MARKETAXESS HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Organization and Principal Business Activity

MarketAxess Holdings Inc. (the “Company” or “MarketAxess”) was incorporated in the State of Delaware on April 11, 2000. Through its subsidiaries, the Company operates an electronic trading platform for corporate bonds and other types of fixed-income instruments through which the Company’s institutional investor clients can access liquidity provided by its broker-dealer and other institutional clients. The Company’s multi-dealer trading platform allows its institutional investor clients to simultaneously request competitive, executable bids or offers from multiple broker-dealers, and to execute trades with the broker-dealer of their choice. The Company’s trading platform provides access to global liquidity in U.S. high-grade corporate bonds, emerging markets and high-yield bonds, European bonds, U.S. agency bonds, credit derivatives and other fixed-income securities. The Company also executes certain bond transactions between and among institutional investor and broker-dealer clients on a matched principal basis by serving as counterparty to both the buyer and the seller in trades which then settle through a third-party clearing broker. The Company provides fixed-income market data, analytics and compliance tools that help its clients make trading decisions. The Company also provides trade matching and regulatory transaction reporting services to the securities markets. In addition, the Company provides technology solutions and professional consulting services to fixed-income industry participants.

2. Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany transactions and balances have been eliminated. These consolidated financial statements are unaudited and should be read in conjunction with the audited consolidated financial statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015. The consolidated financial information as of December 31, 2015 has been derived from audited financial statements not included herein. These unaudited consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) and the rules and regulations of the U.S. Securities and Exchange Commission (“SEC”) with respect to Form 10-Q and reflect all adjustments that, in the opinion of management, are normal and recurring, and that are necessary for a fair statement of the results for the interim periods presented. In accordance with such rules and regulations, certain disclosures that are normally included in annual financial statements have been omitted. Interim period operating results may not be indicative of the operating results for a full year.

Cash and Cash Equivalents

Cash and cash equivalents includes cash and money market instruments that are primarily maintained at one major global bank. Given this concentration, the Company is exposed to certain credit risk in relation to its deposits at this bank. The Company defines cash equivalents as short-term interest-bearing investments with maturities at the time of purchase of three months or less.

Investments

The Company determines the appropriate classification of securities at the time of purchase which are recorded in the Consolidated Statements of Financial Condition on the trade date. Securities are classified as available-for-sale or trading. The Company's available-for-sale investments are comprised of municipal bonds and investment grade corporate debt securities. Available-for-sale investments are carried at fair value with the unrealized gains or losses reported in accumulated other comprehensive loss in the Consolidated Statements of Financial Condition. Trading investments primarily include investment grade corporate debt securities and are carried at fair value, with unrealized gains or losses included in other income in the Consolidated Statements of Operations.

The Company assesses whether an other-than-temporary impairment loss on the available-for-sale investments has occurred due to declines in fair value or other market conditions. The portion of an other-than-temporary impairment related to credit loss is recorded as a charge in other income in the Consolidated Statements of Operations. The remainder is recognized in accumulated other comprehensive loss if the Company does not intend to sell the security and it is more likely than not that the Company will not be required to sell the security prior to recovery. No charges for other-than-temporary losses were recorded during the three months ended March 31, 2016 and 2015.

Fair Value Financial Instruments

Fair value is defined as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.” A three-tiered hierarchy for determining fair value has been established that prioritizes inputs to valuation techniques used in fair value calculations. The three levels of inputs are defined as Level 1 (unadjusted quoted prices for identical assets or liabilities in active markets), Level 2 (inputs that are observable in the marketplace other than those inputs classified in Level 1) and Level 3 (inputs that are unobservable in the marketplace). The Company’s financial assets and liabilities measured at fair value on a recurring basis consist of its money market funds, securities available-for-sale, trading securities and foreign currency forward contracts. All other financial instruments are short-term in nature and the carrying amount is reported on the Consolidated Statements of Financial Condition at approximate fair value.

Allowance for Doubtful Accounts

All accounts receivable have contractual maturities of less than one year and are derived from trading-related fees and commissions and revenues from products and services. The Company continually monitors collections and payments from its customers and maintains an allowance for doubtful accounts. The allowance for doubtful accounts is based upon the historical collection experience and specific collection issues that have been identified. Additions to the allowance for doubtful accounts are charged to bad debt expense, which is included in general and administrative expense in the Consolidated Statements of Operations.

Depreciation and Amortization

Fixed assets are carried at cost less accumulated depreciation. The Company uses the straight-line method of depreciation over three to seven years. The Company amortizes leasehold improvements on a straight-line basis over the lesser of the life of the improvement or the remaining term of the lease.

Software Development Costs

The Company capitalizes certain costs associated with the development of internal use software, including among other items, employee compensation and related benefits and third party consulting costs at the point at which the conceptual formulation, design and testing of possible software project alternatives have been completed. Once the product is ready for its intended use, such costs are amortized on a straight-line basis over three years. The Company reviews the amounts capitalized for impairment whenever events or changes in circumstances indicate that the carrying amounts of the assets may not be recoverable.

Cash Provided as Collateral

Cash is provided as collateral for broker-dealer clearing accounts. Cash provided as collateral is included in prepaid expenses and other assets in the Consolidated Statements of Financial Condition.

Foreign Currency Translation and Forward Contracts

Assets and liabilities denominated in foreign currencies are translated using exchange rates at the end of the period; revenues and expenses are translated at average monthly rates. Gains and losses on foreign currency translation are a component of accumulated other comprehensive loss in the Consolidated Statements of Financial Condition. Transaction gains and losses are recorded in general and administrative expense in the Consolidated Statements of Operations.

The Company enters into foreign currency forward contracts to hedge its net investment in its U.K. subsidiaries. Gains and losses on these transactions are included in accumulated other comprehensive loss in the Consolidated Statements of Financial Condition.

Revenue Recognition

The majority of the Company's revenues are derived from commissions for trades executed on its platform and distribution fees that are billed to its broker-dealer clients on a monthly basis. The Company also derives revenues from information and post-trade services, investment income and other income.

Commission revenue. Commissions are generally calculated as a percentage of the notional dollar volume of bonds traded on the platform and vary based on the type, size, yield and maturity of the bond traded. Under the Company's transaction fee plans, bonds that are more actively traded or that have shorter maturities are generally charged lower commissions, while bonds that are less actively traded or that have longer maturities generally command higher commissions. For trades that the Company executes between and among institutional investor and broker-dealer clients on a matched principal basis by serving as counterparty to both the buyer and the seller, the Company earns the commission through the difference in price between the two matched principal trades. Fee programs for certain products include distribution fees which are recognized monthly.

Information and post-trade services. The Company generates revenue from information services provided to our broker-dealer clients, institutional investor clients and data-only subscribers. Information services are invoiced monthly, quarterly or annually. When billed in advance, revenues are deferred and recognized monthly on a straight-line basis. The Company also generates revenue from regulatory transaction reporting and trade matching services. Revenue is recognized in the period the services are provided.

Technology products and services. The Company generates revenues from professional consulting services, technology software licenses and maintenance and support services. Revenue is generally recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable and collection is considered probable. Technology products and services revenue is reported in other income in the Consolidated Statements of Operations.

Initial set-up fees. The Company enters into agreements with its broker-dealer clients pursuant to which the Company provides access to its platform through a non-exclusive and non-transferable license. Broker-dealer clients may pay an initial set-up fee, which is typically due and payable upon execution of a dealer agreement. The initial set-up fee, if any, varies by agreement. Revenue is recognized over the initial term of the agreement, which is generally two years. Initial set-up fees are reported in other income in the Consolidated Statements of Operations.

Stock-Based Compensation

The Company measures and recognizes compensation expense for all share-based payment awards based on their estimated fair values measured as of the grant date. These costs are recognized as an expense in the Consolidated Statements of Operations over the requisite service period, which is typically the vesting period, with an offsetting increase to additional paid-in capital.

Income Taxes

Income taxes are accounted for using the asset and liability method. Deferred income taxes reflect the net tax effects of temporary differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when such differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is recognized against deferred tax assets if it is more likely than not that such assets will not be realized in future years. The Company recognizes interest and penalties related to unrecognized tax benefits in general and administrative expenses in the Consolidated Statements of Operations.

Business Combinations, Goodwill and Intangible Assets

Business combinations are accounted for under the purchase method of accounting. The total cost of an acquisition is allocated to the underlying net assets based on their respective estimated fair values. The excess of the purchase price over the estimated fair values of the net assets acquired is recorded as goodwill. Determining the fair value of certain

assets acquired and liabilities assumed is judgmental in nature and often involves the use of significant estimates and assumptions, including assumptions with respect to future cash flows, discount rates, growth rates and asset lives.

The Company operates as a single reporting unit. Subsequent to an acquisition, goodwill no longer retains its identification with a particular acquisition, but instead becomes identifiable with the entire reporting unit. As a result, all of the fair value of the Company is available to support the value of goodwill. An impairment review of goodwill is performed on an annual basis, at year-end, or more frequently if circumstances change. Intangible assets with definite lives, including purchased technologies, customer relationships and other intangible assets, are amortized on a straight-line basis over their estimated useful lives, ranging from three to 15 years. Intangible assets are assessed for impairment when events or circumstances indicate the existence of a possible impairment.

Earnings Per Share

Basic earnings per share is computed by dividing the net income attributable to common stock by the weighted-average number of shares of common stock outstanding during the period. For purposes of computing diluted earnings per share, the weighted-average shares outstanding of common stock reflects the dilutive effect that could occur if convertible securities or other contracts to issue common stock were converted into or exercised for common stock.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Out-of-Period Adjustments

During the first quarter of 2016, the Company determined that it had incorrectly recorded deferred taxes for the cumulative translation adjustment (“CTA”) that arises from converting the local currency financial statements into U.S. dollars. Upon making a permanent reinvestment assertion on unremitted earnings from foreign subsidiaries effective January 1, 2013, the Company should have eliminated any deferred tax balances derived from the CTA balance. The Company also determined that gains and losses on the foreign currency forward contracts used to hedge the net investment in certain foreign subsidiaries were not appropriately considered as taxable income or expense in the consolidated tax returns. The Company assessed these errors and determined that they were not material to previous reporting periods. Therefore, the Company recorded these items as out-of-period adjustments in the three months ended March 31, 2016 by decreasing deferred tax assets by \$3.1 million, decreasing other comprehensive income by \$2.1 million and increasing prepaid expenses and other assets by \$1.0 million in the Consolidated Statements of Financial Condition.

Recent Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2016-09, “Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting” (“ASU 2016-09”). ASU 2016-09 simplifies several aspects related to the accounting for share-based payment transactions, including the accounting for income taxes, statutory tax withholding requirements and classification on the statement of cash flows. ASU 2016-09 will be effective for the Company beginning January 1, 2017 and early adoption is permitted. The Company is currently in the process of determining the method of adoption and assessing the impact of ASU 2016-09 on the Company's Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-02, “Leases” (“ASU 2016-02”). The guidance affects the accounting for leases and provides for a lessee model that brings substantially all leases onto the balance sheet. ASU 2016-02 will be effective for the Company beginning January 1, 2019 and early adoption is permitted. The Company is currently in the process of determining the method of adoption and assessing the impact of ASU 2016-02 on the Company's Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-08, “Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)” (“ASU 2016-08”). ASU 2016-08 does not change the core principle of the guidance stated in ASU 2014-09, “Revenue from Contracts with Customers” (“ASU 2014-09”). The core principle of ASU 2014-09 is that an entity should recognize revenue for the transfer of goods or

services equal to the amount that it expects to be entitled to receive for those goods or services. Instead, the amendments in this ASU are intended to improve the operability and understandability of the implementation guidance on principal versus agent considerations and whether an entity reports revenue on a gross or net basis. ASU 2016-08 will have the same effective date and transition requirements as the new revenue standard issued in ASU 2014-09. The ASUs will be effective for the Company beginning January 1, 2018 and allows for both retrospective and prospective methods of adoption. The Company is in the process of determining the method of adoption and assessing the impact of ASU 2016-08 and ASU 2014-09 on the Company's Consolidated Financial Statements.

3. Net Capital Requirements

Certain U.S. subsidiaries of the Company are registered as a broker-dealer or swap execution facility and therefore are subject to the applicable rules and regulations of the SEC and the Commodity Futures Trading Commission. These rules contain minimum net capital requirements, as defined in the applicable regulations, and also may require a significant part of the registrants' assets be kept in relatively liquid form. Certain of the Company's foreign subsidiaries are regulated by the Financial Conduct Authority in the U.K. or Ontario Securities Commission in Canada and must maintain financial resources, as defined in the applicable regulations, in excess of the applicable financial resources requirement. As of March 31, 2016, each of the Company's subsidiaries that are subject to these

regulations had net capital or financial resources in excess of their minimum requirements. As of March 31, 2016, the Company's subsidiaries maintained aggregate net capital and financial resources that was \$115.9 million in excess of the required levels of \$9.8 million.

Each of the Company's U.S. and foreign regulated subsidiaries are subject to local regulations which generally prohibit repayment of borrowings from the Company or affiliates, paying cash dividends, making loans to the Company or affiliates or otherwise entering into transactions that result in a significant reduction in regulatory net capital or financial resources without prior notification to or approval from such regulated entity's principal regulator.

4. Fair Value Measurements

The following table summarizes the valuation of the Company's assets and liabilities measured at fair value as categorized based on the hierarchy described in Note 2.

	Level 1	Level 2	Level 3	Total
(In thousands)				
As of March 31, 2016				
Money market funds	\$31,973	\$—	\$ —	\$31,973
Securities available-for-sale				
Corporate debt	—	70,727	—	70,727
Municipal securities	—	2,011	—	2,011
Trading securities				
Corporate debt	—	73,235	—	73,235
Mutual funds held in rabbi trust	—	1,253	—	1,253
Foreign currency forward position	—	(1,130)	—	(1,130)
Total	\$31,973	\$146,096	\$ —	\$178,069
As of December 31, 2015				
Money market funds	\$61,913	\$—	\$ —	\$61,913
Securities available-for-sale				
Corporate debt	—	82,671	—	82,671
Municipal securities	—	2,035	—	2,035
Foreign currency forward position	—	354	—	354
Total	\$61,913	\$85,060	\$ —	\$146,973

Securities classified within Level 2 were valued using a market approach utilizing prices and other relevant information generated by market transactions involving comparable assets. The foreign currency forward contracts are classified within Level 2 as the valuation inputs are based on quoted market prices. The mutual funds held in a rabbi trust represent investments associated with the deferred cash incentive plan. See Note 14 to these Consolidated Financial Statements for further discussion of the deferred cash incentive plan. There were no financial assets classified within Level 3 during the three months ended March 31, 2016 and 2015.

The Company enters into foreign currency forward contracts to hedge the net investment in the Company's U.K. subsidiaries. The Company designates each foreign currency forward contract as a hedge and assesses the risk management objective and strategy, including identification of the hedging instrument, the hedged item and the risk exposure and how effectiveness is to be assessed prospectively and retrospectively. These hedges are for a one-month period and are used to limit exposure to foreign currency exchange rate fluctuations. The fair value of the asset is included in accounts receivable and the fair value of the liability is included in accounts payable in the Consolidated Statements of Financial Condition. Gains or losses on foreign currency forward contracts designated as hedges are included in accumulated other comprehensive loss in the Consolidated Statements of Financial Condition. A summary of the Company's foreign currency forward position is as follows:

	As of	
	March 31, 2016	December 31, 2015
	(In thousands)	
Notional value	\$50,587	\$ 45,716
Fair value of notional	51,717	45,362
Fair value of the (liability) asset	\$(1,130)	\$ 354

The following is a summary of the Company's investments:

	Amortized cost (In thousands)	Gross unrealized gains	Gross unrealized losses	Estimated fair value
As of March 31, 2016				
Securities available-for-sale				
Corporate debt	\$70,690	\$ 92	\$ (55)	\$70,727
Municipal securities	2,011	—	—	2,011

Total investments	\$146,966	\$ 334	\$ (74)	\$147,226
As of December 31, 2015				
Securities available-for-sale				
Corporate debt	\$82,937	\$ 4	\$ (270)	\$82,671

Edgar Filing: MARKETAXESS HOLDINGS INC - Form 10-Q

Municipal securities	2,035	—	—	2,035
Total securities available-for-sale	\$84,972	\$ 4	\$ (270)	\$84,706

The following table summarizes the fair value of the investments based upon the contractual maturities:

	As of March 31, 2016	December 31, 2015
	(In thousands)	
Less than one year	\$66,237	\$ 37,694
Due in 1 - 5 years	80,989	47,012
Total	\$147,226	\$ 84,706

Proceeds from the sales and maturities of investments during the three months ended March 31, 2016 and 2015 were \$13.3 million and \$10.5 million, respectively.

The following table provides fair values and unrealized losses on investments and by the aging of the securities' continuous unrealized loss position as of March 31, 2016 and December 31, 2015:

	Less than Twelve Months		Twelve Months or More		Total	
	Estimated fair value	Gross unrealized losses	Estimated fair value	Gross unrealized losses	Estimated fair value	Gross unrealized losses
(In thousands)						
As of March 31, 2016						
Corporate debt	\$38,005	\$ (74)	\$ —	\$ —	\$38,005	\$ (74)
Total	\$38,005	\$ (74)	\$ —	\$ —	\$38,005	\$ (74)
As of December 31, 2015						
Corporate debt	\$70,651	\$ (270)	\$ —	\$ —	\$70,651	\$ (270)
Total	\$70,651	\$ (270)	\$ —	\$ —	\$70,651	\$ (270)

5. Goodwill and Intangible Assets

Goodwill and intangible assets with indefinite lives was \$59.7 million as of both March 31, 2016 and December 31, 2015. Intangible assets that are subject to amortization, including the related accumulated amortization, are comprised of the following:

	March 31, 2016			December 31, 2015		
	Cost	Accumulated Amortization	Net Carrying Amount	Cost	Accumulated Amortization	Net Carrying Amount
(In thousands)						
Technology	\$5,770	\$ (5,770)	\$ —	\$5,770	\$ (5,492)	\$ 278
Customer relationships	5,661	(1,643)	4,018	5,668	(1,553)	4,115
Non-competition agreements	380	(380)	—	380	(359)	21
Tradenames	370	(370)	—	370	(353)	17
Total	\$12,181	\$ (8,163)	\$ 4,018	\$12,188	\$ (7,757)	\$ 4,431

Amortization expense associated with identifiable intangible assets was \$0.4 million and \$0.6 million for the three months ended March 31, 2016 and 2015, respectively. Estimated total amortization expense is \$0.7 million for 2016, and \$0.4 million for each of 2017, 2018, 2019 and 2020.

6. Income Taxes

The provision for income taxes consists of the following:

	Three Months Ended March 31,	
	2016	2015
	(In thousands)	
Current:		
Federal	\$7,078	\$7,316
State and local	1,289	1,478
Foreign	1,135	520
Total current provision	9,502	9,314
Deferred:		
Federal	4,977	3,840
State and local	713	624
Foreign	215	131
Total deferred provision	5,905	4,595
Provision for income taxes	\$15,407	\$13,909

The Company or one of its subsidiaries files U.S. federal, state and foreign income tax returns. Income tax returns for New York City (through 2003) and state (through 2009) and Connecticut state (through 2003) tax returns have been audited. Examinations of the Company's federal tax returns for 2011 through 2013 and New York State tax returns for 2010 through 2013 are currently underway. The Company cannot estimate when the examinations will conclude or the impact such examinations will have on the Company's Consolidated Financial Statements, if any.

The Company has determined that unremitted earnings of the Company's foreign subsidiaries are considered indefinitely reinvested outside of the United States.

7. Stock-Based Compensation Plans

Stock-based compensation expense for the three months ended March 31, 2016 and 2015 was as follows:

	Three Months Ended March 31,	
	2016	2015
	(In thousands)	
Employees	\$3,276	\$2,806
Non-employee directors	218	236
Total stock-based compensation	\$3,494	\$3,042

The Company records stock-based compensation for employees in employee compensation and benefits and for non-employee directors in general and administrative expenses in the Consolidated Statements of Operations.

During the three months ended March 31, 2016, the Company granted to employees a total of 87,230 shares of restricted stock or restricted stock units, performance-based shares with an expected pay-out at target of 48,899 shares of common stock and 112,988 options to purchase shares of common stock. The fair value of the restricted stock and performance-based share awards was based on a weighted-average fair value per share at the grant date of \$99.22 and \$102.82, respectively. Based on the Black-Scholes option pricing model, the weighted-average fair value for each option granted was \$31.80 per share.

As of March 31, 2016, the total unrecognized compensation cost related to all non-vested awards was \$31.4 million. That cost is expected to be recognized over a weighted-average period of 2.9 years.

8. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per common share:

	Three Months Ended March 31, 2016 2015 (In thousands, except per share amounts)	
Net income	\$28,963	\$24,593
Basic weighted average shares outstanding	36,775	36,706
Dilutive effect of stock options and restricted stock	896	920
Diluted weighted average shares outstanding	37,671	37,626
Basic earnings per share	\$0.79	\$0.67
Diluted earnings per share	\$0.77	\$0.65

Stock options and restricted stock totaling 238,224 shares and 249,846 shares for the three months ended March 31, 2016 and 2015, respectively, were excluded from the computation of diluted earnings per share because their effect would have been antidilutive. The computation of diluted shares can vary among periods due, in part, to the change in the average price of the Company's common stock.

9. Credit Agreement

In January 2013, the Company entered into a three-year credit agreement that provided for revolving loans and letters of credit up to an aggregate of \$50.0 million. In October 2015, the Company entered into an amended and restated credit agreement (the “Credit Agreement”) that increased the borrowing capacity to an aggregate of \$100.0 million, including a \$5.0 million sub-limit for standby letters of credit. The Credit Agreement will mature in October 2017. As of March 31, 2016, the Company had \$1.1 million in letters of credit outstanding leaving \$98.9 million available to borrow under the Credit Agreement. Subject to satisfaction of certain specified conditions, the Company is permitted to upsize the borrowing capacity under the Credit Agreement by an additional \$50.0 million.

Borrowings under the Credit Agreement will bear interest at a rate per annum equal to either of the following, as designated by the Company for each borrowing: (A) the sum of (i) the greatest of (a) the prime rate, as defined, (b) the federal funds effective rate plus 0.50% and (c) one month adjusted LIBOR plus 1.00% plus (ii) 0.50% or (B) the sum of (i) adjusted LIBOR plus (ii) 1.50%. Default interest is 2.00% per annum in excess of the rate otherwise applicable in the case of any overdue principal or any other overdue amount. The Company is also required to pay a commitment fee to the lenders under the Credit Agreement in respect of unutilized revolving loan commitments at a rate of 0.40% per annum.

The Company’s existing and future domestic subsidiaries (other than any broker-dealer subsidiary) have guaranteed the Company’s obligations under the Credit Agreement. Subject to customary exceptions and exclusions, the Company’s borrowings under the Credit Agreement are collateralized by first priority pledges (subject to permitted liens) of substantially all of the Company’s personal property assets and the personal property assets of the Company’s domestic subsidiaries that have guaranteed the Credit Agreement, including the equity interests of the Company’s domestic subsidiaries and the equity interests of certain of the Company’s foreign subsidiaries (limited, in the case of the voting equity interests of the foreign subsidiaries, to a pledge of 65% of those equity interests).

The Credit Agreement requires that the Company’s consolidated total leverage ratio tested on the last day of each fiscal quarter not exceed 2.5 to 1.0 and a consolidated interest coverage ratio tested on the last day of each fiscal quarter not be less than 3.5 to 1.0. The Credit Agreement also requires that the Company’s trailing twelve month adjusted EBITDA tested on the last day of each fiscal quarter not be less than \$80 million. The Company was in compliance with all applicable covenants at March 31, 2016 and December 31, 2015.

If an event of default occurs, including failure to pay principal or interest due on the loan balance, a voluntary or involuntary proceeding seeking liquidation, change in control of the Company, or one or more material judgments against the Company in excess of \$10.0 million, the lenders would be entitled to accelerate the borrowings under the Credit Agreement and take various other actions, including all actions permitted to be taken by a secured creditor. If certain bankruptcy events of default occur, the borrowings under the Credit Agreement will automatically accelerate.

10. Commitments and Contingencies

Lease Commitments

The Company leases office space under non-cancelable lease agreements expiring at various dates through 2027. Office space leases are subject to escalation based on certain costs incurred by the landlord. Minimum rental commitments as of March 31, 2016 under such operating leases were as follows (in thousands):

Remainder of 2016	\$2,527
2017	3,294
2018	3,015
2019	2,836
2020	2,836
2021 and thereafter	8,509
	\$23,017

Rental expense was \$1.0 million and \$0.9 million for the three months ended March 31, 2016 and 2015, respectively, and is included in occupancy expense in the Consolidated Statements of Operations. Rental expense has been recorded based on the total minimum lease payments after giving effect to rent abatement and concessions, which are being amortized on a straight-line basis over the life of the lease. The Company is contingently obligated for standby letters of credit amounting to \$1.1 million that were issued to landlords for office space.

The Company has assigned a lease agreement on a leased property to a third party and is contingently liable should the assignee default on future lease obligations through the November 2020 lease termination date. The aggregate amount of the future lease obligation under this arrangement is \$1.4 million as of March 31, 2016.

Legal Matters

In the normal course of business, the Company and its subsidiaries included in the consolidated financial statements may be involved in various lawsuits, proceedings and regulatory examinations. The Company assesses its liabilities and contingencies in connection with outstanding legal proceedings, if any, utilizing the latest information available. For matters where it is probable that the Company will incur a material loss and the amount can be reasonably estimated, the Company would establish an accrual for the loss. Once established, the accrual would be adjusted to reflect any relevant developments. When a loss contingency is not both probable and estimable, the Company does not establish an accrual.

Based on currently available information, the outcome of the Company's outstanding matters is not expected to have a material adverse impact on the Company's financial position. It is not presently possible to determine the ultimate exposure to these matters and there is no assurance that the resolution of the outstanding matters will not significantly exceed any reserves accrued by the Company.

Other

The Company, through two regulated subsidiaries, executes certain bond transactions between and among institutional investor and broker-dealer clients on a matched principal basis by serving as counterparty to both the buyer and the seller in trades which settle through third-party clearing brokers. Settlement typically occurs within one to three trading days after the trade date. Cash settlement of the transaction occurs upon receipt or delivery of the underlying instrument that was traded. For the three months ended March 31, 2016 and 2015, revenues from matched principal trading were approximately \$7.5 million and \$3.5 million, respectively. Under securities clearing agreements with third party clearing brokers, the Company maintains collateral deposits with each clearing broker in the form of cash. As of March 31, 2016, the amount of the collateral deposits included in prepaid expenses and other assets in the Consolidated Statements of Financial Condition was \$1.5 million. For the three months ended March 31, 2016 and 2015, clearing expenses associated with matched principal transactions were \$1.8 million and \$0.7 million, respectively, and are classified under general and administrative expense on the Consolidated Statements of Operations. The Company is exposed to credit risk in the event a counterparty does not fulfill its obligation to complete a transaction or if there is a miscommunication or other error in executing a matched principal transaction. Pursuant to the terms of the securities clearing agreements, the clearing broker has the right to charge the Company for losses resulting from a counterparty credit failure. The losses are not capped at a maximum amount and apply to all trades executed through the clearing broker. The Company did not record any liabilities or losses with regard to this right for the three months ended March 31, 2016 and 2015.

In the normal course of business, the Company enters into contracts that contain a variety of representations, warranties and general indemnifications. The Company's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Company that have not yet occurred. However, based on experience, the Company expects the risk of loss to be remote.

11. Customer Concentration

During both the three months ended March 31, 2016 and 2015, no single client accounted for more than 10% of total revenue. One institutional investor client accounted for 16.4% and 13.2% of trading volumes during the three months ended March 31, 2016 and 2015, respectively.

12. Share Repurchase Program

In January 2014, the Board of Directors of the Company authorized a share repurchase program for up to \$35.0 million of the Company's common stock. In July 2014, the Board of Directors increased the authorization under the share repurchase program by an additional \$65.0 million of the Company's common stock. The share repurchase program expired on February 29, 2016. In January 2016, the Board of Directors authorized a new two-year share repurchase program for up to \$25.0 million of the Company's common stock. For the three months ended March 31, 2016, the Company repurchased 9,852 shares of common stock at a cost of \$1.2 million. As of March 31, 2016, approximately \$23.8 million remains authorized for repurchase under the program. Shares repurchased under each program will be held in treasury for future use.

13. Segment and Geographic Information

The Company operates an electronic multi-party platform for the trading of fixed-income securities and provides related data, analytics, compliance tools and post-trade services. The Company considers its operations to constitute a single business segment because of the highly integrated nature of these product and services, of the financial markets in which the Company competes and of the Company's worldwide business activities. The Company believes that results by geographic region or client sector are not necessarily meaningful in understanding its business.

For the three months ended March 31, 2016 and 2015, the U.K. was the only individual foreign country in which the Company had a subsidiary that accounted for 10% or more of the total revenues or total long-lived assets of the Company. Revenues and long-lived assets are attributed to a geographic area based on the location of the particular subsidiary. Long-lived assets are defined as furniture, equipment, leasehold improvements and capitalized software. Information regarding revenue for the three months ended March 31, 2016 and 2015 and long-lived assets as of March 31, 2016 and December 31, 2015 was as follows:

	Three Months Ended March 31, 2016 2015 (In thousands)	
Revenues		
United States	\$75,374	\$66,453
United Kingdom	12,704	10,065
Other	495	253
Total	\$88,573	\$76,771

	As of March December 31, 31, 2016 2015 (In thousands)	
Long-lived assets, as defined		
United States	\$23,196	\$21,968
United Kingdom	8,876	8,910
Other	22	19
Total	\$32,094	\$30,897

14. Deferred Compensation Plans

In 2015, the Company adopted a non-qualified deferred cash incentive plan for certain officers and other employees. Under the plan, eligible employees may defer up to 100% of their annual cash incentive pay. The Company has

elected to fund its deferred compensation obligations through a rabbi trust. The rabbi trust is subject to creditor claims in the event of insolvency but such assets are not available for general corporate purposes. Assets held in the rabbi trust are invested in mutual funds, as selected by the participants, which are designated as trading securities and carried at fair value. The initial deferrals of \$1.2 million occurred in January 2016 and as of March 31, 2016, the fair value of the mutual fund investments was \$1.3 million. Changes in the fair value of securities held in the rabbi trust will be recognized as trading gains and losses and included in other revenues and offsetting increases or decreases in the deferred compensation obligation will be recorded in employee compensation and benefits. For the three months ended March 31, 2016, the trading gains and compensation expense were each \$0.1 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This report contains certain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by words such as "expects," "intends," "anticipates," "plans," "believes," "seeks," "estimates," "will," or words of similar meaning and include, but are not limited to, statements regarding the outlook for our future business and financial performance. Forward-looking statements are based on management's current expectations and assumptions, which are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. It is routine for our internal projections and expectations to change as the year or each quarter in the year progresses, and therefore it should be clearly understood that the internal projections and beliefs upon which we base our expectations may change prior to the end of each quarter or the year. Although these expectations may change, we are under no obligation to revise or update any forward-looking statements contained in this report. Our company policy is generally to provide our expectations only once per quarter, and not to update that information until the next quarter. Actual future events or results may differ, perhaps materially from those contained in the projections or forward-looking statements. Factors that could cause or contribute to such differences include those discussed below and elsewhere in this report, particularly in the section captioned Part II, Item 1A, "Risk Factors."

Executive Overview

MarketAxess operates a leading electronic trading platform that enables fixed-income market participants to efficiently trade corporate bonds and other types of fixed-income instruments using our patented trading technology. Our over 1,000 active participant firms include broker-dealer clients, investment advisers, mutual funds, insurance companies, public and private pension funds, bank portfolios and hedge funds. Our approximately 100 broker-dealer market-maker clients provide liquidity on the platform and include most of the leading broker-dealers in global fixed-income trading. Through our Open TradingTM protocols, we also execute certain bond transactions between and among institutional investor and broker-dealer clients on a matched principal basis by serving as counterparty to both the buyer and the seller in trades which then settle through a third-party clearing broker. We provide fixed-income market data, analytics and compliance tools that help our clients make trading decisions. We also provide trade matching and regulatory transaction reporting services to the securities markets. In addition, we provide technology solutions and professional consulting services to fixed-income industry participants.

Our multi-dealer trading platform allows our institutional investor clients to simultaneously request competing, executable bids or offers from our broker-dealer clients and execute trades with the broker-dealer of their choice from among those that choose to respond. We offer our broker-dealer clients a solution that enables them to efficiently reach our institutional investor clients for the distribution and trading of bonds. Our trading platform provides access to global liquidity in U.S. high-grade corporate bonds, emerging markets and high-yield bonds, European bonds, U.S. agency bonds, credit derivatives and other fixed-income securities.

Our Open TradingTM protocols allow our broker-dealer and institutional investor clients to interact in an all-to-all trading environment. These innovative technology solutions are designed to increase the number of potential trading counterparties on our electronic trading platform and create a menu of solutions to address different trade sizes and bond liquidity characteristics.

The majority of our revenues are derived from commissions for trades executed on our platform and distribution fees that are billed to our broker-dealer clients on a monthly basis. We also derive revenues from information and post-trade services, technology products and services, investment income and other income. Our expenses consist of employee compensation and benefits, depreciation and amortization, technology and communication expenses,

professional and consulting fees, occupancy, marketing and advertising and other general and administrative expenses.

Our objective is to provide the leading global electronic trading platform for fixed-income securities, connecting broker-dealers and institutional investors more easily and efficiently, while offering a broad array of information, trading and technology services to market participants across the trading cycle. The key elements of our strategy are:

- to innovate and efficiently add new functionality and product offerings to the MarketAxess platform that we believe will help to increase our market share with existing clients, as well as to expand our client base;
 - to leverage our existing client network and technology to increase the number of potential counterparties and improve liquidity by developing and deploying a wide range of electronic trading protocols to complement our traditional request-for-quote model and allowing broker-dealers and institutional investors to interact in our all-to-all Open TradingTM environment;
- to leverage our existing technology and client relationships to deploy our electronic trading platform into additional product segments within the fixed-income securities markets and deliver fixed-income securities-related technical services and products;

- to continue building our existing service offerings so that our electronic trading platform is more fully integrated into the workflow of our broker-dealer and institutional investor clients and to continue to add functionality to allow our clients to achieve a fully automated end-to-end straight-through processing solution (automation from trade initiation to settlement);
- to add new content and analytical capabilities to BondTicker™ and expand our Traxdata service offerings in order to improve the value of the information we provide to our clients; and
- to continue to increase and supplement our internal growth by entering into strategic alliances, or acquiring businesses or technologies that will enable us to enter new markets, provide new products or services, or otherwise enhance the value of our platform to our clients. For example, the acquisition of Xtrakter Limited (“Xtrakter”) in February 2013 provided us with an expanded set of Trax® data and post-trade technology solutions ahead of incoming pre- and post-trade transparency mandates from the Markets in Financial Instruments Directive II (“MIFID II”) in Europe. In April 2013, we entered into a strategic alliance with BlackRock, Inc. (“Blackrock”) to create a unified, open trading solution designed to help reduce liquidity fragmentation and improve pricing across U.S. cash credit markets. In January 2015, we expanded this alliance with BlackRock to include European cash credit markets.

Critical Factors Affecting Our Industry and Our Company

Economic, Political and Market Factors

The global fixed-income securities industry is risky and volatile and is directly affected by a number of economic, political and market factors that may result in declining trading volume. These factors could have a material adverse effect on our business, financial condition and results of operations. These factors include, among others, credit market conditions, the current interest rate environment, including the volatility of interest rates and investors’ forecasts of future interest rates, economic and political conditions in the United States, Europe and elsewhere, and the consolidation or contraction of our broker-dealer clients.

Competitive Landscape

The global fixed-income securities industry generally, and the electronic financial services markets in which we engage in particular, are highly competitive, and we expect competition to intensify in the future. Sources of competition for us will continue to include, among others, bond trading conducted directly between broker-dealers and their institutional investor clients over the telephone or electronically and other multi-dealer trading companies. Competitors, including companies in which some of our broker-dealer clients have invested, have developed or acquired electronic trading platforms or have announced their intention to explore the development of electronic platforms that may compete with us.

In general, we compete on the basis of a number of key factors, including, among others, the liquidity provided on our platform, the magnitude and frequency of price improvement enabled by our platform and the quality and speed of execution. We believe that our ability to grow volumes and revenues will largely depend on our performance with respect to these factors.

Our competitive position is also enhanced by the familiarity and integration of our broker-dealer and institutional investor clients with our electronic trading platform and other systems. We have focused on the unique aspects of the credit markets we serve in the development of our platform, working closely with our clients to provide a system that is suited to their needs.

Regulatory Environment

Our industry has been and is subject to continuous regulatory changes and may become subject to new regulations or changes in the interpretation or enforcement of existing regulations, which could require us to incur significant costs.

Following the global financial crisis and other recent events in the financial industry, governments and regulators in both the United States and Europe have called for increased regulation and transparency in the over-the-counter markets. As a result, the Dodd-Frank Act was signed into law in July 2010. Among the most significant requirements of the derivatives section of the Dodd-Frank Act are mandatory clearing of certain derivative instruments (“swaps”) through regulated central clearing organizations and mandatory trading of those instruments through either regulated exchanges or swap execution facilities (“SEFs”), in each case, subject to certain key exceptions. MarketAxess SEF Corporation, our wholly-owned U.S. subsidiary, operates as a SEF for the trading of certain credit derivatives subject to the CFTC’s jurisdiction, including certain index swaps subject to the CFTC’s ‘made available for trade’ determination that are required to be executed on a SEF or regulated exchange. The SEC has not yet finalized its rules for security-based SEFs, nor has it published a timetable for the finalization and implementation of such rules. No assurance can be given

regarding when, whether or in what form the remaining rules regarding the new regulatory regime for the swaps marketplace will be finalized or implemented.

Various rules promulgated since the financial crisis could adversely affect our bank-affiliated broker-dealer clients' ability to make markets in a variety of fixed-income securities, thereby negatively impacting the level of liquidity and pricing available on our trading platform. For example, while the recently adopted Volcker Rule does not apply directly to us, the Volcker Rule bans proprietary trading by banks and their affiliates. In addition, enhanced leverage ratios applicable to large banking organizations in the U.S. and Europe require such organizations to strengthen their balance sheets and may limit their ability or willingness to make markets on our trading platform. We cannot predict the extent to which these rules or any future regulatory changes may adversely affect our business and operations.

Similar to the U.S., regulatory bodies in Europe are developing new rules for the fixed-income markets. MiFID II and Markets in Financial Instruments Regulation ("MiFIR") were approved in June 2014 and introduce changes in market structure designed to: (i) enhance pre- and post-trade transparency for fixed income instruments with the scope of such requirements calibrated according to the liquidity of an instrument, (ii) increase and enhance post-trade reporting obligations with a requirement to submit post-trade data to Approved Reporting Mechanisms, (iii) ensure trading of certain derivatives occurs on regulated trading venues and (iv) establish a consolidated tape for trade data. While some of the rules and technical advice underpinning MiFID II have not yet been finalized, MiFID II will have a significant impact in these areas, as well as on corporate governance and investor protection. MiFID II and MiFIR are expected to take effect in January 2018. The final rules may have an adverse effect on our operations or our ability to provide our electronic trading platform in Europe in a manner that can successfully compete against other types of regulated and non-regulated venues for the fixed-income trading needs of our clients. In addition, MiFID II is expected to cause us to expend more significant compliance, business and technology resources, incur additional operational costs and create additional regulatory exposure for our trading and post-trade businesses. While we generally believe the net impact of the rules and regulations may be positive for our businesses, unintended consequences of the rules and regulations may adversely affect us in ways yet to be determined.

Rapid Technological Changes

We must continue to enhance and improve our electronic trading platform. The electronic financial services industry is characterized by increasingly complex systems and infrastructures and new business models. Our future success will depend on our ability to enhance our existing products and services, develop and/or license new products and technologies that address the increasingly sophisticated and varied needs of our existing and prospective broker-dealer and institutional investor clients and respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. We have been issued 13 patents covering our most significant trading protocols and other aspects of our trading system technology.

Trends in Our Business

The majority of our revenues are derived from commissions for transactions executed on our platform between our institutional investor and broker-dealer clients and monthly distribution fees. We believe that there are five key variables that impact the notional value of such transactions on our platform and the amount of commissions and distribution fees earned by us:

- the number of participants on our platform and their willingness to originate transactions through the platform;
- the number of broker-dealer clients on the platform and the frequency and competitiveness of the price responses they provide on our platform;
- the number of markets for which we make trading available to our clients;
- the overall level of activity in these markets; and

·the level of commissions that we collect for trades executed through the platform.

We believe that overall corporate bond market trading volume is affected by various factors including the absolute levels of interest rates, the direction of interest rate movements, the level of new issues of corporate bonds and the volatility of corporate bond spreads versus U.S. Treasury securities. Because a significant percentage of our revenue is tied directly to the volume of securities traded on our platform, it is likely that a general decline in trading volumes, regardless of the cause of such decline, would reduce our revenues and have a significant negative impact on profitability.

Commission Revenue

Commissions are generally calculated as a percentage of the notional dollar volume of bonds traded on our platform and vary based on the type, size, yield and maturity of the bond traded. Under our transaction fee plans, bonds that are more actively traded or that have shorter maturities are generally charged lower commissions, while bonds that are less actively traded or that have longer maturities generally command higher commissions.

U.S. High-Grade Corporate Bond Commissions. Our U.S. high-grade corporate bond fee plans generally incorporate variable transaction fees and distribution fees billed to our broker-dealer clients on a monthly basis. Certain dealers participate in fee programs that do not contain monthly distribution fees and instead incorporate additional per transaction execution fees and minimum monthly fee commitments. Under these fee plans, we electronically add the transaction fee to the spread quoted by the broker-dealer client. The U.S. high-grade transaction fee is generally designated in basis points in yield and, as a result, is subject to fluctuation depending on the duration of the bond traded. The average U.S. high-grade fees per million may vary in the future due to changes in yield, years-to-maturity and nominal size of bonds traded on our platform.

Other Credit Commissions. Other credit includes emerging markets bonds, high-yield bonds, Eurobonds and structured products bonds. Commissions for other credit products generally vary based on the type of the instrument traded using standard fee schedules. Similar to the U.S. high-grade plans, our European fee plans generally incorporate monthly distribution fees, as well as variable transaction fees.

Liquid Products Commissions. Liquid products includes U.S. agency, European government bonds and credit derivatives. Commissions for liquid products generally vary based on the type of the instrument traded using standard fee schedules.

For trades that we execute between and among institutional investor and broker-dealer clients on a matched principal basis by serving as counterparty to both the buyer and the seller, we earn our commission through the difference in price between the two trades. Distribution fees include any unused monthly fee commitments under our variable fee plans.

We anticipate that average fees per million may change in the future. Consequently, past trends in commissions are not necessarily indicative of future commissions.

Other Revenue

In addition to the commissions discussed above, we earn revenue from information and post-trade services, investment income and other income.

Information and post-trade services. We generate revenue from information services provided to our broker-dealer clients, institutional investor clients and data-only subscribers. Information services are invoiced monthly, quarterly or

annually. When billed in advance, revenues are deferred and recognized monthly on a straight-line basis. We also generate revenue from trade matching and regulatory transaction reporting services. Revenue is recognized in the period the services are provided.

Investment Income. Investment income consists of income earned on our investments.

Other. Other revenues include revenue from professional consulting services, technology software licenses and maintenance and support services, fees from telecommunications line charges to broker-dealer clients, initial set-up fees and other miscellaneous revenues.

Expenses

In the normal course of business, we incur the following expenses:

Employee Compensation and Benefits. Employee compensation and benefits is our most significant expense and includes employee salaries, stock-based compensation costs, other incentive compensation, employee benefits and payroll taxes.

Depreciation and Amortization. We depreciate our computer hardware and related software, office hardware and furniture and fixtures and amortize our capitalized software development costs on a straight-line basis over three to seven years. We amortize leasehold improvements on a straight-line basis over the lesser of the life of the improvement or the remaining term of the lease. Intangible assets with definite lives, including purchased technologies, customer relationships and other intangible assets, are amortized over their estimated useful lives, ranging from three to 15 years. Intangible assets are assessed for impairment when events or circumstances indicate a possible impairment.

Technology and Communications. Technology and communications expense consists primarily of costs relating to maintenance on software and hardware, our internal network connections, data center hosting costs and data feeds provided by outside vendors or service providers. The majority of our broker-dealer clients have dedicated high-speed communication lines to our network in order to provide fast data transfer. We charge our broker-dealer clients a monthly fee for these connections, which is recovered against the relevant expenses we incur.

Professional and Consulting Fees. Professional and consulting fees consist primarily of accounting fees, legal fees and fees paid to information technology and other consultants for services provided for the maintenance of our trading platform and information and post-trade services products.

Occupancy. Occupancy costs consist primarily of office and equipment rent, utilities and commercial rent tax.

Marketing and Advertising. Marketing and advertising expense consists primarily of print and other advertising expenses we incur to promote our products and services. This expense also includes costs associated with attending or exhibiting at industry-sponsored seminars, conferences and conventions, and travel and entertainment expenses incurred by our sales force to promote our trading platform and information services.

General and Administrative. General and administrative expense consists primarily of general travel and entertainment, clearing costs from matched principal trades, board of directors' expenses, charitable contributions, provision for doubtful accounts, and various state franchise and U.K. value-added taxes.

Expenses may grow in the future, notably in employee compensation and benefits, primarily due to investment in new products and geographic expansion. However, we believe that operating leverage can be achieved by increasing volumes in existing products and adding new products without substantial additions to our infrastructure.

Critical Accounting Policies and Estimates

This Management's Discussion and Analysis of Financial Condition and Results of Operations discusses our Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States, also referred to as U.S. GAAP. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of income and expenses during the reporting periods. We base our estimates and judgments on historical experience and on various other factors that we believe are reasonable under the circumstances. Actual

results may differ from these estimates under varying assumptions or conditions. Note 2 of the Notes to our Consolidated Financial Statements includes a summary of the significant accounting policies and methods used in the preparation of our Consolidated Financial Statements. There were no significant changes to our critical accounting policies and estimates during the three months ended March 31, 2016, as compared to those we disclosed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2015.

Recent Accounting Pronouncements

See Note 2 to the Consolidated Financial Statements for a discussion on recent accounting pronouncements.

Segment Results

We operate an electronic multi-party platform for the trading of fixed-income securities and provide related data, analytics, compliance tools and post-trade services. We consider our operations to constitute a single business segment because of the highly integrated nature of these product and services, of the financial markets in which we compete and of our worldwide business activities. We believe that results by geographic region or client sector are not necessarily meaningful in understanding our business. See Note 13 to the Consolidated Financial Statements for certain geographic information about the Company's business required by U.S. GAAP.

Results of Operations

Three Months Ended March 31, 2016 Compared to Three Months Ended March 31, 2015

Overview

Total revenues increased by \$11.8 million or 15.4% to \$88.6 million for the three months ended March 31, 2016, from \$76.8 million for the three months ended March 31, 2015. This increase in total revenues was primarily due to higher commissions of \$12.1 million. A 5.5% change in the foreign currency exchange rates of the Pound Sterling compared to the U.S. dollar from the three months ended March 31, 2015 to the three months ended March 31, 2016 had the effect of decreasing revenues by \$0.7 million.

Total expenses increased by \$5.9 million or 15.5% to \$44.2 million for the three months ended March 31, 2016, from \$38.3 million for the three months ended March 31, 2015. This increase was primarily due to higher employee compensation and benefits of \$3.4 million and an increase in general and administrative expense of \$1.2 million. The change in foreign currency exchange rates had the effect of decreasing expenses by \$0.7 million in the three months ended March 31, 2016.

Income before taxes increased by \$5.9 million or 15.2% to \$44.4 million for the three months ended March 31, 2016, from \$38.5 million for the three months ended March 31, 2015. Net income increased by \$4.4 million or 17.8% to \$29.0 million for the three months ended March 31, 2016, from \$24.6 million for three months ended March 31, 2015.

Revenues

Our revenues for the three months ended March 31, 2016 and 2015, and the resulting dollar and percentage changes, were as follows:

	Three Months Ended March 31, 2016		2015					
	\$	% of Revenues	\$	% of Revenues	\$	% Change		%
	(\$ in thousands)							
Commissions	\$79,093	89.3	% \$67,018	87.3	% \$12,075	18.0		%
Information and post-trade services	7,779	8.8	7,679	10.0	100	1.3		
Investment income	418	0.5	183	0.2	235	128.4		
Other	1,283	1.4	1,891	2.5	(608)	(32.2)		
Total revenues	\$88,573	100.0	% \$76,771	100.0	% \$11,802	15.4		%

Commissions. Our commission revenues for the three months ended March 31, 2016 and 2015, and the resulting dollar and percentage changes, were as follows:

	Three Months Ended March 31,				
	2016	2015	\$	%	
	Change				
	(\$ in thousands)				
Variable transaction fees					
U.S. high-grade	\$31,568	\$26,887	\$4,681	17.4	%
Other credit	30,921	23,753	7,168	30.2	
Liquid products	620	701	(81)	(11.6)	
Total variable transaction fees	63,109	51,341	11,768	22.9	
Distribution fees					
U.S. high-grade	14,224	13,950	274	2.0	
Other credit	1,500	1,446	54	3.7	
Liquid products	260	281	(21)	(7.5)	
Total distribution fees	15,984	15,677	307	2.0	
Total commissions	\$79,093	\$67,018	\$12,075	18.0	%

Variable Transaction Fees

The following table shows the extent to which the increase in variable transaction fees for the three months ended March 31, 2016 was attributable to changes in transaction volumes and variable transaction fees per million:

	Change from the Three Months Ended March 31, 2015			
	U.S. High-Grade	Other Credit	Liquid Products	Total
	(In thousands)			
Volume increase (decrease)	\$5,982	\$10,289	\$ (57)	\$16,214
Variable transaction fee per million (decrease)	(1,301)	(3,121)	(24)	(4,446)
Total commissions increase (decrease)	\$4,681	\$7,168	\$ (81)	\$11,768

Our trading volumes for the three months ended March 31, 2016 and 2015 were as follows:

	Three Months Ended March 31,				
	2016	2015	\$ Change	% Change	
Trading Volume Data (in millions)					
U.S. high-grade - fixed rate	\$170,219	\$137,987	\$32,232	23.4	%
U.S. high-grade - floating rate	7,507	7,395	112	1.5	
Total U.S. high-grade	177,726	145,382	32,344	22.2	
Other credit	116,974	81,619	35,355	43.3	
Liquid products	15,320	16,675	(1,355)	(8.1)	
Total	\$310,020	\$243,676	\$66,344	27.2	%

Number of U.S. Trading Days	61	61
Number of U.K. Trading Days	62	63

For volume reporting purposes, transactions in foreign currencies are converted to U.S. dollars at average monthly rates. The 22.2% increase in our U.S. high-grade volume was principally due to an increase in our estimated market share of adjusted total U.S. high-grade corporate bond volume as reported by Financial Industry Regulatory Authority (“FINRA”) Trade Reporting and Compliance Engine (“TRACE”) from 13.7 % for the three months ended March 31, 2015 to 14.9% for the three months ended March 31, 2016, coupled with an increase in overall market volume as measured by FINRA TRACE. We adjusted the reported U.S. high-grade TRACE volumes to eliminate the increased reporting of affiliate back-to-back trades by certain broker-dealers that occurred from April 2014 through October 2015. Adjusted FINRA TRACE U.S. high-grade volume increased 12.3% to \$1.2 trillion for the

three months ended March 31, 2016 from \$1.1 trillion for the three months ended March 31, 2015. Based on information provided by FINRA, we believe that the TRACE volumes, as adjusted by us, provide a more accurate comparison to prior period reporting. We have provided a reconciliation of the reported U.S. high-grade TRACE volumes to the adjusted U.S. high-grade TRACE volumes in the “Investor Relations” section of our website.

Other credit volumes increased by 43.3% for the three months ended March 31, 2016 compared to the three months ended March 31, 2015, primarily due to increases of 54% in Eurobond volume, 45% in high-yield bond volume and 36% in emerging markets bond volume. Liquid products volume (excluding credit derivatives) decreased by 8.2% for the three months ended March 31, 2016 compared to the three months ended March 31, 2015, due mainly to a 14.6% decrease in U.S. agency bond market volume.

Our average variable transaction fee per million for the three months ended March 31, 2016 and 2015 was as follows:

	Three Months Ended March 31,	
	2016	2015
Average Variable Transaction fee per million		
U.S. high-grade - fixed rate	\$184	\$192
U.S. high-grade - floating rate	36	46
Total U.S. high-grade	178	185
Other credit	264	291
Liquid products	40	42
Total	204	211

Total U.S. high-grade average variable transaction fee per million decreased to \$178 per million for the three months ended March 31, 2016 from \$185 per million for the three months ended March 31, 2015 principally as a result of the migration of certain of our broker-dealer clients from an all-variable fee plan to a plan that incorporates a monthly distribution fee. Other credit average variable transaction fee per million decreased to \$264 per million for the three months ended March 31, 2016 from \$291 per million for the three months ended March 31, 2015 due to a larger percentage of volume in products that carry lower fees per million, principally Eurobond and emerging market sovereign bonds.

Distribution Fees

U.S. high-grade distribution fees increased \$0.3 million principally due to an increase in unused monthly fee commitments under our all variable fee plan.

Information and Post-Trade Services. Information and post-trade services revenues increased by \$0.1 million. The change in foreign currency exchange rates had the effect of decreasing information and post-trade services revenue by \$0.4 million for the three months ended March 31, 2016. Excluding the negative impact of foreign exchange, information services revenue increased \$0.6 million as a result of new data contracts. Our transaction reporting business processed approximately 301 million and 279 million transactions for the three months ended March 31, 2016 and 2015, respectively.

Investment Income. Investment income increased by \$0.2 million primarily due to a higher investment balance in 2016.

Other. Other income decreased by \$0.6 million principally due to the wind-down of a professional consulting service engagement.

Expenses

Our expenses for the three months ended March 31, 2016 and 2015, and the resulting dollar and percentage changes were as follows:

	Three Months Ended March 31,		2015			
	2016		2015		\$	%
	\$	% of Revenues	\$	% of Revenues	Change	Change
	(\$ in thousands)					
Expenses						
Employee compensation and benefits	\$24,527	27.7 %	\$21,174	27.6 %	\$3,353	15.8 %
Depreciation and amortization	4,681	5.3	4,612	6.0	69	1.5
Technology and communications	4,304	4.9	4,338	5.7	(34)	(0.8)
Professional and consulting fees	3,862	4.4	3,282	4.3	580	17.7
Occupancy	1,161	1.3	992	1.3	169	17.0
Marketing and advertising	1,778	2.0	1,192	1.6	586	49.2
General and administrative	3,890	4.4	2,679	3.5	1,211	45.2
Total expenses	\$44,203	49.9 %	\$38,269	49.9 %	\$5,934	15.5 %

Employee Compensation and Benefits. Employee compensation and benefits increased by \$3.4 million primarily due to a \$2.5 million increase in salaries and benefits as a result of higher employee headcount, a \$0.5 million increase in stock-based compensation resulting from higher employee equity awards granted in 2016, and higher employee incentive compensation of \$0.4 million, which is tied to operating performance.

Depreciation and Amortization. Depreciation and amortization increased by \$0.1 million primarily due to higher amortization of software development costs of \$0.2 million offset by lower amortization expense of acquired intangible assets. For the three months ended March 31, 2016 and 2015, \$2.7 million and \$0.8 million, respectively, of equipment purchases and leasehold improvements and \$3.3 million and \$2.7 million, respectively, of software development costs were capitalized.

Technology and Communications. Technology and communication expenses were \$4.3 million for both the three months ended March 31, 2016 and 2015.

Professional and Consulting Fees. Professional and consulting fees increased by \$0.6 million due to higher technology consulting costs of \$0.2 million, recruiting fees of \$0.2 million and consulting fees associated with new system implementations of \$0.2 million.

Occupancy. Occupancy costs increased by \$0.2 million primarily due to rent associated with additional New York City office space that was occupied in April 2015.

Marketing and Advertising. Marketing and advertising expenses increased by \$0.6 million primarily due to higher sales related travel and entertainment costs of \$0.4 million.

General and Administrative. General and administrative expenses increased by \$1.2 million primarily due to higher clearing costs of \$1.1 million.

Provision for Income Tax. The \$1.5 million increase in the tax provision was primarily attributable to higher pre-tax income offset by a lower effective tax rate. Our consolidated effective tax rate for the three months ended March 31, 2016 was 34.7%, compared to 36.1% for the three months ended March 31, 2015. The decrease was principally due to a higher percentage of income attributable to lower tax jurisdictions. Our consolidated effective tax rate can vary from period to period depending on, among other factors, the geographic mix of our earnings and changes in tax legislation and tax rates.

Liquidity and Capital Resources

During the past three years, we have met our cash needs through cash on hand and internally generated funds. Cash and cash equivalents and investments totaled \$285.2 million at March 31, 2016.

In January 2013, we entered into a three-year credit agreement that provides for revolving loans and letters of credit up to an aggregate of \$50.0 million. In October 2015, we entered into an amended and restated credit agreement (the “Credit Agreement”) that increased the borrowing capacity to an aggregate of \$100 million, including a \$5.0 million sub-limit for standby letters of credit. The Credit Agreement will mature in October 2017. As of March 31, 2016, we had \$1.1 million in letters of credit outstanding leaving \$98.9 million available to borrow under the Credit Agreement. Subject to satisfaction of certain specified conditions, we are permitted to upsize the borrowing capacity under the Credit Agreement by an additional \$50.0 million.

Our cash flows were as follows:

	Three Months Ended March 31,			
	2016	2015	\$ Change	% Change
	(\$ in thousands)			
Net cash (used in) provided by operating activities	\$(57,383)	\$10,034	\$(67,417)	(671.9) %
Net cash provided by (used in) investing activities	6,339	(1,048)	7,387	(704.9)
Net cash (used in) financing activities	(10,685)	(17,241)	6,556	(38.0)
Effect of exchange rate changes on cash and cash equivalents	(4)	379	(383)	(101.1)
Net (decrease) for the period	\$(61,733)	\$(7,876)	\$(53,857)	683.8 %

The \$67.4 million decrease in net cash (used in) provided by operating activities was primarily due to a net increase in corporate debt trading investments of \$73.2 million offset by an increase in net income of \$4.4 million and a decrease in working capital of \$1.7 million.

The \$7.4 million increase in net cash provided by (used in) investing activities was primarily due to a reduction of \$9.6 million in net purchases of available-for-sale investments offset by an increase in capital expenditures of \$2.2 million.

The \$6.6 million decrease in net cash used in financing activities was principally due to a decrease of \$7.7 million in repurchases of our common stock and higher excess tax benefits from stock-based compensation of \$2.0 million, offset by a \$2.2 million increase in the cash dividend paid on common stock.

Free cash flow is defined as cash flow from operating activities excluding net purchases of corporate debt trading investments less expenditures for furniture, equipment and leasehold improvements and capitalized software development costs. For the 12 months ended March 31, 2016 and 2015, free cash flow was \$108.4 million and \$95.8 million, respectively. Free cash flow is a non-GAAP financial measure. We believe that this non-GAAP financial measure, when taken into consideration with the corresponding GAAP financial measures, is important in gaining an understanding of our financial strength and cash flow generation.

Past trends of cash flows are not necessarily indicative of future cash flow levels. A decrease in cash flows may have a material adverse effect on our liquidity, business and financial condition.

Other Factors Influencing Liquidity and Capital Resources

We believe that our current resources are adequate to meet our liquidity needs and capital expenditure requirements for at least the next 12 months. However, our future liquidity and capital requirements will depend on a number of factors, including expenses associated with product development and expansion and new business opportunities that are intended to further diversify our revenue stream. We may also acquire or invest in technologies, business ventures

or products that are complementary to our business. In the event we require any additional financing, it will take the form of equity or debt financing. Any additional equity offerings may result in dilution to our stockholders. Any debt financings, if available at all, may involve restrictive covenants with respect to dividends, issuances of additional capital and other financial and operational matters related to our business.

Certain of our U.S. subsidiaries are registered as a broker-dealer or a SEF and therefore are subject to the applicable rules and regulations of the SEC and the CFTC. These rules contain minimum net capital requirements, as defined in the applicable regulations, and also may require a significant part of the registrants' assets be kept in relatively liquid form. Certain of our foreign subsidiaries are regulated by the Financial Conduct Authority in the U.K. or Ontario Securities Commission in Canada and must maintain financial resources, as defined in the applicable regulations, in excess of the applicable financial resources requirement. As of March 31, 2016, each of our subsidiaries that are subject to these regulations had net capital or financial resources in excess of their minimum requirements. As of March 31, 2016, our subsidiaries maintained aggregate net capital and financial resources that were \$115.9 million in excess of the required levels of \$9.8 million.

Each of our U.S. and foreign regulated subsidiaries are subject to local regulations which generally prohibit repayment of borrowings from our affiliates, paying cash dividends, making loans to our affiliates or otherwise entering into transactions that result in a significant reduction in regulatory net capital or financial resources without prior notification to or approval from such regulated entity's principal regulator.

As of March 31, 2016, the amount of unrestricted cash held by our non-U.S. subsidiaries was \$46.0 million. We have determined that unremitted earnings of our foreign subsidiaries are considered indefinitely reinvested outside of the U.S. Any repatriation of such foreign earnings by way of dividend may be subject to both U.S. federal and state income taxes, reduced by applicable foreign tax credits. However, we do not have any current needs or foreseeable plans to repatriate cash by way of dividends from our non-U.S. subsidiaries.

We execute certain bond transactions between and among institutional investor and broker-dealer clients on a matched principal basis by serving as counterparty to both the buyer and the seller in trades which settle through a third-party clearing broker. Settlement typically occurs within one to three trading days after the trade date. Cash settlement of the transaction occurs upon receipt or delivery of the underlying instrument that was traded. For the three months ended March 31, 2016 and 2015, revenues from matched principal trading were approximately \$7.5 million and \$3.5 million, respectively. Under securities clearing agreements with third party clearing brokers, we maintain collateral deposits with each clearing broker in the form of cash. As of March 31, 2016, the amount of the collateral deposits included in prepaid expenses and other assets in the Consolidated Statements of Financial Condition was \$1.5 million. For the three months ended March 31, 2016, and 2015, clearing expenses associated with matched principal transactions were \$1.8 million and \$0.7 million, respectively, and are classified under general and administrative expense on the Consolidated Statements of Operations. We are exposed to credit risk in the event a counterparty does not fulfill its obligation to complete a transaction. Pursuant to the terms of the securities clearing agreements between us and our clearing brokers, the clearing brokers have the right to charge us for losses resulting from a counterparty credit failure. The losses are not capped at a maximum amount and apply to all trades executed through such clearing broker. We did not record any liabilities or losses with regard to this right for the three months ended March 31, 2016 and 2015.

In the ordinary course of business, we enter into contracts that contain a variety of representations, warranties and general indemnifications. Our maximum exposure from any claims under these arrangements is unknown, as this would involve claims that have not yet occurred. However, based on past experience, we expect the risk of material loss to be remote.

In January 2016, our Board of Directors authorized a new two-year share repurchase program for up to \$25.0 million of our common stock. Shares repurchased under the program will be held in treasury for future use.

In April 2016, our Board of Directors approved a quarterly cash dividend of \$0.26 per share payable on May 26, 2016 to stockholders of record as of the close of business on May 12, 2016. Any future declaration and payment of dividends will be at the sole discretion of our Board of Directors. Our Board of Directors may take into account such matters as general business conditions, our financial results, capital requirements, contractual obligations, legal, and regulatory restrictions on the payment of dividends to our stockholders or by our subsidiaries to their respective parent entities, and any such other factors as the Board of Directors may deem relevant.

Effects of Inflation

Because the majority of our assets are short-term in nature, they are not significantly affected by inflation. However, the rate of inflation may affect our expenses, such as employee compensation, office leasing costs and communications expenses, which may not be readily recoverable in the prices of our services. To the extent inflation results in rising interest rates and has other adverse effects on the securities markets, it may adversely affect our

financial condition and results of operations.

Contractual Obligations and Commitments

Since December 31, 2015, we have not had any material changes outside the ordinary course of our business to our contractual obligations and commitments.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of the loss resulting from adverse changes in market rates and prices, such as interest rates and foreign currency exchange rates.

Market Risk

The global financial services business is, by its nature, risky and volatile and is directly affected by many national and international factors that are beyond our control. Any one of these factors may cause a substantial decline in the U.S. and global financial services markets, resulting in reduced trading volume and revenues. These events could have a material adverse effect on our business, financial condition and results of operations.

As of March 31, 2016, we had \$146.0 million of investments, which were primarily invested in corporate bonds and classified as securities available-for-sale or trading securities. Adverse movements, such as a 10% decrease in the value of these securities or a downturn or disruption in the markets for these securities, could result in a substantial loss. In addition, principal gains and losses resulting from these securities could on occasion have a disproportionate effect, positive or negative, on our financial condition and results of operations for any particular reporting period.

Interest Rate Risk

Interest rate risk represents our exposure to interest rate changes with respect to our cash, cash equivalents and investments. As of March 31, 2016, our cash and cash equivalents and investments amounted to \$138.0 million. A hypothetical five basis point decrease in short-term interest rates would decrease our annual pre-tax earnings by approximately \$0.1 million, assuming no change in the amount or composition of our cash and cash equivalents.

As of March 31, 2016, a hypothetical 100 basis point increase or decrease in interest rates would decrease or increase the fair value of the securities available-for-sale investment portfolio by approximately \$0.7 million, assuming no change in the amount or composition of the investments. The hypothetical unrealized gain (loss) of \$0.7 million would be recognized in other comprehensive income on the Consolidated Statements of Financial Condition.

A similar increase or decrease in interest rates would decrease or increase the fair value of the trading securities portfolio by approximately \$0.8 million. The hypothetical unrealized gain (loss) of \$0.8 million would be recognized in other income in the Consolidated Statements of Operations.

We do not maintain an inventory of bonds that are traded on our platform.

Derivative Risk

Our limited derivative risk stems from our activities in the foreign currency forward contract market. We use this market to mitigate our U.S. dollar versus Pound Sterling exposure that arises from the activities of our U.K. subsidiaries. As of March 31, 2016, the fair value of the notional amount of our foreign currency forward contract was \$51.7 million. We do not speculate in any derivative instruments.

Credit Risk

Two of our subsidiaries, MarketAxess Corporation and MarketAxess Europe Limited, act as a matched principal counterparty in connection with the Open Trading™ transactions that we execute between clients. We act as an intermediary in these transactions by serving as counterparty to both the buyer and the seller in trades which then settle through a third-party clearing broker. Settlement typically occurs within one to three trading days after the trade date. Cash settlement of the transaction occurs upon receipt or delivery of the underlying instrument that was traded.

We are exposed to credit and performance risks in our role as matched principal trading counterparty to our Open Trading™ clients executing bond trades on our platform, including the risk that counterparties that owe us money or securities will not perform their obligations. These parties may default on their obligations to us due to bankruptcy,

lack of liquidity, operational failure or other reasons. Adverse movements in the prices of securities that are the subject of these transactions can increase our risk. In connection with Open Trading™ or other anonymous protocols, we expect that the number of transactions in which we act as a matched principal will increase.

In the process of executing matched principal transactions, miscommunications and other errors by our clients can arise whereby one of the counterparties to the transaction rejects the trade or otherwise refuses to settle their side of the transaction on the terms recorded by our platform. Although we maintain a clearly erroneous trade policy for Open Trading™ transactions in order to promote the integrity of the platform and to maintain safeguards, these unsettled or rejected trades can still create a potential liability for our subsidiary involved in the trade. If we are required to hold a position as a result of an error or a failure to deliver is prolonged, we may also incur additional financing costs or regulatory capital charges. Depending on the cause, number and value of the trades that are the

subject of an alleged error or dispute, such trades have the potential to have a material adverse effect on our financial condition and results of operations.

We have policies and procedures in place to identify and manage our credit risk. In connection with the recent growth of our Open Trading™ protocols, we have implemented additional automated controls to help us manage our credit risk exposure. There can be no assurance that the policies, procedures and automated controls we use to manage this credit risk will effectively mitigate our credit risk exposure. Some of our risk management procedures are reliant upon the evaluation of information regarding the fixed- income markets, our clients or other relevant matters that are publicly available or otherwise acquired from third party sources. Such information may not be accurate, complete, up-to-date or properly assessed and interpreted by us. If our risk management procedures fail, our business, financial condition and results of operations may be adversely affected. Furthermore, our insurance policies are unlikely to provide coverage for such risks.

Cash and cash equivalents includes cash and money market instruments that are primarily maintained at one major global bank. Given this concentration, we are exposed to certain credit risk in relation to our deposits at this bank.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures. Our management, including the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our “disclosure controls and procedures,” as that term is defined in Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as of March 31, 2016. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective to ensure that information required to be disclosed by MarketAxess in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and to ensure that information is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control over Financial Reporting. There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) and Rule 15d-15(f) under the Exchange Act) during the quarter ended March 31, 2016 identified in connection with the evaluation thereof by our management, including the Chief Executive Officer and Chief Financial Officer, that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II — Other Information

Item 1. Legal Proceedings

In the normal course of business, we and our subsidiaries included in the consolidated financial statements may be involved in various lawsuits, proceedings and regulatory examinations. We assess liabilities and contingencies in connection with outstanding legal proceedings, if any, utilizing the latest information available. For matters where it is probable that we will incur a material loss and the amount can be reasonably estimated, we would establish an accrual for the loss. Once established, the accrual would be adjusted to reflect any relevant developments. When a loss contingency is not both probable and estimable, we would not establish an accrual.

Based on currently available information, the outcome of our outstanding matters is not expected to have a material adverse impact on our financial position. It is not presently possible to determine our ultimate exposure to these matters and there is no assurance that the resolution of the outstanding matters will not significantly exceed any reserves accrued by us.

Item 1A. Risk Factors

There have been no material changes in our risk factors from those disclosed in our most recent Form 10-K for the year ended December 31, 2015. For a discussion of the risk factors affecting the Company, see “Risk Factors” in Part I, Item 1A of our 2015 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Recent Sales of Unregistered Securities

None.

Issuer Purchases of Equity Securities

During the quarter ended March 31, 2016, we repurchased the following shares of common stock:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Dollar Value of Shares That May Yet Be Purchased Under the Plans
--------	--	---------------------------------------	---	---

			and Programs	and Programs (In thousands)
January 1, 2016 -- January 31, 2016	45,240	\$ 109.61	448	\$ 38,823
February 1, 2016 -- February 29, 2016	4,919	112.96	—	25,000
March 1, 2016 -- March 31, 2016	9,404	122.70	9,404	23,846
	59,563	\$ 109.09	9,852	

During the three months ended March 31, 2016, we repurchased 59,563 shares of common stock. The repurchases included 49,711 shares surrendered by employees to us to satisfy the exercise price and withholding tax obligations upon the vesting of restricted shares and the exercise of stock options and 9,852 shares repurchased in connection with our share repurchase programs.

In January 2014, our Board of Directors authorized a share repurchase program for up to \$35.0 million of our common stock. In July 2014, our Board of Directors increased the authorization under the share repurchase program by an additional \$65.0 million of our common stock. The share repurchase program expired on February 29, 2016. In January 2016, our Board of Directors authorized a new two-year share repurchase program for up to \$25.0 million of our common stock. For the three months ended March 31, 2016, we repurchased 9,852 shares of common stock at a cost of \$1.2 million. As of March 31, 2016, approximately \$23.8 million remains authorized for repurchase under the program. Shares repurchased under each program will be held in treasury for future use.

Item 3. Defaults upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.

Item 6. Exhibits
