INVESTORS BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

1. Basis of Presentation

The consolidated financial statements are comprised of the accounts of Investors Bancorp, Inc. and its wholly owned subsidiaries, including Investors Bank (the “Bank”) and the Bank’s wholly-owned subsidiaries (collectively, the “Company”).

In the opinion of management, all the adjustments (consisting of normal and recurring adjustments) necessary for the fair presentation of the consolidated financial condition and the consolidated results of operations for the unaudited periods presented have been included. The results of operations and other data presented for the three and nine months ended September 30, 2013 are not necessarily indicative of the results of operations that may be expected for subsequent periods or the full year results.

Certain information and note disclosures usually included in financial statements prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) for the preparation of the Form 10-Q. The consolidated financial statements presented should be read in conjunction with the Company’s audited consolidated financial statements and notes to the consolidated financial statements included in the Company’s December 31, 2012 Annual Report on Form 10-K. Certain reclassifications have been made to prior year amounts to conform to current year presentation.

2. Business Combinations

On April 5, 2013, the Company entered into a definitive merger agreement with Gateway Community Financial Corporation, the mid-tier holding company for GCF Bank. Gateway Community Financial Corporation has no public shareholders, and therefore no merger consideration will be paid to third parties. The Company will issue shares of its common stock to Investors MHC as consideration for the transaction. The number of shares to be issued will be based on the pro forma market valuation of Gateway Community Financial Corporation as determined by an independent appraisal. As of June 30, 2013, Gateway Community Financial Corporation operated 4 branches in Gloucester County, New Jersey, and had assets of \$303.0 million, deposits of \$271.6 million and a net worth of \$24.4 million. The merger agreement has been approved by the boards of directors of each company and is subject to regulatory approvals and other customary closing conditions. As the merger has not been completed, the transaction is not reflected in the balance sheet or results of operation for the periods presented in this document.

On December 19, 2012, the Company entered into a definitive merger agreement with Roma Financial Corporation, the federally-chartered holding company for Roma Bank and RomAsia Bank. Under the terms of the merger agreement, 100% of the shares of Roma Financial will be converted into Investors Bancorp Inc. common stock. As of June 30, 2013, Roma Financial Corporation operated 26 branches in Burlington, Ocean, Mercer, Camden and Middlesex counties, New Jersey, and had assets of \$1.73 billion, deposits of \$1.41 billion and stockholders' equity of \$217.2 million. The merger agreement has been approved by the boards of directors of each company as well as Investors Bancorp and Roma Financial shareholders. The merger is subject to the requisite regulatory approvals and other customary closing conditions. As the merger has not been completed, the transaction is not reflected in the balance sheet or results of operation for the periods presented in this document.

On October 15, 2012, the Company completed the acquisition of Marathon Banking Corporation and Marathon National Bank of New York, (“Marathon Bank”) a federally chartered bank with 13 full-service branches in the New York metropolitan area. The acquisition was accounted for under the acquisition method of accounting as prescribed by “ASC” 805 “Business Combinations”, as amended. After the purchase accounting adjustments, the Company assumed \$777.5 million in customer deposits and acquired \$558.5 million in loans. This transaction resulted in \$38.6 million of goodwill and generated \$5.0 million in core deposit intangibles. Under this method of accounting, the purchase price has been allocated to the respective assets acquired and liabilities assumed based on their estimated fair values, net of applicable income tax effects. The excess cost over fair value of net assets acquired has been recorded as goodwill.

The purchase price of \$135.0 million was paid using available cash.

Table of Contents

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition for Marathon, net of cash consideration paid:

| | At October 15, 2012 (In millions) | |
|--------------------------------------|---|---|
| Cash and cash equivalents, net | \$113.0 | |
| Securities available-for-sale | 42.2 | |
| Securities held to maturity | 4.7 | |
| Loans receivable | 558.5 | |
| Accrued interest receivable | 1.5 | |
| Other real estate owned | 1.0 | |
| Office properties and equipment, net | 7.5 | |
| Goodwill | 38.6 | |
| Intangible assets | 5.0 | |
| Other assets | 14.7 | |
| Total assets acquired | 786.7 | |
| Deposits | (777.5 |) |
| Borrowed funds | (5.2 |) |
| Other liabilities | (4.0 |) |
| Total liabilities assumed | \$(786.7 |) |

For the nine months ended September 30, 2013, an adjustment of \$207,000 was recorded to goodwill due to adjustments to purchase accounting, see footnote 7, "Goodwill and Other Intangible Assets". The calculation of goodwill is subject to change for up to one year after closing date of the transactions as additional information relative to closing dates estimates and uncertainties becomes available.

On January 6, 2012, the Company completed the acquisition of Brooklyn Federal Bancorp, Inc. ("BFSB"), the holding company of Brooklyn Federal Savings Bank, a federally chartered savings bank with five full-service branches in Brooklyn and Long Island. After the purchase accounting adjustments, the Company assumed \$385.9 million in customer deposits and acquired \$177.5 million in loans. This transaction resulted in \$16.7 million of goodwill and generated \$218,000 in core deposit intangibles. Under the acquisition method of accounting, the purchase price has been allocated to the respective assets acquired and liabilities assumed based on their estimated fair values, net of applicable income tax effects. The excess cost over fair value of net assets acquired has been recorded as goodwill. The purchase price of \$10.3 million was paid through a combination of the Company's common stock (551,862 shares), issued to Investors Bancorp, MHC, and cash of \$2.9 million. Brooklyn Federal Savings Bank was merged into the Bank as of the acquisition date. In a separate transaction, the Company sold most of Brooklyn Federal Savings Bank's commercial real estate loan portfolio to a real estate investment fund on January 10, 2012.

Table of Contents

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition for BFSB, net of cash consideration paid:

| | At January 6, 2012 (In millions) | |
|--------------------------------------|--|---|
| Cash and cash equivalents, net | \$27.7 | |
| Securities available-for-sale | 170.4 | |
| Loans receivable | 177.5 | |
| Accrued interest receivable | 1.1 | |
| Office properties and equipment, net | 5.2 | |
| Goodwill | 16.7 | |
| Intangible assets | 0.2 | |

| Deposits | (385.9 |) |
| Borrowed funds | (8.2 |) |
| Other liabilities | (6.4 |) |
| Total liabilities assumed | (400.5 |) |
| Net assets acquired | \$7.6 | |

The purchase accounting for the Brooklyn is complete and reflected in the table above and in our consolidated financial statements.

Fair Value Measurement of Assets Acquired and Liabilities Assumed

Described below are the methods used to determine the fair values of the significant assets acquired and liabilities assumed in the Marathon and BFSB acquisitions:

Securities. The estimated fair values of the investment securities classified as available for sale were calculated utilizing Level 1 inputs. The prices for these instruments are based upon sales of the securities shortly after the acquisition date. Investment securities classified as Held to Maturity were valued using a combination of Level 2 and Level 3 inputs. The Company reviewed the data and assumptions used in pricing the securities by its third party provider to ensure the highest level of significant inputs are derived from market observable data.

Loans. The acquired loan portfolio was valued based on guidance from ASC 820-10 which defines fair value as the price that would be received to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. Level 3 procedures utilized to value the portfolio included the use of present value techniques employing cash flow estimates and the incorporated assumptions that marketplace participants would use in estimating fair values. In instances where reliable market information was not available, the Company used its own assumptions in an effort to determine reasonable fair value. Specifically, the Company utilized three separate fair value analyses we believe a market participant might employ in estimating the entire fair value adjustment required under ASC 820-10. The three separate fair valuation methodologies used are: 1) interest rate loan fair value analysis, 2) general credit fair value adjustment and 3) specific credit fair value adjustment.

To prepare the interest rate loan fair value analysis loans were assembled into groupings by characteristics such as loan type, term, collateral and rate. Market rates for similar loans were obtained from various external data sources and reviewed by Company Management for reasonableness. The average of these rates was used as the fair value interest rate a market participant would utilize. A present value approach was utilized to calculate the interest rate fair value adjustment.

The General Credit Risk fair value adjustment was calculated using a two part general credit fair value analysis; 1) expected lifetime losses and 2) estimated fair value adjustment for qualitative factors. The expected lifetime losses were calculated using an average of historical losses of the Company, Marathon Bank and peer banks. The adjustment related to qualitative factors was impacted by general economic conditions, and the risk related to lack of familiarity with the originator's underwriting process.

To calculate the Specific Credit fair value adjustment the Company reviewed the acquired loan portfolio for loans meeting the definition of an impaired loan as defined by ASC 310-30. Loans meeting this criteria were reviewed by comparing the contractual cash flows to expected collectible cash flows. The aggregate expected cash flows less the acquisition date fair value will result in an accretable yield amount. The accretable yield amount will be recognized over the life of the loans on a level yield basis as an adjustment to yield.

Table of Contents

Deposits / Core Deposit Intangibles. Core deposit intangibles (CDI) represent the value assigned to demand, interest checking, money market and savings accounts acquired as part of an acquisition. The CDI value represents the future economic benefit, including the present value of future tax benefits, of the potential cost savings from acquiring core deposits as part of an acquisition compared to the cost alternative funding sources.

Certificates of deposit (time deposits) are not considered to be core deposits as they are assumed to have a low expected average life upon acquisition. The fair value of certificates of deposits represents the present value of the certificates' expected contractual payments discounted by market rates for similar CD's.

Borrowed Funds. The present value approach was used to determine the fair value of the borrowed funds acquired during 2012. The fair value of the liability represents the present value of the expected payments using the three year FHLB advance rate.

3. Earnings Per Share

The following is a summary of our earnings per share calculations and reconciliation of basic to diluted earnings per share.

| | Three months ended September 30, | | | | | |
|--|---|-------------|------------------|----------|-------------|------------------|
| | 2013 | | | 2012 | | |
| | Income | Shares | Per Share Amount | Income | Shares | Per Share Amount |
| | (Dollars in thousands, except per share data) | | | | | |
| Net income | \$29,281 | | | \$24,489 | | |
| Basic earnings per share: | | | | | | |
| Income available to common stockholders | \$29,281 | 107,933,076 | \$0.27 | \$24,489 | 107,409,451 | \$0.23 |
| Effect of dilutive common stock equivalents— | — | 1,424,538 | — | — | 866,956 | |
| Diluted earnings per share: | | | | | | |
| Income available to common stockholders | \$29,281 | 109,357,614 | \$0.27 | \$24,489 | 108,276,407 | \$0.23 |

For the three months ended September 30, 2013 and 2012 there were 194,000 and 15,000 equity awards, respectively, that could potentially dilute basic earnings per share in the future that were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the periods presented.

| | Nine months ended September 30, | | | | | |
|--|---|-------------|------------------|----------|-------------|------------------|
| | 2013 | | | 2012 | | |
| | Income | Shares | Per Share Amount | Income | Shares | Per Share Amount |
| | (Dollars in thousands, except per share data) | | | | | |
| Net income | \$84,524 | | | \$67,396 | | |
| Basic earnings per share: | | | | | | |
| Income available to common stockholders | \$84,524 | 107,765,190 | \$0.78 | \$67,396 | 107,347,608 | \$0.63 |
| Effect of dilutive common stock equivalents— | — | 1,257,117 | — | — | 590,197 | |
| Diluted earnings per share: | | | | | | |
| Income available to common stockholders | \$84,524 | 109,022,307 | \$0.78 | \$67,396 | 107,937,805 | \$0.62 |

For the nine months ended September 30, 2013 and 2012 there were 194,000 and 486,000 equity awards, respectively that could potentially dilute basic earnings per share in the future that were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the periods presented.

4. Securities

The carrying value, gross unrealized gains and losses and estimated fair value of securities available-for-sale and held-to-maturity for the dates indicated are as follows:

| | At September 30, 2013 | | | |
|---|-----------------------|--------------------------|---------------------------|----------------------|
| | Carrying value | Gross unrecognized gains | Gross unrecognized losses | Estimated fair value |
| | (In thousands) | | | |
| Available-for-sale: | | | | |
| Equity securities | \$3,220 | 1,119 | 19 | 4,320 |
| Debt securities: | | | | |
| Government-sponsored enterprises | 3,013 | — | — | 3,013 |
| Mortgage-backed securities: | | | | |
| Federal Home Loan Mortgage Corporation | 379,187 | 4,472 | 2,638 | 381,021 |
| Federal National Mortgage Association | 424,221 | 5,931 | 2,717 | 427,435 |
| Government National Mortgage Association | 703 | 4 | — | 707 |
| Total mortgage-backed securities available-for-sale | 804,111 | 10,407 | 5,355 | 809,163 |
| Total available-for-sale securities | \$810,344 | 11,526 | 5,374 | 816,496 |

| | At September 30, 2013 | | | | | |
|---|-----------------------|-----------------------------------|----------------|------------------------------|-------------------------------|----------------------|
| | Amortized cost | Net unrealized gains (losses) (1) | Carrying value | Gross unrecognized gains (2) | Gross unrecognized losses (2) | Estimated fair value |
| | (In thousands) | | | | | |
| Held-to-maturity: | | | | | | |
| Debt securities: | | | | | | |
| Government-sponsored enterprises | \$ 127 | — | 127 | 1 | — | 128 |
| Municipal bonds | 15,331 | — | 15,331 | 636 | — | 15,967 |
| Corporate and other debt securities | 58,597 | (26,759) | 31,838 | 20,625 | 2,505 | 49,958 |
| Total debt securities held-to-maturity | 74,055 | (26,759) | 47,296 | 21,262 | 2,505 | 66,053 |
| Mortgage-backed securities: | | | | | | |
| Federal Home Loan Mortgage Corporation | 265,570 | (5,701) | 259,869 | 2,058 | 4,278 | 257,649 |
| Federal National Mortgage Association | 369,071 | (5,693) | 363,378 | 3,074 | 3,439 | 363,013 |
| Federal housing authorities | 415 | — | 415 | — | — | 415 |
| Total mortgage-backed securities held-to-maturity | 635,056 | (11,394) | 623,662 | 5,132 | 7,717 | 621,077 |
| Total held-to-maturity securities | \$709,111 | (38,153) | 670,958 | 26,394 | 10,222 | 687,130 |

(1) Unrealized gains and losses of held-to-maturity securities represent (i) the other than temporary charge related to other non credit factors on corporate and other debt securities and is amortized through accumulated other comprehensive income over the remaining life of the securities; and (ii) unrealized gains and losses on securities reclassified from available-for-sale to held-to-maturity that are reflected in accumulated other comprehensive loss on the consolidated balance sheet and is being recognized over the life of the securities.

(2) Unrecognized holding gains and losses of held-to-maturity securities are not reflected in the financial statements, as they represent fair value fluctuations from the later of: (i) the date a security is designated as held-to-maturity; or (ii) the date that an OTTI charge is recognized on a held-to-maturity security, through the date of the balance sheet.

| Total held-to-maturity securities | \$208,426 | (28,504) | 179,922 | 22,330 | 3,359 | 198,893 |

(1) Unrealized gains and losses of held-to-maturity securities represent the other than temporary charge related to other non credit factors on corporate and other debt securities and is amortized through accumulated other comprehensive income over the remaining life of the securities.

(2) Unrecognized holding gains and losses of held-to-maturity securities are not reflected in the financial statements, as they represent fair value fluctuations from the later of: (i) the date a security is designated as held-to-maturity; or (ii) the date that an OTTI charge is recognized on a held-to-maturity security, through the date of the balance sheet.

Our investment portfolio is comprised primarily of fixed rate mortgage-backed securities guaranteed by a Government Sponsored Enterprise (“GSE”) as issuer. Current market conditions have not significantly impacted the pricing of our portfolio or our ability to obtain reliable prices. See note 11 for further discussion on the valuation of securities. The changes in held-to-maturity and available-for-sale securities for the period ending September 30, 2013 is primarily attributed to a \$524.0 million transfer of previously-designated available-for-sale to a held-to-maturity designation at fair value. In accordance with ASC 320, Investments - Debt and Equity Securities, the Company is required at each balance sheet date to reassess the classification of each security held. The reclassification for the

period ended September 30, 2013 is permitted as the Company has

16

Table of Contents

appropriately determined the ability and intent to hold these securities as an investment until maturity or call. The securities transferred had a net loss of \$12.2 million that is reflected in accumulated other comprehensive loss on the consolidated balance sheet, net of subsequent amortization, which is being recognized over the life of the securities. Gross unrealized losses on securities and the estimated fair value of the related securities, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at September 30, 2013 and December 31, 2012, was as follows:

| | September 30, 2013 | | | | Total | |
|---|--|----------------------|--|----------------------|-------------------------|----------------------|

| Total held-to-maturity | 2,298 | 174 | 1,542 | 3,185 | 3,840 | 3,359 |
| Total | \$198,727 | 506 | 2,254 | 3,201 | 200,981 | 3,707 |

The majority of gross unrealized losses relate to our mortgage-backed-security portfolio which are guaranteed by Government Sponsored Enterprises. These securities have been negatively impacted by the recent increase in long-term market interest rates. The remaining gross unrealized losses relate to our corporate and other debt securities whose estimated fair value of has been adversely impacted by the current economic environment, current market interest rates, wider credit spreads and credit deterioration subsequent to the purchase of these securities. This portfolio consists of 36 pooled trust preferred securities ("TruPS"), principally issued by banks. At September 30, 2013, the amortized cost (net after previous impairment charges) and estimated fair values of the trust preferred portfolio was \$31.8 million and \$50.0 million, respectively with 7 of the securities in an unrealized loss position (see "OTTI" for further discussion). The Company has no intent to sell, nor is it more likely than not that the Company will be required to sell, the securities in an unrealized loss position before the recovery of their amortized cost basis or maturity.

Edgar Filing: Investors Bancorp Inc - Form 10-Q

Table of Contents

The following table summarizes the Company's pooled trust preferred securities as of September 30, 2013. The Company does not own any single-issuer trust preferred securities.

Table of Contents

(1) At September 30, 2013, assumed recoveries for current deferrals and defaulted issuers ranged from 3.5% to 65.5%.

(2) At September 30, 2013, assumed recoveries for expected deferrals and defaulted issuers ranged from 8.1% to 24.1%.

(3) Excess subordination represents the amount of remaining performing collateral that is in excess of the amount needed to pay off a specified class of bonds and all classes senior to the specified class. Excess subordination reduces an investor's potential risk of loss on their investment as excess subordination absorbs principal and interest shortfalls in the event underlying issuers are not able to make their contractual payments.

A portion of the Company's securities are pledged to secure borrowings. The contractual maturities of mortgage-backed securities generally exceed 10 years; however, the effective lives are expected to be shorter due to anticipated prepayments. Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer, therefore, mortgage-backed securities are not included in the following table. The carrying value and estimated fair value of debt securities at September 30, 2013, by contractual maturity, are shown below.

| | September 30, 2013 | |
|--|--------------------|----------------------|
| | Carrying value | Estimated fair value |
| | (In thousands) | |
| Due in one year or less | \$9,863 | 9,863 |
| Due after one year through five years | 3,603 | 3,626 |
| Due after five years through ten years | — | — |
| Due after ten years | 36,843 | 55,577 |
| Total | \$50,309 | 69,066 |

Other-Than-Temporary Impairment ("OTTI")

We conduct a quarterly review and evaluation of the securities portfolio to determine if the value of any security has declined below its cost or amortized cost, and whether such decline is other-than-temporary. If a determination is made that a debt security is other-than-temporarily impaired, the Company will estimate the amount of the unrealized loss that is attributable to credit and all other non-credit related factors. The credit related component will be recognized as an other-than-temporary impairment charge in non-interest income as a component of gain (loss) on securities, net. The non-credit related component will be recorded as an adjustment to accumulated other comprehensive income, net of tax.

Through the use of a valuation specialist, we evaluate the credit and performance of each underlying issuer of our trust preferred securities by deriving probabilities and assumptions for default, recovery and prepayment/amortization for the expected cash flows for each security. At September 30, 2013, management deemed that the present value of projected cash flows for each security was greater than the book value and did not recognize any additional OTTI charges for the period ended September 30, 2013. At September 30, 2013, non credit-related OTTI recorded on the previously impaired pooled trust preferred securities was \$26.8 million (\$15.8 million after-tax).

The following table presents the changes in the credit loss component of the impairment loss of debt securities that the Company has written down for such loss as an other-than-temporary impairment recognized in earnings.

| | Three months ended | | Nine months ended | |
|---|--------------------|---------|-------------------|----------|
| | September 30, | | September 30, | |
| | 2013 | 2012 | 2013 | 2012 |
| | (In thousands) | | | |
| Balance of credit related OTTI, beginning of period | \$112,886 | 115,759 | \$114,514 | 117,003 |
| Additions: | | | | |
| Initial credit impairments | — | — | — | — |
| Subsequent credit impairments | — | — | — | — |
| Reductions: | | | | |
| Accretion of credit loss impairment due to an increase in expected cash flows | (814 |) (623 |) (2,442 |) (1,867 |

Edgar Filing: Investors Bancorp Inc - Form 10-Q

| | | | | |
|---|-----------|---------|-----------|---------|
| Balance of credit related OTTI, end of period | \$112,072 | 115,136 | \$112,072 | 115,136 |
|---|-----------|---------|-----------|---------|

The credit loss component of the impairment loss represents the difference between the present value of expected future cash flows and the amortized cost basis of the securities prior to considering credit losses. The beginning balance represents the credit loss

20

Table of Contents

component for debt securities for which other-than-temporary impairment occurred prior to the period presented. If other-than-temporary impairment is recognized in earnings for credit impaired debt securities, they would be presented as additions in two components based upon whether the current period is the first time a debt security was credit impaired (initial credit impairment) or is not the first time a debt security was credit impaired (subsequent credit impairments). The credit loss component is reduced if the Company sells, intends to sell or believes it will be required to sell or revises its estimate about the previously credit impaired debt securities. Additionally, the credit loss component is reduced if (i) the Company receives cash flows in excess of what it expected to receive over the remaining life of the credit impaired debt security, (ii) the security matures or (iii) the security is fully written down.

Realized Gains and Losses

Gains and losses on the sale of all securities are determined using the specific identification method. For the three months ended September 30, 2013, the Company realized a \$15,000 gain on capital distributions of equity securities from the available-for-sale portfolio. For the three months ended September 30, 2013, there were no losses recognized. For the nine months ended September 30, 2013, proceeds from sales of securities from available-for-sale portfolio were \$56.0 million, which resulted in gross realized gains of \$846,100 and \$162,300 gross realized losses as well as \$22,000 of gains on capital distributions of equity securities. For the three and nine months ended September 30, 2013, there were no sales of securities from held-to-maturity portfolio.

For three months ended September 30, 2012, proceeds from sales of securities from available-for-sale portfolio were \$8.0 million, which resulted in gross realized gains of \$138,000 and no gross realized losses. For the nine months ended September 30, 2012, proceeds from sales of securities from the available-for-sale portfolio were \$8.6 million, which resulted in gross realized gains of \$176,000 and no gross realized losses. During the nine months ended September 30, 2012, the Company sold \$166.8 million of available-for-sale agency mortgage backed securities that were acquired in the acquisition of Brooklyn Federal Bancorp, Inc. The sales did not result in any gross realized gains or gross realized losses. In addition, the Company realized a \$33,000 loss on capital distributions of equity securities during the nine months ended September 30, 2012.

For the three months ended September 30, 2012, proceeds from sales of securities from the held-to-maturity portfolio were \$14.2 million, which resulted in gross realized gains of \$159,000 and gross realized losses of \$51,000. For the nine months ended September 30, 2012, proceeds from sales of securities from the held-to-maturity portfolio were \$14.9 million, which resulted in gross realized gains of \$193,000 and \$51,000 in gross realized losses. Sales from the held-to-maturity portfolio met the criteria of principal pay downs under 85% of the original investment amount and therefore do not result in a tainting of the held-to-maturity portfolio. The Company sells securities when market pricing presents, in management's assessment, an economic benefit that outweighs holding such securities, and when smaller balance securities become cost prohibitive to carry.

5. Loans Receivable, Net

The detail of the loan portfolio as of September 30, 2013 and December 31, 2012 was as follows:

| | September 30, 2013 | December 31, 2012 |
|--|-----------------------|----------------------|
| | (In thousands) | |
| Residential mortgage loans | \$5,132,745 | 4,837,838 |
| Multi-family loans | 3,557,333 | 2,995,052 |
| Commercial real estate loans | 2,190,099 | 1,966,156 |
| Construction loans | 218,391 | 224,816 |
| Consumer and other loans | 224,029 | 238,922 |
| Commercial and industrial loans | 195,187 | 168,943 |
| Total loans excluding PCI loans | 11,517,784 | 10,431,727 |
| PCI loans | 6,474 | 6,744 |
| Net unamortized premiums and deferred loan costs | 16,533 | 10,487 |
| Allowance for loan losses | (166,779 |) (142,172 |

Edgar Filing: Investors Bancorp Inc - Form 10-Q

| | | |
|-----------|--------------|------------|
| Net loans | \$11,374,012 | 10,306,786 |
|-----------|--------------|------------|

Purchased Credit-Impaired Loans

Purchased Credit-Impaired ("PCI") loans, are loans acquired at a discount that is due, in part, to credit quality. PCI loans are accounted for in accordance with ASC Subtopic 310-30 and are initially recorded at fair value (as determined by the present value of expected future cash flows) with no valuation allowance (i.e., the allowance for loan losses).

21

Table of Contents

Management performs a quarterly evaluation of the adequacy of the allowance for loan losses. The analysis of the allowance for loan losses has two components: specific and general allocations. Specific allocations are made for loans determined to be impaired. A loan is deemed to be impaired if it is a commercial real estate, multi-family or construction loan with an outstanding balance greater than \$1.0 million and on non-accrual status, loans modified in a troubled debt restructuring (“TDR”), and other loans if management has specific information of a collateral shortfall. Impairment is measured by determining the present value of expected future cash flows or, for collateral-dependent loans, the fair value of the collateral adjusted for market conditions and selling expenses. The general allocation is determined by segregating the remaining loans, including those loans not meeting the Company’s definition of an impaired loan, by type of loan, risk rating (if applicable) and payment history. In addition, the Company also considers whether residential loans are fixed or adjustable rate. We also analyze historical loss experience, delinquency trends, general economic conditions, geographic concentrations, and industry and peer comparisons. This analysis establishes factors that are applied to the loan groups to determine the amount of the general allocations. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revisions based upon changes in economic and real estate market conditions. Actual loan losses may be significantly more than the allowance for loan losses we have established which could have a material negative effect on our financial results. On a quarterly basis, management’s Allowance for Loan Loss Committee reviews the current status of various loan assets in order to evaluate the adequacy of the allowance for loan losses. In this evaluation process, specific loans are analyzed to determine their potential risk of loss. This process includes all loans, concentrating on non-accrual and classified loans. Each non-accrual or classified loan is evaluated for potential loss exposure. Any shortfall results in a recommendation of a specific allowance or charge-off if the likelihood of loss is evaluated as probable. To determine the adequacy of collateral on a particular loan, an estimate of the fair value of the collateral is based on the most current appraised value available. This appraised value is then reduced to reflect estimated liquidation expenses. The results of this quarterly process are summarized along with recommendations and presented to Executive and Senior Management for their review. Based on these recommendations, loan loss allowances are approved by Executive and Senior Management. All supporting documentation with regard to the evaluation process, loan loss experience, allowance levels and the schedules of classified loans are maintained by the Lending Administration Department. A summary of loan loss allowances and the methodology employed to determine such allowances is presented to the Board of Directors on a quarterly basis.

Our primary lending emphasis has been the origination of commercial real estate loans, multi-family loans and the origination and purchase of residential mortgage loans. We also originate commercial and industrial loans, home equity loans and home equity lines of credit. These activities resulted in a concentration of loans secured by real estate property located in New Jersey and New York. Based on the composition of our loan portfolio, we believe the primary risks are increases in interest rates, a continued decline in the general economy, and a further decline in real estate market values in New Jersey, New York and surrounding states. Any one or combination of these events may adversely affect our loan portfolio resulting in increased delinquencies, loan losses and future levels of loan loss provisions. We consider it important to maintain the ratio of our allowance for loan losses to total loans at an adequate level given current economic conditions and the composition of the portfolio. As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans are critical in determining the amount of the allowance required for specific loans. Assumptions for appraisal valuations are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly impact the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable on the related loans.

For commercial real estate, construction and multi-family loans, the Company obtains an appraisal for all collateral dependent loans upon origination and an updated appraisal in the event interest or principal payments are 90 days delinquent or when the timely collection of such income is considered doubtful. This is done in order to determine the specific reserve needed upon initial recognition of a collateral dependent loan as non-accrual and/or impaired. In subsequent reporting periods, as part of the allowance for loan loss process, the Company reviews each collateral dependent commercial real estate loan previously classified as non-accrual and/or impaired and assesses whether there

has been an adverse change in the collateral value supporting the loan. The Company utilizes information from its commercial lending officers and its loan workout department's knowledge of changes in real estate conditions in our lending area to identify if possible deterioration of collateral value has occurred. Based on the severity of the changes in market conditions, management determines if an updated appraisal is warranted or if downward adjustments to the previous appraisal are warranted. If it is determined that the deterioration of the collateral value is significant enough to warrant ordering a new appraisal, an estimate of the downward adjustments to the existing appraised value is used in assessing if additional specific reserves are necessary until the updated appraisal is received.

For homogeneous residential mortgage loans, the Company's policy is to obtain an appraisal upon the origination of the loan and an updated appraisal in the event a loan becomes 90 days delinquent. Thereafter, the appraisal is updated every 2 years if the loan remains in non-performing status and the foreclosure process has not been completed. Additionally, management adjusts the appraised value of residential loans to reflect estimated selling costs and declines in the real estate market.

Table of Contents

Management believes the potential risk for outdated appraisals for impaired and other non-performing loans has been mitigated due to the fact that the loans are individually assessed to determine that the loan's carrying value is not in excess of the fair value of the collateral. Loans are generally charged off after an analysis is completed which indicates that collectability of the full principal balance is in doubt.

Our allowance for loan losses reflects probable losses considering, among other things, the continued adverse economic conditions, the actual growth and change in composition of our loan portfolio, the level of our non-performing loans and our charge-off experience. In addition, the allowance considers the inherent credit risk in the overall portfolio, particularly the credit risk associated with commercial real estate lending and commercial and industrial lending. We believe the allowance for loan losses reflects the inherent credit risk in our portfolio.

Although we believe we have established and maintained the allowance for loan losses at adequate levels, additions may be necessary if the current economic environment continues or deteriorates. Management uses the best information available; however, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. In addition, the Federal Deposit Insurance Corporation and the New Jersey Department of Banking and Insurance, as an integral part of their examination process, will periodically review our allowance for loan losses. Such agencies may require us to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination.

Table of Contents

The following tables present the balance in the allowance for loan losses and the recorded investment in loans by portfolio segment and based on impairment method as of September 30, 2013 and December 31, 2012:

| | September 30, 2013 | | | | | | | Total |

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information and current economic trends, among other factors. For non-homogeneous loans, such as commercial and commercial real estate loans the Company analyzes the loans individually by classifying the loans as to credit risk and assesses the probability of collection for each type of class. This analysis is performed on a quarterly basis. The Company uses the following definitions for risk ratings:

Pass - "Pass" assets are well protected by the current net worth and paying capacity of the obligor (or guarantors, if any) or by the fair value, less cost to acquire and sell, of any underlying collateral in a timely manner.

Special Mention - A "Special Mention" asset has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the institution's credit position at some future date. Special Mention assets are not adversely classified and do not expose

an institution to sufficient risk to warrant adverse classification. Residential loans delinquent 30-89 days are considered special mention.

Table of Contents

Substandard - A “Substandard” asset is inadequately protected by the current sound worth and paying capacity of the obligor or by the collateral pledged, if any. Assets so classified must have a well-defined weakness, or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected. Residential and consumer and other loans delinquent 90 days or greater are considered substandard.

Doubtful - An asset classified “Doubtful” has all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable on the basis of currently known facts, conditions, and values.

Loss - An asset or portion thereof, classified “Loss” is considered uncollectible and of such little value that its continuance on the institution’s books as an asset, without establishment of a specific valuation allowance or charge-off, is not warranted. This classification does not necessarily mean that an asset has no recovery or salvage value; but rather, there is much doubt about whether, how much, or when the recovery will occur. As such, it is not practical or desirable to defer the write-off.

The following tables present the risk category of loans as of September 30, 2013 and December 31, 2012 by class of loans excluding the PCI loans:

| | September 30, 2013 | | | | | |
|---------------------------|--------------------|-----------------|-------------|----------|------|------------|
| | Pass | Special Mention | Substandard | Doubtful | Loss | Total |
| | (In thousands) | | | | | |

| Construction | — | — | 13,746 | 13,746 | 204,645 | 218,391 |
| Commercial and industrial | 218 | 320 | 1,340 | 1,878 | 193,309 | 195,187 |
| Consumer and other | 99 | 268 | 1,547 | 1,914 | 222,115 | 224,029 |
| Total | \$28,735 | 12,052 | 87,806 | 128,593 | 11,389,191 | 11,517,784 |

| | December 31, 2012 | | | Total Past Due | Current | Total Loans Receivable |
|---------------------------|-------------------|------------|----------------------|----------------|------------|------------------------|
| | 30-59 Days | 60-89 Days | Greater than 90 Days | | | |
| | (In thousands) | | | | | |
| Residential mortgage | \$33,451 | 11,715 | 76,088 | 121,254 | 4,716,584 | 4,837,838 |
| Multi-family | 191 | 3,950 | 11,143 | 15,284 | 2,979,768 | 2,995,052 |
| Commercial real estate | 16,469 | 3,016 | 753 | 20,238 | 1,945,918 | 1,966,156 |
| Construction | — | — | 18,876 | 18,876 | 205,940 | 224,816 |
| Commercial and industrial | 631 | 2,639 | 375 | 3,645 | 165,298 | 168,943 |
| Consumer and other | 881 | 196 | 1,238 | 2,315 | 236,607 | 238,922 |
| Total | \$51,623 | 21,516 | 108,473 | 181,612 | 10,250,115 | 10,431,727 |

The following table presents non-accrual loans excluding PCI loans at the dates indicated:

| | September 30, 2013 | | December 31, 2012 | |
|---------------------------|------------------------|-----------|-------------------|-----------|
| | # of loans | Amount | # of loans | Amount |
| | (Dollars in thousands) | | | |
| Non-accrual: | | | | |
| Residential and consumer | 305 | \$75,097 | 354 | \$82,533 |
| Construction | 7 | 14,234 | 9 | 25,764 |
| Multi-family | 9 | 16,769 | 5 | 11,143 |
| Commercial real estate | 3 | 1,630 | 4 | 753 |
| Commercial and industrial | 8 | 1,862 | 2 | 375 |
| Total non-accrual loans | 332 | \$109,592 | 374 | \$120,568 |

Included in the non-accrual table above are TDR loans whose payment status is current but the Company has classified as non-accrual as the loans have not maintained current payment status for six consecutive months and therefore do not meet the criteria for accrual status. As of September 30, 2013, these loans are comprised of 2 commercial real estate loans totaling \$1.4 million, 4 multi-family loans totaling \$12.4 million, 1 construction loan totaling \$488,000, 1 commercial and industrial loan totaling \$521,000 and 21 residential and consumer loans totaling \$8.1 million. The Company has no loans past due 90 days or more delinquent that are still accruing interest. As of September 30, 2013, there were 11 PCI loans totaling \$6.5 million of which 3 PCI loans totaling \$3.3 million were

current and 8 PCI loans totaling \$3.2 million were 90 days or more delinquent. As of December 31, 2012, there were 12 PCI

28

Table of Contents

loans totaling \$6.7 million of which 8 PCI loans totaling \$5.8 million were current and 4 PCI loans totaling \$966,000 were 90 days or more delinquent.

At September 30, 2013 and December 31, 2012, loans meeting the Company's definition of an impaired loan which were primarily collateral dependent totaled \$67.4 million and \$57.4 million, respectively, with allocations of the allowance for loan losses of \$2.1 million for both periods. During the three months ended September 30, 2013 and 2012, interest income received and recognized on these loans totaled \$508,000 and \$461,000, respectively. During the nine months ended September 30, 2013 and 2012, interest income received and recognized on these loans totaled \$1.6 million and \$1.3 million, respectively.

The following tables present loans individually evaluated for impairment by class of loans as of September 30, 2013 and December 31, 2012:

| | September 30, 2013 | | | | |
|-----------------------------|------------------------|-----------------------------|----------------------|-----------------------------------|----------------------------------|
| | Recorded Investment | Unpaid Principal Balance | Related Allowance | Average Recorded Investment | Interest Income Recognized |
| | (In thousands) | | | | |
| With no related allowance: | | | | | |
| Residential mortgage | \$3,839 | 5,499 | — | 2,689 | 47 |
| Multi-family | 16,510 | 30,156 | — | 14,519 | 542 |
| Commercial real estate | 11,739 | 12,621 | — | 10,385 | 515 |
| Construction loans | 17,747 | 27,034 | — | 21,654 | 145 |
| Commercial and industrial | 1,627 | 1,627 | — | 1,392 | 65 |
| With an allowance recorded: | | | | | |

| Construction loans | 26,314 | 43,945 | — | 42,611 | 384 |
| Commercial and industrial | 1,208 | 1,208 | — | 641 | 90 |
| Total impaired loans | \$57,406 | 85,216 | 2,142 | 68,357 | 1,579 |

The average recorded investment is the annual average calculated based upon the ending quarterly balances. The interest income recognized is the year to date interest income recognized on a cash basis.

Troubled Debt Restructurings

On a case-by-case basis, the Company may agree to modify the contractual terms of a borrower's loan to remain competitive and assist customers who may be experiencing financial difficulty, as well as preserve the Company's position in the loan. If the borrower is experiencing financial difficulties and a concession has been made at the time of such modification, the loan is classified as a troubled debt restructured loan.

Substantially all of our troubled debt restructured loan modifications involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan, or a combination of these two methods. These modifications rarely result in the forgiveness of principal or accrued interest. In addition, we frequently obtain additional collateral or guarantor support when modifying commercial loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non-accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible.

The following table presents the total troubled debt restructured loans as of September 30, 2013 excluding PCI loans:

| | Accrual | | Non-accrual | | Total | |
|---------------------------|------------------------|---------|-------------|----------|------------|----------|
| | # of loans | Amount | # of loans | Amount | # of loans | Amount |
| | (Dollars in thousands) | | | | | |
| Residential and consumer | 26 | \$8,374 | 32 | \$11,388 | 58 | \$19,762 |

| Construction | 1 | 2,640 | 2,640 | — | — | — |
| Commercial and industrial | 1 | 521 | 521 | 1 | 1,107 | 1,107 |

Post-modification recorded investment represents the balance immediately following modification. Residential mortgage loan modifications primarily involved the reduction in loan interest rate and extension of loan maturity dates.

All TDRs are impaired loans, which are individually evaluated for impairment, as discussed above. Collateral dependent impaired loans classified as TDRs were written down to the estimated fair value of the collateral. There were \$383,000 and \$600,000 in charge-offs for collateral dependent TDRs during the three months ended September 30, 2013 and 2012, respectively. There were \$1.6 million and \$3.5 million in charge-offs for collateral dependent TDRs during the nine months ended September 30, 2013 and 2012. The allowance for loan losses associated with the TDRs presented in the above tables totaled \$2.1 million and \$5.7 million at September 30, 2013 and 2012, respectively.

For the three months ended September 30, 2013, there were 9 residential TDRs that had a weighted average modified interest rate of approximately 3.14% compared to a rate of 4.44% prior to modification. For the nine months ended September 30, 2013, there were 20 residential TDRs that had a weighted average modified interest rate of approximately 3.33% compared to a yield of 5.03% prior to modification. Residential TDRs were modified to reflect a reduction in interest rates to current market rates. Several residential TDRs include step up interest rates in their modified terms which will impact their weighted average rate in the future. There were no TDRs categorized as consumer and other for the three and nine months ended September 30, 2013.

Commercial loan modifications which qualified as a TDR comprised of terms of maturity being extended and reduction in interest rates to current market terms. For the three and nine months ended September 30, 2013, there was 1 commercial and industrial TDR that had a weighted average modified interest rate of approximately 4.00% as compared to a rate of 6.00% prior to modification. There were no commercial real estate, multi-family, and

construction TDRs for the three months ended September 30, 2013. For the nine months ended September 30, 2013, there were 4 commercial real estate TDRs that had a weighted average modified interest rate of approximately 5.41% compared to a rate of 7.29% prior to modification, 3 multi-family TDRs that had a weighted average modified interest rate of approximately 3.81% as compared to a rate of 8.61% prior to modification and 1 construction TDR that had a weighted average modified interest rate of approximately 3.75% as compared to a rate of 5.00% prior to modification. For the three months ended September 30, 2012, there were 6 residential TDRs that had a weighted average modified interest rate of approximately 3.27% compared to a yield of 5.71% prior to modification. For the nine months ended September 30, 2012, there

Table of Contents

were 15 residential TDRs that had a weighted average modified interest rate of approximately 3.11% compared to a yield of 5.75% prior to modification. Several residential TDRs include step up interest rates in their modified terms which will impact their weighted average yield in the future. There was one commercial real estate TDR and one commercial and industrial TDR for the three and nine months ended September 30, 2012. These two loans were to one borrower and were modified to interest only status for a limited period. The loans are well collateralized and pose a low risk of credit loss.

Loans modified as TDRs in the previous 12 months to September 30, 2013, for which there was a payment default consisted of 4 residential loans with a recorded investment of \$1.3 million at September 30, 2013. Loans modified as TDRs in the previous 12 months to September 30, 2012, for which there was a payment default consisted of 4 residential loans with a recorded investment of \$855,000 and 2 construction loans with a recorded investment of \$3.9 million at September 30, 2012.

6. Deposits

Deposits are summarized as follows:

| | September 30, 2013 | December 31, 2012 |
|--------------------------|--------------------|-------------------|
| | (In thousands) | |
| Savings | \$1,732,162 | 1,718,199 |
| Checking accounts | 2,696,450 | 2,498,829 |
| Money market deposits | 1,594,389 | 1,585,865 |
| Certificates of deposits | 2,619,334 | 2,965,964 |
| Total | \$8,642,335 | 8,768,857 |

Table of Contents

7. Goodwill and Other Intangible Assets

The carrying amount of goodwill for the period ended September 30, 2013 and December 31, 2012 was approximately \$77.3 million and \$77.1 million, respectively. The change in goodwill for the period was due to adjustments to purchase accounting associated with the acquisition of Marathon Bank, see footnote 2, "Business Combinations."

The following table summarizes other intangible assets as of September 30, 2013 and December 31, 2012:

| | Gross Intangible Asset (In thousands) | Accumulated Amortization | Valuation Allowance | Net Intangible Assets |
|-------------------------------|---|-----------------------------|------------------------|--------------------------|
| September 30, 2013 | | | | |
| Mortgage servicing rights | \$42,466 | (27,804 |) (81 |) 14,581 |
| Core deposit premiums | 14,338 | (6,074 |) — | 8,264 |
| Other | 300 | (73 |) — | 227 |
| Total other intangible assets | \$57,104 | (33,951 |) (81 |) 23,072 |
| December 31, 2012 | | | | |
| Mortgage servicing rights | \$37,838 | (24,107 |) (1,705 |) 12,026 |
| Core deposit premiums | 14,338 | (4,455 |) — | 9,883 |
| Other | 300 | (50 |) — | 250 |
| Total other intangible assets | \$52,476 | (28,612 |) (1,705 |) 22,159 |

Mortgage servicing rights are accounted for using the amortization method. Under this method, the Company amortizes the loan servicing asset in proportion to, and over the period of, estimated net servicing revenues. The Company sells loans on a servicing-retained basis. Loans that were sold on this basis, amounted to \$1.57 billion and \$1.40 billion at September 30, 2013 and December 31, 2012 respectively, all of which relate to residential mortgage loans. At September 30, 2013 and December 31, 2012, the servicing asset, included in intangible assets, had an estimated fair value of \$14.6 million and \$12.0 million, respectively. Fair value was based on expected future cash flows considering a weighted average discount rate of 10.2%, a weighted average constant prepayment rate on mortgages of 8.45% and a weighted average life of 7.0 years.

Core deposit premiums are amortized using an accelerated method and having a weighted average amortization period of 10 years.

8. Equity Incentive Plan

During the three and nine months ended September 30, 2013, the Company recorded \$895,000 and \$2.6 million of share-based compensation expense, comprised of stock option expense of \$109,000 and \$278,000 and restricted stock expense of \$786,000 and \$2.4 million, respectively. During the three and nine months ended September 30, 2012, the Company recorded \$926,000 and \$2.7 million of share-based compensation expense, comprised of stock option expense of \$106,000 and \$318,000 and restricted stock expense of \$820,000 and \$2.4 million, respectively.

Table of Contents

The following is a summary of the Company's stock option activity and related information for its option plan for the nine months ended September 30, 2013:

| | Number of Stock Options | Weighted Average Exercise Price | Weighted Average Remaining Contractual Life | Aggregate Intrinsic Value |
|-----------------------------------|-------------------------------|--|---|---------------------------------|
| Outstanding at December 31, 2012 | 4,320,068 | \$ 14.98 | 4.20 | \$ 12,083 |
| Granted | 190,920 | 20.65 | | |
| Exercised | (313,500 |) 15.23 | | |
| Forfeited | (3,500 |) 17.85 | | |
| Expired | — | — | | |
| Outstanding at September 30, 2013 | 4,193,988 | \$ 15.22 | 3.73 | \$ 28,015 |
| Exercisable at September 30, 2013 | 3,916,568 | \$ 14.99 | 3.39 | \$ 27,073 |

There were 190,920 options granted during the nine months ended September 30, 2013. Expected future expense relating to the unvested options outstanding as of September 30, 2013 is \$1.4 million over a weighted average period of 6.25 years.

The following is a summary of the status of the Company's restricted shares as of September 30, 2013 and changes therein during the nine months then ended:

| | Number of Shares Awarded | Weighted Average Grant Date Fair Value |
|----------------------------------|--------------------------------|---|
| Non-vested at December 31, 2012 | 1,292,739 | \$ 13.62 |
| Granted | 3,000 | 18.18 |
| Vested | (219,976 |) 13.49 |
| Forfeited | — | — |
| Non-vested at September 30, 2013 | 1,075,763 | \$ 13.70 |

Expected future compensation expense relating to the non-vested restricted shares at September 30, 2013 is \$12.3 million over a weighted average period of 4.49 years.

9. Net Periodic Benefit Plan Expense

The Company has a Supplemental Executive Retirement Wage Replacement Plan (SERP). The SERP is a nonqualified, defined benefit plan which provides benefits to employees as designated by the Compensation Committee of the Board of Directors if their benefits and/or contributions under the pension plan are limited by the Internal Revenue Code. The Company also has a nonqualified, defined benefit plan which provides benefits to certain directors. The SERP and the directors' plan are unfunded and the costs of the plans are recognized over the period that services are provided.

The components of net periodic benefit cost are as follows:

| | Three months ended September 30, 2013 | | Nine months ended September 30, 2013 | |
|---------------|---|------|--|------|
| | 2012 | 2012 | 2012 | 2012 |
| | (In thousands) | | | |
| Service cost | \$450 | 328 | \$ 1,349 | 985 |
| Interest cost | 227 | 199 | 681 | 597 |

Edgar Filing: Investors Bancorp Inc - Form 10-Q

| | | | | |
|---------------------------------|-------|-----|---------|-------|
| Amortization of: | | | | |
| Prior service cost | 24 | 24 | 73 | 73 |
| Net gain | 165 | 36 | 495 | 109 |
| Total net periodic benefit cost | \$866 | 587 | \$2,598 | 1,764 |

34

Table of Contents

Due to the unfunded nature of these plans, no contributions have been made or were expected to be made to the SERP and Directors' plans during the nine months ended September 30, 2013.

The Company also maintains a defined benefit pension plan. Since it is a multiemployer plan, costs of the pension plan are based on contributions required to be made to the pension plan. We contributed \$2.8 million to the defined benefit pension plan during the nine months ended September 30, 2013. We anticipate contributing funds to the plan to meet any minimum funding requirements for the remainder of 2013.

10. Comprehensive Income (Loss)

The components of comprehensive income (loss), both gross and net of tax, are presented for the periods below:

| | Three months ended September 30, | | | | | |
|--|----------------------------------|-----------------------------|--------|--------|-----------------------------|--------|
| | 2013 | | | 2012 | | |
| | Gross | Tax Benefit (Expense) | Net | Gross | Tax Benefit (Expense) | Net |
| | (In thousands) | | | | | |
| Net income | \$45,334 | (16,053) | 29,281 | 40,425 | (15,936) | 24,489 |
| Other comprehensive income (loss): | | | | | | |
| Change in funded status of retirement obligations | 239 | (98) | 141 | 121 | (49) | 72 |
| Unrealized gain (loss) on securities available-for-sale | 185 | (33) | 152 | 4,865 | (1,916) | 2,949 |
| Accretion of loss on securities reclassified to held-to-maturity | 849 | (347) | 502 | — | — | — |
| Reclassification adjustment for gains included in net income | — | — | — | 139 | (57) | 82 |
| Other-than-temporary impairment accretion on debt securities | 1,084 | (443) | 641 | 369 | (151) | 218 |
| Total other comprehensive income (loss) | 2,357 | (921) | 1,436 | 5,494 | (2,173) | 3,321 |
| Total comprehensive income (loss) | \$47,691 | (16,974) | 30,717 | 45,919 | (18,109) | 27,810 |

Table of Contents

| | Nine months ended September 30, 2013 | | | 2012 | | |
|---|---|-----------------------------|-----------|---------|-----------------------------|--------|
| | Gross | Tax Benefit (Expense) | Net | Gross | Tax Benefit (Expense) | Net |
| | (In thousands) | | | | | |
| Net income | \$131,190 | (46,666) | 84,524 | 109,320 | (41,924) | 67,396 |
| Other comprehensive income (loss): | | | | | | |
| Change in funded status of retirement obligations | 717 | (293) | 424 | 363 | (148) | 215 |
| Unrealized (loss) gain on securities available-for-sale | (18,051) | 7,437 | (10,614) | 11,660 | (4,462) | 7,198 |
| Net loss on securities reclassified from available-for-sale to held-to-maturity | (12,243) | 5,001 | (7,242) | — | — | — |
| Accretion of loss on securities reclassified to held-to-maturity | 849 | (347) | 502 | — | — | — |
| Reclassification adjustment for gains included in net income | (684) | 279 | (405) | 176 | (72) | 104 |
| Other-than-temporary impairment accretion on debt securities | 1,745 | (713) | 1,032 | 1,108 | (453) | 655 |
| Total other comprehensive income (loss) | (27,667) | 11,364 | (16,303) | 13,307 | (5,135) | 8,172 |
| Total comprehensive income (loss) | \$103,523 | (35,302) | 68,221 | 122,627 | (47,059) | 75,568 |

The following table presents the after-tax changes in the balances of each component of accumulated other comprehensive loss for the nine months ended September 30, 2013 and 2012:

| | Change in funded status of retirement obligations | Unrealized gain on securities available-for-sale | Reclassification adjustment for losses included in net income | Other-than- temporary impairment accretion on debt securities | Loss on Securities reclassified to held-to-maturity | Total accumulated other comprehensive loss |
|------------------------------|--|---|---|---|--|--|
| Balance - December 31, 2012 | \$(5,879) | 15,718 | (586) | (16,860) | — | (7,607) |
| Net change | 424 | (10,614) | (405) | 1,032 | (6,740) | (16,303) |
| Balance - September 30, 2013 | \$(5,455) | 5,104 | (991) | (15,828) | (6,740) | (23,910) |
| Balance - December 31, 2011 | \$(3,319) | 10,638 | (691) | (17,734) | — | (11,106) |
| Net change | 215 | 7,198 | 104 | 655 | — | 8,172 |
| Balance -September 30, 2012 | \$(3,104) | 17,836 | (587) | (17,079) | — | (2,934) |

Table of Contents

The following table sets for information about amounts reclassified from accumulated other comprehensive loss to the consolidated statement of income and the affected line item in the statement where net income is presented.

| | Three months ended September 30, 2013 (In thousands) | Nine months ended September 30, 2013 |
|--|--|---|
| Reclassification adjustment for gains included in net income | | |
| Gain on security transactions | \$— | (684) |
| Change in funded status of retirement obligations (1) | | |
| Compensation and fringe benefits: | | |
| Amortization of net obligation or asset | 8 | 25 |
| Amortization of prior service cost | 37 | 110 |
| Amortization of net gain | 194 | 583 |
| Compensation and fringe benefits | 239 | 718 |
| Total before tax | 239 | 34 |
| Income (tax) benefit | (98) | (14) |
| Net of tax | \$ 141 | 20 |

(1) These accumulated other comprehensive loss components are included in the computations of net periodic cost for our defined benefit plans and other post-retirement benefit plan. See Note 9 for additional details.

11. Fair Value Measurements

We use fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Our securities available-for-sale are recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other assets or liabilities on a non-recurring basis, such as held-to-maturity securities, mortgage servicing rights (“MSR”), loans receivable and real estate owned (“REO”). These non-recurring fair value adjustments involve the application of lower-of-cost-or-market accounting or write-downs of individual assets. Additionally, in connection with our mortgage banking activities we have commitments to fund loans held for sale and commitments to sell loans, which are considered free-standing derivative instruments, the fair values of which are not material to our financial condition or results of operations.

In accordance with Financial Accounting Standards Board (“FASB”) ASC 820, “Fair Value Measurements and Disclosures”, we group our assets and liabilities at fair value in three levels, based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 – Valuation is based upon quoted prices for identical instruments traded in active markets.

Level 2 – Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 – Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect our own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models and similar techniques. The results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability.

We base our fair values on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 requires us to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

Assets Measured at Fair Value on a Recurring Basis

Securities available-for-sale

Our available-for-sale portfolio is carried at estimated fair value on a recurring basis, with any unrealized gains and losses, net of taxes, reported as accumulated other comprehensive income/loss in stockholders' equity. The fair values of available-for-sale securities are based on quoted market prices (Level 1), where available. The Company obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded (Level 2), the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, benchmark yields, credit spreads, default rates, prepayment speeds and non-binding broker quotes. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service.

Table of Contents

The following table provides the level of valuation assumptions used to determine the carrying value of our assets measured at fair value on a recurring basis at September 30, 2013 and December 31, 2012, respectively.

| | Carrying Value at September 30, 2013 | | | |
|---|--------------------------------------|---------|---------|---------|
| | Total | Level 1 | Level 2 | Level 3 |
| | (In thousands) | | | |
| Securities available for sale: | | | | |
| Equity securities | \$4,320 | — | 4,320 | — |
| Debt securities: | | | | |
| Government-sponsored enterprises | 3,013 | — | 3,013 | — |
| Mortgage-backed securities: | | | | |
| Federal Home Loan Mortgage Corporation | 381,021 | — | 381,021 | — |
| Federal National Mortgage Association | 427,435 | — | 427,435 | — |
| Government National Mortgage Association | 707 | — | 707 | — |
| Total mortgage-backed securities available-for-sale | 809,163 | — | 809,163 | — |
| Total securities available-for-sale | \$816,496 | — | 816,496 | — |

| | Carrying Value at December 31, 2012 | | | |
|---|-------------------------------------|---------|-----------|---------|
| | Total | Level 1 | Level 2 | Level 3 |
| | (In thousands) | | | |
| Securities available for sale: | | | | |
| Equity securities | \$4,161 | — | 4,161 | — |
| Debt securities: | | | | |
| Government-sponsored enterprises | 3,035 | — | 3,035 | — |
| Mortgage-backed securities: | | | | |
| Federal Home Loan Mortgage Corporation | 667,517 | — | 667,517 | — |
| Federal National Mortgage Association | 706,128 | — | 706,128 | — |
| Government National Mortgage Association | 4,487 | — | 4,487 | — |
| Total mortgage-backed securities available-for-sale | 1,378,132 | — | 1,378,132 | — |
| Total securities available-for-sale | \$1,385,328 | — | 1,385,328 | — |

There have been no changes in the methodologies used at September 30, 2013 from December 31, 2012, and there were no transfers between Level 1 and Level 2 during the nine months ended September 30, 2013.

Assets Measured at Fair Value on a Non-Recurring Basis

Mortgage Servicing Rights, net

Mortgage servicing rights (MSR) are carried at the lower of cost or estimated fair value. The estimated fair value of MSR is obtained through independent third party valuations through an analysis of future cash flows, incorporating estimates of assumptions market participants would use in determining fair value including market discount rates, prepayment speeds, servicing income, servicing costs, default rates and other market driven data, including the market's perception of future interest rate movements. The prepayment speed and the discount rate are considered two of the most significant inputs in the model. At September 30, 2013, the fair value model used prepayment speeds ranging from 1.8% to 21.6% and a discount rate of 10.2% for the valuation of the mortgage servicing rights. A significant degree of judgment is involved in valuing the mortgage servicing rights using Level 3 inputs. The use of different assumptions could have a significant positive or negative effect on the fair value estimate.

Table of Contents

Loans Receivable

Loans which meet certain criteria are evaluated individually for impairment. A loan is deemed to be impaired if it is a commercial real estate, multi-family or construction loan, with an outstanding balance greater than \$1.0 million and on non-accrual status, loans modified in a troubled debt restructuring, and other loans with \$1.0 million in outstanding principal if management has specific information of a collateral shortfall. Our impaired loans are generally collateral dependent and, as such, are carried at the estimated fair value of the collateral less estimated selling costs. In order to estimate fair value, once interest or principal payments are 90 days delinquent or when the timely collection of such income is considered doubtful an updated appraisal is obtained. Thereafter, in the event the most recent appraisal does not reflect the current market conditions due to the passage of time and other factors, management will obtain an updated appraisal or make downward adjustments to the existing appraised value based on their knowledge of the property, local real estate market conditions, recent real estate transactions, and for estimated selling costs, if applicable. At September 30, 2013, appraisals were discounted in a range of 0%-25%.

Other Real Estate Owned

Other Real Estate Owned is recorded at estimated fair value, less estimated selling costs when acquired, thus establishing a new cost basis using Level 3 inputs. Fair value is generally based on independent appraisals. These appraisals include adjustments to comparable assets based on the appraisers' market knowledge and experience, and are discounted an additional 0%-25% for estimated costs to sell. When an asset is acquired, the excess of the loan balance over fair value, less estimated selling costs, is charged to the allowance for loan losses. If the estimated fair value of the asset declines, a writedown is recorded through expense. The valuation of foreclosed assets is subjective in nature and may be adjusted in the future because of changes in economic conditions. Operating costs after acquisition are generally expensed.

The following table provides the level of valuation assumptions used to determine the carrying value of our assets measured at fair value on a non-recurring basis at September 30, 2013 and December 31, 2012, respectively.

| | Carrying Value at September 30, 2013 | | | |
|-------------------------|--------------------------------------|---------|---------|---------|
| | Total | Level 1 | Level 2 | Level 3 |
| | (In thousands) | | | |
| MSR, net | \$ 14,677 | — | — | 14,677 |
| Impaired loans | 246 | — | — | 246 |
| Other real estate owned | 1,127 | — | — | 1,127 |
| | \$ 16,050 | — | — | 16,050 |
| | Carrying Value at December 31, 2012 | | | |
| | Total | Level 1 | Level 2 | Level 3 |
| | (In thousands) | | | |
| MSR, net | \$ 12,025 | — | — | 12,025 |
| Impaired loans | 50,470 | — | — | 50,470 |
| Other real estate owned | 8,093 | — | — | 8,093 |
| | \$ 70,588 | — | — | 70,588 |

Other Fair Value Disclosures

Fair value estimates, methods and assumptions for the Company's financial instruments not recorded at fair value on a recurring or non-recurring basis are set forth below.

Cash and Cash Equivalents

For cash and due from banks, the carrying amount approximates fair value.

Table of Contents

Securities held-to-maturity

Our held-to-maturity portfolio, consisting primarily of mortgage backed securities and other debt securities for which we have a positive intent and ability to hold to maturity, is carried at amortized cost. Management utilizes various inputs to determine the fair value of the portfolio. The Company obtains one price for each security primarily from a third-party pricing service, which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, benchmark yields, credit spreads, default rates, prepayment speeds and non-binding broker quotes. In the absence of quoted prices and in an illiquid market, valuation techniques, which require inputs that are both significant to the fair value measurement and unobservable, are used to determine fair value of the investment. Valuation techniques are based on various assumptions, including, but not limited to cash flows, discount rates, rate of return, adjustments for nonperformance and liquidity, and liquidation values. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service.

FHLB Stock

The fair value of FHLB stock is its carrying value, since this is the amount for which it could be redeemed. There is no active market for this stock and the Bank is required to hold a minimum investment based upon the unpaid principal of home mortgage loans and/or FHLB advances outstanding.

Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as residential mortgage and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and by performing and nonperforming categories.

The fair value of performing loans, except residential mortgage loans, is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan. For performing residential mortgage loans, fair value is estimated by discounting contractual cash flows adjusted for prepayment estimates using discount rates based on secondary market sources adjusted to reflect differences in servicing and credit costs, if applicable. Fair value for significant nonperforming loans is based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows. Fair values estimated in this manner do not fully incorporate an exit price approach to fair value, but instead are based on a comparison to current market rates for comparable loans.

Deposit Liabilities

The fair value of deposits with no stated maturity, such as savings, checking accounts and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates which approximate currently offered for deposits of similar remaining maturities.

Borrowings

The fair value of borrowings are based on securities dealers' estimated fair values, when available, or estimated using discounted contractual cash flows using rates which approximate the rates offered for borrowings of similar remaining maturities.

Table of Contents

Commitments to Extend Credit

The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For commitments to originate fixed rate loans, fair value also considers the difference between current levels of interest rates and the committed rates. Due to the short-term nature of our outstanding commitments, the fair values of these commitments are immaterial to our financial condition.

The carrying values and estimated fair values of the Company's financial instruments are presented in the following table.

| | September 30, 2013 | | | | |
|------------------------------------|----------------------------------|-------------------------------|-----------|-----------|------------|
| | Carrying value (In thousands) | Estimated Fair Value Total | Level 1 | Level 2 | Level 3 |

| Borrowed funds | 2,705,652 | 2,804,113 | — | 2,804,113 | — |

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Table of Contents

Fair value estimates are based on existing on- and off-balance-sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Significant assets that are not considered financial assets include deferred tax assets, premises and equipment and bank owned life insurance. Liabilities for pension and other postretirement benefits are not considered financial liabilities. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

12. Recent Accounting Pronouncements

In December 2011, the FASB issued ASU 2011-11, Disclosures about Offsetting Assets and Liabilities, in conjunction with the IASB's issuance of amendments to Disclosures—Offsetting Financial Assets and Financial Liabilities (Amendments to IFRS 7). While the Boards retained the existing offsetting models under U.S. GAAP and IFRS, the new standards require disclosures to allow investors to better compare financial statements prepared under U.S. GAAP with financial statements prepared under IFRS. The new standards are effective for annual periods beginning January 1, 2013, and interim periods within those annual periods. Retrospective application is required. The adoption of this pronouncement did not have a material impact on the Company's financial condition or results of operations.

In January 2013, the FASB issued ASU 2013-01, Scope of Disclosures about Offsetting Assets and Liabilities. The main provision of ASU 2013-1 is to clarify the scope of the new offsetting disclosures required under ASU 2011-11 to derivatives, including bifurcated embedded derivatives; repurchase and reverse repurchase agreements and securities borrowing and lending transactions that are either offset in the statement of financial position or subject to an enforceable master netting arrangement regardless of their presentation in the financial statements. The Company does not expect that the adoption of this pronouncement will have a material impact on the Company's financial condition or results of operations.

In February 2013, the FASB issued ASU 2013-02, "Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income". This ASU requires entities to disclose the effect of items reclassified out of accumulated other comprehensive income (AOCI) on each affected net income line item. For AOCI reclassification items that are not reclassified in their entirety into net income, a cross reference to other required US GAAP disclosures. This information may be provided either in the notes or parenthetically on the face of the financials. For public entities, the guidance is effective for annual reporting periods beginning after December 15, 2012 and interim periods within those years. The Company has presented comprehensive income in a separate Consolidated Statements of Comprehensive Income and in Note 10 of the Notes to Consolidated Financial Statements.

In July 2013, the FASB issued ASU 2013-11, "Income Taxes, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists". The amendments of this update state that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. This ASU applies to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. The amendments in this ASU are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. Early adoption is permitted. The amendments should be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. The Company does not expect that the adoption of this pronouncement will have a material impact on the Company's financial condition or results of operations.

13. Subsequent Events

As defined in FASB ASC 855, "Subsequent Events", subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued or available to be issued. Financial statements are considered issued when they are widely distributed to shareholders and other financial statement users for general use and reliance in a form and format that complies with GAAP.

Edgar Filing: Investors Bancorp Inc - Form 10-Q

On October 24, 2013, the Company declared a cash dividend of \$0.05 per share to stockholders of record as of November 8, 2013, payable on November 22, 2013.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward Looking Statements

Certain statements contained herein are not based on historical facts and are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may be identified by reference to a future period or periods or by the use of forward-looking terminology, such as "may," "will," "believe," "expect," "estimate," "anticipate," "continue," or similar terms, variations on those terms, or the negative of those terms. Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those related to the economic environment, particularly in the market areas in which Investors Bancorp, Inc. (the "Company") operates, competitive products and pricing, fiscal and monetary policies of the U.S. Government, changes in government regulations or interpretations of regulations affecting financial institutions, changes in prevailing interest rates, acquisitions and the integration of acquired businesses, credit risk management, asset-liability management, the financial and securities markets and the availability of and costs associated with sources of liquidity.

The Company wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. The Company wishes to advise that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. The Company does not undertake and specifically declines any obligation to publicly release the result of any revisions, which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events except as may be required by law.

Critical Accounting Policies

We consider accounting policies that require management to exercise significant judgment or discretion or to make significant assumptions that have, or could have, a material impact on the carrying value of certain assets or on income, to be critical accounting policies. We consider the following to be our critical accounting policies.

Allowance for Loan Losses. The allowance for loan losses is the estimated amount considered necessary to cover credit losses inherent in the loan portfolio at the balance sheet date. The allowance is established through the provision for loan losses that is charged against income. In determining the allowance for loan losses, we make significant estimates and, therefore, have identified the allowance as a critical accounting policy. The methodology for determining the allowance for loan losses is considered a critical accounting policy by management because of the high degree of judgment involved, the subjectivity of the assumptions used, and the potential for changes in the economic environment that could result in changes to the amount of the recorded allowance for loan losses.

The allowance for loan losses has been determined in accordance with U.S. generally accepted accounting principles, under which we are required to maintain an allowance for probable losses at the balance sheet date. We are responsible for the timely and periodic determination of the amount of the allowance required. We believe that our allowance for loan losses is adequate to cover specifically identifiable losses, as well as estimated losses inherent in our portfolio for which certain losses are probable but not specifically identifiable.

Management performs a quarterly evaluation of the adequacy of the allowance for loan losses. The analysis of the allowance for loan losses has two components: specific and general allocations. Specific allocations are made for loans determined to be impaired. A loan is deemed to be impaired if it is a commercial real estate, multi-family or construction loan with an outstanding balance greater than \$1.0 million and on non-accrual status, loans modified in a troubled debt restructuring, and other commercial real estate loans with an outstanding balance greater than \$1.0 million if management has specific information of a collateral shortfall. Impairment is measured by determining the present value of expected future cash flows or, for collateral-dependent loans, the fair value of the collateral adjusted for market conditions and selling expenses. The general allocation is determined by segregating the remaining loans, including those loans not meeting the Company's definition of an impaired loan, by type of loan, risk weighting (if applicable) and payment history. We also analyze historical loss experience, delinquency trends, general economic

conditions, geographic concentrations, and industry and peer comparisons. This analysis establishes factors that are applied to the loan groups to determine the amount of the general allocations. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revisions based upon changes in economic and real estate market conditions. Actual loan losses may be significantly more than the allowance for loan losses we have established which could have a material negative effect on our financial results.

Table of Contents

Purchased Credit-Impaired ("PCI") loans, are loans acquired at a discount that is due, in part, to credit quality. PCI loans are accounted for in accordance with ASC Subtopic 310-30 and are initially recorded at fair value (as determined by the present value of expected future cash flows) with no valuation allowance (i.e., the allowance for loan losses). The difference between the undiscounted cash flows expected at acquisition and the initial carrying amount (fair value) of the PCI loans, or the "accretable yield," is recognized as interest income utilizing the level-yield method over the life of the loans. Contractually required payments for interest and principal that exceed the undiscounted cash flows expected at acquisition, or the "non-accretable difference," are not recognized as a yield adjustment, as a loss accrual or a valuation allowance. Reclassifications of the non-accretable difference to the accretable yield may occur subsequent to the loan acquisition dates due to increases in expected cash flows of the loans and result in an increase in yield on a prospective basis. On a quarterly basis, the Company analyzes the actual cash flow versus the forecasts and any adjustments to credit loss expectations are made based on actual loss recognized as well as changes in the probability of default. For period in which cash flows aren't reforecasted, prior period's estimated cash flows are adjusted to reflect the actual cash received and credit events which occurred during the current reporting period.

On a quarterly basis, management's Allowance for Loan Loss Committee reviews the current status of various loan assets in order to evaluate the adequacy of the allowance for loan losses. In this evaluation process, specific loans are analyzed to determine their potential risk of loss. This process includes all loans, concentrating on non-accrual and classified loans. Each non-accrual or classified loan is evaluated for potential loss exposure. Any shortfall results in a recommendation of a specific allowance if the likelihood of loss is evaluated as probable. To determine the adequacy of collateral on a particular loan, an estimate of the fair market value of the collateral is based on the most current appraised value available. This appraised value is then reduced to reflect estimated liquidation expenses.

The results of this quarterly process are summarized along with recommendations and presented to Executive and Senior Management for their review. Based on these recommendations, loan loss allowances are approved by Executive and Senior Management. All supporting documentation with regard to the evaluation process, loan loss experience, allowance levels and the schedules of classified loans are maintained by the Lending Administration Department. A summary of loan loss allowances is presented to the Board of Directors on a quarterly basis.

Our primary lending emphasis has been the origination of commercial real estate loans, multi-family loans and the origination and purchase of residential mortgage loans. We also originate commercial and industrial loans, construction loans, business lending, home equity loans and home equity lines of credit. These activities resulted in loan concentration of loans secured by real property located in New Jersey and New York. As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans are critical in determining the amount of the allowance required for specific loans. Assumptions for appraisal valuations are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly impact the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable on the related loans.

For commercial real estate, construction and multi-family loans, the Company obtains an appraisal for all collateral dependent loans upon origination and an updated appraisal in the event interest or principal payments are 90 days delinquent or when the timely collection of such income is considered doubtful. This is done in order to determine the specific reserve needed upon initial recognition of a collateral dependent loan as non-accrual and/or impaired. In subsequent reporting periods, as part of the allowance for loan loss process, the Company reviews each collateral dependent commercial real estate loan previously classified as non-accrual and/or impaired and assesses whether there has been an adverse change in the collateral value supporting the loan. The Company utilizes information from its commercial lending officers and its loan workout department's knowledge of changes in real estate conditions in our lending area to identify if possible deterioration of collateral value has occurred. Based on the severity of the changes in market conditions, management determines if an updated appraisal is warranted or if downward adjustments to the previous appraisal are warranted. If it is determined that the deterioration of the collateral value is significant enough to warrant ordering a new appraisal, an estimate of the downward adjustments to the existing appraised value is used in assessing if additional specific reserves are necessary until the updated appraisal is received.

For homogeneous residential mortgage loans, the Company's policy is to obtain an appraisal upon the origination of the loan and an updated appraisal in the event a loan becomes 90 days delinquent. Thereafter, the appraisal is updated every two years if the loan remains in non-performing status and the foreclosure process has not been completed. Management adjusts the appraised value of residential loans to reflect estimated selling costs and estimated declines in the real estate market, taking into consideration the estimated length of time to complete the foreclosure process. In determining the allowance for loan losses, management believes the potential for outdated appraisals has been mitigated for impaired loans and other non-performing loans. As described above, the loans are individually assessed to determine that the loan's carrying value is not in excess of the fair value of the collateral. Loans are generally charged off after an analysis is completed which indicates that collectability of the full principal balance is in doubt. Based on the composition of our loan portfolio, we

Table of Contents

believe the primary risks are increases in interest rates, a continued decline in the general economy, and a further decline in real estate market values in New Jersey, New York and surrounding states. Any one or combination of these events may adversely affect our loan portfolio resulting in increased delinquencies, loan losses and future levels of loan loss provisions. We consider it important to maintain the ratio of our allowance for loan losses to total loans at an adequate level given current economic conditions, interest rates, and the composition of the portfolio.

Our allowance for loan losses reflects probable losses considering, among other things, the continued adverse economic conditions, the actual growth and change in composition of our loan portfolio, the level of our non-performing loans and our charge-off experience. We believe the allowance for loan losses reflects the inherent credit risk in our portfolio.

Although we believe we have established and maintained the allowance for loan losses at adequate levels, additions may be necessary if the current economic environment continues or deteriorates. Management uses the best information available; however, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. In addition, the Federal Deposit Insurance Corporation and the New Jersey Department of Banking and Insurance, as an integral part of their examination process, will periodically review our allowance for loan losses. Such agencies may require us to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination.

Deferred Income Taxes. The Company records income taxes in accordance with ASC 740, "Income Taxes," as amended, using the asset and liability method. Accordingly, deferred tax assets and liabilities: (i) are recognized for the expected future tax consequences of events that have been recognized in the financial statements or tax returns; (ii) are attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases; and (iii) are measured using enacted tax rates expected to apply in the years when those temporary differences are expected to be recovered or settled. Where applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period of enactment. The valuation allowance is adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant.

Asset Impairment Judgments. Certain of our assets are carried on our consolidated balance sheets at cost, fair value or at the lower of cost or fair value. Valuation allowances or write-downs are established when necessary to recognize impairment of such assets. We periodically perform analyses to test for impairment of such assets. In addition to the impairment analyses related to our loans discussed above, another significant impairment analysis is the determination of whether there has been an other-than-temporary decline in the value of one or more of our securities.

Our available-for-sale portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in stockholders' equity. While the Company does not intend to sell these securities, and it is more likely than not that we will not be required to sell these securities before their anticipated recovery of the remaining amortized cost basis, the Company has the ability to sell the securities. Our held-to-maturity portfolio, consisting primarily of mortgage backed securities and other debt securities for which we have a positive intent and ability to hold to maturity, is carried at amortized cost. We conduct a periodic review and evaluation of the securities portfolio to determine if the value of any security has declined below its cost or amortized cost, and whether such decline is other-than-temporary. Management utilizes various inputs to determine the fair value of the portfolio. To the extent they exist, unadjusted quoted market prices in active markets (level 1) or quoted prices on similar assets (level 2) are utilized to determine the fair value of each investment in the portfolio. In the absence of quoted prices and in an illiquid market, valuation techniques, which require inputs that are both significant to the fair value measurement and unobservable (level 3), are used to determine fair value of the investment. Valuation techniques are based on various assumptions, including, but not limited to cash flows, discount rates, rate of return, adjustments for nonperformance and liquidity, and liquidation values. Management is required to use a significant degree of judgment when the valuation of investments includes unobservable inputs. The use of different assumptions could have a positive or negative effect on our consolidated financial condition or results of operations.

The fair values of our securities portfolio are also affected by changes in interest rates. When significant changes in interest rates occur, we evaluate our intent and ability to hold the security to maturity or for a sufficient time to recover our recorded investment balance.

If a determination is made that a debt security is other-than-temporarily impaired, the Company will estimate the amount of the unrealized loss that is attributable to credit and all other non-credit related factors. The credit related component will be recognized as an other-than-temporary impairment charge in non-interest income as a component of gain (loss) on securities and amortized over the remaining life of the investment to interest income, net. The non-credit related component will be recorded as an adjustment to accumulate other comprehensive income, net of tax.

45

Table of Contents

Goodwill Impairment. Goodwill is presumed to have an indefinite useful life and is tested, at least annually, for impairment at the reporting unit level. Impairment exists when the carrying amount of goodwill exceeds its implied fair value. For purposes of our goodwill impairment testing, we have identified a single reporting unit.

In connection with our annual impairment assessment we applied the guidance in FASB Accounting Standards Update (“ASU”) 2011-08, Intangibles—Goodwill and Other (Topic 350): Testing Goodwill for Impairment, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit’s fair value is less than its carrying amount before applying the two-step goodwill impairment test.

Valuation of Mortgage Servicing Rights (MSR). The initial asset recognized for originated MSR is measured at fair value. The fair value of MSR is estimated by reference to current market values of similar loans sold with servicing released. MSR are amortized in proportion to and over the period of estimated net servicing income. We apply the amortization method for measurements of our MSR. MSR are assessed for impairment based on fair value at each reporting date. MSR impairment, if any, is recognized in a valuation allowance through charges to earnings as a component of fees and service charges. Subsequent increases in the fair value of impaired MSR are recognized only up to the amount of the previously recognized valuation allowance.

We assess impairment of our MSR based on the estimated fair value of those rights with any impairment recognized through a valuation allowance. The estimated fair value of the MSR is obtained through independent third party valuations through an analysis of future cash flows, incorporating estimates of assumptions market participants would use in determining fair value including market discount rates, prepayment speeds, servicing income, servicing costs, default rates and other market driven data, including the market's perception of future interest rate movements. The allowance is then adjusted in subsequent periods to reflect changes in the measurement of impairment. All assumptions are reviewed for reasonableness on a quarterly basis to ensure they reflect current and anticipated market conditions.

The fair value of MSR is highly sensitive to changes in assumptions. Changes in prepayment speed assumptions and discount rate generally have the most significant impact on the fair value of our MSR. Generally, as interest rates decline, mortgage loan prepayments accelerate due to increased refinance activity, which results in a decrease in the fair value of MSR. As interest rates rise, mortgage loan prepayments slow down, which results in an increase in the fair value of MSR. Thus, any measurement of the fair value of our MSR is limited by the conditions existing and the assumptions utilized as of a particular point in time, and those assumptions may not be appropriate if they are applied at a different point in time.

Core Deposit Premiums. Core deposit premiums represent the intangible value of depositor relationships assumed in purchase acquisitions and are amortized on an accelerated basis over 10 years. The Company periodically evaluates the value of core deposit premiums to ensure the carrying amount exceeds its implied fair value.

Stock-Based Compensation. We recognize the cost of employee services received in exchange for awards of equity instruments based on the grant-date fair value of those awards in accordance with ASC 718, “Compensation-Stock Compensation”.

We estimate the per share fair value of option grants on the date of grant using the Black-Scholes option pricing model using assumptions for the expected dividend yield, expected stock price volatility, risk-free interest rate and expected option term. These assumptions are subjective in nature, involve uncertainties and, therefore, cannot be determined with precision. The Black-Scholes option pricing model also contains certain inherent limitations when applied to options that are not traded on public markets.

The per share fair value of options is highly sensitive to changes in assumptions. In general, the per share fair value of options will move in the same direction as changes in the expected stock price volatility, risk-free interest rate and expected option term, and in the opposite direction as changes in the expected dividend yield. For example, the per share fair value of options will generally increase as expected stock price volatility increases, risk-free interest rate increases, expected option term increases and expected dividend yield decreases. The use of different assumptions or different option pricing models could result in materially different per share fair values of options.

Executive Summary

Investors Bancorp's fundamental business strategy is to be a well capitalized, full service, community bank which provides high quality customer service and competitively priced products and services to individuals and businesses in the communities we serve.

Our results of operations depend primarily on net interest income, which is directly impacted by the market interest rate environment. Net interest income is the difference between the interest income we earn on our interest-earning assets, primarily mortgage loans and investment securities, and the interest we pay on our interest-bearing liabilities, primarily interest-bearing transaction accounts, time deposits, and borrowed funds. Net interest income is affected by the level of interest rates, the shape

Table of Contents

of the market yield curve, the timing of the placement and the re-pricing of interest-earning assets and interest-bearing liabilities on our balance sheet, and the prepayment rate on our mortgage-related assets.

The continued low interest rate environment has resulted in our earning assets being refinanced at lower yields and new assets being originated at lower yields. The Company has been able to partially offset the yield compression by lowering the interest rates on our interest bearing liabilities. However, a steepening in the treasury curve during the quarter resulted in a reduction in mortgage refinance activity and an improvement in new loan origination yields. The Company continues to actively manage its interest rate risk as the current interest rate environment is forecasted to remain at current levels, with no increase in short-term rates likely until mid 2014. If this interest rate and steeper yield curve environment continue, the Company will likely be subject to near-term net interest income compression, but then may experience an improvement in net interest income, particularly if short-term interest rates remain unchanged as forecasted, and the Company's rates on interest bearing liabilities do not increase as quickly as interest rates on its earning assets. In addition, the current slow down in mortgage banking activity will result in lower gains on sales of loans in comparison to prior year results. The Company will continue to manage its interest rate risk. The Company's results of operations are also significantly affected by general economic conditions. There is still uncertainty with respect to government regulation, Affordable Health Care Act, budget deficits, debt levels and sluggish growth. The national and regional unemployment rates remain at elevated levels. These factors coupled with the weakness in the housing and real estate markets have resulted in the Company's prudent approach to credit quality, recognizing higher credit costs on the loan portfolio. Despite these conditions, our overall level of non-performing loans remains low compared to our national and regional peers. We attribute this to our conservative underwriting standards, as well as our diligence in resolving our problem loans.

We continue to grow and transform the composition of our balance sheet. For the nine months ended September 30, 2013, loans increased by \$1.1 billion or 10% as loan demand remains strong, especially in the multi-family lending area in New York City. Commercial loans represent approximately 55% of our loan portfolio, which has been a steady transformation since December 2009 when commercial loans were approximately 26% of total loans. Additionally, we remain focused on changing the deposit mix as core deposit accounts (savings, checking, and money market) of \$6.0 billion represent approximately 70% of total deposits as of September 30, 2013.

The Company is awaiting regulatory approval on the announced acquisitions of Roma Financial Corporation, with approximately \$1.7 billion in assets, as well as Gateway Community Financial Corp, with approximately \$303 million in assets. The Company has received approval of the proposed Roma transaction from the New Jersey Department of Banking and the FDIC in June, and is currently awaiting Federal Reserve approval. The geographic market areas of both Roma and Gateway have tremendous potential and expands our footprint from the suburbs of Philadelphia to the boroughs of New York and Long Island.

We continue to stay focused on the execution of our strategic business plan to become a premier commercial banking franchise headquartered in the New Jersey- New York region. The Company will continue to enhance shareholder value through its strategic capital initiatives, including growth both organically and through acquisitions, dividend payments, and a potential second step equity offering.

Comparison of Financial Condition at September 30, 2013 and December 31, 2012

Total Assets. Total assets increased by \$1.08 billion, or 8.5%, to \$13.81 billion at September 30, 2013 from \$12.72 billion at December 31, 2012. This increase was largely the result of net loans, including loans held for sale, increasing \$1.05 billion to \$11.38 billion at September 30, 2013 from \$10.34 billion at December 31, 2012.

Net Loans. Net loans, including loans held for sale, increased by \$1.05 billion, or 10.1%, to \$11.38 billion at September 30, 2013 from \$10.34 billion at December 31, 2012. At September 30, 2013, total loans were \$11.53 billion which included \$5.13 billion in residential loans, \$3.56 billion in multi-family loans, \$2.20 billion in commercial real estate loans, \$218.4 million in construction loans, \$224.0 million in consumer and other loans and \$195.2 million in commercial and industrial loans. For the nine months ended September 30, 2013, we originated \$980.7 million in multi-family loans, \$317.5 million in commercial real estate loans, \$158.6 million in commercial and industrial loans, \$60.2 million in consumer and other loans and \$50.5 million in construction loans. This increase in loans reflects our continued focus on generating multi-family and commercial real estate loans, which was partially

offset by pay downs and payoffs of loans. The loans we originate and purchase are on properties located primarily in New Jersey and New York.

We originate residential mortgage loans through our mortgage subsidiary, Investors Home Mortgage Co. For the nine months ended September 30, 2013, Investors Home Mortgage Co. originated \$1.27 billion in residential mortgage loans of which \$334.7 million were for sale to third party investors and \$933.3 million were added to our portfolio. We also purchased mortgage loans from correspondent entities including other banks and mortgage bankers. Our agreements with these correspondent entities require them to originate loans that adhere to our underwriting standards. During the nine months September 30, 2013, we purchased loans totaling \$793.2 million from these entities.

Table of Contents

The Company also originates interest-only one- to four-family mortgage loans in which the borrower makes only interest payments for the first five, seven or ten years of the mortgage loan term. This feature will result in future increases in the borrower's loan repayment when the contractually required repayments increase due to the required amortization of the principal amount. These payment increases could affect the borrower's ability to repay the loan. The amount of interest-only one- to four-family mortgage loans outstanding was \$348.9 million for both periods ended September 30, 2013 and December 31, 2012. The ability of borrowers to repay their obligations are dependent upon various factors including the borrowers' income and net worth, cash flows generated by the underlying collateral, value of the underlying collateral and priority of the Company's lien on the property. Such factors are dependent upon various economic conditions and individual circumstances beyond the Company's control. The Company is, therefore, subject to risk of loss. The Company maintains stricter underwriting criteria for these interest-only loans than it does for its amortizing loans. The Company believes these criteria adequately reduce the potential exposure to such risks and that adequate provisions for loan losses are provided for all known and inherent risks.

Our past due loans and non-accrual loans discussed below exclude certain purchased credit impaired (PCI) loans, primarily consisting of loans recorded in the acquisition of Marathon. Under U.S. GAAP, the PCI loans (acquired at a discount that is due, in part, to credit quality) are not subject to delinquency classification in the same manner as loans originated by Investors. The following table sets forth non-accrual loans and accruing past due loans (excluding PCI loans of \$3.2 million at September 30, 2013) on the dates indicated as well as certain asset quality ratios.

| | September 30, 2013 | | June 30, 2013 | | March 31, 2013 | | December 31, 2012 | | September 30, 2012 | |

| Non-accrual loans to total loans | | 0.95 % | | 1.05 % | | 1.28 % | | 1.16 % | | 1.28 % |
| Allowance for loan loss as a percent of non-accrual loans | | 152.18 % | | 134.90 % | | 110.21 % | | 117.92 % | | 108.79 % |
| | | 1.45 % | | 1.40 % | | 1.41 % | | 1.36 % | | 1.39 % |

Allowance
for loan loss
as a percent
of total loans

Total non-accrual loans decreased by \$11.0 million to \$109.6 million at September 30, 2013 compared to \$120.6 million at December 31, 2012 as we continue to diligently resolve our troubled loans. Our allowance for loan loss as a percent of total loans is 1.45%. At September 30, 2013, there were \$50.6 million of loans deemed troubled debt restructuring, of which \$24.5 million were accruing and \$26.1 million were on non-accrual.

In addition to non-accrual loans we continue to monitor our portfolio for potential problem loans. Potential problem loans are defined as loans about which we have concerns as to the ability of the borrower to comply with the present loan repayment terms and which may cause the loan to be placed on non-accrual status. As of September 30, 2013, there was 4 commercial real

48

Table of Contents

estate loans in the amount of \$3.4 million, 6 multi-family loans in the amount of \$12.9 million and 3 commercial and industrial loans totaling \$538,000 that the Company has deemed as potential problem loans. Management is actively monitoring these loans.

The ratio of non-accrual loans to total loans was 0.95% at September 30, 2013 compared to 1.16% at December 31, 2012. The allowance for loan losses as a percentage of non-accrual loans was 152.18% at September 30, 2013 compared to 117.92% at December 31, 2012. At September 30, 2013, our allowance for loan losses as a percentage of total loans was 1.45% compared to 1.36% at December 31, 2012.

At September 30, 2013, loans meeting the Company's definition of an impaired loan were primarily collateral-dependent loans and totaled \$67.4 million of which \$15.9 million of impaired loans had a specific allowance for credit losses of \$2.1 million and \$51.5 million of impaired loans had no specific allowance for credit losses. At December 31, 2012, loans meeting the Company's definition of an impaired loan were primarily collateral dependent and totaled \$57.4 million, of which \$10.8 million of impaired loans had a related allowance for credit losses of \$2.1 million and \$46.6 million of impaired loans had no related allowance for credit losses.

At September 30, 2013, there were 18 commercial loans totaling \$30.9 million and 58 residential loans totaling \$19.7 million which are deemed troubled debt restructurings. At September 30, 2013, there were 8 of the commercial loans totaling \$14.8 million and 32 of the residential loans totaling \$11.4 million included in non-accrual loans.

The following table sets forth the allowance for loan losses at September 30, 2013 and December 31, 2012 allocated by loan category and the percent of loans in each category to total loans at the dates indicated. The allowance for loan losses allocated to each category is not necessarily indicative of future losses in any particular category and does not restrict the use of the allowance to absorb losses in other categories.

| Consumer and other loans | 2,150 | 1.94 | % 2,086 | 2.29 | % |
| Unallocated | 14,484 | — | 11,361 | — | |
| Total allowance | \$166,779 | 100.00 | % \$142,172 | 100.00 | % |

The allowance for loan losses increased by \$24.6 million to \$166.8 million at September 30, 2013 from \$142.2 million at December 31, 2012. The increase in our allowance for loan losses is due to the growth of the loan portfolio and the increased credit risk in our overall portfolio, particularly the inherent credit risk associated with commercial real estate lending.

Future increases in the allowance for loan losses may be necessary based on the growth and composition of the loan portfolio, the level of loan delinquency and the impact of the deterioration of the real estate and economic environments in our lending area. Although we use the best information available, the level of allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. See "Critical Accounting Policies."

Edgar Filing: Investors Bancorp Inc - Form 10-Q

Securities. Securities, in the aggregate, decreased by \$77.8 million, or 5.0%, to \$1.49 billion at September 30, 2013. The decrease in the portfolio was primarily due to normal pay downs or maturities during the nine months ended September 30, 2013 and the decrease in fair value of available for sale securities of \$19.0 million from December 31, 2012. During the second quarter of 2013, the Company reclassified \$524.0 million of securities available for sale to securities held to maturity as the Company has the intent and ability to hold these securities until maturity.

Table of Contents

Goodwill, Stock in the Federal Home Loan Bank, Bank Owned Life Insurance. At September 30, 2013 and December 31, 2012, goodwill was \$77.3 million and \$77.1 million. The amount of stock we own in the Federal Home Loan Bank of New York ("FHLB") increased \$42.4 million from \$150.5 million at December 31, 2012 to \$192.9 million at September 30, 2013 as a result of an increase in our level of borrowings. Bank owned life insurance was \$116.1 million at September 30, 2013 compared to \$113.9 million at December 31, 2012.

Deposits. Deposits decreased by \$126.5 million or 1.4% from \$8.77 billion at December 31, 2012 to \$8.64 billion at September 30, 2013. This was attributed to a decrease in certificates of deposit of \$346.6 million, offset by an increase in core deposits of \$220.1 million or 3.8%. Core deposits represents approximately 70% of our total deposit portfolio.

Borrowed Funds. Borrowed funds increased \$1.09 billion, or 40.3%, to \$3.80 billion at September 30, 2013 from \$2.71 billion at December 31, 2012 due to the funding of our asset growth.

Stockholders' Equity. Stockholders' equity increased \$59.8 million to \$1.13 billion at September 30, 2013 from \$1.07 billion at December 31, 2012. The increase is primarily attributed to the \$84.5 million of net income for the nine months ended September 30, 2013 offset by a \$16.3 million increase to other comprehensive loss primarily attributed to the decrease in value of available for sale securities for the nine months ended September 30, 2013. Stockholders' equity was also impacted by \$0.15 per common share of a cash dividend for the nine month period that resulted in a decrease of \$16.8 million.

Average Balance Sheets for the Three and Nine Months ended September 30, 2013 and 2012

The following tables present certain information regarding Investors Bancorp, Inc.'s financial condition and net interest income for the three and nine months ended September 30, 2013 and 2012. The tables present the annualized average yield on interest-earning assets and the annualized average cost of interest-bearing liabilities. We derived the yields and costs by dividing annualized income or expense by the average balance of interest-earning assets and interest-bearing liabilities, respectively, for the periods shown. We derived average balances from daily balances over the periods indicated. Interest income includes fees that we consider adjustments to yields.

(1) Securities available-for-sale are stated at amortized cost, adjusted for unamortized purchased premiums and discounts.

(2) Net interest rate spread represents the difference between the yield on average interest-earning assets and the cost of average interest-bearing liabilities.

(3) Net interest-earning assets represent total interest-earning assets less total interest-bearing liabilities.

(4) Net interest margin represents net interest income divided by average total interest-earning assets.

Comparison of Operating Results for the Three and Nine Months Ended September 30, 2013 and 2012

Net Income. The net income for the three months ended September 30, 2013 was \$29.3 million compared to net income of \$24.5 million for the three months ended September 30, 2012. Net income for the nine months ended September 30, 2013 was \$84.5 million compared to net income of \$67.4 million for the nine months ended September 30, 2012.

Net Interest Income. Net interest income increased by \$18.5 million, or 20.1%, to \$110.4 million for the three months ended September 30, 2013 from \$91.9 million for the three months ended September 30, 2012. The increase was primarily due to the average balance of interest earning assets increasing \$2.09 billion to \$13.06 billion at

Edgar Filing: Investors Bancorp Inc - Form 10-Q

September 30, 2013 compared to \$10.98 billion at September 30, 2012, as well as a 28 basis point decrease in our cost of interest-bearing liabilities to 0.95% for the three months ended September 30, 2013 from 1.23% for the three months ended September 30, 2012. These were partially offset by the average balance of our interest bearing liabilities increasing \$1.60 billion to \$11.36 billion at September 30, 2013 compared

52

Table of Contents

to \$9.75 billion at September 30, 2012, as well as the yield on our interest-earning assets decreasing 23 basis points to 4.21% for the three months ended September 30, 2013 from 4.44% for the three months ended September 30, 2012. The net interest spread increased by 5 basis points to 3.26% for the three months ended September 30, 2013 from 3.21% for the three months ended September 30, 2012 as the yield on interest earning assets declined 23 basis points while the yield of interest bearing liabilities declined 28 basis points.

Net interest income increased by \$45.9 million, or 16.9%, to \$317.2 million for the nine months ended September 30, 2013 from \$271.2 million for the nine months ended September 30, 2012. The increase was primarily due to the average balance of interest earning assets increasing \$1.82 billion to \$12.59 billion at September 30, 2013 compared to \$10.76 billion at September 30, 2012, as well as a 32 basis point decrease in our cost of interest-bearing liabilities to 1.00% for the nine months ended September 30, 2013 from 1.32% for the nine months ended September 30, 2012. These were partially offset by the average balance of our interest bearing liabilities increasing \$1.36 billion to \$10.95 billion at September 30, 2013 compared to \$9.60 billion at September 30, 2012, as well as the yield on our interest-earning assets decreasing 30 basis points to 4.23% for the nine months ended September 30, 2013 from 4.53% for the nine months ended September 30, 2012. The net interest spread increased by 1 basis point to 3.23% for the nine months ended September 30, 2013 from 3.22% for the nine months ended September 30, 2012.

Interest and Dividend Income. Total interest and dividend income increased by \$15.5 million, or 12.7%, to \$137.4 million for the three months ended September 30, 2013 from \$121.9 million for the three months ended September 30, 2012. This increase is attributed to the average balance of interest-earning assets increasing \$2.09 billion or 19.0%, to \$13.06 billion for the three months ended September 30, 2013 from \$10.98 billion for the three months ended September 30, 2012 due to organic growth and acquisitions. This was partially offset by the weighted average yield on interest-earning assets decreasing 23 basis points to 4.21% for the three months ended September 30, 2013 compared to 4.44% for the three months ended September 30, 2012.

Interest income on loans increased by \$15.3 million, or 13.7%, to \$127.2 million for the three months ended September 30, 2013 from \$111.9 million for the three months ended September 30, 2012, reflecting a \$1.96 billion or 21.2%, increase in the average balance of net loans to \$11.23 billion for the three months ended September 30, 2013 from \$9.27 billion for the three months ended September 30, 2012. The increase is primarily attributed to the average balance of multi-family loans and commercial real estate loans increasing \$1.22 billion and \$622.4 million, respectively as we continue to focus on diversifying our loan portfolio by adding more multi-family loans and commercial real estate loans. Additionally, the average balance of residential loans increased by \$114.4 million, commercial and industrial loans increased by \$64.0 million, while construction loans decreased \$24.1 million for the three months ended September 30, 2013. The increase also reflects \$4.1 million in loan prepayment fees recorded in interest income for the three months ended September 30, 2013 compared to \$2.1 million for the three months ended September 30, 2012. The increase was partially offset by a 30 basis point decrease in the average yield on net loans to 4.53% for the three months ended September 30, 2013 from 4.83% for the three months ended September 30, 2012, as lower rates on new and refinanced loans reflect the current interest rate environment.

Interest income on all other interest-earning assets, excluding loans, increased by \$245,000 or 2.5%, to \$10.2 million for the three months ended September 30, 2013 from \$10.0 million for the three months ended September 30, 2012. Income from Federal Home Loan Bank Stock increased by \$228,000 or 16.1% for the three months ended September 30, 2013. The weighted average yield on interest-earning assets, excluding loans, decreased by 11 basis points to 2.23% for the three months ended September 30, 2013 compared to 2.34% for the three months ended September 30, 2012 reflecting the lower interest rate environment. This was partially offset by a \$126.7 million increase in the average balance of all other interest-earning assets, excluding loans, to \$1.83 billion for the three months ended September 30, 2013 from \$1.70 billion for the three months ended September 30, 2012.

Total interest and dividend income increased by \$33.0 million, or 9.0%, to \$399.0 million for the nine months ended September 30, 2013 from \$366.0 million for the nine months ended September 30, 2012. This increase is attributed to

the average balance of interest-earning assets increasing \$1.82 billion, or 16.9%, to \$12.59 billion for the nine months ended September 30, 2013 from \$10.76 billion for the nine months ended September 30, 2012. This was partially offset by the weighted average yield on interest-earning assets decreasing 30 basis points to 4.23% for the nine months ended September 30, 2013 compared to 4.53% for the nine months ended September 30, 2012.

Interest income on loans increased by \$35.2 million, or 10.5%, to \$369.7 million for the nine months ended September 30, 2013 from \$334.4 million for the nine months ended September 30, 2012, reflecting an \$1.69 billion, or 18.6%, increase in the average balance of net loans to \$10.77 billion for the nine months ended September 30, 2013 from \$9.08 billion for the nine months ended September 30, 2012. The increase is primarily attributed to the average balance of multi-family loans, commercial real estate loans and commercial and industrial loans increasing \$1.21 billion, \$578.3 million and \$55.6 million respectively, as we continue to focus on diversifying our loan portfolio by adding more multi-family loans and commercial real estate loans. In addition, we recorded \$10.8 million in loan prepayment penalties in interest income for the nine months ended September 30, 2013 compared

Table of Contents

to \$5.4 million for the nine months ended September 30, 2012. This was partially offset by a 33 basis point decrease in the average yield on net loans to 4.58% for the nine months ended September 30, 2013 from 4.91% for the nine months ended September 30, 2012, as lower rates on new and refinanced loans reflect the current interest rate environment.

Interest income on all other interest-earning assets, excluding loans, decreased by \$2.2 million, or 7.1%, to \$29.3 million for the nine months ended September 30, 2013 from \$31.6 million for the nine months ended September 30, 2012. This decrease reflected the weighted average yield on interest-earning assets, excluding loans, decreasing by 35 basis points to 2.15% for the nine months ended September 30, 2013 compared to 2.50% for the nine months ended September 30, 2012 reflecting the current interest rate environment. This was partially offset by a \$132.8 million increase in the average balance of all other interest-earning assets, excluding loans, to \$1.82 billion for the nine months ended September 30, 2013 from \$1.69 billion for the nine months ended September 30, 2012.

Interest Expense. Total interest expense decreased by \$3.0 million, or 9.9%, to \$27.0 million for the three months ended September 30, 2013 from \$29.9 million for the three months ended September 30, 2012. This decrease is attributed to the weighted average cost of total interest-bearing liabilities decreasing 28 basis points to 0.95% for the three months ended September 30, 2013 compared to 1.23% for the three months ended September 30, 2012. This was partially offset by the average balance of total interest-bearing liabilities increasing by \$1.60 billion, or 16.5%, to \$11.36 billion for the three months ended September 30, 2013 from \$9.75 billion for the three months ended September 30, 2012.

Interest expense on interest-bearing deposits decreased \$3.2 million, or 21.2% to \$11.7 million for the three months ended September 30, 2013 from \$14.9 million for the three months ended September 30, 2012. This decrease is attributed to a 20 basis point decrease in the average cost of interest-bearing deposits to 0.60% for the three months ended September 30, 2013 from 0.80% for the three months ended September 30, 2012 as deposit rates reflect the lower interest rate environment. This was partially offset by the average balance of total interest-bearing deposits increasing \$337.5 million, or 4.5% to \$7.76 billion for the three months ended September 30, 2013 from \$7.42 billion for the three months ended September 30, 2012. Average balances of core deposit accounts increased \$636.3 million over the prior year period.

Interest expense on borrowed funds increased by \$187,000 or 1.2%, to \$15.2 million for the three months ended September 30, 2013 from \$15.1 million for the three months ended September 30, 2012. This increase is attributed to the average balance of borrowed funds increasing \$1.27 billion or 54.3%, to \$3.60 billion for the three months ended September 30, 2013 from \$2.33 billion for the three months ended September 30, 2012. This increase was partially offset by a 89 basis points decrease to the average cost of borrowings to 1.69% for the three months ended September 30, 2013 from 2.58% for the three months ended September 30, 2012 as maturing and new borrowings repriced to lower interest rates.

Total interest expense decreased by \$13.0 million, or 13.7%, to \$81.9 million for the nine months ended September 30, 2013 from \$94.8 million for the nine months ended September 30, 2012. This decrease is attributed to the weighted average cost of total interest-bearing liabilities decreasing 32 basis points to 1.00% for the nine months ended September 30, 2013 compared to 1.32% for the nine months ended September 30, 2012. This was partially offset by the average balance of total interest-bearing liabilities increasing by \$1.36 billion, or 14.1%, to \$10.95 billion for the nine months ended September 30, 2013 from \$9.60 billion for the nine months ended September 30, 2012.

Interest expense on interest-bearing deposits decreased \$13.0 million, or 26.1% to \$36.7 million for the nine months ended September 30, 2013 from \$49.6 million for the nine months ended September 30, 2012. This decrease is attributed to a 28 basis point decrease in the average cost of interest-bearing deposits to 0.62% for the nine months ended September 30, 2013 from 0.90% for the nine months ended September 30, 2012 as deposit rates reflect the

lower interest rate environment. This was partially offset by the average balance of total interest-bearing deposits increasing \$475.8 million, or 6.4% to \$7.85 billion for the nine months ended September 30, 2013 from \$7.38 billion for the nine months ended September 30, 2012. Average balances of core deposit accounts increased \$867.6 million for the nine months ended September 30, 2013 over the prior year period.

Interest expense on borrowed funds remained flat at \$45.2 million for the nine months ended September 30, 2013 and September 30, 2012. Although the expense was consistent for both periods, the average cost of borrowed funds decreased by 77 basis points to 1.94% for the nine months ended September 30, 2013 from 2.71% for the nine months ended September 30, 2012 as maturing and new borrowings repriced to current interest rates, while the average balance of borrowed funds increased by \$882.1 million or 39.7%, to \$3.10 billion for the nine months ended September 30, 2013 from \$2.22 billion for the nine months ended September 30, 2012.

Provision for Loan Losses. Our provision for loan losses was \$13.8 million for the three months ended September 30, 2013 compared to \$16.0 million for the three months ended September 30, 2012. For the three months ended September 30, 2013, net charge-offs were \$1.4 million compared to \$13.2 million for the three months ended September 30, 2012. For the nine months

Table of Contents

ended September 30, 2013, our provision for loan losses was \$41.3 million compared to \$48.0 million for the nine months ended September 30, 2012. For the nine months ended September 30, 2013, net charge-offs were \$16.6 million compared to \$34.0 million for the nine months ended September 30, 2012. Included in the three and nine months ended September 30, 2012 is a \$6.2 million charge off pertaining to an additional write down of residential loans in the process of foreclosure as a result of further deterioration in real estate values due to the extended period of time it was taking to obtain possession of properties collateralizing these loans. Our provision for the three and nine months ended September 30, 2013 is a result of continued growth in the loan portfolio, specifically the multi-family and commercial real estate portfolios and commercial and industrial; the inherent credit risk in our overall portfolio, particularly the credit risk associated with commercial real estate lending and commercial and industrial lending; the level of non-performing loans and delinquent loans caused by the adverse economic and real estate conditions in our lending area. See discussion of the allowance for loan losses and non-accrual loans in “Comparison of Financial Condition at September 30, 2013 and December 31, 2012.”

Non-Interest Income. Total non-interest income decreased by \$3.2 million, or 25.3% to \$9.5 million for the three months ended September 30, 2013 from \$12.7 million for the three months ended September 30, 2012. The decrease is primarily attributed to the gain on the sale of loans decreasing \$5.0 million to \$2.2 million for the three months ended September 30, 2013 as compared to \$7.2 million for the three months ended September 30, 2012 due to lower volume of sales in the secondary market at slightly lower margins. The recent increase in long-term interest rates has reduced loan refinancing. This has impacted our gains on sale of loans and is projected to continue into 2014. Gain on securities transactions decreased by \$240,000 for the three months ended September 30, 2013. These decreases were offset by increases to fees and service charges of \$1.4 million which included a \$446,000 reversal of a previously established valuation reserve on mortgage servicing rights, and net gains on sales of other real estate owned of \$277,000. In addition, other income increased by \$281,000 as a result of income on non-deposit investment products.

Total non-interest income decreased by \$4.5 million, or 13.4% to \$29.1 million for the nine months ended September 30, 2013 from \$33.6 million for the nine months ended September 30, 2012. The decrease is primarily attributed to the gain on the sale of loans decreasing \$8.6 million to \$7.3 million for the nine months ended September 30, 2013 as compared to \$15.9 million for the nine months ended September 30, 2012 due to lower volume of sales in the secondary market at slightly lower margins. This decrease was offset by increases to fees and service charges of \$1.6 million which included a \$1.6 million reversal of a previously established valuation reserve on mortgage servicing rights, \$420,000 on gains from securities sold during the nine months ended September 30, 2013 and net gains on sale of other real estate owned of \$810,000. Other income increased by \$970,000 as a result of income on non-deposit investment products.

Non-Interest Expenses. Total non-interest expenses increased by \$12.6 million, or 26.2%, to \$60.8 million for the three months ended September 30, 2013 from \$48.2 million for the three months ended September 30, 2012. Compensation and fringe benefits increased \$6.4 million for the three months ended September 30, 2013 primarily as a result of the staff additions to support our continued growth, a \$1.8 million one time charge related to medical insurance, as well as normal merit increases. Professional fees increased \$1.1 million for the three months ended September 30, 2013 attributed to increased legal and consulting services for the period. The Company has continued to increase its branch network and enter new markets through acquisitions as well as organic growth. As a result, there has been an increase in occupancy expense, data processing fees and advertising of \$2.5 million, \$1.4 million and \$171,000, respectively for the three months ended September 30, 2013. In addition, occupancy expense for the three months ended September 30, 2013 includes approximately \$1.0 million for the early termination of certain leased facilities. Other operating expense also increased \$508,000 for the three months ended September 30, 2013 related to higher recruiting, training and insurance expenses. FDIC insurance premium increased by \$330,000 for the three months ended September 30, 2013 compared to September 30, 2012.

Total non-interest expenses increased by \$26.3 million, or 17.8%, to \$173.9 million for the nine months ended September 30, 2013 from \$147.5 million for the nine months ended September 30, 2012. Compensation and fringe benefits increased \$14.2 million for the nine months ended September 30, 2013 primarily as a result of the staff

additions to support our continued growth including employees from the acquisition of Marathon Bank in the fourth quarter of 2012, a \$1.8 million one time charge related to medical insurance, as well as normal merit increases. The Company has continued to increase its branch network and enter new markets through acquisitions as well as organic growth. As a result, there has been an increase to occupancy expense, data processing service fees and advertising expense of \$3.8 million, \$1.2 million and \$940,000 for the nine months ended September 30, 2013. For the nine months ended September 30, 2013, occupancy expense includes approximately \$1.0 million for the early termination of certain leased facilities. In addition, our FDIC insurance premium increased by \$3.7 million for the nine months ended September 30, 2013 as compared to the nine months ended September 30, 2012. This increase is a result of the FDIC final rules for determining deposit insurance assessment, effective March 1, 2013. Other operating expense increased by \$1.8 million for the nine months ended September 30, 2013 related to higher recruiting, training and insurance expenses. The nine months ended September 30, 2012 included \$6.1 million in one time charges associated with the acquisition of Brooklyn Federal as well as \$3.0 million for the early termination of certain leased facilities.

Table of Contents

Income Tax Expense. Income tax expense was \$16.1 million for the three months ended September 30, 2013, representing a 35.41% effective tax rate compared to income tax expense of \$15.9 million for the three months ended September 30, 2012 representing a 39.42% effective tax rate.

Income tax expense was \$46.7 million for the nine months ended September 30, 2013, representing a 35.57% effective tax rate compared to income tax expense of \$41.9 million for the nine months ended September 30, 2012 representing a 38.35% effective tax rate.

Liquidity and Capital Resources

The Company's primary sources of funds are deposits, principal and interest payments on loans and mortgage-backed securities, proceeds from the sale of loans, FHLB and other borrowings and, to a lesser extent, investment maturities. While scheduled amortization of loans is a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates, economic conditions and competition. The Company has other sources of liquidity if a need for additional funds arises, including unsecured overnight lines of credit and other borrowings from the FHLB and other correspondent banks.

At September 30, 2013, the Company had overnight borrowings outstanding with FHLB of \$616.0 million compared to \$373.5 million at December 31, 2012. The Company utilizes overnight borrowings from time to time to fund short-term liquidity needs. The Company had total borrowings of \$3.80 billion at September 30, 2013, an increase from \$2.70 billion at December 31, 2012.

In the normal course of business, the Company routinely enters into various commitments, primarily relating to the origination of loans. At September 30, 2013, outstanding commitments to originate loans totaled \$793.4 million; outstanding unused lines of credit totaled \$535.7 million; standby letters of credit totaled \$19.6 million and outstanding commitments to sell loans totaled \$15.5 million. The Company expects to have sufficient funds available to meet current commitments in the normal course of business. Time deposits scheduled to mature in one year or less totaled \$1.58 billion at September 30, 2013. Based upon historical experience, management estimates that a significant portion of such deposits will remain with the Company.

The Board of Directors approved a fourth share repurchase program at their January 2011 meeting, which authorizes the repurchase of an additional 10% of the Company's outstanding common stock. The fourth share repurchase program commenced immediately upon completion of the third program. Under this program, up to 10% of its publicly-held outstanding shares of common stock, or 3,876,523 shares of Investors Bancorp, Inc. common stock may be purchased in the open market and through other privately negotiated transactions in accordance with applicable federal securities laws. During the three months period ended September 30, 2013, the Company did not repurchase any shares of its common stock. Under the current share repurchase program, 2,111,597 shares remain available for repurchase. At September 30, 2013, a total of 16,652,720 shares have been purchased under Board authorized share repurchase programs, of which 3,412,701 shares were allocated to fund the restricted stock portion of the Company's 2006 Equity Incentive Plan. The remaining shares are held for general corporate use.

As of September 30, 2013, the Bank exceeded all regulatory capital requirements as follows:

| | September 30, 2013 | | Required Amount | Ratio | |
|--|------------------------|-------|--------------------|-------|---|
| | Actual Amount | Ratio | | | |
| | (Dollars in thousands) | | | | |
| Total capital (to risk-weighted assets) | \$1,116,056 | 11.1 | % \$805,857 | 8.0 | % |
| Tier I capital (to risk-weighted assets) | 989,636 | 9.8 | 402,928 | 4.0 | |
| Tier I capital (to average assets) | 989,636 | 7.3 | 540,044 | 4.0 | |

In July 2013, the Federal Deposit Insurance Corporation and the other federal bank regulatory agencies issued a final rule that will revise their leverage and risk-based capital requirements and the method for calculating risk-weighted

assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. Among other things, the rule establishes a new common equity Tier 1 minimum capital requirement (4.5% of risk-weighted assets), increases the minimum Tier 1 capital to risk-based assets requirement (from 4% to 6% of risk-weighted assets) and assigns a higher risk weight (150%) to exposures that are more than 90 days past due or are on non-accrual status and to certain commercial real estate facilities that finance the acquisition, development or construction of real property. The final rule also requires unrealized gains and losses on certain “available-for-sale” securities holdings to be included for purposes of

Table of Contents

calculating regulatory capital unless a one-time opt-out is exercised. Additional constraints will also be imposed on the inclusion in regulatory capital of mortgage-servicing assets, deferred tax assets and certain minority interests. The rule limits a banking organization's capital distributions and certain discretionary bonus payments to executive officers if the banking organization does not hold a "capital conservation buffer" consisting of 2.5% of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements. The final rule becomes effective for the Bank on January 1, 2015. The capital conservation buffer requirement will be phased in beginning January 1, 2016 and ending January 1, 2019, when the full capital conservation buffer requirement will be effective.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with U.S. generally accepted accounting principles, are not recorded in the financial statements. These transactions primarily relate to debt obligations and lending commitments.

The following table shows the contractual obligations of the Company by expected payment period as of September 30, 2013:

| Contractual Obligations | Total | Less than One Year | One-Two Years | Two-Three Years | More than Three Years |
|---|----------------|-----------------------|------------------|--------------------|--------------------------|
| | (in thousands) | | | | |
| Debt obligations (excluding capitalized leases) | \$3,796,112 | 1,738,000 | 328,000 | 225,000 | 1,505,112 |
| Commitments to originate and purchase loans | \$793,444 | 793,444 | — | — | — |
| Commitments to sell loans | \$15,455 | 15,455 | — | — | — |

Debt obligations include borrowings from the FHLB and other borrowings. The borrowings have defined terms and, under certain circumstances, \$50.0 million of the borrowings are callable at the option of the lender.

Additionally, at September 30, 2013, the Company's commitments to fund unused lines of credit totaled \$535.7 million. Commitments to originate loans and commitments to fund unused lines of credit are agreements to lend additional funds to customers as long as there have been no violations of any of the conditions established in the agreements. Commitments generally have a fixed expiration or other termination clauses which may or may not require a payment of a fee. Since some of these loan commitments are expected to expire without being drawn upon, total commitments do not necessarily represent future cash requirements.

In addition to the contractual obligations previously discussed, we have other liabilities which includes capitalized and operating lease obligations. These contractual obligations as of September 30, 2013, have not changed significantly from December 31, 2012.

In the normal course of business the Company sells residential mortgage loans to third parties. These loan sales are subject to customary representations and warranties. In the event that we are found to be in breach of these representations and warranties, we may be obligated to repurchase certain of these loans.

For further information regarding our off-balance sheet arrangements and contractual obligations, see Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in our December 31, 2012 Annual Report on Form 10-K.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Qualitative Analysis. We believe one significant form of market risk is interest rate risk. Interest rate risk results from timing differences in the maturity or re-pricing of our assets, liabilities and off-balance sheet contracts (i.e., loan commitments); the effect of loan prepayments, deposits and withdrawals; the difference in the behavior of lending and funding rates arising from the uses of different indices; and "yield curve risk" arising from changing interest rate relationships across the spectrum of maturities for constant or variable credit risk investments. Besides directly affecting our net interest income, changes in market interest rates can also affect the amount of new loan originations,

the ability of borrowers to repay variable rate loans, the volume of loan prepayments and refinancings, the carrying value of securities classified as available for sale and the mix and flow of deposits.

57

Table of Contents

The general objective of our interest rate risk management is to determine the appropriate level of risk given our business model and then manage that risk in a manner consistent with our policy to reduce, to the extent possible, the exposure of our net interest income to changes in market interest rates. Our Asset Liability Committee, which consists of senior management, evaluates the interest rate risk inherent in certain assets and liabilities, our operating environment and capital and liquidity requirements and modifies our lending, investing and deposit gathering strategies accordingly. On a quarterly basis, our Board of Directors reviews the Asset Liability Committee report, the aforementioned activities and strategies, the estimated effect of those strategies on our net interest margin and the estimated effect that changes in market interest rates may have on the economic value of our loan and securities portfolios, as well as the intrinsic value of our deposits and borrowings.

We actively evaluate interest rate risk in connection with our lending, investing and deposit activities. Historically, our lending activities have emphasized one- to four-family fixed- and variable- rate first mortgages. Our variable-rate mortgage related assets have helped to reduce our exposure to interest rate fluctuations and is expected to benefit our long-term profitability, as the rate earned in the mortgage loans will increase as prevailing market rates increase. However, the current interest rate environment, and the preferences of our customers, has resulted in more of a demand for fixed-rate products. This may adversely impact our net interest income, particularly in a rising rate environment. To help manage our interest rate risk, we have increased our focus on the origination of commercial real estate mortgage loans, particularly multi-family loans, as these loan types may reduce our interest rate risk due to their shorter repricing term compared to fixed rate residential mortgage loans. In addition, we primarily invest in shorter-to-medium duration securities, which generally have shorter average lives and lower yields compared to longer term securities. Shortening the average lives of our securities, along with originating more adjustable-rate mortgages and commercial real estate mortgages, will help to reduce interest rate risk.

We retain an independent, nationally recognized consulting firm who specializes in asset and liability management to complete our quarterly interest rate risk reports. We also retain a second nationally recognized consulting firm to prepare independently comparable interest rate risk reports for the purpose of validation. Both firms use a combination of analyses to monitor our exposure to changes in interest rates. The economic value of equity analysis is a model that estimates the change in net portfolio value (“NPV”) over a range of immediately changed interest rate scenarios. NPV is the discounted present value of expected cash flows from assets, liabilities, and off-balance sheet contracts. In calculating changes in NPV, assumptions estimating loan prepayment rates, reinvestment rates and deposit decay rates that seem most likely based on historical experience during prior interest rate changes are used.

The net interest income analysis uses data derived from an asset and liability analysis, described below, and applies several additional elements, including actual interest rate indices and margins, contractual limitations and the U.S. Treasury yield curve as of the balance sheet date. In addition we apply consistent parallel yield curve shifts (in both directions) to determine possible changes in net interest income if the theoretical yield curve shifts occurred gradually. Net interest income analysis also adjusts the asset and liability repricing analysis based on changes in prepayment rates resulting from the parallel yield curve shifts.

Our asset and liability analysis determines the relative balance between the repricing of assets and liabilities over multiple periods of time (ranging from overnight to five years). This asset and liability analysis includes expected cash flows from loans and mortgage-backed securities, applying prepayment rates based on the differential between the current interest rate and the market interest rate for each loan and security type. This analysis identifies mismatches in the timing of asset and liability but does not necessarily provide an accurate indicator of interest rate risk because the assumptions used in the analysis may not reflect the actual response to market changes.

Table of Contents

Quantitative Analysis. The table below sets forth, as of September 30, 2013, the estimated changes in our NPV and our net interest income that would result from the designated changes in interest rates. Such changes to interest rates are calculated as an immediate and permanent change for the purposes of computing NPV and a gradual change over a one year period for the purposes of computing net interest income. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions including relative levels of market interest rates, loan prepayments and deposit decay, and should not be relied upon as indicative of actual results. We did not estimate changes in NPV or net interest income for an interest rate decrease of greater than 100 basis points or increase of greater than 200 basis points.

| Change in Interest Rates (basis points)(1) | Net Portfolio Value(2) | | | Net Interest Income | | |
|--|------------------------|-------------------------------|----------|----------------------------------|-------------------------------|---------|
| | Estimated NPV | Estimated Increase (Decrease) | | Estimated Net Interest Income(3) | Estimated Increase (Decrease) | |
| | | Amount | Percent | | Amount | Percent |
| | (Dollars in thousands) | | | | | |
| + 200bp | \$980,808 | (200,780) | (17.0)% | \$388,306 | (33,900) | (8.0)% |
| 0bp | \$1,181,588 | — | — | \$422,206 | | |
| -100bp | \$1,128,075 | (53,513) | (4.5)% | \$426,326 | 4,120 | 1.0 % |

(1) Assumes an instantaneous and parallel shift in interest rates at all maturities.

(2) NPV is the discounted present value of expected cash flows from assets, liabilities and off-balance sheet contracts.

(3) Assumes a gradual change in interest rates over a one year period at all maturities.

The table set forth above indicates at September 30, 2013, in the event of a 200 basis points increase in interest rates, we would be expected to experience a 17.0% decrease in NPV and a \$33.9 million, or 8.0%, decrease in net interest income. In the event of a 100 basis points decrease in interest rates, we would be expected to experience a 4.5% decrease in NPV and a \$4.1 million, or 1.0%, increase in net interest income. These data do not reflect any future actions we may take in response to changes in interest rates, such as changing the mix of our assets and liabilities, which could change the results of the NPV and net interest income calculations.

As mentioned above, we retain two nationally recognized firms to compute our quarterly interest rate risk reports. Certain shortcomings are inherent in any methodology used in the above interest rate risk measurements. Modeling changes in NPV and net interest income require certain assumptions that may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. The NPV and net interest income table presented above assumes the composition of our interest-rate sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and, accordingly, the data do not reflect any actions we may take in response to changes in interest rates. The table also assumes a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or the repricing characteristics of specific assets and liabilities. Accordingly, although the NPV and net interest income table provide an indication of our sensitivity to interest rate changes at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effects of changes in market interest rates on our NPV and net interest income.

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our Principal Executive Officer and Principal Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, the Principal Executive Officer and Principal Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

There were no changes in our internal control over financial reporting that occurred during the quarter ended September 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control

over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

59

Table of Contents

The Company and its subsidiaries are subject to various legal actions arising in the normal course of business. In the opinion of management, the resolution of these legal actions is not expected to have a material adverse effect on the Company's financial condition or results of operations.

Item 1A. Risk Factors

There have been no material changes in the "Risk Factors" disclosed in the Company's December 31, 2012 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On March 1, 2011, the Company announced its fourth Share Repurchase Program, which authorized the purchase of an additional 10% of its publicly-held outstanding shares of common stock, or 3,876,523 million shares. This stock repurchase program commenced upon the completion of the third program on July 25, 2011. This program has no expiration date and has 2,111,597 shares yet to be purchased as of September 30, 2013. There were no repurchase of our common stock during the third quarter 2013.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

Not applicable.

Item 6. Exhibits

The following exhibits are either filed as part of this report or are incorporated herein by reference:

- 3.1 Certificate of Incorporation of Investors Bancorp, Inc.*
- 3.2 Bylaws of Investors Bancorp, Inc.*
- 4 Form of Common Stock Certificate of Investors Bancorp, Inc.*
- 10.1 Form of Employment Agreement between Investors Bancorp, Inc. and certain executive officers*
- 10.2 Form of Change in Control Agreement between Investors Bancorp, Inc. and certain executive officers *
- 10.3 Investors Bank Amended and Restated Director Retirement Plan*
- 10.4 Investors Bank Amended and Restated Supplemental ESOP Retirement Plan*
- 10.5 Investors Bancorp, Inc. Supplemental Wage Replacement Plan*
- 10.6 Investors Bank Amended and Restated Deferred Directors Fee Plan*
- 10.7 Investors Bancorp, Inc. Amended and Restated Deferred Directors Fee Plan*
