FOCUS GOLD CORPORATION

(an exploration stage company)

Notes to Condensed Financial Statements

For the nine month period ended November 30, 2013 and 2012

1. Organization and Description of Business

Focus Gold Corporation (the "Company") was incorporated on December 23, 2005 under the laws of the State of Nevada under the name Real Estate Referral Center Inc. On April 21, 2009, the Company changed its name to Gold Bag, Inc. and, effective June 6, 2011, to Focus Gold Corporation. In October 2010, the Company entered into an option agreement with Victoria Gold Inc. for the right to explore and purchase mineral claims located in Ontario Canada and since that time the Company's principal business has been the acquisition and exploration of mineral resources. During the quarter ended November 30, 2013, the Company began discussions of forming a joint venture relating to a copper mine operation in Mexico, which it continues to pursue. In addition, during the quarter ended November 30, 2013, the company also developed a plan to expand its business operations to include the operation and acquisition of receivables management companies in order to generate positive cash flow in the short term, to augment expected future revenues from its existing operations. That new operation commenced in December 2013 with the formation of two subsidiaries, Focus Gold Financial Corp., a Florida corporation, and Focus Gold Commercial Resolution, Inc., also a Florida corporation. The former will focus on retail collections activities and the latter, on commercial collections. The two subsidiaries have opened offices in upstate New York, near Buffalo, have engaged employees and commenced business operations and have begun generating operating revenues as of January, 2014. Once the basic operating models are in place, the Company plans to begin roll-up acquisitions in both the retail and commercial receivables management markets.

The Company has been considered an exploration stage company and its financial statements are presented in a manner similar to a development stage company as defined in FASC 915-10-05, and interpreted by the Securities and Exchange Commission for mining companies in Industry Guide 7. As at February 28, 2013, the Company disposed of all of its then existing mineral properties and the Company has initiated steps to restructure itself and engaged an outside consultant to identify, review, and assess additional mineral properties for purchase. The Company has developed a private equity strategy to acquire gold mining properties following several key investment criteria that include: properties that are in safe governmental jurisdictions primarily in the Americas; properties that provide geographic diversification across its portfolio; projects with significant exploration upside; and, where possible, properties with existing capable management teams to which it can then provide senior level experienced management oversight. Once a property has matured, the Company will seek to divest the property either through a strategic sale or through a spin-off into a stand-alone public company.

2. Significant Accounting Policies

This summary of significant accounting policies of the Company is presented to assist in understanding the Company's financial statements. This condensed summary should be read in conjunction with the disclosure of accounting policies in the Company's audited financial statements for the year ended February 28, 2013.

(a)

Mineral Properties, Leases and Exploration and Development Costs

The Company accounts for mineral properties in accordance with ASC 930: *Extractive Activities-Mining*. Costs of acquiring mineral properties and leases are capitalized by project area upon purchase of the associated claims (see Note 5). Mineral properties are periodically assessed for impairment of value and any diminution in value.

FOCUS GOLD CORPORATION

(an exploration stage company)

Notes to Condensed Financial Statements

For the nine month period ended November 30, 2013 and 2012

The Company accounts for mineral exploration and development costs in accordance with ASC 932: *Extractive Activities*. All exploration expenditures are expensed as incurred, previously capitalized costs are expensed in the period the property is abandoned. Expenditures to develop new mines, to define further mineralization in existing ore bodies, and to expand the capacity of operating mines, are capitalized and amortized on units of production basis over proven and probable reserves.

Any option payments received by the Company from third parties or tax credits refunded to the Company are credited to the capitalized cost of the mineral property or to exploration costs as applicable. If payments received exceed the capitalized cost of the mineral property or the exploration costs incurred, the excess is recognized as income in the year received.

The amounts shown for mineral properties do not necessarily represent present or future values. Their recoverability is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development, and future profitable production or proceeds from the disposition thereof.

(b)

Derivative Instruments

Derivative instruments consist of common stock warrants and certain instruments embedded in certain notes payable and related agreements. These financial instruments are recorded in the balance sheets at fair value as liabilities. Changes in fair value are recognized in earnings in the period of change.

(c)

Impairment of Long-lived Assets

The Company reviews and evaluates its long-lived assets for impairment at each balance sheet date and documents such impairment testing. The tests include an evaluation of the assets and events or changes in circumstances that would indicate that the related carrying amounts may not be recoverable. Mineral properties in the exploration stage are monitored for impairment based on factors such as the Company's continued right to explore the area, exploration reports, assays, technical reports, drill results and the Company's continued plans to fund exploration programs on the property, whether sufficient work has been performed to indicate that the carrying amount of the mineral property cost carried forward as an asset will not be fully recovered, even though a viable mine has been discovered.

The tests for long-lived assets in the exploration, development or producing stage that would have a value beyond proven and probable reserves would be monitored for impairment based on factors such as current market value of the mineral property and results of exploration, future asset utilization, business climate, mineral prices and future undiscounted cash flows expected to result from the use of the related assets. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated future net undiscounted cash flows expected to be generated by the asset, including evaluating its reserves beyond proven and probable amounts.

The Company's policy is to record an impairment loss in the period when it is determined that the carrying amount of the asset may not be recoverable either by impairment or by abandonment of the property. The impairment loss is calculated as the amount by which the carrying amount of the assets exceeds its fair value.

(d)

Stock-based Compensation

FOCUS GOLD CORPORATION

(an exploration stage company)

Notes to Condensed Financial Statements

For the nine month period ended November 30, 2013 and 2012

The Company accounts for stock based compensation to employees as required by ASC718: *Compensation-Stock Compensation* and stock based compensation to nonemployees as required by ASC505-50: *Equity-Based Payments to Non-Employees*. Options and warrants are valued using the Black-Scholes pricing model. The offset to the recorded stock based compensation cost is to additional paid-in capital. Consideration received on the exercise of stock options is recorded as share capital and additional paid-in capital and the related additional paid-in capital is transferred to share capital.

(e)

Warrants

The Company accounts for warrants issued in conjunction with stock issuances under private placement using the fair value method. Under this method, the value of warrants issued is measured at fair value at the grant date using the Black-Scholes valuation model and recorded as share capital and additional paid-in capital.

The Company recognized the value of detachable warrants issued in conjunction with issuance of notes payable using the Black-Scholes pricing model. The Company recorded the relative fair value of the warrant as an increase to additional paid-in capital and discount against the related debt. The discount attributed to the value of the warrants is then amortized over the term of the underlying debt instrument. There are currently no warrants outstanding.

(f)

Estimates

The preparation of these condensed financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Significant areas requiring the use of management estimates include the determination of impairment of mineral properties and equipment, useful lives for amortization, valuation allowances for future income tax assets, fair value of non-cash stock-based compensation and reclamation and environmental obligations. Actual results, as determined by future events, may differ from these estimates.

(g)

Recent Accounting Pronouncements

The Company has implemented all new accounting pronouncements that are in effect. These pronouncements did not have any material impact on the financial statements unless otherwise disclosed, and the Company does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations

(h)

Going Concern

FOCUS GOLD CORPORATION

(an exploration stage company)

Notes to Condensed Financial Statements

For the nine month period ended November 30, 2013 and 2012

The Company's financial statements are prepared using the accrual method of accounting in accordance with accounting principles generally accepted in the United States of America, and have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities in the normal course of business. The Company incurred a net loss of \$44,042 during the nine month period ended November 30, 2013, and has an accumulated deficit of \$18,859,187 since entry into the exploration stage. Additionally, the Company is in default of various notes with principal amounts aggregating \$349,100. The Company changed its principal business to the development and exploitation of mineral properties in October 2010, but has not yet established an ongoing source of revenues sufficient to cover its operating costs and to allow it to continue as a going concern. The ability of the Company to continue as a going concern is dependent on the Company obtaining adequate capital to fund operating losses until it becomes profitable. If the Company is unable to obtain adequate capital, it could be forced to cease development of operations.

In order to continue as a going concern, develop a reliable source of revenues, and achieve a profitable level of operations the Company will need, among other things, additional capital resources. Management's plans to continue as a going concern include raising additional capital through sales of common stock and or a debt financing. However, management cannot provide any assurances that the Company will be successful in accomplishing any of its plans.

The ability of the Company to continue as a going concern is dependent upon its ability to successfully accomplish the plans described in the preceding paragraph and eventually secure other sources of financing and attain profitable operations. The accompanying financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

(i)

Fair Value Measurements

The FASB's Accounting Standards Codification defines fair value as the amount that would be received for selling an asset or paid to transfer a liability in an orderly transaction between market participants and requires that assets and liabilities carried at fair value are classified and disclosed in the following three categories:

Level 1 Quoted prices for identical instruments in active markets.

Level 2 Quoted prices for similar instruments in active or inactive markets and valuations derived from models where all significant inputs are observable in active markets.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs are unobservable in any market.

Given the conditions surrounding the trading of the Company's equity securities, the Company values its derivative instruments related to embedded conversion features and warrants from the issuance of convertible debentures in accordance with the Level 3 guidelines. For the nine month period ended November 30, 2013, the following table reconciles the beginning and ending balances for financial instruments that are recognized at fair value in these condensed financial statements. The fair value of warrants and embedded conversion features that have exercise reset features are estimated using an adjusted Black-Scholes model based on the Company's estimation of the likelihood of the occurrence of a reset.

	Balance at February 28, 2013	New Issuances	Changes in Fair Values	Balance at November 30, 2013
Level 3				
Derivative liabilities from:				
Conversion features	\$ 755,311	\$ 256,169	\$ (408,670)	\$ 602,810
Warrants	1,018,675	-	(980,449)	38,226
	\$ 1,773,986	\$ 256,169	\$ (443,880)	\$ 641,036

FOCUS GOLD CORPORATION

(an exploration stage company)

Notes to Condensed Financial Statements

For the nine month period ended November 30, 2013 and 2012

Changes in the unobservable input values would likely cause material changes in the fair value of the Company's Level 3 financial instruments. The significant unobservable input used in the fair value measurement is the estimation of the likelihood of the occurrence of a change to the contractual terms of the financial instruments. A significant increase (decrease) in this likelihood would result in a higher (lower) fair value measurement.

3. Discontinued Operations

To date, we have been engaged primarily in organizational activities and, until recently, have engaged in minimal initial exploration at several of our projects. As discussed in greater detail below, we have disposed of our interests in our former mineral exploration properties and are now focused on restructuring the Company and identifying suitable new exploration opportunities.

During the quarter ended November 30, 2013, we began discussions of forming a joint venture relating to a copper mine operation in Mexico, which it continues to pursue. In addition, during the quarter ended November 30, 2013, we also developed a plan to expand our business operations to include the operation and acquisition of receivables management companies in order to generate positive cash flow in the short term, to augment expected future revenues from our existing mining operations. That new operation commenced in December 2013 with the formation of two subsidiaries, Focus Gold Financial Corp., a Florida corporation, and Focus Gold Commercial Resolution, Inc., also a Florida corporation. The former will focus on retail collections activities and the latter, on commercial collections. The two subsidiaries have opened offices in upstate New York, near Buffalo, have engaged employees and commenced business operations and have begun generating operating revenues as of January 15, 2014. Once the basic operating models are in place, we plan to begin roll-up acquisitions in both the retail and commercial receivables management markets.

Subsidiaries

We had no subsidiaries as of November 30, 2013. In December 2013 we formed two subsidiaries, Focus Gold Financial Corp., a Florida corporation, and Focus Gold Commercial Resolution, Inc., also a Florida corporation.

Current Business Operations

We are an exploration stage issuer focused on the acquisition and development of mining properties. During the quarter ended November 30, 2013, we were involved in the following projects:

The Celtic Rights. - On October 25, 2011, Focus Gold completed the acquisition of a 98.65% interest in Metallum Resources PLC (Metallum). The acquisition gave Focus Gold indirect ownership through its wholly-owned subsidiary, Focus Celtic Gold Corporation (Celtic), of thirty-one exploration licenses in Northern Ireland, Scotland and Ireland covering in excess of 388,000 hectares. On October 5, 2012, Focus Gold entered an agreement with European Resource Capital Inc. (ERC) for the sale of the following to ERC for CAD\$2,500,000 (\$2,553,778 based upon the CAD to USD exchange rate): (a) 24,420,000 shares of common stock of Celtic; and (b) amounts receivable from Celtic of \$217,031. We also caused Metallum to grant to ERC at total of 64,987,982 options, each entitling the holder to purchase one common share of Metallum for £0.10 through December 31, 2012. Upon closing, ERC issued to Focus Gold a promissory note in the principal amount of CAD\$2,500,000, bearing interest at the rate of 8% per annum and secured by the 24,420,000 shares of Celtic common stock.

The Company restructured its relationship with ERC by entering an Assignment Agreement dated March 21, 2013 with ERC and Distressed Debt Investment Corp. Under the Assignment Agreement, the Company was paid CAD\$200,000 (\$193,602 at exchange rates at April 1, 2013, the date of receipt of proceeds) and received a one percent (1%) net smelter return royalty in the minerals extracted from the properties comprising the prospecting licenses in Ireland, Northern Ireland and Scotland currently registered in the name of Celtic or its subsidiaries. The fair value of the 1% smelter return royalty of \$1,892,000 was based on an independent third party valuation analysis using estimates and assumptions provided by management of Celtic, and other information compiled by management of Celtic.

The fair value of the consideration received during the restructuring in March 2013 aggregating \$193,602 was reflected retroactively in the determination of fair value of the CAD\$2,500,000 promissory note and accrued interest at February 28, 2013, and the difference of \$545,849 was recorded in our audited statement of operations for the year ended February 28, 2013 as an impairment of note receivable.

The results from the operations of the Celtic Rights also were included in discontinued operations in our statement of operations for the years ended February 28, 2013 and February 29, 2012.

We intend to restructure our operations and engaged an outside consultant to identify, review, and assess additional mining properties for purchase.

We will consider the interests of both shareholders and creditors in this restructuring process. As we strive to repay our debt and secure capital to create revenue in future periods, there will be dilution to existing stockholders caused by the issuance of common stock for cash, services, and in exchange for debt. While management seeks to minimize the dilution to existing stockholders, multiple factors beyond management's control, such as general economic conditions, the availability of and terms available for debt and equity funding, and the trading price of our common stock, will have a significant impact on this effort. Investors are cautioned that these efforts may not be successful.

We have developed a private equity strategy to acquire gold mining properties following several key investment criteria that include: properties that are in safe governmental jurisdictions primarily in the Americas; properties that provide geographic diversification across our portfolio; projects that have significant exploration upside; and properties with existing capable management teams to which we can then provide senior level experienced management oversight. Once a property has matured, we will seek to divest of the property either through a strategic sale or through a spin-off into a stand-alone public company.

As disclosed in our Current Report on Form 8-K dated April 8, 2013, we entered into a non-binding letter of intent with Carbon Energy Handling, Inc. (CH), a private corporation controlled by our Company's CEO, Gordon F. Lee that outlined a transaction to acquire various business opportunities. Subsequently, we agreed not to pursue the non-binding letter of intent.

On June 1, 2013, we entered into a consulting agreement with our CEO, Gordon F. Lee, to provide services as a consultant at the rate of \$10,000 per month in cash or in stock, and have accrued a total of \$30,000 as compensation for the quarter ended November 30, 2013 under this arrangement. In addition, the consulting agreement provides that we will issue one million shares of Series C preferred stock to Mr. Lee for a stated value of \$10,000. That agreement has been rescinded retroactively as of October 21, 2013. *See*, Item 6, Other Information.

On June 1, 2013, we entered into a consulting agreement with Victoria J. Blackburn to provide Consulting, Research, Review and Assessment of Technical Reports of Mining Properties, and of the Mining Property, along with comparables of said properties. , for a three month period, renewing thereafter for additional three month terms. Compensation for the services is set at \$20,000 per month in stock or in cash for a period of three months. A total of 16,000,000 shares have been issued to Victoria Blackburn in payment of \$60,000 in compensation for the first three months of this agreement, through November 30, 2013, and an additional 4,000,000 shares were issued in payment of the fee of \$20,000 for September, 2013. Victoria J. Blackburn is Secretary of CH and is also the executive assistant of our CEO, Gordon F. Lee. That agreement has been rescinded retroactively as of September 30, 2013. *See*, Item 6, Other Information.

On June 15, 2013, we entered into Service Agreements with CH and with Gordon F. Lee Group, LLC (GFLG), a private limited liability company also controlled by our CEO, Gordon F. Lee. Under the Service Agreement with CH, we engaged CH as a management service contractor to provide a full scope of management, personnel, administrative, supervisory, accounting and billing services relating to all of the non-legal aspects of our operations relating to the pursuit of our proposed energy exploration and development business (i.e., coal, coal rights, hydrocarbons, oil and gas) for a fixed monthly fee of \$10,000. Under the Service Agreement with GFLG, we engaged GFLG as a management service contractor to provide a full scope of management, personnel, administrative, supervisory, accounting and billing services relating to all of the non-legal aspects of our mineral (metals) exploration and development business that we are in the process of restructuring (i.e., gold, silver, platinum) for a fixed monthly fee of \$10,000. These agreements have been rescinded retroactively as of October 21, 2013. *See*, Item 6, Other Information.

Also on June 15, 2013, we entered into an Employment Agreement with Gordon F. Lee, individually, effective June 1, 2013. Under this agreement, Mr. Lee will earn a salary of \$1 per year, and, as an incentive bonus, has the opportunity to earn up to 100,000,000 shares of the Company's common stock and 100,000,000 common stock purchase options at an exercise price of \$.01 per share, expiring June 1, 2018 (Incentive Options). Mr. Lee will receive 20,000,000 shares of the Company's common stock and 20,000,000 Incentive Options upon closing the acquisition of each of four identified properties and an additional 5,000,000 shares of the Company's common stock and 5,000,000 Incentive Options upon completion of each technical report for the four property acquisitions, if they are closed. That agreement has been rescinded retroactively as of October 21, 2013. *See*, Item 6, Other Information.

As disclosed in our Current Report on Form 8-K dated August 5, 2013, we entered into a non-binding letter of intent with MinJay Holding Ltd. (MinJay), Stephanie Carey, Tripod Enterprises Ltd., Erika Knowles, Andrew Butler, James Lalonde and Cleavon Nixon (the Co-Vendors) that outlines a transaction in which the Company would acquire 100 percent of the Co-Vendors legal and beneficial interest in and to a purchase contract, (excluding certain water rights, separately deeded to MinJay, and not part of this agreement) dated June 13, 2013, between MinJay and each of Bobby J. Westbrook and Wanda Westbrook and to the Waters Sunset Gold Property. Management is still reviewing the transaction and conducting due diligence.

Going Concern

The independent auditors' report accompanying our February 28, 2013 and February 29, 2012 financial statements contains an explanatory paragraph expressing substantial doubt about our ability to continue as a going concern. The financial statements have been prepared assuming that we will continue as a going concern, which contemplates that we will realize our assets and satisfy our liabilities and commitments in the ordinary course of business.

Results of Operations

We have not generated any revenues and we have incurred recurring losses to date. Our financial statements have been prepared assuming that we will continue as a going concern and, accordingly, do not include adjustments relating to the recoverability and realization of assets and classification of liabilities that might be necessary should we be unable to continue in operation.

Income or Loss from Discontinued Operations

We incurred a loss from discontinued operations of \$nil for the three month period ended November 30, 2013 and \$nil for the nine month period ended November 30, 2013 compared to income from discontinued operations of \$242,501 for the three month period ended November 30, 2012 and a loss of \$3,009,520 for the nine month period ended November 30, 2012.

Management does not believe the percentage changes in expenses are indicative of future changes. Until we engage in exploration activities for a sufficient time to include comparable prior year periods, management is unable to predict the anticipated changes in expenses.

Liquidity and Capital Resources

Although incorporated in 2005, we began our current operations in October 2010, and have not yet attained a level of operations which allows us to meet our current overhead. As discussed elsewhere in this quarterly report, we have discontinued our interests in our former mineral exploration properties and are now engaged in restructuring our operations and seeking new exploration opportunities. Our ability to attain profitable operations remains uncertain, particularly given current economic conditions. We will be dependent upon obtaining additional financing in order to adequately fund working capital in order to enable us to restructure our affairs.

While we have funded our initial operations with private placements of equity and debt, there can be no assurance that adequate financing will continue to be available to us and, if available, on terms that are favorable to us. These factors raise substantial doubt about our ability to continue as a going concern and the accompanying financial statements do not include any adjustments related to the recoverability or classification of asset carrying amounts or the amounts and classification of liabilities that may result should we be unable to continue as a going concern.

As of November 30, 2013, our cash balance was \$5,025. Accounts payable and accrued liabilities as well as short term payments under contracts as of November 30, 2013 totaled \$2,280,260. Our working capital at November 30, 2013 was a deficit of \$2,275,235.

During the nine month period ended November 30, 2013, our sole means of meeting our cash flow requirements was through the receipt of funds from reorganization of our Note Receivable into a 1% Smelter interest and the receipt of \$193,602; net proceeds of \$100,000 from the sale of stock (2012 - \$nil); and \$130,000 from the sale of debt

instruments (2012 - \$561,500).

Cash Flows Used in Operating Activities

We have not yet generated positive cash flows from operating activities. For the nine month period ended November 30, 2013, net cash flows used in operating activities was \$686,564, consisting of a net loss of \$38,491, adjusted by a gain in amortization of debt discount of \$291,122, a gain in non-cash interest and financial fees of \$421,804, a decrease in derivative liabilities of \$1,389,119, a gain in non-cash common stock issued for services of \$2,262, an increase in accounts payable and accrued expenses of \$3,953 and an increase in related accounts payable and accrued expenses of \$21,907.

For the nine month period ended November 30, 2012, net cash flows used in operating activities was \$443,772, consisting of a net loss of \$5,393,656, adjusted by a gain in amortization of debt discount of \$630,303, a gain in non-cash interest and financial fees of \$1,513,248, a decrease in change in derivative liabilities of \$1,294,111, a gain in common stock issued for services of \$47,059, a decrease in prepaid expenses of \$777,685, an increase in accounts payable and accrued expenses of \$324,680, a decrease in related accounts payable and accrued expenses of \$129,643 and an increase in discontinued operations of \$2,933,929.

Cash Flows from Investing Activities

For the nine month period ended November 30, 2013 cash flows used in investing was \$40,000 consisting of the redemption of 2,000,000 shares of the Company's Class A Preferred Stock. For the nine month period ended November 30, 2012 cash flows from investing activities was \$nil, consisting of an advance of \$200,000 to the Company's former subsidiary and an increase in discontinued operations of \$200,000..

Cash Flows from Financing Activities

We have financed our operations primarily from either advances or the issuance of equity and debt instruments. For the nine month period ended November 30, 2013, net cash flows provided from financing activities was \$730,353 compared to \$561,500 for the nine month period ended November 30, 2012.

We expect that working capital requirements will continue to be funded through a combination of our existing funds and further issuances of securities, debt instruments, and related party loans or advances. Our working capital requirements are expected to increase in line with the growth of our business.

Plan of Operations

Our plan of operations for the next twelve months is to focus on reorganizing our operations and identifying new exploration opportunities. Unless and until we are successful in entering one or more definitive agreements in furtherance of our business plan, our capital needs for the next twelve months remains uncertain.

At November 30, 2013, we had \$5,025 in cash, and accounts payable and accrued liabilities as well as short term payments under contracts as of November 30, 2013 totaled \$2,280,260. Our working capital deficit as at November 30, 2013 was \$2,275,235. During the twelve month period following the date of this report, we anticipate that we will not generate any revenue unless we complete one or more acquisitions. Accordingly, we will be required to obtain additional financing in order to pursue our plan of operations for and beyond the next twelve months. However, our ability to raise additional financing on terms that our acceptable to us, or at all, remains uncertain. We have no lines of credit or other bank financing arrangements.

Generally, we have financed operations to date through the proceeds of the private placement of equity to third parties, and debt instruments from related and non-related parties. We cannot provide our investors with any assurance that we will be able to raise sufficient funding from the sale of our common stock, issuance of debt, advances or otherwise to fund our business activities going forward. In the absence of such financing, we will not be able to continue our operations and our business plan will fail.

Depository Chill

By letter dated May 20, 2013, The Depository Trust Company (DTC) advised us that DTC has imposed a restriction on physical and electronic deposit transactions (the Deposit Chill) in shares of our common stock. The effect of the Deposit Chill is that DTC will no longer accept share certificates for deposit, thereby preventing the deposit of the underlying shares into DTC-participant broker accounts. Generally speaking, as long as the Deposit Chill is in place, persons holding such shares will be unable to deposit or trade them electronically.

The Deposit Chill applies to all shares newly issued on or after the Chill Effective Date, as well as all shares previously issued as restricted securities that are cleared for resale on or after May 20, 2013, pursuant to an effective registration statement under the Securities Act or pursuant to Rule 144 under the Securities Act. The reason given by DTC for the Deposit Chill was the large number of shares deposited with DTC between December 23, 2011 and April 8, 2013.

As long as the Deposit Chill is in place, persons with share certificates representing freely tradable shares or restricted shares will be unable to deposit their shares into a broker account and effect trades electronically. This will likely have a material adverse effect on the public trading market for our shares; and will represent a significant obstacle to shareholders holding share certificates who wish to sell their shares.

As of the date of this Quarterly Report, the agreements discussed below summarize our material commitments.

We do not intend to purchase any significant equipment during the next twelve months.

As of the date of this Quarterly Report, we do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our president (also our principal executive officer and our secretary, treasurer and chief financial officer) to allow for timely decisions regarding required disclosure.

As of November 30, 2013, we carried out an evaluation, under the supervision and with the participation of Gordon F. Lee (our principal executive officer and also our principal financial officer) of the effectiveness of our disclosure controls and procedures. Based on the foregoing, Mr. Lee concluded that our disclosure controls and procedures were not effective in providing reasonable assurance in the reliability of our corporate reporting as of the end of the period covered by this report due to certain deficiencies that existed in the design or operation of our internal controls over financial reporting as at our year ended February 28, 2013, as disclosed in our Annual Report on Form 10-K for our fiscal year ended February 28, 2013, which may be considered to be material weaknesses and which had not been resolved as of November 30, 2013.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal controls over financial reporting that occurred during our fiscal quarter ended November 30, 2013 that have materially affected, or are likely to materially affect, our internal control over financial reporting.
