 60 and 90 days. In March 2016, these ratios have presented very comfortable levels, reaching a 162.9% and a 204.2% coverage, respectively.

Bradesco monitors its credit portfolio, as well as its respective risk, using the concept of expanded portfolio. Besides the provision for doubtful accounts required by Bacen, Bradesco has a surplus provision of R\$6.4 billion, to cover eventual situations of stress, as well as other operations/commitments with credit risk.

#### Loans vs. Funding

To analyze Loan Operations in relation to Funding, the following should be deducted from total client funding: (i) the amount committed to reserve requirements at Bacen, (ii) the amount of available funds held at customer service network, as well as, add (iii) funds from domestic and foreign lines of credit that finance the demand for loans.

Note that the use of funds provides a comfortable margin. It proves that Bradesco is capable of meeting demand for loaning funds through its own funding.

Bradesco presents low dependency on interbank deposits and foreign lines of credit, given its capacity to effectively obtain funding from clients. This is a result of: (i) the outstanding location of its Service Points; (ii) the broad diversity of products offered; and (iii) the market's confidence in the Bradesco brand.

#### Demand deposits

The reductions of R\$1,230 million, or 5.2%, in the first quarter of 2016 in comparison with the previous quarter, and of R\$7,640 million, or 25.3%, in comparison with the first quarter of the previous year, were mostly due to new business opportunities offered to clients, because of interest rate fluctuations in that period.

#### Savings Deposits

Savings deposits totaled R\$88,261 million in March 2016, showing a decrease of R\$3,618 million or 3.9% in comparison with the previous quarter and

R\$3,480 million or 3.8% in comparison with the same period of the previous year, mainly due to new business opportunities offered to clients, in virtue of the oscillations of interest rates occurring in the period.

## Economic and Financial Analysis

### **Interest Earning Portion of Credit Intermediation**

#### **Time Deposits**

At the end of the first quarter of 2016, the balance of time deposits totaled R\$77,754 million, registering decreases both in the quarter-over-quarter comparison, of R\$1,841 million or 2.3%, and in comparison with the same period of the previous year, of R\$11,522 million or 12.9%.

This performance was primarily due to the oscillations of the interest rates occurring in the period and to the new investment alternatives available to clients.

#### **Debentures**

In March 2016, Bradesco's debentures balance totaled R\$85,474 million, registering an increase both in the quarter-over-quarter comparison, of R\$6,407 million, or 8.1%, and in comparison with the same period in the previous year of R\$18,916 million, or 28.4%.

Such variations refer mainly to the placement of these financial instruments, which are also used as ballast in committed transactions.

#### **Borrowing and On-lending**

In March 2016, balance of on-lending registered R\$62,849 million, a decrease of R\$7,489 million, or 10.6%, in comparison with the previous quarter, mainly due to (i) the decrease of R\$4,979 million in the obligations for loans and denominated and/or indexed on-lending in foreign currency; and (ii) the decrease in the volume of funding raised by borrowings and on-lending in the country, mainly through Finame operations and BNDES.

In the comparison between March 2016 and the same period of the previous year, the balance of borrowings and on-lending recorded an increase of R\$479 million, or 0.8%, essentially due to: (i) the increase of R\$5,727 million in borrowings and on-lending denominated and/or indexed in foreign currency, whose balance changed from R\$21,413 million in March 2015 to R\$27,140 million in March 2016, primarily due to the positive exchange rate variation of 10.9% in the period; offset by: (ii) the reduction of R\$5,248 million, or 12.8%, in the volume of resources captured by borrowings and on-lending in the country, mainly in the form of Finame operations.

Economic and Financial Analysis

**Interest Earning Portion of Credit Intermediation**

**Funds from Issuance of Securities**

Funds from Issuance of Securities totaled R\$112,617 million, presenting an increase of R\$3,070 million, or 2.8%, over the previous quarter, primarily due to the increase in the balance of: (i) Letters of Credit for Agribusiness operations, totaling R\$1,757 million; (ii) in Real Estate Loan Letters operations, totaling R\$956 million; and (iii) in Financial Bills, totaling R\$920 million.

In the comparison between March 2016 and the same period of the previous year, the increase of R\$24,370 million, or 27.6%, was mainly due to: (i) the increased inventory of Financial Bills, from R\$55,146 million in March 2015 to R\$72,612 million in March 2016, primarily due to the new issuances in the period; and (ii) the higher volume of Mortgage Bonds, in the amount of R\$6,879 million.

**Subordinated Debt**

Subordinated Debt totaled R\$50,184 million in March 2016 (R\$12,315 million abroad and R\$37,869 million in Brazil), presenting a decrease in the quarter-over-quarter comparison, of R\$99 million, or 0.2%. In comparison with the same period of the previous year, it presented an increase of R\$12,194 million, or 32.1%, mainly due to the issue of new subordinated debts in the

periods.

The billing, which for the segment, is concentrated, historically, in the last quarter of the year, did not have the same performance in comparison with the fourth quarter of 2015. Net income for the first quarter of 2016 remained in line with that presented in the previous quarter, due to: (i) a decrease in the financial income; partially offset by: (ii) a decrease of 7.7 p.p. in the claims ratio; and (iii) a decrease of 0.3 p.p. in the commercialization index.

The revenue for the first quarter of 2016 showed a growth of 13.6% in comparison with the same period of the previous year. Net income for the first quarter of 2016 was 4.9% lower than the results calculated in the same period in the previous year, influenced by the increase of the aliquot of the Social Contribution (CSLL), that affected the quarter results; partially offset by: (i) a decrease of 4.1 p.p. in the claims ratio and (ii) a decrease of 1.3 p.p. in the commercialization index.

In March 2016, technical reserves for Bradesco Vida e Previdência stood at R\$162.6 billion, made up of R\$154.7 billion from "Pension Plans and VGBL" and R\$7.9 billion from "Life, Personal Accidents and Other Lines", resulting in an increase of 3.2% over December 2015.

The Pension Plan and VGBL Investment Portfolio accounted for 29.6% of market funds in February 2016 (source: Fenaprevi).

### **Growth of Participants and Life and Personal Accident Policyholders**

In March 2016, the number of Bradesco Vida e Previdência clients exceeded 2.3 million pension plan and VGBL participants, and 30.0 million life and personal accident policyholders. This significant growth was fueled by the strength of the Bradesco brand and the improvement in selling and management policies.

In March 2016, Bradesco Saúde and Mediservice maintained a strong market position in the corporate segment (source: ANS).

Approximately 136 thousand companies in Brazil have Bradesco Saúde insurance and Mediservice plans.

Of the 100 largest companies in Brazil in terms of billing, 49 are Bradesco Saúde and Mediservice customers (source: *Exame* magazine –“Melhores e Maiores” ranking, July 2015).

**Number of Bradesco Saúde and Mediservice Policyholders**

These two companies have a combined total of more than 4.3 million clients. The large share of corporate insurance in this portfolio (96.2% in March 2016) is proof of its high level of specialization and customization in the provision of group plans.

(1) The first quarter of 2016 includes the latest data released by SUSEP (February/16).

Note: (i) we are considering Atlântica Companhia de Seguros as of the first quarter of 2014; and (ii) in August 2015, we transferred the investment in the IRB – Brasil Resseguro S.A. to Bradesco Seguros.

Net profit in the first quarter of 2016 was 11.5% lower than the results presented in the previous quarter, due to: (i) the increase of 1.5 p.p. in the claims ratio; (ii) the decrease in the financial results; partially offset by the: (iii) improvement in the administrative efficiency ratio, even considering the collective agreement of the category, in January 2016.

Net profit in the first quarter of 2016 presented a 9.5% increase in comparison with the same period of the previous year, mainly due to: (i) the decrease of 2.8 p.p. in the claims ratio index; partially offset by: (ii) the decrease in the financial results; and (iii) the increase of the aliquot of the Social Contribution (CSLL), that affected the results of the quarter.

In the Property Insurance field, we maintained the focus on large brokers and clients of the "Corporate" and "Companies" segments, which has provided renewals of the main accounts, either in leadership or through participation in co-insurance.

Aiming to provide a consistently better service, Bradesco Auto/RE celebrated nine years of network activity of automotive centers Bradesco Auto Center (BAC), which offer policyholders access to a varied range of services in a single place. Since 2007 there have been more than 500 thousand assistances, between claims, provision of spare cars, installation of anti-theft equipment, prior inspections performed and preventative maintenance checks and glass repairs.

#### Number of Policyholders at Auto/RE

Mass insurance targets individuals, self-employed professionals and SMEs.

It must be pointed out that the company continues with a strong strategy for the "home insurance" segment, totaling more than 1.5 million insured homes. Recently, were launched the "*Seguro Residencial Mensal*" (Monthly Home Insurance), a residential product with monthly billing by direct debit in the current account, and "*Bradesco Seguro*

In the "Aeronautical" and "Maritime Hulls" insurance, the interchange with the "Corporate" and "Companies" segments has been heavily used, leveraging the increment of market in the sale of new aircraft, as well as in the "Maritime" segment.

*Simpli Empresa*", an easily purchased corporate product is intended for commercial establishments and service providers, such as bakeries, *pousadas* (personalized hospitality), schools, academies, cafeterias, and beauty salons, among others.

Despite the strong competition in the field of "Auto/RCF", the insurance company has maintained its fleet of around 1.5 million items, guaranteed by the maintenance of competitiveness. Such a fact originated, mainly, from more refined and segmented pricing. Another important aspect refers to the improvement of current products and the creation of products intended for specific audiences. Among these, we can highlight the launch of the product "*Bradesco Seguro Auto Assistência Total*" (Auto Insurance Total Assistance), exclusively for account holders of Bradesco, which assists with *Assistência Dia e Noite* services (Day and Night assistance services), for vehicle and residence of insured persons.

Explanations of the main items that influenced the variation in Fee and Commission Income between periods can be found below.

#### Card Income

Income from card fees totaled R\$2,421 million in the first quarter of 2016, a decrease of R\$162 million, or 6.3% over the previous quarter, basically due to: (i) the seasonality of purchases at the end of the year; and (ii) the lower number of business days in this quarter.

In the comparison between the first quarter of 2016 and the same period of the previous year, the

R\$213 million or 9.6% growth, is primarily due to:  
(i) the increase in the financial volume traded; and  
(ii) the increased amount of transactions carried out  
in the period.

### **Fee and Commission Income**

#### **Checking Account**

In the first quarter of 2016, the services revenues from checking accounts presented a slight reduction of 0.9% in comparison with the previous quarter, mainly influenced (i) by the seasonal effect of the fourth quarter of 2015, a period in which there was a substantial increase in the volume of services provided to our account holders; and (ii) by the lower number of business days in this quarter.

In the comparison between the first quarter of 2016 and the same period of the previous year, the income from current account services increased R\$292 million, or 27.2%, mainly due to: (i) the expansion of the portfolio of services rendered, with the adhesion of clients for the new segments “Classic” and “Exclusive”; and (ii) the increase in the volume of business.

#### **Loan Operations**

In the first quarter of 2016, revenues from loan operations totaled R\$656 million, which represents a R\$73 million, or 10.0%, decrease over the previous quarter, due to: (i) the lower number of business days in this quarter; and (ii) due to the low demand for credit products in the period.

In the comparison between the first quarter of 2016 and the same period of the previous year, the R\$21 million or 3.3% increase was substantially due to a higher income from collaterals, which increased

10.1% in the period.

**Cash Management Solutions (Payments and Collection)**

In the first quarter of 2016, billing and collection income remained stable, compared with the previous quarter.

In the comparison between the first quarter of 2016 and the same period of the previous year, the increase of 1.4%, or R\$7 million, was due to the greater volume of processed documents, up from 549 million in the first quarter of 2015 and up to 562 million in the first quarter of 2016, resulting in an increase of 13 million processed documents during the period.

## Economic and Financial Analysis

### **Fee and Commission Income**

#### **Consortium Management**

In the first quarter of 2016, income from consortium management increased by R\$3 million, or 1.1%, compared with the previous quarter, because of the sales made in that period. In March 2016, Bradesco had 1,212 thousand active quotas (1,194 thousand active quotas in December 2015), ensuring a leading position in all the segments in which it operates (real estate, auto and trucks/machinery and equipment).

In the comparison between the first quarter of 2016 and the same period of the previous year, the 13.9%, or R\$34 million, increase in income from consortium management was mainly driven by: (i) a higher volume of received bids; (ii) the increase in the average ticket; and (iii) the increase in billing on sales, ranging from 1,101 thousand active quotas, in March 2015, to 1,212 thousand active quotas in March 2016, generating an increment of 111 thousand net quotas.

#### **Custody and Brokerage Services**

In the first quarter of 2016, total earnings from custody and brokerage services presented an increase of R\$6 million, or 4.2%, compared with the previous quarter. This trend basically: (i) resulted from the higher volumes traded on BM&FBovespa; and (ii) of the increment of R\$72 billion in assets in custody, which had an impact on

the revenues with custody and brokerage.

In the comparison between the first quarter of 2016 and the same period of the previous year, the increase of R\$21 million, or 16.3%, in income from custody and brokerage services, reflected the increase in the average volume of assets under custody in the period.

### **Underwriting / Financial Advisory Services**

The increase in the quarter-over-quarter comparison, in the amount of R\$25 million, or 18.2%, as well as in the comparison with the first quarter of the previous year, in the amount of R\$13 million, or 8.7%, refers, mainly, to the higher activity of the capital market in the first quarter of 2016.

It is important to note that variations recorded in this income derive from the volatile performance of the capital market.

(1) The reduction refers to (i) the migration of “External ATM Network Points – Bradesco” to “Banco24Horas Network”; (ii) the deactivation of ATMs from “Assisted Banco24Horas Network Points”; and (iii) to the decrease of the Bradesco Espresso correspondents.

The total Personnel and Administrative Expenses amounted to R\$7,870 million in the first quarter of 2016, with a decrease of 6.5%, or R\$543 million, in comparison with the previous quarter. Compared with the same period of the previous year, total Personnel and Administrative Expenses presented a growth of 11.1%, or R\$786 million.

### **Personnel Expenses**

The total personnel expenses amounted to R\$3,754 million in the first quarter of 2016, demonstrating a decrease of 2.2%, or R\$85 million, in comparison to the previous quarter, due to the "structural" and "non-structural" portion variation. In the "structural" portion, the reduction of expenses by R\$133 million originated, to a large extent, from the higher concentration of vacation, characteristic of the first quarter of each year, with an impact in the amount of R\$102 million.

## Economic and Financial Analysis

### Personnel and Administrative Expenses

In the "non-structural" portion, the increase of R\$48 million substantially reflects higher expenses with the profit sharing of the administrators and employees (PLR), in the amount of R\$61 million.

In the comparison between the first quarter of 2016 and the same period of the previous year, the increase of R\$309 million, or 9.0%, value that is below the levels of salary readjustments deriving from the collective agreement, was mainly due to: (i) the "structural" portion variation, related to the increase in expenses with payroll, social charges and benefits, totaling R\$212 million, that was impacted by higher salaries, in accordance with 2015 collective agreement; and (ii) the "non-structural" portion variation, in the amount of R\$96 million, mainly due to higher expenses in: (a) profit sharing of the administrators and employees (PLR), in the amount of R\$54 million; and (b) provision for labor lawsuits, in the amount of R\$20 million.

### Administrative Expenses

The administrative expenses totaled R\$4,116 million in the first quarter of 2016, presenting a decrease of R\$458 million, or 10.0%, compared with the previous quarter, mainly due to (i) the seasonal effect of higher expenses incurred in the fourth quarter of each year, highlighting advertising and publicity, in the amount of R\$185 million, due to the higher concentration of actions related to the Institutional Campaign and to support the offer of

### Increase in the Number of Employees

days, impacting in lower expenses with: (a) outsourced services, totaling R\$149 million; (b) maintenance and conservation of goods, totaling R\$40 million, and (c) data processing, totaling R\$19 million.

The 13.1% increase or R\$477 million in the comparison between the first quarter of 2016 and

products and services; combined (ii) lower volume of business and services, as a result of seasonality at the end of the year; and (iii) of the fewer number of business

the same period of the previous year, was due, mainly, to the increasing expenses with: (i) growth in business and services volumes in the period; (ii) contractual adjustments; (iii) the effect of the actions of advertising and publicity; and offset: (iv) by optimizing the Service Points.

### **Operating Coverage Ratio <sup>(1)</sup>**

In the quarter, the coverage ratio over the last 12 months remained practically stable in comparison with the previous quarter, mainly due to ongoing cost control efforts, including (a) the initiatives of our Efficiency Committee and (b) investments in Information Technology, which added up to R\$1.390 billion in the first quarter of 2016; and (c) measures applied to increase the offer of products and services to the entire client base.

**Economic and Financial Analysis**

**Tax Expenses**

Tax expenses totaled R\$1,418 million in the first quarter of 2016, presenting a decrease of R\$232 million, or 14.1% in relation to the previous quarter, basically, due to (i) the increase, in the fourth quarter of 2015, of the tax bases of PIS/Cofins, impacted, in part, by higher revenues generated by the receipt of interest on own capital from the companies of Organização Bradesco; and partially offset by: (ii) the increase of expenses with the IPTU due to the advanced payment of this tax.

In the comparison between the first quarter of 2016 and the same period of the previous year, such expenses increased R\$109 million, or 8.3%, basically due to the increase in expenses with PIS/Cofins/ISS, derived from the increase in taxable income in the period, mainly, of the fee and commission income and net interest income.

**Equity in the earnings (losses) of affiliates**

In the first quarter of 2016, equity in the earnings (losses) of affiliates registered R\$40 million, a decrease of R\$53 million compared with the previous quarter, and an increase of R\$60 million compared with the same period of the previous year, basically due to the equity in the earnings (losses) obtained with the affiliated "IRB – Brasil

Resseguros".

### **Non-Operating Income**

In the first quarter of 2016, non-operating income posted a loss of R\$87 million, an increase of R\$19 million both in comparison with the previous quarter and the first quarter of 2015, essentially, due to greater non-operating expenses (such as losses on sale of foreclosed assets/other) in the period.

## Return to Shareholders

### Corporate Governance

Bradesco's Management is made up of the Board of Directors and the Board of Executive Officers, being the Board of Directors composed of eight members, of which seven external members, including the Chairman (Mr. Lázaro de Mello Brandão), and one internal member (the Chief Executive Officer, Mr. Luiz Carlos Trabuco Cappi), elected at the Annual Shareholders' Meeting and for whom re-election is eligible. The Board of Directors elects the members of the Board of Executive Officers.

The Board of Directors is advised in its activities, by six (6) Committees, being two (2) of which are Statutory Committees (Audit and Compensation) and four (4) of which are Non-Statutory Committees (Ethical Conduct, Internal Controls and Compliance, Integrated Risk Management and Capital Allocation and Sustainability). Several Executive Committees report to the Board of Executive Officers.

### Investor Relations area – RI

The commitment to transparency, the democratization of information, punctuality and search for better practices are essential factors and are constantly reinforced by Bradesco's Investor Relations area.

In the first quarter of 2016, there were 139 events promoted with national and international investors, through conferences, meetings, conference calls and institutional presentations, assisting over 1,500 investors.

Aligned to the best practices of Corporate Governance and seeking to innovate its reporting process, Bradesco launched this quarter, its first Integrated Report, referring to 2015.

As the main oversight agencies of its administrative/operational structure, in addition to the stated Audit Committee, Bradesco counts on the permanent Fiscal Council, elected by the shareholders, and with Internal Audit, subordinate to the Board of Directors.

In 2001, Bradesco voluntarily adhered to Level 1 Corporate Governance of BM&FBovespa, as well as to the Code of Self-Regulation and Best Practices for Publicly Held Companies, issued by the Brazilian Association of Publicly Held Companies (ABRASCA), in 2011.

Further information is available on Bradesco's Investor Relations website ([www.bradescori.com.br](http://www.bradescori.com.br) – Corporate Governance Section).

The document presents institutional, business and financial information, besides the sustainability practices and initiatives in a single publication, also considering the transformations that have an impact on our business – the global megatrends, economy, sporting events, and the political scenario, among others – and Bradesco's prospects for the future.

The report follows the aspects proposed through the structure of the integrated report recommended by the International Integrated Reporting Council (IIRC) and advances in the Basic Principles and Elements of Content, for the effective integration of information. The publication is also aligned with the Global Reporting Initiative (GRI) for the 10th

consecutive year, considering the premises of the most current version (G4) of the structure for the process of drafting corporate reports. The document is available on the Investor Relations website ([www.bradesco.com.br/ri](http://www.bradesco.com.br/ri)).

## Sustainability

### *Dow Jones Sustainability Indexes (DJSI)*

As part of a continuous process of improvement, discussion of opportunities and innovations, we held for the 5th consecutive year, workshops for the internal public participating in the DJSI (Dow Jones Sustainability Indexes) process, with the coordination of a specialist from RobecoSAM, responsible for the evaluation of the corporate sustainability of companies that compose the indexes.

The themes addressed were: Attraction and Retention of Talents; Eco-efficiency; Fiscal Strategy; Risk and Crisis Management; and Risks and Business Opportunity. The occasion enabled an in-depth understanding of the themes, acknowledgment of the best practices of the companies composing the index, in addition to evaluating opportunities for improvement in our management.

### Investments in Infrastructure, Information Technology and Telecommunications

Bradesco, always focused on offering its clients convenience, autonomy and security, Bradesco continues investing in technologies that allow the launch of products and services increasingly appropriate to the needs of its various audiences. We highlight:

- Launched in 2015, the electronic service via voice command of Fone Fácil (telephone service) has been improved and now it is possible to carry out faster, more secure and simpler DOC and TED transactions, without having to speak to an attendant. The service is interactive and guides the service correctly, until it is completed;
- The Trading application of Bradesco also has novelties. Now, in addition to the services of monitoring orders and gaining access to indexes, indicators and currencies, you can check online quotes, the book of offers, important news on rises and falls in stocks, instant bank payment slip, among other improvements, which have become the most modern and interactive platform for clients interested in investing in shares, future markets and gold;
- Things have also gotten easier for Bradesco Seguros clients with the launch of two new services: the "Disk Portabilidade", a center that
- For hearing impaired clients, the ATMs provide a digital interpreter in Libras (Brazilian sign language), for withdrawals. The solution provides a step-by-step translation of the operation, from the beginning until its conclusion. The transaction in Libras at the ATM is a novelty in Brazil and is available in a similar form in few banks around the world;
- In addition to the launches, the period was also of consolidation. Bradesco surpassed the mark of 4 million clients with the cell phone Token, more than 38 million transactions without the use of a card and more than 630 thousand cards from other banks in ATMs;
- Envisaging this technological update, Bradesco has installed new connectivity equipment, used to interconnect the large computers that process the client transactions, with gains in performance and cost reduction in maintenance, electricity and physical space; and
- The equipment park for data storage was also updated, aiming to expand the installed capacity, using solid state technology that provides higher speed of access to data in the processing of client transactions. These initiatives assisted in the achievement, in this first quarter, of the highest rate of availability of the Central System in recent years.

As a prerequisite for its continuous expansion, Bradesco has invested R\$1,390 million in

### **Risk Management**

Risk management activity is highly strategic due to the increasing complexity of services and products and the globalization of Bradesco's business. The dynamism of the market forces Bradesco to engage in the continuous improvement of this activity in pursuit of better practices, which has allowed Bradesco to use its internal market risk models, which were already in force, to calculate regulatory capital, since January 2013.

Bradesco controls corporative risk management in an integrated and independent manner, preserving and valuing the Board's decisions, developing and implementing methodologies, models, and measurement and control tools. It also provides training to employees from every level of the organization, from the business areas to the Board of Directors.

The management process allows the risks to be proactively identified, measured, mitigated, monitored and reported, which is necessary in view of Bradesco's complex financial products and activity profile.

Detailed information on the risk management process, Capital, as well as Bradesco's risk exposure, can be found in the Risk Management Report, available on the Investor Relations website: [www.bradescori.com.br](http://www.bradescori.com.br).

### **Capital Management**

The Capital Management structure aims to provide conditions for capital monitoring and control, contributing to the achievement of goals set in the strategic objectives defined by Bradesco, through an adequate capital sufficiency planning. This structure is comprised of Executive Committees and one Non-Statutory Committee, which assist the Board of Directors and Board of Executive Officers in the decision-making process.

In addition to the Committee structure, Bradesco has a department responsible for the capital management centralization, named Capital

With the implementation of the capital management structure, an internal process has been established to assess capital adequacy (ICAAP), which provides conditions to assess capital sufficiency in accordance with the base and stress scenarios, in a prospective outlook to identify capital and contingency actions to be taken in the respective scenarios. Capital adequacy and sufficiency information represent essential tools to manage and support the decision-making process.

Additional information on the capital management structure is available in the Risk Management

Management and Internal Capital Adequacy Assessment Process (ICAAP), subordinated to the Department of Planning, Budget and Control, which acts jointly with the Integrated Risk Control Department, associated companies, business areas and the Bradesco's supporting areas.

Report – Pillar 3, and in the Integrated Report, on the Investor Relations website: [www.bradesco.com.br](http://www.bradesco.com.br)

On an annual basis, it is devised the capital plan which is approved by the Board of Executive Officers and Board of Directors. It is also aligned with the strategic plan and encompasses a prospective outlook of at least three years. The process of developing this plan considers threats and opportunities, market share and development goals, capital requirement projections based on risks, as well as capital held by Bradesco. Such projections are constantly monitored and controlled by the capital management area.

Our responsibility is to review the supplementary accounting information included within the Economic and Financial Analysis Report prepared by Bradesco and to report thereon in the form of a limited assurance conclusion based on the evidence obtained. We conducted our engagement in accordance with the NBC TO 3000 - Assurance Engagement Other than Audit and Review (ISAE 3000). That standard requires that we comply with ethical requirements, including independence requirements, and plan and perform our procedures to obtain a meaningful level of limited assurance about whether we did not become aware of any fact that could lead us to believe that the supplementary accounting information included within the

Economic and Financial Analysis Report are not presented, in all material respects, to the information referred to in the “Criteria for preparing the supplementary accounting information” paragraph.

The procedures selected were based on our understanding of the consolidated supplementary accounting information included within the Economic and Financial Analysis Report, as well as other circumstances of our work and our consideration of other areas that may contain material misstatements.

Limited assurance is less than absolute assurance and reasonable assurance. Procedures to gather information to a limited assurance engagement are more limited than to a reasonable assurance engagement and, therefore, we obtain less assurance than a reasonable assurance engagement; consequently, we do not express neither an audit opinion nor a reasonable assurance over the supplementary accounting information included within the Economic and Financial Analysis Report.

Our conclusion does not contemplate aspects related to any prospective information contained within the Economic and Financial Analysis Report, nor offers any guarantee if the assumptions used by Management to provide a reasonable basis for the projections presented. Therefore, our report does not offer any type of assurance on the scope of future information (such as goals, expectations and ambitions) and descriptive information that is subject to subjective assessment.

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Management Report**

Dear Shareholders,

We hereby present the Consolidated Financial Statements of Banco Bradesco S.A related to the period ended March 31, 2016, in accordance with the accounting practices adopted in Brazil and applicable to institutions authorized to operate by the Brazilian Central Bank.

The risks present in the world economy remain significant, sustaining expansionist monetary policies by the main central banks. The international deflationary scenario and the weakening of the dollar in relation to other currencies, in conjunction with the slowdown in domestic demand, must contribute to the gradual deceleration of inflation in Brazil. The contraction of the GDP was given more moderately in the first quarter of 2016. The adjustment in the external accounts continues, while the balance of the public accounts remains the main challenge for long-term fiscal sustainability.

The Organization, always committed to the economic and social growth of Brazil, develops its activities with the highest levels of efficiency and transparency, seeking to democratize the banking services, apply the most updated practices of Corporate Governance and achieve the best results, so as to provide greater return to shareholders and investors.

Bradesco recorded, in the quarter, Net Profit of R\$4.121 billion, equivalent to R\$0.82 per share and profitability of 17.5% over the average Shareholders' Equity(\*). The return on Average Total Assets was 1.6%.

In gross values, regarding Interest on Own Capital, the shareholders received R\$1.451 billion, in the

Based on the calculation of the price of its shares, the Market Value of Bradesco, on March 31, 2016, reached R\$143.720 billion, equivalent to 1.5 times the Accounting Shareholders' Equity.

Please note that the Managed Shareholders' Equity is equivalent to 9.2% of the Consolidated Assets, which add up to R\$1.024 trillion, with a growth of 6.6% on March 2015. Thus, the index of solvency reached 16.9%, higher, than the minimum of 10.5% established by Resolution No. 4,193/13 of the National Monetary Council, in compliance with the Basel Committee. At the end of the quarter, the immobilization index, regarding the Reference Equity, was of 34.0%, in the Prudential Consolidation, therefore falling into the maximum limit of 50%.

In compliance with Article 8 of Brazilian Central Bank Circular Letter No. 3,068/01, Bradesco declares that it has the financial capacity and the intention of holding to maturity those securities classified under "held-to-maturity securities".

In the Organization, on March 31, 2016, the total resources captured and administered totaled R\$1.516 trillion, 10.9% higher in comparison to the previous year, thus distributed:

R\$413.276 billion in Demand Deposits, Time Deposits, Interbank Deposits, Savings Accounts and Securities Sold Under Agreements to Repurchase;

R\$596.440 billion in assets under management, comprising Investment Funds, Managed Portfolios and Third-Party Fund Quotas, a 21.1% increase;

R\$274.927 billion in the Exchange Portfolio, Borrowings and On-lendings in Brazil, Working

period from January to March 2016, whereby R\$273.240 million was paid in the form of monthly payments and R\$1.178 billion in provisioned payments.

The taxes and contributions, including pensions, paid or provisioned, added up to R\$10.039 billion in the period, whereby R\$2.675 billion was related to withheld taxes and collected from third parties and R\$7.364 billion calculated based on the activities developed by the Organization, equivalent to 178.7% of the Net Profit.

At the end of the quarter, the realized Capital Stock was of R\$51.100 billion, which included the increase of R\$8 billion, with a bonus of 10% in shares, through the use of part of the account balance "Reserves from Profits – Statutory Reserve", deliberated in the Extraordinary General Meeting held on March 10, 2016 and approved by the Brazilian Central Bank on April 4. With this, the monthly interest on own capital related to the month of May/2016, to be paid on June 1, 2016, will be incremented by 10%. In the same Meeting, the cancellation of the increase of the share capital by the private subscription of shares deliberated in the Extraordinary General Meeting of December 17, 2015 was ratified, in the amount of R\$3 billion. Added to the Equity Reserves of R\$42.230 billion, it resulted in a Shareholders' Equity of R\$93.330 billion, with a growth of 11.2% in the same period of the previous year, corresponding to the equity value of R\$18.56 per share.

Capital, Tax Payments and Collection and Related Charges, Funds From Issuance of Securities in Brazil, and Subordinated Debt in Brazil, a 21.4% increase;

R\$182.973 billion in Technical Reserves for Insurance, Pension Plans and Capitalization Bonds, up by 16.3%; and

R\$48.376 billion in Foreign Funding, through public and private issues, Subordinated Debt Overseas, Securitization of Future Financial Flows and Borrowings and On-lendings Overseas, equivalent to US\$13.593 billion.

(Bradesco) is a private-sector publicly traded company and universal bank that, through its commercial, foreign exchange, consumer financing and housing loan portfolios, carries out all the types of banking activities that it is authorized to do so. The Bank is involved in a number of other activities, either directly or indirectly, through its subsidiaries, specifically leasing, investment banking, brokerage, consortium management, credit cards, real estate projects, insurance, pension plans and capitalization bonds. All these activities are undertaken by the various companies in the Bradesco Organization (Organization), working together in an integrated fashion in the market.

**2) PRESENTATION OF THE CONSOLIDATED FINANCIAL STATEMENTS**

Bradesco's consolidated financial statements include the financial statements for Banco Bradesco, its foreign branches and subsidiaries, in Brazil and overseas and SPEs (Special Purpose Entities). These statements were prepared using accounting practices in compliance with Laws No. 4,595/64 (Brazilian Financial System Law) and No. 6,404/76 (Brazilian Corporate Law), including amendments introduced by Laws No. 11,638/07 and No. 11,941/09, as they relate to the accounting for operations, complemented by the rules and instructions of the National Monetary Council (CMN) and the Brazilian Central Bank (Bacen), Brazilian Securities and Exchange Commission (CVM), where applicable, National Private Insurance Council (CNSP), Insurance Superintendence (Susep) and National Supplementary Healthcare Agency (ANS). The financial statements of the leasing companies included in the consolidated financial statements were prepared using the finance lease method, under which the book value of leased fixed assets less the residual value paid in advance.

For each quarter until September 30, 2015, the consolidated financial statements were prepared in accordance with the specific procedures established by Article 3 of the CMN Resolution No. 2,723/00, in force until March 31, 2015, and other provisions of the Accounting Plan of Financial Institutions – ("Cosif"), having as objective (i) to demonstrate the basis of information used by the Management to evaluate the performance and make decisions regarding the allocation of resources for investments and other purposes, among the Organization's companies of, as well as (ii) to maintain consistency based on information that was required by the regulator and already disclosed in previous periods. Starting December 31, 2015, for the purposes of preparing the consolidated financial statements, in addition to the provisions of the Accounting Plan of Financial Institutions – ("Cosif"), the consolidation procedures established by Technical Pronouncement CPC 36 were applied, which has certain different criteria from the consolidation previously used, although resulting in the same values of net income and shareholders' equity and without resulting in other relevant effects on the financial statements as a whole. For the purpose of comparability, the balances of 2014, previously presented in Note 4 according to the CPC 23, are being reclassified and

presented in the column "Balance Sheet and Statement of Managerial Income". The investment funds are consolidated where companies of the Organization are the main beneficiaries or detain the main obligations. Intercompany transactions, including investments, assets and liabilities, revenue, expenses and unrealized profit were eliminated and net profit and shareholders' equity attributable to the non-controlling interests were accounted for in a separate line. Goodwill on the acquisition of investments in subsidiary/associate companies or jointly controlled entities is presented in the investments and intangible assets lines (Note 14a). The foreign exchange variation from foreign branches and investments, is presented in the income statement accounts used for changes in the value of the derivative financial instrument and borrowing and on-lending operations in order to offset these results with the hedges of these investments.

The financial statements include estimates and assumptions, such as: the calculation of estimated loan losses; fair value estimates of certain financial instruments; civil, tax and labor provisions; impairment losses of securities classified as available-for-sale and held-to-maturity securities and non-financial assets; the calculation of technical provisions for insurance, pension plans and capitalization bonds; and the determination of the useful life of specific assets. Actual results may differ from those based on estimates and assumptions.

Bradesco's consolidated financial statements were approved by the Board of Directors on April 27, 2016.

**3) SIGNIFICANT ACCOUNTING PRACTICES**

**a) Functional and presentation currencies**

Consolidated financial statements are presented in Brazilian reais, which is also Bradesco's functional currency. Foreign branches and subsidiaries are mainly a continuation of activities in Brazil, and, therefore, assets, liabilities and profit or loss are translated into Brazilian reais using the appropriate currency exchange rate, to comply with accounting practices adopted in Brazil. Foreign currency translation gains and losses arising are recognized in the period's income statement in the lines "Derivative Financial Instruments" and "Borrowing and On-lending".

**b) Income and expense recognition**

Income and expenses are recognized on an accrual basis in order to determine the net income for the period to which they relate, regardless of when the funds are received or paid.

Fixed rate contracts are recorded at their redemption value with the income or expense relating to future periods being recorded as a deduction from the corresponding asset or liability. Finance income and costs are recognized daily on a pro-rata basis and calculated using the compounding method, except when they relate to discounted notes or to foreign transactions, which are calculated using the straight-line method.

Floating rate and foreign-currency-indexed contracts are adjusted for interest and foreign exchange rates applicable at the end of the reporting period.

Insurance and coinsurance premiums, net of premiums paid for coinsurance and related commissions, are recorded upon the issue of the related policies/certificates/endorsements and invoices, or upon the beginning of the exposure to risk in cases in which the risk begins before the issue, and recognized on a

straight-line basis over the policies' effective period through the upfront recognition and subsequent reversal through the income statement of the unearned premium reserve and the deferred acquisition costs. Revenues from premiums and the corresponding deferred acquisition costs, relating to existing risk for which no policy has been issued, are recorded in the income statement at the beginning of the risk exposure, based on estimated figures.

Recognition of health insurance premiums commences with the effectiveness of the corresponding insurance policy, and is recognized in proportion to the portion of the term elapsed.

Income and expenses arising from Mandatory Insurance For Personal Injury Caused by Motor Vehicles (DPVAT) insurance operations are recorded based on information provided by Seguradora Líder dos Consórcios do Seguro DPVAT S.A.

Accepted coinsurance and retrocession operations are recorded based on the information received from other insurers and IRB - Brasil Resseguros S.A. (IRB), respectively.

Reinsurance operations are recorded based on the premium and claims information provided which is subject to the analysis of the re-insurers. The deductions of reinsurance premiums granted are consistent with the recognition of the corresponding insurance premium and/or terms of the reinsurance contract.

Acquisition costs, relative to the insurance commission, are deferred and recognized in profit or loss in proportion to the amount of premium recognized.

Contributions and agency fees are deferred and recognized in the income statement on a straight-line basis over a period of 24 months for health insurance operations, and 12 months for other operations.

Pension plan contributions and life insurance premiums with survival coverage are recognized in the income statement as they are received.

The revenue of the capitalization plans are recognized in the month in which they are issued, according to the types of collection, which may be in monthly payments or in a single payment. Each security has a nominal value, which is restated monetarily by the Reference Rate (TR) + 0.5% interest per month. Technical provisions are recorded when the respective revenues are recognized.

Economic and Financial Analysis Report – March 2016

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Notes to the Consolidated Financial Statements**

The revenues arising from prescribed capitalization plans are recognized after the prescription period, that is, until November 2003, up to 20 years and five years after this date, for securities and non-redeemed draws. The expenses with commercialization of capitalization plans are classified as "Acquisition Costs" and are recognized in the income statement as incurred.

**c) Cash and cash equivalents**

Cash and cash equivalents include: funds available in currency, investments in gold, securities sold under agreements to repurchase and interest-earning deposits in other banks, maturing in 90 days or less, which are exposed to insignificant risk of change in fair value. These funds are used by Bradesco to manage its short-term commitments.

Cash and cash equivalents detailed balances are presented in Note 5.

**d) Interbank investments**

Unrestricted repurchase and reverse repurchase agreements are stated at their fair value. All other interbank investments are stated at cost, plus income earned up to the end of the reporting period, net of any devaluation allowance, if applicable.

The breakdown, terms and proceeds relating to interbank investments are presented in Note 6.

**e) Securities – Classification**

- Trading securities – securities acquired for the purpose of being actively and frequently traded. They are recorded at cost, plus income earned and adjusted to fair value with movements recognized in the Income Statement for the period;
- Available-for-sale securities – securities that are not specifically intended for trading purposes or to be held to maturity. They are recorded at cost, plus income earned, which is recorded in profit or loss in the period and adjusted to fair value with movements recognized in shareholders' equity, net of tax, which will be transferred to the Income Statement only when effectively realized; and
- Held-to-maturity securities – securities for which there is positive intent and financial capacity to hold to maturity. They are recorded at cost, plus income earned recognized in the Income Statement for the period.

Securities classified as trading and available-for-sale, as well as derivative financial instruments, are recognized in the consolidated statement of financial position at their fair value. Fair value is generally based on quoted market prices or quotations for assets or liabilities with similar characteristics. If market prices are not available, fair values are based on traders' quotations, pricing models, discounted cash flows or similar techniques to determine the fair value and may require judgment or significant estimates by Management.

Classification, breakdown and segmentation of securities are presented in Note 7 (a to c).

**f) Derivative financial instruments (assets and liabilities)**

Derivative instruments are classified based on the objective for which the underlying instrument was acquired at the date of purchase, taking into consideration its use for possible hedging purposes.

Operations involving derivative financial instruments are designed to meet the Bank's own needs in order to manage overall exposure, as well as to meet customer requests to manage their positions. The gains or losses are recorded in profit or loss or shareholders' equity accounts.

Derivative financial instruments used to mitigate risk deriving from exposure to variations in the fair value of financial assets and liabilities are designated as hedges when they meet the criteria for hedge accounting and are classified according to their nature:

Bradesco

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Notes to the Consolidated Financial Statements**

- Market risk hedge: the gains and losses, realized or not, of the financial instruments classified in this category as well as the financial assets and liabilities, that are the object of the hedge, are recorded in the Income Statement; and
- Cash flow hedge: the effective portion of valuation or devaluation of the financial instruments classified in this category is recorded, net of taxes, in a specific account in shareholders' equity. The ineffective portion of the hedge is recognized directly in the Income Statement.

A breakdown of amounts included as derivative financial instruments, in the balance sheet and off-balance-sheet accounts, is disclosed in Note 7 (d to g).

**g) Loans and leasing, advances on foreign exchange contracts, other receivables with credit characteristics and allowance for loan losses**

Loans and leasing, advances on foreign exchange contracts and other receivables with credit characteristics are classified by risk level, based on: (i) the parameters established by CMN Resolution No. 2,682/99, which requires risk ratings to have nine levels, from "AA" (minimum risk) to "H" (maximum risk); and (ii) Management's assessment of the risk level. This assessment, which is carried out regularly, considers current economic conditions and past experience with loan losses, as well as specific and general risks relating to operations, debtors and guarantors. Moreover, the days-past-due is also considered in the rating of customer risk as per CMN Resolution No. 2,682/99, as follows:

<b>Past-due period (1)</b>	<b>Customer rating</b>
• from 15 to 30 days	B
• from 31 to 60 days	C
• from 61 to 90 days	D
• from 91 to 120 days	E
• from 121 to 150 days	F
• from 151 to 180 days	G

- more than 180 days

H

(1) For transactions with terms of more than 36 months, past-due periods are doubled, as permitted by CMN Resolution No. 2,682/99.

Interest and inflation adjustments on past-due transactions are only recognized in the Income Statement up to the 59<sup>th</sup> day that they are past due. As from the 60<sup>th</sup> day, they are recognized in off-balance sheet accounts and are only recognized in the Income Statement when received.

H-rated past-due transactions remain at this level for six months, after which they are written-off against the existing allowance and controlled in off-balance-sheet accounts for at least five years.

Renegotiated transactions are held at the same rating as on the date of the renegotiation or classified in a higher risk rating. Renegotiations already written-off against the allowance and that were recorded in off-balance-sheet accounts, are rated as level “H” and any possible gains derived from their renegotiation are recognized only when they are effectively received. When there is a significant repayment on the operation or when new material facts justify a change in the level of risk, the operation may be reclassified to a lower risk category.

The estimated allowance for loan losses is calculated to sufficiently cover probable losses, considering CMN and Bacen standards and instructions, together with Management’s assessment of the credit risk.

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Notes to the Consolidated Financial Statements**

Type, values, terms, levels of risk, concentration, economic sector of client's activity, renegotiation and income from loans, as well as the breakdown of expenses and statement of financial position accounts for the allowance for loan losses are presented in Note 9.

**h) Income tax and social contribution (assets and liabilities)**

Deferred tax assets, calculated on income tax losses, social contribution losses and temporary differences, are recorded in "Other Receivables - Sundry" and the deferred tax liabilities on tax differences in leasing depreciation (applicable only for income tax), mark-to-market adjustments on securities, restatement of judicial deposits, among others, are recorded in "Other Liabilities - Tax and Social Security".

Deferred tax assets on temporary differences are realized when the difference between the accounting treatment and the income tax treatment reverses. Deferred tax assets on income tax and social contribution losses are realizable when taxable income is generated, up to the 30% limit of the taxable profit for the period. Deferred tax assets are recorded based on current expectations of realization considering technical studies and analyses carried out by Management.

The provision for income tax is calculated at 15% of taxable income plus a 10% surcharge. For financial companies, for companies traded as such and for the insurance industry, the social contribution on the profit was calculated until August 2015, considering the rate of 15%. For the period between September 2015 and December 2018, the rate was changed to 20%, according to Law No. 13,169/15. The rate will revert to 15% in January 2019. For the other companies, the social contribution is calculated considering the rate of 9%.

Due to the amendment of the rate, the Organization constituted, in September 2015, a supplement to the tax credit of social contribution, considering the annual expectations of achievement and their respective rates in force in each period, according to the technical study conducted.

Provisions were recorded for other income tax and social contribution in accordance with specific applicable legislation.

The changes enacted by Law No. 11,638/07 and subsequent amendments in revenue recognition criteria and costs and expenses included in the net profit for the period, were made fiscally by the new taxation rules in force, as instituted by Law No. 12,973/14.

The breakdown of income tax and social contribution, showing the calculations, the origin and expected use of deferred tax assets, as well as unrecorded deferred tax assets, are presented in Note 33.

**i) Prepaid expenses**

Prepaid expenses consist of funds already disbursed for future benefits or services, which are recognized in the profit or loss on an accrual basis.

Incurred costs relating to assets that will generate revenue in subsequent periods are recorded in the Income Statement according to the terms and the amount of expected benefits and directly written-off in the Income Statement when the corresponding assets or rights are no longer part of the institution's assets or when future benefits are no longer expected.

In the case of the remuneration paid for the origination of credit operations to the banking correspondents related to credit operations originated during the years 2015 and 2016, Bradesco opted to recognize part of the total value of compensation, pursuant to the provisions of Bacen Circular No. 3,738/14.

Prepaid expenses are shown in detail in Note 11b.

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

***Notes to the Consolidated Financial Statements***

**j) Investments**

Investments in unconsolidated and jointly controlled subsidiaries, where Bradesco has significant influence over the investee or holds at least 20% of the voting rights, are accounted for using the equity method.

Tax incentives and other investments are stated at cost, less allowance for losses/impairment, where applicable.

Subsidiaries are consolidated – the composition of the main companies can be found in Note 2. The composition of unconsolidated and jointly controlled subsidiaries, as well as other investments, can be found in Note 12.

**k) Premises and equipment**

Relates to the tangible assets used by the Bank in its activities, including those resulting from transactions that transfer risks, benefits and control of the assets to the Bank.

Premises and equipment are stated at acquisition cost, net of accumulated depreciation, calculated by the straight-line method based on the assets' estimated economic useful life, using the following rates: real estate – 4% per annum; installations, furniture, equipment for use, security systems and communications – 10% per annum; transport systems – 20% per annum; and data-processing systems – 20% per annum, and adjusted for impairment, when applicable.

The breakdown of asset costs and their corresponding depreciation, as well as the unrecorded surplus value for real estate and the fixed asset ratios, are presented in Note 13.

## **l) Intangible assets**

Relates to the right over intangible assets used by the Bank in its activities.

Intangible assets comprise of:

- Future profitability/acquired client portfolio and acquisition of right to provide banking services: they are recorded and amortized over the period in which the asset will directly and indirectly contribute to future cash flows and adjusted for impairment, where applicable; and
- Software: stated at cost less amortization calculated on a straight-line basis over the estimated useful life (20% p.a.), from the date it is available for use and adjusted for impairment, where applicable. Internal software development costs are recognized as an intangible asset when it is possible to show the intent and ability to complete and use the software, as well as to reliably measure costs directly attributable to the intangible asset. These costs are amortized during the software's estimated useful life, considering the expected future economic benefits.

Intangible assets and the movement in these balances by class, are presented in Note 14.

## **m) Impairment**

Financial and non-financial assets are tested for impairment.

Impairment evidence may comprise the non-payment or payment delay by the debtor, possible bankruptcy process or the significant or extended decline in an asset value.

An impairment loss of a financial or non-financial asset is recognized in the profit or loss for the period if the book value of an asset or cash-generating unit exceeds its recoverable value. Impairment losses are presented in Note 7c(6).

**n) Securities sold under agreements to repurchase**

These are recognized at the value of the liabilities and include, when applicable, related charges up to the end of the reporting period, calculated on a daily pro-rata basis.

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Notes to the Consolidated Financial Statements**

A breakdown of the contracts recorded in deposits and securities sold under agreements to repurchase, as well as terms and amounts recognized in the statement of financial position and income statement, is presented in Note 15.

**o) Technical provisions relating to insurance, pension plans and capitalization bonds**

- Damage, health and group insurance lines, except life insurance with survival coverage:
  - The unearned premium reserve (PPNG) is calculated on a daily pro-rata basis, using premiums net of coinsurance, but including amounts ceded through reinsurance, and is comprised of the portion corresponding to the remaining period of coverage less initial contracting costs, except for health and personal insurance. The portion of these reserves corresponding to the estimate for risks in effect but not yet contracted is designated 'PPNG-RVNE';
  - The unearned premium or contribution reserve (PPCNG) is calculated on a daily pro-rata basis based on the portion of health insurance premiums corresponding to the remaining period of coverage, of the currently effective contracts;
  - The mathematical reserve for unvested benefits (PMBaC) is calculated as the difference between the current value of future benefits and the current value of future contributions, on obligations already assumed by Bradesco;
  - The mathematical reserve for unvested benefits (PMBaC) relates to the individual health care plan portfolio and covers the risk related to the cover for the holder's dependents for five years following the death of the holder. It is calculated using a 5.2% annual discount rate, the time holders are expected to remain in the plan up to their death, and the projected costs of the five-year-period cover, excluding payment of premiums;

- The mathematical reserve of benefits granted (PMBC) is constituted by the obligations arising from the contractual clauses of remittance of installments, regarding the coverage of health assistance and by the premiums paid by insured participating in the Bradesco Saúde Insurance Plan - "GBS Plan" considering a discount rate of 5.2% per annum;
  
- For health insurance, the reserve for claims incurred but not reported (IBNR) is calculated from the final estimate of claims already incurred and still not reported, based on the run-off triangles, monthly that consider the historical development of claims advised in the last 12 months to establish a future projection per period of occurrence;
  
- For non-life insurance, the reserve for 'incurred but not reported' (IBNR) claims is calculated based on incurred but not paid' (IBNP) claims less the balance of the reserve for 'unsettled' claims (PSL) on the calculation date. A final estimate of IBNP is calculated using semi-annual run-off triangles. The run-off triangles consider the historical development of claims paid in the previous 10 half-year periods to determine a future projection per occurrence period, and considers the estimated claims 'incurred but not sufficient' reported (IBNER), reflecting the changing expectation of the amount provisioned along the regulatory process;
  
- For other life insurance, the reserve for 'incurred but not reported' (IBNR) claims is calculated based on incurred but not paid (IBNP) claims less the reserve for unsettled claims (PSL) on the calculation date. A final estimate of IBNP claims is calculated using semi-annual run-off triangles. The run-off triangles consider the historical development of claims paid in the previous 16 half-year periods to determine a future projection per occurrence period;
  
- The reserve for unsettled claims (PSL), for life and health insurance, considers all claim notifications received up to the end of the reporting period, including the legal claims and monetarily restated related costs;

Bradesco

---

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Notes to the Consolidated Financial Statements**

- For non-life insurance, the reserve for unsettled claims (PSL) is determined based on the indemnity payment estimates, considering all administrative and judicial claims existing at the reporting date, net of the expected payments to be received;
  
- The reserve for related expenses (PDR) is recorded to cover expenses related to estimated claims and benefits. For products structured in self-funding and partial regimes, the reserve covers claims incurred. For plans structured under a capitalization regime, the reserve is made to cover the expected expenses related to incurred claims and also claims expected to be incurred in the future;
  
- For damage insurance, the reserve for related expenses (PDR) is calculated on a monthly basis to cover the expenses related to indemnity payment, and it covers the expenses allocated individually to each claim, as well as expenses related to claims that have not been itemized, that is, those at the level of the portfolio;
  
- The reserve for redemptions and other amounts to be settled (PVR) comprises figures related to redemptions to settle, premium refunds owed and portability (transfer-outs) requested but not yet transferred to the recipient insurer;
  
- The reserve for technical surplus (PET) corresponds to the difference between the expected and the observed amounts for events in the period for personal insurance that have a technical surplus participation clause;
  
- The complementary reserve for coverage (PCC) refers to the amount necessary to complement technical provisions, as calculated in the Liability Adequacy Test (LAT), which is prepared using statistical and actuarial methods based on realistic assumptions, taking into account the biometric table BR-EMS of both genders, improvement of G Scale and forward interest rate curves (ETTJ) free from risk as authorized by SUSEP. The improvement rate is calculated from automatic updates of the biometric table, considering the expected increase in future life expectancy; and

- Other reserves are recorded for the individual health portfolio to address the differences between the expected present value of future premiums and the expected present value of indemnities and related expenses, using an annual discount rate of 5.2%.
  
- Pension plans and life insurance with survival coverage:
  - The unearned premium reserve (PPNG) is calculated on a daily prorated basis using net premiums, and is comprised of the portion corresponding to the remaining period of coverage and includes an estimate for risks covered but not yet issued (RVNE);
  
  - The mathematical reserve for unvested benefits (PMBaC) is recorded for participants who have not yet received any benefit. In defined benefit pension plans, the reserve represents the difference between the present value of future benefits and the present value of future contributions, corresponding to obligations in the form of retirement, disability, pension and annuity plans. The reserve is calculated using methodologies and assumptions set forth in the actuarial technical notes;
  
  - The mathematical reserve for unvested benefits (PMBaC) related to life insurance and unrestricted benefit pension plans (VGBL and PGBL), as well as the defined contribution plans, shows the value of participant contributions, net of costs and other contractual charges, plus income from investment in specially constituted investment funds (FIE);
  
  - The reserve for redemptions and other amounts to be settled (PVR) comprises figures related to redemptions to settle, premium refunds owed and portability requested but not yet transferred to the recipient insurer;
  
  - The mathematical reserve for vested benefits (PMBC) is recognized for participants already receiving benefits and corresponds to the present value of future obligations related to the payment of those on-going benefits;

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Notes to the Consolidated Financial Statements**

- The complementary reserve for coverage (PCC) refers to the amount necessary to complement technical provisions, as calculated in the Liability Adequacy Test (LAT), which is prepared semi-annually using statistical and actuarial methods based on realistic assumptions, taking into account the biometric table BR-EMS of both genders, improvement of G Scale and forward interest rate curves (ETTJ) free from risk as authorized by SUSEP. The improvement rate is calculated from automatic updates of the biometric table, considering the expected increase in future life expectancy;
  
  - The reserve for related expenses (PDR) is recorded to cover expenses related to estimated claims and benefits. For products structured in self-funding and partially regimes, the reserve covers claims incurred. For plans structured under a capitalization regime, the reserve is made to cover the expected expenses related to incurred claims and also claims expected to be incurred in the future;
  
  - The reserve for financial surplus (PEF) corresponds to the portion of income from investment of reserves that exceeds the minimum returns due to policyholders of pension plans that have a profit share clause;
  
  - The reserve for incurred and not reported (IBNR) events is constituted for claims incurred but not reported and is based on run-off triangles, which consider the loss development of claims in the previous 96 months to set forth a future projection by occurrence period; and
  
  - The reserve for unsettled claims (PSL) considers all loss notices received up to the end of the reporting period. The provision is updated for inflation and includes all claims in litigation.
- Capitalization bonds:
    - The mathematical reserve for capitalization bond (PMC) is recorded for each active or suspended capitalization bond over the term set forth in the general conditions of the plan, and is calculated using the

capitalization percentage, applicable to each payments made, plus the monthly accrual calculated using the inflation index and the interest rate established in the plan until the bond is redeemed or canceled;

- The reserve for redemption (PR) comprises the values of matured and early-terminated capitalization bonds and is calculated by updating the balance of bonds whose terms have expired or canceled using the inflation index until the holder receives the redemption payment;

- Reserve for 'draws to be held' (PSR) is recorded to cover premiums for future prize draws, and the balance represents the present value of the draws that have already been funded but have not yet been held. The calculation methodology consists of the accumulation of the prize draw percentage applicable to each payment, as established in the plan, less the amounts related to prize draws that have already occurred. The percentages of payments designated for the prize draws is defined in advance in the actuarial technical note, and is not modified during the term of the bond;

- Reserve for draws payable (PSP) consists of the value of unpaid prize draw amounts, adjusted for inflation for the period between the date of the drawing and its effective settlement; and

- Reserve for administrative expense (PDA) is recorded to cover the cost of maintaining the single payment (PU) capitalization bonds.

Technical provisions shown by account, product and segment, as well as amounts and details of plan assets covering these technical provisions, are shown in Note 20.

**p) Provisions, contingent assets and liabilities and legal obligations – tax and social security**

Provisions, contingent assets and liabilities, and legal obligations, as defined below, are recognized, measured and disclosed in accordance with the criteria set out in CPC 25, approved by CMN Resolution No. 3,823/09 and CVM Resolution No. 594/09:

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Notes to the Consolidated Financial Statements**

- **Contingent Assets:** these are not recognized in the financial statements, except to the extent that there are real guarantees or favorable judicial decisions, to which no further appeals are applicable, and confirmation of the capacity of the counterparty to pay or the ability of Bradesco to realize the asset via compensation against another liability upon which the gain is considered practically certain. Contingent assets with a chance of probable success are disclosed in the notes to the financial statements;
- **Provisions:** these are recorded taking into consideration the opinion of legal counsel, the nature of the lawsuits, similarity with previous lawsuits, complexity and positioning of the courts, whenever the loss is deemed probable, it requires a probable outflow of funds to settle the obligation and when the amount can be reliably measured;
- **Contingent Liabilities:** according to CPC 25, the term "contingent" is used for liabilities that are not recognized because their existence will only be confirmed by the occurrence of one or more uncertain future events beyond Management's control. Contingent liabilities do not meet the criteria for recognition because they are considered as possible losses should only be disclosed in the notes when relevant. Obligations deemed remote are not recorded as a provision nor disclosed; and
- **Legal Obligations – Provision for Tax Risks:** results from judicial proceedings, which contest the applicability of tax laws on the grounds of legality or constitutionality, which, regardless of the assessment of the probability of success, are fully provided for in the financial statements.

Details on lawsuits, as well as segregation and changes in amounts recorded, by type, are presented in Note 17.

**q) Funding expenses**

Expenses related to funding transactions involving the issuance of securities reduce the corresponding liability and are recognized in the profit or loss over the term of the transaction. They are presented in Notes 15c and 18.

**r) Other assets and liabilities**

Assets are stated at their realizable amounts, including, when applicable, related income and inflation and exchange variations (on a daily prorated basis), less provision for losses, when deemed appropriate. Liabilities include known or measurable amounts, including related charges and inflation and exchange variations (on a daily prorated basis).

**s) Subsequent events**

These refer to events occurring between the reporting date and the date the financial statements are authorized to be issued.

They comprise the following:

- Events resulting in adjustments: events relating to conditions already existing at the end of the reporting period; and
- Events not resulting in adjustments: events relating to conditions not existing at the end of the reporting period.

Subsequent events, if any, are described in Note 34.

(1) Consistent with the criteria in Bacen Circular Letter No. 3,068/01 and due to the characteristics of the securities, we are classifying the derivative financial instruments, except those considered as cash flow hedges in the category Trading Securities;

(2) In compliance with Article 8 of Bacen Circular Letter No. 3,068/01, Bradesco declares that it has the financial capacity and intention to maintain held-to-maturity securities until their maturity dates. The mark-to-market of securities, which were transferred from the category "Securities Available for Sale" to the category of "Securities Held to Maturity", in June 2015 and in December 2013, was maintained in the shareholders' equity and will be recognized in the results for the remaining term of these securities, according to Bacen Circular No. 3,068/01;

(3) The number of days to maturity was based on the contractual maturity of the instruments, regardless of their accounting classification;

(4) The fair value of securities is determined based on the market price available at the end of the reporting period. If no market price quotation is available at the end of the reporting period, amounts are estimated based on the prices quoted by dealers, pricing models, quotation models or price quotations for instruments with similar characteristics. For investment funds, the original amortized cost reflects the fair value of the respective quotas;

(5) Includes hedge for protection of assets and liabilities, denominated in or indexed to foreign currency, primarily, arising from foreign investments, eliminating the effects of exchange variation of these assets and liabilities. For a better analysis of these items, consider the net exposure (Note 7d II); and

(6) In the first quarter of 2016, there were losses through impairment in the amount of R\$108,294 thousand, related to the heading "Variable Income Securities".

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Notes to the Consolidated Financial Statements**

**d) Derivative financial instruments**

Bradesco carries out transactions involving derivative financial instruments, which are recorded in the statement of financial position or in off-balance-sheet accounts, to meet its own needs in managing its global exposure, as well as to meet its customer's requests, in order to manage their exposure. These operations involve a range of derivatives, including interest rate swaps, currency swaps, futures and options. Bradesco's risk management policy is based on the utilization of derivative financial instruments mainly to mitigate the risks from operations carried out by the Bank and its subsidiaries.

Securities classified as trading and available-for-sale, as well as derivative financial instruments, are recognized in the consolidated statement of financial position at their fair value. Fair value is generally based on quoted market prices or quotations for assets or liabilities with similar characteristics. Should market prices not be available, fair values are based on dealer quotations, pricing models, discounted cash flows or similar techniques for which the determination of fair value may require judgment or significant estimates by Management.

Quoted market prices are used to determine the fair value of derivative financial instruments. The fair value of swaps is determined by using discounted cash flow modeling techniques that use yield curves, reflecting adequate risk factors. The information to build yield curves is mainly obtained from the Securities, Commodities and Futures Exchange (BM&FBOVESPA) and the domestic and international secondary market. These yield curves are used to determine the fair value of currency swaps, interest rate and other risk factor swaps. The fair value of forward and futures contracts is also determined based on market price quotations for derivatives traded on an exchange or using methodologies similar to those outlined for swaps. The fair values of credit derivative instruments are determined based on market price quotation or from specialized entities. The fair value of options is determined based on mathematical models, such as Black & Scholes, using yield curves, implied volatilities and the fair value of corresponding assets. Current market prices are used to calculate volatility.

Derivative financial instruments in Brazil mainly refer to swaps and futures and are registered at the OTC Clearing House (Cetip) and BM&FBOVESPA.

Operations involving forward contracts of interest rates, indexes and currencies are contracted by Management to hedge Bradesco's overall exposures and to meet customer needs.

Foreign derivative financial instruments refer to swap, forward, options, credit and futures operations and are mainly carried out at the stock exchanges in Chicago and New York, as well as the over-the-counter (OTC) markets.

**Notes to the Consolidated Financial Statements**

**f) Cash flow hedge**

Bradesco uses cash flow hedges to protect its cash flows from payment of interest rates on funds, which have a floating interest rate - the Interbank Deposit Rate (DI Cetip), thus converting them to fixed cash flows.

Bradesco has traded DI Future contracts on BM&FBOVESPA since 2009, using them as cash flow hedges totaling R\$1,133,572 thousand (R\$20,674,324 thousand in 2015), having as object of hedge captures linked to DI, totaling R\$1,197,070 thousand (R\$20,908,816 thousand in 2015). The adjustment to market value of these operations recorded in the net worth is R\$3,227 thousand (R\$308,820 thousand in 2015), net of tax effects is R\$1,936 thousand (R\$185,292 thousand in 2015).

The effectiveness of the hedge portfolio was assessed in accordance with Bacen Circular Letter No. 3,082/02.

**g) Hedge against market risk**

Bradesco constituted a hedge against market risk using the futures contracts, which generated (R\$1,831,125 thousand), for protection from the effects of the exchange rate variation of the firm commitment, related to the contract for the purchase and sale of shares (Note 34e), which produced an adjustment at market value of R\$1,793,837 thousand. The effect of these operations resulted in the revenue of (R\$37,288 thousand).

The effectiveness of the hedge portfolio was assessed in accordance with Bacen Circular Letter No. 3,082/02.

**17) PROVISIONS, CONTINGENT ASSETS AND LIABILITIES AND LEGAL LIABILITIES – TAX AND SOCIAL SECURITY****a) Contingent assets**

Contingent assets are not recognized in the financial statements. However, there are ongoing proceedings where the chance of success is considered probable, such as: a) Social Integration Program (PIS), claiming to offset PIS against Gross Operating Income, paid under Decree-Laws No. 2,445/88 and No. 2,449/88, regarding the payment that exceeded the amount due under Supplementary Law No. 07/70 (PIS Repique); and b) other taxes, the legality and/or constitutionality of which is being challenged, where the decision may lead to reimbursement of amounts paid.

**b) Provisions classified as probable losses and legal obligations – tax and social security**

The Organization is a party to a number of labor, civil and tax lawsuits, arising from the normal course of business.

Management recorded provisions where, based on their opinion and that of their legal counsel, the nature of the lawsuit, similarity to previous lawsuits, complexity and the courts standing, the loss is deemed probable.

Management considers that the provision is sufficient to cover the future losses generated by the respective lawsuits.

Provisions related to legal obligations are maintained until the conclusion of the lawsuit, represented by judicial decisions with no further appeals or due to the statute of limitation.

**I - Labor claims**

These are claims brought by former employees and outsourced employees seeking indemnifications, most significantly for unpaid "overtime", pursuant to Article 224 of the Consolidation of Labor Laws (CLT). In proceedings in which a judicial deposit is used to guarantee the execution of the judgment, the labor provision is made considering the estimated loss of these deposits. For proceedings with similar characteristics and for which there has been no official court rule, the provision is recorded based on the average calculated value of payments made for labor complaints settled in the past 12 months; and for proceedings originating from acquired banks, with unique characteristics, the calculation and assessment of the required balance is conducted periodically, based on the updated recent loss history.

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

**Notes to the Consolidated Financial Statements**

Overtime is monitored by using electronic time cards and paid regularly during the employment contract and, accordingly, the claims filed by former employees do not represent significant amounts.

**II - Civil claims**

These are claims for pain and suffering and property damages, mainly relating to protests, returned checks, the inclusion of information about debtors in the credit restriction registry and the replacement of inflation adjustments excluded as a result of government economic plans. These lawsuits are individually controlled using a computer-based system and provisioned whenever the loss is deemed as probable, considering the opinion of Management and their legal counsel, the nature of the lawsuits, similarity with previous lawsuits, complexity and positioning of the courts.

Most of these lawsuits are brought to the Special Civil Court (JEC), in which the claims are limited to 40 times the minimum wage and do not have a significant impact on Organization Bradesco's financial position.

There are a significant number of legal claims pleading alleged differences in adjustment for inflation on savings account balances due to the implementation of economic plans that were part of the federal government's economic policy to reduce inflation in the '80s and '90s.

Although Bradesco complied with the law and regulation in force at the time, these lawsuits have been recorded in provisions, taking into consideration the claims where the Bank is the defendant and the perspective of loss, which is considered after the analysis of each demand, based on the current decision of the Superior Court of Justice (STJ).

Note that, regarding disputes relating to economic plans, the Federal Supreme Court (STF) suspended the prosecution of all lawsuits at the cognizance stage, until the Court issues a final decision on the right under litigation.

**III - Legal obligations – provision for tax risks**

The Organization is disputing the legality and constitutionality of certain taxes and contributions in court, for which provisions have been recorded in full, although there is a good chance of a favorable outcome, based on the opinion of Management and their legal counsel. The processing of these legal obligations and the provisions for cases for which the risk of loss is deemed as probable is regularly monitored in the legal

court. During or after the conclusion of each case, a favorable outcome may arise for the Organization, resulting in the reversal of the related provisions.

The main cases are:

- PIS and COFINS – R\$2,179,158 thousand (R\$1,963,859 thousand in 2015): a request for authorization to calculate and pay PIS and COFINS based on effective billing, as set forth in Article 2 of Supplementary Law No. 70/91, removing from the calculation base the unconstitutional inclusion of other revenues other than those billed;
- INSS of the Self-employed – R\$1,852,851 thousand (R\$1,591,091 thousand in 2015): discussing the charging of social security contribution on remunerations paid to third-party service providers, established by Supplementary Law No. 84/96 and subsequent regulations/amendments, at 20.0% with an additional 2.5%, on the grounds that services are not provided to insurance companies but to policyholders, thus being outside the scope of such a contribution as provided for in item I, Article 22 of Law No. 8,212/91, as new wording in Law No. 9,876/99;

**Notes to the Consolidated Financial Statements**

- IRPJ/CSLL on losses of credits – R\$1,895,099 thousand (R\$2,069,323 thousand in 2015): we are requesting to deduct from income tax and social contributions payable (IRPJ and CSLL, respectively) amounts of actual and definite loan losses related to unconditional discounts granted during collections, regardless of compliance with the terms and conditions provided for in Articles 9 to 14 of Law No. 9,430/96 that only apply to temporary losses;
- PIS – EC 17/97 - R\$235,699 thousand (R\$227,259 thousand in 2015): for the period from July 1997 to February 1998, request to calculate and pay PIS contributions as established by LC 07/70 (PIS Repique) and not as established by EC 17/97 (PIS on Gross Operating Income);
- PIS – R\$329,297 thousand (R\$315,880 thousand in 2015): we are requesting the authorization to offset overpaid amounts in 1994 and 1995 as PIS contribution, corresponding to the surplus paid over that calculated on the tax base established in the Constitution, i.e., gross operating income, as defined in the income tax legislation set out in Article 44 of Law No. 4,506/64, which excludes interest income; and
- Pension Contributions – R\$1,102,264 thousand (R\$920,790 thousand in 2015): official notifications related to the pension contributions on financial contributions in private pension plans, considered by the fiscalization as compensatory sums subject to the incidence of such financial contributions and isolated fine for not withholding tax of the IRRF on the related financial contributions.

In general, the provisions relating to lawsuits are considered as long-term, due to the unpredictable time of duration of the proceedings in the Brazilian justice system, the reason by which the estimate has not been disclosed with relation to the specific year in which these lawsuits will be closed.

(1) Mainly include legal liabilities.

**c) Contingent liabilities classified as possible losses**

The Organization maintains a system to monitor all administrative and judicial proceedings in which the institution is plaintiff or defendant and, based on the opinion of legal counsel, classifies the lawsuits according to the expectation of loss. Case law trends are periodically analyzed and, if necessary, the related risk is reclassified. In this respect, contingent lawsuits deemed to have a possible risk of loss are not recorded as a liability in the financial statements. The main proceedings in this category are the following: a) leasing companies' Tax on Services of any Nature (ISSQN), total lawsuits correspond to R\$1,942,279 thousand (R\$1,884,046 thousand in 2015) which relates to the municipal tax demands from municipalities other than those in which the company is located and where, under law, tax is collected; b) 2006 to 2010 income tax and social contribution, relating to goodwill amortization being disallowed on the acquisition of investments, for the amount of R\$5,307,025 thousand (R\$4,281,045 thousand in 2015); c) IRPJ and CSLL deficiency notice relating to the disallowance of loan loss deductions, for the amount of R\$1,225,277 thousand (R\$979,460 thousand in 2015); d) IRPJ and CSLL deficiency note relating to disallowance of exclusions of revenues from the mark-to-market of securities from 2007 to 2010, and differences in depreciation and operating expenses and income, amounting to R\$928,066 thousand (R\$1,247,006 thousand in 2015); and e) IRPJ and CSLL deficiency note, amounting to R\$430,502 thousand (R\$384,621 thousand in 2015) relating to profit of subsidiaries based overseas, for the calendar years of 2008 and 2009.

This was effected through the capitalization of part of the balance of the account "Profit Reserves - Statutory Reserve", in compliance with the provisions in Article 169 of Law No. 6,404/76, with a stock-split of 20% in shares, by issuing 841,454,808 new nominative-book entry shares, with no nominal value, of which 420,727,426 were common shares and 420,727,382 were preferred shares. These were attributed free-of-charge to the shareholders registered on March 26, 2015 as bonus, in the ratio of two (2) new shares for every ten (10) shares of the same type that they own.

In the Extraordinary General Meeting of December 17, 2015, a decision was made to increase the share capital in the amount of R\$3,000,000 thousand, raising it from R\$43,100,000 thousand to R\$46,100,000 thousand. On February 3, 2016, the Board of Directors decided to cancel the Capital Increase by subscription of shares, deliberated in the Extraordinary General Meeting of December 17, 2015, in the amount of R\$3,000,000 thousand. The decision was due to the volatility of international and national stock markets, with impacts on the price of quotation of the shares on the Stock Exchange. This cancellation was ratified by the shareholders in the Extraordinary General Meeting on March 10, 2016.

In the Extraordinary General Meeting of March 10, 2016, the approval was proposed by the Board of Directors to increase the capital stock by R\$8,000,000 thousand, increasing it from R\$43,100,000 thousand to R\$51,100,000 thousand, with a bonus in shares, through the capitalization of part of the balance of the account "Profit Reserves - Statutory Reserve", in compliance with the provisions in Article 169 of Law No. 6,404/76, by issuing 504,872,885 new nominative-book entry shares, with no nominal value, whereby 252,436,456 are common and 252,436,429 are preferred shares, attributed free-of-charge to the shareholders as bonus, to the ratio of 1 new share for every 10 shares of the same type that they own on the base date.

**b) Interest on shareholders' equity/dividends**

Bradesco's capital remuneration policy aims to distribute interest on shareholders' equity at the maximum amount calculated under current legislation, and this is included, net of Withholding Income Tax, in the calculation for mandatory dividends for the year under the Company's Bylaws.

Interest on shareholders' equity for the period ended March 31, 2016, is calculated as follows:

	R\$ thousand	% (1)
Net profit for the period	4,121,411	
(-) Legal reserve	206,070	
<b>Adjusted calculation basis</b>	<b>3,915,341</b>

**b) Compensation for Key Management Personnel**

Each year, the Annual Shareholders' Meeting approves:

- The annual grand total amount of Management compensation, set forth at the Board of Directors Meetings, to be paid to board members and members of the Board of Executive Officers, as determined by the Company's Bylaws; and
- The amount allocated to finance Management pension plans, within the Employee and Management pension plan of the Organization.

For 2016, the maximum amount of R\$439,700 thousand was set for Management compensation and R\$247,700 thousand to finance defined contribution pension plans.

The current policy on Management compensation sets forth that 50% of net variable compensation, if any, must be allocated to the acquisition of preferred shares of Banco Bradesco S.A., which vest in three equal, annual and successive installments, the first of which is in the year following the payment date. This procedure complies with CMN Resolution No. 3,921/10, which sets forth a management compensation policy for financial institutions.

**Notes to the Consolidated Financial Statements****VaR Internal Model – Trading Portfolio**

The Trading Portfolio is composed of all the operations made with financial instruments, including derivatives, detained for negotiation or destined to hedge other instruments of the portfolio itself, and that are not subject to the limitation of their negotiability. The operations detained for negotiation are those destined for resale, to obtain benefits based on the variation of effective or expected prices, or for arbitrage.

Below is the 1-day VaR:

<b>VaR (Value at Risk)</b>	<b>16,203</b>	<b>18,213</b>
Amounts net of tax.		

**Sensitivity analysis**

The Trading Portfolio is also monitored through daily sensitivity analyses that measure the effect of market movements and price curves on our positions. Furthermore, a sensitivity analysis of the Organization's financial exposures (Trading and Banking Portfolio) is performed on a quarterly basis, in compliance with CVM Rule No. 475/08.

Sensitivity analyses were carried out based on scenarios prepared at the respective dates, always considering market data at the time and scenarios that would adversely affect our positions, according to the examples below:

**Scenario 1:** Based on market information (BM&FBOVESPA, Anbima, etc.), stresses were applied for 1 basis point on the interest rate and 1.0% variation on prices. For example: for a Real/US dollar exchange rate of R\$3.62 a scenario of R\$3.66 was used, while for a 1-year fixed interest rate of 13.62%, a 13.63% scenario was applied;

**Scenario 2:** 25.0% stresses were determined based on market information. For example: for a Real/US dollar exchange rate of R\$3.62 a scenario of R\$4.53 was used, while for a 1-year fixed interest rate of 13.62%, a 17.03% scenario was applied. The scenarios for other risk factors also accounted for 25.0% stresses in the respective curves or prices; and

**Scenario 3:** 50.0% stresses were determined based on market information. For example: for a Real/US dollar quote of R\$3.62 a scenario of R\$5.43 was used, while for a 1-year fixed interest rate of 13.62%, a 20.44% scenario was applied. The scenarios for other risk factors also account for 50.0% stresses in the respective curves or prices.

The results presented reveal the impacts for each scenario in a static position of the portfolio. The dynamism of the market and portfolios means that these positions change continuously and do not necessarily reflect the position demonstrated here. In addition, the Organization has a continuous market risk management process, which is always searching for ways to mitigate the associated risks, according to the strategy determined by Top Management. Therefore, where there are indicators of deterioration in certain positions, proactive measures are taken to minimize any potential negative impact and maximize the risk/return ratio for the Organization.

(1) Includes advances on foreign exchange contracts, leases and other receivables with lending characteristics; and

(2) Primarily includes the surplus of interest in subsidiaries, affiliates and jointly controlled subsidiaries (Cielo, Odontoprev and Fleury).

**Determination of the fair value of financial instruments:**

- Securities and derivative financial instruments, investments, subordinated debts and treasury shares are based on the market price at the reporting date. If no quoted market price is available, amounts are estimated based on the dealer quotations, pricing models, quotation models or quotations for instruments with similar characteristics;

- Fixed rate loans were determined by discounting estimated cash flows, using interest rates applied by the Organization for new contracts with similar features. These rates are consistent with the market at the reporting date; and

- Time deposits, funds from issuance of securities, borrowing and on lending were calculated by discounting the difference between the cash flows under the contract terms and our prevailing market rates for the same product at the reporting date.

***Notes to the Consolidated Financial Statements***

**32) EMPLOYEE BENEFITS**

Bradesco and its subsidiaries sponsor a private defined contribution pension for employees and directors, that allows financial resources to be accumulated by participants throughout their careers by means of employee and employer contributions and invested in an Exclusive Investment Fund (FIE). The Plan is managed by Bradesco Vida e Previdência S.A. and BRAM – Bradesco Asset Management S.A. DTVM is responsible for the financial management of the FIEs funds.

The Supplementary Pension Plan counts on contributions from employees and administrators of Bradesco and its subsidiaries equivalent to at least 4% of the salary by employees and 5% of the salary, plus the percentage allocated to covers of risk benefits (invalidity and death), by the company. Actuarial obligations of the defined contribution plan are fully covered by the plan assets of the corresponding FIE. In addition to the plan, in 2001, participants who chose to migrate from the defined benefit plan are guaranteed a proportional deferred benefit, corresponding to their accumulated rights in that plan. For the active participants, retirees and pensioners of the defined benefit plan, in extinction, the present value of the actuarial obligations of the plan is completely secured by collateral assets.

Banco Alvorada S.A. (successor from the spin-off of Banco Baneb S.A.) maintains defined contribution and defined benefit retirement plans, through Fundação Baneb de Seguridade Social - Bases (related to the former employees of Baneb).

Banco Bradesco's sponsors both defined benefit and defined contribution retirement plans, through Caixa de Assistência e Aposentadoria dos Funcionários do Banco do Estado do Maranhão (Capof), especially to employees originating from Banco BEM S.A.

Bradesco sponsors a defined benefit plan through Caixa de Previdência Privada Bec - Cabec, exclusively for former employees of Banco do Estado do Ceará S.A.

Expenses related to contributions made in the first quarter of 2016, totaled R\$137,171 thousand (R\$154,226 thousand in 2015).

In addition to this benefit, Bradesco and its subsidiaries offer other benefits to their employees and administrators, including health insurance, dental care, life and personal accident insurance, and professional training. These expenses, including the aforementioned contributions, totaled R\$804,959 thousand in the first quarter of 2016 (R\$743,963 thousand in 2015).

**c)** As part of the convergence process with international accounting standards, the Brazilian Accounting Pronouncements Committee (CPC) issued several accounting pronouncements, as well as their interpretations and guidelines, which are applicable to financial institutions only after approval by CMN. The accounting standards which have been approved by CMN include the following:

- Resolution No. 3,566/08 – Impairment of Assets (CPC 01);
- Resolution No. 3,604/08 – Statement of Cash Flows (CPC 03);
- Resolution No. 3,750/09 – Related Party Disclosures (CPC 05);

- Resolution No. 3,823/09 – Provisions, Contingent Liabilities and Contingent Assets (CPC 25);
- Resolution No. 3,973/11 – Subsequent Event (CPC 24);
- Resolution No. 3,989/11 – Share-based Payment (CPC 10);
- Resolution No. 4,007/11 – Accounting Policies, Changes in Estimates and Error Correction (CPC 23);
- Resolution No. 4,144/12 – Conceptual Framework for Preparing and Presenting Financial Statements;  
and
- Resolution No. 4,424/15 – Employee Benefits (CPC 33).

Presently, it is not possible to estimate when the CMN will approve the other CPC pronouncements or if they will be applied prospectively or retrospectively.

CMN Resolution No. 3,786/09 and Bacen Circular Letters No. 3,472/09 and No. 3,516/10 establish that financial institutions and other entities authorized by Bacen to operate, which are publicly-held companies or which are required to establish an Audit Committee shall, since December 31, 2010, annually prepare and publish in up to 90 days after the reference date of December 31 their consolidated financial statements, prepared under the International Financial Reporting Standards (IFRS), in compliance with standards issued by the International Accounting Standards Board (IASB). As required by CMN Resolution, on March 7, 2016, Bradesco published its consolidated financial statements for December 31, 2014 and 2015 on its website, in accordance with IFRS standards. The net profit and shareholders' equity of the financial statements disclosed in IFRS were not substantially different from those presented in the financial statements prepared in accordance with the accounting practices adopted in Brazil and applicable to institutions authorized to operate by the Brazilian Central Bank (Bacen).

**d)** In the first quarter of 2016, Bacen has changed some rules of compulsory collection, however there were no relevant effects for Bradesco.

**Notes to the Consolidated Financial Statements**

- e)** In August 2015, Bradesco informed the market that it had signed the Purchase and Sale of Shares Agreement with HSBC Latin America Holdings Limited for the acquisition of 100% of the share capital of HSBC Bank Brasil S.A. - Banco Múltiplo and HSBC Serviços e Participações Ltda. ("HSBC"), for the value of US\$5.2 billion. With the acquisition, Bradesco will assume all operations of HSBC in Brazil, including retail, insurance and asset management, as well as all the branches and clients. In January 2016, Bradesco communicated to the market that the Central Bank approved the acquisition of 100% of the capital share of HSBC Bank Brasil S.A. – Banco Múltiplo and of HSBC Serviços e Participações Ltda ("HSBC"). The conclusion of the operation is subject to approval by the other competent regulatory agencies and fulfillment of the legal formalities.
- f)** In January 2016, Bradesco signed a non-binding Memorandum of Understanding with Banco do Brasil S.A., Banco Santander (Brasil) S.A., Caixa Econômica Federal and Itaú Unibanco S.A., in order to create a holding company of credit intelligence ("GIC"), which will develop a database with the goal of adding, reconciling and handling database and credit-related information, of individuals and legal entities, which expressly authorize their inclusion in the database, as required by the applicable rules.
- g)** There were no subsequent events that need to be adjusted or disclosed in the individual financial statements as of March 31, 2016.

Consolidated Financial Statements, Independent Auditors' Report and Fiscal Council's Report

***Report on the review of interim consolidated financial information***

To the Board of Directors and Shareholders of

Banco Bradesco S.A.

Osasco - SP

**Introduction**

We have reviewed the consolidated statement of financial position of Banco Bradesco S.A. ("Bradesco") as of March 31, 2016 and the related consolidated statements of income, changes in shareholders' equity and cash flows for the three-month period then ended, as well as the summary of significant accounting policies and other explanatory notes ("the interim consolidated financial information").

Management is responsible for the preparation and fair presentation of this interim consolidated financial information in accordance with accounting practices adopted in Brazil, applicable to financial institutions authorized to operate by the Central Bank of Brazil. Our responsibility is to express a conclusion on this interim consolidated financial information based on our review.

**Scope of review**

We conducted our review in accordance with Brazilian and International Standards on Review of Interim Financial Information (NBC TR 2410 - *Revisão de Informações Intermediárias Executada pelo Auditor da Entidade* and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Therefore, we do not express an audit opinion.

## **Conclusion**

Based on our review, we are not aware of any facts that would lead us to believe that the interim consolidated financial information mentioned above were not prepared, in all material aspects, in accordance with accounting practices adopted in Brazil applicable to financial institutions authorized to operate by the Central Bank of Brazil.

## **Other matters**

### **Interim statement of value added**

We also reviewed the interim consolidated statement of value added (DVA) for the three-month period ended as of March 31, 2016, which was prepared under Bradesco's Management responsibility and which presentation is required under the rules issued by the Securities and Exchange Commission of Brazil (CVM) and is considered a supplementary information in accordance with accounting practices adopted in Brazil applicable to financial institutions authorized to operate by the Central Bank of Brazil that do not require the disclosure of the DVA. This statement was subject to the same review procedures described above and based on our review, we are not aware of any facts that would lead us to believe it was not prepared, in all material respects, consistently with the financial information taken as a whole.
