Apollo Investment Corporation is a closed-end, non-diversified management investment company that has elected to be treated as a business development company, or BDC, under the Investment Company Act of 1940, or 1940 Act. Our investment objective is to generate current income and capital appreciation. We invest primarily in various forms of debt investments, including senior secured loans, and/or equity in private middle market companies. From time to time, we may also invest in the securities of public companies. We fund a portion of our investment with borrowed money, a practice commonly known as leverage. We can offer no assurances that we will continue to achieve our objective.

Apollo Investment Management, L.P., an affiliate of Apollo Global Management, LLC, a leading global alternative investment manager, serves as our investment adviser. Apollo Investment Administration, LLC provides the administrative services necessary for us to operate.

We may offer, from time to time, in one or more offerings, together or separately, up to \$1,500,000,000 of our common stock, preferred stock, debt securities, units, subscription rights, purchase contracts or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, which we refer to, collectively, as the “securities.” The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus.

Our common stock is quoted on The Nasdaq Global Select Market under the symbol “AINV.” The last reported closing price for our common stock on August 21, 2012 was \$ 7.88 per share.

This prospectus, and the accompanying prospectus supplement, contains important information you should know before investing in our securities. Please read it before you invest and keep it for future reference. We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission. This information is available free of charge by contacting us at 9 West 57th Street, New York, NY 10019 or by calling us collect at (212) 515-3450 or on our website at www.apolloic.com. The SEC also maintains a website at www.sec.gov that contains such information free of charge.

Investing in our securities involves a high degree of risk and is highly speculative. Before buying any securities, you should read the discussion of the material risks of investing in our securities in “Risk Factors” beginning on page 9 of this prospectus.

We invest in securities that have been rated below investment grade by independent rating agencies or that would be rated below investment grade if they were rated. These securities, which are often referred to as “junk,” have predominantly speculative characteristics with respect to the issuer’s capacity to pay interest and repay principal. They may also be difficult to value and illiquid.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of securities unless accompanied by a prospectus supplement.

You should rely only on the information contained in this prospectus and the accompanying prospectus supplement. We have not authorized anyone to provide you with additional information, or information different from that contained in this prospectus and the accompanying prospectus supplement. If anyone provides you with different or additional information, you should not rely on it. We are offering to sell, and seeking offers to buy, securities only in jurisdictions where offers and sales are permitted. The information contained in or incorporated by reference in this prospectus and the accompanying prospectus supplement is accurate only as of the date of this prospectus or such prospectus supplement. We will update these documents to reflect material changes. Our business, financial condition, results of operations and prospects may have changed since then.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the Securities and Exchange Commission, or the SEC, using the “shelf” registration process. Under the shelf registration process, we may offer, from time to time, up to \$1,500,000,000 of our common stock, preferred stock, debt securities, units, subscription rights, purchase contracts or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities on the terms to be determined at the time of the offering. The securities may be offered at prices and

on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the securities that we may offer. Each time we use this prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. If applicable, the prospectus supplement will identify any selling stockholders acting under the terms of certain registration rights agreements we may enter into from time to time. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any prospectus supplement together with any exhibits and the additional information described under the headings “Available Information” and “Risk Factors” before you make an investment decision.

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider. You should read carefully the more detailed information set forth under “Risk Factors” and the other information included in this prospectus. In this prospectus and any accompanying prospectus supplement, except where the context suggests otherwise, the terms “we”, “us”, “our” and “Apollo Investment” refer to Apollo Investment Corporation; “Apollo Investment Management”, “AIM” or “investment adviser” refers to Apollo Investment Management, L.P.; “Apollo Administration” or “AIA” refers to Apollo Investment Administration, LLC; and “Apollo” refers to the affiliated companies of Apollo Investment Management, L.P.

APOLLO INVESTMENT

Apollo Investment Corporation, a Maryland corporation organized on February 2, 2004, is a closed-end, externally managed, non-diversified management investment company that has elected to be treated as a business development company (“BDC”) under the Investment Company Act of 1940 (the “1940 Act”). In addition, for tax purposes we have elected to be treated as a regulated investment company, or RIC, under the Internal Revenue Code of 1986, as amended (the “Code”).

Our investment objective is to generate current income and capital appreciation. We invest primarily in various forms of debt investments, including senior secured loans, subordinated and mezzanine investments and/or equity in private middle market companies. From time to time, we may also invest in the securities of public companies.

Our portfolio is comprised primarily of investments in subordinated debt, sometimes referred to as mezzanine debt, and senior secured loans of private middle-market companies that, in the case of senior secured loans, generally are not broadly syndicated and whose aggregate tranche size is typically less than \$300 million. From time to time our portfolio also includes equity interests such as common stock, preferred stock, warrants or options. In this prospectus, we use the term “middle-market” to refer to companies with annual revenues between \$50 million and \$2 billion. While our investment objective is to generate current income and capital appreciation through investments in U.S. senior and subordinated loans, other debt securities and equity, we may also invest a portion of the portfolio in other investment opportunities, including foreign securities. Most of the debt instruments we invest in are unrated or rated below investment grade, which is an indication of having predominantly speculative characteristics with respect to the capacity to pay interest and principal, such securities are often referred to as “junk.” See “Risk Factors—Risks Related to Our Investments.”

AIM is our investment adviser and an affiliate of Apollo Global Management, LLC, and its consolidated subsidiaries (“AGM”). AGM and other affiliates manage other funds that may have investment mandates that are similar, in whole or in part, with ours. AIM and its affiliates may determine that an investment is appropriate both for us and for one or more of those other funds. In such event, depending on the availability of such investment and other appropriate factors, AIM may determine that we should invest on a side-by-side basis with one or more other funds. We may make all such investments subject to compliance with applicable regulations and interpretations, and our allocation procedures. In certain circumstances negotiated co-investments may be made only if we receive an order from the SEC permitting us to do so. There can be no assurance that any such order will be obtained.

During our fiscal year ended March 31, 2012, we invested \$1.5 billion in 21 new and 18 existing portfolio companies through a combination of primary and secondary market purchases. This compares to investing \$1.1 billion in 21 new and 18 existing portfolio companies for the previous fiscal year ended March 31, 2011. Investments sold or prepaid during the fiscal year ended March 31, 2012 totaled \$1.6 billion versus \$977 million for the fiscal year ended March 31, 2011. The weighted average yields on our senior secured loan portfolio,

subordinated debt portfolio and total debt portfolio as of March 31, 2012 at our current cost basis were 10.2%, 12.7% and 11.9%, respectively. At March 31, 2011, the yields were 9.0%, 13.1% and 11.6%, respectively.

Our targeted investment size typically ranges between \$20 million and \$250 million, although this investment size may vary proportionately as the size of our available capital base changes. At March 31, 2012, our net portfolio consisted of 62 portfolio companies and was invested 30% in senior secured loans, 60% in subordinated debt, 1% in preferred equity and 9% in common equity and warrants measured at fair value versus 69 portfolio companies invested 33% in senior secured loans, 58% in subordinated debt, 1% in preferred equity and 8% in common equity and warrants at March 31, 2011.

Since our initial public offering in April 2004 and through March 31, 2012, invested capital totaled \$8.8 billion in 166 portfolio companies. Over the same period, we completed transactions with more than 100 different financial sponsors. A financial sponsor is a term commonly used to refer to private equity investment firms, particularly those private equity firms that engage in leveraged buyout transactions.

At March 31, 2012, 67% or \$1.6 billion of our income-bearing investment portfolio is fixed rate debt and 33% or \$0.8 billion is floating rate debt, measured at fair value. On a cost basis, 65% or \$1.7 billion of our income-bearing investment portfolio is fixed rate debt and 35% or \$0.9 billion is floating rate debt. At March 31, 2011, 59% or \$1.7 billion of our income-bearing investment portfolio was fixed rate debt and 41% or \$1.2 billion was floating rate debt. On a cost basis, 60% or \$1.7 billion of our income-bearing investment portfolio is fixed rate debt and 40% or \$1.1 billion is floating rate debt.

ABOUT APOLLO INVESTMENT MANAGEMENT

AIM, our investment adviser, is led by a dedicated team of investment professionals. The investment committee of AIM currently consists of Marc Rowan, a Senior Managing Director of AGM; James C. Zelter, our Chief Executive Officer and a Vice President of the general partner of AIM; Edward Goldthorpe, our President, Chief Investment Officer and a Partner of AIM; Eileen Patrick, Executive Vice President of Corporate Strategy; Justin Sendak, a Partner of AIM; Phil Guerin, a Partner of AIM; Greg Beard, Head of Natural Resources at AGM; and Bret Leas, Senior Portfolio Manager of Structured Credit at AGM. The participation of Greg Beard and Bret Leas in the decision making activity of the investment committee are limited to their respective areas of investment expertise within AGM. The composition of the investment committee of AIM may change from time to time. In 2012, Edward Goldthorpe began his term as our President and as Chief Investment Officer of AIM and Eileen Patrick began her term as our Executive Vice President of Corporate Strategy in 2012. Additionally, Phil Guerin, Greg Beard and Bret Leas increased their participation in the investment committee of AIM in 2012. AIM draws upon AGM's more than 20 year history and benefits from the broader firm's significant capital markets, trading and research expertise developed through investments in many core sectors in over 150 companies since inception.

ABOUT APOLLO INVESTMENT ADMINISTRATION

In addition to furnishing us with office facilities, equipment, and clerical, bookkeeping and record keeping services, AIA also oversees our financial records as well as prepares our reports to stockholders and reports filed with the SEC. AIA also performs the calculation and publication of our net asset value, the payment of our expenses and oversees the performance of various third-party service providers and the preparation and filing of our tax returns. Furthermore, AIA provides on our behalf managerial assistance to those portfolio companies to which we are required to provide such assistance.

OPERATING AND REGULATORY STRUCTURE

Our investment activities are managed by AIM and supervised by our board of directors, a majority of whom are independent of AGM and its affiliates. AIM is an investment adviser that is registered under the Investment Advisers Act of 1940, or the Advisers Act. Under our investment advisory and management agreement, we pay

2

AIM an annual base management fee based on our average gross assets as well as an incentive fee. See “Management—Investment Advisory and Management Agreement.”

As a BDC, we are required to comply with certain regulatory requirements. Also, while we are permitted to finance investments using debt, our ability to use debt is limited in certain significant respects. See “Regulation.” We have elected to be treated for federal income tax purposes as a RIC under Subchapter M of the Code. For more information, see “Material U.S. Federal Income Tax Considerations.”

DETERMINATION OF NET ASSET VALUE

The net asset value per share of our outstanding shares of common stock is determined quarterly by dividing the value of our total assets minus our liabilities by the total number of our shares outstanding.

In calculating the value of our total assets, we value investments for which market quotations are readily available at such market quotations if they are deemed to represent fair value. Market quotations may be deemed not to represent fair value in certain circumstances where AIM believes that facts and circumstances applicable to an issuer, a seller or purchaser or the market for a particular security causes current market quotes to not reflect the fair value of the security. Examples of these events could include cases in which material events are announced after the close of the market on which a security is primarily traded, when a security trades infrequently causing a quoted purchase or sale price to become stale or in the event of a “fire sale” by a distressed seller. Debt and equity securities that are not publicly traded or whose market price is not readily available or whose market quotations are not deemed to represent fair value are valued at fair value as determined in good faith by, or under the direction of, our board of directors pursuant to a written valuation policy and a consistently applied valuation process utilizing the input of our investment adviser, independent valuation firms, and the audit committee. Because there is no readily available market value for a significant portion of the investments in our portfolio, we value these portfolio investments at fair value as determined in good faith by the board of directors.

Due to the inherent uncertainty of determining the fair value of our investments, the value of our investments may differ significantly from the values that would have been used had a readily available market existed for such investments, and the differences could be material. Determination of fair values involves subjective judgments and estimates not susceptible to substantiation by auditing procedures. Accordingly, under current accounting standards, the notes to our financial statements refer to the uncertainty with respect to the possible effect of such valuations, and any change in such valuations, on our financial statements. For more information, see “Determination of Net Asset Value.”

USE OF PROCEEDS

We intend to use the net proceeds from the sale of our securities pursuant to this prospectus for general corporate purposes, which include investing in portfolio companies in accordance with our investment objective and strategies and repaying indebtedness incurred under our senior credit facility.

We anticipate that substantially all of the net proceeds of an offering of securities pursuant to this prospectus will be used for the above purposes within two years, depending on the availability of appropriate investment opportunities consistent with our investment objective and market conditions. Our portfolio currently consists primarily of investments in long-term subordinated debt, referred to as mezzanine debt, and senior secured loans of private middle-market companies, and from time to time includes equity interests such as common stock, preferred stock, warrants or options. Pending such investments, we will use the net proceeds of an offering to invest in cash equivalents, U.S. government securities and other high-quality debt investments that mature in one year or less from the date of investment, to reduce then-outstanding obligations under our credit facility or for other general corporate

purposes. The supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering. For more information, see “Use of Proceeds.”

DIVIDENDS ON COMMON STOCK

We intend to continue to distribute quarterly dividends to our common stockholders, however, we may not be able to maintain the current level of dividend payments, due to including, but not limited to, regulatory requirements. Our quarterly dividends, if any, will be determined by our board of directors. We expect that our distributions to shareholders generally will be from accumulated net investment income and from net realized capital gains, as applicable, although a portion may represent a return of capital. For more information, see “Dividends.”

DIVIDENDS ON PREFERRED STOCK

We may issue preferred stock from time to time, although we have no immediate intention to do so. If we issue shares of preferred stock, holders of such preferred stock will be entitled to receive cash dividends at an annual rate that will be fixed or will vary for the successive dividend periods for each series. In general, the dividend periods for fixed rate preferred stock will be quarterly.

DIVIDEND REINVESTMENT PLAN

We have adopted an “opt-out” dividend reinvestment plan that provides for reinvestment of our dividend distributions on behalf of our stockholders, unless a stockholder elects to receive cash. As a result, if our board of directors authorizes, and we declare, a cash dividend, then our stockholders who have not “opted out” of our dividend reinvestment plan will have their cash dividends automatically reinvested in additional shares of our common stock, rather than receiving the cash dividends. A registered stockholder must notify our transfer agent in writing in order to “opt-out” of the dividend reinvestment plan. For more information, see “Dividend Reinvestment Plan.”

PLAN OF DISTRIBUTION

We may offer, from time to time, up to \$1,500,000,000 of our common stock, preferred stock, debt securities, units, subscription rights, purchase contracts or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, on terms to be determined at the time of the offering.

Securities may be offered at prices and on terms described in one or more supplements to this prospectus directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The supplement to this prospectus relating to the offering will identify any agents or underwriters involved in the sale of our securities, and will set forth any applicable purchase price, fee and commission or discount arrangement or the basis upon which such amount may be calculated. In compliance with the guidelines of the Financial Industry Regulatory Authority, Inc. (“FINRA”), the maximum compensation to the underwriters or dealers in connection with the sale of our securities pursuant to this prospectus and the accompanying supplement to this prospectus may not exceed 8% of the aggregate offering price of the securities as set forth on the cover page of the supplement to this prospectus.

We may not sell securities pursuant to this prospectus without delivering a prospectus supplement describing the method and terms of the offering of such securities. For more information, see “Plan of Distribution.”

CONTINUED USE OF LEVERAGE

The availability of leverage depends upon the economic environment. Given current market conditions, there can be no assurance that we will be able to utilize leverage as anticipated, if at all, and we may determine or be required to reduce or eliminate our leverage over time. The current global economic environment, the potential systemic risk arising from illiquidity and rapid de-leveraging in the financial system at large may continue to contribute to market volatility and may have long-term effects on the U.S. and international financial markets. We cannot predict how long the financial markets and economic environment will continue to be affected by these events and cannot predict the effects of these or similar events.

OUR CORPORATE INFORMATION

Our administrative and principal executive offices are located at 730 Fifth Avenue, New York, NY 10019 and 9 West 57th Street, New York, NY 10019, respectively. Our common stock is quoted on The Nasdaq Global Select Market under the symbol "AINV." Our Internet website address is www.apolloic.com. Information contained on our website is not incorporated by reference into this prospectus and you should not consider information contained on our website to be part of this prospectus.

FEES AND EXPENSES

The following table is intended to assist you in understanding the costs and expenses that an investor in shares of our common stock will bear directly or indirectly. We caution you that the percentage indicated for “Other expenses” in the table below is an estimate and may vary. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by “you,” “us” or “Apollo Investment,” or that “we” will pay fees or expenses, common stockholders will indirectly bear such fees or expenses as investors in Apollo Investment.

Stockholder transaction expenses:

Sales load (as a percentage of offering price)	—	(1)
Offering expenses (as a percentage of offering price)	—	(2)
Total common stockholder transaction expenses (as a percentage of offering price)	—	(3)

Annual expenses (as percentage of net assets attributable to common stock)(4):

Management fees	3.58	%(5)
Incentive fees payable under investment advisory and management agreement	2.35	%(6)
Interest and other debt expenses on borrowed funds	3.94	%(7)
Other expenses	1.10	%(8)
Total annual expenses(9)	10.97	%(5, 6, 7, 8)

Example

The following example demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in our common stock. These dollar amounts are based upon the assumption that our annual operating expenses (other than performance-based incentive fees) and leverage would remain at the levels set forth in the table above. Transaction expenses are not included in the following example. In the event that shares of our common stock to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will restate this example to reflect the applicable sales load.

	1 year	3 years	5 years	10 years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$85	\$245	\$393	\$721

While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. Assuming a 5% annual return, the incentive fee under the investment advisory and management agreement may not be earned or payable and is not included in the example. This illustration assumes that we will not realize any capital gains computed net of all realized capital losses and gross unrealized capital depreciation in any of the indicated time periods. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our expenses, and returns to our investors, would be higher. In addition, while the example assumes reinvestment of all dividends and distributions at net asset value, participants in our dividend reinvestment plan will receive a number of shares of our common stock, determined by dividing the total dollar amount of the dividend payable to a participant by the market price per share of our common stock at the close of trading on the valuation date for the dividend. See “Dividend Reinvestment Plan” for additional information regarding our dividend reinvestment plan.

Assuming, however, that the incentive fee under the investment advisory and management agreement is earned and payable, the following example demonstrates the projected dollar amount of total cumulative expenses that would be

incurred over various periods with respect to a hypothetical investment in our common stock.

	1 year	3 years	5 years	10 years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 106	\$ 301	\$ 472	\$ 819

This example and the expenses in the table above should not be considered a representation of our future expenses, and actual expenses may be greater or less than those shown.

-
- (1) In the event that the securities to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load.
 - (2) The related prospectus supplement will disclose the estimated amount of offering expenses, the offering price and the offering expenses borne by us as a percentage of the offering price.
 - (3) The expenses of the dividend reinvestment plan per share are included in “Other expenses.”
 - (4) “Net assets attributable to common stock” equals net assets as of March 31, 2012.
 - (5) The contractual management fee is calculated at an annual rate of 2.00% of our average total assets. Annual expenses are based on current fiscal year amounts. For more detailed information about our computation of average total assets, please see Note 3 of our financial statements dated March 31, 2012 included in this prospectus.
 - (6) Assumes that annual incentive fees earned by our investment adviser, AIM, remain consistent with the incentive fees earned by AIM for the fiscal year ended March 31, 2012. AIM earns incentive fees consisting of two parts. The first part, which is payable quarterly in arrears, is based on our pre-incentive fee net investment income for the immediately preceding calendar quarter. Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets at the end of the immediately preceding calendar quarter, is compared to the rate of 1.75% quarterly (7% annualized). Our net investment income used to calculate this part of the incentive fee is also included in the amount of our gross assets used to calculate the 2% base management fee (see footnote 5 above). Accordingly, we pay AIM an incentive fee as follows: (1) no incentive fee in any calendar quarter in which our pre-incentive fee net investment income does not exceed 1.75%, which we commonly refer to as the performance threshold; (2) 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the performance threshold but does not exceed 2.1875% in any calendar quarter; and (3) 20% of the amount of our pre-incentive fee net investment income, if any, that exceeds 2.1875% in any calendar quarter. These calculations are appropriately pro rated for any period of less than three months. The effect of the fee calculation described above is that if pre-incentive fee net investment income is equal to or exceeds 2.1875%, AIM will receive a fee of 20% of our pre-incentive fee net investment income for the quarter. You should be aware that a rise in the general level of interest rates can be expected to lead to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates would make it easier for us to meet or exceed the incentive fee performance threshold and may result in a substantial increase of the amount of incentive fees payable to our investment adviser with respect to pre-incentive fee net investment income. Furthermore, since the performance threshold is based on a percentage of our net asset value, decreases in our net asset value make it easier to achieve the performance threshold. The second part of the incentive fee will equal 20% of our realized capital gains for the calendar year, if any, computed net of all realized capital losses and unrealized capital depreciation (and incorporating unrealized depreciation on a gross investment-by-investment basis) and is payable in arrears at the end of each calendar year. For a more detailed discussion of the calculation of this fee, see “Management—Investment Advisory and Management Agreement.”
 - (7) Our interest and other debt expenses are based on current fiscal year amounts. As of March 31, 2012, we had \$715 million available and \$539 million in borrowings outstanding under our \$1.254 billion credit facility and \$1.009 billion of total debt outstanding. For more information, see “Risk Factors—Risks relating to our business and structure—We fund a portion of our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” in this base prospectus.

- (8) Includes our estimated overhead expenses, including payments under the administration agreement based on our allocable portion of overhead and other expenses incurred by AIA in performing its obligations under the administration agreement. See “Management—Administration Agreement” in this base prospectus.
- (9) “Total annual expenses” as a percentage of net assets attributable to common stock are higher than the total annual expenses percentage would be for a company that is not leveraged. We borrow money to leverage our net assets and increase our total assets. The SEC requires that the “Total annual expenses” percentage be calculated as a percentage of net assets (defined as total assets less indebtedness), rather than the total assets, including assets that have been funded with borrowed monies. If the “Total annual expenses” percentage were

calculated instead as a percentage of total assets, our “Total annual expenses” would be 6.49% of total assets. For a presentation and calculation of total annual expenses based on total assets, see page 40 of this base prospectus.

RISK FACTORS

Before you invest in our shares, you should be aware of various risks, including those described below and those set forth under the caption “Recent Developments” in the accompanying prospectus supplement. You should carefully consider these risk factors, together with all of the other information included in this base prospectus and accompanying prospectus supplement, before you decide whether to make an investment in our securities. The risks set out below and in the accompanying prospectus supplement are not the only risks we face. If any of the following events occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our net asset value and the trading price of our common stock could decline or the value of our preferred stock, debt securities, units, subscription rights, purchase contracts or warrants may decline, and you may lose all or part of your investment.

CERTAIN RISKS IN THE CURRENT ENVIRONMENT

To the extent applicable, the prospectus supplement used in connection with any offering of securities under this prospectus will highlight or discuss certain risk factors that may be more significant in the business environment at the time of such offering.

Capital markets have for the last few years been in a period of disruption and instability. These market conditions have materially and adversely affected debt and equity capital markets in the United States and abroad, which have had, and may in the future have, a negative impact on our business and operations.

The global capital markets have been in a period of disruption as evidenced by a lack of liquidity in the debt capital markets, significant write-offs in the financial services sector, the re-pricing of credit risk in the broadly syndicated credit market and the failure of certain major financial institutions. Despite actions of the United States federal government and foreign governments, these events contributed to worsening general economic conditions that materially and adversely impacted the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial services firms in particular. Although these conditions have ameliorated to some extent, they could continue for a prolonged period of time or worsen in the future. While these conditions persist, we and other companies in the financial services sector may have to access, if available, alternative markets for debt and equity capital. Equity capital may be difficult to raise because, subject to some limited exceptions which as of the date of this prospectus apply to us, as a BDC we are generally not able to issue additional shares of our common stock at a price less than net asset value without general approval by our shareholders, which we currently have, and approval of the specific issuance by our board of directors. In addition, our ability to incur indebtedness or issue preferred stock is limited by applicable regulations such that our asset coverage, as defined in the 1940 Act, must equal at least 200% immediately after each time we incur indebtedness or issue preferred stock. The debt capital that will be available, if at all, may be at a higher cost and on less favorable terms and conditions in the future. Any inability to raise capital could have a negative effect on our business, financial condition and results of operations.

Notwithstanding the amended and restated credit facility we recently executed (the “Amended & Restated Facility”), which, among other things, extended the final maturity of some of our indebtedness until May 2016, market conditions have made, and may in the future make, it difficult to extend the maturity of or refinance our existing indebtedness and any failure to do so could have a material adverse effect on our business. The illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments.

Given the extreme volatility and dislocation that the capital markets have experienced, many BDCs have faced, and may in the future face, a challenging environment in which to raise capital. Recent significant changes in the capital

markets affecting our ability to raise capital have affected the pace of our investment activity. In addition, significant changes in the capital markets, including the extreme volatility and disruption, have had, and may in the

future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. Due to such disruptions, we have recently experienced capital losses on certain of our investments. An inability to raise capital, and any required sale of our investments for liquidity purposes, has recently had, and may continue to have, a material adverse impact on our business, financial condition or results of operations.

The instability in the financial markets has led the U.S. federal government to take a number of unprecedented actions and pass legislation designed to regulate and support certain financial institutions and numerous segments of the financial markets that have experienced extreme volatility, and in some cases a lack of liquidity.

On July 21, 2010, the President signed into law major financial services reform legislation in the form of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). The Dodd-Frank Act, among other things, grants regulatory authorities such as the Commodity Futures Trading Commission (“CFTC”) and SEC broad rulemaking authority to implement various provisions of the Dodd-Frank Act, including comprehensive regulation of the over-the-counter derivatives market. The regulations adopted to date by these regulators have not had a material adverse effect on our business. However, several significant rulemaking initiatives have not been completed and these could have the effect of reducing liquidity or otherwise adversely affecting us or our investments. There can be no assurance that future regulatory actions authorized by the Dodd-Frank Act will not significantly reduce our profitability. The implementation of the Dodd-Frank Act could also adversely affect us by increasing transaction and/or regulatory compliance costs. In addition, greater regulatory scrutiny may increase our exposure to potential liabilities. Increased regulatory oversight can also impose administrative burdens on us and on AIM, including, without limitation, responding to examinations or investigations and implementing new policies and procedures.

Additionally, federal, state, foreign and other governments, their regulatory agencies or self regulatory organizations may take actions that affect the regulation of the securities in which we invest, or the issuers of such securities, in ways that are unforeseeable. Governments or their agencies may also acquire distressed assets from financial institutions and acquire ownership interests in those institutions. The implications of government ownership and disposition of these assets are unclear, and such a program may have positive or negative effects on the liquidity, valuation and performance of our portfolio companies. Furthermore, volatile financial markets can expose us to greater market and liquidity risk and potential difficulty in valuing securities.

At any time after the date of this prospectus, legislation may be enacted that could negatively affect us or our portfolio companies. Changing approaches to regulation may have a negative impact on the entities in which we invest. Legislation or regulation may also change the way in which we are regulated. There can be no assurance that the Dodd-Frank Act or any future legislation, regulation or deregulation will not have a material adverse effect on us or will not impair our ability to achieve our investment objective.

The recent downgrade of the U.S. credit rating and uncertainty about the financial stability of several countries in the European Union (“EU”) could have a significant adverse effect on our business, results of operations and financial condition.

Due to long-term federal budget deficit concerns, on August 5, 2011 S&P downgraded the federal government’s credit rating from AAA to AA+ for the first time in history. This downgrade could lead to subsequent downgrades by S&P, as well as to downgrades by the other two major credit rating agencies, Moody’s and Fitch Ratings. These developments, and the government’s credit concerns in general, could cause interest rates and borrowing costs to rise, which may negatively impact both the perception of credit risk associated with our debt portfolio and our ability to access the debt markets on favorable terms. In addition, a decreased credit rating could create broader financial turmoil and uncertainty, which may weigh heavily on our stock price and our financial performance.

In 2010, a financial crisis emerged in Europe, triggered by high budget deficits and rising direct and contingent sovereign debt in Greece, Ireland, Italy, Portugal and Spain, which created concerns about the ability of these EU “peripheral nations” to continue to service their sovereign debt obligations. Despite assistance packages to Greece,

Ireland and Portugal, the creation of a joint EU-IMF European Financial Stability Facility in May 2010, and a recently announced plan to expand financial assistance to Greece, uncertainty over the outcome of the EU governments' financial support programs and worries about sovereign finances persist. Risks and ongoing concerns about the debt crisis in Europe could have a detrimental impact on the global economic recovery, sovereign and non-sovereign debt in these countries and the financial condition of European financial institutions. Market and economic disruptions have affected, and may continue to affect, consumer confidence levels and spending, personal bankruptcy rates, levels of incurrence and default on consumer debt and home prices, among other factors. There can be no assurance that the market disruptions in Europe, including the increased cost of funding for certain governments and financial institutions, will not spread, nor can there be any assurance that future assistance packages will be available or, even if provided, will be sufficient to stabilize the affected countries and markets in Europe or elsewhere. To the extent uncertainty regarding the economic recovery continues to negatively impact consumer confidence and consumer credit factors, our business and results of operations could be significantly and adversely affected.

RISKS RELATING TO OUR BUSINESS AND STRUCTURE

We may suffer credit losses.

Investment in small and middle-market companies is highly speculative and involves a high degree of risk of credit loss. These risks are likely to increase during volatile economic periods, as the US and many other economies have experienced. See "Risks Related to Our Investments."

We are dependent upon Apollo Investment Management's key personnel for our future success and upon their access to Apollo's investment professionals and partners.

We depend on the diligence, skill and network of business contacts of the senior management of AIM. Members of our senior management may depart at any time. For a description of the senior management team, see "Management." We also depend, to a significant extent, on AIM's access to the investment professionals and partners of Apollo and the information and deal flow generated by the Apollo investment professionals in the course of their investment and portfolio management activities. The senior management of AIM evaluates, negotiates, structures, closes and monitors our investments. Our future success depends on the continued service of the senior management team of AIM. The departure of any of our senior managers, senior managers of AIM, or of a significant number of the investment professionals or partners of Apollo, could have a material adverse effect on our ability to achieve our investment objective. In addition, we can offer no assurance that AIM will remain our investment adviser or that we will continue to have access to Apollo's partners and investment professionals or its information and deal flow.

Our financial condition and results of operations depend on our ability to manage future growth effectively.

Our ability to achieve our investment objective depends, in part, on our ability to grow, which depends, in turn, on AIM's ability to identify, invest in and monitor companies that meet our investment criteria. Accomplishing this result on a cost-effective basis is largely a function of AIM's structuring of the investment process, its ability to provide competent, attentive and efficient services to us and our access to financing on acceptable terms. The senior management team of AIM has substantial responsibilities under the investment advisory and management agreement, and with respect to certain members, in connection with their roles as officers of other Apollo funds.

They may also be called upon to provide managerial assistance to our portfolio companies. These demands on their time may distract them or slow the rate of investment. In order to grow, we and AIM need to hire, train, supervise and manage new employees. Any failure to manage our future growth effectively could have a material adverse effect on our business, financial condition and results of operations.

We operate in a highly competitive market for investment opportunities.

A number of entities compete with us to make the types of investments that we make. We compete with public and private funds, commercial and investment banks, commercial financing companies, other BDCs and, to the extent they provide an alternative form of financing, private equity funds. Competition for investment opportunities intensifies from time to time and may intensify further in the future. Some of our existing and potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions and valuation requirements that the 1940 Act imposes on us as a BDC and that the Code imposes on us as a RIC. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this existing and potentially increasing competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we can offer no assurance that we will be able to identify and make investments that are consistent with our investment objective.

We do not seek to compete primarily based on the interest rates we offer, and we believe that some of our competitors make loans with interest rates that are comparable to or lower than the rates we offer.

We may lose investment opportunities if we do not match our competitors' pricing, terms and structure. If we match our competitors' pricing, terms and structure, we may experience decreased net interest income and increased risk of credit loss.

Any failure on our part to maintain our status as a BDC would reduce our operating flexibility.

If we do not remain a BDC, we might be regulated as a closed-end investment company under the 1940 Act, which would subject us to substantially more regulatory restrictions under the 1940 Act and correspondingly decrease our operating flexibility.

We will be subject to corporate-level income tax if we are unable to qualify as a RIC.

To qualify as a RIC under the Code, we must meet certain source-of-income, asset diversification and annual distribution requirements. The annual distribution requirement for a RIC generally is satisfied if we distribute at least 90% of our "investment company taxable income" (generally, our ordinary income and the excess, if any, of our net short-term capital gains over our net long-term capital losses), if any, to our stockholders on an annual basis. To the extent we use debt financing, we are subject to certain asset coverage ratio requirements and other financial covenants under loan and credit agreements, and could in some circumstances also become subject to such requirements under the 1940 Act, that could, under certain circumstances, restrict us from making distributions necessary to qualify as a RIC. If we are unable to obtain cash from other sources, we may fail to qualify as a RIC and, thus, may be subject to corporate-level income tax. To qualify as a RIC, we must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments are in private companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses. If we fail to qualify as a RIC for any reason and become subject to corporate-level income tax, the resulting corporate-level taxes could substantially reduce our net assets, the amount of income available for distribution and the amount of our distributions. Such a failure would have a material adverse effect on us and our stockholders.

To qualify again to be taxed as a RIC in a subsequent year, we would be required to distribute to our stockholders our earnings and profits attributable to non-RIC years reduced by an interest charge on 50% of such earnings and profits payable by us to the IRS. In addition, if we failed to qualify as a RIC for a period greater than two taxable years, then we would be required to elect to recognize and pay tax on any net built-in gain (the excess of aggregate gain, including items of income, over aggregate loss that would have been realized if we had been liquidated) or, alternatively, be subject to taxation on such built-in gain recognized for a period of ten years, in order to qualify as a RIC in a subsequent year.

We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.

For U.S. federal income tax purposes, we include in income certain amounts that we have not yet received in cash, such as original issue discount, which may arise if, for example, we receive warrants in connection with the making of a loan or pay-in-kind (“PIK”) interest, which represents contractual interest added to the loan balance and typically due at the end of the loan term or possibly in other circumstances. Such original issue discount is included in income before we receive any corresponding cash payments and could be significant relative to our overall investment activities. Loans structured with these features may represent a higher level of credit risk than loans the interest on which must be paid in cash at regular intervals. We also may be required to include in income certain other amounts that we do not receive in cash.

That part of the incentive fee payable by us that relates to our net investment income is computed and paid on income that may include interest that has been accrued but not yet received in cash, including for investments with PIK provisions or original issue discount. If a portfolio company defaults on a loan, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible. Consequently, while we may make incentive fee payments on income accruals that we may not collect in the future and with respect to which we do not have a formal clawback right against our investment adviser per se, the amount of accrued income written off in any period will reduce the income in the period in which such write-off was taken and thereby reduce such period’s incentive fee payment.

Since in certain cases we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the tax requirement to distribute at least 90% of our investment company taxable income to maintain our status as a RIC. Accordingly, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations in order to meet distribution and/or leverage requirements. See “Material U.S. Federal Income Tax Considerations—Taxation as a RIC.”

Regulations governing our operation as a BDC affect our ability to, and the way in which we raise, additional capital.

We may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as “senior securities,” up to the maximum amount permitted by the 1940 Act. Although, we do not intend to issue preferred stock within one year of the date of this prospectus. Under the provisions of the 1940 Act, we are permitted, as a BDC, to issue senior securities only in amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after each issuance of senior securities. If the value of our assets declines, we may be unable to maintain asset coverage above the 200% level. If that happens, the contractual arrangements governing these securities may require us to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness at a time when such sales may be disadvantageous.

BDCs may issue and sell common stock at a price below net asset value per share only in limited circumstances, one of which is during the one-year period after stockholder approval. In the past, our stockholders have approved a plan so that during the subsequent 12 month period we could, in one or more public or private offerings of our

common stock, sell or otherwise issue shares of our common stock at a price below the then current net asset value per share, subject to certain conditions including parameters on the level of permissible dilution, approval of the sale by a majority of our independent directors and a requirement that the sale price be not less than approximately the market price of the shares of our common stock at specified times, less the expenses of the sale. We may in the future seek to renew such authority on terms and conditions set forth in the corresponding proxy statement. There is no assurance such approvals will be obtained.

In the event we sell, or otherwise issue, shares of our common stock at a price below net asset value per share, existing stockholders will experience net asset value dilution and the investors who acquire shares in such offering may thereafter experience the same type of dilution from subsequent offerings at a discount. For example, if we sell an additional 10% of our common shares at a 5% discount from net asset value, a stockholder who does not participate in that offering for its proportionate interest will suffer net asset value dilution of up to 0.5% or \$5 per \$1000 of net asset value.

In addition to issuing securities to raise capital as described above, we anticipate that in the future we may securitize our loans to generate cash for funding new investments. To securitize loans, we may create a wholly-owned subsidiary, contribute a pool of loans to the subsidiary and have the subsidiary issue primarily investment grade debt securities to purchasers who we would expect would be willing to accept a substantially lower interest rate than the loans earn. We would retain all or a portion of the equity in the securitized pool of loans. Our retained equity would be exposed to any losses on the portfolio of loans before any of the debt securities would be exposed to such losses. An inability to successfully securitize our loan portfolio could limit our ability to grow our business and fully execute our business strategy and adversely affect our earnings, if any. Moreover, the successful securitization of our loan portfolio might expose us to losses as the residual loans in which we do not sell interests will tend to be those that are riskier and more apt to generate losses.

We currently use borrowed funds to make investments and are exposed to the typical risks associated with leverage.

We are exposed to increased risk of loss due to our use of debt to make investments. A decrease in the value of our investments will have a greater negative impact on the value of our common stock than if we did not use debt. Our ability to pay dividends will be restricted if we fail to satisfy certain of our asset coverage ratios and other financial covenants and any amounts that we use to service our indebtedness are not available for dividends to our common stockholders.

The agreements governing certain of our debt instruments require us to comply with certain financial and operational covenants. These covenants require us to, among other things, maintain certain financial ratios, including asset coverage and minimum shareholders' equity. As of March 31, 2012, we were in compliance with these covenants. However, our continued compliance with these covenants depends on many factors, some of which are beyond our control. In the event of deterioration in the capital markets and pricing levels subsequent to this period, net unrealized depreciation in our portfolio may increase in the future. Absent an amendment to our revolving credit facility, continued unrealized depreciation in our investment portfolio could result in non-compliance with certain covenants.

Accordingly, there are no assurances that we will continue to comply with these covenants. Failure to comply with these covenants would result in a default which, if we were unable to obtain a waiver from the debt holders, could accelerate repayment under the instruments and thereby have a material adverse impact on our liquidity, financial condition, results of operations and ability to pay dividends.

Our current and future debt securities are and may be governed by an indenture or other instrument containing covenants restricting our operating flexibility. We, and indirectly our stockholders, bear the cost of issuing and servicing such securities. Our currently outstanding convertible securities have, and any convertible or exchangeable

securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock.

We fund a portion of our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us.

Borrowings and other types of financing, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in our securities. Our lenders and debt holders have fixed dollar claims on our assets that are superior to the claims of our common stockholders or any preferred stockholders. If the value of our assets increases, then leveraging would cause the net asset value to increase more sharply than it would have had we not leveraged. Conversely, if the value of our assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any increase in our income in excess of consolidated interest payable on the borrowed funds would cause our net income to increase more than it would without the leverage, while any decrease in our income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could negatively affect our ability to make common stock dividend payments. Leverage is generally considered a speculative investment technique.

We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for gain or loss and the risks of investing in us in the same way as our borrowings.

Preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative. Payment of such dividends and repayment of the liquidation preference of such preferred stock must take preference over any dividends or other payments to our common stockholders, and preferred stockholders are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference.

Changes in interest rates may affect our cost of capital and net investment income.

Because we borrow money, and may issue preferred stock to finance investments, our net investment income will depend, in part, upon the difference between the rate at which we borrow funds or pay dividends on preferred stock and the rate at which we invest these funds. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds would increase except to the extent we have issued fixed rate debt or preferred stock, which could reduce our net investment income. Our long-term fixed-rate investments are financed primarily with equity and long-term debt. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act and applicable commodities laws. Interest rate hedging activities do not protect against credit risk. We have analyzed the potential impact of changes in interest rates on interest income net of interest expense. Assuming that the balance sheet were to remain constant and no actions were taken to alter the existing interest rate sensitivity, a hypothetical immediate 1% change in LIBOR would affect our investment income over a one-year horizon by approximately one cent per average share which we would not view as material. In addition, we believe that our interest rate matching strategy and our ability to hedge mitigates the effects any changes in interest rates may have on our investment income. Although management believes that this is indicative of our sensitivity to interest rate changes, it does not adjust for potential changes in credit quality, size and composition of the assets on the balance sheet and other business developments that could affect net increase or decrease in net assets resulting from operations, or net income. Accordingly, no assurances can be given that actual results would not differ materially from the potential outcome simulated by this estimate.

You should also be aware that a change in the general level of interest rates can be expected to lead to a change in the interest rates we receive on many of our debt investments. Accordingly, a change in interest rates could make

it easier for us to meet or exceed the performance threshold and may result in a substantial increase in the amount of incentive fees payable to our investment adviser with respect to pre-incentive fee net investment income.

Our business requires a substantial amount of additional capital to grow because we must distribute most of our income.

Our business requires a substantial amount of additional capital. We have issued equity securities and have borrowed from financial institutions. A reduction in the availability of new capital could limit our ability to grow. We must distribute at least 90% of our investment company taxable income to maintain our regulated investment company status. As a result, any such cash earnings may not be available to fund investment originations. We expect to continue to borrow from financial institutions and issue additional debt and equity securities. If we fail to obtain funds from such sources or from other sources to fund our investments, it could limit our ability to grow, which may have an adverse effect on the value of our securities. In addition, as a BDC, our ability to borrow or issue additional preferred stock may be restricted if our total assets are less than 200% of our total borrowings and preferred stock.

Many of our portfolio investments are recorded at fair value as determined in good faith by our board of directors and, as a result, there is uncertainty as to the value of our portfolio investments.

A large percentage of our portfolio investments are not publicly traded. The fair value of these investments may not be readily determinable. We value these investments quarterly at fair value (based on ASC 820, its corresponding guidance and the principal markets in which these investments trade) as determined in good faith by our board of directors pursuant to a written valuation policy and a consistently applied valuation process utilizing the input of our investment adviser, independent valuation firms and the audit committee. Our board of directors utilizes the services of independent valuation firms to aid it in determining the fair value of these investments. The types of factors that may be considered in fair value pricing of these investments include the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings, the markets in which the portfolio company does business, comparison to more liquid securities, indices and other market-related inputs, discounted cash flow, our principal market and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a readily available market for these investments existed and may differ materially from the amounts we realize on any disposition of such investments. Our net asset value could be adversely affected if our determinations regarding the fair value of these investments were materially higher than the values that we ultimately realize upon the disposal of such investments.

In addition, decreases in the market values or fair values of our investments are recorded as unrealized depreciation. Unprecedented declines in prices and liquidity in the corporate debt markets have resulted in significant net unrealized depreciation in our portfolio in the past. The effect of all of these factors on our portfolio has reduced our NAV by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses and may continue to suffer additional unrealized losses in future periods, which could have a material adverse impact on our business, financial condition and results of operations.

The lack of liquidity in our investments may adversely affect our business.

We generally make investments in private companies. Substantially all of these securities are subject to legal and other restrictions on resale or are otherwise less liquid than publicly traded securities. The illiquidity of our investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. In addition, we may face other restrictions on our ability to liquidate an

investment in a portfolio company to the extent that we or an affiliated manager of Apollo has material non-public information regarding such portfolio company.

We may experience fluctuations in our periodic results.

We could experience fluctuations in our periodic operating results due to a number of factors, including the interest rates payable on the debt securities we acquire, the default rate on such securities, the level of our expenses (including the interest rates payable on our borrowings), the dividend rates on preferred stock we issue, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Our ability to enter into transactions with our affiliates is restricted.

We are prohibited under the 1940 Act from knowingly participating in certain transactions with certain of our affiliates without the prior approval of our independent directors and, in some cases, of the SEC. Any person that owns, directly or indirectly, 5% or more of our outstanding voting securities will be our affiliate for purposes of the 1940 Act and we are generally prohibited from buying or selling any security (other than our securities) from or to such affiliate, absent the prior approval of our independent directors. The 1940 Act also prohibits certain “joint” transactions with certain of our affiliates, which could include investments in the same portfolio company (whether at the same or different times), without prior approval of our independent directors and, in some cases, of the SEC. We are prohibited from buying or selling any security from or to any person who owns more than 25% of our voting securities or certain of that person’s affiliates, or entering into prohibited joint transactions with such persons, absent the prior approval of the SEC through an exemptive order (other than in certain limited situations pursuant to current regulatory guidance). The analysis of whether a particular transaction constitutes a joint transaction requires a review of the relevant facts and circumstances then existing. Similar restrictions limit our ability to transact business with our officers or directors or their affiliates.

We have applied for an exemptive order from the SEC that would permit us and certain of our affiliates, including investment funds managed by our affiliates, to co-invest. Any such order will be subject to certain terms and conditions and there can be no assurance that such order will be granted by the SEC. Accordingly, we cannot assure you that we or our affiliates, including investment funds managed by our affiliates, will be permitted to co-invest, other than in the limited circumstances currently permitted by regulatory guidance or in the absence of a joint transaction.

There are significant potential conflicts of interest which could adversely affect our investment returns.

Allocation of Personnel

Our executive officers and directors, and the partners of our investment adviser, AIM, serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do or of investment funds managed by our affiliates. Accordingly, they may have obligations to investors in those entities, the fulfillment of which might not be in the best interests of us or our stockholders. Moreover, we note that, notwithstanding the difference in principal investment objectives between us and other Apollo funds, such other Apollo sponsored funds, including new affiliated potential pooled investment vehicles or managed accounts not yet established (whether managed or sponsored by those Apollo affiliates or AIM itself), have and may from time to time have overlapping investment objectives with us and, accordingly, invest in, whether principally or secondarily, asset classes similar to those targeted by us. To the extent such other investment vehicles have overlapping investment objectives, the scope of opportunities otherwise available to us may be adversely affected and/or reduced. As a result, certain partners of AIM may face conflicts in their time management and commitments as well as in the allocation of investment opportunities to other Apollo funds. In addition, in the event such investment opportunities are allocated among us and other investment vehicles managed or sponsored by, or affiliated with, AIM our desired investment portfolio may be

adversely affected. Although AIM endeavors to allocate investment opportunities in a

17

fair and equitable manner, it is possible that we may not be given the opportunity to participate in certain investments made by investment funds managed by AIM or investment managers affiliated with AIM.

No Information Barriers

There are no information barriers amongst Apollo and certain of its affiliates. If AIM were to receive material non-public information about a particular company, or have an interest in investing in a particular company, Apollo or certain of its affiliates may be prevented from investing in such company. Conversely, if Apollo or certain of its affiliates were to receive material non-public information about a particular company, or have an interest in investing in a particular company, we may be prevented from investing in such company.

This risk may affect us more than it does other investment vehicles, as AIM generally does not use information barriers that many firms implement to separate persons who make investment decisions from others who might possess material, non-public information that could influence such decisions. AIM's decision not to implement these barriers could prevent its investment professionals from undertaking certain transactions such as advantageous investments or dispositions that would be permissible for them otherwise. In addition, AIM could in the future decide to establish information barriers, particularly as its business expands and diversifies.

Co-Investment Activity and Allocation of Investment Opportunities

AIM and/or its affiliates ("Apollo") and investment managers may determine that an investment is appropriate both for us and for one or more other funds. In such event, depending on the availability of such investment and other appropriate factors, AIM may determine that we should invest on a side-by-side basis with one or more other funds. We may make all such investments subject to compliance with applicable regulations and interpretations, and our allocation procedures. In certain circumstances negotiated co-investments may be made only if we receive an order from the SEC permitting us to do so. There can be no assurance that any such order will be obtained.

Apollo has adopted allocation procedures that are intended to ensure that each fund or account managed by Apollo ("Apollo-advised funds") is treated in a manner that, over time, is fair and equitable. Allocations generally are made on a pro rata basis. In certain circumstances, the allocation policy provides for the allocation of investments pursuant to a predefined arrangement that is other than pro rata. As a result, in situations where a security is appropriate for us but is limited in availability, we may receive a lower allocation than may be desired by our portfolio managers or no allocation if Apollo believes the investment is more appropriate for a different Apollo-advised fund because of its investment mandate. Investment opportunities may be allocated on a basis other than pro rata to the extent it is done in good faith and does not, or is not reasonably expected to, result in an improper disadvantage or advantage to one participating Apollo-advised fund as compared to another participating Apollo-advised fund.

In the event investment opportunities are allocated among us and the other Apollo-advised funds, we may not be able to structure our investment portfolio in the manner desired. Although Apollo endeavors to allocate investment opportunities in a fair and equitable manner, it is possible that we may not be given the opportunity to participate in certain investments made by the other Apollo-advised funds or portfolio managers affiliated with AIM. Furthermore, we and the other Apollo-advised funds may make investments in securities where the prevailing trading activity may make impossible the receipt of the same price or execution on the entire volume of securities purchased or sold by us and the other Apollo-advised funds. When this occurs, the various prices may be averaged, and we will be charged or credited with the average price. Thus, the effect of the aggregation may operate on some occasions to our disadvantage. In addition, under certain circumstances, we may not be charged the same commission or commission equivalent rates in connection with a bunched or aggregated order.

It is possible that the other Apollo-advised funds may make investments in the same or similar securities at different times and on different terms than we do. From time to time, we and the other Apollo-advised funds may make investments at different levels of an issuer's capital structure or otherwise in different classes of an issuer's securities. Such investments may inherently give rise to conflicts of interest or perceived conflicts of interest between or among the various classes of securities that may be held by such entities. Conflicts may also arise because portfolio decisions regarding us may benefit the other Apollo-advised funds. For example, the sale of a long position or establishment of a short position by us may impair the price of the same security sold short by (and therefore benefit) one or more Apollo-advised funds, and the purchase of a security or covering of a short position in a security by us may increase the price of the same security held by (and therefore benefit) one or more Apollo-advised funds.

Apollo and its clients may pursue or enforce rights with respect to an issuer in which we have invested, and those activities may have an adverse effect on us. As a result, prices, availability, liquidity and terms of our investments may be negatively impacted by the activities of Apollo or its clients, and transactions for us may be impaired or effected at prices or terms that may be less favorable than would otherwise have been the case.

Fees and Expenses

In the course of our investing activities, we pay management and incentive fees to AIM, and reimburse AIM for certain expenses it incurs. As a result, investors in our common stock invest on a "gross" basis and receive distributions on a "net" basis after expenses, resulting in, among other things, a lower rate of return than one might achieve through direct investments. As a result of this arrangement, there may be times when the management team of AIM has interests that differ from those of our common stockholders, giving rise to a conflict.

AIM receives a quarterly incentive fee based, in part, on our pre-incentive fee income, if any, for the immediately preceding calendar quarter. This incentive fee will not be payable to AIM unless the pre-incentive net investment income exceeds the performance threshold. To the extent we or AIM are able to exert influence over our portfolio companies, the quarterly pre-incentive fee may provide AIM with an incentive to induce our portfolio companies to prepay interest or other obligations in certain circumstances.

Allocation of Expenses

We have entered into a royalty-free license agreement with Apollo, which we recently amended and restated, pursuant to which Apollo has agreed to grant us a non-exclusive license to use the name "Apollo." Under the license agreement, we have the right to use the "Apollo" name for so long as AIM or one of its affiliates remains our investment adviser. In addition, we rent office space from AIA, an affiliate of AIM, and pay Apollo Administration our allocable portion of overhead and other expenses incurred by AIA in performing its obligations under the administration agreement, including our allocable portion of the cost of our Chief Financial Officer and Chief Compliance Officer and their respective staffs, which can create conflicts of interest that our board of directors must monitor.

In the past following periods of volatility in the market price of a company's securities, securities class action litigation has, from time to time, been brought against that company.

If our stock price fluctuates significantly, we may be the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources from our business.

Changes in the laws or regulations governing our business or the businesses of our portfolio companies and any failure by us or our portfolio companies to comply with these laws or regulations, could negatively affect the profitability of our operations or of our portfolio companies.

We are subject to changing rules and regulations of federal and state governments, as well as the stock exchange on which our common stock is listed. These entities, including the Public Company Accounting Oversight Board, the SEC and The NASDAQ Global Select Market, have issued a significant number of new and increasingly complex requirements and regulations over the course of the last several years and continue to develop additional regulations. In particular, changes in the laws or regulations or the interpretations of the laws and regulations that govern BDCs, RICs or non-depository commercial lenders could significantly affect our operations and our cost of doing business. We are subject to federal, state and local laws and regulations and are subject to judicial and administrative decisions that affect our operations, including our loan originations, maximum interest rates, fees and other charges, disclosures to portfolio companies, the terms of secured transactions, collection and foreclosure procedures and other trade practices. If these laws, regulations or decisions change, or if we expand our business into jurisdictions that have adopted more stringent requirements than those in which we currently conduct business, we may have to incur significant expenses in order to comply, or we might have to restrict our operations. In addition, if we do not comply with applicable laws, regulations and decisions, we may lose licenses needed for the conduct of our business and be subject to civil fines and criminal penalties, any of which could have a material adverse effect upon our business, financial condition and results of operations.

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

The Maryland General Corporation Law, our charter and our bylaws contain provisions that may discourage, delay or make more difficult a change in control of us or the removal of our directors. We are subject to the Maryland Business Combination Act, subject to any applicable requirements of the 1940 Act. Our board of directors has adopted a resolution exempting from the Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our board of directors, including approval by a majority of our disinterested directors. If the resolution exempting business combinations is repealed or our board of directors does not approve a business combination, the Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer. Our bylaws exempt from the Maryland Control Share Acquisition Act acquisitions of our common stock by any person. If we amend our bylaws to repeal the exemption from the Control Share Acquisition Act, the Control Share Acquisition Act also may make it more difficult for a third party to obtain control of us and increase the difficulty of consummating such an offer. We intend to give the SEC prior notice should our board of directors elect to amend our bylaws to repeal the exemption from the Control Share Acquisition Act.

We have also adopted other measures that may make it difficult for a third party to obtain control of us, including provisions of our charter classifying our board of directors in three classes serving staggered three-year terms, and provisions of our charter authorizing our board of directors to classify or reclassify shares of our stock in one or more classes or series, to cause the issuance of additional shares of our stock, and to amend our charter, without stockholder approval, to increase or decrease the number of shares of stock that we have authority to issue. These provisions, as well as other provisions of our charter and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

We may choose to pay dividends in our own common stock, in which case you may be required to pay federal income taxes in excess of the cash dividends you receive.

We may distribute taxable dividends that are payable in cash and shares of our common stock at the election of each stockholder. Under IRS Revenue Procedure 2010-12, up to 90% of any such taxable dividend for a RIC's taxable years ending on or before December 31, 2011 could be payable in our common stock with the 10% or

greater balance paid in cash. Where Revenue Procedure 2010-12 is not currently applicable, the Internal Revenue Service has also issued private letter rulings on cash/stock dividends paid by RICs and real estate investment trusts using a 20% cash standard (and, more recently, the 10% cash standard of Revenue Procedure 2010-12) if certain requirements are satisfied. Stockholders receiving such dividends will be required to include the full amount of the dividend (including the portion payable in stock) as ordinary income (or, in certain circumstances, long-term capital gain) to the extent of our current and accumulated earnings and profits for federal income tax purposes. As a result, stockholders may be required to pay income taxes with respect to such dividends in excess of the cash dividends received. If a U.S. stockholder sells the common stock that it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our common stock at the time of the sale. Furthermore, with respect to non-U.S. stockholders, we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in common stock. In addition, if a significant number of our stockholders determine to sell shares of our common stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our common stock. It is unclear whether and to what extent we will be able to pay taxable dividends in cash and common stock (whether pursuant to Revenue Procedure 2010-12, a private letter ruling or otherwise). For a more detailed discussion, see “Dividends.”

Climate Change.

There is evidence of global climate change. Climate change creates physical and financial risk and some of our portfolio companies may be adversely affected by climate change. For example, the needs of customers of energy companies vary with weather conditions, primarily temperature and humidity. To the extent weather conditions are affected by climate change, energy use could increase or decrease depending on the duration and magnitude of any changes. Increased energy use due to weather changes may require additional investments by our portfolio companies engaged in the energy business in more pipelines and other infrastructure to serve increased demand. Increases in the cost of energy also could adversely affect the cost of operations of our portfolio companies if the use of energy products or services is material to their business. A decrease in energy use due to weather changes may affect some of our portfolio companies' financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service interruptions. Energy companies could also be affected by the potential for lawsuits against or taxes or other regulatory costs imposed on greenhouse gas emitters, based on links drawn between greenhouse gas emissions and climate change.

Each of our investment adviser and administrator have the right to resign on 60 days' notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our business, financial condition and results of operations.

Each of our investment adviser and administrator has the right, under our investment management agreement and administration agreement, respectively, to resign at any time upon not less than 60 days' written notice, whether we have found a replacement or not. If our investment adviser or our administrator resigns, we may not be able to find a replacement or hire internal management or administration with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our business, financial condition and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities or our internal administration activities, as applicable, is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by our investment adviser and its affiliates or our administrator and its affiliates. Even if we are able to retain comparable management or administration, whether internal or external, the integration of such management or administration and their lack of familiarity with our investment objective may

result in additional costs and time delays that may adversely affect our business, financial condition and results of operations.

RISKS RELATED TO OUR INVESTMENTS

Our investments in prospective portfolio companies are risky, and you could lose all or part of your investment.

Investment in middle-market companies is speculative and involves a number of significant risks including a high degree of risk of credit loss. Middle-market companies may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of us realizing any guarantees we may have obtained in connection with our investment. In addition, they typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns. Middle-market companies are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us. Middle-market companies also generally have less predictable operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position. In addition, our executive officers, directors and our investment adviser may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies.

We invest primarily in various forms of debt investments, including senior secured loans, subordinated and mezzanine investments and/or equity in private middle market companies and we may not realize gains from our equity investments.

Mezzanine loans are generally unsecured and junior to other indebtedness of the issuer. As a consequence the holder of a mezzanine loan may lack adequate protection in the event the issuer becomes distressed or insolvent and will likely experience a lower recovery than more senior debtholders in the event the issuer defaults on its indebtedness. In addition, mezzanine loans of middle market companies are often highly illiquid and in adverse market conditions may experience steep declines in valuation even if they are fully performing.

Senior secured loans are the most senior form of indebtedness of an issuer and, due to the ability of the lender to sell the collateral to repay its loan in the event of default, the lender will likely experience more favorable recovery than more junior creditors in the event of the issuer defaults on its indebtedness.

When we invest in mezzanine and senior secured loans, we have and may continue to acquire warrants or other equity securities as well. In addition, we may invest directly in the equity securities of portfolio companies. Our goal is ultimately to dispose of such equity interests and realize gains upon our disposition of such interests. However, the equity interests we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies may be susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets may increase and the value of our portfolio may decrease during these periods if we are required to write down the values of our investments. Adverse economic conditions also may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our

access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, acceleration of the time when the loans are due and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize the portfolio company's ability to meet its obligations under the debt that we hold. We may incur additional expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company. In addition, if one of our portfolio companies were to go bankrupt, even though we or one of our affiliates may have structured our interest as senior debt, depending on the facts and circumstances, including the extent to which we actually provided significant managerial assistance to that portfolio company, a bankruptcy court might recharacterize our debt holding and subordinate all or a portion of our claim to that of other creditors.

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a BDC or be precluded from investing according to our current business strategy.

As a BDC, we may not acquire any assets other than "qualifying assets" unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. We believe that most of the investments that we may acquire in the future will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could be found to be in violation of the 1940 Act provisions applicable to BDCs, which would have a material adverse effect on our business, financial condition and results of operations. Similarly, these rules could prevent us from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. Because most of our investments will be in private companies, and therefore will be relatively illiquid, any such dispositions could be made at disadvantageous prices and could result in substantial losses.

Our portfolio contains a limited number of portfolio companies, which subjects us to a greater risk of significant loss if any of these companies defaults on its obligations under any of its debt securities.

A consequence of the limited number of investments in our portfolio is that the aggregate returns we realize may be significantly adversely affected if one or more of our significant portfolio company investments perform poorly or if we need to write down the value of any one significant investment. Beyond our income tax diversification requirements, we do not have fixed guidelines for diversification, and our portfolio could contain relatively few portfolio companies.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as "follow-on" investments, in order to: (1) increase or maintain in whole or in part our equity ownership percentage; (2) exercise warrants, options or convertible securities that were acquired in the original or subsequent financing or (3) attempt to preserve or enhance the value of our investment.

We may elect not to make follow-on investments, may be constrained in our ability to employ available funds, or otherwise may lack sufficient funds to make those investments. We have the discretion to make any follow-on investments, subject to the availability of capital resources. The failure to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to

make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want

to increase our concentration of risk, because we prefer other opportunities, or because we are inhibited by compliance with BDC requirements or the desire to maintain our tax status.

When we do not hold controlling equity interests in our portfolio companies, we may not be in a position to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

We do not generally take controlling equity positions in our portfolio companies. To the extent that we do not hold a controlling equity interest in a portfolio company, we are subject to the risk that a portfolio company may make business decisions with which we disagree, and the stockholders and management of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity for the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company, and may therefore suffer a decrease in the value of our investments.

An investment strategy focused primarily on privately-held companies presents certain challenges, including the lack of available information about these companies, a dependence on the talents and efforts of only a few key portfolio company personnel and a greater vulnerability to economic downturns.

We have invested and will continue to invest primarily in privately-held companies. Generally, little public information exists about these companies, and we are required to rely on the ability of AIM's investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies.

If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. Also, privately-held companies frequently have less diverse product lines and smaller market presence than public company competitors, which often are larger. These factors could affect our investment returns.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

We have invested and intend to invest primarily in mezzanine and senior debt securities issued by our portfolio companies. The portfolio companies usually have, or may be permitted to incur, other debt that ranks equally with, or senior to, the debt securities in which we invest. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the debt securities in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying such senior creditors, such portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt securities in which we invest, we would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company. In addition, we may not be in a position to control any portfolio company by investing in its debt securities. As a result, we are subject to the risk that a portfolio company in which we invest may make business decisions with which we disagree and the management of such company, as representatives of the holders of their common equity, may take risks or otherwise act in ways that do not serve our interests as debt investors.

Our incentive fee may induce AIM to make certain investments, including speculative investments.

The incentive fee payable by us to AIM may create an incentive for AIM to make investments on our behalf that are risky or more speculative than would be the case in the absence of such compensation arrangement. The way in which the incentive fee payable to AIM is determined, which is calculated separately in two components as a percentage of the net investment income (subject to a performance threshold) and as a percentage of the realized gain on invested capital, may encourage our investment adviser to use leverage to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor the holders of our common stock, including investors in offerings of common stock, securities convertible into our common stock or warrants representing rights to purchase our common stock or securities convertible into our common stock pursuant to this prospectus. In addition, AIM receives the incentive fee based, in part, upon net capital gains realized on our investments. Unlike the portion of the incentive fee based on net investment income, there is no performance threshold applicable to the portion of the incentive fee based on net capital gains. As a result, AIM may have a tendency to invest more in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

The incentive fee payable by us to AIM also may create an incentive for AIM to invest on our behalf in instruments that have a deferred interest feature such as investments with PIK provisions. Under these investments, we would accrue the interest over the life of the investment but would typically not receive the cash income from the investment until the end of the term or upon the investment being called by the issuer. Our net investment income used to calculate the income portion of our incentive fee, however, includes accrued interest. Thus, while a portion of this incentive fee would be based on income that we have not yet received in cash and with respect to which we do not have a formal claw-back right against our investment adviser per se, the amount of accrued income to the extent written off in any period will reduce the income in the period in which such write-off was taken and thereby reduce such period's incentive fee payment. However, AIM has agreed to waive the receipt of incentive fees related to PIK through March 31, 2014.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds, and, to the extent we so invest, will bear our ratable share of any such investment company's expenses, including management and performance fees.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds, and, to the extent we so invest, will bear our ratable share of any such investment company's expenses, including management and performance fees. We will also remain obligated to pay management and incentive fees to AIM with respect to the assets invested in the securities and instruments of other investment companies. With respect to each of these investments, each of our common stockholders will bear his or her share of the management and incentive fee of AIM as well as indirectly bearing the management and performance fees and other expenses of any investment companies in which we invest.

We may be obligated to pay our investment adviser incentive compensation even if we incur a loss.

Our investment adviser is entitled to incentive compensation for each fiscal quarter in an amount equal to a percentage of the excess of our pre-incentive fee net investment income for that quarter (before deducting incentive compensation) above a performance threshold for that quarter. Accordingly, since the performance threshold is based on a percentage of our net asset value, decreases in our net asset value make it easier to achieve the performance threshold. Our pre-incentive fee net investment income for incentive compensation purposes excludes realized and unrealized capital losses or depreciation that we may incur in the fiscal quarter, even if such capital losses or depreciation result in a net loss on our statement of operations for that quarter. Thus, we may be required to pay AIM

incentive compensation for a fiscal quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter. In addition, increases in interest rates may increase the amount of incentive fees we pay to our investment adviser even though our performance relative to the market has not increased.

Our investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments.

Our investment strategy contemplates that a portion of our investments may be in securities of foreign companies. Investing in foreign companies may expose us to additional risks not typically associated with investing in U.S. companies. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility. These risks are likely to be more pronounced for investments in companies located in emerging markets and particularly for middle-market companies in these economies.

Although most of our investments are denominated in U.S. dollars, our investments that are denominated in a foreign currency are subject to the risk that the value of a particular currency may change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation, and political developments. We may employ hedging techniques to minimize these risks, but we can offer no assurance that we will, in fact, hedge currency risk or, that if we do, such strategies will be effective.

Hedging transactions may expose us to additional risks.

If we engage in hedging transactions, we may expose ourselves to risks associated with such transactions. We may utilize instruments such as forward contracts, currency options and interest rate swaps, caps, collars and floors to seek to hedge against fluctuations in the relative values of our portfolio positions from changes in currency exchange rates and market interest rates. Hedging against a decline in the values of our portfolio positions does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline. However, such hedging can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions may also limit the opportunity for gain if the values of the underlying portfolio positions should increase. Moreover, it may not be possible to hedge against an exchange rate or interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price.

While we may enter into transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates may result in poorer overall investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged may vary. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it may not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities is likely to fluctuate as a result of factors not related to currency fluctuations. Our ability to engage in hedging transactions may also be adversely affected by recent rules adopted by the CFTC.

RISKS RELATED TO MATURITY OF OUR DEBT INSTRUMENTS

Our senior secured revolving credit facility begins maturing in May 2016 and any inability to renew, extend or replace our senior secured revolving credit facility could adversely impact our liquidity and ability to find new investments or maintain distributions to our stockholders.

We maintain a senior secured multi-currency revolving credit facility with a group of lenders, under which we had approximately \$539 million of indebtedness outstanding at March 31, 2012. The previously outstanding credit facility was amended on May 23, 2012 pursuant to an amended and restated facility (the “Amended & Restated Facility”). Our lenders’ obligation to make new loans or other extensions of credit under the Amended & Restated Facility cease on May 23, 2015, and the Amended & Restated Facility has a final stated maturity date of May 23, 2016. In addition, commencing on June 23, 2015, we are required to repay, in twelve consecutive monthly installments of equal size, the outstanding amount under the Amended & Restated Facility as of May 23, 2015. There can be no assurance that we will be able to renew, extend or replace the Amended & Restated Facility upon the termination of the lenders’ obligations to make new loans or the Amended & Restated Facility’s final maturity on terms that are favorable to us, if at all. Our ability to renew, extend or replace the Amended & Restated Facility will be constrained by then-current economic conditions affecting the credit markets. In the event that we are not able to renew, extend or replace the Facility at the time of the termination of the lenders’ obligations to make new loans or the Amended & Restated Facility’s final maturity, this could have a material adverse effect on our liquidity and ability to fund new investments, our ability to make distributions to our stockholders and our ability to qualify as a RIC.

Our senior secured notes and our senior unsecured convertible notes have maturity dates over the course of the next several years, and any inability to replace or repay our senior secured notes or our senior unsecured convertible notes could adversely impact our liquidity and ability to fund new investments or maintain distributions to our stockholders.

On September 30, 2010, we entered into a note purchase agreement, providing for a private placement issuance of \$225 million in aggregate principal amount of five-year, senior secured notes with a fixed interest rate of 6.25% and a maturity date of October 4, 2015 (the “Senior Secured Notes”). On January 25, 2011, we closed a private offering of \$200 million aggregate principal amount of senior unsecured convertible notes (the “Convertible Notes”). The Convertible Notes bear interest at an annual rate of 5.75% and will mature on January 15, 2016 unless earlier converted or repurchased at the holder’s option. On September 29, 2011, we closed a private offering of \$45 million aggregate principal amount of senior secured notes (the “Notes”) consisting of two series: (1) 5.875% Senior Secured Notes, Series A, due September 29, 2016 in the aggregate principal amount of \$29 million; and (2) 6.250% Senior Secured Notes, Series B, due September 29, 2018, in the aggregate principal amount of \$16 million. There can be no assurance that we will be able to replace the Senior Secured Notes, the Convertible Notes or the Notes upon their maturity on terms that are favorable to us, if at all. Our ability to replace the Senior Secured Notes, the Convertible Notes or the Notes will be constrained by then-current economic conditions affecting the credit markets. In the event that we are not able to replace or repay the Senior Secured Notes, the Convertible Notes or the Notes at the time of their maturity, this could have a material adverse effect on our liquidity and ability to fund new investments, our ability to make distributions to our stockholders and our ability to qualify as a RIC.

RISKS RELATED TO ISSUANCE OF OUR PREFERRED STOCK

An investment in our preferred stock should not constitute a complete investment program.

If we issue preferred stock, the net asset value and market value of our common stock may become more volatile.

We cannot assure you that the issuance of preferred stock would result in a higher yield or return to the holders of the common stock. The issuance of preferred stock would likely cause the net asset value and market value of the common stock to become more volatile. If the dividend rate on the preferred stock were to approach the net rate of return on our investment portfolio, the benefit of leverage to the holders of the common stock would be reduced. If the dividend rate on the preferred stock were to exceed the net rate of return on our portfolio, the leverage would result in a lower rate of return to the holders of common stock than if we had not issued preferred stock. Any decline in the net asset value of our investments would be borne entirely by the holders of common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in net asset value to the holders of common stock than if we were not leveraged through the issuance of preferred stock. This greater net asset value decrease would also tend to cause a greater decline in the market price for the common stock. We might be in danger of failing to maintain the required asset coverage of the preferred stock or of losing our ratings on the preferred stock or, in an extreme case, our current investment income might not be sufficient to meet the dividend requirements on the preferred stock. In order to counteract such an event, we might need to liquidate investments in order to fund a redemption of some or all of the preferred stock. In addition, we would pay (and the holders of common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock, including higher advisory fees if our total return exceeds the dividend rate on the preferred stock. Holders of preferred stock may have different interests than holders of common stock and may at times have disproportionate influence over our affairs.

Holders of any preferred stock we might issue would have the right to elect members of the board of directors and class voting rights on certain matters.

Holders of any preferred stock we might issue, voting separately as a single class, would have the right to elect two members of the board of directors at all times and in the event dividends become two full years in arrears would have the right to elect a majority of the directors until such arrearage is completely eliminated. In addition, preferred stockholders have class voting rights on certain matters, including changes in fundamental investment restrictions and conversion to open-end status, and accordingly can veto any such changes. Restrictions imposed on the declarations and payment of dividends or other distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies or the terms of our credit facilities, might impair our ability to maintain our qualification as a RIC for federal income tax purposes. While we would intend to redeem our preferred stock to the extent necessary to enable us to distribute our income as required to maintain our qualification as a RIC, there can be no assurance that such actions could be effected in time to meet the tax requirements.

RISKS RELATING TO AN INVESTMENT IN OUR COMMON STOCK

Investing in our securities involves a high degree of risk and is highly speculative.

The investments we make in accordance with our investment objective may result in a higher amount of risk than alternative investment options and volatility or loss of principal. Our investments in portfolio companies may be highly speculative and aggressive, therefore, an investment in our securities may not be suitable for someone with a low risk tolerance.

There is a risk that investors in our equity securities may not receive dividends or that our dividends may not grow over time and that investors in our debt securities may not receive all of the interest income to which they are entitled.

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. In addition, due to the asset coverage test applicable to us as a business development company, we may in the future be limited in our ability to make distributions. Also, our revolving credit facility may limit our ability to declare dividends if we default under certain provisions or fail to satisfy certain other conditions. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of the tax benefits available to us as a RIC. In addition, in accordance with U.S. generally accepted accounting principles and tax regulations, we include in income certain amounts that we have not yet received in cash, such as contractual payment-in-kind interest, which represents contractual interest added to the loan balance that becomes due at the end of the loan term, or the accrual of original issue or market discount. Since we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute at least 90% of our investment company taxable income in cash to obtain tax benefits as a RIC.

We will be subject to a 4% nondeductible federal excise tax on certain undistributed income of RICs unless we distribute in a timely manner an amount at least equal to the sum of (1) 98% of our ordinary income for each calendar year, (2) 98.2% of our capital gain net income for the one-year period ending October 31 in that calendar year and (3) any income recognized, but not distributed, in preceding years. We will not be subject to excise taxes on amounts on which we are required to pay corporate income taxes (such as retained net capital gains).

Finally, if more stockholders opt to receive cash dividends rather than participate in our dividend reinvestment plan, we may be forced to liquidate some of our investments and raise cash in order to make cash dividend payments.

Our shares may trade at discounts from net asset value or at premiums that are unsustainable over the long term.

Shares of business development companies may trade at a market price that is less than the net asset value that is attributable to those shares. The possibility that our shares of common stock will trade at a discount from net asset value or at a premium that is unsustainable over the long term are separate and distinct from the risk that our net asset value will decrease. It is not possible to predict with any assurance whether the shares offered hereby will trade at, above, or below net asset value.

Investigations and reviews of Apollo affiliates' use of placement agents could harm our reputation, depress our stock price or have other negative consequences.

While we have not, to date, raised any funds through the use of placement agents (other than through the ordinary course engagement of underwriters, from time to time, in connection with the public offering of our securities), affiliates of AIM sometimes use placement agents to assist in marketing certain of the investment funds that they manage. Various state attorneys general and federal and state agencies have initiated industry-wide investigations into the use of placement agents in connection with the solicitation of investments, particularly with respect to investments by public pension funds. Certain affiliates of AGM have received subpoenas and other requests for information from various government regulatory agencies and investors in AGM's funds, seeking information regarding the use of placement agents. The California Public Employees' Retirement System, ("CalPERS"), one of AGM's strategic investors, announced on October 14, 2009, that it had initiated a special review of placement agents and related issues. The report of the CalPERS special review was issued on March 14, 2011. That report does not allege any wrongdoing on the part of AGM or its affiliates. In addition, on May 6, 2010, the California Attorney General filed a civil complaint against Alfred Villalobos and his company, Arvco Capital

Research, LLC (a placement agent that AGM has used) and Federico Buenrostro Jr., the former CEO of CalPERS, alleging conduct in violation of certain California laws in connection with CalPERS' purchase of securities in various funds managed by AGM and another asset manager. No AGM entity is a party to the civil lawsuit, nor does the lawsuit allege any misconduct on our part or on the part of AIM or AGM. Likewise, on April 23, 2012, the United States Securities and Exchange Commission filed a lawsuit alleging securities fraud on the part of Arvco, as well as Messrs. Buenrostro and Villalobos, in connection with their activities concerning certain CalPERS investments in funds managed by AGM. This lawsuit also does not allege wrongdoing on the part of AGM, and in fact alleges that AGM was defrauded by Arvco, Villalobos, and Buenrostro. Finally, on December 29, 2011, the United States Bankruptcy Court for the District of Nevada approved an application made by Mr. Villalobos, Arvco and related entities (the "Arvco Debtors") in their consolidated bankruptcy proceedings to hire Special Litigation Counsel to pursue certain claims on behalf of the bankruptcy estates of the Arvco Debtors, including potential claims against AGM (a) for fees that AGM purportedly owes the Arvco Debtors for placement agent services, and (b) for indemnification of legal fees and expenses arising out of the Arvco Debtors' defense of the California Attorney General action described above. AGM has informed us that it believes it has handled its use of placement agents in an appropriate manner and that it is cooperating with such investigations and other reviews. Any unanticipated developments from these or future investigations or changes in industry practice may adversely affect AGM's business (including with respect to AIM) or indirectly thereby, our business. Even if these investigations or changes in industry practice do not directly or indirectly affect AGM's or our respective businesses, adverse publicity could harm our reputation and may cause us to lose existing investors, fail to gain new investors, depress our stock price or have other negative consequences.

The market price of our securities may fluctuate significantly.

The market price and liquidity of the market for our securities may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

- volatility in the market price and trading volume of securities of business development companies or other companies in our sector, which are not necessarily related to the operating performance of these companies;
- changes in regulatory policies or tax guidelines, particularly with respect to RICs or business development companies;
 - loss of RIC status;
- changes in earnings or variations in operating results;
- changes in the value of our portfolio of investments;
- any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;
 - departure of AIM's key personnel;
- operating performance of companies comparable to us;
- general economic trends and other external factors; and

loss of a major funding source.

We may be unable to invest the net proceeds raised from offerings on acceptable terms, which would harm our financial condition and operating results.

Until we identify new investment opportunities, we intend to either invest the net proceeds of future offerings in interest-bearing deposits or other short-term instruments or use the net proceeds from such offerings to reduce then-outstanding obligations under our credit facility. We cannot assure you that we will be able to find enough appropriate investments that meet our investment criteria or that any investment we complete using the proceeds from an offering will produce a sufficient return.

Sales of substantial amounts of our securities may have an adverse effect on the market price of our securities.

Sales of substantial amounts of our securities, or the availability of such securities for sale, could adversely affect the prevailing market prices for our securities. If this occurs and continues, it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

If you do not fully exercise your subscription rights in any rights offering of our common stock, your interest in us may be diluted and, if the subscription price is less than our net asset value per share, you may experience an immediate dilution of the aggregate net asset value of your shares.

In the event we issue subscription rights to acquire shares of our common stock, stockholders who do not fully exercise their subscription rights should expect that they will, at the completion of the rights offering, own a smaller proportional interest in us than would be the case if they fully exercised their rights.

In addition, if the subscription price is less than the net asset value per share of our common stock, a stockholder who does not fully exercise its subscription rights may experience an immediate dilution of the aggregate net asset value of its shares as a result of the offering.

We would not be able to state the amount of any such dilution prior to knowing the results of the offering. Such dilution could be substantial. See “Sales of Common Stock Below Net Asset Value.”

Stockholders may experience dilution in their ownership percentage if they do not participate in our dividend reinvestment plan.

All dividends declared in cash payable to stockholders that are participants in our dividend reinvestment plan are generally automatically reinvested in shares of our common stock. As a result, stockholders that do not participate in the dividend reinvestment plan may experience dilution over time. Stockholders who do not elect to receive dividends in shares of common stock may experience accretion to the net asset value of their shares if our shares are trading at a premium and dilution if our shares are trading at a discount. The level of accretion or discount would depend on various factors, including the proportion of our stockholders who participate in the plan, the level of premium or discount at which our shares are trading and the amount of the dividend payable to a stockholder.

USE OF PROCEEDS

We intend to use the net proceeds from selling securities pursuant to this prospectus for general corporate purposes, which include investing in portfolio companies in accordance with our investment objective and strategies. We anticipate that substantially all of the net proceeds of an offering of securities pursuant to this prospectus will be used within two years, depending on the availability of appropriate investment opportunities consistent with our investment objective and market conditions. Our portfolio is comprised primarily of investments in subordinated debt, sometimes referred to as mezzanine debt, and senior secured loans of private middle-market companies that, in the case of senior secured loans, generally are not broadly syndicated and whose aggregate tranche size is typically less than \$300 million. Pending our investments in new debt investments, we plan to invest a portion of the net proceeds from an offering in cash equivalents, U.S. government securities and other high-quality debt investments that mature in one year or less from the date of investment, to reduce then-outstanding obligations under our debt instruments, or for other general corporate purposes. The management fee payable by us will not be reduced while our assets are invested in such securities. See “Regulation—Temporary investments” for additional information about temporary investments we may make while waiting to make longer-term investments in pursuit of our investment objective. The supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering.

DIVIDENDS

We intend to continue to distribute quarterly dividends to our stockholders. Our quarterly dividends, if any, will be determined by our board of directors. We expect that our distributions to shareholders generally will be from accumulated net investment income and from cumulative net realized capital gains, as applicable, although a portion may represent a return of capital.

We have elected to be taxed as a RIC under Subchapter M of the Code. To maintain our RIC status, we must distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. In addition, although we currently intend to distribute realized net capital gains (i.e., net long-term capital gains in excess of short-term capital losses), if any, at least annually, out of the assets legally available for such distributions, we may in the future decide to retain such capital gains for investment. In addition, we have substantial net capital loss carryforwards and consequently do not expect to generate cumulative net capital gains in the foreseeable future. We maintain an “opt out” dividend reinvestment plan for our common stockholders. As a result, if we declare a dividend, then stockholders’ cash dividends will be automatically reinvested in additional shares of our common stock, unless they specifically “opt out” of the dividend reinvestment plan so as to receive cash dividends.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. In addition, due to the asset coverage test applicable to us as a business development company, we may in the future be limited in our ability to make distributions. Also, our revolving credit facility may limit our ability to declare dividends if we default under certain provisions or fail to satisfy certain other conditions. If we do not distribute a certain percentage of our income annually, we may suffer adverse tax consequences, including possible loss of the tax benefits available to us as a regulated investment company. In addition, in accordance with U.S. generally accepted accounting principles and tax regulations, we include in income certain amounts that we have not yet received in cash, such as contractual payment-in-kind interest, which represents contractual interest added to the loan balance that becomes due at the end of the loan term, or the accrual of original issue or market discount. Since we may recognize income before or without receiving cash representing such income, we may not be able to meet the requirement to distribute at least 90% of our investment company taxable income to obtain tax benefits as a regulated investment company.

With respect to the dividends to stockholders, income from origination, structuring, closing, commitment and other upfront fees associated with investments in portfolio companies is treated as taxable income and accordingly, distributed to stockholders.

All dividends declared in cash payable to stockholders that are participants in our dividend reinvestment plan are generally automatically reinvested in shares of our common stock. As a result, stockholders that do not participate in the dividend reinvestment plan may experience dilution over time. Stockholders who do not elect to receive dividends in shares of common stock may experience accretion to the net asset value of their shares if our shares are trading at a premium and dilution if our shares are trading at a discount. The level of accretion or discount would depend on various factors, including the proportion of our stockholders who participate in the plan, the level of premium or discount at which our shares are trading and the amount of the dividend payable to a stockholder.

Pursuant to a recent revenue procedure (Revenue Procedure 2010-12), issued by the IRS (the “Revenue Procedure”), the IRS has indicated that it will treat distributions from certain publicly traded RICs (including BDCs) that are paid part in cash and part in stock as dividends that would satisfy the RIC’s annual distribution requirements and qualify for the dividends paid deduction for federal income tax purposes. In order to qualify for such treatment, the Revenue Procedure requires that at least 10% of the total distribution be payable in cash and that each stockholder have a right to elect to receive its entire distribution in cash. If too many stockholders elect to receive cash, each stockholder

electing to receive cash must receive a proportionate share of the cash to be distributed (although no stockholder electing to receive cash may receive less than 10% of such stockholder's distribution in

cash). This Revenue Procedure applies to distributions declared on or before December 31, 2012 with respect to taxable years ending on or before December 31, 2011.

The following table lists the quarterly dividends per share from our common stock for the past two fiscal years.

	Declared Dividends
Fiscal Year Ended March 31, 2012	
Fourth Fiscal Quarter	\$ 0.20
Third Fiscal Quarter	\$ 0.28
Second Fiscal Quarter	\$ 0.28
First Fiscal Quarter	\$ 0.28
Fiscal Year Ended March 31, 2011	
Fourth Fiscal Quarter	\$ 0.28
Third Fiscal Quarter	\$ 0.28
Second Fiscal Quarter	\$ 0.28
First Fiscal Quarter	\$ 0.28

SELECTED FINANCIAL DATA

The Statement of Operations, Per Share and Balance Sheet data for the fiscal years ended March 31, 2012, 2011, 2010, 2009 and 2008 are derived from our financial statements, which have been audited by PricewaterhouseCoopers LLP, our independent registered public accounting firm.

This selected financial data should be read in conjunction with our financial statements and related notes thereto and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included elsewhere in this prospectus.

For the Year Ended March 31,
(dollar amounts in thousands,
except per share data)

Statement of Operations Data:	2012	2011	2010	2009	2008
Total Investment Income	\$357,584	\$358,779	\$340,238	\$377,304	\$357,878
Net Expenses (including excise taxes)	\$184,842	\$167,607	\$140,828	\$170,973	\$156,272
Net Investment Income	\$172,742	\$191,172	\$199,410	\$206,331	\$201,606
Net Realized and Unrealized Gains (Losses)	\$(259,006)	\$(10,760)	\$63,880	\$(818,210)	\$(235,044)
Net Increase (Decrease) in Net Assets Resulting from Operations	\$(86,264)	\$180,412	\$263,290	\$(611,879)	\$(33,438)
Per Share Data:					
Net Asset Value	\$8.55	\$10.03	\$10.06	\$9.82	\$15.83
Net Investment Income	\$0.88	\$0.99	\$1.26	\$1.48	\$1.82
Net Increase (Decrease) in Net Assets Resulting from Operations (Basic and Diluted)	\$(0.44)	\$0.93	\$1.65	\$(4.39)	\$(0.30)
Distributions Declared	\$1.04	\$1.12	\$1.10	\$1.82	\$2.07
Balance Sheet Data:					
Total Assets	\$2,775,263	\$3,148,813	\$3,465,116	\$2,548,639	\$3,724,324
Debt Outstanding	\$1,009,337	\$1,053,443	\$1,060,616	\$1,057,601	\$1,639,122
Total Net Assets	\$1,685,231	\$1,961,031	\$1,772,806	\$1,396,138	\$1,897,908
Other Data:					
Total Return(1)	(32.4)%	5.1 %	313.0 %	(73.9)%	(17.5)%
Number of Portfolio Companies at Year End	62	69	67	72	71
Total Portfolio Investments for the Year	\$1,480,508	\$1,085,601	\$716,425	\$434,995	\$1,755,913
Investment Sales and Prepayments for the Year	\$1,634,520	\$977,493	\$451,687	\$339,724	\$714,225
Weighted Average Yield on Debt Portfolio at Year End	11.9 %	11.6 %	11.8 %	11.7 %	12.0 %
Weighted Average Shares Outstanding at Year End (Basic) (2)	196,584	193,192	159,369	139,469	112,050

(1) Total return is based on the change in market price per share and takes into account dividends and distributions, if any, reinvested in accordance with our dividend reinvestment plan.

(2) Weighted Average Shares Outstanding on a diluted basis for the fiscal year ended March 31, 2012 were 211,132. Weighted Average Shares Outstanding on a diluted basis for the fiscal year ended March 31, 2011 were 195,823. For the fiscal years ended 2010, 2009, and 2008, basic and diluted weighted average shares were the same.

FORWARD-LOOKING STATEMENTS

Some of the statements in this prospectus constitute forward-looking statements, which relate to future events or our future performance or financial condition. The forward-looking statements contained in this prospectus involve risks and uncertainties, including statements as to:

- our future operating results;
- our business prospects and the prospects of our portfolio companies;
- the impact of investments that we expect to make;
- our contractual arrangements and relationships with third parties;
- the dependence of our future success on the general economy and its impact on the industries in which we invest;
- the ability of our portfolio companies to achieve their objectives;
- our expected financings and investments;
- the adequacy of our cash resources and working capital; and
- the timing of cash flows, if any, from the operations of our portfolio companies.

We generally use words such as “anticipates,” “believes,” “expects,” “intends” and similar expressions to identify forward-looking statements. Our actual results could differ materially from those projected in the forward-looking statements for any reason, including the factors set forth in “Risk Factors” and elsewhere in this prospectus.

We have based the forward-looking statements included in this prospectus on information available to us on the date of this prospectus. Although we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, we have a general obligation to update to reflect material changes in our disclosures and you are advised to consult any additional disclosures that we may make directly to you or through reports that we in the future may file with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our financial statements and related notes and other financial information appearing elsewhere in this prospectus. In addition to historical information, the following discussion and other parts of this prospectus contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by such forward-looking information due to the factors discussed under "Risk Factors" and "Forward-Looking Statements" appearing elsewhere in this prospectus.

OVERVIEW

We were incorporated under the Maryland General Corporation Law in February 2004. We have elected to be treated as a BDC under the 1940 Act. As such, we are required to comply with certain regulatory requirements. For instance, we generally have to invest at least 70% of our total assets in "qualifying assets," including securities of private or thinly traded public U.S. companies, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less. In addition, for federal income tax purposes we have elected to be treated as a RIC under Subchapter M of the Code. Pursuant to this election and assuming we qualify as a RIC, we generally do not have to pay corporate-level federal income taxes on any income we distribute to our stockholders. We commenced operations on April 8, 2004 upon completion of our initial public offering that raised \$870 million in net proceeds selling 62 million shares of our common stock at a price of \$15.00 per share. Since then, and through March 31, 2012, we have raised approximately \$1.9 billion in net proceeds from additional offerings of common stock.

Investments

Our level of investment activity can and does vary substantially from period to period depending on many factors, including the amount of debt and equity capital available to middle market companies, the level of merger and acquisition activity for such companies, the general economic environment and the competitive environment for the types of investments we make. As a BDC, we must not acquire any assets other than "qualifying assets" specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our total assets are qualifying assets (with certain limited exceptions). Qualifying assets include investments in "eligible portfolio companies." Pursuant to rules adopted by the SEC, "eligible portfolio company" includes certain public companies that do not have any securities listed on a national securities exchange and public companies whose securities are listed on a national securities exchange but whose market capitalization is less than \$250 million.

Revenue

We generate revenue primarily in the form of interest and dividend income from the securities we hold and capital gains, if any, on investment securities that we may acquire in portfolio companies. Our debt investments, whether in the form of mezzanine or senior secured loans, generally have a stated term of five to ten years and bear interest at a fixed rate or a floating rate usually determined on the basis of a benchmark: LIBOR, EURIBOR, GBP LIBOR, or the prime rate. Interest on debt securities is generally payable quarterly or semiannually and while U.S. subordinated debt and corporate notes typically accrue interest at fixed rates, some of our investments may include zero coupon and/or step-up bonds that accrue income on a constant yield to call or maturity basis. In addition, some of our investments provide for PIK interest or dividends. Such amounts of accrued PIK interest or dividends are added to the cost of the investment on the respective capitalization dates and generally become due at maturity of the investment or upon the investment being called by the issuer. We may also generate revenue from other sources, such as commitment, origination, structuring fees, fees for providing managerial assistance and, if applicable, consulting fees.

Expenses

All investment professionals of the investment adviser and their staff, when and to the extent engaged in providing investment advisory and management services to us, and the compensation and routine overhead expenses of that personnel which is allocable to those services are provided and paid for by AIM. We bear all other costs and expenses of our operations and transactions, including those relating to:

- investment advisory and management fees;
- expenses incurred by AIM payable to third parties, including agents, consultants or other advisors, in monitoring our financial and legal affairs and in monitoring our investments and performing due diligence on our prospective portfolio companies;
 - calculation of our net asset value (including the cost and expenses of any independent valuation firm);
- direct costs and expenses of administration, including independent registered public accounting and legal costs;
 - costs of preparing and filing reports or other documents with the SEC;
 - interest payable on debt, if any, incurred to finance our investments;
 - offerings of our common stock and other securities;
 - registration and listing fees;
- fees payable to third parties, including agents, consultants or other advisors, relating to, or associated with, evaluating and making investments;
 - transfer agent and custodial fees;
 - taxes;
 - independent directors' fees and expenses;
 - marketing, offering and distribution-related expenses;
- the costs of any reports, proxy statements or other notices to stockholders, including printing and postage costs;
- our allocable portion of the fidelity bond, directors and officers/errors and omissions liability insurance, and any other insurance premiums;

organizational costs; and

· all other expenses incurred by us or AIA in connection with administering our business, such as our allocable portion of overhead under the administration agreement, including rent and our allocable portion of the cost of our chief financial officer and chief compliance officer and their respective staffs.

We expect our general and administrative operating expenses related to our ongoing operations to increase moderately in dollar terms. During periods of asset growth, we generally expect our general and administrative operating expenses to decline as a percentage of our total assets and increase during periods of asset declines. Incentive fees, interest expense and costs relating to future offerings of securities, among others, may also increase or reduce overall operating expenses based on portfolio performance, interest rate benchmarks, and offerings of our securities relative to comparative periods, among other factors.

The SEC requires that “Total annual expenses” be calculated as a percentage of net assets in the chart on page 6 rather than as a percentage of total assets. Total assets includes net assets as of March 31, 2012 and assets that have been funded with borrowed monies (leverage). For reference, the below chart illustrates our “Total annual expenses” as a percentage of total assets:

Annual expenses (as percentage of total assets):

Management fees	2.00	%(1)
Incentive fees payable under investment advisory and management agreement	1.43	%(2)
Interest and other debt expenses on borrowed funds	2.39	%(3)
Other expenses	0.67	%(4)
Total annual expenses	6.49	%(1, 2, 3, 4)

- (1) The contractual management fee is calculated at an annual rate of 2.00% of our average total assets. Annual expenses are based on current fiscal year amounts. For more detailed information about our computation of average total assets, please see Note 3 of our financial statements dated March 31, 2012 included in this base prospectus.
- (2) Assumes that annual incentive fees earned by our investment adviser, AIM, remain consistent with the incentive fees earned by AIM for the fiscal year ended March 31, 2012. AIM earns incentive fees consisting of two parts. The first part, which is payable quarterly in arrears, is based on our pre-incentive fee net investment income for the immediately preceding calendar quarter. Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets at the end of the immediately preceding calendar quarter, is compared to the rate of 1.75% quarterly (7% annualized). Our net investment income used to calculate this part of the incentive fee is also included in the amount of our gross assets used to calculate the 2% base management fee (see footnote 1 above). Accordingly, we pay AIM an incentive fee as follows: (1) no incentive fee in any calendar quarter in which our pre-incentive fee net investment income does not exceed 1.75%, which we commonly refer to as the performance threshold; (2) 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the performance threshold but does not exceed 2.1875% in any calendar quarter; and (3) 20% of the amount of our pre-incentive fee net investment income, if any, that exceeds 2.1875% in any calendar quarter. These calculations are appropriately pro rated for any period of less than three months. The effect of the fee calculation described above is that if pre-incentive fee net investment income is equal to or exceeds 2.1875%, AIM will receive a fee of 20% of our pre-incentive fee net investment income for the quarter. You should be aware that a rise in the general level of interest rates can be expected to lead to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates would make it easier for us to meet or exceed the incentive fee performance threshold and may result in a substantial increase of the amount of incentive fees payable to our investment adviser with respect to pre-incentive fee net investment income. Furthermore, since the performance threshold is based on a percentage of our net asset value, decreases in our net asset value make it easier to achieve the performance threshold. The second part of the incentive fee will equal 20% of our realized capital gains for the calendar year, if any, computed net of all realized capital losses and unrealized capital depreciation (and incorporating unrealized depreciation on a gross investment-by-investment basis) and is payable in arrears at the end of each calendar year. For a more detailed discussion of the calculation of this fee, see "Management—Investment Advisory and Management Agreement" in this base prospectus.
- (3) Our interest and other debt expenses are based on current fiscal year amounts. As of March 31, 2012, we had \$0.715 billion available and \$0.539 billion in borrowings outstanding under our \$1.254 billion credit facility. For more information, see "Risk Factors—Risks relating to our business and structure—We fund a portion of our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us" and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources" in this base prospectus.
- (4) Includes our estimated overhead expenses, including payments under the administration agreement based on our allocable portion of overhead and other expenses incurred by AIA in performing its obligations under the

administration agreement. See "Management—Administration Agreement" in this base prospectus.

Portfolio and Investment Activity

During our fiscal year ended March 31, 2012, we invested \$1.5 billion across 21 new and 18 existing portfolio companies through a combination of primary and secondary market purchases. This compares to investing \$1.1

billion in 21 new and 18 existing portfolio companies for the previous fiscal year ended March 31, 2011. Investments sold or prepaid during the fiscal year ended March 31, 2012 totaled \$1.6 billion versus \$977 million for the fiscal year ended March 31, 2011.

At March 31, 2012, our net portfolio consisted of 62 portfolio companies and was invested 30% in senior secured loans, 60% in subordinated debt, 1% in preferred equity and 9% in common equity and warrants measured at fair value versus 69 portfolio companies invested 33% in senior secured loans, 58% in subordinated debt, 1% in preferred equity and 8% in common equity and warrants at March 31, 2011.

The weighted average yields on our senior secured loan portfolio, subordinated debt portfolio and total debt portfolio as of March 31, 2012 at our current cost basis were 10.2%, 12.7% and 11.9%, respectively. At March 31, 2011, the yields were 9.0%, 13.1%, and 11.6%, respectively.

Since our initial public offering in April 2004 and through March 31, 2012, invested capital totaled \$8.8 billion in 166 portfolio companies. Over the same period, we also completed transactions with more than 100 different financial sponsors. A financial sponsor is a term commonly used to refer to private equity investment firms, particularly those private equity firms that engage in leveraged buyout transactions.

At March 31, 2012, 67% or \$1.6 billion of our income-bearing investment portfolio is fixed rate debt and 33% or \$0.8 billion is floating rate debt, measured at fair value. On a cost basis, 65% or \$1.7 billion of our income-bearing investment portfolio is fixed rate debt and 35% or \$0.9 billion is floating rate debt. At March 31, 2011, 59% or \$1.7 billion of our income-bearing investment portfolio was fixed rate debt and 41% or \$1.2 billion was floating rate debt. On a cost basis, 60% or \$1.7 billion of our income-bearing investment portfolio is fixed rate debt and 40% or \$1.1 billion is floating rate debt.

CRITICAL ACCOUNTING POLICIES

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America, or GAAP. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Changes in the economic environment, financial markets and any other parameters used in determining such estimates could cause actual results to differ materially. In addition to the discussion below, our critical accounting policies are further described in the notes to the financial statements.

Valuation of Portfolio Investments

Under procedures established by our board of directors, we value investments, including certain senior secured debt, subordinated debt, and other debt securities with maturities greater than 60 days, for which market quotations are readily available, at such market quotations (unless they are deemed not to represent fair value). We attempt to obtain market quotations from at least two brokers or dealers (if available, otherwise from a principal market maker or a primary market dealer or other independent pricing service). We utilize mid-market pricing as a practical expedient for fair value unless a different point within the range is more representative. If and when market quotations are deemed not to represent fair value, we typically utilize independent third party valuation firms to assist us in determining fair value. Accordingly, such investments go through our multi-step valuation process as described below. In each case, our independent valuation firms consider observable market inputs together with significant unobservable inputs in arriving at their valuation recommendations for such Level 3 categorized assets. Debt investments with remaining maturities of 60 days or less shall each be valued at cost with interest accrued or discount amortized to the date of maturity, unless such valuation, in the judgment of our investment adviser, does not represent

fair value, in which case such investments shall be valued at fair value as determined in good faith by or under the direction of our board of directors. Investments that are not publicly traded or whose market quotations

are not readily available are valued at fair value as determined in good faith by or under the direction of our board of directors. Such determination of fair values may involve subjective judgments and estimates.

With respect to investments for which market quotations are not readily available or when such market quotations are deemed not to represent fair value, our board of directors has approved a multi-step valuation process each quarter, as described below:

- (1) our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals of our investment adviser responsible for the portfolio investment;
- (2) preliminary valuation conclusions are then documented and discussed with senior management of our investment adviser;
- (3) independent valuation firms are engaged by our board of directors to conduct independent appraisals by reviewing our investment adviser's preliminary valuations and then making their own independent assessment;
- (4) the audit committee of the board of directors reviews the preliminary valuation of our investment adviser and the valuation prepared by the independent valuation firm and responds to the valuation recommendation of the independent valuation firm to reflect any comments; and
- (5) the board of directors discusses valuations and determines the fair value of each investment in our portfolio in good faith based on the input of our investment adviser, the respective independent valuation firm and the audit committee.

Investments in all asset classes are valued utilizing a market approach, an income approach, or both approaches, as appropriate. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities (including a business). The income approach uses valuation techniques to convert future amounts (for example, cash flows or earnings) to a single present amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts. In following these approaches, the types of factors that we may take into account in fair value pricing our investments include, as relevant: available current market data, including relevant and applicable market trading and transaction comparables, applicable market yields and multiples, security covenants, call protection provisions, information rights, the nature and realizable value of any collateral, the portfolio company's ability to make payments, its earnings and discounted cash flows, the markets in which the portfolio company does business, comparisons of financial ratios of peer companies that are public, M&A comparables, our principal market (as the reporting entity) and enterprise values, among other factors. When readily available, broker quotations and/or quotations provided by pricing services are considered in the valuation process of independent valuation firms. For the fiscal year ended March 31, 2012, there was no change to our valuation techniques and related inputs considered in the valuation process.

ASC 820 classifies the inputs used to measure these fair values into the following hierarchy:

Level 1: Quoted prices in active markets for identical assets or liabilities, accessible by us at the measurement date.

Level 2: Quoted prices for similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active, or other observable inputs other than quoted prices.

Level 3: Unobservable inputs for the asset or liability.

In all cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to each investment.

In May 2011, the FASB issued Accounting Standards Update No. 2011-04, "Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs," ("ASU 2011-04") which results in a consistent definition of fair value and common requirements for measurement of and disclosure about fair value between GAAP and IFRS. ASU 2011-04 is effective for interim and annual periods beginning after December 15, 2011. We adopted ASU 2011-04 on January 1, 2012.

Revenue Recognition

We record interest and dividend income, adjusted for amortization of premium and accretion of discount, on an accrual basis. Some of our loans and other investments, including certain preferred equity investments, may have contractual payment-in-kind ("PIK") interest or dividends. PIK interest and dividends computed at the contractual rate are accrued into income and reflected as receivable up to the capitalization date. PIK investments offer issuers the option at each payment date of making payments in cash or in additional securities. When additional securities are received, they typically have the same terms, including maturity dates and interest rates as the original securities issued. On these payment dates, we capitalize the accrued interest or dividends receivable (reflecting such amounts as the basis in the additional securities received). PIK generally becomes due at maturity of the investment or upon the investment being called by the issuer. At the point we believe PIK is not expected to be realized, the PIK investment will be placed on non-accrual status. When a PIK investment is placed on non-accrual status, the accrued, uncapitalized interest or dividends are reversed from the related receivable through interest or dividend income, respectively. We do not reverse previously capitalized PIK interest or dividends. Upon capitalization, PIK is subject to the fair value estimates associated with their related investments. PIK investments on non-accrual status are restored to accrual status if we again believe that PIK is expected to be realized. For the fiscal year ended March 31, 2012, accrued PIK totaled \$17.3 million, on total investment income of \$357.6 million. Loan origination fees, original issue discount, and market discounts are capitalized and amortized into income using the interest method or straight-line, as applicable. Upon the prepayment of a loan, any unamortized loan origination fees are recorded as interest income. We record prepayment premiums on loans and other investments as interest income when we receive such amounts. Structuring fees are recorded as other income when earned. Investments that are expected to pay regularly scheduled interest and/or dividends in cash are generally placed on non-accrual status when principal or interest/dividend cash payments are past due 30 days or more and/or when it is no longer probable that principal or interest/dividend cash payments will be collected. Such non-accrual investments are restored to accrual status if past due principal and interest or dividends are paid in cash, and in management's judgment, are likely to continue timely payment of their remaining interest or dividend obligations. Interest or dividend cash payments received on non-accrual designated investments may be recognized as income or applied to principal depending upon management's judgment.

Net Realized Gains or Losses and Net Change in Unrealized Appreciation or Depreciation

We measure realized gains or losses by the difference between the net proceeds from the repayment or sale and the amortized cost basis of the investment, without regard to unrealized appreciation or depreciation previously recognized, but considering unamortized upfront fees and prepayment penalties. Net change in unrealized

appreciation or depreciation reflects the change in portfolio investment values during the reporting period, including the reversal of previously recorded unrealized appreciation or depreciation.

Within the context of these critical accounting policies, we are not currently aware of any reasonably likely events or circumstances that would result in materially different amounts being reported.

RESULTS OF OPERATIONS

Results comparisons are for the fiscal years ended March 31, 2012, March 31, 2011 and March 31, 2010.

Investment Income

For the fiscal years ended March 31, 2012, 2011 and 2010, gross investment income totaled \$357.6 million, \$358.8 million and \$340.2 million, respectively. The decrease in gross investment income from fiscal year 2011 to fiscal year 2012 was primarily due to a decrease in the size of the income-producing portfolio as compared to the previous fiscal year and was partially offset by an increase in the weighted average portfolio yield as well as an increase in other income. The increase in gross investment income from fiscal year 2010 to fiscal year 2011 was primarily due to an increase in the size of the income-producing portfolio as compared to the previous fiscal year.

Expenses

Net expenses totaled \$184.8 million, \$167.6 million and \$139.6 million, respectively, for the fiscal years ended March 31, 2012, 2011 and 2010, of which \$100.0 million, \$107.6 million and \$103.9 million, respectively, were base management fees and performance-based incentive fees and \$66.4 million, \$48.0 million and \$24.5 million, respectively, were interest and other debt expenses. Administrative services and other general and administrative expenses totaled \$18.5 million, \$12.0 million and \$11.2 million, respectively, for the fiscal years ended March 31, 2012, 2011 and 2010. Net expenses consist of base investment advisory and management fees, insurance expenses, administrative services fees, legal fees, directors' fees, audit and tax services expenses, and other general and administrative expenses. The increase in net expenses from fiscal 2011 to fiscal 2012 was primarily due to an increase in interest and other debt expenses as our net weighted average annual interest cost increased by approximately 100 basis points. This increase was due to the impact of fixed rate debt issuances. Additionally, during fiscal 2012 there were net non-recurring general and administrative expenses that totaled over \$4 million. The increase in net expenses from fiscal 2010 to fiscal 2011 was primarily due to an increase in interest and other debt expenses as we added new sources of capital that increased our weighted average annual interest cost. Accrued excise tax expenses totaled \$0, \$0, and \$1.2 million for the fiscal years ended March 31, 2012, 2011 and 2010.

Net Investment Income

Our net investment income totaled \$172.7 million, \$191.2 million and \$199.4 million, or \$0.88, \$0.99, and \$1.26, on a per average share basis, respectively, for the fiscal years ended March 31, 2012, 2011 and 2010.

Net Realized Losses

We had investment sales and prepayments totaling \$1.6 billion, \$977 million and \$452 million, respectively, for the fiscal years ended March 31, 2012, 2011 and 2010. Net realized losses for the fiscal years ended March 31, 2012, 2011, and 2010 were \$341.4 million, \$152.0 million and \$473.0 million, respectively. Net realized losses incurred during fiscal year 2012 were primarily derived from the exits of select investments, specifically Grand Prix Holdings, which accounted for over \$273 million of the realized loss totals, but also included Playpower Holdings,

TL Acquisitions and FSC Holdings, among others. The realized losses incurred upon the exit of these investments reversed out previously reported unrealized losses. Net realized losses incurred during fiscal years 2011 and 2010 were primarily related to sales and restructurings of certain underperforming portfolio companies such as American Safety Razor, LVI Services and Pacific Crane Maintenance Company, various portfolio optimization measures, and our liquidity management strategy during the financial crisis early in the 2010 fiscal year.

Net Unrealized Appreciation (Depreciation) on Investments, Cash Equivalents and Foreign Currencies

For the fiscal years ended March 31, 2012, 2011 and 2010 net change in unrealized appreciation on our investments, cash equivalents, foreign currencies and other assets and liabilities totaled \$82.4 million, \$141.3 million and \$536.9 million, respectively. Net unrealized appreciation for fiscal 2012 included the reclassification of over \$273 million of previously recognized unrealized depreciation on our investment in Grand Prix Holdings to a realized loss. This reclassification was offset by generally weaker capital market conditions as compared to the year ago period. Net unrealized appreciation for fiscal 2011 and 2010 was primarily due to the recognition of realized losses which reversed unrealized depreciation, net changes in specific portfolio company fundamentals, and improving capital market conditions.

Net Increase (Decrease) in Net Assets From Operations

For the fiscal year ended March 31, 2012, we had a net decrease in net assets resulting from operations of \$86.3 million. For the fiscal years ended March 31, 2011 and 2010, we had a net increase in net assets resulting from operations of \$180.4 million and \$263.3 million, respectively. For the year ended March 31, 2012, basic and diluted losses per average share were \$0.44. For the years ended March 31, 2011 and 2010, basic and diluted earnings per average share were \$0.93 and \$1.65, respectively.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity and capital resources are generated and generally available through periodic follow-on equity and debt offerings, our senior secured, multi-currency \$1.254 billion revolving credit facility maturing on April 12, 2013 (see note 12 within the Notes to Financial Statements and "Recent Events" on page 44) (the "Facility"), our senior secured notes, investments in special purpose entities in which we hold and finance particular investments on a non-recourse basis, as well as from cash flows from operations, investment sales of liquid assets and prepayments of senior and subordinated loans and income earned from investments. We also have investments in our portfolio that contain PIK provisions. PIK investments offer issuers the option at each payment date of making payments in cash or in additional securities. When additional securities are received, they typically have the same terms, including maturity dates and interest rates as the original securities issued. On these payment dates, we capitalize the accrued interest or dividends receivable (reflecting such amounts as the basis in the additional securities received). PIK generally becomes due at maturity of the investment or upon the investment being called by the issuer. In order to maintain our status as a RIC, this non-cash source of income must be paid out to stockholders annually in the form of dividends, even though we have not yet collected the cash. For the fiscal year ended March 31, 2012, accrued PIK totaled \$17.3 million, on total investment income of \$357.6 million. At March 31, 2012, we had \$539 million in borrowings outstanding on its Facility and \$715 million of unused capacity. As of March 31, 2012, aggregate lender commitments under the Facility that was replaced by the Amended & Restated Facility total \$1.254 billion.

On September 30, 2010, we entered into a note purchase agreement, providing for a private placement issuance of \$225 million in aggregate principal amount of five-year, senior secured notes with a fixed interest rate of 6.25% and a maturity date of October 4, 2015 (the "Senior Secured Notes"). On October 4, 2010, the Senior Secured Notes were sold to certain institutional accredited investors pursuant to an exemption from registration under the Securities Act of 1933, as amended. Interest on the Senior Secured Notes will be due semi-annually on April 4 and October 4,

commencing on April 4, 2011. The proceeds from the issuance of the Senior Secured Notes were primarily used to reduce other outstanding borrowings and/or commitments on our Facility.

On January 25, 2011, we closed a private offering of \$200 million aggregate principal amount of senior unsecured convertible notes (the “Convertible Notes”). The Convertible Notes were issued in a private placement only to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933. The Convertible Notes bear interest at an annual rate of 5.75%, payable semi-annually in arrears on January 15 and July 15 of each year, commencing on July 15, 2011. The Convertible Notes will mature on January 15, 2016 unless earlier converted or repurchased at the holder’s option. Prior to December 15, 2015, the Convertible Notes will be convertible only upon certain corporate reorganizations, dilutive recapitalizations or dividends, or if, during specified periods our shares trade at more than 130% of the then applicable conversion price or the Convertible Notes trade at less than 97% of their conversion value and, thereafter, at any time. The Convertible Notes will be convertible by the holders into shares of common stock, initially at a conversion rate of 72.7405 shares of our common stock per \$1,000 principal amount of Convertible Notes (14,548,100 common shares) corresponding to an initial conversion price of approximately \$13.75, which represents a premium of 17.5% to the \$11.70 per share closing price of our common stock on The NASDAQ Global Select Market on January 19, 2011. The conversion rate will be subject to adjustment upon certain events, such as stock splits and combinations, mergers, spin-offs, increases in dividends in excess of \$0.28 per share per quarter and certain changes in control. Certain of these adjustments, including adjustments for increases in dividends, are subject to a conversion price floor of \$11.70 per share. The Convertible Notes are senior unsecured obligations and rank senior in right of payment to our existing and future indebtedness that is expressly subordinated in right of payment to the Convertible Notes; equal in right of payment to our existing and future unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of our secured indebtedness (including existing unsecured indebtedness that we later secure) to the extent of the value of the assets securing such indebtedness; and structurally junior to all existing and future indebtedness (including trade payables) incurred by our subsidiaries, financing vehicles or similar facilities.

On August 11, 2011, we adopted a plan for the purpose of repurchasing up to \$200 million of our common stock in accordance with the guidelines specified in Rule 10b-18 and Rule 10b5-1 of the Securities Exchange Act of 1934. Our plan was designed to allow us to repurchase our shares both during our open window periods and at times when we otherwise might be prevented from doing so under insider trading laws or because of self-imposed trading blackout periods. A broker selected by us will have the authority under the terms and limitations specified in the plan to repurchase shares on our behalf in accordance with the terms of the plan. Repurchases are subject to SEC regulations as well as certain price, market volume and timing constraints specified in the plan. While the portion of the plan reliant on Rule 10b-18 remains in effect, the portion reliant on Rule 10b5-1 is subject to periodic renewal and is not currently in effect. As of March 31, 2012, no shares have been repurchased.

On September 29, 2011, we closed a private offering of \$45 million aggregate principal amount of senior secured notes (the “Notes”) consisting of two series: (1) 5.875% Senior Secured Notes, Series A, due September 29, 2016 in the aggregate principal amount of \$29 million; and (2) 6.250% Senior Secured Notes, Series B, due September 29, 2018, in the aggregate principal amount of \$16 million. The Notes were issued in a private placement only to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended.

Cash Equivalents

We deem certain U.S. Treasury bills, repurchase agreements and other high-quality, short-term debt securities as cash equivalents. (See note 2(m) within the accompanying financial statements.) At the end of each fiscal quarter, we consider taking proactive steps utilizing cash equivalents with the objective of enhancing our investment flexibility during the following quarter, pursuant to Section 55 of the 1940 Act. More specifically, we may purchase U.S. Treasury bills from time-to-time on the last business day of the quarter and typically close out that position on the following business day, settling the sale transaction on a net cash basis with the purchase, subsequent to quarter end. We may also utilize repurchase agreements or other balance sheet transactions, including drawing down on our Facility, as we deem appropriate. The amount of these transactions or such drawn cash for this purpose is excluded

from total assets for purposes of computing the asset base upon which the management fee is determined. There were no cash equivalents held as of March 31, 2012.

Contractual Obligations

	Payments due by Period as of March 31, 2012 (dollars in millions)				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Senior Secured Revolving Credit Facility (1)	\$539	\$—	\$539	\$—	\$—
Senior Secured Notes	\$270	\$—	\$—	\$254	\$16
Unsecured Notes	\$200	\$—	\$—	\$200	\$—

(1) At March 31, 2012, \$715 million remained unused under our Facility.

We have entered into two contracts under which we have future commitments: the investment advisory and management agreement, pursuant to which AIM has agreed to serve as our investment adviser, and the administration agreement, pursuant to which the Administrator has agreed to furnish us with the facilities and administrative services necessary to conduct our day-to-day operations and provide on our behalf managerial assistance to those portfolio companies to which we are required to provide such assistance. Payments under the investment advisory and management agreement are equal to (1) a percentage of the value of our average gross assets and (2) a two-part incentive fee. Payments under the administration agreement are equal to an amount based upon our allocable portion of the Administrator's overhead in performing its obligations under the administration agreement, including rent, technology systems, insurance and our allocable portion of the costs of our chief financial officer and chief compliance officer and their respective staffs. Either party may terminate each of the investment advisory and management agreement and administration agreement without penalty upon not more than 60 days' written notice to the other. Please see note 3 within our financial statements for more information.

Off-Balance Sheet Arrangements

As of March 31, 2012, we had two outstanding commitments with two banks to purchase unsecured bridge loans in the aggregate amount of \$80 million. Our commitments were subject to the consummation of the underlying corporate transactions and conditional upon receipt of all necessary shareholder, regulatory and other applicable approvals. Subsequent to March 31, 2012, such unsecured bridge loan commitments were extinguished with the permanent placement of high yield securities.

We also have a commitment to fund a revolving senior loan in the amount of \$5.5 million. As of March 31, 2012, \$3.3 million of this revolving senior loan remained unfunded.

AIC Credit Opportunity Fund LLC

We own all of the common member interests in AIC Credit Opportunity Fund LLC ("AIC Holdco"). AIC Holdco was formed for the purpose of holding various financed investments. AIC Holdco wholly owns three special purpose entities, each of which in 2008 acquired directly or indirectly an investment in a particular security from an unaffiliated entity that provided leverage for the investment as part of the sale. Each of these transactions is described in more detail below together with summary financial information.

In the first of these investments, in June 2008 we invested through AIC Holdco \$39.5 million in AIC (FDC) Holdings LLC ("Apollo FDC"). Apollo FDC used the proceeds to purchase a Junior Profit-Participating Note due 2013 in principal amount of \$39.5 million (the "Junior Note") issued by Apollo I Trust (the "Trust"). The Trust also issued a Senior Floating Rate Note due 2013 (the "Senior Note") to an unaffiliated third party ("FDC Counterparty") in principal amount of \$39.5 million paying interest at Libor plus 1.50%, increasing over time to Libor plus 2.0%. The Trust used the aggregate \$79 million proceeds to acquire \$100 million face value of a senior subordinated loan of First Data

Corporation (the "FDC Loan") due 2016. The FDC Loan pays interest at 11.25% per year. The Junior Note of the Trust owned by Apollo FDC pays to Apollo FDC all of the interest and other proceeds received by the Trust on the FDC Loan after satisfying the Trust's obligations on the Senior Note. The holder of the Senior Note has

no recourse to Apollo FDC, AIC Holdco or us with respect to any interest on, or principal of, the Senior Note. However, if the value of the FDC Loan held by the Trust declines sufficiently, the investment would be unwound unless Apollo FDC posts additional collateral for the benefit of the Senior Note. Consequently, the maximum exposure on this investment is the amount of our investment in the Junior Note and any additional collateral we determine to post. During the fiscal year ended March 31, 2012, we sold \$47.145 million face value of the FDC Loan. As a result of this transaction, as of March 31, 2012, the FDC Loan balance is \$52.855 million, the Junior Note balance is \$21.472 million and the Senior Note balance is \$20.283 million.

In the second of these investments, in June 2008 we invested through AIC Holdco \$11.375 million in AIC (TXU) Holdings LLC ("Apollo TXU"). Apollo TXU acquired exposure to \$50 million notional amount of a Libor plus 3.5% senior secured delayed draw term loan of Texas Competitive Electric Holdings ("TXU") due 2014 through a non-recourse total return swap (the "TRS") with an unaffiliated third party expiring on October 10, 2013. Pursuant to such delayed draw term loan, Apollo TXU pays an unaffiliated third-party interest at Libor plus 1.5% and generally receives all proceeds due under the delayed draw term loan of TXU (the "TXU Term Loan"). Like Apollo FDC, Apollo TXU is entitled to 100% of any realized appreciation in the TXU Term Loan and, since the TRS is a non-recourse arrangement, Apollo TXU is exposed only up to the amount of its investment in the TRS, plus any additional margin we decide to post, if any, during the term of the financing. The TRS does not constitute a senior security or a borrowing of Apollo TXU. In connection with the amendment and extension of the TXU Term Loan in April 2011, for which Apollo TXU received a consent fee along with an increase in the rate of the TXU Term Loan to Libor plus 4.5%, Apollo TXU extended its TRS to 2016 at a rate of Libor plus 2.0%.

In the third of these investments, in September 2008 we invested through AIC Holdco \$10.022 million in AIC (Boots) Holdings, LLC ("Apollo Boots"). Apollo Boots acquired €23.383 million and £12.465 million principal amount of senior term loans of AB Acquisitions Topco 2 Limited, a holding company for the Alliance Boots group of companies (the "Boots Term Loans"), out of the proceeds of our investment and a multicurrency \$40.876 million equivalent non-recourse loan to Apollo Boots (the "Acquisition Loan") by an unaffiliated third party that matures in September 2013 and pays interest at LIBOR plus 1.25% or, in certain cases, the higher of the Federal Funds Rate plus 0.50% or the lender's prime-rate. The Boots Term Loans pay interest at the rate of LIBOR plus 3% per year and mature in June 2015.

We do not consolidate AIC Holdco or its wholly owned subsidiaries and accordingly only the value of our investment in AIC Holdco is included on our statement of assets and liabilities. Our investment in AIC Holdco is valued in accordance with our normal valuation procedures and is based on the values of the underlying assets held by each of Apollo FDC, Apollo TXU and Apollo Boots net of associated liabilities.

The Senior Note, TRS and Acquisition Loan are non-recourse to AIC Holdco, its subsidiaries and us and have standard events of default including failure to pay contractual amounts when due and failure by each of the underlying Apollo special purpose entities to provide additional credit support, sell assets or prepay a portion of its obligations if the value of the FDC Term Loan, the TXU Term Loan or the Boots Term Loans, as applicable, declines below specified levels. We may unwind any of these transactions at any time without penalty. From time to time we may provide additional capital to AIC Holdco for purposes of reserving for or funding margin calls under one or more of the transactions described above among other reasons. During the fiscal year ended March 31, 2009, we provided \$18.48 million in additional net capital to AIC Holdco. During the fiscal year ended March 31, 2010, \$9.336 million of net capital was returned to us from AIC Holdco. During the fiscal year ended March 31, 2011, \$1.7 million of net capital was provided to AIC Holdco. During the fiscal year ended March 31, 2012, \$8.712 million of net capital was returned to us from AIC Holdco. The Junior Note, TRS and Boots Term Loans were performing assets as of the date of these financial statements.

Below is summarized financial information for AIC Holdco for the fiscal years ended March 31, 2012 and March 31, 2011 (all dollar amounts in table and accompanying footnotes in thousands).

	March 31, 2012	March 31, 2011

Total Net Income (Loss) \$(14,162) \$34,032

- (1) Represents fair value of the Junior Note held by Apollo FDC. Cost: \$21,472 and \$39,500, respectively.
- (2) Represents fair value of collateral posted in relation to the TRS held by Apollo TXU. Cost: \$26,066 and \$16,749, respectively.
- (3) Represents fair value of the Boots Term Loans held by Apollo Boots. Cost: \$50,109 and \$50,109, respectively.

- (4) Apollo FDC's interest is subject to a senior note of a separate entity of \$20,283 and \$39,500, respectively; However, Apollo FDC has no liability for such senior note.
- (5) Represents liability on the TRS held by Apollo TXU.
- (6) Represents liability of Apollo Boots on the Acquisition Loan.
- (7) In the case of Apollo FDC, net operating income consists of interest income on the Junior Note less interest paid on the senior note together with immaterial administrative expenses. In the case of Apollo TXU, net operating income consists of net payments from (to) the swap counterparty of Apollo TXU's obligation to pay interest and its right to receive the proceeds in respect of the reference asset, together with immaterial administrative expenses. In the case of AIC Boots, net operating income consists of interest income on the Boots Term Loans, less interest payments on the Acquisition Loan together with immaterial administrative expenses. There are no management or incentive fees.
- (8) Net income is the sum of operating income, realized gain (loss) and net change in unrealized gain (loss).

Dividends

Dividends paid to stockholders for the fiscal years ended March 31, 2012, 2011 and 2010 totaled \$204.4 million or \$1.04 per share, \$218.1 million or \$1.12 per share, and \$181.4 million or \$1.10 per share, respectively. Tax characteristics of all dividends will be reported to shareholders on Form 1099 after the end of the calendar year. Our quarterly dividends, if any, will be determined by our board of directors.

The following table summarizes our quarterly dividends paid to stockholders for the fiscal years ended March 31, 2012, 2011 and 2010, respectively:

	Declared Dividends
Fiscal Year Ending March 31, 2012	
Fourth Fiscal Quarter	\$0.20
Third Fiscal Quarter	\$0.28
Second Fiscal Quarter	\$0.28
First Fiscal Quarter	\$0.28
Fiscal Year Ending March 31, 2011	
Fourth Fiscal Quarter	\$0.28
Third Fiscal Quarter	\$0.28
Second Fiscal Quarter	\$0.28
First Fiscal Quarter	\$0.28
Fiscal Year Ending March 31, 2010	
Fourth Fiscal Quarter	\$0.28
Third Fiscal Quarter	\$0.28
Second Fiscal Quarter	\$0.28
First Fiscal Quarter	\$0.26

We have elected to be taxed as a RIC under Subchapter M of the Code. To maintain our RIC status, we must distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. In addition, although we currently intend to distribute realized net capital gains (i.e., net long-term capital gains in excess of short-term capital losses), if

any, at least annually, out of the assets legally available for such distributions, we may in the future decide to retain such capital gains for investment.

We maintain an “opt out” dividend reinvestment plan for our common stockholders. As a result, if we declare a dividend, then stockholders’ cash dividends will be automatically reinvested in additional shares of our common stock, unless they specifically “opt out” of the dividend reinvestment plan so as to receive cash dividends.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. In addition, due to the asset coverage test applicable to us as a business development company, we may in the future be limited in our ability to make distributions. Also, our revolving credit facility may limit our ability to declare dividends if we default under certain provisions or fail to satisfy other conditions. If we do not distribute a certain percentage of our income annually, we may suffer adverse tax consequences, including possible loss of the tax benefits available to us as a regulated investment company. In addition, in accordance with U.S. generally accepted accounting principles and tax regulations, we include in income certain amounts that we have not yet received in cash, such as contractual payment-in-kind interest, which represents contractual interest added to the loan balance that becomes due at the end of the loan term, or the accrual of original issue or market discount. Since we may recognize income before or without receiving cash representing such income, we may not be able to meet the requirement to distribute at least 90% of our investment company taxable income to obtain tax benefits as a regulated investment company.

With respect to the dividends to stockholders, income from origination, structuring, closing, commitment and other upfront fees associated with investments in portfolio companies is treated as taxable income and accordingly, distributed to stockholders.

Pursuant to a recent revenue procedure (Revenue Procedure 2010-12), issued by the IRS (the “Revenue Procedure”), the IRS has indicated that it will treat distributions from certain publicly traded RICs (including BDCs) that are paid part in cash and part in stock as dividends that would satisfy the RIC’s annual distribution requirements and qualify for the dividends paid deduction for federal income tax purposes. In order to qualify for such treatment, the Revenue Procedure requires that at least 10% of the total distribution be payable in cash and that each stockholder have a right to elect to receive its entire distribution in cash. If too many stockholders elect to receive cash, each stockholder electing to receive cash must receive a proportionate share of the cash to be distributed (although no stockholder electing to receive cash may receive less than 10% of such stockholder’s distribution in cash). This Revenue Procedure applies to distributions declared on or before December 31, 2012 with respect to taxable years ending on or before December 31, 2011.

Recent Events

On April 2, 2012, we announced that an indirect subsidiary of Apollo Global Management, LLC purchased approximately \$50 million, or approximately 5,900,000 newly issued shares, of our common stock, at an estimated NAV per share of \$8.45. The final number of shares issued was 5,847,953, based on the NAV as of March 31, 2012 of \$8.55 per share. AIM is waiving the base management and incentive fees associated with this equity capital for a one year period.

On April 4, 2012, we made a \$40.4 million equity investment in a newly launched senior loan fund being managed by an affiliate of Madison Capital Funding LLC (“Madison Capital”). The loan vehicle purchased from Madison Capital an existing pool of senior secured loans to middle market companies in the United States with approximately \$250 million of combined face value. These loans were originated by Madison Capital between April 2011 and March 2012.

On May 14, 2012, we amended and restated our royalty-free license agreement with Apollo.

On May 23, 2012, we amended and restated our senior secured, multi-currency, revolving credit facility (the “Amended & Restated Facility”). The Amended & Restated Facility extends the lenders’ commitments totaling

approximately \$1.14 billion through May, 2015, and allows us to seek additional commitments from new and existing lenders in the future, up to an aggregate facility size not to exceed \$1.71 billion. The final maturity date of the Amended & Restated Facility is May 23, 2016. Commencing June 23, 2015, we are required to repay, in twelve consecutive monthly installments of equal size, the outstanding amount under the Amended & Restated Facility as of May 23, 2015. Pricing for Alternate Base Rate (ABR) borrowings will be 125 basis points over the applicable Prime Rate and pricing for eurocurrency borrowings will be 225 basis points over the LIBO Rate. Terms used in the foregoing sentence have the meanings set forth in the Amended & Restated Facility.

Effective on May 23, 2012, Gregory W. Hunt is our Chief Financial Officer and Treasurer.

Quantitative and Qualitative Disclosure about Market Risk

We are subject to financial market risks, including changes in interest rates. During the fiscal year ended March 31, 2012, many of the loans in our portfolio had floating interest rates. These loans are usually based on floating LIBOR and typically have durations of one to six months after which they reset to current market interest rates. As the percentage of our U.S. mezzanine and other subordinated loans increase as a percentage of our total investments, we expect that more of the loans in our portfolio will have fixed rates. We also have a revolving credit facility that is based on floating LIBOR rates. Assuming no changes to our balance sheet as of March 31, 2012, a hypothetical one percent increase in LIBOR on our floating rate assets and liabilities would decrease our earnings by approximately one cent per average share over the next twelve months. Assuming no changes to our balance sheet as of March 31, 2012, a hypothetical one percent decrease in LIBOR on our floating rate assets and liabilities would increase our earnings by approximately one cent per average share over the next twelve months. However, we may hedge against interest rate fluctuations from time-to-time by using standard hedging instruments such as futures, options and forward contracts subject to the requirements of the 1940 Act and applicable commodities laws. While hedging activities may insulate us against adverse changes in interest rates, they may also limit our ability to participate in the benefits of lower interest rates with respect to our portfolio of investments. During the fiscal year ended March 31, 2012, we did not engage in interest rate hedging activities.

SALES OF COMMON STOCK BELOW NET ASSET VALUE

We submitted to our stockholders, for their approval, a proposal seeking authorization for our ability, in one or more public or private offerings of our common stock, to sell or otherwise issue shares of our common stock at a price below our then current net asset value (“NAV”) per share, subject to certain conditions discussed below. The stockholders voted and approved the proposal at our annual meeting of stockholders held on August 7, 2011 and will vote on the proposal again at our adjourned 2012 annual meeting of stockholders on September 5, 2012. The current authorization is effective for a twelve-month period expiring on August 2, 2012, the anniversary date of our 2011 annual meeting.

Conditions to Sales Below NAV. From time to time we may sell shares of our common stock at a price below NAV, exclusive of sales compensation, only if the following conditions are met:

- a majority of our independent directors who have no financial interest in the sale have approved the sale;
- a majority of such directors, who are not interested persons of Apollo Investment, in consultation with the underwriter or underwriters of the offering if it is to be underwritten, have determined in good faith, and as of a time immediately prior to the first solicitation by or on behalf of Apollo Investment of firm commitments to purchase such securities or immediately prior to the sale of such securities, that the price at which such securities are to be sold is not less than a price which closely approximates the market value of those securities, less any underwriting commission or discount; and
- the number of shares sold pursuant to such authority does not exceed 25% of our then outstanding common stock immediately prior to each such sale.

There is no maximum level of discount from NAV at which we may sell shares pursuant to this authority. In making a determination that an offering below NAV per share is in our and our stockholders’ best interests, our board of directors may also consider a variety of factors including:

- The effect that an offering below NAV per share would have on our stockholders, including the potential dilution they would experience as a result of the offering;
- The amount per share by which the offering price per share and the net proceeds per share are less than the most recently determined NAV per share;
- The relationship of recent market prices of common stock to NAV per share and the potential impact of the offering on the market price per share of our common stock;
- Whether the estimated offering price would closely approximate the market value of our shares and would not be below current market price;
 - The potential market impact of being able to raise capital in the current financial market;
 - The nature of any new investors anticipated to acquire shares in the offering;
 - The anticipated rate of return on and quality, type and availability of investments; and
 - The leverage available to us.

We will not sell shares under a prospectus supplement to the registration statement or current post-effective amendment thereto of which this prospectus forms a part (the “current registration statement”) if the cumulative dilution to our NAV per share from offerings under the current registration statement exceeds 15%. This limit would be measured separately for each offering pursuant to the current registration statement by calculating the percentage dilution or accretion to aggregate NAV from that offering and then summing the percentage from each offering. For

example, if our most recently determined NAV per share at the time of the first offering is \$10.00 and we have 140 million shares outstanding, sale of 35 million shares at net proceeds to us of \$5.00 per share (a 50% discount) would produce dilution of 10.0%. If we subsequently determined that our NAV per share increased to \$11.00 on the then 175 million shares outstanding and then made an additional offering, we could, for example, sell approximately an additional 43.75 million shares at net proceeds to us of \$8.25 per share, which would produce dilution of 5.0%, before we would reach the aggregate 15% limit. If we file a new post-effective amendment, the threshold would reset.

Sales by us of our common stock at a discount from NAV pose potential risks for our existing stockholders whether or not they participate in the offering, as well as for new investors who participate in the offering.

The following three headings and accompanying tables will explain and provide hypothetical examples on the impact of an offering at a price less than NAV per share on three different set of investors:

· existing shareholders who do not purchase any shares in the offering.

· existing shareholders who purchase a relatively small amount of shares in the offering or a relatively large amount of shares in the offering.

· new investors who become shareholders by purchasing shares in the offering.

Impact on Existing Stockholders who do not Participate in the Offering

Our existing stockholders who do not participate in an offering below NAV per share or who do not buy additional shares in the secondary market at the same or lower price we obtain in the offering (after expenses and commissions) face the greatest potential risks. These stockholders will experience an immediate decrease (often called dilution) in the NAV of the shares they hold and their NAV per share. These stockholders will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than the increase we will experience in our assets, potential earning power and voting interests due to the offering. These stockholders may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in NAV per share. This decrease could be more pronounced as the size of the offering and level of discounts increase.

The following table illustrates the level of net asset value dilution that would be experienced by a nonparticipating stockholder in three different hypothetical offerings of different sizes and levels of discount from net asset value per share, although it is not possible to predict the level of market price decline that may occur. Actual sales prices and discounts may differ from the presentation below.

The examples assume that we have 1,000,000 common shares outstanding, \$15,000,000 in total assets and \$5,000,000 in total liabilities. The current net asset value and net asset value per share are thus \$10,000,000 and \$10.00. The table illustrates the dilutive effect on a nonparticipating stockholder of (1) an offering of 50,000 shares (5% of the outstanding shares) at \$9.50 per share after offering expenses and commission (a 5% discount from net asset value), (2) an offering of 100,000 shares (10% of the outstanding shares) at \$9.00 per share after offering expenses and commissions (a 10% discount from net asset value) and (3) an offering of 250,000 shares (25% of the outstanding shares) at \$7.50 per share after offering expenses and commissions (a 25% discount from net asset value).

Impact on Existing Stockholders who do Participate in the Offering

Our existing stockholders who participate in an offering below NAV per share or who buy additional shares in the secondary market at the same or lower price as we obtain in the offering (after expenses and commissions) will experience the same types of NAV dilution as the nonparticipating stockholders, albeit at a lower level, to the extent they purchase less than the same percentage of the discounted offering as their interest in our shares immediately prior to the offering. The level of NAV dilution will decrease as the number of shares such stockholders purchase increases. Existing stockholders who buy more than such percentage will experience NAV dilution but will, in contrast to existing stockholders who purchase less than their proportionate share of the offering, experience an increase (often called accretion) in NAV per share over their investment per share and will also experience a disproportionately greater increase in their participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests due to the offering. The level of accretion will increase as the excess number of shares such stockholder purchases increases. Even a stockholder who over-participates will, however, be subject to the risk that we may make additional discounted offerings in which such stockholder does not participate, in which case such a stockholder will experience NAV dilution as described above in such subsequent offerings. These stockholders may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in NAV per share. This decrease could be more pronounced as the size of the offering and level of discount to NAV increases.

The following chart illustrates the level of dilution and accretion in the hypothetical 25% discount offering from the prior chart for a stockholder that acquires shares equal to (1) 50% of its proportionate share of the offering (i.e., 1,250 shares, which is 0.50% of the offering 250,000 shares rather than its 1.00% proportionate share) and (2) 150%

of such percentage (i.e., 3,750 shares, which is 1.50% of an offering of 250,000 shares rather than its 1.00% proportionate share). The prospectus supplement pursuant to which any discounted offering is made will include a chart for this example based on the actual number of shares in such offering and the actual discount from the most recently determined NAV per share. There is no maximum level of discount from NAV at which we may sell shares pursuant to this authority.

Impact on New Investors

Investors who are not currently stockholders, but who participate in an offering below NAV and whose investment per share is greater than the resulting NAV per share (due to selling compensation and expenses paid by us) will experience an immediate decrease, albeit small, in the NAV of their shares and their NAV per share compared to the price they pay for their shares. Investors who are not currently stockholders and who participate in an offering below NAV per share and whose investment per share is also less than the resulting NAV per share due to selling compensation and expenses paid by the issuer being significantly less than the discount per share will experience an

immediate increase in the NAV of their shares and their NAV per share compared to the price they pay for their shares. These investors will experience a disproportionately greater participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests. These investors will, however, be subject to the risk that we may make additional discounted offerings in which such new stockholder does not participate, in which case such new stockholder will experience dilution as described above in such subsequent offerings. These investors may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in NAV per share. This decrease could be more pronounced as the size of the offering and level of discounts increases.

The following chart illustrates the level of dilution or accretion for new investors that would be experienced by a new investor in the same 5%, 10% and 25% discounted offerings as described in the first chart above. The illustration is for a new investor who purchases the same percentage (1.00%) of the shares in the offering as the

stockholder in the prior examples held immediately prior to the offering, The prospectus supplement pursuant to which any discounted offering is made will include a chart for this example based on the actual number of shares in such offering and the actual discount from the most recently determined NAV per share. There is no maximum level of discount from NAV at which we may sell shares pursuant to this authority.

(1) NAV per share is determined as of the last day in the relevant quarter and therefore may not reflect the NAV per share on the date of the high and low sales prices. The NAVs shown are based on outstanding shares at the end of each period.

(2) Calculated as of the respective high or low closing sales price divided by the quarter end NAV.

** NAV not yet determined.

While our common stock has from time to time traded in excess of our net asset value, there can be no assurance, however, that it will trade at such a premium (to net asset value) in the future.

BUSINESS

Apollo Investment

Apollo Investment Corporation, a Maryland corporation organized on February 2, 2004, is a closed-end, externally managed non-diversified management investment company that has elected to be treated as a BDC under the 1940 Act. In addition, for tax purposes we have elected to be treated as a RIC.

Our investment objective is to generate current income and capital appreciation. We invest primarily in various forms of debt investments, including senior secured loans, subordinated and mezzanine investments and/or equity in private middle market companies. From time to time, we may also invest in the securities of public companies.

Our portfolio is comprised primarily of investments in subordinated debt, sometimes referred to as mezzanine debt, and senior secured loans of private middle-market companies that, in the case of senior secured loans, generally are not broadly syndicated and whose aggregate tranche size is typically less than \$300 million. From time to time our portfolio also includes equity interests such as common stock, preferred stock, warrants or options. In this prospectus, we use the term “middle-market” to refer to companies with annual revenues between \$50 million and \$2 billion. While our investment objective is to generate current income and capital appreciation through investments in U.S. senior and subordinated loans, other debt securities and equity, we may also invest a portion of the portfolio in other investment opportunities, including foreign securities. Most of the debt instruments we invest in are unrated or rated below investment grade, which is an indication of having predominantly speculative characteristics with respect to the capacity to pay interest and principal. See “Risk Factors—Risks Related to Our Investments.”

AIM is our investment adviser and an affiliate of AGM. AGM and other affiliates manage other funds that may have investment mandates that are similar, in whole or in part, with ours. AIM and its affiliates may determine that an investment is appropriate both for us and for one or more of those other funds. In such event, depending on the availability of such investment and other appropriate factors, AIM may determine that we should invest on a side-by-side basis with one or more other funds. We may make all such investments subject to compliance with applicable regulations and interpretations, and our allocation procedures. In certain circumstances negotiated co-investments may be made only if we receive an order from the SEC permitting us to do so. There can be no assurance that any such order will be obtained.

During our fiscal year ended March 31, 2012, we invested \$1.5 billion across 21 new and 18 existing portfolio companies through a combination of primary and secondary market purchases. This compares to investing \$1.1 billion in 21 new and 18 existing portfolio companies for the previous fiscal year ended March 31, 2011. Investments sold or prepaid during the fiscal year ended March 31, 2012 totaled \$1.6 billion versus \$977 million for the fiscal year ended March 31, 2011. The weighted average yields on our senior secured loan portfolio, subordinated debt portfolio and total debt portfolio as of March 31, 2012 at our current cost basis were 10.2%, 12.7% and 11.9%, respectively. At March 31, 2011, the yields were 9.0%, 13.1% and 11.6%, respectively.

Our targeted investment size typically ranges between \$20 million and \$250 million, although this investment size may vary proportionately as the size of our available capital base changes. At March 31, 2012, our net portfolio consisted of 62 portfolio companies and was invested 30% in senior secured loans, 60% in subordinated debt, 1% in preferred equity and 9% in common equity and warrants measured at fair value versus 69 portfolio companies invested 33% in senior secured loans, 58% in subordinated debt, 1% in preferred equity and 8% in common equity and warrants at March 31, 2011.

Since our initial public offering in April 2004 and through March 31, 2012, invested capital totaled \$8.8 billion in 166 portfolio companies. Over the same period, we completed transactions with more than 100 different financial sponsors. A financial sponsor is a term commonly used to refer to private equity investment firms, particularly those private equity firms that engage in leveraged buyout transactions.

At March 31, 2012, 67% or \$1.6 billion of our income-bearing investment portfolio is fixed rate debt and 33% or \$0.8 billion is floating rate debt, measured at fair value. On a cost basis, 65% or \$1.7 billion of our income-bearing investment portfolio is fixed rate debt and 35% or \$0.9 billion is floating rate debt. At March 31, 2011, 59% or \$1.7 billion of our income-bearing investment portfolio was fixed rate debt and 41% or \$1.2 billion was floating rate debt. On a cost basis, 60% or \$1.7 billion of our income-bearing investment portfolio is fixed rate debt and 40% or \$1.1 billion is floating rate debt.

About Apollo Investment Management

AIM, our investment adviser, is led by a dedicated team of investment professionals. The investment committee of AIM currently consists of Marc Rowan, a Senior Managing Director of AGM; James C. Zelter, our Chief Executive Officer and a Vice President of the general partner of AIM; Edward Goldthorpe, our President, Chief Investment Officer and a Partner of AIM; Eileen Patrick, Executive Vice President of Corporate Strategy; Justin Sendak, a Partner of AIM; Phil Guerin, a Partner of AIM; Greg Beard, Head of Natural Resources at AGM; and Bret Leas, Senior Portfolio Manager of Structured Credit at AGM. The participation of Greg Beard and Bret Leas in the decision making activity of the investment committee are limited to their respective areas of investment expertise within AGM. The composition of the investment committee of AIM may change from time to time. In 2012, Edward Goldthorpe began his term as our President and as Chief Investment Officer of AIM and Eileen Patrick began her term as our Executive Vice President of Corporate Strategy in 2012. Additionally, Phil Guerin, Greg Beard and Bret Leas increased their participation in the investment committee of AIM in 2012. AIM draws upon AGM's more than 20 year history and benefits from the broader firm's significant capital markets, trading and research expertise developed through investments in many core sectors in over 150 companies since inception.

About Apollo Investment Administration

In addition to furnishing us with office facilities, equipment, and clerical, bookkeeping and record keeping services, AIA also oversees our financial records as well as prepares our reports to stockholders and reports filed with the SEC. AIA also performs the calculation and publication of our net asset value, the payment of our expenses and oversees the performance of various third-party service providers and the preparation and filing of our tax returns. Furthermore, AIA provides on our behalf managerial assistance to those portfolio companies to which we are required to provide such assistance.

Operating and Regulatory Structure

Our investment activities are managed by AIM and supervised by our board of directors, a majority of whom are independent of Apollo and its affiliates. AIM is an investment adviser that is registered under the Advisers Act. Under our investment advisory and management agreement, we pay AIM an annual base management fee based on our average gross assets as well as an incentive fee.

As a BDC, we are required to comply with certain regulatory requirements. Also, while we are permitted to finance investments using debt, our ability to use debt is limited in certain significant respects. We have elected to be treated for federal income tax purposes as a RIC under Subchapter M of the Code.

Investments

We seek to create a portfolio that includes primarily debt investments in mezzanine and senior secured loans and, to a lesser extent, private equity investments by generally investing, on an individual portfolio company basis,

60

approximately \$20 million to \$250 million of capital, on average, in these securities of middle-market companies. The average investment size will vary as the size of our capital base varies. Our target portfolio will generally be long-term subordinated debt, referred to as mezzanine debt, and senior secured loans of private middle-market companies. Structurally, mezzanine debt usually rank subordinate in priority of payment to senior debt, such as senior bank debt, and are often unsecured. As such, other creditors may rank senior to us in the event of an insolvency. However, mezzanine debt rank senior to common and preferred equity in a borrowers' capital structure. Mezzanine debt may have a fixed or floating interest rate. Additional upside can be generated from upfront fees, call protection including call premiums, equity co-investments or warrants. We believe that mezzanine debt investments offer an attractive investment opportunity based upon their historic returns.

Our principal focus is to provide capital to middle-market companies in a variety of industries. We generally seek to target companies that generate positive free cash flows or that may support debt investments with strong asset coverage, and we may provide debtor-in-possession or rescue financing. Additionally, we may acquire investments in the secondary market if we believe the risk-adjusted returns are attractive.

The following is a representative list of the industries in which we have invested:

- Building materials
- Business services
- Cable television
- Chemicals
- Communications
- Consumer products
- Distribution
- Education
- Energy/Utilities
- Environmental services
- Financial services
- Food
- Government services
- Healthcare
- Lodging/Leisure/Resorts
- Manufacturing/Basic industry
- Media
- Packaging
- Printing and publishing
- Restaurants
- Transportation

We may also invest in other industries if we are presented with attractive opportunities.

In an effort to increase our returns and the number of investments that we can make, we may in the future seek to securitize our debt investments. To securitize debt investments, we may create a wholly owned subsidiary and contribute a pool of loans to the subsidiary. We may sell debt of or interests in the subsidiary on a non-recourse basis to purchasers whom we would expect to be willing to accept a lower interest rate to invest in investment-grade securities. We may use the proceeds of such sales to pay down bank debt or to fund additional investments. We may also invest through special purpose entities or other arrangements, including total return swaps and repurchase agreements, in order to obtain non-recourse financing or for other purposes.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds. We may also co-invest on a concurrent basis with affiliates of ours, subject to compliance with applicable regulations and our allocation procedures. Certain types of negotiated co-investments may be made only if we receive an order from the SEC permitting us to do so. There can be no assurance that any such order will be obtained.

At March 31, 2012, our net portfolio consisted of 62 portfolio companies and was invested 30% in senior secured loans, 60% in subordinated debt, 1% in preferred equity and 9% in common equity and warrants measured at fair value. We expect that our portfolio will continue to include primarily mezzanine investments and senior secured loans as well as, to a lesser extent, equity-related securities. In addition, we also expect to invest a portion of our portfolio in other investments, which are not our primary focus, but are intended to enhance our risk-adjusted returns to stockholders. These investments may include, but are not limited to, securities of public companies and debt and equity securities of companies located outside of the United States.

While our investment objective is to generate current income and capital appreciation through investments in U.S. senior and subordinated loans, other debt securities and equity, we may also invest a portion of the portfolio in other investments, including foreign securities.

Listed below are our top ten portfolio companies and industries based on their fair value and represented as a percentage of the portfolio for the years ended March 31, 2012 and 2011:

TOP TEN PORTFOLIO COMPANIES AND INDUSTRIES AS OF MARCH 31, 2012

Investment Selection & Due Diligence

We are committed to a value oriented philosophy and will commit resources to managing risk to our capital. Our investment adviser conducts due diligence on prospective portfolio companies. In conducting its due diligence, our adviser uses information provided by the company and its management team, publicly available information, as well as information from their extensive relationships with former and current management teams, consultants, competitors and investment bankers and the direct experience of the senior partners of our affiliates.

Our investment adviser's due diligence will typically include:

· review of historical and prospective financial information;

· on-site visits;

- interviews with management, employees, customers and vendors of the potential portfolio company;
- review of loan documents;
- background checks; and
- research relating to the company's management, industry, markets, products and services, and competitors.

Upon the completion of due diligence and a decision to proceed with an investment in a company, the professionals leading the investment present the investment opportunity to our investment adviser's investment committee, which determines whether to pursue the potential investment. Additional due diligence with respect to any investment may be conducted on our behalf by attorneys and accountants prior to the closing of the investment, as well as other outside advisers, as appropriate.

Prospective portfolio company characteristics

We have identified several criteria that we believe are important in identifying and investing in prospective portfolio companies. These criteria provide general guidelines for our investment decisions; however, we caution you that not all of these criteria will be met by each prospective portfolio company in which we choose to invest. Generally, we seek to utilize our access to information generated by our investment professionals to identify investment candidates and to structure investments quickly and effectively.

Value orientation/positive cash flow

Our investment philosophy places a premium on fundamental analysis from an investor's perspective and has a distinct value orientation. We focus on companies in which we can invest at relatively low multiples of operating cash flow and that are profitable at the time of investment on an operating cash flow basis. Typically, we do not expect to invest in start-up companies or companies having speculative business plans.

Experienced management

We generally seek to invest in portfolio companies that have experienced management teams. We also require the portfolio companies to have in place proper incentives to induce management to succeed and to act in concert with our interests as investors, including having significant equity interests.

Strong competitive position in industry

We seek to invest in target companies that have developed leading market positions within their respective markets, have established businesses and are well positioned to capitalize on growth opportunities. We seek companies that demonstrate significant competitive advantages versus their competitors, which should help to protect their market position and profitability.

Exit strategy

We seek to invest in companies that we believe will provide a steady stream of cash flow to repay our loans. We expect that such internally generated cash flow, leading to the payment of interest on, and the repayment of the principal of, our investments in portfolio companies to be a key means by which we exit from our investments over time. In addition, we seek to invest in companies whose business models and expected future cash flows offer attractive exit possibilities. These companies include candidates for strategic acquisition by other industry participants and companies that may repay our investments through an initial public offering of common stock or another capital market transaction.

Liquidation value of assets

The prospective liquidation value of the assets, if any, collateralizing loans in which we invest is an important factor in our credit analysis. We emphasize both tangible assets, such as accounts receivable, inventory, equipment and real estate, and intangible assets, such as intellectual property, customer lists, networks and databases.

The investment committee

All new investments by us must be approved by the investment committee of AIM. The members of the investment committee receive no compensation from us. Such members are employees or partners of AIM and receive compensation or profit distributions from AIM, and in certain instances, from other Apollo affiliates. The members of the investment committee are listed below.

Edward Goldthorpe: our President, Chief Investment Officer and a Partner of AIM. Mr. Goldthorpe began his term as President of Apollo Investment Corporation and as Chief Investment Officer of AIM in 2012. Previously, Mr. Goldthorpe was employed by Goldman Sachs for 13 years. He served most recently as a Managing Director with the Bank Loan Distressed Investing Desk (2009 to 2012), and prior to that Mr. Goldthorpe was a Managing Director with the Special Situations Group within the firm's Securities Division (2005 to 2009), a Vice President in the High Yield Distressed Group (2001 to 2005), an analyst in the Merchant Banking Division (2000 to 2001) and an analyst in the Investment Banking Division (1999 to 2000). Mr. Goldthorpe received a B.A. in Commerce from Queen's University in Kingston, Ontario. Mr. Goldthorpe currently serves on the Global Advisory Board for the Queen's School of Business. He is also the Chairman of the Young Fellowship of The Duke of Edinburgh's Award.

Phil Guerin: a Partner of AIM. Mr. Guerin joined Apollo in 2008. Prior to that time, Mr. Guerin was a Managing Director for Firstlight Financial Corp. and prior to that, a Senior Vice President at GE Commercial Finance. Prior to that, Mr. Guerin was a senior consultant/auditor for Arthur Andersen and PricewaterhouseCoopers. Mr. Guerin graduated from Central Connecticut State University with a BS in Accounting.

Greg Beard: Head of Natural Resources at AGM. Mr. Beard joined Apollo in 2010 from Riverstone Holdings, where he was a Managing Director and lead deal partner in many of the firm's top commodities-related investments. Prior to joining Riverstone in 2000, Mr. Beard was an associate with Asen and Company, a New York, NY-based investment firm, and prior to that he worked with a Nashville, TN-based investment firm. Mr. Beard began his career as a financial analyst at Goldman Sachs, where he played an active role in the firm's energy-sector principal investment activities. Mr. Beard has served as a director on eighteen corporate boards, and he currently serves on the board of Virginia Uranium, Inc and Athlon Energy, LP. Mr. Beard received his BA from the University of Illinois at Urbana.

Bret Leas: Senior Portfolio Manager of Structured Credit at AGM. Mr. Leas joined Apollo in 2009. Prior to that time, Mr. Leas was a member of the Credit Structuring Group at Barclays Capital. Before that time he was an

associate at Weil, Gotshal & Manges LLP from 2000-2004, primarily focusing on asset-backed securities, CDOs and credit derivatives. Mr. Leas graduated cum laude from the University of Maryland with a B.A. in History and received his J.D. from Georgetown University Law Center.

Eileen Patrick: our Executive Vice President of Corporate Strategy. Ms. Patrick was appointed Executive Vice President of Corporate Strategy of Apollo Investment Corporation in 2012. Ms. Patrick joined Apollo in 2010 working in its Capital Markets Division. She also serves as a Vice President and member of the Investment Committee for the manager of Apollo Residential Mortgage Inc. (NYSE: AMTG). Prior to joining Apollo, Ms. Patrick was a Managing Director at JP Morgan in the Financial Institutions Group. Prior to that she was a Senior Managing Director in the Financial Institutions Group at Bear Stearns.

Marc Rowan: a Senior Managing Director of AGM. Mr. Rowan is a Senior Managing Director and member of the board of directors of Apollo Global Management, LLC and Managing Partner of Apollo Management, L.P., which he co-founded in 1990. Prior to 1990, Mr. Rowan was a member of the Mergers & Acquisitions Group of Drexel Burnham Lambert Incorporated, with responsibilities in high yield financing, transaction idea generation and merger structure negotiation. Mr. Rowan currently serves on the boards of directors of the general partner of AAA, Athene Holding Ltd, Caesars Entertainment Corporation and Norwegian Cruise Lines. He has previously served on the boards of directors of AMC Entertainment, Inc., Cablecom GmbH, Culligan Water Technologies, Inc., Countrywide Holdings Limited, Furniture Brands International Inc., Mobile Satellite Ventures, LLC, National Cinemedia, Inc., National Financial Partners, Inc., New World Communications, Inc., Quality Distribution, Inc., Samsonite Corporation, SkyTerra Communications Inc., Unity Media SCA, Vail Resorts, Inc. and Wyndham International, Inc.

Justin Sendak: Partner of AIM. Mr. Sendak joined Apollo in 2007 to concentrate on leveraged bank debt, high yield securities and alternative investment opportunities and became a member of the investment committee in 2009. Prior to joining Apollo Mr. Sendak was a Managing Director at Merrill Lynch & Co., specializing in underwriting and placing 144A high yield securities and leveraged loans involving transactions ranging between US\$250 million to US\$10 billion. Prior to joining Merrill Lynch & Co., Mr. Sendak was a Managing Director in Capital Markets at CIBC World Markets Corp. from 2002 to 2005. Prior to 2002, Mr. Sendak was a Managing Director in CIBC World Markets Corp's Leveraged Finance Group, specializing in the structuring and placing of institutional bank debt.

James C. Zelter: Chief Executive Officer and Director of Apollo Investment. Mr. Zelter joined Apollo in 2006. He became the Chief Executive Officer and a Director of Apollo Investment in November 2008. He became a member of the investment committee in 2006. He is the Managing Partner of Apollo Capital Management ("ACM"). The funds in the ACM platform include: Apollo Strategic Value Fund, Apollo Credit Opportunity Fund I and II, Apollo Asia Opportunity Fund and Apollo European Principal Finance Fund. ACM also includes AIM the investment manager to Apollo Investment. Prior to joining Apollo, Mr. Zelter was with Citigroup and its predecessor companies from 1994 to 2006. From 2003 to 2005, Mr. Zelter was Chief Investment Officer of Citigroup Alternative Investments, and prior to that he was responsible for the firm's Global High Yield franchise.

Investment structure

Once we have determined that a prospective portfolio company is suitable for investment, we work with the management of that company and its other capital providers, including senior, junior and equity capital providers, to structure an investment.

We seek to structure our mezzanine investments primarily as unsecured, subordinated loans that provide for relatively high interest rates that provide us with significant current interest income. These debt investments typically have interest-only payments. In some cases, we may enter into debt investments that, by their terms, convert into equity or additional debt securities or defer payments of interest after our investment. Also, in some

cases our mezzanine debt investments may be collateralized by a subordinated lien on some or all of the assets of the borrower. Typically, our mezzanine loans have maturities of five to ten years.

We also seek to invest in portfolio companies in the form of senior secured loans. We expect these senior secured loans to have terms of three to ten years and may provide for deferred interest payments over the term of the loan. We generally seek to obtain security interests in the assets of our portfolio companies that serve as collateral in support of the repayment of these loans. This collateral may take the form of first or second priority liens on the assets of a portfolio company.

In the case of our mezzanine and senior secured loan investments, we seek to tailor the terms of the investment to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives for the portfolio company to achieve its business plan and improve its profitability. For example, in addition to seeking a senior position in the capital structure of our portfolio companies, we seek to limit the downside potential of our investments by:

- requiring an expected total return on our investments (including both interest and potential equity appreciation) that compensates us for credit risk;
- generally incorporating call protection into the investment structure where possible; and
- negotiating covenants and information rights in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, consistent with our goal of preserving our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or participation rights.

Our investments may include equity features, such as warrants or options to buy a minority interest in the portfolio company. Any warrants we receive with our debt securities generally require only a nominal cost to exercise, and thus, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We may structure the warrants to provide provisions protecting our rights as a minority- interest holder, as well as puts, or rights to sell such securities back to the company, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and “piggyback” registration rights.

We expect to hold most of our investments to maturity or repayment, but we may sell certain of our investments sooner if a liquidity event takes place such as the sale or recapitalization or worsening of credit quality of a portfolio company, among other reasons.

Ongoing relationships with portfolio companies

Monitoring

AIM monitors our portfolio companies on an ongoing basis and also monitors the financial trends of each portfolio company to determine if each is meeting its respective business plans and to assess the appropriate course of action for each company. In addition, senior investment professionals of AIM may take board seats or obtain board observation rights for our portfolio companies.

AIM has several methods of evaluating and monitoring the performance and fair value of our investments, which can include, but are not limited to, the assessment of success of the portfolio company in adhering to its business plan and compliance with covenants; periodic and regular contact with portfolio company management and, if appropriate, the financial or strategic sponsor, to discuss financial position, requirements and accomplishments; comparisons to other portfolio companies in the industry; attendance at and participation in board meetings; and review of monthly and quarterly financial statements and financial projections for portfolio companies.

AIM also uses an investment rating system to characterize and monitor our expected level of returns on each investment in our portfolio. These ratings are just one of several factors that AIM uses to monitor our portfolio, are not in and of themselves determinative of fair value or revenue recognition and are presented for indicative purposes. AIM grades the credit risk of all investments on a scale of 1 to 5 no less frequently than quarterly. This system is intended primarily to reflect the underlying risk of a portfolio investment relative to our initial cost basis in respect of such portfolio investment (i.e., at the time of acquisition), although it may also take into account under certain circumstances the performance of the portfolio company's business, the collateral coverage of the investment and other relevant factors.

Under this system, investments with a grade of 1 involve the least amount of risk to our initial cost basis. The trends and risk factors for this investment since origination or acquisition are generally favorable, which may include the performance of the portfolio company or a potential exit. Investments graded 2 involve a level of risk to our initial cost basis that is similar to the risk to our initial cost basis at the time of origination or acquisition. This portfolio company is generally performing in accordance with our analysis of its business and the full return of principal and interest or dividend is expected. Investments graded 3 indicate that the risk to our ability to recoup the cost of such investment has increased since origination or acquisition, but full return of principal and interest or dividend is expected. A portfolio company with an investment grade of 3 requires closer monitoring. Investments graded 4 indicate that the risk to our ability to recoup the cost of such investment has increased significantly since origination or acquisition, including as a result of factors such as declining performance and noncompliance with debt covenants, and we expect some loss of interest, dividend or capital appreciation, but still expect an overall positive internal rate of return on the investment. Investments graded 5 indicate that the risk to our ability to recoup the cost of such investment has increased materially since origination or acquisition and the portfolio company likely has materially declining performance. Loss of interest or dividend and some loss of principal investment are expected, which would result in an overall negative internal rate of return on the investment. For investments graded 4 or 5, AIM enhances its level of scrutiny over the monitoring of such portfolio company.

AIM monitors and, when appropriate, changes the investment ratings assigned to each investment in our portfolio. In connection with our valuation process, AIM reviews these investment ratings on a quarterly basis, and our audit committee monitors such ratings. It is possible that the grade of certain of these portfolio investments may be reduced or increased over time.

Managerial Assistance

As a BDC, we must offer, and must provide upon request, significant managerial assistance to certain of our portfolio companies. This assistance could involve, among other things, monitoring the operations of our portfolio companies, participating in board and management meetings, consulting with and advising officers of portfolio companies and providing other organizational and financial guidance. We may receive fees for these services.

Valuation Process

The following is a description of the steps we take each quarter to determine the value of our portfolio. Many of our portfolio investments are recorded at fair value as determined in good faith by or under the direction of our board of

directors pursuant to a written valuation policy and a consistently applied valuation process utilizing the input of our investment adviser, independent valuation firms and the audit committee. Since this process necessarily

involves the use of judgment and the engagement of independent valuation firms, there is no certainty as to the value of our portfolio investments. Investments for which market quotations are readily available are recorded in our financial statements at such market quotations if they are deemed to represent fair value. Market quotations may be deemed not to represent fair value where AIM believes that facts and circumstances applicable to an issuer, a seller or purchaser or the market for a particular security causes current market quotes not to reflect the fair value of the security, among other reasons. Examples of these events could include cases in which material events are announced after the close of the market on which a security is primarily traded, when a security trades infrequently causing a quoted purchase or sale price to become stale or in the event of a “fire sale” by a distressed seller.

With respect to investments for which market quotations are not readily available or when such market quotations are deemed not to represent fair value, our board of directors has approved a multi-step valuation process each quarter, as described below:

- (1) our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals of our investment adviser responsible for the portfolio investment;
- (2) preliminary valuation conclusions are then documented and discussed with senior management of our investment adviser;
- (3) independent valuation firms are engaged by our board of directors to conduct independent appraisals by reviewing our investment adviser’s preliminary valuations and make their own independent assessment;
- (4) the audit committee of the board of directors reviews the preliminary valuation of our investment adviser and the valuation prepared by the independent valuation firm and responds to the valuation recommendation of the independent valuation firm to reflect any comments; and
- (5) the board of directors discusses valuations and determines the fair value of each investment in our portfolio in good faith based on the input of our investment adviser, the respective independent valuation firm and the audit committee.

In addition, some of our investments provide for payment-in-kind (“PIK”) interest or dividends. Such amounts of accrued PIK interest or dividends are added to the cost of the investment on the respective capitalization dates and generally become due at maturity of the investment or upon the investment being called by the issuer.

Competition

Our primary competitors in providing financing to middle-market companies include public and private funds, commercial and investment banks, commercial financing companies, other BDCs or hedge funds, and, to the extent they provide an alternative form of financing, private equity funds. Some of our existing and potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than we. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC or the restriction that the Code imposes on us as a RIC. We also expect to use the industry information of AGM’s investment professionals to which we have access to assess investment risks and determine appropriate pricing for our investments in portfolio companies. In addition, we believe that the relationships of the senior managers of AIM and those of our affiliates, enable us to learn about, and compete effectively for, financing opportunities with attractive middle-market companies in the industries in which we seek to invest.

Staffing

We have a chief financial officer and a chief compliance officer and, to the extent necessary, they have hired and may hire additional personnel. These individuals perform their respective functions under the terms of the administration agreement. Certain of our other executive officers are managing partners of our investment adviser. Our day-to-day investment operations are managed by our investment adviser. AIM has hired and may hire additional investment professionals in the future. In addition, we generally reimburse AIA for our allocable portion of expenses incurred by it in performing its obligations under the administration agreement, including rent and our allocable portion of the cost of our chief financial officer, chief compliance officer and corporate secretary and their respective staffs.

Properties

As of March 31, 2012, we do not own any real estate or other physical properties materially important to our operation. Our administrative and principal executive offices are located at 730 Fifth Avenue, New York, NY 10019 and 9 West 57th Street, New York, NY 10019, respectively. We believe that our office facilities are suitable and adequate for our business as it is contemplated to be conducted.

Legal Proceedings

None.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 imposes a wide variety of regulatory requirements on publicly-held companies and their insiders. Many of these requirements affect us. For example:

- Pursuant to Rule 13a-14 under the Securities Exchange Act of 1934 (the “Exchange Act”), our Chief Executive Officer and Chief Financial Officer must certify the accuracy of the financial statements contained in our periodic reports;
- Pursuant to Item 307 of Regulation S-K, our periodic reports must disclose our conclusions about the effectiveness of our disclosure controls and procedures;
- Pursuant to Rule 13a-15 under the Exchange Act, our management must prepare a report regarding its assessment of our internal control over financial reporting; and
- Pursuant to Item 308 of Regulation S-K and Rule 13a-15 under the Exchange Act, our periodic reports must disclose whether there were significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to material weaknesses.

The Sarbanes-Oxley Act requires us to review our current policies and procedures to determine whether we comply with the Sarbanes-Oxley Act and the regulations promulgated thereunder. We will continue to monitor our compliance with all regulations that are adopted under the Sarbanes-Oxley Act and will take actions necessary to ensure that we are in compliance therewith.

MANAGEMENT

Our business and affairs are managed under the direction of our board of directors. The board of directors currently consists of eight members, six of whom are not “interested persons” of Apollo Investment as defined in Section 2(a)(19) of the 1940 Act. We refer to these individuals as our independent directors (the “Independent Directors”). Our board of directors elects our officers, who serve at the discretion of the board of directors.

BOARD OF DIRECTORS

Under our charter, our directors are divided into three classes. Each class of directors holds office for a three year term. At each annual meeting of our stockholders, the successors to the class of directors whose terms expire at such meeting will be elected to hold office for a term expiring at the annual meeting of stockholders held in the third year following the year of their election. Each director holds office for the term to which he or she is elected and until his or her successor is duly elected and qualifies.

Directors

As of the date of this prospectus, information regarding the board of directors is as follows:

Interested Directors

Name	Age	Position	Director Since	Expiration of Term
John J. Hannan	59	Chairman of the Board	2004	2012
James C. Zelter	50	Chief Executive Officer & Director	2008	2012

Independent Directors

Name	Age	Position	Director Since	Expiration of Term
Ashok N. Bakhru	70	Director	2008	2012
Jeanette Loeb	60	Director	2011	2014
Frank C. Puleo	66	Director	2008	2014
Carl Spielvogel	83	Director	2004	2014
Elliot Stein, Jr	63	Director	2004	2013
Bradley J. Wechsler	60	Director	2004	2013

The address for each director is c/o Apollo Investment Corporation, 9 West 57th Street, New York, NY 10019.

Executive officers who are not directors

Information regarding our executive officers who are not directors is as follows:

Name	Age	Position
Gregory W. Hunt	55	Chief Financial Officer and Treasurer
Joseph D. Glatt	39	Vice President and Secretary
Edward J. Goldthorpe	35	President
Cindy Z. Michel	38	Vice President and Chief Compliance Officer

Eileen M. Patrick	44	Executive Vice President of Corporate Strategy
John J. Suydam	52	Vice President and Chief Legal Officer

The address for each executive officer is c/o Apollo Investment Corporation, 9 West 57th Street, New York, NY 10019.

Board of Directors' Oversight Role in Management

The board of directors' role in management of Apollo Investment is oversight. As is the case with virtually all investment companies, including business development companies (as distinguished from operating companies), our service providers, primarily AIM, AIA and their affiliates, have responsibility for our day-to-day management, which includes responsibility for risk management (including management of investment performance and investment risk, valuation risk, issuer and counterparty credit risk, compliance risk and operational risk). As part of its oversight, the board of directors, acting at its scheduled meetings, or the chairman or the lead Independent Director acting between board of directors' meetings, regularly interacts with and receives reports from senior personnel of service providers, including AIC's Chief Executive Officer, its President and Chief Operating Officer and its Chief Financial Officer (or a senior representative of their respective offices), Apollo Investment's and AIM's Chief Compliance Officer and portfolio management personnel.

The audit committee of the board of directors (which consists of all the Independent Directors), meets regularly, and between meetings the audit committee chair maintains contact, with our independent registered public accounting firm, our Chief Financial Officer and the internal auditor. In addition, at its quarterly meetings, the audit committee meets with the independent valuation services that evaluate certain of our securities holdings for which there are not readily available market values. The board of directors also receives periodic presentations from senior personnel of AIM or its affiliates regarding risk management generally, as well as periodic presentations regarding specific operational, compliance or investment areas such as business continuity, personal trading, valuation, credit and investment research.

The board of directors has adopted policies and procedures designed to address certain of our risks. In addition, Apollo Investment, AIM, AIA and other of our service providers have adopted a variety of policies, procedures and controls designed to address our particular risks. However, it is not possible to eliminate all of the risks applicable to us. The board of directors also receives reports from our counsel or counsel to AIM and the board of directors' own independent legal counsel regarding regulatory compliance and governance matters. The board of directors' oversight role does not make the board of directors a guarantor of our investments or activities or the activities of any of our service providers on behalf of Apollo Investment.

Board of Directors Composition and Leadership Structure

The 1940 Act requires that at least a majority of our directors not be "interested persons" (as defined in the 1940 Act) of Apollo Investment. Currently, six of our eight directors are Independent Directors. The chairman of the board of directors is an interested person of Apollo Investment, and the Independent Directors have designated a Lead Independent Director who chairs meetings or executive sessions of the Independent Directors, reviews and comments on board of directors' meeting agendas, represents the views of the Independent Directors to management and facilitates communication among the Independent Directors and their counsel and between management and the Independent Directors. The board of directors has determined that its leadership structure, in which 75% of the directors are not affiliated with AIM, is appropriate in light of the services that AIM and its affiliates provide to us and potential conflicts of interest that could arise from these relationships.

Biographical Information

Directors

Our directors have been divided into two groups—Independent Directors and interested directors. Interested directors are interested persons as defined in the 1940 Act.

Information About Each Director's Experience, Qualifications, Attributes or Skills.

Additional information about each director follows (supplementing the information provided in the tables above) that describes some of the specific experiences, qualifications, attributes or skills that each director possesses which the board believes has prepared them to be effective directors. The board of directors believes that the significance of each director's experience, qualifications, attributes or skills is an individual matter (meaning that experience that is important for one director may not have the same value for another) and that these factors are best evaluated at the board level, with no single director, or particular factor, being indicative of board effectiveness. However, the board of directors believes that directors need to have the ability to critically review, evaluate, question and discuss information provided to them, and to interact effectively with our management, service providers and counsel, in order to exercise effective business judgment in the performance of their duties; the board of directors believes that its members satisfy this standard. Experience relevant to having this ability may be achieved through a director's educational background; business, professional training or practice (e.g., medicine, accounting or law), public service or academic positions; experience from service as a board member (including the board of directors of Apollo Investment) or as an executive of investment funds, public companies or significant private or not-for-profit entities or other organizations; and/or other life experiences. To assist them in evaluating matters under federal and state law, the directors are counseled by their own independent legal counsel, who participates in board of directors' meetings and interacts with AIM, and also may benefit from information provided by our or AIM's counsel; both board of directors and our counsel have significant experience advising funds and fund board members. The board of directors and its committees have the ability to engage other experts as appropriate. The board of directors evaluates its performance on an annual basis.

Independent Directors

Ashok N. Bakhru (70) Director. Director. Mr. Bakhru became a Director of Apollo Investment Corporation in October 2008. Mr. Bakhru currently serves as the Chairman of the Board of the Goldman Sachs Group of Mutual Funds. Mr. Bakhru served as the Chairman of GS Hedge Fund Partners Registered Fund LLC from 2004 to 2009 and Chairman of GS Hedge Fund Partners Registered Master Fund LLC from 2005 to 2009. Previously Mr. Bakhru was the Chief Financial Officer and Chief Administrative Officer of Coty Inc. in New York City. Prior to that he served at Scott Paper Company in Philadelphia, where he held several senior management positions including Senior Vice President and Chief Financial Officer roles. Mr. Bakhru also serves on the Board of Governors of the Investment Company Institute, the Governing Council of the Independent Directors Council, Mutual Fund Directors Forum and the Advisory Board of BoardIQ, an investment publication. He has been actively involved with Cornell University, having served on its Council and Administrative Board over the past several years.

Jeanette Loeb (60) Director. Ms. Loeb became a Director of Apollo Investment Corporation in August 2011. Ms. Loeb currently serves as a Director, and is a former Chairman and CEO, of PetCareRx, a leading e-commerce pet pharmacy that sells pet medications, supplies and food directly to the consumer. Ms. Loeb joined PetCareRx, Inc. in 2001. From 1977 until 1994, Ms. Loeb was an investment banker at Goldman Sachs, where she served as the head of the Structured Finance Department in the U.S. Ms. Loeb was named the first woman partner of Goldman Sachs in 1986. Ms. Loeb received an MBA from Harvard Business School and graduated Phi Beta Kappa from Wellesley College with a BA in economics. She currently serves on the board and the finance committee of New York City

Center, the board and audit committee of the United Nations Development Corporation and has

73

previously been a member of the board of the Collegiate School, the Treasurer and a board member of the Society of Memorial Sloan Kettering and a founding member of the Wellesley Business Leadership Council.

Frank C. Puleo (66) Director. Mr. Puleo became a Director of Apollo Investment Corporation in February 2008. Mr. Puleo currently serves as a Director of CIFIC Corp., a credit asset manager, South Street Holdings, LLC, a company that finances securities inventory for customers and dealers and licenses trade processing software, SLM Corp., a student loan company, and Syncora Capital Assurance, Inc., a monoline financial guaranty and insurance company. Previously Mr. Puleo was a partner at Milbank, Tweed, Hadley & McCloy LLP where he advised clients on structured finance transactions, bank and bank holding company regulatory and securities law matters. Mr. Puleo became a partner of Milbank, Tweed, Hadley & McCloy LLP in 1978 and Co-Chair of the firm's Global Finance Group in 1995 until retiring at the end of 2006. He was a member of the firm's Executive Committee from 1982 to 1991 and from 1996 to 2002. Mr. Puleo served as a Lecturer at Columbia University School of Law from 1997 to 2001.

Carl Spielvogel (83) Director. Ambassador Spielvogel became a Director of Apollo Investment Corporation in March 2004. Ambassador Spielvogel was and is currently Chairman and Chief Executive Officer of Carl Spielvogel Associates, Inc., an international management and counseling company, from 1997 to 2000, and from 2001 to present. From 2000 to 2001, Ambassador Spielvogel served as U.S. Ambassador to the Slovak Republic, based in Bratislava, Slovakia. He served as a Director of Interactive Data Corporation, Inc. from 1996 to 2009, and as a member of its Audit Committee and Chairman of the Independent Shareholders Committee. From 1994 to 1997, Ambassador Spielvogel was Chairman and Chief Executive Officer of the United Auto Group, Inc., one of the first publicly-owned auto dealership groups. Earlier, Ambassador Spielvogel was Chairman and Chief Executive Officer of Backer Spielvogel Bates Worldwide, a global marketing communications company, from 1985 to 1994. Ambassador Spielvogel is a trustee of the Metropolitan Museum of Art; a member of the Board of Trustees and Chairman of the Business Council of the Asia Society; a member of the Board of Trustees of Lincoln Center for the Performing Arts; a member of the Council on Foreign Relations; a member of the Executive Committee of the Council of American Ambassadors; a Trustee and member of the Executive Committee of the State University of New York, and a former Fellow of the Kennedy School of Government at Harvard University. Before becoming an Ambassador, he was a Governor of the United States Government Board of Broadcasting.

Elliot Stein, Jr. (63) Director. Mr. Stein became a Director of Apollo Investment Corporation in March 2004 and currently serves as lead Independent Director. Since 2011 Mr. Stein has also been a director of Global Cornerstone Holdings Limited, Bizzingo Inc. and Apollo Senior Floating Rate Fund Inc. He is a Managing Director of Commonwealth Capital Partners and has served as Chairman of Caribbean International News Corporation since 1985. Mr. Stein is also a board member of various private companies including Multi-Pak Holdings, Cohere Communications and Assay Healthcare Solutions. Mr. Stein is a Trustee of Claremont Graduate University and the New School University. He is a member of the Council on Foreign Relations. He formerly served as a Director of VTG Holdings, Bargain Shop Holdings, Inc. and various other private companies.

Bradley J. Wechsler (60) Director. Mr. Wechsler became a Director of Apollo Investment Corporation in April 2004. Mr. Wechsler was the Co-Chairman and Co-Chief Executive Officer of IMAX Corporation from 1996 through 2009 and is currently Chairman. Previously Mr. Wechsler has had several executive positions in the entertainment and finance industries. Mr. Wechsler is a Vice-Chairman of the board of the NYU Hospital and Medical Center, a member of the Executive Committee and chairs its Finance Committee. In addition, he serves on the boards of Assay Healthcare Solutions, the Ethical Culture Fieldston Schools and Math for America. He is also a member of the Academy of Motion Picture Arts and Sciences.

Interested directors

John J. Hannan (59) Chairman of the Board of Directors. Mr. Hannan became a Director of Apollo Investment Corporation in March 2004 and was elected as Chairman of the Board of Directors in August 2006. He

served as the Chief Executive Officer from February 2006 to November 2008. Mr. Hannan, a senior partner of Apollo Management, L.P., co-founded Apollo Management, L.P. in 1990. He formerly served as a director for Vail Resorts, Inc. and Goldman Global, Inc.

James C. Zelter (50) Chief Executive Officer and Director. Mr. Zelter joined Apollo in 2006. He became the Chief Executive Officer and a Director of Apollo Investment Corporation in November 2008. He is the Managing Partner of Apollo Capital Management, L.P. (“ACM”). The funds in the ACM platform include: Apollo Strategic Value Fund, Apollo Credit Opportunity Fund I and II, Apollo Asia Opportunity Fund and Apollo European Principal Finance Fund. ACM also includes Apollo Investment Management, L.P. the investment manager to Apollo Investment Corporation. Prior to joining Apollo, Mr. Zelter was with Citigroup and its predecessor companies from 1994 to 2006. From 2003 to 2005, Mr. Zelter was Chief Investment Officer of Citigroup Alternative Investments, and prior to that he was responsible for the firm’s Global High Yield franchise.

Executive officers who are not directors

Gregory W. Hunt (55) Chief Financial Officer and Treasurer. Mr. Hunt began his term as Chief Financial Officer and Treasurer of Apollo Investment Corporation in 2012. Previously, Mr. Hunt was Executive Vice President and Chief Financial Officer for Yankee Candle which he joined in April 2010. Prior to joining Yankee Candle, Mr. Hunt served as the Executive Vice President of Strategic and Commercial Development for Norwegian Cruise Lines from 2007 to 2009. Prior to joining Norwegian Cruise Lines, Mr. Hunt served as Chief Financial Officer and Chief Restructuring Officer of Tweeter Home Entertainment Group, Inc. from 2006 to 2007 and Chief Financial Officer and Co-Chief Executive of Syratech Corporation from 2001 to 2006. Prior to Syratech, Mr. Hunt held several senior financial leadership positions including Chief Financial Officer of NRT Inc., Culligan Water Technologies, Inc. and Samsonite Corporation.

Joseph D. Glatt (39) Secretary and Vice President. Mr. Glatt was appointed Secretary of Apollo Investment Corporation in 2010 and Vice President in 2009. Mr. Glatt is also currently General Counsel of Apollo Capital Management L.P., a position he has held since 2007 and since 2011 he has served as the Chief Legal Officer of Apollo Senior Floating Rate Fund Inc. Previously, Mr. Glatt was associated with the law firms of Simpson Thacher & Bartlett LLP from 1998 to 2003 and Schulte Roth & Zabel LLP from 2003 to 2007, in each case, primarily focusing on mergers and acquisitions, leveraged buyouts and capital markets activities.

Edward J. Goldthorpe (35) President. Mr. Goldthorpe began his term as President of Apollo Investment Corporation and as Chief Investment Officer of AIM in 2012. Previously, Mr. Goldthorpe was employed by Goldman Sachs for 13 years. He served most recently as a Managing Director with the Bank Loan Distressed Investing Desk (2009 to 2012), and prior to that Mr. Goldthorpe was a Managing Director with the Special Situations Group within the firm’s Securities Division (2005 to 2009). Prior to that, Mr. Goldthorpe was a Vice President in the High Yield Distressed Group (2001 to 2005), an analyst in the Merchant Banking Division (2000 to 2001), and an analyst in the Investment Banking Division (1999 to 2000). Mr. Goldthorpe received a B.A. in Commerce from Queen’s University in Kingston, Ontario. Mr. Goldthorpe currently serves on the Global Advisory Board for the Queen’s School of Business. He is also the Chairman of the Young Fellowship of The Duke of Edinburgh’s Award.

Cindy Z. Michel (38) Chief Compliance Officer and Vice President. Ms. Michel was appointed Chief Compliance Officer and Vice President of Apollo Investment Corporation in 2010. Ms. Michel joined Apollo Global Management, LLC in 2007 as its Director of Compliance and continues to serve in this role. Prior to joining Apollo, Ms. Michel served as the Director of Compliance of the Private Equity Division at Lehman Brothers. Prior to that, she was associated with the investment bank Credit-Suisse Securities as a member of its Compliance Department supporting the Private Equity and Investment Banking businesses. Before joining Credit-Suisse, Ms. Michel was associated with the law firm of DLA Piper.

Eileen M. Patrick (44) Executive Vice President of Corporate Strategy. Ms. Patrick was appointed Executive Vice President of Corporate Strategy of Apollo Investment Corporation in 2012. Ms. Patrick joined Apollo in 2010 working in its Capital Markets Division. She also serves as a Vice President and member of the Investment Committee for the manager of Apollo Residential Mortgage Inc. (NYSE: AMTG). Prior to joining Apollo, Ms. Patrick was a Managing Director at JP Morgan in the Financial Institutions Group. Prior to that she was a Senior Managing Director in the Financial Institutions Group at Bear Stearns.

John J. Suydam (52) Chief Legal Officer and Vice President. Mr. Suydam joined Apollo Investment Corporation in 2006. Mr. Suydam also serves as the Chief Legal Officer and Chief Compliance Officer of Apollo Global Management, LLC, a position he has held since 2006. From 2002 to 2006, Mr. Suydam was a partner at O'Melveny & Myers LLP, where he served as head of Mergers & Acquisitions and co-head of the Corporate Department. Prior to that time, Mr. Suydam served as chairman of the law firm O'Sullivan, LLP which specialized in representing private equity investors. Mr. Suydam serves as a trustee of the New York University School of Law and is a member of the Department of Medicine Advisory Board of The Mount Sinai Medical Center. Mr. Suydam also serves as a member of the board of directors of the Big Apple Circus and Environmental Solutions Worldwide Inc. Mr. Suydam received his JD from New York University School of Law and graduated magna cum laude with a BA in History from the State University of New York at Albany.

COMMITTEES OF THE BOARD OF DIRECTORS

Audit committee

The audit committee operates pursuant to an audit committee charter approved by our board of directors. The charter sets forth the responsibilities of the audit committee, which include selecting or retaining each year an independent registered public accounting firm (the "auditors") to audit our annual financial statements; reviewing and discussing with management and the auditors our annual audited financial statements, including disclosures made in management's discussion and analysis, and recommending to the board of directors whether the audited financial statements should be included in our annual report on Form 10-K; reviewing and discussing with management and the auditors our quarterly financial statements prior to the filings of its quarterly reports on Form 10-Q; pre-approving the auditors' engagement to render audit and/or permissible non-audit services; evaluating the qualifications, performance and independence of the auditors; reviewing preliminary valuations of the investment adviser and independent valuation firms and recommending valuations to the board of directors; and recommending compensation of the chief financial officer to the board of directors for determination. The audit committee is presently composed of six persons: Messrs. Bakhru, Puleo, Spielvogel, Stein, Wechsler and Ms. Loeb, all of whom are Independent Directors and are otherwise considered independent under NASDAQ Marketplace Rule 5605(a)(2). Each member of the audit committee is expected to continue to serve on the audit committee after the Meeting. Mr. Bakhru currently serves as the chairperson of the audit committee. Our board of directors has determined that Mr. Bakhru is an "audit committee financial expert" as that term is defined under Item 401 of Regulation S-K under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). The audit committee charter is available on our website (<http://www.apolloic.com>). During the fiscal year ended March 31, 2012, the audit committee met eleven times.

Nominating and corporate governance committee

The nominating and corporate governance committee is responsible for selecting qualified nominees to be elected to the board of directors by stockholders; identifying, selecting or recommending qualified nominees to fill any vacancies on the board of directors or a committee thereof; developing and recommending to the board of directors a set of corporate governance principles applicable to us; overseeing the evaluation of the board of directors and management; and undertaking such other duties and responsibilities as may from time to time be delegated by the board of directors to the nominating and corporate governance committee. The nominating and corporate governance

committee is presently composed of six persons: Messrs. Bakhru, Puleo, Spielvogel, Stein,

Wechsler and Ms. Loeb. Mr. Stein currently serves as the chairman of the nominating and corporate governance committee. The nominating and corporate governance committee has adopted a written nominating and corporate governance committee charter which is available on our website (www.apolloic.com). During the fiscal year ended March 31, 2012, the nominating and corporate governance committee met four times.

Compensation committee

We do not have a compensation committee because our executive officers do not receive any direct compensation from us. However, the compensation payable to our investment adviser pursuant to the investment advisory and management agreement is separately approved by a majority of the independent directors in accordance with NASDAQ Marketplace Rule 5605(d) and Section 15(c) of the 1940 Act.

COMPENSATION OF DIRECTORS AND OFFICERS

The following table shows information regarding the compensation received by our directors and executive officers for the fiscal year ended March 31, 2012. No compensation is paid to directors who are “interested persons.”

Name	Aggregate compensation from Apollo Investment	Pension or retirement benefits accrued as part of our expenses(1)	Total compensation from Apollo Investment paid to director/officer
Independent directors			
Ashok Bakhru	\$ 146,973	None	\$ 146,973
Jeanette Loeb(2)	89,304	None	89,304
Claudine B. Malone(3)	50,223	None	50,223
Frank C. Puleo	142,000	None	142,000
Carl Spielvogel	133,000	None	133,000
Elliot Stein, Jr.	144,500	None	144,500
Bradley J. Wechsler	140,500	None	140,500
Interested directors			
John J. Hannan	None	None	None
James C. Zelter (4)	None	None	None
Executive Officers			
Gregory W. Hunt(5)	None	None	None
Joseph Glatt	None	None	None
Edward Goldthorpe(6)	None	None	None
Cindy Z. Michel	None	None	None

John J. Suydam	None	None	None

(1) We do not have a profit sharing or retirement plan, and our Directors and Executive Officers do not receive any pension or retirement benefits.

(2) Ms. Loeb's term as a director commenced immediately after our 2011 Annual Meeting of Stockholders held on August 2, 2011.

(3) Ms. Malone retired from our board of directors immediately after our 2011 Annual Meeting of Stockholders held on August 2, 2011.

(4) James C. Zelter is also an executive officer of Apollo Investment Corporation.

(5) Gregory W. Hunt's term as Chief Financial Officer and Treasurer commenced on May 23, 2012.

(6) On February 8, 2012, Edward Goldthorpe was appointed as President of Apollo Investment Corporation. His term commenced on May 2, 2012.

Each Independent Director's annual fee is \$100,000. Each Independent Director also receives \$2,500 plus reimbursement of reasonable out-of-pocket expenses incurred in connection with attending each board meeting,

\$1,000 plus reimbursement of reasonable out-of-pocket expenses incurred in connection with each committee meeting attended, and \$1,500 for each telephonic committee or board meeting attended. In addition, the chairman of the audit committee receives an annual fee of \$15,000 and each chairman of any other committee receives an annual fee of \$2,500 for additional services in these capacities. Further, we purchase directors' and officers' liability insurance on behalf of our directors and officers. Independent Directors have the option to receive their directors' fees paid in shares of our common stock issued at a price per share equal to the greater of net asset value or the market price at the time of payment.

INVESTMENT ADVISORY AND MANAGEMENT AGREEMENT

Management services

AIM serves as our investment adviser and is controlled by Apollo. AIM is registered as an investment adviser under the Advisers Act. Subject to the overall supervision of our board of directors, the investment adviser manages the day-to-day operations of, and provides investment advisory and management services to, Apollo Investment. Under the terms of an investment advisory and management agreement, AIM:

- determines the composition of our portfolio, the nature and timing of the changes to our portfolio and the manner of implementing such changes;
- identifies, evaluates and negotiates the structure of the investments we make (including performing due diligence on our prospective portfolio companies); and
- closes and monitors the investments we make.

AIM's services under the investment advisory and management agreement are not exclusive, and it is free to furnish similar services to other entities so long as its services to us are not impaired.

Management fee

Pursuant to the investment advisory and management agreement, we pay AIM a fee for investment advisory and management services consisting of two components—a base management fee and an incentive fee. For the fiscal years ended March 31, 2012, 2011 and 2010, we paid \$60.32 million, \$59.83 million and \$54.07 million, respectively, in base management fees and \$39.65 million, \$47.79 million and \$49.85 million, respectively, in performance-based incentive fees. The fees for the fiscal year ended March 31, 2012 reflect a reduction due to a prior payment of an unearned portion of the fees to AIM of \$2.78 million.

The base management fee is calculated at an annual rate of 2.00% of our average gross assets. The base management fee is payable quarterly in arrears. The base management fee is calculated based on the average value of our gross assets at the end of the two most recently completed calendar quarters. Base management fees for any partial month or quarter are appropriately pro rated.

The incentive fee has two parts, as follows: one part is calculated and payable quarterly in arrears based on our pre-incentive fee net investment income for the immediately preceding calendar quarter. For this purpose, pre-incentive fe
