As of February 16, 2015, there were outstanding 37,237,109 shares of Common Stock par value \$.69-4/9 per share, and 22,886,441 shares of Class B Common Stock par value \$.69-4/9 per share.

As of June 30, 2014, the aggregate market value of the Common Stock (based upon the closing price of the stock on the New York Stock Exchange on such date) held by non-affiliates was approximately \$547,294,000. Class B Common Stock is not traded on any exchange, is restricted as to transfer or other disposition, but is convertible into Common Stock on a share-for-share basis. Upon such conversion, the resulting shares of Common Stock are freely transferable and publicly traded. Assuming all 22,886,441 shares of outstanding Class B Common Stock were converted into Common Stock, the aggregate market value of Common Stock held by non-affiliates on June 30, 2014 (based upon the closing price of the stock on the New York Stock Exchange on such date) would have been approximately \$665,166,000. Determination of stock ownership by non-affiliates was made solely for the purpose of

this requirement, and the Registrant is not bound by these determinations for any other purpose.

Forward-Looking Information

From time to time, in the Company's statements and written reports, including this report, the Company discusses its expectations regarding future performance by making certain "forward-looking statements." Forward-looking statements can be identified by the use of words such as "anticipated," "believe," "expect," "intend," "estimate," "project," and other words of similar meaning in connection with a discussion of future operating or financial performance and are subject to certain factors, risks, trends and uncertainties that could cause actual results and achievements to differ materially from those expressed in the forward-looking statements. These forward-looking statements are based on currently available competitive, financial and economic data and management's views and assumptions regarding future events. Such forward-looking statements are inherently uncertain, and actual results may differ materially from those expressed or implied herein. Consequently, the Company wishes to caution readers not to place undue reliance on any forward-looking statements. In connection with the "safe harbor provisions" of the Private Securities Litigation Reform Act of 1995, factors, among others, which could cause future results to differ materially from the forward-looking statements, expectations and assumptions expressed or implied herein include those set forth in the subsection entitled "Risk Factors" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" on Pages 11 and 12 of the 2014 Report, which subsection is incorporated herein by reference. In addition, the Company's results may be affected by general factors, such as economic conditions, political developments, currency exchange rates, interest and inflation rates, accounting standards, taxes, and laws and regulations affecting the Company in markets where it competes and those factors described in Item 1A "Risk Factors" and elsewhere in this Annual Report on Form 10-K and in other Company filings with the Securities and Exchange Commission.

PART I

ITEM 1. Business.

Tootsie Roll Industries, Inc. and its consolidated subsidiaries (the "Company") have been engaged in the manufacture and sale of confectionery products for over 100 years. This is the only industry segment in which the Company operates and is its only line of business. The majority of the Company's products are sold under the registered trademarks TOOTSIE ROLL, TOOTSIE ROLL POPS, CHILD'S PLAY, CAMEL APPLE POPS, CHARMS, BLOW-POP, CHARMS MINI POPS, CELLA'S, MASON DOTS, MASON CROWS, JUNIOR MINTS, CHARLESTON CHEW, SUGAR DADDY, SUGAR BABIES, ANDES, FLUFFY STUFF, DUBBLE BUBBLE, RAZZLES, CRY BABY and NIK-L-NIP.

The Company's products are marketed in a variety of packages designed to be suitable for display and sale in different types of retail outlets. They are sold through approximately 30 candy and grocery brokers and by the Company itself to approximately 4,000 customers throughout the United States. These customers include wholesale distributors of candy and groceries, supermarkets, variety stores, dollar stores, chain grocers, drug chains, discount chains, cooperative grocery associations, mass merchandisers, warehouse and membership club stores, vending machine operators, the U.S. military and fund-raising charitable organizations.

The Company's principal markets are in the United States, Canada and Mexico. The majority of production from the Company's Canadian plants is sold in the United States. The majority of production from the Company's Mexican plant is sold in Mexico.

The domestic confectionery business is highly competitive. The Company competes primarily with other manufacturers of confectionery products sold to the above mentioned customers. Although accurate statistics are not available, the Company believes it is among the ten largest domestic manufacturers in this field. In the markets in which the Company competes, the main forms of competition comprise brand recognition, as well as competition for retail shelf space and a fair price for our products at various retail price points.

The Company did not have a material backlog of firm orders at the end of the calendar years 2014 or 2013.

Table of Contents

Although the Company experienced moderating costs for some ingredients in 2014 compared to 2013, unit costs for certain ingredients and packaging materials, freight and delivery, wages and benefits, and plant operations continued to increase further in 2014 compared to 2013. The Company has made progress toward restoring margins to their historical levels before the increases in commodity and other input costs in past years.

The Company has historically hedged certain of its future sugar, corn syrup and soybean oil needs with derivatives at such times that it believes that the forward markets are favorable. The Company's decision to hedge its major ingredient requirements is dependent on our evaluation of forward commodity markets and comparison to vendor quotations, if available, and/or historical costs. The Company has historically hedged these major commodities and ingredients with derivatives, primarily commodity futures and option contracts, before the commencement of the next calendar year to better ascertain the need for product pricing changes or product weight decline (indirect price change) adjustments to its product sales portfolio and better manage ingredient costs. The Company will generally purchase forward derivative contracts (i.e., "long" position) in selected future months that correspond to the Company's estimated procurement and usage needs of the respective commodity in the respective forward periods.

From time to time, the Company also changes the size of certain of its products, which are usually sold at standard prices, to reflect significant changes in ingredient and other input costs.

The Company does not hold any material patents, licenses, franchises or concessions. The Company's major trademarks are registered in the United States and in many other countries. Continued trademark protection is of material importance to the Company's business as a whole.

Although the Company does research and develops new products and product line extensions for existing brands, it also improves the quality of existing products, improves and modernizes production processes, and develops and implements new technologies to enhance the quality and reduce the costs of products. The Company does not expend material amounts of money on research or development activities.

The manufacture and sale of consumer food products is highly regulated. In the United States, the Company's activities are subject to regulation by various government agencies, including the Food and Drug Administration, the Department of Agriculture, the Federal Trade Commission, the Department of Commerce and the Environmental Protection Agency, as well as various state and local agencies. Similar agencies also regulate the businesses outside of the United States. The Company maintains quality assurance and other programs to insure that all products we manufacture and distribute are safe and of high quality and comply with all applicable laws and regulations.

The Company's compliance with federal, state and local regulations which have been enacted or adopted regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment, has not had a material effect on the capital expenditures, earnings or competitive position of the Company nor does the Company

anticipate any such material effects from presently enacted or adopted regulations.

The Company employs approximately 2,000 persons.

The Company has found that its sales normally maintain a consistent level throughout the year except for a substantial increase in the third quarter which reflects pre-Halloween and back-to-school sales. In anticipation of this high sales period, the Company generally begins building inventories in the second quarter of each year. The Company historically offers extended credit terms for sales made under seasonal sales programs, including Halloween. Each year, after accounts receivables related to third quarter sales have been collected, the Company invests such funds in various marketable securities.

Sales revenues from Wal-Mart Stores, Inc. aggregated approximately 23.7%, 23.8%, and 23.5% of net product sales during the years ended December 31, 2014, 2013 and 2012, respectively. Some of the aforementioned sales to Wal-Mart are sold to McLane Company, a large national grocery wholesaler, which services and delivers certain of the Company products to Wal-Mart and other retailers in the U.S.A. Net product sales revenues from McLane, which includes these Wal-Mart sales as well as sales and deliveries to other Company customers, were 15.3% in 2014 and 15.1% in 2013; such revenues from McLane were less than 10% in 2012. Although no other customers other than

Table of Contents

McLane Company, Inc. and Wal-Mart Stores, Inc. accounted for more than 10% of net product sales, the loss of one or more significant customers could have a material adverse effect on the Company's business.

For a summary of sales and long-lived assets of the Company by geographic area see Note 9 of the "Notes to Consolidated Financial Statements" on Page 23 of the 2014 Report and on Page 3 of the 2014 Report under the section entitled "International." Note 9 and the aforesaid section are incorporated herein by reference.

Information regarding the Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to these reports, will be made available, free of charge, upon written request to Tootsie Roll Industries, Inc., 7401 South Cicero Avenue, Chicago, Illinois 60629, Attention: Barry Bowen, Treasurer and Assistant Secretary. The Company does not make all such reports available on its website at www.tootsie.com because it believes that they are readily available from the Securities Exchange Commission at www.sec.gov, and because the Company provides them free of charge upon request. Interested parties, including shareholders, may communicate to the Board of Directors or any individual director in writing, by regular mail, addressed to the Board of Directors or an individual director, in care of Tootsie Roll Industries, Inc., 7401 South Cicero Avenue, Chicago, Illinois 60629, Attention: Ellen R. Gordon, Chairman and Chief Executive Officer. If an interested party wishes to communicate directly with the Company's non-employee directors, it should be noted on the cover of the communication.

ITEM 1A. Risk Factors.

Significant factors that could impact the Company's financial condition or results of operations include, without limitation, the following:

- Risk of changes in the price and availability of raw materials - The principal ingredients used by the Company are subject to price volatility. Although the Company engages in commodity hedging transactions and annual supply agreements as well as leveraging the high volume of its annual purchases, the Company may experience price increases in these ingredients that it may not be able to offset, which could have an adverse impact on the Company's results of operations and financial condition. In addition, although the Company has historically been able to procure sufficient supplies of its ingredients, market conditions could change such that adequate supplies might not be available or only become available at substantially higher costs. Adverse weather patterns, including the effects of climate change, can significantly affect the cost and availability of these ingredients.
- Risk of changes in product performance and competition - The Company competes with other well-established manufacturers of confectionery products. A failure of new or existing products to be favorably received, a failure to retain preferred shelf space at retail or a failure to sufficiently counter aggressive competitive actions could have an adverse impact on the Company's results of operations and financial condition.

- Risk of discounting and other competitive actions - Discounting and pricing pressure by the Company's retail customers and other competitive actions could make it more difficult for the Company to maintain its operating margins.
 - Risk of dependence on large customers - The Company's largest customer, Wal-Mart Stores, Inc., accounted for approximately 23.7% of net product sales in 2014, and other large national chains are also material to the Company's sales. The loss of Wal-Mart Stores, Inc. or one or more other large customers, or a material decrease in purchases by one or more large customers, could result in decreased sales and adversely impact the Company's results of operations and financial condition.
- Risk of changes in consumer preferences and tastes - Failure to adequately anticipate and react to changing demographics, consumer trends, consumer health concerns and product preferences could have an adverse impact on the Company's results of operations and financial condition.

Table of Contents

- Risk of economic conditions on consumer purchases - The Company's sales are impacted by consumer spending levels and impulse purchases which are affected by general macroeconomic conditions, consumer confidence, employment levels, disposable income, availability of consumer credit and interest rates on that credit, consumer debt levels, energy costs and other factors. Volatility in food and energy costs, rising unemployment and/or underemployment, declines in personal spending, and recessionary economic conditions could adversely impact the Company's revenues, profitability and financial condition.
- Risks related to environmental matters - The Company's operations are not particularly impactful on the environment, but increased government environmental regulation or legislation could adversely impact the Company's profitability.

Risks relating to participation in the multi-employer pension plan for certain Company union employees - As outlined in Note 7 (page 22) to the consolidated financial statements and discussed in the Management's Discussion & Analysis (page 6), the Company participates in a multi-employer pension plan (Plan) which is currently in critical status, the "Red Zone", as defined by applicable law. Under terms of a rehabilitation plan, the Company is to be assessed 5% annual compounded surcharges on its contributions to the Plan until such time as the Plan emerges from critical status. Should the Company withdraw from the Plan, it would subject to a withdrawal liability which is discussed in Note 7 to the consolidated financial statements. The Company is currently unable to determine the ultimate outcome of this matter and therefore, is unable to determine the effects on its consolidated financial statements, but, the ultimate outcome could be material to its consolidated results of operations in one or more future periods.

- Risk of new governmental laws and regulations - Governmental laws and regulations, including those that affect food advertising and marketing, including products for children, use of ingredients in products, including the use of hydrogenated oils, income and other taxes and tariffs, including those targeted toward confectionery products, and the environment, both in and outside the U.S., are subject to change over time, which could adversely impact the Company's results of operations and ability to compete in domestic or foreign marketplaces.
- Risk of labor stoppages - To the extent the Company experiences any significant labor stoppages, such disputes or strikes could negatively affect shipments from suppliers or shipments of finished product.
- Risk of impairment of goodwill or indefinite-lived intangible assets - In accordance with authoritative guidance, goodwill and indefinite-lived intangible assets are not amortized but are subject to an impairment evaluation annually or more frequently upon the occurrence of a triggering event, and other long-lived assets are likewise tested for impairment upon the occurrence of a triggering event.
 - Risk of the cost of energy increasing - Higher energy costs would likely result in higher distribution, freight and other operating costs. The Company may not be able to offset these cost increases or pass such cost increases onto customers in the form of price increases, which could have an adverse impact on the Company's results of operations and financial condition.

Risk of a product recall - Issues related to the quality and safety of the Company's products could result in a voluntary or involuntary large-scale product recall. Negative publicity associated with this type of situation, including a product recall relating to product contamination or product tampering, whether valid or not, could negatively impact demand for our products. Costs associated with these potential actions, including a product recall and related litigation or fines, and marketing costs relating to the re-launch of such products or brands, could negatively affect operating results.

Table of Contents

- Risk of operational interruptions relating to computer software or hardware failures - The Company is reliant on computer systems to operate its business. Software failure or corruption, including cyber-based attacks or network security breaches, or catastrophic hardware failures or disaster could disrupt supply chain planning and activities relating to sales demand forecasts, materials procurement, production planning, customer shipments, and financial and accounting, all of which could negatively impact sales and profits.
- Risk of production interruptions - The majority of the Company's products are manufactured in a single production facility on specialized equipment. In the event of a disaster, such as a fire or earthquake, at a specific plant location, it would be difficult to transfer production to other facilities or a new location in a timely manner, which could result in loss of market share for the affected products.
- Risk related to international operations - To the extent there is political or social unrest, civil war, terrorism or significant economic instability in the countries in which the Company operates, the results of the Company's business in such countries could be adversely impacted. Currency exchange rate fluctuations between the U.S. dollar and foreign currencies could also have an adverse impact on the Company's results of operations and financial condition. The Company's principal markets are the U.S.A., Canada, and Mexico.
- Risk related to investments in marketable securities and equity method investments - The Company invests its surplus cash in a diversified portfolio of highly rated marketable securities, including tax exempt municipal bonds, with maturities of generally up to three years. Nonetheless, such investments could become impaired in the event of certain adverse economic and/or geopolitical events.
- Disruption to our supply chain could impair our ability to produce or deliver our finished products, resulting in a negative impact on our operating results - Disruption to our manufacturing operations or our supply chain, some of which are discussed above, could result from, but are not limited to natural disasters, pandemic outbreak of disease, weather, fire or explosion, terrorism or other acts of violence, unavailability of ingredients or packaging materials, labor strikes or other labor activities, operational and/or financial instability of key suppliers, and other vendors or service providers. Although we take precautions to mitigate the impact of possible disruptions, if we are unable, or if it is not financially feasible, to effectively mitigate the likelihood or potential impact of such disruptive events, our results of operations and financial condition could be negatively impacted.
- The Company is a controlled company due to the common stock holdings of the Gordon family - The Gordon family's share ownership represents a majority of the combined voting power of all classes of the Company's common stock as of December 31, 2014. As a result, the Gordon family has the power to elect the Company's directors and approve actions requiring the approval of the shareholders of the Company.

The factors identified above are believed to be significant factors, but not necessarily all of the significant factors, that could impact our business. Unpredictable or unknown factors could also have material effects on the Company.

Additional significant factors that may affect the Company's operations, performance and business results include the risks and uncertainties listed from time to time in filings with the Securities and Exchange Commission and the risk

factors or uncertainties listed herein or listed in any document incorporated by reference herein.

See also the subsection entitled "Risk Factors" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" on Pages 11 and 12 of the 2014 Report (Exhibit 13 to this Annual Report on Form 10-K), which subsection is incorporated herein by reference.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON
FINANCIAL STATEMENT SCHEDULE

To the Board of Directors of Tootsie Roll Industries, Inc.:

Our audits of the consolidated financial statements and of the effectiveness of internal control over financial reporting referred to in our report dated February 27, 2015 appearing in the 2014 Annual Report to Shareholders of Tootsie Roll Industries, Inc. (which report and consolidated financial statements are incorporated by reference in this Annual Report on Form 10-K) also included an audit of the financial statement schedule listed in Item 15(a)(2) of this Form 10-K. In our opinion, this financial statement schedule presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.
